Mr. DIAL. It will be more expense than the revenue would amount to.

Mr. SMOOT. Oh, no. We ascertain the amount of silver or the amount of lead or the amount of gold in every ton of ore mined. I will say to the Senator that in doing that we pay the sampling works for unloading the ore and crushing it, running it through the sampler, assaying it, and putting it back in the car, 50 cents per ton. But with this product we would not have to do that. This is merely a matter of obtaining a sample, which could be done in a very few moments.

Mr. DIAL. Possibly each ton would vary in the content of silica. It is not grown; it is not manufactured; it is just picked up.

Mr. SMOOT. I am quite sure the Senator has never seen a sampling mill and how we arrive at the assay of a whole carload of ore.

Mr. DIAL. No; I am not familiar with ore.

Mr. SMOOT. This product is washed and dried and handled in that way. If it were not 99 per cent pure silica, then, of course, it would never in the world pay to do it. With the amendment, it applies only to that kind of sand.

Mr. DIAL. It seems to me it would be very expensive. The amount of silica might not be the same in each ton of sand.

Mr. JONES of New Mexico. Mr. President, I have been trying to discover the reason for the proposed duty on sand. We have had many theories advanced as to why the duty on other commodities has been fixed. I have been trying to square this situation with some of the other reasons which have been given for provisions in the bill. We can not reconcile the fixing of this duty on the ground that it represents the difference in the cost of production at home and abroad, because we do not know the cost of production at home and abroad.

We have had other instances where the committee have taken the price of the commodity in the United States and abroad during normal times prior to the war and used that as the basis for fixing the duty, but in this case we have not even that information to aid us in fixing the duty on sand. We have at other times discovered that before the war a certain percentage of the commodity was being imported, and that since the war the imports have increased.

Therefore it was thought that an additional duty should be placed upon the commodity; but that will not apply in this instance, because such has not been the case. We never heard of sand coming into the United States prior to the war. We can not say that there has been an increase, because importations never occurred before, and we do not know what is going to happen in the future. They may never occur again. There is no assurance that there has been built up any general traffic in the importation of sand. So I have been wondering why this duty was put upon sand.

I have not been able to discover any similarity between conditions surrounding this article and any other in the bill, except that there is a mere statement that some of this commodity has reached the shores of America. No one, however, has pretended that is a justification for the levy of the duties under this bill. So I have been racking my brain to try to discover what the real reason for the imposition of the duty is. I am inclined to think that I have finally discovered it.

I am regretful that the genial and active Senator from New Jersey [Mr. FRELINGHUYSEN] is not now present in the Chamber. He is a member of the Finance Committee—a very aggressive, wide-awake, active member of that committee. He hails from the State of New Jersey. There will be an election next November in that State in which the distinguished Senator will be very much interested. He has a constituent up there who has been digging sand. That constituent has doubtless been pondering as to just what this great tariff bill means to him. He has looked over his business project. If he hauls his sand in a wagon, he realizes, first, that the wagon itself is highly taxed. Not only the wagon, as a finished vehicle, is taxed, but practically every separate part of it is taxed. The tires on the wheels, the bolts in the wagon, the nails in the wagon, the hoop steel that covers the side boards, are taxed. The rivets are taxed; the grease, that makes it easy for the wheels to turn, is taxed. Every piece of metal, iron, or wood in that wagon is taxed. He looks at the harness on his team, and he discovers that this bill imposes a tax on the leather in harness. Every rivet that is used in the manufacture of the harness is taxed; the twine is taxed; the wax that is used upon the thread which sews it together is taxed.

The machine which does the sewing is taxed. Even the oil which lubricates that sewing machine is taxed. All the metal, the nickel, the iron or steel in the sewing machine is taxed. The shoes upon his horses' feet are taxed. The spade with which he digs the sand is taxed. The gloves which he wears upon his hands in shoveling the sand are taxed. The clothing which he wears in the humble occupation of digging that sand is taxed. It is proposed by this bill to tax the shoes and socks upon his feet and the suspenders which hold up his overalls. The buttons upon his overalls, the knife which he has in his pocket, the pencil with which he makes out his bill, the paper upon which the bills are written are taxed. If he uses a pen, the pen point is taxed; the little penholder is separately taxed, whether it is metal or rubber. The ink which he uses is taxed. If he transports his sand with an automotive transfer vehicle, everything about that is taxed. If he has his horses in the barn, the barn is taxed. If it is made of brick, it is proposed to tax the brick which go into it. The lime and the mortar are taxed. The shingles upon the roof are taxed. If the barn is of tile or concrete, those materials are taxed. If, perchance, it is built of concrete, the cement which goes into the building is taxed.

This poor fellow, digging the sand, looks into his home and finds that practically everything there is taxed.

The bottle which his infant uses to obtain its nourishment is taxed; the cradle is taxed; every garment which goes to keep the infant warm is taxed. He looks at his wife and children and finds that everything they wear is taxed; nearly everything they eat is taxed. He looks at the little toys that he brings home to his children; they are all taxed. No wonder that this humble constituent of the Senator from New Jersey, digging sand, is wondering where he is going to come out.

It is true that nature has provided him with his material; it is a simple process to eliminate the impurities. He has never had any competition before; but because a foreign ship can not find some sort of merchantable commodity to bring over to the United States as ballast, that ship has brought over some sand; and this constituent of the distinguished Senator from New Jersey has thought that perhaps here he might have an opportunity to recoup in some manner this great number of taxes which he is paying through this bill.

He looked at all those taxes going out from him, and doubtless his purse was meager; doubtless he counted the cost of the humble home; he counted the cost of the garments which his wife and his children must wear, the food which they must eat, and he wanted in some manner to recoup. Doubtless he is a good Republican and felt that he was entitled to it, in that if anything could be had, all that was necessary was to apply to the genial Senator from New Jersey here in Washington. So he lays his case before the genial Senator. The genial Senator says, "Yes; it is true we have never had a tax upon sand heretofore; it is true that this tax if it is levied upon glass sand will increase the cost of the glassware upon the table; it will increase the cost of glass in windows; it will increase the cost of the glass in the door knobs; but everything else is taxed." The Senator's constituent looks into his kitchen and he finds that kitchen ware, regardless of its nature, is all taxed; whether it be of iron or aluminum, of zinc or lead, or whether it be of this very sand, that earthenware is all taxed.

So now I can understand why the distinguished Senator from New Jersey proposes to impose a duty upon sand. He probably says, "It has never been done before; but there is that constituent back there who is taxed whichever way he turns and has nothing for himself, so, whether he will ever benefit from it in the future or not, I will give him some encouragement and I will give a tax upon sand."

So, Mr. President, we can only consider this as an act of generosity arising entirely in the conscience, the good fellowship, the good will, the whole-heartedness of the Senator from New Jersey, who wants to please a constituent. That constituent, in my humble judgment, will never benefit by it. No more sand will come over here. He will still be plodding the old pathway. He will still be digging his sand as of yore. His price will not be increased by reason of this tax; but the distinguished Senator from New Jersey doubtless will gleefully advise him that now there is a tax upon sand. But he will continue in the old plodding way. He will continue to pay the tax upon the shovel that he puts into mother earth; he will pay the tax upon his wagon; he will pay the tax upon his harness; he will pay the tax upon the shoes upon his horses; he will pay the tax upon any machine which he uses; he will pay the tax upon the pen, paper, or pencil which he uses in making out his bill; he will still continue to pay the tax upon the clothing of his family and his children; he will pay the tax upon the toys with which his little children play; and he will look forward to paying a tax upon the shroud which will cover him when he goes to meet the Great Creator. And for such reasons we put a tax upon sand!

I wonder if the distinguished Senators who have been voting for this bill are going to lend their support to the deception of that humble citizen of New Jersey who is digging sand? Are they going to lead him to believe that there has come now some recompense for the enormous taxes which he has been paying and will pay upon the necessities of life? Will they thus deceive him when all the facts, reason, and logic tell us that putting this tax upon sand will have no other effect than to deceive?

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. FRANCE in the chair). The absence of a quorum is suggested. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ball	Frelinghuysen	Lodge	Sheppard
Borah	Gooding	McCumber	Shortridge
Brandegee	Hale	McLean	Smoot
Broussard	Harris	McNary	Sterling
Capper	Heflin	Myers	Sutherland
Cummins	Jones, N. Mex.	Newberry	Townsend
Curtis	Jones, Wash.	Oddie	Walsh, Mont.
Dial	Kellogg	Overman	Warren
Edge	Kendrick	Page	Willis
Elkins	Keyes	Phipps	
Ernst	Ladd	Pittman	
France	Lenroot	Rawson	

The PRESIDENT pro tempore. Forty-five Senators have answered to their names. There is not a quorum present. The Secretary will call the names of the absent Senators.

The Assistant Secretary called the names of the absent Senators, and Mr. BURSUM, Mr. COLT, Mr. FLETCHER, and Mr. NORBECK answered to their names when called.

The PRESIDENT pro tempore. Forty-nine Senators have answered to their names. There is a quorum present.

Mr. JONES of New Mexico. On the amendment offered by the committee, putting a duty upon sand, I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement I made before in regard to my pair and its transfer, I vote "yea."

Mr. DIAL (when his name was called). I have a pair with the junior Senator from Missouri [Mr. SPENCER], which I transfer to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. EDGE (when his name was called). Making the same announcement as to my pair and its transfer, I vote "yea."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as I did on the previous vote, I vote "nay."

Mr. JONES of Washington (when his name was called). As I have heretofore announced, I have a pair with the senior Senator from Virginia [Mr. SWANSON] for the day, and in his absence I withhold my vote.

Mr. KELLOGG (when his name was called). I have a pair with the senior Senator from North Carolina [Mr. SIMMONS]. As he is not present I withhold by vote.

Mr. MCCUMBER (when his name was called). I transfer my pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER] and vote "yea."

Mr. STERLING (when his name was called). Making the same announcement as on the previous vote as to my pair and its transfer, I vote "yea."

Mr. SUTHERLAND (when his name was called). I transfer my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the senior Senator from New York [Mr. WADSWORTH] and vote "yea."

Mr. WILLIS (when his name was called). I have a pair with my colleague, the senior Senator from Ohio [Mr. POMERENE]. Not knowing how he would vote on this question, I withhold my vote.

Mr. BALL. Making the same announcement as before as to the transfer of my pair, I vote "yea."

Mr. LODGE. I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "yea."

Mr. OVERMAN. I desire to announce that my colleague [Mr. SIMMONS] is unavoidably detained. He has a general pair with the junior Senator from Minnesota [Mr. KELLOGG]. I ask that this announcement may stand for the evening.

Mr. HARRIS. I transfer my pair with the junior Senator from New York [Mr. CALDER] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. ERNST. I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Oklahome [Mr. HARRELD] and vote "yea."

Mr. HARRISON. I transfer my pair with the Senator from West Virginia [Mr. ELKINS] to the Senator from Tennessee [Mr. SHIELDS] and vote "nay."

The roll call resulted—yeas 32, nays 14, as follows:

YEAS—32.

Ball	Edge	Ladd	Page
Brandegee	Elkins	Lenroot	Phipps
Broussard	Ernst	Lodge	Rawson
Bursum	France	McCumber	Shortridge
Capper	Frelinghuysen	McLean	Smoot
Colt	Hale	McNary	Sterling
Cummins	Kendrick	Norbeck	Sutherland
Curtis	Keyes	Oddie	Warren

NAYS—14.

Borah	Harrison	Newberry	Townsend
Dial	Heflin	Overman	Walsh, Mont.
Fletcher	Jones, N. Mex.	Pittman	
Harris	Myers	Sheppard	

NOT VOTING—50.

Ashurst	Gerry	La Follette	Owen
Calder	Glass	McCormick	Pepper
Cameron	Gooding	McKellar	Poindexter
Caraway	Harreld	McKinley	Pomerene
Crow	Hitchcock	Moses	Ransdell
Culberson	Johnson	Nelson	Reed
Dillingham	Jones, Wash.	New	Robinson
du Pont	Kellogg	Nicholson	Shields
Fernald	King	Norris	Simmons

Smith	Swanson	Walsh, Mass.	Williams
Spencer	Trammell	Watson, Ga.	Willis
Stanfield	Underwood	Watson, Ind.	
Stanley	Wadsworth	Weller	

The PRESIDENT pro tempore. Upon this question the yeas are 32, the nays are 14; present and not voting, having announced pairs, the senior Senator from Washington [Mr. JONES], the junior Senator from Minnesota [Mr. KELLOGG], and the junior Senator from Ohio [Mr. WILLIS]. So the amendment of the committee is agreed to.

The next amendment was, on page 34, in line 10, after the word "fluorspar," to strike out "$5 per ton of 2,000 pounds: *Provided*, That after the expiration of one year, beginning on the day following the passage of this act, the duty on fluorspar shall be $4 per ton of 2,000 pounds," and to insert "$5.60 per ton," so as to read:

Fluorspar, $5.60 per ton.

Mr. WALSH of Montana. The Senator from New Mexico [Mr. JONES] desires to discuss this amendment. He is now engaged in eating his dinner. I ask that that item be passed over until he returns to the Chamber, and that in the meanwhile we proceed to the consideration of the next paragraph.

Mr. McCUMBER. That course is satisfactory.

The PRESIDENT pro tempore. By unanimous consent, the proposed amendment will be passed over.

The next amendment was, on page 34, after line 13, to strike out:

PAR. 208. Mica, unmanufactured, or rough trimmed only, 4 cents per pound and 17 per cent ad valorem; mica, cut or trimmed, mica splittings, mica plates, and built-up mica, and all manufactures of mica or of which mica is the component material of chief value, 10 cents per pound and 17 per cent ad valorem; ground mica, 4 cents per pound and 20 per cent ad valorem.

And in lieu thereof to insert:

PAR. 208. Mica, unmanufactured, valued at not above 15 cents per pound, 4 cents per pound; valued above 15 cents per pound, 25 per cent ad valorem; mica, cut or trimmed, and mica splittings, 30 per cent ad valorem; mica plates, and built-up mica, and all manufactures of mica or of which mica is the component material of chief value, 40 per cent ad valorem; ground mica, 20 per cent ad valorem.

Mr. WALSH of Montana. I suppose, really, we might properly have from some member of the committee first some explanation as to why the amendment proposed is offered in lieu of or in substitution for the paragraph adopted by the House.

Mr. McCUMBER. If I remember rightly, there was a difference between the classification of the House and the classification of the Underwood law, and we adopted the classification of the Underwood law, and with it we adopted, as I remember, the same rates of duty.

Mr. WALSH of Montana. I think it will be found that the committee conceived that the rates fixed by the House were wholly unjustifiable, and made a very important and very sensible reduction. The amendment as it is presented to us by the Senate committee is in many respects commendable. It does not present for serious consideration any rates except the last two mentioned in the paragraph. It leaves the rates on mica, unmanufactured, valued at not above 15 cents per pound, 4 cents per pound, identical with the rate prescribed in the existing law. It also leaves the rate prescribed in the existing law as to that valued above 15 cents a pound; that is, 25 per cent ad valorem.

So likewise with respect to "mica, cut or trimmed, and mica splittings, 30 per cent ad valorem." That is the rate prescribed in the existing law. The next, however, "mica plates, and built-up mica, and all manufactures of mica, or of which mica is a component material of chief value, 40 per cent ad valorem," is a duty over the existing law, which prescribes 30 per cent. So likewise with the next, "ground mica, 20 per cent ad valorem," the existing law providing a duty of 15 per cent ad valorem.

It will be noticed, therefore, that the rates on unmanufactured mica are left exactly as they are in the present law, but the rates on manufactured mica are increased. In the case of manufactures other than ground mica the increase is 10 per cent, and in the case of ground mica 15 per cent, the rates of increase, however, being identical in both cases, 33⅓ per cent, a very substantial increase.

Mr. President, I can find no justification in the facts at my command for this increase or for any increase in manufactured mica. This is a case in which the peril of an inundation of imports from Germany does not exist. There are no importations of this particular commodity from Germany and none whatever are anticipated. The imports come from other countries, England, Canada, the British Isles, and Brazil.

Mica is very extensively used in the arts. The consumption of it for the manufacture of diaphragms for telephones is very large. It is used for windows in stoves and for lanterns, by reason of its resistance to heat, while it permits the transmission of light.

There are some very considerable importations of this commodity, and particularly during the war the demand increased by reason of its necessity. But notwithstanding that, we export a very considerable quantity of the manufactures of mica. The crude material is found in greatest abundance in North Carolina and in New Hampshire. I do not learn that there is any great demand from either of those States for an increase in the duty on the crude article, nor am I able to discover that any very urgent or persistent demand for an increase in duty was made upon the part of the manufacturers of articles of which mica is a constituent part.

Not only do we export this commodity in its manufactured state in very considerable amounts in value but our exports are continually increasing under the existing law. In that state of affairs I should like to understand if we can be favored with the information upon just exactly what theory the increase in the rate on the manufactured article is asked. Our exports of the manufactures of mica during the year 1916 were $53,524; in 1917, $84,755; in 1918, $71,285; in 1919, $79,581; in 1920, $155,918; that is, we were exporting three times as much of this commodity in 1920 as we were in 1916.

We are exporting it in competition with the manufactures of mica coming from countries in which it is most largely produced. We export to Belgium, France, England, Canada, Mexico, Cuba, Japan, and other countries. When we can manufacture these articles and sell them in the markets of the world in competition with like articles manufactured in the countries which, like ourselves, have an abundant supply of the raw material, how can we justify ourselves in imposing on the manufactures of mica a duty 33⅓ per cent above that which is exacted under the existing law, and which permits of the development of the industry not only for home consumption but for sale in the markets of the world? I can not understand how this can be justified.

I have no information concerning the relative cost of producing the manufactures of mica in this country as compared with the cost of producing them in England, for instance, or in Canada, both of which are engaged in this industry with ourselves. But whatever it may be, there is no such difference as will permit them either to monopolize our own market or to compete with our producers in the foreign market, and accordingly it must, it seems to me, of necessity follow that the cost of production in this country can not be in excess of the cost of production abroad.

I imagine the fact is that these other countries have particular grades of the raw materials and particular styles of the manufactured articles which enable them to get into markets, and we have particular grades and particular styles in the manufactured articles which permit us to get into their markets. That is a healthy condition of things, and I can not understand why the Congress of the United States should be asked under these circumstances to increase the rate.

Mr. McCUMBER. Mr. President, the Senator from Montana, I understand, is satisfied that the rates are equitable so far as the raw materials are concerned, but he objects to the increased rates on the manufactured products. I agree with him in that. I think, so far as the raw product is concerned, that we can fairly well compete with importers; but since the Underwood law was enacted there has been a great change in labor cost, and as the value of the finished product in its many forms has been greatly increased over the labor cost at the time the present law was enacted, we have thought that we ought to give a little heavier duty upon the finished product to partially meet the added cost of the labor, which becomes a more material factor in the finished product. Therefore we slightly increased the duty upon the finished product.

Mr. WALSH of Montana. Mr. President, it seems to me that it is a pretty lame excuse for the committee to offer that the cost of production generally has increased since the Underwood tariff law was enacted, and therefore we give an increased tariff. Is the Senator prepared to say there has not been a proportionate increase in the cost of production abroad? Canada supplies us with the greater portion of our imports, next to Great Britain. Is the Senator prepared to say that the cost of production has not increased in Canada equally with the cost of production in the United States? But whatever the increase may be, we are able to compete. That, it seems to me, is a sufficient answer. It can not be that the difference in the cost of production is likely to impair our ability to manufacture here in competition with foreign countries, when our exports continue to increase and increase in respect to Canada. Let me call attention particularly to that feature.

Mica, manufactured in Canada, was imported into the United States to the amount, in 1916, of $79,834; in 1917, $82,408; in

1918, $45,298; in 1919, $34,057; and in 1920, $55,000. It will be seen that the importations from Canada to this country do not keep up, while, on the other hand, our exports to Canada bear this relation: In 1916, $154 only; in 1917, $2,987; in 1918, $3,395; in 1920, $8,852. So that while the imports from Canada to this country are decreasing the exports from this country to Canada are increasing.

Of course it is a mere request to increase the duty by 33⅓ per cent without any explanation being made whatever except that the cost of production has increased since the time the Underwood law was enacted. The cost of producing the raw material has increased since that time, but the Senator does not find that a good reason for increasing the rate of duty at all on the raw material. This, it seems to me, is a plain gift at the expense of the American people to the manufacturers of this particular commodity without, so far as I can discern, any reason for it.

I have endeavored to be fair about this matter. I have disclosed my view that the rates with respect to the raw product are unexceptional. A demand was made by the producers of mica in North Carolina for an increase of rate in accordance with the recommendation made by the House, but it was rejected by the Finance Committee. That being the case, I think that we ought to have some better explanation and some better reason than has been given for the increase on the manufactured mica.

Mr. McCUMBER. Mr. President, I regret that my explanation has not satisfied the Senator from Montana. I stated that while wages have gone up in the United States, the wage element in proportion to the raw material elements in the manufactured product is considerably in excess of the wage element in proportion to the price of the raw product. Inasmuch as there is a higher wage element in the manufactured product, it was thought necessary by the committee to slightly increase the rate upon the manufactured product. I think we were fully justified in that for the reason which I have given.

I disagree with the Senator that the cost of labor in Canada is the same that it is in the United States. It is somewhat lower, but India furnishes the lowest point, at least as much as Canada, up to about four times as much as the Canadian imports into the United States. Therefore, if I remember the figures correctly, there has not been the same increase in wages in India, from which we receive a great proportion of our imports, as there has been in Canada or the United States.

Mr. WALSH of Montana. I think an erroneous impression may be gathered from the statement of the Senator from North Dakota. We do not import any manufactured mica whatever from India. India furnishes us raw mica, but it furnishes no manufactured articles of that character whatever; at least none that is sufficient to be recorded. If the Senator is correct about it, the logic of his argument is that a higher rate of duty ought to be imposed upon the raw material, and he impeaches the action taken by the Senate committee with respect to that commodity by that kind of an argument. Our real competitors are England and Canada. In 1916 Canada furnished 709,614 pounds of mica as against only 48,251 pounds coming from India. India is a competitor in the production not only of the manufactured article but of the raw material as well. The argument based upon India does not have any application whatever to the manufactured product.

Mr. McCUMBER. I was speaking of the labor cost upon the raw product, because that is what the Senator from Montana had referred to. He suggested, as I understood him, that the production cost of the raw product in the other countries had increased the same as in the United States, and I called attention to the fact that I did not think it had increased so much in India as it had in Canada and the United States. When we came to the manufactured product, in 1919 Canada stood first in importations into the United States—the figures for that year are the last I have here—India came second and England third. We imported from England $268,000 worth, from Canada $516,000 worth, and from British India $373,000 worth, so British India has become quite a competitor even in the manufactured product.

Mr. WALSH of Montana. I was not able to follow accurately the figures given by the Senator from North Dakota, but inquire of him where he gets the information that we have large importations of mica from India?

Mr. McCUMBER. I get it from page 19 of Tariff Information Surveys B–5, relating to mica.

Mr. WALSH of Montana. There is nothing of that kind in the copy which I have before me of Tariff Information Surveys B–5.

Mr. McCUMBER. If the Senator will turn to page 19——

Mr. WALSH of Montana. I have it before me.

Mr. McCUMBER. He will find in the second table, Imports of mica, cut, split, and manufactures of, by countries; the value of the imports from France, India, Canada, Brazil, British India, and all other countries. I read the importations from three countries.

Mr. WALSH of Montana. Does the Senator read from Survey B–5, page 19?

Mr. McCUMBER. I read from Survey B–5.

Mr. WALSH of Montana. There is nothing of that kind on page 19. Page 19 does not give any imports at all.

Mr. McCUMBER. It must be that the Senator from Montana has not the same document which I have.

Mr. WALSH of Montana. On page 21 of the document that I have before me, Mr. President, which is the Tariff Information Survey B–5, is found a table entitled "Mica, cut, split, and manufactures of, imports into the United States." That gives British India as furnishing to the United States during the year 1920, $16,656 worth of mica and manufactures of mica; that is all.

Mr. McCUMBER. From British India for 1920 it shows importations into the United States of $377,413 worth.

Mr. WALSH of Montana. No. The Senator is reading the importations from Canada instead of from British India.

Mr. McCUMBER. No.

Mr. WALSH of Montana. Those are the figures for Canada and not for British India.

Mr. McCUMBER. No. The importations from Canada were $516,234 worth.

Mr. WALSH of Montana. No; those importations were from England.

Mr. McCUMBER. No; the importations from England were $268,685; from France, $2,447; and from all other countries, $8,929.

Mr. WALSH of Montana. Even assuming that to be the case, that is practically nothing.

Mr. McCUMBER. I certainly am not mistaken according to this report.

Mr. WALSH of Montana. The figures before me seem to be different. Anyway, that is the situation, Mr. President. We are able to compete with the world in the manufacture of mica, and our exportations are constantly increasing.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. WALSH of Montana. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. WALSH of Montana. If the roll call has not commenced, I wish to say that I intended to offer an amendment instead of asking for a roll call on the committee amendment. I, therefore, ask unanimous consent that the call may be dispensed with.

Mr. SHEPPARD. There has been no answer to the roll call.

Mr. McCUMBER. Has there been any answer to the roll call, Mr. President?

The PRESIDENT pro tempore. There has been no response.

Mr. McCUMBER. Then I think the Senator can still offer his amendment.

Mr. WALSH of Montana. On page 35, line 2, I move to strike out "40" and to insert "30."

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. In the committee amendment on page 35, line 2, it is proposed to strike out "40" and insert "30", so as to read:

mica plates and built-up mica, and all manufactures of mica or of which mica is the component material of chief value, 30 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Montana to the amendment reported by the committee.

The amendment to the amendment was rejected.

Mr. WALSH of Montana. In line 3, on the same page, I move to strike out "20" and to insert in lieu thereof "15."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In the committee amendment, on page 35, line 3, it is proposed to strike out "20" and in lieu thereof to insert "15," so as to read:

ground mica, 15 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Montana to the amendment reported by the committee.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question recurs on the amendment proposed by the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was in paragraph 209, page 35, line 6, after the word "pulverized," to strike out the words "except toilet preparations" and to insert the same words within parentheses, with a comma following the last parenthesis.

Mr. McCUMBER. I ask that that amendment may be passed over, and that since the Senator from New Mexico [Mr. JONES] has returned, we recur to the fluorspar paragraph, which is the one we reached a short time ago.

Mr. MYERS. Mr. President, may we not take up paragraph 209 now and dispose of that? I think it will not take long.

Mr. McCUMBER. I have no objection, if any Senator desires to have that paragraph considered first.

The PRESIDENT pro tempore. The question is on agreeing to the amendment which has been stated in lines 6 and 7, page 35, paragraph 209. Without objection, the amendment is agreed to.

The next amendment of the Committee on Finance was, on page 35, line 13, after the word "decorated," to strike out "25" and insert "35," so as to read:

PAR. 209. Talc, steatite or soapstone, and French chalk, crude and unground, one-fourth of 1 cent per pound; ground, washed, powdered, or pulverized (except toilet preparations), one-half of 1 cent per pound; cut or sawed, or in blanks, crayons, cubes, disks, or other forms, 1 cent per pound; manufactures (except toilet preparations), of which talc, steatite or soapstone, or French chalk is the component material of chief value, wholly or partly finished, and not specially provided for, if not decorated, 35 per cent ad valorem.

Mr. MYERS. Mr. President, I have given this paragraph some attention, and I desire to make a few remarks upon it.

Talc is a mineral of creamy white, grayish, or greenish color and is recognized by its useful properties, which are its softness, soapy or greasy feel, and its resistance to the action of heat and acids. Chemically, it is an acid metasilicate of magnesium composed of 63.5 per cent of silica, 31.7 per cent of magnesia, and 4.8 per cent of water. Ground talc, or talcum, is the most familiar form in which this mineral is marketed.

Steatite is a massive rock which is commonly known as soapstone. It is composed chiefly but not wholly of talc; and since talc is a soft mineral and easily broken, soapstone is a weak rock and not well suited for structural uses. It is quarried in large blocks, which are sawn into slabs of varying dimensions according to the use for which it is intended.

"French chalk" is a misnomer, because it is a species of talc (magnesium metasilicate) and not of chalk which is calcium carbonate. French chalk is commonly used synonymously with steatite or soapstone and in general refers to the pieces cut into sticks, cubes, or disks to be used by tailors for marking cloth.

Talc and soapstone are used for a wide variety of purposes, which, with the exception of the relatively small use in toilet powders, are not generally well known. By far the largest quantity of ground talc is consumed in the manufacture of paper. It serves as a filler in all grades of paper and is an important ingredient in various coating and glazing mixtures for finished paper. Talc is also used as a filler in textile, rubber, soap, linoleum, roofing paper, and rope and twine. The rubber industry uses ground talc for dusting and packing rubber goods and as a protective coating for crude rubber.

Talc is known to the paint trade as asbestine, talcose, ground soapstone, and talc. It is used as a pigment to absorb various complex coloring matters and also, especially in mixed paints, it is used as a filler or extender. Asbestine, which usually refers to a fibrous form of talc from New York, has been recommended for the manufacture of the so-called fireproof or fire-resistant paints.

Other uses for talc are as a covering for steam pipes and in wire insulating compounds, in toilet preparations, in leather manufacture, as a filtering medium for refining oil, for polishing plate glass, and for dimming and clouding opaque glass, as an ingredient of certain special cements, and as a dusting agent to prevent sticking in foundry molds. The large number of less important uses can not be tabulated here.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from Montana yield to the Senator from Utah?

Mr. MYERS. With pleasure.

Mr. SMOOT. The Senator is speaking now of the 35 per cent and the 45 per cent duty on manufactures of talc?

Mr. MYERS. Yes, sir; I am speaking upon that amendment.

Mr. SMOOT. The only reason why this is put in is because the amendment that the Senator is speaking to now is a basket clause. I know of nothing to-day that is manufactured from talcum or chalk.

Mr. MYERS. What does the Senator say is the reason for increasing the duty from 25 to 35 per cent?

Mr. SMOOT. The only reason is that this is carrying out the policy of having the same rates here upon the manufactured products falling in a basket clause. In years gone by they used to have washtubs made of talc, and sometimes they were decorated; but, to tell the Senator the honest truth, I do not know to-day of a dollar's worth of goods of manufactured talc. There is ground talc, and there is cut talc, and talc in cubes, and pulverized talc; but the old provision of the basket clause of manufactured talc is still carried in the bill by the House, and in the law of 1909, and in the law of 1913. It will make no special difference, however, because I have been unable to find anything of a manufactured nature of those items to-day. Since we are manufacturing bathtubs now of porcelain, or of iron covered with porcelain, the old style has gone out entirely. I just wanted to state that to the Senator because that is the condition that exists to-day.

Mr. MYERS. Does the Senator state that there are no importations of manufactures of which talc, steatite, or soapstone, or French chalk is the component material of chief value? Are there none at all?

Mr. SMOOT. I know of none at all to-day.

Mr. MYERS. Then what is the use of having a tariff duty on these things?

Mr. SMOOT. Because we do not know but that there will be some such importations at some time in the future. We can not tell, and such a provision has always been carried in tariff bills; but there are some importations of the articles mentioned in the other two brackets in the paragraph. There are a great many.

Mr. MYERS. What are they?

Mr. SMOOT. They are, first, French chalk, crude and unground, one-quarter of a cent a pound; then ground, washed, powdered, or pulverized, except toilet preparations, one-half of 1 cent per pound; then cut or sawed, or in blanks, crayons, cubes, disks, and other forms, on which we impose a duty of 1 cent a pound. There are no changes in those rates, and, of course, we can not offer amendments to them now, so if the Senator desires to offer an amendment upon those items he will have to wait until the committee amendments are first disposed of.

Mr. MYERS. Yes; I see.

Mr. SMOOT. But the two items that the Senator is speaking of now are virtually in the basket clause, we may say, of this particular manufactured product; and I will say to the Senator now that I know of no articles manufactured from talc which are used in the United States that would fall in this basket clause, and the Senator will note, if he has looked it up, that there is not a dollar's worth reported either of local manufacture or of importations.

Mr. MYERS. I see, of course, that the pending amendment applies only to manufactures of which these articles are the component materials of chief value. If the Senator says that there are no importations whatever of any manufactures, then I think the imposition of a tariff duty on manufactures is wholly useless. I believe in imposing tariff duties on what is imported now, so that we can figure on some reliable basis and know what revenue the tariff will bring in, if any at all, and what effect it will have on the market.

Mr. SMOOT. This tariff will not bring in any revenue.

Mr. MYERS. I can hardly see the object of going into the realm of speculation and legislating as to a tariff duty on something that does not come into the country at all. It appears to me to be useless and frivolous—a waste of time and effort.

Mr. SMOOT. The Senator can remember when there were bathtubs and that sort of articles manufactured from these products, but they are not manufactured to-day. It may be that at some time in the future they would be manufactured in a foreign country and shipped into this country. I do not know whether that will happen or not.

Mr. MYERS. If there are no importations at all, what is the object of raising the duty from 25 to 35 per cent? The House put it at 25 per cent.

Mr. SMOOT. I have already stated that to the Senator very frankly. The manufactures of these articles have always carried a rate of about 35 per cent where they are not decorated, and 45 per cent where they are decorated. If they never again are made for importation into this country, it will do no harm; but if they are, then the rates are there, conforming to the basket clauses of manufactured articles of a similar nature.

Mr. MYERS. Have those been the rates, 35 and 45 per cent, in the tariff laws heretofore enacted?

Mr. SMOOT. No; I think the tariff law to-day is 20 per cent, as I remember it.

Mr. MYERS. In the Underwood-Simmons law it is 20 per cent?

Mr. SMOOT. Twenty per cent.

Mr. MYERS. If not decorated, and the same as to decorated articles?

Mr. SMOOT. If decorated, 25 per cent.

Mr. MYERS. If we do not import any of these things, Mr. President, I think that 20 per cent or 25 per cent is as good as 35 per cent or 45 per cent. This tax does not bring in any revenue whatever?

Mr. SMOOT. Not a dollar.

Mr. MYERS. If it does not bring in revenue, the articles ought to be on the free list. If we do not have any importations, we ought to encourage some by putting the articles on the free list.

Mr. SMOOT. Tariff bills are not made ostensibly to last one year, and I do not know what more I can say than that at some time in the future these things may be made for importation the same as they have been in the past. It may never occur, but if it never occurs, there is not a dollar of revenue lost by the Government of the United States, and no one is hurt, either in this country or in a foreign country.

Mr. MYERS. The Senator has been very explicit in his explanation. I find no fault with that. It is the useless and absurd proceeding of levying a tax on importations that do not come into the country that I dissent from.

Mr. SMOOT. I do not care anything about it, one way or the other.

Mr. MYERS. I say that if we have no importations under the existing tariff law, which imposes a tariff duty of 20 per cent upon undecorated articles and 25 per cent on decorated articles, then I think they ought to be put on the free list so as to encourage some importations and give us the benefit of competition. If they will not come in under a 20 and 25 per cent rate, then we ought to make it lower than that or take it off altogether.

Mr. SMOOT. I will say to the Senator that if there should be any that would come in, they would come in under the 35 and 45 per cent, the same as they would under the 25 per cent. The only thing I can possibly think of that would ever come in would be a carved statue of some kind, made from talc and decorated in some way. I do not understand how that can happen. It has not happened in the past, and yet at some time in the future it may happen. If so we will have statistics of it. Having this provision in here will do no harm if they do not import it, and if the American people do not import a dollar of it now the Treasury Department will not receive a cent of revenue from a change. Why not keep it in conformity with the rates of other manufactured articles that are provided in this schedule?

Mr. SHEPPARD. Mr. President——

Mr. MYERS. I yield with pleasure to the Senator from Texas.

Mr. SHEPPARD. May I suggest to the Senator from Montana that if we are going to base our tariff rates purely on anticipation, perhaps we had better consult a spiritualistic medium as to what rates we shall charge—10 raps, 10 per cent; 20 raps, 20 per cent; and so on?

Mr. SMOOT. I know that the Senator has not given thought to it, or he would not have said that. The Senator himself would not vote for a duty upon the raw materials, and then turn around and say that there was not any need whatever of a duty upon the manufactured article, if there was a manufactured article.

Mr. MYERS. The Senator from Utah has gone to the root of my views on the subject, because I do not believe there ought to be any tariff on the raw product, and, therefore, none on the manufactured article.

Mr. SMOOT. That is a different proposition.

Mr. MYERS. I was giving some definitions of these articles, and relating the uses to which they are put, to show that they are necessities of life. They are articles of daily use and of necessity. Of course, I see that the pending amendment applies only to manufactured articles, and under that I can not get at the tariff duty which is levied on the raw material. I will simply say as to the manufactured articles that I do not believe in putting on a useless tariff duty when it serves no purpose one way or another. It seems to me it is just an encumbrance, and it might as well not be levied at all. I will say, however, before I close my remarks: I believe that these raw materials should be on the free list, or have a very low tariff duty imposed upon them. Of course, I can not get that just now. I may later, before the bill is disposed of. My views of tariff legislation briefly are these:

I believe that taxes ought to be raised altogether, or as far as possible on luxuries, and not at all on necessities of life.

Necessities are articles which have to be used by everybody, whether they can afford to pay a tax or not. The rich, the poor, those of moderate circumstances, all have to use articles of necessity, and I think as a rule the necessities of life ought to be put on the free list, or have a very low tariff duty, if any at all, levied on them. Once in a while, in the case of an infant industry, or where an undeveloped resource of the country may be developed by a moderate tariff duty, where an industry may be built up and developed, and our raw natural resources may be used, and a large pay roll may be built up, I believe that there is some justification for imposing a moderate tariff duty on some of the necessities of life; but in the cases of 99 per cent of the necessities of life I think there ought to be no tariff duty or tax of any kind. Ninety-nine per cent of our necessities of life should be on the free list, and those that are taxed at all should have a very low tariff duty put upon them.

I believe that practically all taxes should be raised on luxuries. People do not have to use luxuries unless they want to. The poor can not afford them, and do not get them. The rich do not have to buy them unless they want to, and if they do buy them at all, they can gauge their purchases by their desires and their ability to pay, and those who buy the most pay the most.

Mr. McCUMBER. If the Senator will allow me, it is sometimes very difficult to determine what is a necessity and what is a luxury. What is a luxury one year becomes, after a few years of use, a necessity. I know but a very short time ago when people considered an automobile a great luxury. I do not know whether it would be considered a luxury or a necessity to-day. Would the Senator call it a luxury?

Mr. MYERS. I would, without hesitation.

Mr. McCUMBER. We use probably about as much of this soapstone and talcum powder to line the inside of a tire and keep the inner tube from wearing out as for almost any purpose, and therefore it would be a luxury, and ought to be taxed, according to the theory of the Senator.

Mr. MYERS. Those articles are used for a great many other purposes; used in the making of paint, rubber, paper, newsprint, wrapping paper, wall paper, soap, linoleum, roofing, rope, twine, and many other things which go into the daily use of the people, as necessities of life.

Mr. SMOOT. The Senator must not forget its use for face powder, for powdering the ladies' noses.

Mr. MYERS. Since woman suffrage was enacted, I think face powder has become a necessity, but in the making of toilet articles, there is very little of it used, the authorities say. These substances are used in the making of a great variety of articles which go into the daily use of the people as necessities of life. That is what I was undertaking to say; that these substances are necessities of life, and I think even the raw material should be on the free list, as well as the manufactured articles.

As to automobiles, I regard them as luxuries. I understand there are 70,000 automobiles in the District of Columbia. An average tax of $10 on each automobile would yield the District of Columbia $700,000 a year. In 1919 there were about 7,500,000 automobiles in the United States, and I understand, according to latest reliable statistics, that at the present there are about 11,000,000 in the country. An average tax on them of $10 each would yield $110,000,000 per year, and an average tax of $20 per year would yield $220,000,000 a year, and so on—the greater the tax the greater the revenue. I think people who indulge in such luxuries should pay for them and that taxes should not be put on the common, ordinary necessities of life, which are used every day by everybody in the country, more or less. If I had my way, I would put an average tax of at least $10 a year on every automobile in the United States. People who use them could well afford to pay that tax; and if the people want to use automobiles they ought to be willing to pay that amount of tax. Let those who ride pay. Let those who roll in luxury pay for their luxuries. I use the automobile illustration as an explanation of my views about taxation. Taxation of automobiles—a good stiff tax—well illustrates my views as to how the bulk of our taxes should be raised.

I have digressed to explain in a general way, to some extent, my views of tariff legislation. My point is that both the raw materials mentioned in the paragraph under consideration and their manufactures, being largely necessities, should be on the free list or should bear a very low tariff duty.

However, I will not pursue my observations further in that direction, because I am not able to formulate my ideas in that direction into any motion or amendment which would now be in order under the rules of the Senate. I shall have to give that attention later.

As to the particular amendment before the Senate, I can see no good motive in increasing the 25 per cent tax on the manufactured article not decorated, or 30 per cent, if decorated, as fixed in the bill as it passed the House. Even under the lucid explanation of the Senator from Utah, who has referred to the usual practice in taxing manufactured articles, as bearing a relation to the raw material, I can see no practical use in increasing the tariff duty imposed by the House. In fact, I see no use of any duty at all, even as fixed by the House.

I move that the rate proposed by the committee—35 per cent, in line 13, paragraph 209—be reduced to 20, and that 45 be reduced to 30 if that may be made in one motion, and if that be voted down I shall vote against the committee amendment.

The PRESIDENT pro tempore. The Chair suggests to the Senator from Montana that the Chair thinks that those two amendments can hardly be offered in one motion.

Mr. MYERS. Then I move first to strike out "35" and to insert "20," on line 13, page 35.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment on page 35, line 13.

The amendment was agreed to.

Mr. MYERS. I renew my motion to amend on line 14.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 35, line 14, the Senator from Montana moves to strike out "45" and to insert "30."

The PRESIDENT pro tempore. The Senator's amendment is the same as the House provision. Hence it will be covered by the vote on the committee amendment.

Mr. MYERS. Then I move to reduce it from "45" to "25," and I ask for the yeas and nays on that amendment to the amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment to the amendment.

The ASSISTANT SECRETARY. On page 35, line 14, the Senator from Montana moves to strike out "45" and to insert in lieu thereof "25," so as to read:

If decorated, 25 per cent ad valorem.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement I did before, I vote "nay."

Mr. CARAWAY (when his name was called). Transferring my pair with the junior Senator from Illinois [Mr. MCKINLEY] to the senior Senator from Tennessee [Mr. SHIELDS], I vote "nay."

Mr. HARRIS (when his name was called). Transferring my pair from the junior Senator from New York [Mr. CALDER] to the senior Senator from Nebraska [Mr. HITCHCOCK], I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before, I withhold my vote.

Mr. KELLOGG (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS]. I transfer that pair to the senior Senator from Minnesota [Mr. NELSON] and vote "nay."

Mr. LODGE (when his name was called). Transferring my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the junior Senator from Pennsylvania [Mr. PEPPER]; I vote "nay."

Mr. MCCUMBER (when his name was called). Announcing the transfer of my pair as on the previous vote, I vote "nay." I wish to state at this time that this announcement of the transfer will stand for the evening.

Mr. STERLING (when his name was called). Making the same announcement as to my pair and transfer that I made on the last vote, I vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. WILLIS (when his name was called). I have a pair with my colleague, the senior Senator from Ohio [Mr. POMERENE] which I transfer to the junior Senator from Delaware [Mr. DU PONT], and vote "nay."

Mr. FRELINGHUYSEN (after having voted in the negative). I transfer my general pair with the Senator from Montana [Mr. WALSH] to the Senator from Colorado [Mr. NICHOLSON] and allow my vote to stand.

Mr. ERNST (after having voted in the negative). I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Oklahoma [Mr. HARRELD] and allow my vote to stand.

Mr. ELKINS (after having voted in the negative). I transfer my pair with the Senator from Mississippi [Mr. HARRISON] to the junior Senator from Oregon [Mr. STANFIELD] and allow my vote to stand.

Mr. DIAL (after having voted in the affirmative). Making the same announcement as on the former vote with reference to the transfer of my pair, I vote "yea."

Mr. FLETCHER (after having voted in the affirmative). I again announce my general pair with the Senator from Delaware [Mr. BALL]. In his absence I transfer that pair to the Senator from Rhode Island [Mr. GERRY] and allow my vote to stand.

The roll call resulted—yeas 11, nays 35, as follows:

YEAS—11.

Ashurst	Fletcher	Jones, N. Mex.	Sheppard
Caraway	Harris	Myers	Underwood
Dial	Heflin	Overman	

NAYS—35.

Brandegee	Colt	Ernst	Hale
Broussard	Cummins	France	Kellogg
Bursum	Curtis	Frelinghuysen	Kendrick
Capper	Elkins	Gooding	Keyes
Ladd	McNary	Ransdell	Sutherland
Lenroot	Norbeck	Rawson	Townsend
Lodge	Oddie	Shortridge	Warren
McCumber	Page	Smoot	Willis
McLean	Phipps	Sterling	

NOT VOTING—50.

Ball	Harrison	Nicholson	Stanfield
Borah	Hitchcock	Norris	Stanley
Calder	Johnson	Owen	Swanson
Cameron	Jones, Wash.	Pepper	Trammell
Crow	King	Pittman	Wadsworth
Culberson	La Follette	Poindexter	Walsh, Mass.
Dillingham	McCormick	Pomerene	Walsh, Mont.
du Pont	McKellar	Reed	Watson, Ga.
Edge	McKinley	Robinson	Watson, Ind.
Fernald	Moses	Shields	Weller
Gerry	Nelson	Simmons	Williams
Glass	New	Smith	
Harreld	Newberry	Spencer	

The PRESIDENT pro tempore. On this question the yeas are 11 and the nays are 35. A quorum not having voted, the Secretary will call the roll.

The principal legislative clerk called the roll and the following Senators answered to their names:

Ashurst	France	Lodge	Sheppard
Ball	Frelinghuysen	McCumber	Shortridge
Brandegee	Gooding	McLean	Smoot
Broussard	Hale	McNary	Stanley
Bursum	Harris	Myers	Sterling
Capper	Heflin	Oddie	Sutherland
Colt	Jones, N. Mex.	Overman	Townsend
Cummins	Jones, Wash.	Page	Underwood
Curtis	Kellogg	Phipps	Warren
Dial	Kendrick	Pittman	Willis
Elkins	Keyes	Ransdell	
Ernst	Ladd	Rawson	
Fletcher	Lenroot	Robinson	

The PRESIDENT pro tempore. Forty-nine Senators have answered to their names. There is a quorum present. The question is upon agreeing to the amendment proposed by the Senator from Montana to the amendment of the committee. The Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before, I vote "nay."

Mr. DIAL (when his name was called). Making the same announcement as to my pair and transfer as on the former vote, I vote "yea."

Mr. ELKINS (when his name was called). I transfer my pair with the Senator from Mississippi [Mr. HARRISON] to the Senator from Oregon [Mr. STANFIELD], and vote "nay."

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as on the last vote, I vote "nay."

Mr. HARRIS (when his name was called). Making the same announcement with regard to my pair and its transfer, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before, I withhold my vote.

Mr. KELLOGG (when his name was called). Making the same announcement as before, I vote "nay."

Mr. STERLING (when his name was called). Making the same announcement as on the last vote, I vote "nay."

Mr. WILLIS (when his name was called). I transfer my pair with the senior Senator from Ohio [Mr. POMERENE] to the junior Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. JONES of New Mexico. Making the same announcement as to the transfer of my pair, I vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY].

The roll call resulted—yeas 12, nays 36, as follows:

YEAS—12.

Ashurst	Harris	Myers	Sheppard
Dial	Heflin	Overman	Stanley
Fletcher	Jones, N. Mex.	Robinson	Underwood

NAYS—36.

Ball	Ernst	Lenroot	Ransdell
Brandegee	France	Lodge	Rawson
Broussard	Frelinghuysen	McCumber	Shortridge
Bursum	Gooding	McLean	Smoot
Capper	Hale	McNary	Sterling
Colt	Kellogg	Norbeck	Sutherland
Cummins	Kendrick	Oddie	Townsend
Curtis	Keyes	Page	Warren
Elkins	Ladd	Phipps	Willis

NOT VOTING—48.

Borah	Harreld	New	Smith
Calder	Harrison	Newberry	Spencer
Cameron	Hitchcock	Nicholson	Stanfield
Caraway	Johnson	Norris	Swanson
Crow	Jones, Wash.	Owen	Trammell
Culberson	King	Pepper	Wadsworth
Dillingham	La Follette	Pittman	Walsh, Mass.
du Pont	McCormick	Poindexter	Walsh, Mont.
Edge	McKellar	Pomerene	Watson, Ga.
Fernald	McKinley	Reed	Watson, Ind.
Gerry	Moses	Shields	Weller
Glass	Nelson	Simmons	Williams.

The PRESIDENT pro tempore. Upon this question the yeas are 12, the nays are 36. The Senator from Washington [Mr. JONES] having announced his pair, there is a quorum present. So the amendment of the Senator from Montana [Mr. MYERS] to the committee amendment is rejected. The question now recurs upon the amendment proposed by the committee.

Mr. McCUMBER. I ask unanimous consent that when the Senate concludes its session on this calendar day it recess until to-morrow at 11 o'clock a. m.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered. The question is on agreeing to the amendment proposed by the committee.

Mr. HEFLIN. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as to my pair and its transfer as before, I vote "yea."

Mr. DIAL (when his name was called). Making the same announcement as on the former ballots concerning my pair and its transfer, I vote "nay."

Mr. FLETCHER (when his name was called). Making the same announcement as before as to my pair and its transfer, I vote "nay."

Mr. HARRIS (when his name was called). Making the same announcement as heretofore as to the transfer of my pair, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as heretofore regarding the transfer of my pair, I vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement as before concerning my pair, I withhold my vote.

Mr. KELLOGG (when his name was called). Making the same announcement as heretofore as to the transfer of my pair, I vote "yea."

Mr. STERLING (when his name was called). Making the same announcement as on the last vote regarding my pair and its transfer, I vote "yea."

Mr. WILLIS (when his name was called). Making the same announcement as to the transfer of my pair as previously, I vote "yea."

The roll call was concluded.

Mr. ELKINS. Repeating the same announcement as to my pair and its transfer, I vote "yea."

Mr. FRELINGHUYSEN. Making the same announcement as heretofore respecting my pair and its transfer, I vote "yea."

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Arkansas [Mr. CARAWAY] with the Senator from Illinois [Mr. McKINLEY];

The Senator from Virginia [Mr. GLASS] with the Senator from Vermont [Mr. DILLINGHAM];

The Senator from Tennessee [Mr. McKELLAR] with the Senator from Indiana [Mr. NEW];

The Senator from Oklahoma [Mr. OWEN] with the Senator from New Jersey [Mr. EDGE];

The Senator from Georgia [Mr. WATSON] with the Senator from Arizona [Mr. CAMERON]; and

The Senator from Mississippi [Mr. WILLIAMS] with the Senator from Indiana [Mr. WATSON].

The result was announced—yeas 38, nays 13, not voting 45, as follows:

YEAS—38.

Ball	France	Lodge	Shortridge
Brandegee	Frelinghuysen	McCumber	Smoot
Broussard	Gooding	McLean	Sterling
Bursum	Hale	McNary	Sutherland
Capper	Harreld	Norbeck	Townsend
Colt	Kellogg	Oddie	Wadsworth
Cummins	Kendrick	Page	Warren

So the committee amendment was agreed to.

Mr. McCUMBER. Mr. President, I ask that the Senate now return to the amendment in paragraph 207 in relation to fluorspar.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from North Dakota? The Chair hears none, and the Senate returns to paragraph 207.

Mr. GOODING. I ask unanimous consent to have read and printed in the RECORD resolutions passed by the Texas Bankers' Association at Fort Worth, Tex., indorsing the pending tariff bill.

The PRESIDENT pro tempore. Without objection, the Secretary will read as requested.

The Assistant Secretary read as follows:

FORT WORTH, TEX., *May 20, 1921.*

Hon. F. R. GOODING,
United States Senate, Washington, D. C.

The following resolution was unanimously passed by the Texas Bankers' Association in convention here to-day:

"Whereas the value of all securities of Texas banks, the price of every farm product, and the prosperity of the entire South are affected by the tariff measure now pending before Congress; and

"Whereas the tariff policy of the present Congress was settled at the polls November, 1920, and we are going to have a protective tariff on the products of all other sections of the country regardless of our political convictions on the subject: Therefore be it

"*Resolved*, That so long as the articles of manufacture are protected from foreign competition, that we insist on a protective tariff on vegetable oils, peanuts, live stock, meats, hides, wool, grain, poultry, and dairy products, and all agricultural, pastoral, and mineral products that will equalize the difference in cost of production between this and foreign countries, and urge our Senators and Representatives to support the schedules demanded by various organizations authorized to represent southern industries as submitted through the Southern Tariff Association."

WARREN P. ANDREWS,
President Texas Bankers' Association.

Mr. HEFLIN. Mr. President, when the junior Senator from Idaho [Mr. GOODING] presented the telegram which has been read at the desk, I understood from his statement that it was a general indorsement of the pending tariff bill, but it appears to lack a great deal of being an indorsement of the measure which is now pending here. It is merely urged that if the pending measure is to be put over, if this "hog combine" is to go through, then they would like to have a few commodities in which Texas is interested attached to the program. When the Senator from Idaho stated that the resolution of the bankers of Texas indorsed this measure I thought there was something radically wrong. I knew that if the bankers of the State of Texas knew what was in the bill they would not indorse it.

Mr. President, in discussing the other night the suggestion by Senators on the other side that the bill sought to protect the farmers of the country I referred to two or three items affecting the farmers very vitally, every one of which is taxed. The tax on arsenic has been increased 2 cents a pound. The farmers use arsenic for spraying and other purposes. There is a tax imposed in the bill on potash. I mentioned that the other night. This is a tax on fertilizer, which will result in increasing the price of that product to the farmer from five to ten dollars a ton. Then I was utterly astounded to find that it was proposed to impose a tax upon salt. I do not know, Mr. President, whether you were here or not, but you yourself look astounded at the suggestion that anybody would have the gall to place a tax upon salt. [Laughter.] They took salt off the free list and put it on the tax list through this hog combine and taxed it 40 cents a 200-pound sack. Think of that, Senators. I do not know whether or not some of you realized what you were doing in that particular. Forty cents a sack! A 200-pound sack will now bear a tax of 40 cents, and the price of all the salt used by all the farmers of the United States is increased 40 cents a sack. Everybody who uses salt will pay this increased price.

Mr. President, I was surprised to see my good friend, the Senator from Maine [Mr. HALE], vote to place a tax upon salt.

His honored father led the fight in the House 30 years ago to put salt on the free list and made an able speech in favor of having salt free of taxes. The martyred President, James A. Garfield, then a Member of the House, made a strong argument against putting salt on the tax list. But in these subsequent days of the Republican Party the great salt combine has succeeded in getting you to tax the salt users of America 40 cents a sack. So, for the benefit of this great salt combine, you are imposing an additional tax burden upon the millions of American consumers.

Mr. STANLEY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Kentucky?

Mr. HEFLIN. I am always glad to yield to the brilliant Senator from Kentucky [Mr. STANLEY].

Mr. STANLEY. The Senator from Alabama should remember that circumstances alter cases. Conditions are different. I doubt very much if there is salt enough in all the multitudinous seas to sweeten the malodorous memory of the Attorney General alone, besides other putrefying officials on the other side; and they are bound to put a tax on salt.

Mr. HEFLIN. Mr. President, I want to read what Mr. Garfield said in his speech in favor of placing salt on the free list:

> I know, moreover, that for nearly two years the wholesale price of American salt in Toronto, Canada, was a dollar lower per barrel than the same salt was selling for on the New York side of the lake. That is, we produced it, shipped it across, paying whatever portage, freights, and transportation were required, and then sold it to our Canadian neighbors at a dollar per barrel less than it was sold to people on our shores. Certainly gentlemen will not want a duty or tax continued that enables that thing to be done.

They had a tax on salt then, and Mr. Garfield pointed out that this salt was sold on the other side of the lake, in Canada, to foreign people at $1 a barrel cheaper than to our own people here in the United States.

Mr. President, on the same occasion, in 1889, the brilliant and able Senator from Missouri, Mr. Vest, said:

> It is notorious that two years ago this same Michigan Salt Association—

He had mentioned the efforts of the Michigan Salt Association to control the price of salt and increase its profits—

> went into the State of West Virginia, bought up the salt springs in the valley of the Kanawha, and closed all except two, and by that means controlled also the production of salt in another State of this Union; and they were enabled to do it by reason of this tariff duty which shut out foreign competition, handicapped the foreign importer to such an extent that it left them in absolute control of the home market.

Mr. President, that is just what you did when you placed a tax of 40 cents a sack on salt. You leave the whole American people absolutely helpless in the hands of the Salt Trust of the United States. The forces that control the Salt Trust will control the output and price of salt in a way to make the greatest profit possible, and you have enabled them to do that by the use, or, rather, the misuse and abuse, of the taxing power.

You have taxed the salt that goes into the bread and saves and seasons the meat of every human being in the United States.

Thomas H. Benton, speaking about a tax on salt, said it was—

> a tax which no economy could avoid, no poverty could shun, no privation escape, no cunning elude, no force resist, no dexterity avert, no curses repress, no prayers could depreciate.

There is no escape from that tax. Salt is a daily necessity. Everybody must have salt to season food, to save meat, for many wholesome purposes; and yet the Republican Party in this Senate, while talking about protecting the American farmer and trying to benefit the American people, are adding to the burden of the American farmer and increasing the price of everything he has to buy and taxing the mass of American consumers for the benefit of big concerns that contribute to the campaign fund of the Republican Party.

Mr. President, I saw the Republican Party this afternoon, under the leadership of the able Senator from New Jersey [Mr. FRELINGHUYSEN], lay a tariff tax upon sand. The President pro tempore looks as surprised and disturbed as he did when I talked about the tax that you placed upon salt. Sand! Yes, Mr. President, this Republican Senate has just voted to place a tax upon sand. The Bible speaks of the inexhaustible supply of the sands of the sea, and nobody but an avaricious Republican in power would ever dream of taxing sand. Here we are located between two great oceans, with sand enough to supply the world for a million years, and yet this Republican Senate has actually levied a tax upon sand. One or two American ships that carried American products to a foreign market coming back empty needed something to hold the ship, to make it steady—they needed ballast—and they put sand in there to hold down the vessel to give it something to steady it. The protective-tariff barons of the East saw them unloading that sand, and they said:

> We sift and sell sand and here is an opportunity to get a Republican Congress to increase our profits by raising the price to everybody who uses sand in America.

Light-colored or white sand is used for many purposes. A great deal of it is used to make glass bottles, fruit jars, and windowpanes. It is used in making every kind of glassware imaginable—yes, and milk bottles for the baby, as suggested by my good friend from South Carolina [Mr. DIAL]. I am glad he mentioned that. It shows that nobody, not even the infant in his cradle, can escape the tax gatherers of the Republican Party, and you have just voted to place a tax on sand.

Mr. President, a woeful situation confronts us here. Special pets and favorites, who want to have the whole people taxed in order to put money in their pockets, invoke the taxing power of the American Congress, and Republicans in power, who have been aided by contributions to their campaign funds, respond, and we see taxes imposed that enrich one class at the expense of another. Under this miserable scheme the consumers of America are forced to pay money into the pockets of tariff barons who buy the privilege to tax the American people.

Those who have to bear these unjust burdens and pay these unjust taxes were not allowed to appear at the secret sessions of the Finance Committee of the Senate. No opportunity to file their protests against the wrong done them in this monstrous bill. But the man who wanted to tax the American people in order to increase his profits and his fortune, he was there and he got what he wanted.

And, Mr. President, some Republican Senators are trying to make the farmer believe that they are increasing the tariff tax on all the things that he has to buy because they dearly love him. They love him for the purpose of robbing him.

Well do I recall that, when day after day I was pleading for relief for the farmer from your deadly deflation policy, and reminded you that farm products were selling below the cost of production, I never heard a single Republican Senator, not one who now champions this tariff measure, lift his voice to compel a change in the conduct of the Federal Reserve Board so that the farmer could hold his produce for a fair price and stay the hand of those who were taking it from him for nothing. But when some of these fellows who have manufacturing concerns want more profits than they are now getting, demand an increase, you stand here and grow eloquent in demanding that the people be taxed for that purpose, and you tax them.

Talk about protecting us against the foreigner! I saw the foreigner buy 6,000,000 bales of American cotton below the cost of production, and not one word of sympathy or aid was uttered by any champion of this high protective tariff bill—not one. Some of us arose and begged that something be done, that money be made more easy, that these people be helped; but no help came. The cotton was sold below the cost of production, and the farmer was left penniless and in debt; and now you are taxing the salt that goes in his bread.

Mr. STANLEY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Kentucky?

Mr. HEFLIN. I am glad to yield to my friend from Kentucky.

Mr. STANLEY. I do not wish to interject remarks into the splendid and eloquent argument made by the Senator from Alabama, but I am tempted at this time to suggest to the eloquent Senator another instance in his own State.

The fields of France that were golden with grain at the time of Charlemagne—the fields of France that have been garnered continuously for a thousand years—will now produce an average of 40 bushels of grain to the acre.

The grain fields of old England and of Germany produce 30 bushels of grain to the acre. The grain fields of the great West, new, but yesterday the home of the Indian and the buffalo, are approaching exhaustion, and they are not now producing a third of the harvest of grain produced by fields a thousand years old. The reason of it is perfectly simple. It is known to every tyro in the culture of the soil. It is a lack of nitrogen, a lack of an essential fertilizer. With the proper mixture of nitrogen and phosphorus and potash, the illimitable plains of the great West, the fields of Alabama and Kentucky and the Carolinas, will produce as richly as the fields of France and of Germany.

God, in His infinite goodness, in the prodigality of nature, has placed in the State of the distinguished Senator from Alabama all the essentials necessary for the production of this essential fertilizer—the great rapids of Muscle Shoals, with their 300,000 horsepower undeveloped. Adjacent are fields of phosphorus and

potash. There, with small expenditure, we can produce more nitrogen than was ever brought from all the dry wastes of Chile.

The work was almost completed, but it interfered with the sale of a by-product from the coke ovens of the Steel Trust. It interfered with great chemical corporations. It interfered with the products of the most gigantic aggregations of wealth ever created since a share of stock in a corporation was printed, and after an almost unanimous report by the Committee on Agriculture and Forestry, after it seemed that the bill would pass to provide the necessary power to put that great plant in operation, the Chemical Trust, the Steel Trust, and the Coal Trust issued their ukase, cracked their whip from these galleries, and where was Roderick then? Where was this vociferous Republican agricultural tariff bloc that is going to save the farmer? It crouched and cowered under the command of the Steel Trust and voted to destroy that plant or leave it as junk; voted to abandon it. So plain and so palpable was the outrage, the scandalous waste of a great treasure, that a man with no more knowledge of scientific affairs than Henry Ford—a man who never heard of Benedict Arnold—knew it was valuable. Henry Ford stumbled onto that thing and now offers a handsome sum for the privilege of doing that which you denied this Government the privilege of doing for the farmer. You destroyed the greatest opportunity you ever had to furnish the farmer with fertilizer in time of peace and to sell it in time of war. Let the agricultural bloc remember the Fertilizer Trust when it goes with smirking, patronizing air to some poor deluded farmer in Alabama or Texas and talks about saving the profits on a sack of peanuts.

Mr. HEFLIN. Mr. President, the able and distinguished Senator from Kentucky has pointed out another piece of testimony showing just how the Republican bosses show their friendship for the American farmer. He has drawn a splendid picture of the possibilities of Muscle Shoals. I will discuss that at the proper time.

When interrupted by my good friend from Kentucky, I was saying that I saw this deflation policy, like some mighty besom of destruction, moving about in the South and West, leaving bankruptcy, financial failure, and business disaster in its trail. I stood here and pleaded for aid for the outraged and oppressed people of the South and West. I knew how that aid could be granted, and it would not tax a single individual in the United States one cent; not one. I said if the President would compel the Federal Reserve Board, sitting within a hundred yards of him, to loosen up and put money out which we had stored away, serving no good purpose, these people could get it and use it to carry on their business, so that they could be relieved from the awful distress and stringency that was upon them.

But no Senator on the other side who now seeks to protect, by high tariff, the tariff barons of the United States, opened his mouth upon that occasion. They were as silent as the tomb; and now they rush to the rescue and loudly proclaim their friendship for these same farmers.

The Senator from New Jersey demands a protection for the glass monopoly. He wants even to keep out white sand, which the ships that carry our goods abroad need to hold them down coming home. He wants to stop that, Mr. President. If they carry out their plans they will probably shut out all competition, and leave the foreigners with nothing with which to buy our goods. Then the other countries will retaliate and say: "You shut us out; we will shut you out," and they can do that on a good many things.

Now and then we hear these so-called friends of the farmer say: "You ought to get out of the way and let us pass this bill." Mr. President, I have not the slightest doubt that if every voter in the United States—Democrats, Republicans, Progressives, and independents—really knew what was in this bill, and had a chance to vote on it, they would repudiate it. And I believe that if we polled in that election 30,000,000 votes, that 29,500,000 of them would be against the bill. I do not believe the trusts and combines of America could muster half a million votes for this monstrosity that you have here.

We have not gone far, and yet I have named a number of things in this bill which are of vital importance to the farmer—things that he must buy—and you have increased the price. Last Saturday I saw you take cement, which the farmers now use, many of them, in making pig troughs, horse troughs, and cattle troughs; which he uses in making durable posts about his home and farm; which he uses to make bridges over the branches and creeks; and which he uses to build roads over which he must haul his produce to the market place; I saw you by your hog combine take that off the free list and put it on the tax list.

Then you stand here and tell me you are voting day by day to protect the farmers of the country. It is not true. Let them know the truth, and the sooner they know it the better it will be for them and those they love and try to provide for.

Mr. President, the junior Senator from Ohio [Mr. WILLIS] took a new cue on yesterday, something which no one on the other side had the temerity to take, and he did it on the Sabbath Day. He gave a statement out on Sunday that this bill was being fought by big interests, international bankers and the great importing companies. Nobody ever fights for a tariff bill, such as you have, except the tariff barons, who want a monopoly. They are the only ones. My good friend the able junior Senator from Ohio conjured that up on Sunday. I am very fond of him, but I never thought he would do such a thing as that on the Sabbath Day. [Laughter.] The idea of anybody sponsoring this thing here, alleging opposition to it by big interests and big business. God knows, nobody is pleading here for the common man except Senators who are fighting for right and justice as they oppose this bill. Those who financed your 1920 campaign are calling you. You are doing the bidding of special interests. You are carrying out the orders of the tariff barons upon the theory, I presume, that the "ox knoweth his owner and the ass his master's crib."

Mr. McCUMBER. Mr. President, if I believed as ardently as the Senator from Alabama [Mr. HEFLIN] that the passage of the bill would finally result in the millennium, in which we can appropriate $5,000,000,000 without levying any tax to meet it, I would try to get along as rapidly as possible to meet that beautiful condition. But inasmuch as I doubt very seriously that we will ever reach that condition, I would like to get the bill through and spend less time in talking about something that happened two or three days ago. We passed the salt paragraph some two or three days ago. We passed several days ago some of the other items which have been discussed here to-night. Some of our friends in debating the tariff bill are like a man riding backward on a train; he never sees a thing distinctly until he has passed it. I wish we could look at these rates and pass upon them and then go to the next rate and dispose of that.

Mr. President, we have spent a long time since the Secretary announced that the pending amendment is an item relating to fluorspar. It is so late that I do not want to go on with the matter further this evening, and therefore——

Mr. HEFLIN. Mr. President——

Mr. McCUMBER. I move that the Senate take a recess until to-morrow morning at 11 o'clock.

Mr. HEFLIN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Alabama?

Mr. McCUMBER. No; I decline to yield.

Mr. HEFLIN. Mr. President, I make the point of no quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

Mr. HEFLIN. As the Senator would not give me a chance to reply and make a statement, I have made the point of no quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ball	Dial	Lodge	Robinson
Brandegee	Fletcher	McCumber	Sheppard
Broussard	Harris	McNary	Wadsworth
Bursum	Heflin	Myers	Warren
Capper	Jones, N. Mex.	Oddie	
Cummins	Jones, Wash.	Page	
Curtis	Lenroot	Rawson	

The PRESIDENT pro tempore. Twenty-five Senators have answered to their names. There is not a quorum present. The Secretary will call the names of the absent Senators.

The principal legislative clerk called the names of the absent Senators, and Mr. PITTMAN, Mr. RANSDELL, and Mr. WILLIS answered to their names when called.

Mr. SUTHERLAND entered the Chamber and answered to his name.

The PRESIDENT pro tempore. Twenty-nine Senators have answered to their names. There is not a quorum present.

RECESS.

Mr. McCUMBER. I move that in accordance with the unanimous-consent agreement the Senate take a recess until 11 o'clock a. m. to-morrow.

The motion was agreed to; and (at 10 o'clock and 20 minutes p. m.) the Senate, under the order heretofore entered, took a recess until to-morrow, Tuesday, May 23, 1922, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

MONDAY, *May 22, 1922.*

The House met at 12 o'clock noon and was called to order by Mr. WALSH as Speaker pro tempore.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father, who art on earth, Thy mercy is touching our thoughts and moving our hearts. Blessings undeserved are marking our pathways. Shadowing all, Thy spirit puts immortal hope into our lives and makes cheerfulness a daily habit. Lead us in the ways of meditations and give balance and poise to our judgments. Thy seal is set on all Thy works. We bless Thee for heaven's blue, for the jeweled light of the open sky, for the harmonies of field and woodland, for the whispering divinity that nestles in the open flower, and for the glowing smile of the landscape near and far. O what Thou hast made and meant to bless let not man despise. In the name of Jesus, our Savior. Amen.

The Journal of the proceedings of Saturday, May 20, 1922, was read and approved.

DISTRICT OF COLUMBIA RENT BILL.

Mr. MILLSPAUGH rose.

The SPEAKER pro tempore. For what purpose does the gentleman rise?

Mr. MILLSPAUGH. I desire to ask unanimous consent to file a minority report on Senate bill 2919.

The SPEAKER pro tempore. The gentleman from Missouri asks unanimous consent to file a minority report on Senate bill 2919. Is there objection?

Mr. MONDELL. Mr. Speaker, reserving the right to object, what is that bill?

Mr. MILLSPAUGH. That is the Ball Rent Act.

Mr. MONDELL. I suppose there is no objection so long as the gentleman's request does not interfere with the consideration of the measure.

Mr. MILLSPAUGH. Absolutely it will not interfere with the consideration of the bill.

The SPEAKER pro tempore. The gentleman from Missouri asks unanimous consent to file a minority report on Senate bill 2919, not to interfere with the consideration of the measure. Is there objection?

There was no objection.

EXTENSION OF REMARKS.

Mr. LAYTON. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD in 8-point type by printing a speech that I prepared on the value of synthetical chemistry in the United States.

The SPEAKER pro tempore. The gentleman from Delaware asks unanimous consent to revise and extend his remarks in the RECORD in 8-point type by printing a speech prepared by him on the value of synthetical chemistry in the United States. Is there objection?

There was no objection.

Following is the address referred to:

Mr. LAYTON. Mr. Speaker, I desire again to address the House upon the subject of synthetical chemistry, and to emphasize afresh the paramount importance of that part of Schedule A of the tariff bill relating to coal-tar chemistry, now in process of construction by the Congress. Whether we realize it now or not, though we be indeed blind and without vision, synthetical chemistry is the greatest potential factor of our present civilization. The age in which we live is characterized by two new forces which invade and affect every form of our national life. They are synthetical chemistry and electricity. Together, however, they are the twin giants of modern power and usefulness. By reason of its association with our actual daily existence in the way of telephones, telegraphs, the wireless, the cinema, and in numerous other ways, we give freely due recognition to the importance of electricity, and in a measure comprehend its power and utility, and value its usefulness. But the mysteries of chemistry are hid in the laboratory, and the result of the things done there—that are found there—are given to the public, without the public in any adequate measure comprehending the means employed or the magnitude of actual or possible achievement that lies in the future. There is no need for defense of electricity or for the enlightenment of the public upon the subject. It speaks for itself every hour in every home and workshop, in every church and playhouse in the land. Notwithstanding, however, the wonder of it and of all its varied usefulnesses, together with its power to afford pleasure and amusement to all people, regardless of age, it is not paramount to that of synthetical chemistry.

A curious and inexplicable fact is that while electricity enjoys the approbation of the people, synthetical chemistry is being surrounded by ignorant prejudice which retards its progress, and may even extinguish development as far as this country is concerned, which was actually done by the tariff act of 1883 when the specific duty of 50 cents per pound was taken off the dyes obtained from coal tar. It is the fashion of the hour to cry out against those who are engaged in the national development of synthetical chemistry. This cry comes from demagogues, German influences, and the selfishness of the textile industries. There are psychological fashions just as there are fashions in spring hats.

The time was when the country raged over a Steel Trust, and gnashed its teeth over the Standard Oil, and frothed over the Copper Trust. People of intelligence to-day have accepted these vast enterprises with complacency, and view their vast importance even with pride as being a part of our national strength and greatness, so that no longer is an echo heard from the reverberations of the clamor which once was raised against these great national enterprises. No one thinks much nowadays upon the fact that great combinations of capital control the telegraphs and telephones, or the moving pictures, or steel production, or copper, or oil, or cotton and woolen establishments. But now when the new question of dyes comes up involving the most wonderful potentiality of our age a howl of protest is raised against those who engage in manufacturing these and other cognate products of coal tar as if some enormity were being perfected or perpetrated against the welfare of the Nation, notwithstanding the fact—which ignorant people will sometime be forced to recognize—that synthetical chemistry and the results obtained in the synthetical laboratory are paramount to any other scientific pursuit that characterizes our times, being of fundamental necessity both in peace and in war. This is the age of chemistry. The dreams of the ancient alchemists have come true. Crude coal tar by the magic processes of the laboratory is transformed in a thousand useful and marvelous products that affect every form of our national life. The chemical laboratory passes a greater productive power for health, for agriculture, for national defense, for use in textiles, for bodily ailments, and for pleasure, not to mention a multitude of other things, than is found in all the electrical, steel, cotton, or woolen establishments in the land. It is enchanting by reason of its vast variations of wonderful utility. It is a matter of general agreement on the part of intelligent minds the world over that the next war will be one in which explosives and gases will be the terrible agents for attack and defense. The recent horrible conflict revealed merely the possibilities of the destructive power that could be generated in the chemical laboratory and those engaged in that conflict unhesitatingly and unanimously declare that the power thus revealed is as yet in its infancy compared to the certain attainments which lie in future discoveries in this illimitable field. No matter how deep or fervent the wish—even the prayer of multitudes—the recent Armageddon has not changed essentially the desires, the ambitions, even the greeds and hates of men, war has not been abandoned by mankind, no matter how horrible it is, nor how infinitely desirable it is that it should be so.

I shall not go into a minute history of the coal-tar chemical industry. I shall give only the briefest description compatible with the purposes of this speech.

In 1856 Perkins, of England, a young assistant in the Royal College of Chemistry of London, of which A. W. Hoffman, a German, was director, made the first discovery of any industrial importance in aniline purple, called mauvein. Perkins patented this discovery and started its manufacture in conjunction with his family and made a great success financially. Two years after the Perkins discovery of aniline purple in England, Verguin, of France, discovered aniline red, called in trade fuchsin. Following the example of Perkins in England, fuchsin was patented by the Renaud Freres, silk dye manufacturers in Lyon. This new dye also had a great financial success. These two products, obtained from coal tar, marked the beginning of the wonderful developments which have since taken place in synthetical chemistry, whereby an illimitable number of hues of every shade have been brought into daily use. Abandoned in England apparently by lack of recognition of the great field that was presented for scientific discovery and the vast utility that could be found therein, it was taken up later by German chemists, who seem to have received their inspiration from the London Universal Exposition in 1863, in which coal-tar products were made a conspicuous part of the display. From that time there was a quiet but indefatigable research instituted by German chemists, operating always in conjunction with German

manufacturers, until, hand in hand, the chemist and the manufacturer, aided by the Prussian Government, practically commanded the markets of the world through their wonderful and valuable discoveries. It should not be forgotten that these discoveries did not stop at the mere matter of dyes, but resulted in the most wonderful discoveries affecting the medicines used by the medical profession the world over. Nor did these discoveries stop there. These investigations by the synthetical chemist brought about the discovery of numerous explosives and gases which came near enabling Germany to conquer the whole powerful and civilized world. Moreover, and not the least in importance, this field of investigation opened the way for the making of certain necessary ingredients in fertilizers and, through such wonderful discoveries as that of the Haber process, revealed a great resource for that supreme industry which feeds the world—agriculture. What I desire to emphasize, and which I think hard-headed Americans should appreciate, is the fact that the German monopoly which resulted from these discoveries of synthetical coal-tar products—a world-wide monopoly, including our own markets—was due to the intimate union of science and industry. With characteristic thoroughness, their great dye works were either united in a few corporations or were brought together under a syndical union called the I. G., or Interessan Gemeinschaft.

This was done for the purpose not only of preventing loss by senseless competition, which had come near destroying the German industries in their early stages, but for the purpose of coordination in their traveling agents, in the study of markets, in the study of the habits and necessities of various peoples, in the differentiation of demand by reason of varying climates and customs, as well as for the purpose of concentrating scientific effort in the laboratory. These industrial establishments employed large numbers of chemists at high salaries, and the various fields of synthetical investigation were divided among them so that there was no loss of time or effort by duplication of work. The history of the wonderful success the Germans made in this potential field of human knowledge reveals the most systematic research. Laboratories were constructed and chemists employed at high salaries for the profoundest and most patient investigation, and a spirit of devotion was evolved seldom found among any people. The purpose was individual enrichment and German governmental power. Not only was the German manufacturer of coal-tar products eager to obtain all the scientific advantage that he could acquire through the employment of chemists by the establishment of the chemical laboratory, and the great financial benefits therefrom, but very early the German Government became intensely interested in chemical research, and gave practical aid not only by appropriations of money but by protection to patents, clearly foreseeing the inestimable advantage that this industry promised in aggressive warfare upon which it had long resolved to embark. "When the clouds of chlorine gas suddenly enveloped the British and French at Ypres salient, early in 1915, a new and fearful weapon was found by men for mutual destruction." The result of this is now an old story. The dreadful fact is that from 20 to 30 per cent of all our casualties during the year 1918 were due to gas. In 1874, 10 years after the real beginning of coal-tar synthetical industries, the production in Germany amounted only to $6,000,000; in 1912 this had increased to $60,000,000, $50,000,000 of which was in exports. This fact is one to be seriously considered. A new science in a space of less than 40 years had made practical a new industry, employing large capital and extensive labor—from the crudest to the most highly scientific—resulting in huge profits which enriched the whole German nation and incidentally placed the American people under tribute, not only for their dyestuffs but for medicines, for certain essential substances used in agriculture, together with a multitude of other products which the chemical laboratory had discovered as being capable of a multitude of uses.

The purpose of my address is to emphasize the absolute importance of this country fostering, protecting, and establishing upon a sure and impregnable basis an industry founded upon science, and that science having within its scope illimitable possibilities that may affect even our existence as a free people. I desire to make the declaration that in the light of discoveries, and in the light of actual experiences, such as we had during the war, it would be stupidly criminal for Congress to be influenced by the forces that seek to destroy this industry in the United States. Do not be deceived. These forces that are now at work are not hidden. On the contrary, they loom up before the gaze of those who have eyes to see in all the ugliness of their selfishness. They are an unholy trinity—the demagogue, the selfish textile manufacturer, and the German agent. The demagogue who is without conscience, and lacks generally both courage and brains, finds it often of temporary advantage politically to cry out against capital and trusts and monopolies, because of his belief that the majority of his own electorate are ignorant, and that he can easily prey upon them through their prejudices. Second, the selfish textile manufacturer. Here has been revealed a bit of consummate selfishness which causes one to almost lose faith in human nature. The textile manufacturer has been protected in this country for a hundred years against the looms of Manchester and those of all other foreign rivals. He has enjoyed all the beneficent care of the protective principle, whether his mill was in New Hampshire or in South Carolina. Apparently now, because he fears a higher price temporarily for his dyes, or some difficulty in obtaining some particular dye that he needs in his business, he would place the whole country in the same position it occupied before 1914. He has no regard for human life, or for human happiness coming through an increased conservation of human health, which is dependent upon the medicaments now found, and that will be found, in coal tar. He is selfishly oblivious to the matter of national defense, now no longer debatable as to how it must be secured. He is unmindful, in a cold calculating way, of an industry greater than his own—the man who raises the food for the people, and, for that matter, the very raw materials, such as cotton, wool, flax, and other materials, which is used in his own, the textile industry. The man who consults the interests of a foreign Government rather than his own is not worthy of American citizenship. No pleas of individual benefit can prove a justification.

If the textile manufacturer would be consistent, as well as patriotic, willing to accord the benefits of protection to the dye industry, which he has claimed and still demands for himself, it would be a comparatively short time before he would be obtaining his dye materials as cheaply, if not more cheaply, than he ever has before. I desire to repeat what I have already once expressed, that there is no schedule in the tariff bill of such real and commanding importance to this country, and especially to the future, as is found in that part of Schedule A as it passed the House, relating to the protection of the synthetical chemistry of coal tar. What has already been accomplished in the various fields of pharmacy, agriculture, and war defense, not counting those wonderful and varied products which have affected personal everyday happiness through the interior decoration of homes, the costumes of the people, and the lives of everyone in numerous ways, is only a small part, I believe, that will eventually be accomplished. We made this country independent and powerful by adequate protection to iron and steel, to cotton and wool, to glass and tin, in fact, to all of our industrial enterprises, until no nation is more independent—more fully self-dependent—than the people of the United States. This was the thought and the purpose more than a hundred years ago when we sought to be independent, politically and industrially as well, of England as of all other nations generally. There is no reason why a policy whose results speak for themselves should not be zealously, gratefully, even worshipfully, continued. If it is contended that the present greatness of the United States would have been attained just as well under a free-trade policy as under a protective-tariff policy, it would be equivalent to saying that diametrically opposite economic principles would have the same result—that if the protective tariff principle is vicious, then through vicious economic legislation we have the spectacle of a nation becoming rich, powerful, and prosperous! This is an obvious absurdity.

The third enemy to the establishment and the conservation of the synthetical coal-tar industry in the United States comes from German propaganda. This is wholly natural, for the German manufacturer of dyes, of medicines, and of fertilizers desires to retain a monopoly in the American market, which once he so profitably enjoyed. During the war, while engaged in the manufacture of explosives and gases, they necessarily manufactured millions of tons of by-products, including dyes, medicines, and other products, which they stored up until at the end of the war they had accumulated millions of tons for the purpose of flooding the American market and breaking down our American establishments.

Fortunately, this disastrous result was avoided by the emergency tariff legislation. But the danger has not been wholly avoided, because we are about to establish a permanent tariff, which in a comparatively short time will either be beneficent and protective or will result in the downfall of the industry which grew up, developed, and prospered under a protection given by war which in effect was a practical embargo against all foreign importation and competition. It is certain that if this industry is destroyed in the United States, that we shall be again at the mercy of Germany, who will take advantage of the situation and take the last penny of profit

consistent with retaining her monopoly. Let us not forget that the American business man will not be led to invest his money in an enterprise which the shortsightedness of a Congress may destroy. He has had an experience once before, as I have already mentioned, when an adequate protection was taken away from his business, resulting in its destruction, and if his enterprise is again destroyed he will fight shy of future experiments which, judging by the past, leads only to certain loss.

The argument is advanced that to give adequate protection to the chemical coal-tar industry will be to create a monopoly; that the American manufacturer of these products will control the American market and fix the price. Admit, for the sake of argument, that this result will happen, though I deny that it can happen in this industry to any extent equal to the control of the prices of cotton and woolen fabrics, of iron and steel products, of tin, or of any other largely manufactured product in the United States. But if it should be so, let me ask seriously would not any sensible, patriotic American prefer an American monopoly to a German monopoly of coal-tar products in the markets of the United States? Would he not prefer to be independent of any country for his medicines, for his agricultural elements, and for all the indispensable things now coming from this source? If Germany monopolizes the American market, German capital will enjoy the profits; German labor will secure the wages; and most important of all, the German industry will maintain an increasingly large body of German scientists delving patiently day by day into the mysterious processes of synthetical chemistry, making newer and newer discoveries in this illimitable field, the borders of which have only been dimly viewed, progressing slowly but surely farther and farther into unknown spaces filled with unknown utilities and unknown powers for good and for evil, which in war might prove our annihilation as a people.

If, however, we are wise and throw the protecting arm of law over this industry, sheltering and fostering it, we will develop synthetical chemistry equally, if not to a higher degree, than any other nation, in spite of the German prediction that we are incapable of the necessary application and painstaking devotion that synthetical chemistry demands. We will thus become independent and self-sufficient, not only in dye making but in medicine making, as well as in the making of the things that the farmer needs in developing the fertility of his soil. Not only will American capital reap the profits of the industry rather than German capital but American labor will be employed and not German labor. Further still, if great profits are made, if American manufacturers develop their enterprises until the total of manufactured products grows into huge proportions, and every decade greater and greater gains are obtained from this industry, the Treasury of the United States through a tax upon incomes and the profits of manufacturers will become enriched in an equal degree. The profits will be American profits, and the wealth thus attained American wealth for American purposes. Every consideration of prudence, of patriotism, as well as of profit, would induce the affording of this protection by Congress without a dissenting vote. But this will not be. The contrarity of human minds and of human purposes will prevent. But even though men differ in their conclusions, no man who represents the people in either the Senate or the House should resort to subterfuge and even rank misstatement in order to sustain his argument upon the question.

To show, as a mere example, to what lengths some of the opponents of the synthetical coal-tar industry will go let me quote from a recent speech of Senator KING, of Utah, who seems to have constituted himself the chief champion of the interests of the German dye manufacturer.

Under date of May 8, on page 6122 of the CONGRESSIONAL RECORD, the distinguished Senator from Utah remarks as follows:

> For the fiscal year ending June 30, 1914, which is a full month before the outbreak of the World War, the exports and imports of the chemical and allied products covered by this schedule under the Underwood Tariff Act were: Imports, $267,408,785; and exports for the same period, $265,019,278, showing on this schedule a practical balancing of imports and exports.

If the distinguished Senator from Utah in putting this statement in his speech was simply endeavoring to fill the RECORD with information for a credulous public, he perhaps contributed to this end. It had evidently no other earthly relevancy to the purpose of his speech. If, on the other hand, he made the declaration to show that the products of the chemical coal-tar industry were nearly balanced in exports and imports, he was far from having an intelligent comprehension of Document No. 82, Bureau of Foreign and Domestic Commerce, from which he quotes, or was deliberately endeavoring to deceive the public.

An analysis of the exports from this country will show that the two hundred and odd millions in value exported contained coal-tar products to the value of $35,359 of exports only, as against $8,818,944 of imports, chiefly from Germany, and that the great proportion, almost the whole in the value of the two hundred and sixty and odd millions of exports, was made up of rock used in fertilizers, in sulphur, in turpentine, in oils, and in other products which the country possesses in natural abundance, and which while listed as chemicals are not coal-tar products, and therefore have no relevancy to the discussion. I am loath to accept the fact that the distinguished Senator tried to make the public believe that in the chemical coal-tar industry we exported about as much as we imported. As a matter of fact, I supposed it was a part of common knowledge that as for dyes and medicines obtained through chemical coal-tar processes, as well as ammonium sulphate manufactured by the Haber process, together with chlorine for bleaching purposes, the Germans had a practical monopoly not only in the markets of the United States but of other nations.

Elsewhere in his long diatribe against the chemical schedule he remarks "that the E. I. du Pont de Nemours Co. manufacture various kinds of drugs and chemicals" and "has $353,000,000 invested in its chemical, dye, and allied corporations." Would the distinguished Senator be better pleased if this great company had only $353 invested in these enterprises, or still better pleased if neither this corporation nor any other American corporation had a penny so invested, so that the German manufacturer could regain his monopoly of American markets and again put the American citizen under tribute for the medicines he depends upon in the hour of illness? The distinguished gentleman should go back to 1914 and refresh his memory with the facts as to the price of those medicines which had come to be of especial use, such as salvarsan, aspirin, and others of incomparable value and usefulness. But why argue about a matter which has for its warp the same old argumentative threads of misstatement? Take the distinguished Senator's long and voluminous speech and, striking out coal-tar products, dyes, and medicines, and insert wool, cotton, iron, steel, and tin, it would be a perfect pattern of all the free-trade speeches delivered by free traders for the last hundred years. The question involved in a protective tariff adequate for the conservation and the establishment of this industry is one that must be regarded from a national standpoint of absolute need and necessity. It would be criminal folly to view the matter in any other light. It concerns too radically the preservation of our country in the event of a war.

It is of inestimable benefit to our industrialism, to our agriculture, and to the refinements and needs of our social life. Those engaged in this business do not ask for largesses out of a federal treasury such as the German Government afforded their own people. Our manufacturers are both able and willing to put their money in this industry and make the United States of America the first in synthetical coal-tar production, as it made it the greatest country in the civilized world in the production of iron and steel. They ask only the same fostering care, the same benefit of a protective tariff which has built up all our industries to the high and commanding position which made this country the determining factor in power and resources in a war in which the whole world was in conflict.

This country needs to be wholly and absolutely independent of any and all countries in a matter which so intimately concerns its textile industries, in a matter so profoundly related to its public health, and in a manner which is so intimately connected with agriculture and horticulture. But, above all, it must be supreme in its chemical knowledge for its own safety. This can only be attained by the industry itself. Patient investigation leading to discovery can only go to the highest point of development through intimate association with the industry itself. The industry needs the chemical knowledge. The chemical knowledge can only be properly attained through the support of the industry. They are mutually dependent, possessing reciprocal needs and demanding reciprocal assistance.

In view of the fierce competition which would undoubtedly ensue if an inadequate tariff was imposed upon the products of the synthetical laboratory, not only would the laboratories go down but the industry itself would be extinguished. The country can not afford this, whether the question be viewed from the standpoint of national benefit or of national gratitude. Those who invested their money in these enterprises—and there are hundreds of them—did it in response to a demand upon their patriotism. These dye industries grew up under the protection of war, which amounted to an embargo. They stand ready not only to survive but to go on increasing in scientific and industrial attainment, provided the Congress has vision enough to

comprehend the magnitude of the benefit and the national necessity involved in their maintenance. Let me close by imploring the Congress to shut its ears to all demagoguery, all selfish and special pleas, all foreign propaganda, and give to this most vital industry its fullest protection for the sake of the American people.

SWEARING IN A MEMBER.

Mr. GARNER. Mr. Speaker, I ask unanimous consent that the Representative-elect from the thirteenth Texas district, Hon. GUINN WILLIAMS, be permitted to be sworn in at this time, although his credentials have not reached the Clerk of the House of Representatives.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent that the oath of office may be administered to the Representative-elect from the thirteenth district of Texas, his credentials not having arrived. Is there objection?

There was no objection.

The SPEAKER pro tempore. Is there objection to the Speaker pro tempore administering the oath?

There was no objection.

Thereupon Mr. WILLIAMS, accompanied by his colleague [Mr. GARNER], appeared at the bar of the House, and the oath of office was administered by the Speaker pro tempore.

EXTENSION OF REMARKS.

Mr. BURROUGHS. Mr. Speaker, I wish to ask unanimous consent to revise and extend my remarks in the RECORD by printing in 8-point type the very remarkable experience of a young ex-service man while in the service in France.

The SPEAKER pro tempore. The gentleman from New Hampshire asks unanimous consent to extend his remarks in the RECORD by printing in 8-point type the experience of a young ex-service man while in the service in France. Is there objection?

There was no objection.

Mr. BURROUGHS. Mr. Speaker, under leave granted me by the House to extend my remarks, I am inserting in the RECORD an account of what I believe to be a very remarkable experience of a young ex-service man in the war. The story was written by Mr. Will M. Cressy, of New Hampshire, the well-known and distinguished actor and playwright, who vouches for the accuracy of the facts narrated. It comes to me by courtesy of my long-time friend and friend of Mr. Cressy, Hon. George C. Hazelton, native of New Hampshire, a former Member of this House from the State of Wisconsin, and now a resident of Washington, D. C. The story is as follows:

THE GRIN THAT WOULDN'T COME OFF.

A TRUE STORY OF THE WAR.

(By Will M. Cressy.)

This is a true story of the war. Just one of the thousands that transpired every day. Just one of the hundreds that I knew personally. And the reason I tell this one is because I happened to know more of it than I did of any of the others.

Mrs. Cressy and I had the great joy and honor of heading the first unit of "America's Over-There Theater League," an organization of American actors and actresses, which, under the direction of and through the assistance of the Y. M. C. A., sent 1,084 of the best and noblest of our American actors and actresses over to France to try and bring hours of happiness and forgetfulness to "Our Boys," who were there fighting, suffering, and dying for us.

Among one of our first audiences was Corpl. Le Roy Dawson, of the One hundred and seventeenth United States Engineers, Forty-second (Rainbow) Division, who called himself a "dry nurse to the tanks," and I suppose all that the Engineers had to do was to take a "manicure set," consisting of an ax, a shovel, a crowbar, and an assorted set of wire cutters, and saunter ahead, smoothing out the landscape for the tanks to travel over; filling in trenches and shell holes, digging away hills and earthworks, and building bridges—all under fire—and just having a nice, quiet time generally.

Our first meeting with this boy took place under rather startling circumstances, especially when you consider we had only been in France for a very few days and were a good deal nearer the fighting lines than we had ever dreamed we would be.

Along about 4 o'clock in the afternoon we were giving a show to a lot of wounded and convalescent boys in a hospital; we were getting along all nice and peaceful when an officer, accompanied by an orderly, marched into the room, drew a very imposing looking paper from his pocket and demanded: "Where is Will M. Cressy?"

Immediately I seemed to feel the proverbial lump rise in my throat. I came to attention, saluted, and responded "Here."

"I have a requisition for you and your associates," the officer said.

As we had only been soldiers for a very short time, and were not familiar with the terms, regulations, and military rules, you can imagine our great consternation at this moment—anyone could have told from the faces of our "noble five" that each and every one was hastily reviewing the events of the past three weeks, trying to recall any sins of military commission or omission that would call for a "firing squad at sunrise."

I finally managed to get the lump in my throat down far enough to inquire, "What the h— is a 'requisition?'"

And he informed us that over some 45 kilometers away there was a body of American troops who were to go into action the next morning, and the commanding officer had "requisitioned" the Cressy unit to come over there and give the boys a show.

It was not a very flattering proposition. It would seem as if he thought that after witnessing one of our shows the boys would be more willing to go out and be killed.

Well, anyhow, we went. In the first place we wanted to go; that was what we were over there for. And in the second place, what else could we do in the face of a "requisition" from a general?

We got near the town about 5 o'clock; but they held us out in some woods until it got dark.

"Ours not to question why!
Ours but to do"—and act.

After it got good and dark we felt our way down the hill through the darkness and into the town. At the edge of the village and on every corner was an American M. P. (military police), each of whom gave the stern order, "No smoking! Do not strike any matches!" And as we could hear the drone of countless planes up overhead and knew them to be German, and knew that they were just looking for a light of any kind as a mark to drop several tons of T. N. T. and assorted hardware, we did not feel the slightest desire to smoke or strike any matches. We felt and stumbled our way along until finally we were ushered into what had been an old market place. It was simply a lot of posts with an iron roof overhead. Running around from post to post had been stretched an iron rope; this rope was guarded by more military police, regularly voicing the command of "No smoking; strike no matches."

Jammed inside of these ropes under the tin roof were 2,800 lonesome, homesick, heart-hungry American soldier boys. No; they were not soldiers, either. They were just our own dear American boys in soldier clothes. Somehow our boys never did seem like real soldiers to us. They were too young. All the other armies consisted of so much older men. Their youngsters had all been killed off or else their three years of warfare had made them look like older men. And so, compared to them, our boys seemed like schoolboys. Not that they could not and did not fight like men. Their record shows their valor; but in spite of all that they were always to us just the boys that we had known back home, the chap who lived just around the corner from us, the boy next door.

Our stage that night consisted of two tables placed side by side, making a surface of perhaps 6 by 8 feet. Our stage furniture consisted of our own little collapsible organ, and two camp chairs. And in all that great auditorium and for our "stage" we were allowed one kerosene lantern. We had to take turns in holding it up to each other's faces as we talked or sang, so the boys could see us.

Down in front, right up close to our "stage," five young scamps of American soldier boys had dragged a log that must have weighed half a ton. This was their "private box." And it also constituted all the seats there were in the house.

It is unnecessary to state the show was a riot. As we were the first lot of players to get over and the first entertainment the boys had seen since they left the United States of America, and what was a still bigger joy to the boys, Mrs. Cressy and Miss Davis were the first American women they had seen in France, it can easily be understood that we were a hit.

The minute the entertainment was over one of these five boys down in that "private box" made a flying leap for the "stage," threw one arm around Mrs. Cressy and the other around Miss Davis and tried to waltz them around—and they all fell off the table and were helped back up again—and we all laughed and cried and made darn fools of ourselves generally.

And then the boy told us who he was, that he was Le Roy Dawson, of Los Angeles, Calif., and how he had been going to the Orpheum Theater every year since he could remember and seeing us, and all about his dad and two sisters and how he had lost his mother when he was just a little chap, and how he had longed for the sight of a girl from the United States of America, and how doubly gratifying it was to see not only an American woman, but one whom he had known, by sight at least, for so many years back home.

This was about 9 o'clock at night. At daybreak the next morning these boys went into action. And by 9 o'clock the next night 800 of those splendid boys we had played to that night were scattered over the fields of France, their blood dyeing the crimson poppies a still more crimson hue. And one of our most precious thoughts is that they went to their death wearing the smile on their faces that we put there.

And somewhere out on that battle field poor Roy Dawson lay with a leg torn off and half of his face shot away. O God, when I think of him and hundreds, yes thousands, of others of our young American boys, to say nothing of the hundreds of thousands of the youth of other lands and other countries, ripped and torn, burned and blinded, and sent back to us mere wrecks of humanity, my very soul cries out "Why?"

What possible gain can ever come from war to pay the price of the sacrifice and sufferings such as these?

When a soldier falls in battle, of course, his comrades can not stay behind to care for him. They must press on and on until either death or victory comes to them. And so all that Roy's "buddies" could do was to hurriedly place him in as comfortable a position as they could, say "Good-by, Buddie," and go on.

"But wait a minute," said Roy, "take my 'gat' and get one German to pay up for the mess they have made of me."

And Buddie took the gun and plunged on into the inferno of shot and shell and smoke. And that was the last time Roy ever saw him. But months afterwards the gun came back to him through other hands, and carved on it was the one notch. "Buddie" had kept the faith and got his German before he "went West."

With the darkness came the stretcher bearers picking up the wounded. They came to Roy. They drew the blood-soaked rags down from his face, took one look, placed the cloths back, and started away.

"Hey, what's the idea?" demanded Roy. "Ain't you going to take me back?"

"You don't want to go back, Buddie; your face is all shot away."

"Hell, my mouth ain't gone, is it? I can talk."

"But your eyes are gone. Your leg is gone. You just go to sleep, and it will be all over in a little while."

And for 48 hours poor Roy lay there, waiting for—what? By this time infection had gotten into the leg. According to what the stretcher bearer said, his face was an awful mess. The Germans were likely to come along any time bayoneting the wounded. He was having plenty of time, while left there alone to die, to think of that little home under the orange trees far away in California, "where Dad, big sister Helen, and little sister Polly," who loved and needed him, were awaiting his return; somehow that memory kept the spark of life in his bosom all through those awful hours.

Some time along during the hours of that second night he regained consciousness, and off to one side he heard what he says "was the sweetest music he ever expects to hear this side of the Pearly Gates. A rough, hoarse, American voice cursing everything on, under, and above this terrestrial globe in awful French and worse—or better—English.

"Hey, you Yank; come over here!" shouted Roy, demonstrating conclusively that, as he had previously claimed, his mouth was still in working order.

And "Yank" came over. He proved to be a wounded American doughboy, who was taking three German prisoners back; one of the prisoners was on a stretcher and the other two were carrying him. He also took one look at Roy and said, "Stay right where you are, Buddie, and die comfortably"; but Roy disagreed with him, and stated that he was not half dead yet; that he did not want to die, in fact, he could not afford to die, as he had left too many things unfinished back home.

He told him about his dad and his two sisters, who would be so disappointed if he did not come back.

By this time the tide of battle had turned, and the shells and machine-gun bullets were whanging and whizzing around again.

"All right," said the other wounded boy, "I guess there won't any of us get back. But I had a d——d sight rather get "bumped off" trying to get an American boy back than a German. So out you come, Heinie," and the chap on the stretcher was gently lifted out, and Roy laid in his place, and the journey toward the rear was resumed. It took just six hours to reach the first-aid hospital.

My next meeting with Roy was in a hospital in Paris months afterwards. I should never have known him. But he knew us. His nose was gone completely. One eye was gone. (Four days after he was hurt, the doctors in prowling around amid the wreckage of his face found one of the eyes, and in some marvelous way saved it and the sight of it.) In the right side of his face, where his cheek bone should have been, was a hole that you could have dropped a hen's egg into. They were still amputating the leg, and before they got through trimming and pruning it, it took five different amputations to get above the infection.

But with all the suffering that he had gone through, maimed and disfigured as he was, that same saucy boyish grin was on his face. I have in my possession now the photographs taken by the surgeons of all the difficult and painful operations that were performed before he was "finished," and in every one of them, no matter what condition he was in, that grin was always there.

And then came the night before Christmas and into the big hospital came an officer with the announcement that a hospital ship was sailing the next day for back home and that 27 patients from this ward would be taken. He also announced that they would have to draw lots to decide which ones should go. And Roy drew a lucky number.

The minute the officer was out of the room, Roy and another boy with a leg off hopped out of bed and tried to waltz and fell. Roy burst the stub of his leg open; but do you suppose that that boy was going to lose a chance to go home just because of a slight accident like that? Not much. His buddies helped twist a handkerchief around the stub, and at midnight he was carried on board the ship.

The next day he was found nearly dead from loss of blood. "Why, what are you doing here?" demanded the doctor. "You should never have left the hospital."

Roy grinned and said, "Let's see you get the captain to turn this ship around and take me back again," and fainted.

This is not the whole story by any means, for there were a thousand things that took place in all these weary months which, of course, I do not know, and I am only telling you of incidents regarding this boy that I picked up here and there at various times and places.

At the same time all over France, Belgium, Germany, England, and Canada thousands of other boys were undergoing these same hardships and tortures. It is only because I knew this boy, knew a part of what he went through, that induces me to relate these incidents.

Months afterwards—it was now some 14 months after that first meeting in France—we were playing at Keith's Theater in Washington, and went out to the Walter Reed Hospital to entertain the wounded soldier boys there; we were sitting in our dressing room, waiting for the show to start, and were talking to the head nurse, who was telling us about "my boys," and how brave and uncomplaining they were.

"But," she said, "there is one boy here that I love above all others. No mother ever loved a son more than I love that boy; he is the life of the whole hospital. They are cutting, carving, and torturing him all the time; but the minute he can crawl out of that bed he is over in the recreation hall, playing the piano, singing, joking, and cheering up the other boys."

She said how sorry she was that he could not be here today, but that four days previous he had had a very serious operation and would not be out for two weeks yet.

A few minutes later she came hurrying back again, saying, "What do you think? My boy is here. He says he knows you folks. And he has gotten out of his bed and has crawled over here just to see you."

And the next minute, clump, clump, clump, and in marched Roy Dawson. The leg was a foot or two shorter than when we had last seen him in France and the entire upper part of his face was in bandages, leaving only one eye peeping out, but the same old grin was there.

The nurse said the leg was coming on fine and the the new artificial one would be ready in a few days, and the hospital folks were about ready to discharge him. But—

"No, sir," interrupted Roy, "You are not going to turn me loose like this. I am not 20 years old yet. I have got to go back to school. I have got to see my folks—my dad and my sisters. And I am not going through life as a freak. I want a face. Now, you face carpenters, get busy and build a face on me. And I want a 1919 model, too. I never did like that nose of mine very much, anyhow."

And so for weeks now they had been at work "building him a face."

The first thing to do was to fill in that awful hole in his face. This was done by clipping out bits of flesh from his arms and legs, a bit at a time, and stitching them into the opening. Some of them took root and grew and others sloughed off. But by keeping at it day after day and week after week at last the hole was filled up.

Then came the trimming down and smoothing up that side of his face to match the other side. Then came the skin grafting—again robbing the arms and legs to get the material for the face.

All this was slow, tedious, painful work. But my photographs, taken all through these weeks, show the grin working right through it all.

Next came the hollowing out and forming an eye socket and training it to fit the new artificial eye.

"And don't forget I want eyebrows and eyelashes, either," said Roy, and he got them, too.

And then came the sticking point, the nose.

It was finally decided that the best nose-building material available was a rib. So back onto the operating table again, and the lower rib on the right side was taken out. Now, you know if you or I were to go onto the table and have a rib removed we would think we had done something, and so long as we lived we would talk about "my operation." But with Roy it was by this time an everyday occurrence. I asked him once if the ether made him sick. "Not after the first five or six times," he replied.

This rib was whittled into the proper place to constitute a nose after the plans submitted by Roy and then set into his left arm just above the elbow to gather unto itself a proper covering of flesh and skin. Roy then unfortunately caught pneumonia, and the bone rotted.

"Back to the mines," said Roy, and back on the table he went again, and the lower rib on the left side was taken out and whittled into shape. But this time a different system was evolved. A slit was formed in his forehead and the bone nose fitted in, bottom side up and wrong side out and the skin trained over it, and while this was going on every once in a while the leg was being reamputated.

Later, when all this bone and flesh had taken root on the forehead, the whole thing was slit down away from the forehead, leaving the lower edge for a flap or hinge, and fitted down into the place where the nose should be. It was just four days after this had been done that he walked into our dressing room at the hospital.

Things looked pretty hopeful now. But, just to illustrate the uncertainty of this nose-transplanting business, after all this trouble, after all the pain and suffering, the bone refused to knit and had to be taken out again.

"Well," said Roy, with a very, very faint grin, when he came out from the ether after this operation, "where do we go from here? What are you going to use next for a nose?"

The doctors decided to take off a finger and use the bone of that for a nose.

Roy decided, emphatically and profanely (his hospital training had added greatly to his proficiency in this line), that they would not take off a finger. "Why," he said, "I play the piano for the fellers. Have another rib."

And that is just exactly what they did do. They opened him up again and took out a third rib.

"And say," said Roy, just previous to their adjusting the ether cone, "supposing you just put in a set of hooks and eyes up and down that opening this time so you can get in and out without cutting a new hole every time."

This time the operation was a success. And to-day Roy has got as perfect a nose and face as you or I. There is not a cut nor a stitch mark showing. Unless somebody called your attention to the fact, you would never think that half his face was, as he puts it "store goods."

The only thing that seemed to worry him all through this was thinking of what happened to Adam when they removed his rib. Every time when he came out from under the ether he would look over in the bed to see if he had a wife. And along about the third time he began to worry for fear he would have to give up his residence in California and move to Utah.

Our next meeting with Roy was in Los Angeles a year or so later. As we stepped down from the train a stout, bronzed young chap, with amber glasses, stepped up to us and without a word picked up our suitcases and started off with them.

"Hey," I called after him, "what's the idea?"

"The idea is that you are coming right straight out to our house and meet my dad and my sisters and see the new house I have bought for them."

"Why, it's Roy!" exclaimed my wife.

And for a fourth time I had to stand and watch a hugging match between my wife and another man.

He led the way over to one of those Detroit inventions that has made walking a pleasure, and away we were whirled out Hollywood way to a cozy, flower-covered bungalow, where we found dad and the girls waiting to welcome us.

That evening we had the pleasure of reading over the greatest collection of human documents that it has ever been my lot to see—the letters written to Dad and the girls by officers, doctors, and nurses, all telling them what a splendid, brave, cheerful son and brother they had.

And dad told us about the little home. By the time Roy got out of the hospitals he had quite a little nest egg of back pay coming to him. And with it he had bought the little home, deeded it to Dad, and made over his insurance money, $57.50 a month, to pay the balance.

Meanwhile, he has gone back to school, and the following week he was graduated with a mark of 96.

The following Monday he took his examination for Yale and passed.

The next fall he went to Yale.

Four months later the doctors told him that if he did not stop studying he would lose the sight of his only eye.

So he went back to Los Angeles and started reading law, and the eye gave out again.

About this time we had opened up our New Hampshire summer home. So we wrote him to come up there and put in the summer forgetting his troubles.

And he did. And he not only forgot his own troubles but he made everybody else forget theirs.

The first dance of the casino was to be held Saturday night. That afternoon he came into my little workshop where I was at work, bent the store leg at the knee, "flipped" the ankle, and declared, "She's a little bit stiff for dancing." So he crawled up on the bench, and we took off the leg, took it apart, greased all the joints, put it back on, and that night he never missed a dance. And nobody in the world could tell the "store leg" from the original production.

When the bathing hour would come he would go down to the bathhouse, take off his clothes and the leg, put on the bathing suit, put the leg back on again, walk down to the wharf, take off the leg, lean it against a post, and in he would go.

When there was a ball game, he was one of our most enthusiastic players. He would catch, throw, bat, and run bases, and woe unto the baseman who got in the way of that wood and iron leg of his.

By fall he was sunburned and tanned, and the bothersome eye was to all appearances efficient, but last week I received a letter from him stating that "big sister Helen is reading law to me five hours a day."

Just to show that you can never foretell good luck from bad luck, every time that he takes an examination "big sister Helen" takes one too, so that this bothersome eye may serve to admit two members of this family to the bar of the courts of California instead of one.

As I said in the beginning, I do not know that Roy was any better or braver than many others; but we came into close touch with him at so many times and places along that terrible trail that he had traveled that we learned to know him better, love and admire him more, than any of the others, and this is why I have told you his story.

NO QUORUM—CALL OF THE HOUSE.

Mr. CAMPBELL of Kansas. Mr. Speaker, I make the point of no quorum.

Mr. MONDELL. I move a call of the House.

The SPEAKER pro tempore. Will the gentleman withhold that to receive a message from the Senate?

Mr. CAMPBELL of Kansas. I withhold it.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed without amendment bill of the following title:

H. R. 6523. An act for the relief of John Burke, former Treasurer of the United States, for lost bonds without default or negligence on the part of said former Treasurer.

The message also announced that the Senate had passed joint resolution of the following title, in which the concurrence of the House of Representatives was requested:

S. J. Res. 178. Joint resolution authorizing the Secretary of Labor to investigate and report on labor conditions in Cuba.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 6524. An act to permit the correction of the general account of John Burke, former Treasurer of the United States.

NO QUORUM—CALL OF THE HOUSE.

The SPEAKER pro tempore. The gentleman from Kansas [Mr. CAMPBELL] makes the point of order that there is no quorum present. It is clear that there is no quorum present.

Mr. MONDELL. Mr. Speaker, I move a call of the House.

The SPEAKER pro tempore. The gentleman from Wyoming moves a call of the House.

A call of the House was ordered.

The SPEAKER pro tempore. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Anderson	Ellis	Knight	Reavis
Ansorge	Evans	Kopp	Reber
Atkeson	Fenn	Kreider	Reed, N. Y.
Bankhead	Fess	Kunz	Rhodes
Barkley	Fields	Langley	Riordan
Beck	Focht	Larson, Minn.	Robertson
Bland, Va.	Fordney	Lineberger	Rogers
Boies	Free	Logan	Rosenbloom
Bowers	French	Luhring	Rossdale
Brand	Fulmer	McArthur	Rouse
Brennan	Gallivan	McFadden	Sanders, Ind.
Britten	Garrett, Tenn.	McLaughlin, Pa.	Scott, Tenn.
Brooks, Pa.	Goodykoontz	McPherson	Sears
Bulwinkle	Gorman	McSwain	Siegel
Burke	Gould	MacGregor	Slemp
Butler	Graham, Pa.	Madden	Smithwick
Cannon	Griffin	Maloney	Snyder
Cantrill	Hawes	Mann	Speaks
Carew	Henry	Mansfield	Stafford
Chandler, Okla.	Himes	Mead	Stiness
Clark, Fla.	Hudspeth	Mills	Stoll
Classon	Hukriede	Moore, Ill.	Strong, Pa.
Cockran	Husted	Moore, Va.	Sullivan
Cole, Iowa	Hutchinson	Morin	Sweet
Cole, Ohio	Ireland	Mudd	Tague
Collins	Jacoway	Nelson, A. P.	Taylor, Ark.
Cooper, Ohio	Jefferis, Nebr.	O'Brien	Taylor, Colo.
Copley	Johnson, S. Dak.	Oliver	Taylor, Tenn.
Cullen	Jones, Pa.	Olpp	Tilson
Dale	Kearns	Paige	Tinkham
Davis, Minn.	Kelley, Mich.	Patterson, Mo.	Treadway
Deal	Kendall	Perkins	Tucker
Dickinson	Kennedy	Perlman	Upshaw
Dominick	Kiess	Petersen	Vaile
Drane	Kindred	Pou	Vare
Drewry	Kitchin	Pringey	Ward, N. Y.
Driver	Kleczka	Rainey, Ala.	Wason
Dunbar	Kline, N. Y.	Rainey, Ill.	Wyant
Edmonds	Kline, Pa.	Ransley	

The SPEAKER pro tempore. On this roll call 276 Members have answered to their names. A quorum is present.

Mr. MONDELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The SPEAKER pro tempore. The gentleman from Wyoming moves to dispense with further proceedings under the call.

The motion was agreed to.

RIVER AND HARBOR APPROPRIATIONS.

The SPEAKER pro tempore. The unfinished business is H. R. 10766, the river and harbor bill. A separate vote has been demanded en bloc on all amendments to section 9 of the bill. Is a separate vote demanded on any other amendment? If not, the Chair will put the other amendments in gross.

The other amendments were agreed to.

The SPEAKER pro tempore. The question now is on the amendments to section 9.

Mr. LONGWORTH. Mr. Speaker, a parliamentary inquiry. Was unanimous consent, in fact, given for a vote on those amendments en bloc?

The SPEAKER pro tempore. The Chair understands that unanimous consent was given.

Mr. LONGWORTH. The RECORD does not show it.

The SPEAKER pro tempore. The RECORD was corrected on Saturday to show that unanimous consent was given for a vote en bloc on all the amendments to section 9.

Mr. LONGWORTH. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER pro tempore. Is there objection?

Mr. DEMPSEY. Reserving the right to object, I should like unanimous consent to address the House for three minutes, simply to reply to the gentleman from Ohio if I deem it necessary.

The SPEAKER pro tempore. The gentleman from Ohio asks unanimous consent to address the House for three minutes, and the gentleman from New York asks unanimous consent to address the House for three minutes if he finds it necessary. Is there objection?

Mr. BLANTON. A parliamentary inquiry, Mr. Speaker. The previous question having been ordered, is that request in order?

The SPEAKER pro tempore. The Chair can submit a request for unanimous consent, notwithstanding the previous question. Is there objection to the gentleman from Ohio proceeding for three minutes and to the gentleman from New York proceeding for three minutes if he deems it necessary?

There was no objection.

The SPEAKER pro tempore. The gentleman from Ohio is recognized for three minutes.

Mr. LONGWORTH. Mr. Speaker, I have asked for a separate vote on these amendments, not as an opponent but as a friend of this measure. I have voted for every river and harbor bill presented to this House during my term in Congress, and I want to see these bills subject to as little legitimate criticism as possible. It was perfectly evident during the debate the other day that many of the items for surveys carried in this bill had not been given consideration by the committee, and the committee could not give the House the information to which it is entitled. If that is true of the items contained in the bill, it is very much more true of amendments offered in Committee of the Whole and adopted there, on which we have had no possible information. I hope that in the interest of making this a better bill and of being able to go to the country and say, "These bills are legitimate public propositions," these amendments will be voted down. I think it would be very wise for this House to vote down the amendments to section 9 which were adopted in the committee.

Mr. McDUFFIE. Will the gentleman yield? Does the gentleman realize that there are fewer surveys ordered in this bill than in prior river and harbor bills?

Mr. LONGWORTH. I understand that there are fewer surveys. Of course these surveys do not amount to much in money, but they are the foundation of projects which may cost millions of dollars.

Mr. CURRY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman is not recognized for a parliamentary inquiry unless the gentleman from Ohio yields.

Mr. LONGWORTH. I have said all I care to.

Mr. CURRY. I would like to know if the previous question has not been ordered on this bill.

The SPEAKER pro tempore. The previous question has been ordered, but unanimous consent has been given that the gentleman from Ohio and the gentleman from New York may each address the House for three minutes. The gentleman from New York [Mr. DEMPSEY] is recognized for three minutes.

Mr. COOPER of Wisconsin. Mr. Speaker, will the gentleman from New York permit me to ask the gentleman from Ohio a question?

Mr. DEMPSEY. I do not want it taken out of my time.

The SPEAKER pro tempore. The gentleman from New York declines to yield.

Mr. DEMPSEY. Mr. Speaker and gentlemen of the House, in addition to what was said the other day I desire to say simply this: When requests are presented for surveys, they have to be dealt with in one of two ways—either by the committee or by sending them to the Chief of Engineers. If they are dealt with by the committee, it means the summoning of witnesses from the vicinity; it means the attendance of a shorthand reporter; it means a very large expense. In many instances the expense would run up into hundreds of dollars. On the other hand, if you send the request to the Chief of Engineers in a case where you yourselves have no knowledge and can not get any except by such an investigation as I have outlined—as I was informed by General Taylor after the hearing on Friday—in most of the cases the expense is absolutely negligible, and will involve nothing more than the writing of two or three letters. In other words, in the interest of economy and in order that you may save money and that the bill may be economical and above question, it is best for the House and for the country to have these surveys investigated by the department rather than investigated by the committee in the manner I have indicated. [Applause.]

Mr. NEWTON of Missouri. Will the gentleman yield?

Mr. DEMPSEY. Yes.

Mr. NEWTON of Missouri. As a matter of fact, it would not be necessary to put these items in the bill at all if it were not for the fact that Congress has passed a law providing that the Chief of Engineers can not make a report, even if he has all the facts in his office, unless the authorization is put into the bill.

Mr. DEMPSEY. I understand that to be the case.

Mr. GARNER. Mr. Speaker, as I understand, the object of surveys is to obtain information.

Mr. DEMPSEY. Yes; and you can not get it except in one of two ways, and inserting the items in a bill such as that under consideration is by far the less expensive of the two ways.

Mr. GARNER. Perhaps the gentleman from Ohio does not want information. He usually acts without a great deal of information anyway. [Laughter.]

Mr. LONGWORTH. I was unable to get any information from any gentleman over on that side of the House. [Laughter.]

The SPEAKER pro tempore. The time of the gentleman from New York has expired and the Clerk will report the amendments to section 9.

The Clerk read the amendments adopted by the Committee of the Whole House on the state of the Union to section 9.

The SPEAKER pro tempore. The question is on agreeing to the amendments.

The question was taken; and on a division (demanded by Mr. CAMPBELL of Kansas) there were 160 ayes and 44 noes.

Mr. CAMPBELL of Kansas. Mr. Speaker, I make the point of order that a quorum is not present and voting.

The SPEAKER pro tempore. The gentleman from Kansas makes the point of order that no quorum is present, and the Chair will count. [After counting.] Two hundred and thirty-one Members present, a quorum.

Mr. BLANTON. Mr. Speaker, I demand the yeas and nays.

Mr. GARNER. Mr. Speaker, the gentleman's demand comes too late. Since the division there has been a point of no quorum and the Chair has counted a quorum.

The SPEAKER pro tempore. The Chair thinks the gentleman's demand is timely. All those in favor of taking the vote by yeas and nays will rise and stand until counted. [After counting.] Two gentlemen have arisen, not a sufficient number, and the yeas and nays are refused. The amendments to section 9 are agreed to. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

Mr. ROACH rose.

The SPEAKER pro tempore. For what purpose does the gentleman from Missouri rise?

Mr. ROACH. To offer an amendment to recommit the bill with an amendment.

Mr. LONGWORTH. Mr. Speaker, I would like to ask the gentleman if he is opposed to the bill.

Mr. ROACH. I am opposed to the bill in its present form.

The SPEAKER pro tempore. Is any member of the committee opposed to the bill? If not, the Chair will recognize the gentleman from Missouri.

The Clerk read the motion to recommit, as follows:

Mr. ROACH moves to recommit the bill with directions to the committee to immediately report it back with the following amendment: Amend section 5 of the bill as follows: Page 10, line 5, after the word "construct," strike out the word "six" and insert in lieu thereof the word "four."

Mr. ROACH. Mr. Speaker, upon that I demand the yeas and nays.

The SPEAKER pro tempore. The gentleman from Missouri demands the yeas and nays. All those in favor of taking the vote by yeas and nays will rise and stand until counted. Eighteen gentlemen have arisen, not a sufficient number, and the yeas and nays are refused.

The question is on the motion to recommit.

The question was taken; and on a division (demanded by Mr. ROACH) there were 23 ayes and 171 noes.

Mr. ROACH. Mr. Speaker, I object to the vote because no quorum is present, and I make the point that there is no quorum present.

The SPEAKER pro tempore. The gentleman from Missouri makes the point that no quorum is present, and the Chair will count. [After counting.] Two hundred and forty-six Members present, a quorum, and the motion to recommit is not agreed to. The question is on the passage of the bill.

The question was taken; and on a division (demanded by Mr. BLANTON) there were 209 ayes and 18 noes.

Mr. BLANTON. Mr. Speaker, I ask for the yeas and nays.

The question of taking the vote by yeas and nays was taken, and four Members arose.

The SPEAKER pro tempore. Not a sufficient number, and the bill is passed.

On motion of Mr. DEMPSEY, a motion to reconsider the vote whereby the bill was passed was laid on the table.

EXTENSION OF DISTRICT OF COLUMBIA RENTS ACT.

The SPEAKER pro tempore. Under the rule, business relating to the District of Columbia is in order to-day.

Mr. WHEELER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill S. 2919.

The SPEAKER pro tempore. The Clerk will report the title.

The Clerk read as follows:

S. 2919. An act to extend for the period of two years the provisions of Title II of the food control and District of Columbia rents act, approved October 22, 1919, as amended.

Mr. MILLSPAUGH. Mr. Speaker, I make a point of order.

The SPEAKER pro tempore. The gentleman will state his point of order.

Mr. MILLSPAUGH. I make the point of order that the business before the District Committee to-day, under rule 24, is the unfinished business, the pawnbrokers' bill.

The SPEAKER pro tempore. Is the gentleman from Illinois authorized by the committee to call this measure up to-day?

Mr. WHEELER. I am, Mr. Speaker.

The SPEAKER pro tempore. The Chair overrules the point of order.

Mr. WHEELER. Mr. Speaker, I ask unanimous consent that the gentleman from West Virginia [Mr. REED] may control one half of the time and the gentleman from Kentucky [Mr. GILBERT] may control the other half.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent that the gentleman from West Virginia [Mr. REED] may control one half of the time for general debate and the gentleman from Kentucky [Mr. GILBERT] control the other half. Is there objection?

Mr. BLANTON. Reserving the right to object, I raise this question, that under the rules of the House, being opposed to the bill and the ranking member of the Committee on the District of Columbia, I am entitled to control one-half the time.

Mr. MILLSPAUGH. I object.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Illinois [Mr. WHEELER] that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill S. 2919.

Mr. DYER. Mr. Speaker, I want to suggest to the gentleman that if he will make a request to limit debate we will get through this business sooner.

Mr. CARTER. The gentleman is proceeding in the very best way now to get through with the business.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Illinois that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill S. 2919.

The question was taken.

Mr. MILLSPAUGH. Mr Speaker, I object to the vote because of the absence of a quorum, and I make the point of order that there is no quorum present.

The SPEAKER pro tempore. The gentleman from Missouri makes the point of order that there is no quorum present. The Chair will count. [After counting.] Two hundred and twelve Members present, not a quorum. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll. The question is on the motion of the gentleman from Illinois that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill S. 2919.

The question was taken; and there were—yeas 261, nays 12, answered "present" 1, not voting 156, as follows:

YEAS—261.

So the motion was agreed to.

The Clerk announced the following additional pairs:

Until further notice:

Mr. A. P. Nelson with Mr. Garrett of Tennessee.
Mr. Treadway with Mr. Cockran.
Mr. Paige with Mr. Sullivan.
Mr. Langley with Mr. Clark of Florida.
Mr. Stiness with Mr. Drane.
Mr. Newton of Missouri with Mr. Gallivan.
Mr. Strong of Pennsylvania with Mr. Hawes.
Mr. Olpp with Mr. Brand.
Mr. Kearns with Mr. Mansfield.
Mr. Cooper of Ohio with Mr. Kitchin.
Mr. Kennedy with Mr. Bulwinkle.
Mr. Perkins with Mr. McSwain.
Mr. Dickinson with Mr. O'Brien.
Mr. Knight with Mr. Upshaw.
Mr. Ransley with Mr. Pou.
Mr. Evans with Mr. Deal.
Mr. Reed of New York with Mr. Sears.
Mr. Fenn with Mr. Taylor of Colorado.
Miss Robertson with Mr. Driver.
Mr. Davis of Minnesota with Mr. Cantrill.
Mr. Larson of Minnesota with Mr. Almon.
Mr. Fordney with Mr. Kunz.
Mr. McKenzie with Mr. Hudspeth.
Mr. Snyder with Mr. Moore of Virginia.
Mr. Scott of Tennessee with Mr. Barkley.
Mr. Hutchinson with Mr. Smithwick.
Mr. Ansorge with Mr. Bland of Virginia.
Mr. McArthur with Mr. Logan.
Mr. Wyant with Mr. Tague.
Mr. Atkeson with Mr. Griffin.
Mr. Rossdale with Mr. Jacoway.
Mr. Goodykoontz with Mr. Drewry.
Mr. McPherson with Mr. Kindred.
Mr. Sanders of Indiana with Mr. Riordan.
Mr. Bowers with Mr. Rainey of Illinois.
Mr. Graham of Pennsylvania with Mr. Carew.
Mr. Siegel with Mr. Briggs.
Mr. Henry with Mr. Dominick.
Mr. Snell with Mr. Fulmer.
Mr. Hukriede with Mr. Collins.
Mr. Chandler of New York with Mr. Fields.
Mr. Morin with Mr. Taylor of Arkansas.
Mr. Chandler of Oklahoma with Mr. Rainey of Alabama.

The result of the vote was announced as above recorded.

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill S. 2919, with Mr. LONGWORTH in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill S. 2919, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That the emergency described in title 2 of the food control and the District of Columbia rents act, approved October 22, 1919, still exists and continues in the District of Columbia, and that the present housing and rental conditions therein require the further extension of said act.

SEC. 2. That said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, as amended by an act entitled "An act to extend for the period of seven months the provisions of title 2 of the food control and the District of Columbia rents act, approved October 22, 1919, and for other purposes," approved August 24, 1921, be, and the same is hereby, reenacted, extended, and continued, as hereinafter amended, from the date of the approval of this act until the 22d day of May, 1924, notwithstanding the provisions of the first section of the act entitled "An act to extend for the period of seven months the provisions of title 2 of the food control and the District of Columbia rents act, approved October 22, 1919, and for other purposes," approved August 24, 1921.

SEC. 3. That section 101 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 101. When used in this title, unless the context indicates otherwise—

"(a) The term 'rental property' means any building or part thereof or land appurtenant thereto in the District of Columbia rented or hired, and the service agreed or required by law or by determination of the commission to be furnished in connection therewith, but does not include (a) any portion of an apartment building, (b) a garage or warehouse, or (c) any other building or part thereof or land appurtenant thereto used by the tenant exclusively for a business purpose other than the subleasing or otherwise subcontracting for use for living accommodations.

"(b) The term 'person' includes an individual, partnership, association, or corporation.

"(c) The term 'apartment' means any apartment, or part thereof, in the District of Columbia rented or hired and the land and outbuildings appurtenant thereto, and the service agreed or required by law or by determination of the commission to be furnished in connection therewith.

"(d) The term 'owner' includes a lessor or sublessor, or other person entitled to receive rent or charges for the use or occupancy of any rental property or apartment, or any interest therein, or his agent.

"(e) The term 'tenant' includes a subtenant, lessee, sublessee, or other person, not the owner, entitled to the use or occupancy of any rental property or apartment.

"(f) The term 'service' includes the furnishing of light, heat, water, telephone or elevator service, furniture, furnishings, window shades, screens, awnings, storage, kitchen, bath and laundry facilities and privileges, maid service, janitor service, removal of refuse, making all repairs suited to the type of building or necessitated by ordinary wear and tear, and any other privileges or service connected with the use or occupancy of any rental property or apartment.

"(g) The term 'commission' means the Rent Commission of the District of Columbia."

SEC. 4. That section 102 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 102. A commission is hereby created and established to be known as the Rent Commission of the District of Columbia, which shall be composed of five commissioners, none of whom shall be directly or indirectly engaged or in any manner interested in or connected with the real estate or renting business in the District of Columbia. The commissioners shall be appointed by the President, by and with the advice and consent of the Senate. The term of each commissioner shall be for the period covered by this act, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the commissioner whom he succeeds. The commission, as at present constituted, shall continue in office and shall have and exercise all the powers and duties now vested in them pending the appointment and confirmation of the five commissioners provided for herein.

"The commission shall at the time of its organization and annually thereafter elect a chairman from its membership. The commission may make such rules and regulations as may be necessary to carry this title into effect. All powers and duties of the commission may be exercised by a majority of its members. A vacancy in the commission shall not impair the right of the remaining commissioners to exercise all the powers of the commission. The commission shall have an official seal, which shall be judicially noticed."

SEC. 5. That section 103 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, as amended by said act approved August 24, 1921, be, and the same is hereby, amended by adding thereto the following:

"The commission shall also have the power to appoint two inspectors, outside of the civil service, who shall receive a salary not exceeding $2,000 a year each, payable monthly."

SEC. 6. That the last sentence of the first paragraph of section 105 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"Any member of the commission may sign subpœnas, administer oaths and affirmations, summon witnesses, conduct hearings, and receive evidence touching any matter which the commission is authorized to consider or investigate, and the substance of such evidence, when certified to the commission by the member of the commission who

heard and received the same may be made the basis of the commission's determination respecting the matter under consideration or investigation."

SEC. 7. That the last paragraph of said section 105 of said Title II of the food control and the District of Columbia rents act approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"Such attendance of witnesses and the production of such books, accounts, records, papers, and correspondence may be required from any place in the United States at any designated place of hearing. Any person who shall neglect or refuse to attend and testify, or to answer any lawful inquiry, or to produce such books, accounts, records, papers, or correspondence, or who shall fail or refuse to file with the commission plans and other data in such detail as the commission may require, descriptive of the rooms, accommodations, and service in connection with any apartment, required by the commission, if in his power to do so, in obedience to the subpœna, order, or lawful requirement of the commission, or who shall neglect or refuse to comply with any lawful determination or order of the commission, requiring him to furnish heat, electric current, or other service in any rental property or apartment shall be guilty of an offense, and upon conviction thereof by a court of competent jurisdiction shall be punished by a fine not exceeding $1,000 or by imprisonment for not more than one year, or by both such fine and imprisonment. No officer or employee of the commission shall, unless authorized by the commission or by a court of competent jurisdiction, make public any information obtained by the commission."

SEC. 8. That section 106 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 106. For the purposes of this title it is declared that all (a) rental property and (b) apartments are affected with a public interest, and that all rents and charges therefor, all service in connection therewith, and all other terms and conditions of the use or occupancy thereof, shall be fair and reasonable; and any unreasonable or unfair provision of a lease or other contract for the use or occupancy of such rental property or apartment, with respect to such rents, charges, service, terms, or conditions is hereby declared to be contrary to public policy. The commission upon its own initiative may, or upon complaint shall, determine whether the rent, charges, service, and other terms or conditions of a lease or other contract for the use or occupancy of any such rental property or apartment are fair and reasonable. Such complaints may be made and filed by or on behalf of any tenant, and by or on behalf of the owner of any rental property or apartment, notwithstanding the existence of a lease or other contract between the tenant and the owner and in fixing and determining the fair and reasonable rents, rates, or charges for any rental property or apartment, the commission shall, in all cases, take into consideration the character and condition of the property and the character of the service, if any, furnished in connection therewith.

"In all such cases the commission shall give notice personally or by registered mail and afford an opportunity to be heard to all parties in interest: *Provided*, That notice given by the commission to the agent of the legal owner of any rental property or apartment, for the collection of rents, shall be deemed and held to be good and sufficient notice to said legal owner. The commission shall promptly hear and determine the issues involved in all complaints submitted to it. All hearings before the commission, or any member of the commission, shall be open to the public. If the commission finds that the existing rents, charges, service, or other terms or conditions of the use or occupancy of any rental property or apartment are unfair and unreasonable, it shall fix and determine the fair and reasonable rents, rates, or charges for the rental property, or apartment under consideration, and may fix and determine the fair and reasonable service, terms, and conditions of the use or occupancy of the property, and may also order and require the furnishing of such service by the owner as it shall lawfully determine to be fair and reasonable.

"In any suit in any court of the United States or the District of Columbia involving any question arising out of the relation of landlord and tenant with respect to any rental property or apartment, except on appeal from the commission's determination as provided in this title, such court shall determine the rights and duties of the parties in accordance with the determination and regulations of the commission relevant thereto."

SEC. 9. That section 108 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 108. Unless within 10 days after the filing of the commission's determination any party to the complaint appeals therefrom to the Supreme Court of the District of Columbia in general term, the determination of the commission shall be final and conclusive. The said Supreme Court of the District of Columbia, in general term, is hereby given jurisdiction to hear and determine appeals taken from determinations of the commission, and said appeals shall be given precedence over the other business of said court. At the hearing of said appeals the chief justice of said court shall preside, with at least two of the associate justices of said court, to be designated by said chief justice, and in the absence of said chief justice, the senior associate justice of said court shall preside, have the powers, and perform the duties of said chief justice.

"If such an appeal is taken from the determination of the commission, the record before the commission or such part thereof as the court may order shall be certified by it to the court and shall constitute the record before the court, and the commission's determination shall not be modified or set aside by the court, except for error of law.

"If any party applies to the court for leave to adduce additional evidence and shows to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceedings before the commission, the court may order such additional evidence to be taken before the commission and to be adduced upon the hearing in such manner and upon such terms and conditions as the court may deem proper. The commission may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file such modified or new findings, which shall be conclusive, and its recommendations, if any, for the modification or setting aside of its original determination, with the return of such additional evidence.

"In the proceedings before such court on appeal from a determination of the commission the commission shall appear by its attorney or other representative and submit oral or written arguments to support the findings and the determination of the commission. No owner or tenant shall apply to the said Supreme Court of the District of Columbia to review any determination of the commission fixing the fair and reasonable rents, rates, or charges for any rental property or apartment, except by appeal, as hereinbefore provided, and said court shall not issue any injunction, permanent or temporary, restraining or enjoining the commission from fixing the rents, rates, or charges for any rental property or apartment, and said court is hereby divested of any and all power and jurisdiction to issue any such injunction."

SEC. 10. That section 109 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 109. The right of a tenant to the use or occupancy of any rental property or apartment, existing at the time this act takes effect, or thereafter acquired, under any lease or other contract for such use or occupancy or under any extension thereof by operation of law, shall, notwithstanding the expiration of the term fixed by such lease or contract, continue at the option of the tenant subject, however, to any determination or regulation of the commission relevant thereto; and such tenant shall not be evicted or dispossessed so long as he pays the rent and performs the other terms and conditions of the tenancy as fixed by such lease or contract, or in case such lease or contract is modified by any determination or regulation of the commission, then as fixed by such modified lease or contract.

"All remedies of the owner at law or equity, based on any provision of any such lease or contract to the effect that such lease or contract shall be determined or forfeited if the premises are sold, are hereby suspended so long as this title is in force. Every purchaser shall take conveyance of any rental property or apartment subject to the rights of tenants as provided in this title.

"The rights of the tenant under this title shall be subject to the limitation that the bona fide owner of any rental property or apartment shall have the right to possession thereof for actual and bona fide occupancy by himself, or his wife, children, or dependents, or for the purpose of tearing down or razing the same in order immediately to construct new rental property or apartment, if approved by the commission, upon giving 30 days' notice in writing, served in the manner provided by section 1223 of the act entitled 'An act to establish a code of laws for the District of Columbia,' approved May 2, 1901, as amended, which notice shall contain a full and correct statement of the facts and circumstances upon which the same is based; but in no case shall possession be demanded or obtained by such owner in contravention of the terms of any such lease or contract. If there is a dispute between the owner and the tenant as to the accuracy or sufficiency of the statement set forth in such notice, as to the good faith of such demand, or as to the service of notice, the matters in dispute shall be determined by the commission upon complaint as provided in section 106 of this title.

"Any dispute made before the commission under the provisions of this section shall be filed with the commission before the notice complained of has expired."

SEC. 11. That section 111 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 111. The determination of the commission in a proceeding begun by complaint or upon its own initiative fixing fair and reasonable rents, charges, service, and other terms and conditions of use or occupancy of any rental property or apartment shall constitute the commission's determination of the fairness and reasonableness of such rents, charges, service, terms, or condition for the rental property or apartment affected, and shall remain in full force and effect notwithstanding any change in ownership or tenancy thereof, unless and until the commission modifies or sets aside such determination upon complaint either of the owner or of the tenant."

SEC. 12. That section 112 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 112. If the owner of any rental property or apartment collects any rent or charge therefor in excess of the amount fixed in a determination of the commission made and in full force and effect in accordance with the provisions of this title, he shall be liable for and the commission is hereby authorized and directed to commence an action in the municipal court of the District of Columbia to recover double the amount of such excess, together with the costs of the proceeding, which shall include an attorney's fee of $50, to be taxed as part of the costs. Such actions shall be brought in said municipal court, regardless of the amount to be recovered, and the said municipal court is hereby given special jurisdiction to hear and determine all such cases.

"The commission is hereby authorized to bring such actions without the payment of costs, and no bond shall be required in the case of any appeal taken by the commission from any judgment of the said municipal court in any such case. Out of any sums received on account of such recovery the commission shall pay over to the tenant the amount of the excess so paid by him and the balance shall be paid into the Treasury of the United States to the credit of the District of Columbia: *Provided*, That if the commission finds that such excess was paid by the tenant voluntarily and with knowledge of the commission's determination, the whole amount of such recovery shall be paid into the Treasury of the United States to the credit of the District of Columbia."

SEC. 13. That section 113 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 113. If in any proceeding before the commission, begun by complaint or on the commission's own initiative, and involving any lease or other contract for the use or occupancy of any rental property or apartment, the commission finds that at any time after the passage of this act, but during the tenancy, the owner has, directly or indirectly, willfully withdrawn from the tenant any service agreed or required by a determination of the commission to be furnished, or has by act, neglect, or omission contrary to such lease or contract or to the law or any ordinance or regulation made in pursuance of law, or of a determination of the commission exposed the tenant, directly or indirectly, to any unsafe or insanitary condition or imposed upon him any burden, loss, or unusual inconvenience in connection with his use or occupancy of such rental property or apartment, the commission shall determine the sum which in its judgment will fairly and reasonably compensate or reimburse the tenant therefor. In any such proceeding involving a lease or other contract, the terms specified in which had not expired at the time the proceeding was begun, the commission shall likewise determine the amount or value of any bonus or other consideration in excess of the rental named in such lease or contract received at any time, directly or indirectly, by the owner in connection with such lease or contract. The tenant may recover any amount so determined by the commission in an action in the municipal court of the District of Columbia."

SEC. 14. That section 116 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 116. Any person who with intent to avoid the provisions of this title enters into any agreement or arrangement for the payment of any bonus or other consideration in connection with any lease or other contract for the use or occupancy of any rental property or apartment, or who participates in any fictitious sale or other device or arrangement the purpose of which is to grant or obtain the use or occupancy of any rental property or apartment without subjecting such use or occupancy to the provisions of this title or to the jurisdiction of the commission, shall upon conviction be punished by a fine not exceeding $1,000, or by imprisonment for not exceeding one year, or by both."

SEC. 15. That section 117 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 117. The commission shall prescribe standard forms of leases and other contracts for the use or occupancy of any rental property or apartment and shall require their use by the owner thereof. Every such lease or contract entered into after the commission has prescribed and promulgated a form for the tenancy provided by such lease or contract shall be deemed to accord with such standard forms; and any such lease or contract in any proceeding before the commission or in any court of the United States or of the District of Columbia shall be interpreted, applied, and enforced in the same manner as if it were in the form and contained the stipulations of such standard form.

"The owner of an apartment shall file with the commission plans and other data in such detail as the commission requires, descriptive of the rooms, accommodations, and service in connection with such apartment, and a schedule of rates and charges therefor. The commission shall, after consideration of such plans, schedules, data, or other information, determine and fix a schedule of fair and reasonable rates and charges for such apartments; and the rates and charges stated in such schedule shall thereafter constitute the fair and reasonable rates and charges for such apartment. The commission's determination in such case shall be made after such notice and hearing and shall have the same force and effect and be subject to appeal in the same manner as a determination of the commission under section 106 of this title."

SEC. 16. That said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be and the same is hereby, amended by adding thereto the following:

"SEC. 124. (a) Any violation of this act or of any order of the commission, committed before the termination of this act may, after such termination, be prosecuted by and in the name of the Attorney General in lieu of the commission in the same manner and with the same effect as if this act had not been terminated.

"(b) In the case of (1) any proceeding begun under the provisions of section 114 before the termination of this act, or (2) any proceeding on appeal from a determination of the commission begun before the termination of this act, such proceeding may, after such termination, be continued in the same manner with the same effect as if this act had not been terminated, and all powers and duties in respect to such proceedings vested in the commission by this act shall for the purposes of such proceedings be vested in the Attorney General.

"(c) Any right or obligation based upon any provision of this act or upon any order of the commission, accrued prior to the termination of this act may, after the termination of this act, be enforced in the same manner and with the same effect as if this act had not been terminated.

"(d) The Attorney General may, after the termination of this act, appoint the attorney last appointed by the commission under the provision of section 103 to assist in the enforcement of this act. Such attorney shall continue to receive compensation for such services at the rate of $5,000 per annum, payable monthly."

SEC. 17. That the proprietor, manager, owner, or other person in charge of and conducting any hotel in the District of Columbia shall post in a conspicuous place in each room thereof a card or sign plainly stating the price per day of such room, and a copy of such rates for each room shall be filed with the Rent Commission of the District of Columbia. In case the hotel is conducted on the American plan, the rates for meals shall be posted in a conspicuous place in each room of the hotel. Such cards or signs, both with reference to rooms and meals, shall be dated as of the day on which they are posted. The rates charged for rooms shall not be advanced in less than thirty days from the date of the approval of the said commissioners of the written application therefor, and in the event an advance in rates is granted the same requirements with reference to posting of notices and filing copies thereof with the Rent Commission of the District of Columbia, as above provided, shall apply.

Any person, firm, or corporation who shall violate any of the provisions of this act relating to hotel charges or who shall charge any guest a rate in excess of said posted rates shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined not less than $10 nor more than $100 for each offense.

The Commissioners of the District of Columbia are hereby charged with the enforcement of this act.

SEC. 18. That section 2 of the said act, entitled "An act to extend for the period of seven months the provisions of Title II of the food control and the District of Columbia rents act, approved October 22, 1919, and for other purposes," approved August 24, 1921, be, and the same is hereby, repealed.

SEC. 19. That all orders and determinations heretofore or hereafter made by the commission shall be and remain in full force and effect until the termination of this act.

SEC. 20. That all acts or parts of acts in conflict herewith are hereby repealed.

During the reading of the bill the following occurred:

Page 15, line 11—

Mr. MILLSPAUGH. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN (Mr. BEGG). The gentleman from Missouri makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and six Members are present, a quorum.

Page 14, section 10—

Mr. MILLSPAUGH. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN (Mr. LONGWORTH). The gentleman from Missouri makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and ten gentlemen are present, a quorum.

Mr. GILBERT. Mr. Chairman and gentlemen of the committee, it seems that a good deal of feeling has been aroused over this bill, which has led a good many of us to wander away from its real merits as a matter of legislation. Whether or not you are on the landlord's or tenant's side seems to be the question. I hold no brief whatever for the landlords. In fact, I think it quite probable that by their arbitrary methods they have brought on the situation which now confronts us. I have always been in sympathy with the other side. In fact, had I been here when this matter was originally presented as a war measure, I would have supported it. I was here when it was extended and voted for that extension. I eased my conscience by the argument that was then made, that the emergency spoken of by the Supreme Court had not passed; that there was then contemplated——

Mr. MILLSPAUGH. Mr. Chairman, I make the point of order there is no quorum present. The gentleman is addressing this committee on a very important question, and has a very good argument, and I want the Members to hear it.

The CHAIRMAN. The gentleman from Missouri makes the point of order there is no quorum present. The Chair will count. [After counting.] One hundred and twenty-seven gentlemen are present, a quorum. The gentleman from Kentucky will proceed.

Mr. GILBERT. At the time that extension was granted we were told, and it was true, that one of the great events of the world was pending; that there was to be held within this city in a few months a conference to discuss disarmament, and so, with that to ease my conscience, I supported that extension. If there is any emergency now, it is not that character of emergency intended by the Supreme Court but simply that emergency created by a greater demand than a supply, which was not contemplated to be remedied by legislation, and so I must decline to go further in pursuit of this, in my opinion, unwise legislation.

Most of the Members of this body are lawyers, and they recognize how unwise it is to set a false precedent, although it may work splendidly for that particular opportunity. In my native State of Kentucky one of the best and ablest men we ever had was a supreme court judge—a chief justice. He was so kind-hearted that he applied every law to meet the purposes of a particular case, and the result was that after he had served some 10 years no man in Kentucky knew what the law on any proposition was.

So far as I am informed, this is a departure in legislation almost without parallel. It is true that the Supreme Court affirmed the decision, holding this bill constitutional, but it nowhere said that it was wise and it nowhere said that the facts were true upon which it based that decision. But it based it upon this phraseology:

Great weight must be given to the legislative declaration that an emergency exists.

I understand by an emergency an unusual situation created by abnormal causes, such as the war, not simply the condition that exists here in Washington. For instance, a moment ago I bought an apple. You all have had experience with the prices of apples here. They are ridiculously high. Yet I believe it is as unwise to attempt to fix the price of rents in the city of Washington as it is unwise to attempt to fix the price of apples by legislation.

Mr. BEGG. Mr. Chairman, will the gentleman yield for a question?

Mr. GILBERT. Yes.

Mr. BEGG. On the question of the emergency, does the gentleman believe that it naturally follows that when an emergency is ended the results created by the emergency end with the ending of the unusual act causing it, like a war?

Mr. GILBERT. It will sooner readjust itself under natural conditions than it will by artificial causes, such as legislation.

Mr. BEGG. That is only a statement; that is not necessarily a conclusive statement. The gentleman makes the statement that that would be so, yet how does the gentleman know that it would be so?

Mr. GILBERT. I stated that as my opinion, just as the gentleman's opinion may be to the contrary. The whole matter is a matter of opinion, and not a matter of fact.

Mr. LONDON. Mr. Chairman, will the gentleman yield for a short question?

Mr. GILBERT. Yes.

Mr. LONDON. Has there been any evidence before your committee as to the increase or diminution of the population of Washington?

Mr. GILBERT. I was not fortunate enough to be present at all the hearings of the committee. I will say this to the gentleman, that at the hearings that I did attend both sides made out a perfect case, and both sides will continue to make out a perfect case. There is in the city of Washington more or less of a housing emergency in my humble opinion. But that emergency in the city of Washington will continue to exist for many years, perhaps for 20 years, and the reason for it is that there is no other country in the world with one-third of the resources or population or territory like that of the United States but that has a capital at least three times as large as ours. The capital of the British Empire—London—has 7,000,000 people. The capital of France has over 2,000,000 people. The capital of Germany has over 2,000,000; Austria's capital has approaching 2,000,000 people. Nowhere on the globe is there a country like the United States, with a capital with less than a population of a half a million people. There is an abnormal situation here, and it will continue to be an abnormal situation until this city catches up with the demands of this great Government.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. GILBERT. Yes.

Mr. BLANTON. In the gentleman's wisdom, does he think that any wise man with money would attempt to build property in the city of Washington under such a measure as this?

Mr. GILBERT. I will answer the gentleman's question in this way: He would give preference to such a place where the conditions did not exist. There is building going on here, of course, but the demand here is so great by reason of the smallness of the city in comparison with its requirements that that condition will continue to exist. For instance, suppose there is a capitalist at Louisville who wants to invest in property somewhere. Conditions being equal, he would rather invest his money in Baltimore, where he can put the price on his apartments, rather than in Washington, where somebody else puts the price on his apartments.

Mr. HAMMER. Mr. Chairman, will the gentleman yield?

Mr. GILBERT. Yes.

Mr. HAMMER. Is it not a fact that in the first three months of this year the amount of building was greater in the city of Washington than in any other city in the country, and 62 per cent of the permits granted were for apartment houses?

Mr. GILBERT. I could not answer, but if I should answer in accordance with the gentleman's belief it would prove that I was wrong.

Mr. HAMMER. The statistics show that greater activity has been going on in building in this city than in any other city in the country thus far this year. Is it not a further fact that with the wide difference prevailing between the opinions of the tenants and those of the landlords, as the hearings show, there is a condition existing in the District which requires an arbitration board to settle and adjust those differences?

Mr. GILBERT. I will say to the gentleman that the situation may be more acute in the city of Washington than elsewhere by reason of the cause that I have just stated; but that condition exists in every city in the United States to-day. In the city of Louisville—the only one I have personal information about—they can not supply housing facilities. It may be a little more acute in Washington than elsewhere.

Mr. ROSE. Mr. Chairman, will the gentleman yield?

Mr. GILBERT. Yes.

Mr. ROSE. I listened to the remarks of the gentleman from West Virginia [Mr. REED] and to the questions of the gentleman from North Carolina [Mr. HAMMER]. Taking that to be the true explanation of this situation in the city of Washington, that the building operations here have exceeded those of almost every other city in the Union, is it not true that after the buildings are erected the owners refuse to rent them, and put them up only at public or private sale?

Mr. GILBERT. The testimony is to the effect that the great amount of building that has been going on here is for sale and not for rental purposes.

Mr. WOODS of Virginia. Mr. Chairman, will the gentleman yield?

Mr. GILBERT. Yes.

Mr. WOODS of Virginia. Has the gentleman's committee considered the advisability of legislating not along this line but along this line of taking the analogy of the usury statute like the principle of this bill? It seems to me that some gentlemen who oppose this bill that we will probably suffer from rent extortion here unless you have some measure, yet I do not like the principle of this bill. It seems to me that some general bill along the other line would not be of such a socialistic tendency.

Mr. GILBERT. I was not a member of the subcommittee that discussed this bill, but I know that they considered it pretty thoroughly in all its phases.

Mr. MILLSPAUGH. Mr. Chairman, will the gentleman yield?

Mr. GILBERT. Yes.

Mr. MILLSPAUGH. The gentleman from North Carolina [Mr. HAMMER] has just asked the gentleman a question as to the amount of building that has been done in the city of Washington as compared with other cities, stating that about 61 or 62 per cent of it was for apartment houses for rent. Is it not a fact that almost all the apartment houses being built here are of the luxurious type of apartment houses, that bear a high rental? And is it not also a fact that there is a dearth of the smaller apartment houses, and that there is a great amount of capital at present ready to go into this class of houses if the Ball rent act expires, and further, the fact that no banking concern, whether in Washington, New York, Boston, Philadelphia, or any of the other financial centers, will invest money for the building of an apartment house here at this time because of the Ball rent act, but did do it before because of the fact that they were given to understand that this rent act would expire on the 22d of May, it being stated last August, when this bill was up before, that there would not be another extension of the act? Even the distinguished author of the bill at the other end of the Capitol made that statement.

Mr. GILBERT. There was much evidence to that effect. However, as you gentlemen observe, I am not basing my argument upon any of those local conditions.

Mr. HAMMER. The gentleman does not mean to say that that was the evidence before our committee?

Mr. GILBERT. I say there was much evidence to that effect.

Mr. HAMMER. Before our committee?

Mr. GILBERT. Yes. And there was much evidence to the contrary.

Mr. LINTHICUM. The gentleman has mentioned Baltimore. How does the gentleman account for the fact that rentals in Baltimore are cheaper than they are in Washington, while the people in Baltimore pay a $3 city tax rate, and in addition States taxes, and here they pay only about $1.70 on a two-thirds valuation and have the other part of the taxes paid by the National Government?

Mr. GILBERT. I am not familiar with the facts in that case. I am simply saying to you that as far as the principle applies, it will be detrimental to Washington and it will also be detrimental to the class it is intended to help. If this law is continued in effect much longer, in my opinion, the sufferers will be the tenants.

Mr. LINTHICUM. Let me ask the gentleman another question.

Mr. GILBERT. I decline to yield any further just now until I have finished this thought. It will result necessarily in great detriment to the tenants. Let me tell you why. Here is a man who, perhaps, by some bad fortune or mismanagement has built an apartment house that is entirely too expensive. He goes to the commission. He tells them the amount of capital he has invested. The commission fixes the rental on that apartment in proportion to the investment in order to yield a fair return. Now, here is another man who by good fortune and by greater experience has built a similar apartment much more cheaply. Under natural circumstances he would be permitted to rent it at a much cheaper rate, but when his neighbor for the same service is getting a higher rental based upon inexperience, of course he is going to get the same rental for the same service.

Furthermore, the landlords and the realtors will always be better organized and better able to control the situation than the tenants will. We all know that every State in the Union attempted to harness the railroads by a State railroad commission. The first railroad commission that the State would appoint would attempt to control the railroads, but within a few years the railroads would control the commission. Now, if the tenants of the city of Washington think they are going to control this commission when the other fellows have all these investments in their hands and are organized as they can be organized, the tenants are mistaken. So, not by reason of any local situation, my sympathies are on the other side. I voted for the bill before, but it is contrary to my sense of sound legislation.

Mr. LINTHICUM. Will the gentleman yield for a question?

Mr. GILBERT. Yes.

Mr. LINTHICUM. I have this in mind: My State of Maryland has an interest law fixing the interest rate on loans at 6 per cent. Above that is usury. The State of Missouri, and, if I am not mistaken, the District of Columbia, have a rate of 8 per cent. Now, we regulate the rate of interest in excess of which they are not permitted to charge. It seems to me that if we can regulate the interest rate we ought to be legally able to regulate the rent on real estate providing for a fair and just

return. But my question is, Why does not the money leave Maryland and go to Missouri or some other State where the interest rate is higher? Does not the gentleman think it is a matter of local pride that the people have in their particular location? Is it not a question of home?

Mr. GILBERT. There is some analogy in the gentleman's illustration, and perhaps in my opinion he has selected the hardest to answer. The only way I can answer that is this, that money is a universal commodity. It is coined and regulated by the Government. Everybody must use it. That is not true of rental property. In fact, the Government should attempt to increase the interest in home holdings. There ought to be, for sound governmental purposes, as few renters as possible. Now, so far as the monopoly is concerned, I do not believe that that could exist very long. In the committee I was asked, "Do not you believe in controlling the railroads? Did you not vote for controlling the packers?" "Yes." "Well, why did you do that?" The answer is that they are national in their scope. Their powers and resources are practically unlimited. That is not true in a city of 500,000 people. I do not care if every real estate man in Washington were to sign an iron-bound agreement to control the price of rents, in my opinion it would not regulate them very long, because there would come in from Pittsburgh, from Baltimore, from Richmond, Va., from everywhere men with capital who would compete with them. That is true of everything else that Congress has ever attempted to control.

Mr. BARBOUR. Will the gentleman yield?

Mr. GILBERT. Yes.

Mr. BARBOUR. Did the investigation of the committee show that rents in Washington are higher than conditions here warrant?

Mr. GILBERT. I would not feel competent to answer the gentleman's question. There was evidence that there was no difference between Washington and other cities beyond the causes I have attempted to name.

Mr. BARBOUR. The gentleman referred to buying an apple, and stated that he believed the price was abnormally high. I agree with him on that, and I agree with him with reference to the same proposition on a great many other things here in Washington. I think Washington is one of the most expensive cities to live in and buy things in that there is in the United States, and I wondered if that same condition existed as to rents.

Mr. GILBERT. In no greater proportion than in other things, and in my humble judgment it would be an unwise thing to attempt to control their charges. I have used apples as an illustration. Of course we can do without apples, but I will take flour. Supposing the merchants in Washington should put a price on flour which was too high. Would that justify our attempting to regulate it by Congress?

Mr. BARBOUR. That is what I had in mind when I asked the gentleman the question. Are we going to submit to being charged these exorbitant prices, not only for rents but other things, or shall we make some effort to try to protect ourselves and the other people who are defenseless? Call it socialism or whatever you will. Does not the gentleman think we should do something?

Mr. GILBERT. No, sir; I think it would be absolutely hopeless to regulate by law the price of everything we have to use in the city of Washington.

Now, just one thing further—there are more visitors in Washington in proportion than in any other city in the world. The increased facilities of transportation make it possible. Our streets are thronged every day with visitors from all parts of the United States. They did not come in so large numbers a few years ago, but automobiles and other methods of transportation were not then in such common use. They are pouring in here every day; we want them, it is a sign of patriotism, but when they come they are going to have to pay a little more, not only for rent, but for everything they get, than they do in any other city in the United States; but that is not going to be cut off by a two years' extension provision because, if I understand it, this emergency will be upon us when these two years are up. It is going to exist until Washington rises to the dignity it will ultimately obtain by being the great and beautiful Capital of the greatest country the sun ever shone upon. [Applause.]

Mr. LINTHICUM. Will the gentleman yield?

Mr. GILBERT. I will.

Mr. LINTHICUM. The gentleman has stated that we ought to encourage home owning. I want to say that statistics show that Baltimore has a larger per cent of home owners than any other city in the country—60 per cent. So far as visitors are concerned, during the past week I have had from my district more than a thousand school children come over to visit the Capital. I have been encouraging that because I think it is very beneficial to them.

Mr. BARBOUR. Will the gentleman yield?

Mr. GILBERT. Certainly.

Mr. BARBOUR. Before Washington becomes the ideal city which the gentleman states, does not he think it will be necessary for some of the present residents of Washington to change their characteristics?

Mr. GILBERT. They will never be made to change them by any act of Congress.

The CHAIRMAN. The gentleman has six minutes remaining.

Mr. BLANTON. Mr. Chairman, I ask for recognition in opposition to the bill as a member of the committee.

Mr. MILLSPAUGH. Mr. Chairman, I rise in opposition to the bill.

Mr. GILBERT. Mr. Chairman, I will yield the balance of my time to the gentleman——

Mr. CAMPBELL of Kansas. Mr. Chairman, the time can not be taken by any one man to control absolutely. The gentleman from Kentucky has yielded the floor. He can not shut off another man from getting the floor.

The CHAIRMAN. The gentleman from West Virginia can use his hour in any way he sees fit. He still has 22 minutes.

Mr. CAMPBELL of Kansas. May not another member of the committee get the floor?

The CHAIRMAN. The Chair has recognized the gentleman from West Virginia for one hour.

Mr. LONDON. Mr. Chairman, a parliamentary inquiry. May not the gentleman from West Virginia move that the committee do now rise?

The CHAIRMAN. He may if he desires.

Mr. REED of West Virginia. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. WALSH having taken the chair as Speaker pro tempore, Mr. LONGWORTH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 2919 and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent the following leave of absence was granted:

To Mr. GOODYKOONTZ, for one week, on account of public business.

To Mr. BLAND of Virginia, for an indefinite period, on account of sickness.

CALL OF THE HOUSE.

Mr. MILLSPAUGH. Mr. Speaker, I make the point of order that no quorum is present.

The SPEAKER pro tempore. Evidently there is no quorum present.

Mr. MONDELL. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The Clerk called the roll, and the following Members failed to answer to their names:

Andrew, Mass.	Deal	Husted	McSwain
Ansorge	Denison	Hutchinson	Madden
Anthony	Dickinson	Ireland	Maloney
Atkeson	Dominick	Jacoway	Mann
Bacharach	Drane	Jefferis, Nebr.	Mansfield

Snyder	Taylor, Ark.	Vare	
Stafford	Taylor, Colo.	Volk	
Steenerson	Taylor, Tenn.	Ward, N. Y.	

The SPEAKER pro tempore. Upon this call 245 Members have answered to their names, a quorum.

Mr. BEGG. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

EXTENSION OF DISTRICT OF COLUMBIA RENTS ACT.

Mr. REED of West Virginia. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 2919) to extend for a period of two years the provisions of Title II of the food control and District of Columbia rents act, and pending that, I move that general debate upon the bill be now closed. On that I demand the previous question.

The SPEAKER pro tempore. The gentleman from West Virginia moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2919, and pending that, moves that general debate on the measure be now closed, and upon that he moves the previous question.

Mr. BLANTON. Mr. Speaker, I make the point of order.

The SPEAKER pro tempore. The gentleman will state it.

Mr. BLANTON. I make the point of order that this bill is on the Union Calendar, that the House resolved itself into the Committee of the Whole House on the state of the Union for general debate upon the bill, that the gentleman from West Virginia, in charge of the bill, was recognized by the Chairman of the Committee of the Whole House for one hour, that he used a small portion of that hour himself, a few minutes, and then yielded to another gentleman who used 20 minutes of that time, that the opposition to the bill has not been recognized, nor has the opposition been heard, and I make the point of order that the motion to close debate is out of order until the opposition is heard.

The SPEAKER pro tempore. The Chair overrules the point of order. The House after debate has been had in Committee of the Whole House on the state of the Union can at any time decide to close debate by vote. The question is on ordering the previous question.

The question was taken.

Mr. MILLSPAUGH. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER pro tempore. The gentleman from Missouri demands the yeas and nays. Those in favor of ordering the yeas and nays will rise and stand until counted. [After counting.] Six Members have risen, not a sufficient number, and the yeas and nays are refused.

So the previous question was ordered.

The SPEAKER pro tempore. The question now recurs upon the motion that general debate on the bill now close.

The question was taken.

Mr. BLANTON. Mr. Speaker, I object to the vote because there is no quorum present, and I make the point that there is no quorum present.

The SPEAKER pro tempore. The gentleman from Texas makes the point of order that there is no quorum present. The Chair will count. [After counting.] Two hundred and two Members present, not a quorum. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll. The question is on closing general debate upon the bill S. 2919.

The question was taken; and there were—yeas 233, nays 17, answered "present" 3, not voting 177, as follows:

YEAS—233.

So the motion to close debate was agreed to.

The Clerk announced the following additional pairs:

Until further notice:

Mr. Hutchinson with Mr. Rayburn.

Mr. Johnson of Washington with Mr. Cullen.

Mr. Layton with Mr. Buchanan.

Mr. Mudd with Mr. Pou.

Mr. Fairfield with Mr. Campbell of Pennsylvania.

Mr. Rhodes with Mr. Barkley.

Mr. Maloney with Mr. Jones of Texas.

Mr. Michaelson with Mr. Gallivan.

Mr. Kreider with Mr. Black.

Mr. Gensman with Mr. McDuffie.

Mr. Madden with Mr. Humphreys.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. A quorum is present. The Doorkeeper will open the doors.

The question is on the motion of the gentleman from West Virginia that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2919.

The question was taken, and the Speaker pro tempore announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 208, noes 10.

So the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2919, with Mr. LONGWORTH in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2919. The Clerk will read the bill.

The Clerk read as follows:

Be it enacted, etc., That the emergency described in Title II of the food control and the District of Columbia rents act, approved October 22, 1919, still exists and continues in the District of Columbia, and that the present housing and rental conditions therein require the further extension of said act.

Mr. REED of West Virginia. Mr. Chairman——

Mr. BLANTON. A preferential motion, Mr. Chairman.

The CHAIRMAN. The gentleman from West Virginia.

Mr. BLANTON. A point of order, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. BLANTON. I have a preferential motion, preferential under the rules of the House.

The CHAIRMAN. The Chair has recognized the gentleman from West Virginia.

Mr. REED of West Virginia. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. REED of West Virginia moves to amend by striking out all of section 1, beginning with line 3 down to and including line 8, page 1, and insert in lieu thereof the following——

Mr. REED of West Virginia. With notice that if that is adopted I shall move to strike out subsequent sections of the bill when read.

The Clerk read as follows:

With notice that if adopted he will move to strike out subsequent sections of the bill when read, namely: "Strike out all of section 1 and in lieu thereof insert the following:"

"That it is hereby declared that the emergency described in Title II of the food control and the District of Columbia rents act still exists and continues in the District of Columbia, and that the present housing and rental conditions therein require the further extension of the provisions of such title."

Mr. BLANTON. Mr. Chairman, I make the point of order.

The CHAIRMAN. The gentleman will state it.

Mr. BLANTON. That the amendment is not in order. It is in order to strike out one paragraph, the first paragraph, under the notice given, but the Clerk is reading the amendment as a substitute for every paragraph in the bill at this time, which is not in order.

The CHAIRMAN. The Chair thinks the motion is in order.

The Clerk read as follows:

SEC. 2. That Title II of the food control and the District of Columbia rents act, as amended, is reenacted, extended, and continued, as hereinafter amended, until the 22d day of May, 1924, notwithstanding the provisions of section 1 of the act entitled "An act to extend for the period of seven months the provisions of Title II of the food control and the District of Columbia rents act, approved October 22, 1919, and for other purposes," approved August 24, 1921.

SEC. 3. That section 101 of the food control and the District of Columbia rents act, as amended, is amended to read as follows:

"SEC. 101. When used in this title, unless the context indicates otherwise—

"(a) The term 'rental property' means any building or part thereof or land appurtenant thereto in the District of Columbia rented or hired, and the service agreed or required by law or by determination of the commission to be furnished in connection therewith; but does not include (1) a garage or warehouse, (2) any other building or part thereof or land appurtenant thereto used by the tenant exclusively for a business purpose other than the subleasing or otherwise subcontracting for use for living accommodations, or (3) any apartment or hotel.

"(b) The term 'person' includes an individual, partnership, association, or corporation.

"(c) The term 'apartment' means any apartment or apartment hotel, or part thereof, in the District of Columbia rented or hired and the land and outbuildings appurtenant thereto, and the service agreed or required by law or by determination of the commission to be furnished in connection therewith.

"(d) The term 'owner' includes a lessor or sublessor, or other person entitled to receive rent or charges for the use or occupancy of any rental property or apartment, or any interest therein, or his agent.

"(e) The term 'tenant' includes a subtenant, lessee, sublessee, or other person, not the owner, entitled to the use or occupancy of any rental property or apartment.

"(f) The term 'service' includes the furnishing of light, heat, water, telephone or elevator service, furniture, furnishings, window shades, screens, awnings, storage, kitchen, bath and laundry facilities and privileges, maid service, janitor service, removal of refuse, making all repairs suited to the type of building or necessitated by ordinary wear and tear, and any other privilege or service connected with the use or occupancy of any rental property or apartment.

"(g) The term 'commission' means the Rent Commission of the District of Columbia."

SEC. 4. That section 102 of the food control and the District of Columbia rents act is amended to read as follows:

"SEC. 102. (a) A commission is hereby created and established to be known as the Rent Commission of the District of Columbia. After this section, as amended, takes effect, the commission shall be composed of five commissioners, to be appointed by the President, by and with the advice and consent of the Senate; except that the present commissioners in office at the time this section, as amended, takes effect shall continue in office and shall have and exercise all the rights, powers, and duties vested in the commissioners by law until such time as a majority of the five commissioners whose appointment is provided for by this subdivision take office. The term of the five commissioners shall be for the period beginning at the time of taking office and ending May 22, 1924. Any vacancy in the office of any such commissioner shall be filled in the same manner as the original appointment, except that the appointment of the commissioner shall be made only for the unexpired term of the commissioner whom he succeeds.

"(b) In case of a vacancy in the office of one of the present commissioners prior to the time that a majority of the commissioners whose appointment is provided for by subdivision (a) take office a successor to such commissioner may be appointed by the President, by and with the advice and consent of the Senate. The term of such successor shall be for the period beginning at the time of taking office and ending at the time that a majority of the commissioners whose appointment is provided for by subdivision (a) take office.

"(c) No commissioner shall be appointed who is directly or indirectly engaged in, or in any manner interested in or connected with, the real estate or renting business in the District of Columbia.

"(d) All appointments of commissioners made before January 1, 1922, whether or not made in accordance with the law in effect at the time such appointments were made, are hereby validated and confirmed. All acts by or under the authority of the commission made in the administration of this act and all proceedings instituted by or before the commission prior to the time this section, as amended, takes effect shall, for all purposes, be regarded as having the same status as if such appointments had been valid at the time when made.

"(e) The commission shall at the time of its organization and annually thereafter elect a chairman from its membership. The commission may make such rules and regulations as may be necessary to carry this title into effect. All powers and duties of the commission may be exercised by a majority of its members. A vacancy in the commission shall not impair the right of the remaining commissioners to exercise all the powers of the commission. The commission shall have an official seal, which shall be judicially noticed."

SEC. 5. That the last sentence of the first paragraph of section 105 of the food control and the District of Columbia rents act is amended to read as follows:

"Each member of the commission may sign subpœnas, administer oaths and affirmations, summon and examine witnesses, conduct hearings, and receive evidence touching any matter which the commission is authorized to consider or investigate, and the substance of such evidence, when certified to the commission by the member of the commission who heard and received the same and when filed by the commission with the papers pertaining to such matter, may be made the basis of the commission's determination respecting the matter under consideration or investigation."

SEC. 6. That the last paragraph of section 105 of the food control and the District of Columbia rents act is amended to read as follows:

"Such attendance of witnesses and the production of such books, accounts, records, papers, and correspondence may be required from any place in the United States at any designated place of hearing. In case of disobedience to a subpœna or of the contumacy of any witness appearing before the commission, or in case of the failure to file with the commission any plans or other data required by the commission under section 117 of this title, the commission may invoke the aid of the Supreme Court of the District of Columbia or of any district court of the United States. Such court may thereupon issue an order requiring the person subpœnaed to obey the subpœna or to give evidence touching the matter in question or to file the plans or other data. Any failure to obey such order of the court may be punished by such court as a contempt thereof. No officer or employee of the commission shall, unless authorized by the commission or by a court of competent jurisdiction, make public any information obtained by the commission."

SEC. 7. That section 106 of the food control and the District of Columbia rents act is amended to read as follows:

"SEC. 106. (a) For the purposes of this title it is declared that all rental property and apartments are affected with a public interest, and that all rents and charges therefor, all service in connection therewith, and all other terms and conditions of the use or occupancy thereof, shall be fair and reasonable; and any unreasonable or unfair provision of a lease or other contract for the use or occupancy of such rental property or apartment, with respect to such rents, charges, service, terms, or conditions is hereby declared to be contrary to public policy. The commission upon its own initiative may, or upon complaint shall, determine whether the rent, charges, service, and other terms or conditions of a lease or other contract for the use or occupancy of any such rental property or apartment are fair and reasonable. Such complaints may be made and filed by or on behalf of any tenant, and by or on behalf of the owner of any rental property or apartment, notwithstanding the existence of a lease or other contract between the tenant and the owner. In fixing and determining the fair and reasonable rents, or charges for any rental property or apartment, the commission shall, in all cases, take into consideration the character and condition of the property and the character of the service, if any, furnished in connection therewith.

"(b) In all such cases the commission shall give notice personally or by registered mail and afford an opportunity to be heard to all parties in interest: *Provided*, That notice given by the commission to an agent for the collection of rents due his principal shall be deemed and held to be good and sufficient notice to the principal. The commission shall promptly hear and determine the issues involved in all complaints submitted to it. All hearings before the commission, or any member of

the commission, shall be open to the public. If the commission finds that the existing rents, charges, service, or other terms or conditions of the use or occupancy of any rental property or apartment are unfair and unreasonable, it shall fix and determine the fair and reasonable rents or charges for the rental property or apartment under consideration, and may fix and determine the fair and reasonable service, terms, and conditions of the use or occupancy of the rental property or apartment, and may also order and require the furnishing of such service by the owner as it shall lawfully determine to be fair and reasonable.

"(c) In any suit in any court of the United States or the District of Columbia involving any question arising out of the relation of landlord and tenant with respect to any rental property or apartment, except on appeal from the commission's determination as provided in this title, such court shall determine the rights and duties of the parties in accordance with the determination and regulations of the commission relevant thereto.

"(d) The commission shall file with its determination a finding of the facts on the evidence presented, and upon which its determination is based. Such finding of facts shall set out the following: (1) The fair and reasonable value of the whole property; (2) the allowance for maintenance, repairs, taxes, service, and all other expenses; (3) the separate rentals of the whole property as fixed by the commission, or if not fixed by the commission, then as paid by the tenants; (4) the commission's estimated net return to the owner upon the value as fixed by it; and (5) such other findings of fact as the commission deems proper to submit. Such findings of fact shall constitute a part of the record of the case."

SEC. 8. That section 108 of the food control and the District of Columbia rents act is amended to read as follows:

"SEC. 108. (a) Unless within 10 days after the filing of the commission's determination any party to the complaint appeals therefrom to the Supreme Court of the District of Columbia in general term, the determination of the commission shall be final and conclusive. The Supreme Court of the District of Columbia, in general term, is hereby given jurisdiction to hear and determine appeals taken from determinations of the commission, and such appeals shall be given precedence over the other business of the court. At the hearing of such appeals the chief justice of the court shall preside, with at least two of the associate justices thereof, to be designated by the chief justice. In the absence of the chief justice, the senior associate justice of the court shall preside, have the powers, and perform the duties of the chief justice.

"(b) If such an appeal is taken from the determination of the commission, the record before the commission, or such part thereof as the court may order, shall be certified by it to the court and shall constitute the record before the court, and the commission's determination shall not be modified or set aside by the court, except for error of law.

"(c) If any party applies to the court for leave to adduce additional evidence and shows to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceedings before the commission, the court may order such additional evidence to be taken before the commission and to be adduced upon the hearing in such manner and upon such terms and conditions as the court may deem proper. The commission may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file such modified or new findings, which shall be conclusive, and its recommendations, if any, for the modification or setting aside of its original determination, with the return of such additional evidence.

"(d) In the proceedings before such court on appeal from a determination of the commission, the commission shall appear by its attorney or other representative and submit oral or written arguments to support the findings and the determination of the commission.

"(e) No determination of the commission shall be affirmed, set aside, modified, or otherwise reviewed, or its enforcement in any manner stayed, except upon appeal from such determination as provided by this title."

SEC. 9. That section 109 of the food control and the District of Columbia rents act is amended to read as follows:

"SEC. 109. (a) The right of a tenant to the use or occupancy of any rental property or apartment, existing at the time this act takes effect, or thereafter acquired, under any lease or other contract for such use or occupancy or under any extension thereof by operation of law, shall, notwithstanding the expiration of the term fixed by such lease or contract, continue at the option of the tenant, subject, however, to any determination or regulation of the commission relevant thereto; and such tenant shall not be evicted or dispossessed so long as he pays the rent and performs the other terms and conditions of the tenancy as fixed by such lease or contract, or, in case such lease or contract is modified by any determination or regulation of the commission, then as fixed by such modified lease or contract.

"(b) All remedies of the owner at law or equity, based on any provision of any such lease or contract to the effect that such lease or contract shall be determined or forfeited if the premises are sold, are hereby suspended so long as this title is in force. Every purchaser shall take conveyance of any rental property or apartment subject to the rights of tenants as provided in this title.

"(c) The rights of the tenant under this title shall be subject to the limitation that the bona fide owner of any rental property or apartment shall, upon giving 30 days' notice in writing, served in the manner provided by section 1223 of the act entitled 'An act to establish a code of laws for the District of Columbia,' approved March 3, 1901, as amended (which notice shall contain a full and correct statement of the facts and circumstances upon which the same is based), have the right to possession thereof, (1) if necessary immediately for actual and bona fide occupancy by himself, or his wife, children, or dependents, or for the making of material repairs or alterations, or for the remodeling or erection of a new building, whether or not to be used for rental purposes by the owner, or for any other purpose inconsistent with the continued use or occupancy of the existing tenant, if such purpose does not involve unfair discrimination against such tenant and in favor of any subsequent tenant, or (2) if the tenant commits waste, nuisance, breach of peace, or is otherwise disorderly upon the premises; but in no case shall possession be demanded or obtained by such owner in contravention of the terms of any such lease or contract. After the expiration of the 30 days' period specified in such notice, the owner of the rental property or apartment may recover possession thereof in accordance with such act of March 3, 1901, as amended. If there is a dispute between the owner and the tenant as to the accuracy or sufficiency of the statement set forth in such notice, as to the good faith of such demand, or as to the service of notice, the matters in dispute shall be determined by the court in the proceedings for the recovery of possession. Any such dispute pending before the commission upon complaint at the time this section as amended takes effect shall be determined by the court in accordance with the provisions of this section.

"(d) During the period between the service of the notice and the final decision in the proceedings for the recovery of possession the tenant shall pay to the owner rent in accordance with the terms of the lease or other contract for the use or occupancy of the rental property or apartment, or, in case such lease or contract is modified by any determination of the commission, then in accordance with such modified lease or contract. Acceptance of such rent by the owner shall not be held a waiver by him of any right under the provisions of this section or under the terms of the lease or contract. If any tenant fails so to pay rent to the owner during such period, the rights of the tenant under this section shall cease."

SEC. 10. That section 110 of Title II of the food control and the District of Columbia rents act is amended by inserting "(a)" after the section number and by amending the last sentence thereof to read as follows:

"(b) In case of the increase of the rent for the use or occupancy of any rental property or apartment, made by a determination of the commission from which an appeal is taken by the tenant under the provisions of this title, the tenant shall, from time to time during the period between the filing of the determination and the time when the determination becomes final, and in accordance with the terms of the lease or other contract, pay to the commission the amount of the increase and to the owner the remainder of the amount of rent fixed by the determination. In lieu of such payments the tenant may, in the discretion of the commission and at the time of taking the appeal, give bond, approved by the commission, for the payment of the amount of the increase. The disposition of moneys so paid to the commission and the payments under the terms of the bond shall be made in accordance with the determination of the commission as modified by the final decision on appeal. The court shall dismiss the appeal of any tenant who fails to comply with this subdivision.

"(c) In case of a decrease of the rent by any such determination, the tenant shall, from time to time during such period and in accordance with the terms of the lease or other contract, pay to the owner the amount of rent fixed by the determination. The difference, if any, between the amount of rent paid during such period and the amount that would have been payable for such period, under the determination as modified in accordance with the final decision on appeal, may be added to future rent payments or sued for and recovered in an action in the municipal court of the District of Columbia.

"(d) The amendment of this section shall not be held to terminate any right for the recovery of rent in an action in the municipal court of the District of Columbia if such right arose prior to the time that this section as amended takes effect.

"(e) The decision of the Supreme Court of the District of Columbia upon appeal from any determination of the commission shall be final, except that it shall be subject to review by the Supreme Court of the United States upon certiorari to the same extent as cases subject to such review under section 240 of the Judicial Code, if such writ is duly applied for within 30 days after the decision is rendered. The issue of the writ shall not operate as a supersedeas or in any manner stay or postpone the decision of the Supreme Court of the District of Columbia if such decision affirms or modifies the determination of the commission."

SEC. 11. That section 111 of the food control and the District of Colubia rents act is amended to read as follows:

"SEC. 111. The determination of the commission in a proceeding begun by complaint or upon its own initiative fixing fair and reasonable rents, charges, service, and other terms and conditions of use or occupancy of any rental property or apartment shall constitute the commission's determination of the fairness and reasonableness of such rents, charges, service, terms, or condition for the rental property or apartment affected, and shall remain in full force and effect notwithstanding any change in ownership or tenancy thereof, unless and until the commission modifies or sets aside such determination upon complaint either of the owner or of the tenant."

SEC. 12. That section 112 of the food control and the District of Columbia rents act is amended to read as follows:

"SEC. 112. (a) If the owner of any rental property or apartment collects any rent or charge therefor in excess of the amount fixed in a determination of the commission made and in full force and effect in accordance with the provisions of this title, he shall be liable for and the commission is hereby authorized and directed to commence an action in the municipal court of the District of Columbia to recover double the amount of such excess, together with the costs of the proceeding, which shall include an attorney's fee of $50, to be taxed as part of the costs. Such actions shall be brought in the municipal court, regardless of the amount to be recovered, and the municipal court is hereby given special jurisdiction to hear and determine all such cases.

"(b) The commission is hereby authorized to bring such actions without the payment of costs, and no bond shall be required in the case of any appeal taken by the commission from any judgment of the municipal court in any such case. Out of any sums received on account of such recovery the commission shall pay over to the tenant the amount of the excess so paid by him and the balance shall be paid into the Treasury of the United States to the credit of the District of Columbia: *Provided*, That if the commission finds that such excess was paid by the tenant voluntarily and with knowledge of the commission's determination, the whole amount of such recovery shall be paid into the Treasury of the United States to the credit of the District of Columbia.

"(c) The commission may compromise any case arising under this section instead of commencing an action in respect thereto, or may compromise such case after an action in respect thereto has been commenced. Whenever any such case is compromised there shall be placed on file in the office of the commission a written opinion of the commission or its attorney stating the reasons for such compromise, the amount of the excess rent or charge for which the owner is liable, and the amount thereof actually paid in accordance with the terms of the compromise."

SEC. 13. That section 113 of the food control and the District of Columbia rents act is amended to read as follows:

"SEC. 113. (a) If in any proceeding before the commission, begun by complaint or on the commission's own initiative, and involving any lease or other contract for the use or occupancy of any rental property or apartment, the commission finds that at any time after the passage of this act, but during the tenancy, the owner has, directly or indirectly, willfully withdrawn from the tenant any service agreed or required by a determination of the commission to be furnished, or has by act, neglect,

or omission contrary to such lease or contract or to the law or any ordinance or regulation made in pursuance of law, or of a determination of the commission exposed the tenant, directly or indirectly, to any unsafe or insanitary condition, or imposed upon him any burden, loss, or unusual inconvenience in connection with his use or occupancy of such rental property or apartment, the commission shall determine the sum which in its judgment will fairly and reasonably compensate or reimburse the tenant therefor. In any such proceeding involving a lease or other contract, in which the term specified had not expired at the time the proceeding was begun, the commission shall likewise determine the amount or value of any bonus or other consideration in excess of the rental named in such lease or contract received at any time directly or indirectly by the owner in connection with such lease or contract. The tenant may recover any amount so determined by the commission in an action in the municipal court of the District of Columbia.

"(b) Any person who, after the passage of this amendatory act, willfully fails to furnish the tenants of any rental property or apartment such service (1) as has ordinarily been furnished the tenant of such rental property or apartment prior to such failure, or (2) as is required either expressly or impliedly to be furnished by the lease or other contract for the use or occupancy of the rental property or apartment, or any extension thereof by operation of law, shall, upon conviction, be punished by a fine not exceeding $1,000 or by imprisonment for not more than one year, or by both."

SEC. 14. That section 116 of the food control and the District of Columbia rents act is amended to read as follows:

"SEC. 116. Any person who with intent to avoid the provisions of this title enters into any agreement or arrangement for the payment of any bonus or other consideration in connection with any lease or other contract for the use or occupancy of any rental property or apartment, or who participates in any fictitious sale or other device or arrangement the purpose of which is to grant or obtain the use or occupancy of any rental property or apartment without subjecting such use or occupancy to the provisions of this title or to the jurisdiction of the commission, shall upon conviction be punished by a fine not exceeding $1,000, or by imprisonment for not exceeding one year, or by both."

SEC. 15. That section 117 of the food control and the District of Columbia rents act is amended to read as follows:

"SEC. 117. (a) The commission shall prescribe standard forms of leases and other contracts for the use or occupancy of any rental property or apartment and shall require their use by the owner thereof. Every such lease or contract entered into after the commission has prescribed and promulgated a form for the tenancy provided by such lease or contract shall be deemed to accord with such standard forms; and any such lease or contract in any proceeding before the commission or in any court of the United States or of the District of Columbia shall be interpreted, applied, and enforced in the same manner as if it were in the form and contained the stipulations of such standard form.

"(b) The owner of an apartment shall file with the commission, but only in such cases as the commission deems necessary, plans and other data in such detail as the commission requires, descriptive of the rooms, accommodations, and service in connection with such apartment, and a schedule of rates and charges therefor. The commission shall, after consideration of such plans, schedules, data, or other information, determine and fix a schedule of fair and reasonable rates and charges for such apartments; and the rates and charges stated in such schedule shall thereafter constitute the fair and reasonable rates and charges for such apartment. The commission's determination in such case shall be made after such notice and hearing and shall have the same force and effect and be subject to appeal in the same manner as a determination of the commission under section 106 of this title."

SEC. 16. That section 118 of the food control and the District of Columbia rents act is amended by adding at the end thereof a new sentence to read as follows: "This section shall not be construed as in any way authorizing the assignment of any lease or the subletting of any rental property or apartment in violation of the terms of the lease or other contract for the use or occupancy of the rental property or apartment, or of such lease or contract as extended by operation of law."

SEC. 17. That subdivision (b) of section 124 of the food control and the District of Columbia rents act, as amended, is amended to read as follows:

"(b) In the case of (1) any proceeding begun under the provisions of section 114 before the termination of this title, or (2) any proceeding on appeal from a determination of the commission begun before the termination of this title, such proceeding may, after such termination, be continued in the same manner with the same effect as if this title had not been terminated, and all powers and duties in respect to such proceedings (including the custody and disposition of moneys paid under section 110) vested in the commission by this title shall for the purposes of such proceedings be vested in the Attorney General."

SEC. 18. The food control and the District of Columbia rents act is amended by adding at the end thereof a new section to read as follows:

"SEC. 125. The commission shall, as soon as practicable after this section takes effect and at least semiannually thereafter, publish its determinations, opinions, rulings, and regulations, all important court and administrative decisions in respect to this act, and such provisions of the law relating to landlords and tenants as the commission deems advisable, together with a cumulative index-digest thereof."

SEC. 19. This act shall take effect upon its passage; except that if its passage occurs after May 21, 1922, it shall be held to have taken effect as of such date.

SEC. 20. That all acts or parts of acts in conflict herewith are, to the extent that they are in such conflict, suspended so long as Title II of the food control and the District of Columbia rents act is in force.

During the reading, page 18, line 6,

Mr. MILLSPAUGH. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Missouri rise?

Mr. MILLSPAUGH. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The gentleman from Missouri moves that the committee do now rise.

The question was taken and the Chair announced that the noes appeared to have it.

On a division (demanded by Mr. MILLSPAUGH) there were—ayes 3, noes 162.

Mr. MILLSPAUGH. Mr. Chairman, I make the point of order there is no quorum present.

Mr. BEGG. Mr. Chairman, I make the point of order that the tactics of the gentleman from Missouri——

The CHAIRMAN. The Clerk will read.

The Clerk resumed and concluded the reading of the amendment.

Mr. REED of West Virginia. Mr. Chairman, the amendment which has just been read is one tending to simplify the action of the House; it embraces the amendments to the Senate bill, agreed to after mature consideration for several days, by the House Committee on the District of Columbia. The amendment presents the complete bill as it would appear after these several amendments are approved. If the House adopts it in this form I have the assurance that it will be approved by another body; it is understood they are ready to accept it in this form.

Mr. BLANTON. I offer a substitute, Mr. Chairman. [Cries of "Vote!"]

The CHAIRMAN. The gentleman from Texas offers a substitute, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLANTON as a substitute to the amendment offered by the gentleman from West Virginia [Mr. REED].

Page 1, lines 1 and 2, strike out the enacting clause.

Mr. BLANTON. Mr. Chairman——

Mr. BANKHEAD. Mr. Chairman, I make the point of order that the motion to strike out the enacting clause is not a substitute.

The CHAIRMAN. The Chair thinks the motion to strike out the enacting clause is a preferential motion.

Mr. BANKHEAD. But it is not a substitute for the amendment offered by the gentleman from West Virginia.

Mr. BLANTON. I first offered it as a preferential motion.

The CHAIRMAN. The Chair thinks even offered as a substitute it is in order.

Mr. BLANTON. Mr. Chairman, I feel when the House is in a mood, as the distinguished ex-Speaker Clark used to say, it is futile for anybody to go against that mood; but I am sure that when we pass a measure that contains 24 pages of legislation that can take away from every property owner in this District the management and control of his own property for two whole years more, such as this bill does, it ought not to pass without at least five minutes' discussion in opposition, and those five minutes are the only five minutes that have been given to the opposition to discuss the measure. It is also futile to try to discuss 24 pages of legislation in five minutes; but I want to say this, that there is not a single reason in the world for continuing this class of legislation two years longer. No one will deny that property here is rented outrageously high——

Mr. BEGG. Will the gentleman yield?

Mr. BLANTON. Excuse me, please. The city is full of such profiteers, and if you will make an investigation such as I have made you will find in large measure that in many instances where property is renting for $100 a month to-day the owner of that property is not receiving more than $25.

The other $75 is being drawn into the pockets of some middle profiteer, not the owner of the property, and is protected by this law. That is what is keeping up the rental of property in Washington; that is why it is higher than in Baltimore, though the tax rate there is much greater than here. And I want to say that there has not been a single residence in Washington that has been built for private family use for rental purposes in three years.

Mr. BEGG. Will the gentleman yield for a question?

Mr. BLANTON. Excuse me for a minute.

There are apartment houses that have been built, but you will not find a single private residence that has been built in Washington for rental purposes for three years, since this act has been in force.

You will find lots of residences that have been built for sale, but I am speaking of residences for rental purposes. And there is not a man of means in Washington or elsewhere in the United States who would be foolish enough to build residences in Washington for rental purposes with such an act in force as this, that takes the control of his property away from him and places it in the hands of a private rent commission. I want to say that one of the most sacred rights under the Constitution of this Government is the sacred right of property ownership. When you destroy the right of the individual to the protection of his private property, which he is supposed to enjoy under the Constitution of this land, you are destroying a most sacred right, indeed. I can not find it in my heart to take that right away from all the property owners of the District of Columbia simply because there are rent profiteers among them.

I voted for this bill both the last time and before, but the last time we were facing a winter, where, if parties had been turned out, they would have suffered. Should there not be five minutes of discussion of legislation like this, in an orderly body such as the House of Representatives, the direct representatives of the people of this Nation, sitting here supposedly to take care of their interests. I appeal to you gentlemen that we have proper debate of the bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. REED of West Virginia. Mr. Speaker, I believe that I understand the temper of the committee at this time. It has before it a splendid report on this bill, which explains all its provisions. I feel well assured that the committee is ready to vote on the merits of the bill. Therefore, I move you, Mr. Chairman, that all debate on the sections of the amendment and all amendments thereto be now closed.

The CHAIRMAN. The gentleman from West Virginia moves that all debate on the amendment and amendments thereto do now close.

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. BLANTON and Mr. MILLSPAUGH demanded a division.

The committee divided; and there were—ayes 160, noes 4.

So the motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. BLANTON].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. BLANTON. I ask for a division, Mr. Chairman.

The committee divided, and there were—ayes 4, noes 158.

So the amendment was rejected.

The CHAIRMAN. The question is now on the amendment offered by the gentleman from West Virginia [Mr. REED].

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. BLANTON. Mr. Chairman, I ask for a division.

The committee divided, and there were—ayes 162, noes 3.

So the amendment was agreed to.

Mr. REED of West Virginia. Mr. Chairman, following the notice I gave when I made my original amendment, that in case it was adopted I would move to strike out the remaining sections of the bill, I ask unanimous consent that the remaining sections of the bill be stricken out.

Mr. BLANTON. Mr. Chairman, I object.

The CHAIRMAN. The Clerk will read.

The Clerk proceeded to read.

Mr. BEGG. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BEGG. Would an amendment be in order to move to strike out all after section 1?

The CHAIRMAN. The Chair thinks not. The Clerk will read.

The Clerk read as follows:

SEC. 2. That said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, as amended by an act entitled "An act to extend for the period of seven months the provisions of Title II of the food control and the District of Columbia rents act, approved October 22, 1919, and for other purposes," approved August 24, 1921, be, and the same is hereby, reenacted, extended, and continued, as hereinafter amended, from the date of the approval of this act until the 22d day of May, 1924, notwithstanding the provisions of the first section of the act entitled "An act to extend for the period of seven months the provisions of Title II of the food control and the District of Columbia rents act, approved October 22, 1919, and for other purposes," approved August 24, 1921.

Mr. REED of West Virginia. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from West Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. REED of West Virginia moves to strike out section 2 of the bill, beginning on page 2, line 1, and ending on page 2, line 15, inclusive.

Mr. BLANTON. Mr. Chairman, I rise in opposition to the amendment.

Mr. BEGG. Mr. Chairman, I make the point of order that debate has been closed.

Mr. BLANTON. That was only on the amendment of the gentleman and all amendments thereto. This is a new amendment.

The CHAIRMAN. The Chair is inclined to think that the gentleman from Texas [Mr. BLANTON] has the right to recognition on section 2 of the bill.

Mr. BEGG. Mr. Chairman, the motion made by the gentleman from West Virginia was to close debate on the pending amendment and all amendments offered to the bill.

Mr. BLANTON. Oh, no.

The CHAIRMAN. The motion was to close debate on his amendment and all amendments thereto. This is section 2 of the bill, and the gentleman from Texas is entitled to recognition on section 2 of the bill in opposition to the motion of the gentleman from West Virginia.

Mr. BLANTON. Mr. Chairman, I would not inflict the House with any remarks if we had had debate on the bill. But we have not had any. Why, there are some clauses in here, I am sure, that few of the Members understand. While you speak of the property owner having the right to take possession of his property, I want to call your attention to the conditions under which he can not get possession of his property even within the two years. Even if the claim is that he needed it for himself and his family, the tenant can come in and deny it, and it creates an issuable fact to be tried by a jury in the court, and that places the property owner at a disadvantage of having to establish by a preponderance of testimony that he does want it for his own private interest. Suppose he and his wife only know all the facts. He testifies that he wants the property for his own private interests; he testifies that he needs it; his wife testifies to those facts; the tenants then come in and deny it and attempt to show that the owner does not need it.

Mr. SPROUL. Mr. Chairman, can we have order?

The CHAIRMAN. The committee will be in order.

Mr. BLANTON. I want to assure my friend from Illinois that I am not disturbed. I am sure there are only a few who would forget themselves and create disorder. I am sure that when they think of the proposition that we have not had any debate on this bill they will not create disorder, but will let us be heard at least for five minutes.

When the owner and his wife testify to a certain fact, and the tenant and his wife deny and testify to other facts, there are few juries and few courts that would hold that the owner had proven his case by a preponderance of testimony. Here you are, an American citizen, with property owned in this country under constitutional right, denied your right because, forsooth, only you and your wife know the facts upon which your rights can be based.

Take the second case, where a man wants to improve his property or rebuild it. The tenant and his wife can deny what he only and his wife assert, and the owner is unable to prove his case by a preponderance of testimony, and he is absolutely prevented from enjoying the use of his own property, notwithstanding his constitutional right.

The CHAIRMAN. The time of the gentleman from Texas has expired. The question is on agreeing to the motion of the gentleman from West Virginia [Mr. REED] to strike out section 2.

The question was taken, and the Chairman announced that the ayes appeared to have it.

Mr. BLANTON. I call for a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 140, noes 1.

So the motion was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 3. That section 101 of said Title II of the food control and the District of Columbia rents acts, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 101. When used in this title, unless the context indicates otherwise—

"The term 'rental property' means any building or part thereof or land appurtenant thereto in the District of Columbia rented or hired, and the service agreed or required by law or by determination of the commission to be furnished in connection therewith; but does not include (a) any portion of an apartmepnt building, (b) a garage or warehouse, or (c) any other building or part thereof or land appurtenant thereto used by the tenant exclusively for a business purpose other than the subleasing or otherwise subcontracting for use for living accommodations.

"The term 'person' includes an individual, partnership, association, or corporation.

"The term 'apartment' means any apartment or part thereof in the District of Columbia rented or hired and the land and outbuildings appurtenant thereto, and the service agreed or required by law or by determination of the commission to be furnished in connection therewith.

"The term 'owner' includes a lessor or sublessor, or other person entitled to receive rent or charges for the use or occupancy of any rental property or apartment, or any interest therein, or his agent.

"The term 'tenant' includes a subtenant, lessee, sublessee, or other person, not the owner, entitled to the use or occupancy of any rental property or apartment.

"The term 'service' includes the furnishing of light, heat, water, telephone or elevator service, furniture, furnishings, window shades, screens, awnings, storage, kitchen, bath and laundry facilities and privileges, maid service, janitor service, removal of refuse, making all repairs suited to the type of building or necessitated by ordinary wear and tear, and any other privileges or service connected with the use or occupancy of any rental property or apartment.

"The term 'commission' means the Rent Commission of the District of Columbia."

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out the section.

The CHAIRMAN. The gentleman from West Virginia moves to amend by striking out the section. The Clerk will report the amendment offered by the gentleman from West Virginia.

The Clerk read as follows:

Mr. REED of West Virginia moves to strike out section 3, beginning on line 16 of page 2 and ending on line 7 of page 4, inclusive.

Mr. BEGG. Mr. Chairman, I do not think there is any argument or reason why this section should not be striken out. Therefore I move that the debate on this section close.

The CHAIRMAN. The gentleman from Ohio moves that the debate on this section be now closed. The question is on agreeing to that motion.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. BLANTON. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 151, noes 3.

So the motion was agreed to.

The CHAIRMAN. The question is on agreeing to the motion of the gentleman from West Virginia to strike out all of section 3.

The motion was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 4. That section 102 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 102. A commission is hereby created and established to be known as the Rent Commission of the District of Columbia, which shall be composed of five commissioners, none of whom shall be directly or indirectly engaged or in any manner interested in or connected with the real estate or renting business in the District of Columbia. The commissioners shall be appointed by the President, by and with the advice and consent of the Senate. The term of each commissioner shall be for the period covered by this act, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the commissioner whom he succeeds. The commission, as at present constituted, shall continue in office and shall have and exercise all the powers and duties now vested in them pending the appointment and confirmation of the five commissioners provided for herein.

"The commission shall at the time of its organization and annually thereafter elect a chairman from its membership. The commission may make such rules and regulations as may be necessary to carry this title into effect All powers and duties of the commission may be exercised by a majority of its members. A vacancy in the commission shall not impair the right of the remaining commissioners to exercise all the powers of the commission. The commission shall have an official seal, which shall be judicially noticed."

Mr. BEGG. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. BEGG. Did the Chair put the motion of the gentleman from West Virginia [Mr. REED] to strike out the section, or did the Chair just put the motion of the gentleman from Ohio to close debate? Is it not required that the Chair put the motion to strike out?

The CHAIRMAN. The Clerk informs the Chair that the motion to strike out the section was agreed to.

Mr. REED of West Virginia. Mr. Chairman, I move that the section just read be stricken out.

The CHAIRMAN. The gentleman from West Virginia moves that the section just read be stricken out. The Clerk will report the gentleman's motion.

The Clerk read as follows:

Mr. REED of West Virginia moves to strike out all of section 4, beginning with line 8 of page 4 and ending with line 25 of page 6, inclusive.

Mr. BEGG. Mr. Chairman, the amendment to this bill having been adopted, there is not any use in having this paragraph in. I therefore move to close debate on the gentleman's amendment and all amendments thereto.

The CHAIRMAN. The gentleman from Ohio moves that all debate on the amendment to the amendment be closed.

Mr. BLANTON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BLANTON. Where a section is read under the five-minute rule and a Member is recognized under the five-minute rule, I submit that where he makes no argument debate can not be closed by a motion until there has been an argument of at least five minutes. I make the point of order that the gentleman from Ohio made no argument whatever.

The CHAIRMAN. It is always in the power of the committee after debate is had to close debate. The question is on agreeing to the motion of the gentleman from Ohio.

The question was taken, and the Chairman announced that the ayes appeared to have it

Mr. BLANTON. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is asked for.

The committee divided; and there were—ayes 152, noes 2.

So the motion of Mr. BEGG was agreed to.

The CHAIRMAN. The question is on agreeing to the motion of the gentleman from West Virginia to strike out the section.

The question was taken, and the chairman announced that the ayes appeared to have it.

Mr. BLANTON. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is asked for.

Mr. BEGG. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BEGG. I want to know if there is any provision whereby one Member can continue to make a burlesque of the unanimous will of the House by continually calling for a division.

Mr. BLANTON. I make the point of order, Mr. Chairman, that the gentleman is violating the rules of the House.

Mr. BEGG. The gentleman was on the other side of the question a few weeks ago, and we are forced to sit here and do the same thing over and over uselessly. I make the point of order that the gentleman's calls for a division are dilatory.

Mr. KNUTSON. He has that right under the Constitution.

The CHAIRMAN. The question is on agreeing to the motion of the gentleman from West Virginia to strike out the section.

The committee divided, and there were—ayes 153, noes 3.

So the motion was agreed to.

The CHAIRMAN. The clerk will read.

The Clerk read as follows:

SEC. 5. That section 103 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, as amended by said act approved August 24, 1921, be, and the same is hereby, amended by adding thereto the following:

"The commission shall also have the power to appoint two inspectors outside of the civil service, who shall receive a salary not exceeding $2,000 a year each, payable monthly."

Mr. BEGG. Mr. Chairman, I move that the section be stricken out.

The CHAIRMAN. The gentleman from Ohio moves to strike out section 5. The question is on agreeing to that motion.

The question was taken and the Chairman announced that the ayes appeared to have it.

Mr. BLANTON. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is asked for.

The committee divided; and there were—ayes 148, noes 2.

So the motion was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 6. That the last sentence of the first paragraph of section 105 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"Any member of the commission may sign subpœnas, administer oaths and affirmations, summon witnesses, conduct hearings, and receive evidence touching any matter which the commission is authorized to consider or investigate, and the substance of such evidence, when certified to the commission by the member of the commission who heard and received the same, may be made the basis of the commission's determination respecting the matter under consideration or investigation."

Mr. REED of West Virginia. Mr. Chairman, I move to amend section 6 by striking it out.

Mr. BEGG. Mr. Chairman——

Mr. BLANTON. Mr. Chairman, I ask recognition.

The CHAIRMAN. For what purpose does the gentleman from Ohio rise?

Mr. BEGG. To debate the motion.

The CHAIRMAN. The gentleman from Ohio is recognized.

Mr. BEGG. This section, like all the others, is useless in this bill after the amendment that we have adopted. I therefore move that all debate on this section and all amendments thereto do now close.

The CHAIRMAN. The gentleman from Ohio moves that all debate on this section and all amendments thereto do now close.

The question was taken, and on a division, demanded by Mr. BLANTON, there were—ayes 139, noes 2.

Accordingly the motion was agreed to.

The CHAIRMAN The question is on the amendment of the gentleman from West Virginia, to strike out the section.

The question being taken, on a division (demanded by Mr. BLANTON) there were—ayes 130, noes 2.

Accordingly, the motion was agreed to.

The Clerk read as follows:

SEC. 7. That the last paragraph of said section 105 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"Such attendance of witnesses and the production of such books, accounts, records, papers, and correspondence may be required from any place in the United States at any designated place of hearing. Any person who shall neglect or refuse to attend and testify, or to answer any lawful inquiry, or to produce such books, accounts, records, papers, or correspondence, or who shall fail or refuse to file with the commission plans and other data in such detail as the commission may require, descriptive of the rooms, accommodations, and service in connection with any apartment, required by the commission, if in his power to do so, in obedience to the subpœna, order, or lawful requirement of the commission, or who shall neglect or refuse to comply with any lawful determination or order of the commission, requiring him to furnish heat,

electric current, or other service in any rental property or apartment shall be guilty of an offense, and upon conviction thereof by a court of competent jurisdiction shall be punished by a fine of not exceeding $1,000 or by imprisonment for not more than one year, or by both such fine and imprisonment.

"(e) The commission shall at the time of its organization and annually thereafter elect a chairman from its membership. The commission may make such rules and regulations as may be necessary to carry this title into effect. All powers and duties of the commission may be exercised by a majority of its members. A vacancy in the commission shall not impair the right of the remaining commissioners to exercise all the powers of the commission. The commission shall have an official seal, which shall be judicially noticed."

Mr. BEGG. Mr. Chairman, I move to strike out the paragraph just read.

Mr. BLANTON. A point of order, Mr Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. BLANTON. Under the rules of the House, a member of the committee up to this time has been recognized in preference to somebody who is not a member of the committee. The gentleman from Ohio [Mr. BEGG] is not a member of the committee. I am a member of it, and I ask the Chair whether or not the rules will permit me to be recognized by the Chair?

The CHAIRMAN. The gentleman from Ohio rose before the gentleman from Texas did.

Mr. BLANTON. I have risen before the gentleman several times.

Mr. BEGG. I was on my feet asking recognition.

The CHAIRMAN. The gentleman from Ohio [Mr. BEGG] moves to strike out the section just read.

The question being taken, on a division (demanded by Mr. BLANTON) there were—ayes 108, noes 2.

Accordingly the motion was agreed to.

The Clerk read as follows:

SEC. 8. That section 106 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 106. (a) For the purposes of this title it is declared that all (a) rental property and (b) apartments are affected with a public interest, and that all rents and charges therefor, all service in connection therewith, and all other terms and conditions of the use or occupancy thereof, shall be fair and reasonable; and any unreasonable or unfair provision of a lease or other contract for the use or occupancy of such rental property or apartment, with respect to such rents, charges, service, terms, or conditions is hereby declared to be contrary to public policy. The commission upon its own initiative may, or upon complaint shall, determine whether the rent, charges, service, and other terms or conditions of a lease or other contract for the use or occupancy of any such rental property or apartment are fair and reasonable. Such complaints may be made and filed by or on behalf of any tenant, and by or on behalf of the owner of any rental property or apartment, notwithstanding the existence of a lease or other contract between the tenant and the owner, and in fixing and determining the fair and reasonable rents, rates, or charges for any rental property or apartment, the commission shall, in all cases, take into consideration the character and condition of the property and the character of the service, if any, furnished in connection therewith.

"(b) In all such cases the commission shall give notice personally or by registered mail and afford an opportunity to be heard to all parties in interest: *Provided*, That notice given by the commission to the agent of the legal owner of any rental property or apartment, for the collection of rents, shall be deemed and held to be good and sufficient notice to said legal owner. The commission shall promptly hear and determine the issues involved in all complaints submitted to it. All hearings before the commission, or any member of the commission, shall be open to the public. If the commission finds that the existing rents, charges, service, or other terms or conditions of the use or occupancy of any rental property or apartment are unfair and unreasonable, it shall fix and determine the fair and reasonable rents, rates, or charges for the rental property, or apartment under consideration, and may fix and determine the fair and reasonable service, terms, and conditions of the use or occupancy of the property, and may also order and require the furnishing of such service by the owner as it shall lawfully determine to be fair and reasonable.

"(c) In any suit in any court of the United States or the District of Columbia involving any question arising out of the relation of landlord and tenant with respect to any rental property or apartment, except on appeal from the commission's determination as provided in this title, such court shall determine the rights and duties of the parties in accordance with the determination and regulations of the commission relevant thereto."

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out all of the section just read.

Mr. BEGG. Mr. Chairman——

Mr. BLANTON. I desire to be heard on the amendment.

The CHAIRMAN. The gentleman from Texas is recognized.

Mr. BLANTON. Mr. Chairman, it is just as well that we should understand what onerous provisions we are placing upon the property owners of the country. A provision in this bill, read just a moment ago, provides that a party who happens to own property here in the District of Columbia, who may be in Los Angeles, Calif., or San Francisco, or who may be on a visit to Seattle, Wash., may be summoned by this Rent Commission, and under the process which we provide by which it can follow that party across the United States, if that party fails to appear and testify, he can be fined $1,000 by the court or can be placed in the attitude of being a lawbreaker of the country. Now, you may want to place your constituents in that kind of a position with that kind of a liability following them. You may want to do that where it involves merely a rental contract here in Washington. You may want to place those onerous provisions upon them. You may want to take away the rights of the private owner who has been dispossessed of his property by act of Congress for three years already. You may see fit by this act to take it away from him for another two years. I can not see the justice of the legislation that way. I am in favor of an act to stop all profiteering, but you are merely attempting to stop profiteering in one regard, and that is the rental of property. Take the taxicab service in Washington. Right now a Member of the House, yea, a Member of the Senate, yea, a Cabinet officer, can not drive down to the Union Station right now, the Washington Terminal, and enter on the inside driveway where he will be next to the entrance to the station. Under the rules laid down by the monopoly known as the Terminal Taxicab Co. a private-car owner must drive in on an outside driveway and cross the driveway of the Terminal Taxicab Co. in order to get to the depot. If the facts were investigated, it would be shown that the Terminal Taxicab Co. has bought out the Yellow Cab Service and is in absolute control of the taxicab business of this city.

Instead of there being some competition in it, there is absolutely none; you pay the same charge now in the yellow cab that you do to any of the other terminal taxicabs. If you are going to break up one class of profiteering, break it all up. Break up that with respect to shoes, break up that with respect to the food you eat, break up that with respect to other matters that are disregarded, in the interest of the people.

The CHAIRMAN. The question is on the amendment offered by the gentleman from West Virginia.

The question was taken, and on a division (demanded by Mr. BLANTON) there were 99 ayes and 2 noes.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 9. That section 108 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 108. Unless within 10 days after the filing of the commission's determination any party to the complaint appeals therefrom to the Supreme Court of the District of Columbia, in general term, the determination of the commission shall be final and conclusive. The said Supreme Court of the District of Columbia, in general term, is hereby given jurisdiction to hear and determine appeals taken from determinations of the commission, and said appeals shall be given precedence over the other business of said court. At the hearing of said appeals the chief justice of said court shall preside, with at least two of the associate justices of said court, to be designated by said chief justice, and in the absence of said chief justice the senior associate justice of said court shall preside, have the powers and perform the duties of said chief justice.

"If such an appeal is taken from the determination of the commission, the record before the commission, or such part thereof as the court may order, shall be certified by it to the court and shall constitute the record before the court, and the commission's determination shall not be modified or set aside by the court except for error of law.

"If any party applies to the court for leave to adduce additional evidence and shows to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceedings before the commission, the court may order such additional evidence to be taken before the commission and to be adduced upon the hearing in such manner and upon such terms and conditions as the court may deem proper. The commission may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file such modified or new findings, which shall be conclusive, and its recommendations, if any, for the modification or setting aside of its original determination, with the return of such additional evidence.

"In the proceedings before such court on appeal from a determination of the commission, the commission shall appear by its attorney or other representative and submit oral or written arguments to support the findings and the determination of the commission. No owner or tenant shall apply to the said Supreme Court of the District of Columbia to review any determination of the commission fixing the fair and reasonable rents, rates, or charges for any rental property or apartment, except by appeal, as hereinbefore provided, and said court shall not issue any injunction, permanent or temporary, restraining or enjoining the commission from fixing the rents, rates, or charges for any rental property or apartment, and said court is hereby divested of any and all power and jurisdiction to issue any such injunction.

Mr. BEGG. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from Ohio moves to strike out the section.

Mr. BEGG. Mr. Chairman, I demand recognition on my amendment. There is no reason why this section should not be stricken out because an amendment has been adopted which takes the place of it, and I therefore move to close debate on the section and all amendments thereto.

The CHAIRMAN. The gentleman from Ohio moves to close debate on this amendment and all amendments thereto.

The question was taken; and on a division (demanded by Mr. BLANTON) there were 110 ayes and 3 noes.

So the motion was agreed to.

The CHAIRMAN. The question now is on the amendment to strike out the section.

The question was taken; and on a division (demanded by Mr. BLANTON) there were 108 ayes and 3 noes.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 10. That section 109 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 109. The right of a tenant to the use or occupancy of any rental property or apartment, existing at the time this act takes effect, or thereafter acquired, under any lease or other contract for such use or occupancy or under any extension thereof by operation of law, shall, notwithstanding the expiration of the term fixed by such lease or contract, continue at the option of the tenant, subject, however, to any determination or regulation of the commission relevant thereto; and such tenant shall not be evicted or dispossessed so long as he pays the rent and performs the other terms and conditions of the tenancy as fixed by such lease or contract, or in case such lease or contract is modified by any determination or regulation of the commission, then as fixed by such modified lease or contract.

"All remedies of the owner at law or equity, based on any provision of any such lease or contract to the effect that such lease or contract shall be determined or forfeited if the premises are sold, are hereby suspended so long as this title is in force. Every purchaser shall take conveyance of any rental property or apartment subject to the rights of tenants as provided in this title.

"The rights of the tenant under this title shall be subject to the limitation that the bona fide owner of any rental property or apartment shall have the right to possession thereof for actual and bona fide occupancy by himself, or his wife, children, or dependents, or for the purpose of tearing down or razing the same in order immediately to construct new rental property or apartment if approved by the commission, upon giving 30 days' notice in writing, served in the manner provided by section 1223 of the act entitled 'An act to establish a code of laws for the District of Columbia,' approved May 3, 1901, as amended (which notice shall contain a full and correct statement of the facts and circumstances upon which the same is based); but in no case shall possession be demanded or obtained by such owner in contravention of the terms of any such lease or contract. If there is a dispute between the owner and the tenant as to the accuracy or sufficiency of the statement set forth in such notice, as to the good faith of such demand, or as to the service of notice, the matters in dispute shall be determined by the commission upon complaint as provided in section 106 of this title.

"Any dispute made before the commission under the provisions of this section shall be filed with the commission before the notice complained of has expired."

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out the section.

The CHAIRMAN. The gentleman from West Virginia moves to amend by striking out the section.

The question was taken; and on a division (demanded by Mr. BLANTON) there were 112 ayes and 3 noes.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 11. That section 111 of the food control and the District of Columbia rents act is amended to read as follows:

"SEC. 111. The determination of the commission in a proceeding begun by complaint or upon its own initiative fixing fair and reasonable rents, charges, service, and other terms and conditions of use or occupancy of any rental property or apartment shall constitute the commission's determination of the fairness and reasonableness of such rents, charges, service, terms, or condition for the rental property or apartment affected, and shall remain in full force and effect notwithstanding any change in ownership or tenancy thereof, unless and until the commission modifies or sets aside such determination upon complaint either of the owner or of the tenant."

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out the section.

The CHAIRMAN. The gentleman from West Virginia moves to amend by striking out the section.

Mr. REED of West Virginia. Mr. Chairman, this section ought to be stricken out, because it is taken care of by another amendment. I therefore move that all debate on the section and amendments thereto now close.

The CHAIRMAN. The question is on the motion of the gentleman from West Virginia.

The question was taken; and on a division (demanded by Mr. BLANTON) there were 110 ayes and 3 noes.

So the motion was agreed to.

The CHAIRMAN. The question now is on the amendment striking out the section.

The question was taken; and on a division (demanded by Mr. BLANTON) there were 105 ayes and 3 noes.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 12. That section 112 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 112. If the owner of any rental property or apartment collects any rent or charge therefor in excess of the amount fixed in a determination of the commission made and in full force and effect in accordance with the provisions of this title, he shall be liable for and the commission is hereby authorized and directed to commence an action in the municipal court of the District of Columbia to recover double the amount of such excess, together with the costs of the proceeding, which shall include an attorney's fee of $50, to be taxed as part of the costs. Such actions shall be brought in said municipal court, regardless of the amount to be recovered, and the said municipal court is hereby given special jurisdiction to hear and determine all such cases.

"The commission is hereby authorized to bring such actions without the payment of costs, and no bond shall be required in the case of any appeal taken by the commission from any judgment of the said municipal court in any such case. Out of any sums received on account of such recovery the commission shall pay over to the tenant the amount of the excess so paid by him and the balance shall be paid into the Treasury of the United States to the credit of the District of Columbia: *Provided*, That if the commission finds that such excess was paid by the tenant voluntarily and with knowledge of the commission's determination, the whole amount of such recovery shall be paid into the Treasury of the United States to the credit of the District of Columbia."

Mr. REED of West Virginia. Mr. Chairman, I move to strike out the section.

Mr. BLANTON. Mr. Chairman, a point of order——

Mr. KNUTSON. Mr. Chairman, I make the point of order that the gentleman from West Virginia has the floor.

Mr. BLANTON. Mr. Chairman, the Clerk had not reported the gentleman's amendment.

The CHAIRMAN. It is not necessary in a motion to strike out the section, the Chair may state it of his own motion. The question is on the motion of the gentleman from West Virginia.

The question was taken; and on a division (demanded by Mr. BLANTON) there were 114 ayes and 3 noes.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 13. That section 113 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 113. If in any proceeding before the commission, begun by complainant or on the commission's own initiative, and involving any lease or other contract for the use or occupancy of any rental property or apartment, the commission finds that at any time after the passage of this act, but during the tenancy, the owner has, directly or indirectly, willfully withdrawn from the tenant any service agreed or required by a determination of the commission to be furnished, or has by act, neglect, or omission contrary to such lease or contract or to the law or any ordinance or regulation made in pursuance of law, or of a determination of the commission, exposed the tenant, directly or indirectly, to any unsafe or insanitary condition or imposed upon him any burden, loss, or unusual inconvenience in connection with his use or occupancy of such rental property or apartment, the commission shall determine the sum which in its judgment will fairly and reasonably compensate or reimburse the tenant therefor. In any such proceeding involving a lease or other contract, the terms specified in which had not expired at the time the proceeding was begun, the commission shall likewise determine the amount or value of any bonus or other consideration in excess of the rental named in such lease or contract received at any time directly or indirectly by the owner in connection with such lease or contract. The tenant may recover any amount so determined by the commission in an action in the municipal court of the District of Columbia."

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out all of the section just read.

The CHAIRMAN. The question is on the motion of the gentleman from West Virginia to strike out the section.

Mr. BLANTON. Mr. Chairman, I demand recognition.

Mr. REED of West Virginia. Mr. Chairman, I have not yet yielded the floor.

The CHAIRMAN. The gentleman from West Virginia is recognized for five minutes, as he has not yielded the floor.

Mr. REED of West Virginia. Mr. Chairman, the reason for making the motion to strike out is easily understood; it has been taken care of already, as the Members may see by reading the corresponding section of the amendment already adopted. Therefore, I move that all debate upon this amendment and all amendments thereto be now closed.

The CHAIRMAN. The question is on the motion of the gentleman from West Virginia that all debate upon the amendment and all amendments thereto be now closed.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 102, noes 2.

So the motion was agreed to.

The CHAIRMAN. The question now is on the amendment to strike out the section.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 115, noes 1.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 14. That section 116 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 116. Any person who with intent to avoid the provisions of this title enters into any agreement or arrangement for the payment of any bonus or other consideration in connection with any lease or other contract for the use or occupancy of any rental property or apartment, or who participates in any fictitious sale or other device or arrangement the purpose of which is to grant or obtain the use or occupancy of any rental property or apartment without subjecting such use or occupancy to the provisions of this title or to the jurisdiction of the commission, shall upon conviction be punished by a fine not exceeding $1,000, or by imprisonment for not exceeding one year, or by both."

Mr. REED of West Virginia. Mr. Chairman, I move to amend the section by striking it out.

The CHAIRMAN. The gentleman from West Virginia moves to amend by striking out the section.

Mr. REED of West Virginia. Mr. Chairman, I demand recognition upon my amendment.

Mr. BLANTON. Mr. Chairman, I ask for recognition.

The CHAIRMAN. The Chair will recognize the gentleman from West Virginia.

Mr. REED of West Virginia. Mr. Chairman, it was thought by some members of the District Committee that the fine provided in this section was excessive; therefore the committee took the several sections of the bill relating to penalties and sought to mitigate some and safeguard others to an extent that I think will be entirely satisfactory. I therefore move that all debate upon the amendment and all amendments thereto be now closed.

The CHAIRMAN. The gentleman from West Virginia moves that all debate upon the amendment and all amendments thereto be now closed.

The question was taken, and on a division (demanded by Mr. BLANTON) there were—ayes 118, noes 2.

So the motion was agreed to.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from West Virginia to strike out the section.

The question was taken, and on a division (demanded by Mr. BLANTON) there were—ayes 103, noes 2.

The Clerk read as follows:

SEC. 15. That section 117 of said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended to read as follows:

"SEC. 117. The commission shall prescribe standard forms of leases and other contracts for the use or occupancy of any rental property or apartment and shall require their use by the owner thereof. Every such lease or contract entered into after the commission has prescribed and promulgated a form for the tenancy provided by such lease or contract shall be deemed to accord with such standard forms; and any such lease or contract in any proceeding before the commission or in any court of the United States or of the District of Columbia shall be interpreted, applied, and enforced in the same manner as if it were in the form and contained the stipulations of such standard form.

"The owner of an apartment shall file with the commission plans and other data in such detail as the commission requires, descriptive of the rooms, accommodations, and service in connection with such apartment, and a schedule of rates and charges therefor. The commission shall, after consideration of such plans, schedules, data, or other information, determine and fix a schedule of fair and reasonable rates and charges for such apartments; and the rates and charges stated in such schedule shall thereafter constitute the fair and reasonable rates and charges for such apartment. The commission's determination in such case shall be made after such notice and hearing and shall have the same force and effect and be subject to appeal in the same manner as a determination of the commission under section 106 of this title."

Mr. REED of West Virginia. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from West Virginia moves to strike out the section.

Mr. BLANTON. Mr. Chairman, I demand recognition.

The CHAIRMAN. The gentleman from West Virginia is recognized for five minutes, or for such portion thereof as he may desire to use.

Mr. REED of West Virginia. Mr. Chairman, this section has been cared for by the committee in the amendment already adopted, in such a way that makes it entirely satisfactory, as I understand, to the body at the other end of the Capitol. I therefor move that all debate upon the amendment and all amendments thereto be now closed.

The CHAIRMAN. The gentleman from West Virginia moves that all debate upon the amendment and all amendments thereto be now closed.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 110, noes 2.

So the motion was agreed to.

The CHAIRMAN. The question is now on the amendment offered by the gentleman from West Virginia to strike out the section.

The question was taken, and on a division (demanded by Mr. BLANTON) there were—ayes 102, noes 2.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 16. That said Title II of the food control and the District of Columbia rents act, approved October 22, 1919, be, and the same is hereby, amended by adding thereto the following:

"SEC. 124. (a) Any violation of this act or of any order of the commission, committed before the termination of this act, may, after such termination, be prosecuted by and in the name of the Attorney General in lieu of the commission in the same manner and with the same effect as if this act had not been terminated.

"(b) In the case of (1) any proceeding begun under the provisions of section 114 before the termination of this act, or (2) any proceeding on appeal from a determination of the commission begun before the termination of this act, such proceeding may, after such termination, be continued in the same manner with the same effect as if this act had not been terminated, and all powers and duties in respect to such proceedings vested in the commission by this act shall for the purposes of such proceedings be vested in the Attorney General.

"(c) Any right or obligation based upon any provision of this act or upon any order of the commission, accrued prior to the termination of this act, may, after the termination of this act, be enforceed in the same manner and with the same effect as if this act had not been terminated.

"(d) The Attorney General may, after the termination of this act, appoint the attorney last appointed by the commission under the provisions of section 103 to assist in the enforcement of this act. Such attorney shall continue to receive compensation for such services at the rate of $5,000 per annum, payable monthly."

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out the section.

The CHAIRMAN. The gentleman from West Virginia moves to amend by striking out the section.

Mr. REED of West Virginia. Mr. Chairman, the amendment already adopted takes care of this in a very much better manner than it is taken care of in the bill as it was received from the other body. I therefore move that all debate upon the amendment and all amendments thereto be now closed.

The CHAIRMAN. The question is on the motion of the gentleman from West Virginia that all debate upon the amendment and all amendments thereto be now closed.

The question was taken; and upon a division (demanded by Mr. BLANTON) there were—ayes 110, noes 2.

So the motion was agreed to.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from West Virginia to strike out the section.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 103, noes 2.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 17. That the proprietor, manager, owner, or other person in charge of and conducting any hotel in the District of Columbia shall post in a conspicuous place in each room thereof a card or sign plainly stating the price per day of such room, and a copy of such rates for each room shall be filed with the Rent Commission of the District of Columbia. In case the hotel is conducted on the American plan, the rates for meals shall be posted in a conspicuous place in each room of the hotel. Such cards or signs, both with reference to rooms and meals, shall be dated as of the day on which they are posted. The rates charged for rooms shall not be advanced in less than 30 days from the date of the approval of the said commissioners of the written application therefor, and in the event an advance in rates is granted the same requirements with reference to posting of notices and filing copies thereof with the Rent Commission of the District of Columbia, as above provided, shall apply.

Any person, firm, or corporation who shall violate any of the provisions of this act relating to hotel charges or who shall charge any guest a rate in excess of said posted rates shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not less than $10 nor more than $100 for each offense.

The Commissioners of the District of Columbia are hereby charged with the enforcement of this act.

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out all of the section just read.

The CHAIRMAN. The gentleman from West Virginia moves to amend by striking out the section.

Mr. BLANTON. Mr. Chairman——

The CHAIRMAN. The gentleman from West Virginia.

Mr. REED of West Virginia. Mr. Chairman, this section is one that relates to hotels and it was in the Senate bill that came to the House. The House committee thought it best to take away from the Rent Commission the regulation and control of hotels; therefore this section was not approved and should be stricken out. I therefore move you that debate on the section and all amendments thereto do now close.

The question was taken, and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 100, noes 2.

So the motion was agreed to.

The CHAIRMAN. The question is on the motion to strike out the section.

The question was taken, and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 118, noes 2.

So the motion was agreed to.

The Clerk read as follows:

SEC. 18. That section 2 of the said act entitled "An act to extend for the period of seven months the provisions of Title II of the food control and the District of Columbia rents act, approved October 22, 1919, and for other purposes," approved August 24, 1921, be, and the same is hereby, repealed.

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out the section just read, and——

Mr. BLANTON. Mr. Chairman——

Mr. REED of West Virginia Mr. Chairman——

The CHAIRMAN. The gentleman from West Virginia.

Mr. REED of West Virginia. Mr. Chairman, this section is taken care of in another part of the bill, and therefore it is superfluous, and I accordingly move that debate on the section and all amendments thereto be now closed.

The question was taken, and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 116, noes 3.

So the motion was agreed to.

The CHAIRMAN. The question is on the amendment to strike out the section.

The question was taken, and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 115, noes 3.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 19. That all orders and determinations heretofore or hereafter made by the commission shall be and remain in full force and effect until the termination of this act.

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out all of the section just read. Mr. Chairman, my amendment to the Senate bill already adopted makes this part of the bill entirely unnecessary and it should be stricken from the bill, and I therefore move that debate on the section and all amendments thereto be now closed.

The question was taken, and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 115, noes 3.

So the motion was agreed to.

The CHAIRMAN. The question is on the amendment to strike out the section.

The question was taken, and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 112, noes 3.

So the amendment was agreed to.

The Clerk read as follows:

SEC. 20. That all acts or parts of acts in conflict herewith are hereby repealed.

Mr. REED of West Virginia. Mr. Chairman, I move to amend by striking out the section just read. Mr. Chairman——

Mr. BLANTON. Mr. Chairman——

The CHAIRMAN. The gentleman from West Virginia.

Mr. REED of West Virginia. Mr. Chairman, the members of the committee who are familiar with the foregoing part of the bill will find that the subject matter of this section is taken care of, and therefore I deem it superfluous, and move that debate on this section and all amendments thereto be now closed.

The question was taken, and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 109, noes 4.

So the motion was agreed to.

The CHAIRMAN. The question is on the amendment to strike out the section.

The question was taken, and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 118, noes 2.

So the amendment was agreed to.

Mr. REED of West Virginia. Mr. Chairman, I move that the committee do now rise and report the bill with the amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass. [Applause.]

The CHAIRMAN. The question is on the motion of the gentleman from West Virginia.

The question was taken, and the Chairman announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 160, noes 4.

So the motion was agreed to.

Accordingly the committee rose; and Mr. WALSH having resumed the chair as Speaker pro tempore, Mr. LONGWORTH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill S. 2919, had directed him to report the same back with an amendment, with the recommendation that the amendment be agreed to, and that the bill as amended do pass.

Mr. REED of West Virginia. Mr. Speaker, I move the previous question on the bill and amendment to final passage.

The question was taken, and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. BLANTON) there were—ayes 207, noes 6.

Mr. BLANTON. Mr. Speaker, I object to the vote because there is no quorum present, and I make the point of no quorum.

The SPEAKER pro tempore. The gentleman from Texas makes the point that there is no quorum present, and the Chair will count. [After counting.] Two hundred and fourteen gentlemen are present; not a quorum. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees. Those in favor of ordering the previous question will, as their names are called, answer "yea," those opposed will answer "nay," and the Clerk will call the roll.

The question was taken; and there were—yeas 250, nays 22, not voting 158, as follows:

YEAS—250.

Park, Ga.	Rucker	Taylor, Tenn.	Wyant
Perkins	Sanders, Ind.	Tilson	
Perlman	Sears	Tinkham	

So the previous question was ordered.

The Clerk announced the following additional pairs:

Until further notice:

Mr. Bacharach with Mr. Carew.

Mr. Mudd with Mr. Rucker.

Mr. Layton with Mr. Wise.

Mr. Kahn with Mr. Tucker.

Mr. Johnson of Washington with Mr. Lea of California.

Mr. Vestal with Mr. Park of Georgia.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. A quorum is present. The Doorkeeper will open the doors.

The question is on agreeing to the amendment.

The question was taken, and the Speaker pro tempore announced that the ayes seemed to have it.

Mr. BLANTON. I ask for a division, Mr. Speaker.

The House divided; and there were—ayes 243, noes 11.

So the amendment was agreed to.

The SPEAKER pro tempore. The question is on the third reading of the Senate bill.

Mr. BLANTON. Mr. Speaker, I demand a third reading of the bill in extenso.

The SPEAKER pro tempore. The Chair will inform the gentleman that the third reading of the bill has not yet been ordered. The question now is on ordering the third reading of the Senate bill.

The question was taken, and the Speaker pro tempore announced that the "ayes" appeared to have it.

Mr. BLANTON. Mr. Speaker, I ask for a division.

The SPEAKER pro tempore. The gentleman from Texas asks for a division. The question is on the third reading of the bill.

The House divided; and there were—ayes 241, noes 9.

So the third reading of the Senate bill was ordered, and the title was read.

Mr. BLANTON. Mr. Speaker, I demand the third reading of the Senate bill in extenso.

Mr. MONDELL. Nothing remains of the Senate bill but the title.

Mr. BLANTON. I mean the reading of the bill that we are to pass.

The SPEAKER pro tempore. Does the gentleman from Wyoming make the point of order?

Mr. MONDELL. I make the point of order.

The SPEAKER pro tempore. The Chair will state that by action of the committee all after the enacting clause of the Senate bill has been stricken out by way of an amendment; such an amendment was adopted by the committee and reported to and agreed to by the House; that amendment which was agreed to by the House upon demand, when the question of adopting the amendment was under consideration in the House, could have been read; but that demand not having been made, it seems to the Chair that, nothing remaining of the Senate bill but the enacting clause and the title, no Member of the House now is entitled to have the amendment, which has been incorporated and made the Senate bill, read in full. [Applause.]

Mr. BLANTON. I am sure the Speaker will hear me for a moment.

The SPEAKER pro tempore. The Chair will hear the gentleman.

Mr. BLANTON. There is no man whose judgment I would follow more quickly than the present occupant of the chair; but I want to call the attention of the Chair to this fact, that when a Senate bill is amended by the House it is still a Senate biH. The bill that we are to read a third time and pass is a Senate bill, amended by the House. It does not make any difference how we amend it, whether we amend it by the crossing of a "t" or the dotting of an "i" or putting in all after the enacting clause; it is still Senate bill numbered so and so, and the bill we ought to pass upon, if passed upon at all, and if properly read a third time, if at all, is the bill that appears now for the first time at the Clerk's desk, with the enacting clause put in by the Senate and whatever the House has put into it. It is a serious question. I am sure the Chair wants to be correct. I am absolutely sure that, with all due deference and regard to the Chair's opinion, this bill should be read.

Mr. MONDELL. I understand the Chair has ruled, and ruled correctly.

The SPEAKER pro tempore. In reference to the point made by the gentleman from Texas the Chair would state that with reference to House bills a Member has a right to demand the reading of the engrossed bill. The House has nothing to do with engrossing a Senate bill. The amendment adopted by the House is engrossed and sent to the Senate with its bill by message. If a Member desires to have what has been engrossed read, for the purpose of observing whether or not it is in accordance with the action of the Committee of the Whole or if it is correctly engrossed, if it were possible to do so under the rules, in the view of the Chair the proper time to demand the reading of the engrossed amendment would be at the time it is reported, prior to the vote thereon in the House. Having been agreed to and incorporated as a part of the Senate bill, without a demand for the reading thereof, it seems to the Chair that that action having been taken under the rules, a third reading in full of the Senate bill, of which nothing remains but the title and the enacting clause, does not under a fair interpretation of the rule remain as a matter of right. The Chair therefore sustains the point of order. The third reading of the Senate bill is in order.

The Senate bill was read the third time.

Mr. BLANTON. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. The gentleman from Texas offers a motion to recommit, which the Clerk will report.

The Clerk read as follows:

Mr. BLANTON moves to recommit the bill to the Committee on the District of Columbia, with instructions to report the same back to the House forthwith with the following amendment, to wit: Strike out all of section 1, embracing lines 1, 2, 3, 4, 5, and 6 of the Reed amendment.

Mr. REED of West Virginia. Mr. Speaker, I move the previous question on the motion to recommit.

The SPEAKER pro tempore. The gentleman from West Virginia moves the previous question on the motion to recommit.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 231, noes 5.

Accordingly the previous question was ordered on the motion to recommit.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question being taken, on a division (demanded by Mr. BLANTON), there were—ayes 7, noes 243.

Mr. BLANTON. Mr. Speaker, I ask for the yeas and nays on this vote.

Mr. BEGG. Mr. Speaker, I make the point of order that the gentleman's tactics this afternoon in asking for divisions——

The SPEAKER pro tempore. The Chair overrules the point of order.

Mr. BEGG. Mr. Speaker, I should like to cite a decision to the Chair.

The SPEAKER pro tempore. The Chair will state that any gentleman has the right to demand the yeas and nays, and if supported by one-fifth of the Members present, the Chair must order the yeas and nays. That is a right guaranteed in the Constitution. Those in favor of ordering the yeas and nays will rise and stand until they are counted. [After counting.] Four Members have risen. Not a sufficient number. The noes have it, and the motion to recommit does not prevail.

Mr. BLANTON. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER pro tempore. The gentleman from Texas moves that the House do now adjourn.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 3, noes 247.

Accordingly the motion to adjourn was rejected.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 248, noes 31.

Mr. MILLSPAUGH. Mr. Speaker, on this question I demand the yeas and nays.

The SPEAKER pro tempore. The gentleman from Missouri demands the yeas and nays. Those in favor of ordering the yeas and nays will rise and stand until they are counted. [After counting.] Thirteen Members rising, not a sufficient number.

Accordingly the bill was passed.

Mr. REED of West Virginia. Mr. Speaker, I move to reconsider the vote by which the bill was passed, and I move to lay that motion on the table.

The SPEAKER pro tempore. The gentleman from West Virginia moves that the vote by which the bill was passed be reconsidered and that that motion lie on the table.

Mr. BLANTON. Mr. Speaker, I demand a division of the question.

The SPEAKER pro tempore. The gentleman can not demand a division of the question. He can object to the request of the gentleman, and the motion then comes up laying upon the table the motion of the gentleman from West Virginia [Mr. REED] to reconsider the vote whereby the bill was passed.

The question was taken, and the motion to reconsider the vote by which the bill was passed was laid on the table.

ELECTION TO COMMITTEES.

Mr. GARNER. Mr. Speaker, I offer a privileged motion.

The SPEAKER pro tempore. The gentleman from Texas presents a privileged resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 351.

Resolved, That GUINN WILLIAMS, Member of Congress from the thirteenth district of Texas, be, and he is hereby, elected a member of standing committees of the House as follows: Patents, District of Columbia, and Expenditures in the Post Office Department.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

SPEAKER PRO TEMPORE.

Mr. MONDELL. Mr. Speaker, I present a privileged resolution.

The SPEAKER pro tempore. The gentleman from Wyoming presents a privileged resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 350.

Resolved, That the designation of Hon. JOSEPH WALSH, a Representative from the State of Massachusetts, as Speaker pro tempore be approved by the House, and that the President of the United States and the Senate be notified thereof.

Mr. MONDELL. Mr. Speaker, the adoption of this resolution is necessary in order to authorize the Speaker pro tempore to sign the Ball Rent Act or any other measure that may be presented to him. The bill goes immediately to the Senate. Our expectation is that the Senate will take it up at once and agree to the House amendments. The bill ought to be back to the House inside of 30 minutes at the latest. While we are waiting for the action of the Senate, the committee will call up another bill and have it under consideration. I hope gentlemen will remain until the bill returns from the Senate. It ought not to be over 30 minutes.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. MONDELL. Mr. Speaker, I desire to suggest to gentlemen who are disposed to go that we will all of us save time if gentlemen will remain, because they may be called back.

JOINT COMMISSION OF AGRICULTURAL INQUIRY.

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that illustrations accompanying the report of the Joint Commission of Agricultural Inquiry, parts 1, 2, 3, and 4, may be printed as a part of the report.

The SPEAKER pro tempore. The gentleman from Minnesota asks unanimous consent that illustrations accompanying the report of the Joint Commission of Agricultural Inquiry may be printed as a part of the report. Is there objection?

There was no objection.

PAY OF THE ARMY, NAVY, MARINE CORPS, ETC.

Mr. McKENZIE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 10972, disagree to all the Senate amendments, and ask for a conference.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent to take from the Speaker's table the bill H. R. 10972, disagree to the Senate amendments, and ask for a conference. The Clerk will report the title to the bill.

The Clerk read as follows:

H. R. 10972. A bill to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

The SPEAKER pro tempore. Is there objection?

Mr. KRAUS. Mr. Speaker, reserving the right to object, as this bill passed the Senate there is but one major matter in controversy, and that relates to the pay of the officers on the retired list. When this bill was under consideration in Committee of the Whole there was a decided majority in the committee in favor of the House provision. I would like to know from the chairman of the committee if before the House conferees agree upon that particular matter it will be brought back for the consideration and a vote of the House.

Mr. McKENZIE. Mr. Speaker, I recognize the force of the request made by the gentleman from Indiana, but I feel that the conferees on this bill should be permitted to go to conference unhampered. If we bring back a report that is not satisfactory to the House, then it is up to the House to vote down the conference report. I would much prefer to be permitted to go to conference untrammeled and work this matter out; and if not to the satisfaction of the House, it is for the House to say so.

Mr. KRAUS. As a matter of fact, there is but one major matter in controversy. The House has taken a position on this, and I feel it should not be modified or surrendered by the conferees without giving the House a chance to vote on that particular question unhampered and uninfluenced by other questions involved. If it comes back with other minor matters that might have some influence on the major question, then the important question might not be presented clearly to the House for its action. If the gentleman feels that he can not agree to this, I regret to say that I shall be obliged to object at this time.

The SPEAKER pro tempore. The gentleman from Indiana objects.

SALE OF LAND IN THE DISTRICT OF COLUMBIA.

Mr. ZIHLMAN. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 5020.

The SPEAKER pro tempore. The gentleman from Maryland moves that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill, of which the Clerk will report the title.

The Clerk read as follows:

A bill (H. R. 5020) to provide for the sale by the Commissioners of the District of Columbia of certain land in the District of Columbia acquired for a school site, and for other purposes.

Mr. CRAMTON. Will the gentleman withhold the motion until I ask unanimous consent?

Mr. ZIHLMAN. I will.

RELIEF OF DESTITUTE INDIANS.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that House Joint Resolution 264, which is 240 on the Union Calendar, may be laid on the table. It is a matter for the relief of Indians, and has been taken care of in the Interior Department appropriation bill.

The SPEAKER pro tempore. The Clerk will report the title to the bill.

The Clerk read as follows:

H. R. 264, providing for the relief of destitution among the Indians.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

SALE OF LAND IN DISTRICT OF COLUMBIA.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Maryland that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of H. R. 5020.

The question was taken; and on a division (demanded by Mr. BLANTON) there were 99 ayes and 1 no.

So the motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of Union, with Mr. CAMPBELL of Kansas in the chair.

Mr. ZIHLMAN. Mr. Chairman, this bill is to provide for sale by the Commissioners of the District of Columbia of two small strips of land that were part of a site which was purchased in 1869 for school purposes. Since the purchase of this land, more than 50 years ago, the major portion of it has been used for streets and sold. This was done when Twentieth and Jackson Streets NE. were opened. We are advised by the District Commissioners that the only land remaining in this plot of ground consists of two small strips that were not absorbed or sold when Jackson and Twentieth Streets NE. were opened. The commissioners stated to the District of Columbia Committee that the disposal of this land in the manner indicated in the bill is in the public interest.

Mr. RAKER. Will the gentleman yield?

Mr. ZIHLMAN. Yes.

Mr. RAKER. About what is the approximate value of the two tracts of land?

Mr. ZIHLMAN. I do not know the exact dimensions or value, but they are two small strips of land in the northeast section of the city. I would say that the value of the property is nominal.

Mr. RAKER. And no considerably sized building could be erected on either of them?

Mr. ZIHLMAN. No considerably sized building could be erected on either of them.

Mr. RAKER. And they are not needed for school purposes?

Mr. ZIHLMAN. No. The land was purchased more than 50 years ago for school purposes, and since that time two streets have been opened which have taken most of the land that was conveyed for this purpose by the original owner.

Mr. JOHNSON of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. ZIHLMAN. Yes.

Mr. JOHNSON of Kentucky. In whom is the title to this land?

Mr. ZIHLMAN. I have not any accurate information on that, but I presume that the title is in the school board of the District.

Mr. JOHNSON of Kentucky. As I understand it, the school board of the District has no title to any land.

Mr. ZIHLMAN. The District Commissioners as representing the school board.

Mr. JOHNSON of Kentucky. The gentleman has stated that he "presumes" so. It is a mere matter of presumption. By that, does the gentleman concede that he has no direct information regarding the title to the land?

Mr. ZIHLMAN. I have no direct information regarding the title to the land, except that it was purchased for school purposes, and I naturally assume that the title is vested in the Commissioners of the District of Columbia.

Mr. JOHNSON of Kentucky. Does the gentleman know how many square feet there are?

Mr. ZIHLMAN. I will say to the gentleman from Kentucky that on such bills as I have made reports as a member of the Committee of the District of Columbia, I have carefully gone into the number of square feet involved, and I have personally inspected the property and have made personal investigation of the property values in the particular section affected by the legislation. I did not make this report. It was made by the chairman of the committee, who is, unfortunately, absent.

Mr. JOHNSON of Kentucky. Does the gentleman know how much per square foot it is worth?

Mr. ZIHLMAN. I have no information as to the value.

Mr. JOHNSON of Kentucky. The report speaks of some unnamed gentleman who is about to build thereon or adjacent to this property. Can the gentleman give us any information as to what the person who needs this property is going to pay for it?

Mr. ZIHLMAN. I have no knowledge as to that. I will say to the gentleman that in this bill the commissioners are authorized to sell at public or private sale. If the House should feel disposed to do so, it could strike out the private sale and have it sold at public sale.

I understand from the testimony before our committee, of which, I confess, I have not a very clear recollection, that the representative of the engineer commissioner stated that the land consists of two very small strips that have lain there for more than half a century, unused, and that the greater part of this piece of land was taken out when these two streets were opened in that section of the city.

Mr. JOHNSON of Kentucky. Is the gentleman able to say that the United States does not hold title to this property?

Mr. ZIHLMAN. I assume that having been purchased for school purposes, the title is in the District Commissioners, as I understand the title to all school property is in their name.

Mr. JOHNSON of Kentucky. But there were no District Commissioners at the time the title passed.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. ZIHLMAN. Yes.

Mr. CRAMTON. The bill states that when the land was acquired it was acquired by the commissioners of the primary schools of Washington County, and whoever is the successor in law of those commissioners I suppose now holds the title.

Mr. JOHNSON of Kentucky. The latter part of the bill provides that all of the money shall be paid to the District of Columbia. I am inquiring as to this because it has been the custom during the last few years to have the purchase money proportioned between the United States and the District of Columbia, just as they paid for it.

Mr. ZIHLMAN. I will say to the gentleman that if I thought the title to this land was in the name of the Federal Government I personally would favor an amendment to the bill covering the entire proceeds of the sale, which would be very small, according to the testimony before the committee, into the Federal Treasury as miscellaneous receipts, such an amendment having been adopted a few weeks ago on a similar bill.

Mr. JOHNSON of Kentucky. If the gentleman will pardon me, that should not be done if all the money is properly due to the District.

Neither should this bill be passed in the shape that it is in if all or any part is due to the Federal Government.

Mr. ZIHLMAN. My understanding is the titles to the streets and alleys in the District of Columbia are in the name of the Federal Government, it having taken over this 10-mile square as it was called, when the Capital was located here in Washington, but this is no part of the land used for public streets. These are two small strips which were originally purchased for a school site many years ago, and have not been used for that purpose, and most of the land has been absorbed by the opening of these two streets.

Mr. JOHNSON of Kentucky. Has not it occurred to the gentleman that it is quite peculiar that the ownership of the property is not available from any source?

Mr. ZIHLMAN. I did not quite get that question.

Mr. JOHNSON of Kentucky. It is quite strange that the ownership of the property is not disclosed either in the bill or in the report or from anything which the gentleman who is in charge of the bill is able to say about it.

Mr. ZIHLMAN. I do not think it is at all peculiar. The gentleman has had many years of experience in matters relating to the District of Columbia. He was chairman of the District of Columbia Committee, and he knows this is the form the commissioners used to send these bills up in.

Mr. JOHNSON of Kentucky. But I never knew during the time to which the gentleman has referred that neither the report nor whoever might be in charge of the bill was able to state where the ownership was.

Mr. ZIHLMAN. Well, the gentleman from Michigan made that very clear to the gentleman, I am sure, that title to the land will now be vested in the successors by law of the school commissioners of Washington County, this being part of Washington County, Md., before the Capital was located here. I will say to the gentleman I am free to confess, and I know he will understand, that I have not any very wide knowledge of the provisions of the bill, not being a member of the subcommittee which reported the bill. Mr. Chairman, I reserve the balance of my time and yield 10 minutes to the gentleman from Kentucky [Mr. JOHNSON].

Mr. JOHNSON of Kentucky. Mr. Chairman, I guess that the bill before us involves an amount of money too small to be quibbled about, but there are one or two other matters pertaining to the District of Columbia to which I wish to refer, and one is relative to an article which appeared in the Washington Post of May 7, 1922, which in part says, referring to the tourists' camp in Potomac Park—

> BEN JOHNSON of Kentucky opposed the item, and as he was a member of the conference committee this was to be expected. But Mr. JOHNSON let his imagination have full play when he told the House that it was designed "to build kitchens and bathhouses and shelter for the automobiles in one of the most beautiful parks in the city."

Mr. Chairman, I did not draw upon my imagination, as the Post would have Members of the House believe, for the purpose of discrediting anything and everything I say, but if anybody sufficiently interested in the matter, and particularly by the paper which made the false statement, will refer to the hearings before the House District Committee, December 29 last, it will find that Colonel Sherrill, who is in charge of those grounds, himself proposed almost in identical words the language used by me, which the Post says has grown out of my imagination. Colonel Sherrill's language can be found on pages 1236, 1237, and 1238 of that hearing.

Then, Mr. Chairman, in an editorial in the Washington Star shortly after the loan shark bill was up for consideration, this language was used:

> The verbal assault in the House upon Chairman William H. Baldwin, of the citizens' committee on remedial loans, elicits no sympathetic response in the Capitol community, but, on the contrary, arouses indignant resentment.

That statement was aimed at me. I challenge the veracity of the statement made in the editorial. The editorial says that my remarks assaulting Mr. Baldwin elicited no sympathetic response in the Capitol community, but on the contrary aroused indignation and resentment of the "Capital community." My remarks did not arouse any indignation or resentment on the part of the "Capital community" for the reason that the "Capital community" had not the remotest idea of what I said relative to Mr. Baldwin.

This paper which complains about my remarks relative to Mr. Baldwin did not give to the "Capital community" what I had said about Mr. Baldwin. Consequently, I say, the "Capital community" has no opinion as to what I said relative to Mr. Baldwin, because it has no information on the subject. It may not be out of place for me to say at this point that what I said about Mr. Baldwin was but a mere repetition of what he said about himself. When I undertook to state what Mr. Baldwin had said about himself and about those who were asso-

ciated with his lobbying in the interest of one loan bill and against another I cited the page of the hearings where everything that he had said about himself and those associated with him could be found.

Then one Mr. P. H. Marshall, who formerly was assistant corporation counsel, got into the papers by denying that I said that he was the assistant corporation counsel who participated in framing up a selfish prosecution against the pawnbroker, Mr. Horning. I was unwise enough to get into a newspaper controversy with anybody through the hostile local press. The local press wrote what Mr. Marshall said, but distorted and misrepresented what I said about Mr. Marshall's participation in that frame-up.

Mr. HERRICK. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. HERRICK. Did the gentleman ever see a metropolitan newspaper that did not misquote anybody who had anything of importance to say?

Mr. JOHNSON of Kentucky. I can only say that they have persisted in misrepresenting me. They have done so, not that it would accomplish anything except to, possibly, discredit me in this House, and I would not pay any sort of attention to what they do except to enable the House to understand the cause of the misrepresentations.

Mr. Marshall first disputed that he participated in the frame-up of the prosecution of Horning. Then, when he was pinned down on that, he shifted the issue and said that he was not one of the assistant corporation counsel at a certain other time, which had nothing whatever to do with the Horning matter. Then, in the Washington Evening Times one A. N. Jameson is credited with the following:

> Congressman BEN JOHNSON, of Bardstown, Ky., has kept his word. He is "getting even" with the District of Columbia.

The words "getting even" are in quotation marks, and therefore attributable to me. The one who wrote that drew entirely upon his own imagination. If it were at all necessary, I would be perfectly willing to call upon the Supreme Being even to witness the truth of what I say when I state that I never entertained any such thought throughout my career here; neither have I ever given any expression to any such thought. Therefore the man who wrote that drew most liberally upon an imagination and in doing so exhibited a lack of conscience.

I have no grievance against the people of the District of Columbia. Upon the contrary, I believe that I have done more for the masses of the people of the District of Columbia during the last 12 or 15 years than any man on the floor of this House. Right now the people of the District of Columbia are inflamed against what is known as amendment No. 1 to the District appropriation bill. They have been told that taxes are about to be heaped upon them to an unbearable extent. They have been told first one thing and then another about that amendment, except the truth. The truth of it, the meaning of its provisions, has never been told to the people of the District of Columbia, and at this hour I apprehend they are laboring under the impression that Congress is endeavoring to put upon them an unjust taxation, while Congress by that amendment is endeavoring to do nothing except to let the commissioners make their own estimates, to let them say whether their expenditures shall be much or little; and then it empowers, not Congress, but the commissioners themselves, to fix the rate of taxation upon the property in the District of Columbia for the purpose of meeting the amount that they need, whether that be much or little.

Mr. ZIHLMAN. Will the gentleman yield?

Mr. JOHNSON of Kentucky. I do.

Mr. ZIHLMAN. The amendment of which you speak, amendment No. 1, does seek to raise the assessable value of property here in the District of Columbia 50 per cent over existing——

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. ZIHLMAN. I yield to the gentleman 10 minutes additional.

It does seem to increase the assessable basis now existing 50 per cent, that is, raising the value from two-thirds to full value. Is not that correct?

Mr. JOHNSON of Kentucky. Under the present law property for taxation in the District of Columbia is being taxed at two-thirds of its value. The committee was unable to see the difference between taxing the property upon its two-thirds value and having a rate of taxation one-third smaller. The only difference that the committee could see in it was that it did not propose to sanction or to enact into law the provision which required that a dollar's worth of property should be assessed at less than a dollar.

Mr. ZIHLMAN. Does the gentleman know of any instance anywhere, where the assessable basis was raised, where it was not done with the intention of raising the amount of revenue to be derived? It necessarily follows that when your assessment is raised your tax rate is not lowered proportionately to the amount of the increase of assessment.

Mr. JOHNSON of Kentucky. It does not increase the amount to be paid a dollar or a penny.

Mr. ZIHLMAN. If the District Commissioners were to reduce the rate, which, as I recall it, is now $1.82——

Mr. JOHNSON. It was that last year.

Mr. ZIHLMAN. If they reduced that in proportion to the amount you increase the assessment, how long would it be before Congress in an appropriation bill would raise the rate of taxes to at least $1.50, as fixed in the act of 1878?

Mr. JOHNSON of Kentucky. It is my opinion that the Congress would not interfere with it at all as long as the rate of taxation was raising the money that the District of Columbia required to be raised for 60 per cent of its needs.

Mr. ZIHLMAN. Well, the District of Columbia is now raising sufficient money to meet its proportion of the District expenses under the existing basis and under the existing tax rate.

Mr. JOHNSON of Kentucky. I differ with the gentleman. It is doing nothing of the kind. Throughout 11 months of the year the District of Columbia is overdrawn in the Federal Treasury.

Mr. ZIHLMAN. I understand through the negligence or inefficiency of some committee years ago the taxes of the District of Columbia were made payable at the end of the taxation year instead of at the beginning, and now, as I understand it, you would set up a reserve fund to make them pay their taxes in advance.

Mr. JOHNSON of Kentucky. I differ with the gentleman as to the inefficiency of the committee.

Mr. ZIHLMAN. I did not say the inefficiency of your committee. The gentleman misunderstood me. I said that, due to the negligence or inefficiency of some committee years ago, it was provided so and so.

Mr. JOHNSON of Kentucky. Let me tell the gentleman this: Every day the gentleman reads in the local newspapers something about the act of 1878, the organic act, having been departed from, and they raise a hue and cry against this particular proposition because it is being departed from on an appropriation bill.

Let me tell the gentleman this, that under the sacred (?) "organic act" of 1878 all property in the District of Columbia was assessed at three-thirds of its value, but, by a rider on an appropriation bill, that was reduced to two-thirds, which correspondingly reduced the taxation, which was fixed at the rate of $1.50.

Mr. ZIHLMAN. Will the gentleman yield again?

Mr. JOHNSON of Kentucky. Yes.

Mr. ZIHLMAN. The gentleman just stated that that reduced the tax rate by reducing the taxable basis. Now you say that the assessment of real estate at three-thirds of its value will not increase the rate of taxation.

Mr. JOHNSON of Kentucky. I did, and I am perfectly consistent in it. There was then a fixed rate of taxation at $1.50. Now there is to be no fixed rate of taxation, but a variable one, to fit the needs of the District of Columbia as applied to the three-thirds valuation. If there was to be a fixed rate of taxation, then the statement of the gentleman would be correct, but as we are to have a variable rate of taxation the gentleman is incorrect.

But to pursue this further: The act of 1878, which is being paraded so constantly before Congress as so sacred, is almost beyond recognition, because of the amendments that have been put upon it by riders upon appropriation bills. At the time the act of 1878 was passed intangible personal property was taxed 15 mills just the same as real estate was taxed. By and by, by a rider on an appropriation bill, all tax was taken off intangible property, and only something like three years ago a tax was placed on intangible property at 4 mills. Then, again, by a rider on an appropriation bill, it was reduced to 3 mills, where it stands to-day.

The newspapers of Washington did not complain of that reduction; but now that Congress is to replace that, not in accordance with the act of 1878, the sacred instrument, the 15 mills, but instead only one-third of that, we hear a hue and cry go up that by a rider on an appropriation bill Congress is increasing the rate of taxation.

When the act of 1878, this sacred instrument, was passed, there was a tax on jewelry. By and by on an appropriation bill the tax was taken off jewelry, and the organic act once

more outraged. But no complaint was made. Every change of consequence that has been made in District legislation since 1878 has been made by a rider on an appropriation bill, and in nearly every case it has been brought about by the local lobby seeking less taxation; until now, if the methods which they themselves established as the correct practice for getting tax legislation in the District of Columbia do not suit them, they come and complain.

In 1878, when Congress agreed to pay half of the expenses of the government of the District of Columbia, a million and a quarter of dollars only were necessary, but now we have come to $23,000,000 or $24,000,000. Congress could well afford then to pay one-half of an appropriation of a million and a quarter dollars, let the taxation be what it would. They cared but little or nothing about it; but now, when we are appropriating $23,000,000 or more, it becomes a matter of interest to Congress. Congress must consider it, and it has considered it by reducing the proportion from 50–50 to 60–40, 60 per cent being paid by the District of Columbia and 40 per cent by the United States.

Only yesterday or the day before—I forget which it was—I saw an article in one of the local papers stating that $10,000,000 given by the Federal Government to the District of Columbia was only 10 cents per capita for the people of the United States.

Mr. LARSEN of Georgia. Will the gentleman yield right there?

Mr. JOHNSON of Kentucky. Yes.

Mr. LARSEN of Georgia. The gentleman is familiar with the property in the District of Columbia owned by the Federal Government, and I assume that he is also somewhat familiar with the property owned by individuals. In the gentleman's judgment, is the property of the Federal Government 40 per cent of the total amount of the property in the District of Columbia?

Mr. JOHNSON of Kentucky. The gentleman is in error when he says I know the value of the Federal property in the District of Columbia. I do not know the value of it, but I do know this, that except for the valuable property owned by the United States Government in the District of Columbia the rest of it would not have any value. Except for the enormous pay roll, this money factory run by the United States Government in the District of Columbia, the property here would be worth nothing. Transfer the capital to some other city, St. Louis, Chicago, or some place else, and values here would fall to pieces.

But what I was about to say when interrupted was that the article in the newspapers the day before yesterday stated that the people of the United States were gladly paying a per capita tax of 10 cents for the support of the government of the District of Columbia; and it further said that all the men, women, and children of the United States would be glad to pay a dollar a head. I should hate to start out to make a living or to get meat and bread by canvassing the United States on a commission plan, collecting a dollar a head out of the families in the United States to help pay the taxes of the people in the District of Columbia. I would starve to death in a week if I did not get something else from some other source. But I do hate to read day after day that the organic act of 1878 is so sacred, when it has been so mutilated at the instance of the local lobby, and that, too, by riders on appropriation bills, that you would not recognize the act of 1878, except that it makes one municipality of the entire District of Columbia.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. ZIHLMAN. Mr. Chairman, I ask that the bill be read for amendment.

The CHAIRMAN. The Clerk will report the bill for amendment.

The Clerk read the bill.

Mr. ZIHLMAN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose; and Mr. WALSH having resumed the chair as Speaker pro tempore, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill (H. R. 5020) to provide for the sale by the Commissioners of the District of Columbia of certain land in the District of Columbia acquired for a school site, and for other purposes, had directed him to report the same back to the House without amendment, and with the recommendation that the bill do pass.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 2919) to extend for the period of two years the provisions of Title II of the food control and the District of Columbia rents act, approved October 22, 1919, as amended.

LEAVE OF ABSENCE.

Mr. MCSWAIN, by unanimous consent, was given leave of absence for two days, on account of important business.

WITHDRAWAL OF PAPERS.

Mr. SCHALL, by unanimous consent, was given leave to withdraw from the files of the House, without leaving copies, papers in the case of Annie White (H. R. 7756), no adverse report having been made thereon.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed without amendment bill of the following title:

H. R. 10442. An act to amend an act entitled "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for these islands," approved August 29, 1916, as amended by an act to amend said act approved July 21, 1921.

The message also announced that the Senate had passed with amendment the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service, in which the concurrence of the House of Representatives was requested.

REGULATION OF PAWNBROKERS.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent that the bill (H. R. 6309) to regulate pawnbrokers, which has been before the House and is a part of the unfinished business from the District of Columbia Committee, be recommitted to the committee.

The SPEAKER pro tempore. The gentleman from Maryland asks unanimous consent that the unfinished business of the Committee on the District of Columbia pending before the House, H. R. 6309, be recommitted to the Committee on the District of Columbia. Is there objection?

There was no objection.

EXEMPTION FROM TAXATION OF PROPERTY OF DAUGHTERS OF AMERICAN REVOLUTION.

Mr. ZIHLMAN. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 6258) to exempt from taxation certain property of the Daughters of the American Revolution in Washington, D. C.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the bill of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 6258) to exempt from taxation certain property of the Daughters of the American Revolution in Washington, D. C.

Mr. ZIHLMAN. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. MILLSPAUGH].

Mr. MILLSPAUGH. Mr. Chairman, this bill is for the purpose of exempting from taxation some additional property which the Daughters of the American Revolution have acquired. Some years ago Memorial Hall and some other lots contiguous thereto were exempted from taxation because of the nature of the organization of the Daughters of the American Revolution. They acquired other lots on which there was a temporary building occupied by the Government. The Government has released that property, and the building has been removed, and the D. A. R. is to build an administration building there. The organization is not for profit in any manner whatever. It has allowed the use of its hall and other property for the use of organizations of a public nature. In fact, the disarmament conference was held there, and the officers of the organization removed their offices to the top floor and discommoded them-

selves to a great degree in order to permit the conference to be held there, refusing to accept any rent whatever and allowing a temporary floor to be placed there. The only thing the Government did was to remove the floor and replace the property in the condition it had been. They absolutely refused to accept any rent. Two or three conventions have been held under similar conditions. They cooperate very closely with the Smithsonian Institution and make their reports to them. For that reason the bill is presented to the House for passage. It has the unanimous indorsement of the District Committee.

Mr. STEVENSON. Will the gentleman yield to me?

Mr. ZIHLMAN. I will.

Mr. STEVENSON. I want to say that I am opposed to the bill. I do not wan the gentleman to yield to me under the impression that I am in favor of it.

Mr. ZIHLMAN. I yield to the gentleman 10 minutes.

Mr. STEVENSON. Mr. Chairman, I recognize the patriotic sentiments of the Daughters of the American Revolution. My wife belongs to it, and nearly all the female people of my connection belong to it. But it seems to me that it is going a little far when we begin to exempt from taxation—and you have already exempted valuable property there—when we begin to exempt property of a private society which does not come within the terms of the provision set forth in this exemption statute. The statute cited in this act is "every rectory, parsonage, glebe house, and pastoral residence which is occupied as a residence by the pastor, rector, minister, or rabbi, be exempt from taxation in the District of Columbia." This is not a religious society, it is not an educational society, it is a great club of people who are descended from people who were officers and soldiers in the Revolutionary War. It has a good many patriotic purposes, but why it should escape taxation any more than any other society of that kind I can not understand. It is not educational. The principal thing it does is to cultivate the study of American history in their local organizations all over the country, and their principal function here is to have the administration of all the work. Now, that is not an educational matter. It is relieving, probably, when they get the building built, half a million dollars worth of property in the District of Columbia from bearing its fair share of the burden of taxation. It seems to me we are becoming a little overpatriotic when we begin that kind of a thing. Now, reference is made to the fact that the peace conference was held in this building.

As I understand it, that building is already exempt. I am not making any kick about that. If they discharged a public duty, they have been getting hundreds of dollars of taxes off for years, and, therefore, they ought to be ready to discharge some patriotic functions. Now, however, they want to construct another expensive building and want to have that also exempted from taxation. I think, in justice to the people of the District of Columbia, who pay taxes to maintain the Government here, in justice to the people of the United States, who also pay taxes to maintain the Government here, that the people who own valuable property like this, who own it for purposes such as the Daughters of the American Revolution own it, ought to pay their just proportion of the taxes. When they come up and proclaim their patriotism and say, therefore, that they want to be exempted from taxation, I say the very request they make is a denial of the patriotism which they profess. The best evidence of a patriot in this country is the man who goes up manfully to the captain's desk and settles his taxes and helps to bear his proportion of the expenses of the Government. [Applause.] It does not sound good to have people on the ground of patriotism ask to be relieved of the one and unfailing evidence of patriotism, namely, to contribute their proportion to the maintenance of the Government.

Mr. LEHLBACH. Mr. Chairman, will the gentleman yield?

Mr. STEVENSON. Yes.

Mr. LEHLBACH. The title to this bill reads:

To exempt from taxation certain property of the Daughters of the American Revolution in Washington, D. C.

The first part of the one section of which the bill is composed provides for that, and then we find the following language:

So, also, shall every rectory, parsonage, glebe house, and pastoral residence which is occupied as a residence by the pastor, rector, minister, or rabbi be so exempt from taxation in the District of Columbia.

What has that to do with the purpose of the bill?

Mr. STEVENSON. As I understand it, that is citing the law now in existence.

Mr. LEHLBACH. But is not this new law, which I have just quoted?

Mr. STEVENSON. I understand that to be merely a citation of the act of 1877, that this shall be subject to, but I agree with the gentleman from New Jersey that it looks as though we are now enacting new law, to exempt that property, which is plainly exempt under all civilized governments. However, this property is not in that class, and I object to its being put in that class as far as I am concerned.

Mr. LEHLBACH. Mr. Chairman, will the gentleman from Maryland yield to me for a question?

Mr. ZIHLMAN. I shall be very glad to yield to the gentleman any time he desires.

Mr. LEHLBACH. This is not quoting or citing a provision of law to which this act shall be an amendment, is it? Is not this substantive legislation? The bill provides that the property shall be exempt from all taxation so long as the same is so occupied, and then goes on to provide that every rectory, parsonage, glebe house, and so forth, shall be also exempted from taxation in the District of Columbia.

Mr. MILLSPAUGH. This is simply a citation from the law of 1877. It might not be wise to leave it in there.

Mr. LEHLBACH. If it is simply a citation of law, it is meaningless.

Mr. MILLSPAUGH. It is meaningless, so far as that is concerned. The gentleman who introduced the bill, Mr. McFADDEN, is not here. I wrote the report.

Mr. LEHLBACH. What is the purpose of the language?

Mr. MILLSPAUGH. It is a citation, and has no effect, and could be stricken out without any question. It would do no harm to strike it out.

Mr. LEHLBACH. I can not see that it is a citation. It is perfectly meaningless unless it also exempts from taxation the rectory and other buildings mentioned there.

Mr. MILLSPAUGH. It does not.

Mr. LEHLBACH. Then it is meaningless in this bill.

Mr. MILLSPAUGH. It is.

Mr. ZIHLMAN. Mr. Chairman, I ask that the bill be read for amendment.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the property situated in square 173 in the city of Washington, D. C., described as lots 12, 13, 14, 15, and 16, inclusive, occupied by the Daughters of the American Revolution, be exempt from and after February 28, 1921, from all taxation so long as the same is so occupied and used, subject to the provisions of section 8 of the act approved March 3, 1877, providing for exemptions of church and school property, and acts amendatory thereof. So, also, shall every rectory, parsonage, glebe house, and pastoral residence which is occupied as a residence by the pastor, rector, minister, or rabbi be so exempt from taxation in the District of Columbia: *Provided*, That such rectory, parsonage, glebe house, or pastoral residence be owned by the church or congregation for which the said pastor, rector, minister, or rabbi officiates: *Provided further*, That not more than one such rectory, parsonage, glebe house, or pastoral residence shall be so exempt for any one congregation.

Mr. LEHLBACH. Mr. Chairman, I offer the following amendment: On page 2, line 3, after the word "thereof," strike out the remainder of the section.

The CHAIRMAN. The gentleman from New Jersey offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LEHLBACH: Page 2, line 3, after the word "thereof" strike out the remainder of the section.

Mr. ZIHLMAN. Mr. Chairman, the committee will be glad to accept that amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New Jersey.

The amendment was agreed to.

Mr. ZIHLMAN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House, with the amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and Mr. WALSH having resumed the chair as Speaker pro tempore, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 6258 and had directed him to report the same back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. ZIHLMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of District business.

The SPEAKER pro tempore. What is the particular bill? The Chair did not understand the gentleman's motion.

Mr. ZIHLMAN. A parliamentary inquiry, Mr. Speaker.

The SPEAKER pro tempore. The gentleman will state it.

Mr. ZIHLMAN. Is it in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of District business without specifying the bill?

The SPEAKER pro tempore. It is.

Mr. ZIHLMAN. I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of bills upon the calendar relating to the District of Columbia under the rule.

The question was taken, and the Speaker pro tempore announced the noes appeared to have it.

On a division demanded by (Mr. ZIHLMAN) there were—ayes 41, noes 1.

So the motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of District business, with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of District of Columbia business.

Mr. ZIHLMAN. Mr. Chairman, I call up the bill H. R. 10973.

The CHAIRMAN. The Chair is informed that the bill is on the Private Calendar and not on the Union Calendar.

AUTHORIZING THE WIDENING OF FIRST STREET NE.

Mr. ZIHLMAN. Mr. Chairman, I call up the bill H. R. 5018.

The CHAIRMAN. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 5018) to authorize the widening of First Street NE., and for other purposes.

Be it enacted, etc., That under and in accordance with the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia, within six months after the passage of this act the Commissioners of the District of Columbia be, and they are hereby, authorized and directed to institute in the Supreme Court of the District of Columbia a proceeding in rem to condemn the land that may be necessary for the widening of First Street NE., along the eastern boundaries of squares Nos. 675, 676, and 677, to a width of 60 feet, as shown on plan on file in the office of the Engineer Commissioner of the District of Columbia: *Provided, however*, That of the amount found to be due and awarded by the jury in said proceeding as damages for and in respect of the land to be condemned for said widening, plus the costs and expenses of the proceeding hereunder, not less than two-thirds thereof shall be assessed by the jury as benefits.

SEC. 2. That there is hereby authorized to be appropriated, out of the revenues of the District of Columbia, an amount sufficient to pay the necessary costs and expenses of the condemnation proceeding taken pursuant hereto and for the payment of amounts awarded as damages. The amounts assessed as benefits when collected shall be repaid to the District of Columbia and covered into the Treasury to the credit of the revenues of the District of Columbia.

SEC. 3. That the act approved June 11, 1910, entitled "An act authorizing the widening of First Street NE., in the District of Columbia," be, and the same is hereby, repealed, and the Commissioners of the District of Columbia are hereby authorized and directed to discontinue and abandon the proceeding heretofore instituted by them under said act for the widening of said First Street, now pending in the Supreme Court of the District of Columbia, and known as District court cause No. 922.

Mr. ZIHLMAN. Mr. Chairman——

Mr. BLANTON. Mr. Chairman, if the gentleman will yield, I just want to state to Members here who have asked me that I do not intend to ask any more roll calls, for if the Senate passes the bill it will pass the House anyway. My fight was to try to keep the Senate from passing it, and I desire to say for the benefit of the Members that I do not intend to ask for any more roll calls to-night.

Mr. MILLSPAUGH. If the gentleman will yield, for the benefit of my colleagues who have been nice to me, I want to make the same announcement—that there will be no quorum calls from me.

Mr. KNUTSON. That is mighty handsome.

The CHAIRMAN. The Clerk will report the bill for amendment.

The bill was read for amendment.

Mr. ZIHLMAN. Mr. Chairman, I move that the committee do now rise and report the bill to the House without amendment, with the recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose; and Mr. WALSH having resumed the chair as Speaker pro tempore, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill H. R. 5018 had directed him to report the same back to the House without amendment, with the recommendation that the bill do pass.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

ENROLLED BILLS SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 10329. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1923, and for other purposes;

H. R. 9951. An act to amend section 22 of an act approved February 14, 1920, entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes," for the fiscal year ending June 30, 1921; and

H. R. 11152. An act to authorize the Bear Mountain Hudson River Bridge Co. to construct and maintain a bridge across the Hudson River near the village of Peekskill, State of New York.

The SPEAKER pro tempore announced his signature to enrolled bill of the following title:

S. 2919. An act to extend for the period of two years the provisions of Title II of the food control and the District of Columbia rents act, approved October 22, 1919, as amended.

SENATE JOINT RESOLUTION REFERRED.

Under clause 2, Rule XXIV, Senate joint resolution of the following title was taken from the Speaker's table and referred to its appropriate committee as indicated below.

S. J. Res. 178. Joint resolution authorizing the Secretary of Labor to investigate and report on labor conditions in Cuba; to the Committee on Labor.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

Accordingly (at 7 o'clock and 16 minutes p. m.) the House adjourned until to-morrow, Tuesday, May 23, 1922, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. LUCE: Committee on the Library. S. J. Res. 194. A joint resolution providing for the filling of a vacancy in the Board of Regents of the Smithsonian Institution of the class other than Members of Congress; with an amendment (Rept. No. 1020.) Referred to the House Calendar.

Mr. MOORES of Indiana: Joint Select Committee on Disposition of Useless Executive Papers. Report No. 1022. A report on disposition of useless papers in the Department of Commerce. Ordered to be printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. UNDERHILL: Committee on Claims. H. R. 9432. A bill for the relief of the Old National Bank of Martinsburg, of Martinsburg, W. Va.; with amendments (Rept. No. 1021). Referred to the Committee of the Whole House.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. PRINGEY: A bill (H. R. 11728) to provide credit facilities for the preservation and development of the agricultural industry in the United States, and to create an agency therefor; to the Committee on Banking and Currency.

By Mr. ACKERMAN: A bill (H. R. 11729) to provide for the purchase of a site and the erection of a new public building at Summit, N. J.; to the Committee on Public Buildings and Grounds.

By Mr. STEENERSON: A bill (H. R. 11730) to amend the act entitled "An act to limit the immigration of aliens into the United States," approved May 19, 1921; to the Committee on Immigration and Naturalization.

By Mr. McDUFFIE: A bill (H. R. 11731) to provide for the renting of the first floor of the customhouse at Mobile, Ala., to the Mobile Chamber of Commerce; to the Committee on Public Buildings and Grounds.

By Mr. HUDDLESTON: A bill (H. R. 11732) to repeal section 15a of the interstate commerce act and to restore rates, fares, and charges authorized prior to increases effective August 26, 1920; to the Committee on Interstate and Foreign Commerce.

By Mr. COLTON (by request): A bill (H. R. 11733) to establish a standard decimal system of weights and measures for the United States; to the Committee on Coinage, Weights, and Measures.

By Mr. SLEMP: A bill (H. R. 11734) to establish a national park, to be known as the Appalachian National Park, near Norton, Va.; to the Committee on the Public Lands.

By Mr. SCHALL: A bill (H. R. 11735) to incorporate the United States Blind Veterans of the World War; to the Committee on the Judiciary.

By the SPEAKER (by request): Memorial of the Legislature of the State of Louisiana, regarding the radio station at Grand Island, La.; to the Committee on the Merchant Marine and Fisheries.

By Mr. SABATH: Memorial of the Legislature of the State of Kentucky, urging Congress to grant tax exemptions to those who suffered losses in 1920; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOWERS: A bill (H. R. 11736) granting an increase of pension to Lucretia Coffman; to the Committee on Invalid Pensions.

By Mr. BUTLER: A bill (H. R. 11737) granting a pension to Mary P. Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11738) for the relief of Maj. Russell B. Putnam; to the Committee on Naval Affairs.

By Mr. CABLE: A bill (H. R. 11739) granting a pension to Martha Arnold; to the Committee on Invalid Pensions.

By Mr. CONNALLY of Texas: A bill (H. R. 11740) providing for a preliminary examination of the Brazos River, Tex., with a view to the control of its floods; to the Committee on Interstate and Foreign Commerce.

By Mr. FESS: A bill (H. R. 11741) granting a pension to Margaret Davis; to the Committee on Invalid Pensions.

By Mr. GOULD: A bill (H. R. 11742) granting a pension to Delia Loveless; to the Committee on Invalid Pensions.

By Mr. GRIEST: A bill (H. R. 11743) granting an increase of pension to John Usner; to the Committee on Invalid Pensions.

By Mr. HAYDEN: A bill (H. R. 11744) authorizing the Secretary of War to cause a survey to be made of the Colorado River below Bulls Head Rock with a view of controlling the flood waters of said stream; to the Committee on Flood Control.

By Mr. HICKS: A bill (H. R. 11745) granting a pension to Anna R. Jackson; to the Committee on Invalid Pensions.

By Mr. JEFFERIS of Nebraska: A bill (H. R. 11746) for the relief of William Quinlan; to the Committee on the Public Lands.

By Mr. KAHN: A bill (H. R. 11747) granting an increase of pension to Eliza Hilbpisch; to the Committee on Pensions.

By Mr. KEARNS: A bill (H. R. 11748) granting a pension to Clyde Wardlow; to the Committee on Pensions.

By Mr. KLINE of Pennsylvania: A bill (H. R. 11749) granting a pension to Elizabeth Sowers; to the Committee on Invalid Pensions.

By Mr. LAMPERT: A bill (H. R. 11750) to make a preliminary survey of the Wolf and Fox Rivers, State of Wisconsin, with a view to the control of floods, and for other purposes; to the Committee on Flood Control.

By Mr. LINEBERGER: A bill (H. R. 11751) granting an increase of pension to Margaret Davy; to the Committee on Pensions.

By Mr. MOORE of Ohio: A bill (H. R. 11752) granting a pension to Eliza C. Maher; to the Committee on Invalid Pensions.

By Mr. MORGAN: A bill (H. R. 11753) granting a pension to Huldah E. Hall; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 11754) granting an increase of pension to Permelia McDonald; to the Committee on Invalid Pensions.

By Mr. RAMSEYER: A bill (H. R. 11755) granting a pension to Amanda Jordan; to the Committee on Invalid Pensions.

By Mr. RYAN: A bill (H. R. 11756) granting relief and hospitalization to Thomas Murphy; to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH of Michigan: A bill (H. R. 11757) granting a pension to Alice Loree; to the Committee on Invalid Pensions.

By Mr. SLEMP: A bill (H. R. 11758) for the relief of Edward F. Murphy; to the Committee on Claims.

By Mr. THOMPSON: A bill (H. R. 11759) granting a pension to Catherine Swigart; to the Committee on Pensions.

By Mr. VARE: A bill (H. R. 11760) granting a pension to Maggie Vile; to the Committee on Invalid Pensions.

By Mr. WILLIAMS of Illinois: A bill (H. R. 11761) granting an increase of pension to Mary E. Sutton; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5708. By the SPEAKER (by request): Resolution adopted by the Montana Development Association, urging the adoption of the Smith-McNary reclamation bill, with certain amendments added; to the Committee on Irrigation of Arid Lands.

5709. By Mr. ANSORGE: Petition of General Funston Camp, No. 23, New York, favoring House bill 11338; to the Committee on Reform in the Civil Service.

5710. Also, petition of the Physical Culture Corporation, New York City, urging relief of taxation on second-class postage rate; to the Committee on the Post Office and Post Roads.

5711. By Mr. BARBOUR: Petition of the Grand Chapter of Royal Arch Masons of the State of California, indorsing the Towner-Sterling educational bill; to the Committee on Education.

5712. By Mr. CLAGUE: Petition of the Presbytery of Mankato, of the Presbyterian Church in the United States of America, at the city of Edgerton, State of Minnesota, for the early consideration and passage of Senate Joint Resolution 31, to enact uniform laws on the subject of marriage and divorce, and House Joint Resolution 131, prohibiting polygamy and polygamous cohabitation in the United States; to the Committee on the Judiciary.

5713. Also, petition of the Presbytery of Mankato, Minn., of the Presbyterian Church in the United States of America, at the city of Edgerton, State of Minnesota, urging the early consideration and passage by Congress of House bill 9753, to secure Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia.

5714. Also, petition of numerous citizens of St. Paul, Minn., for the support of the Voigt bill, to prohibit the manufacture of imitation or so-called filled milk; to the Committee on Agriculture.

5715. By Mr. FAUST: Petition of many citizens of Parkville, Mo., in behalf of the speedy passage of the Towner-Sterling bill; to the Committee on Education.

5716. By Mr. HAYS: Petition of F. J. Page and 141 other citizens of Ripley County, Mo., requesting the passage of House bill 7213, introduced by Mr. MORGAN, granting increases in pension to Civil War veterans and their widows; to the Committee on Invalid Pensions.

5717. By Mr. KENNEDY: Petition of 51 citizens of Pawtucket, R. I., favoring passage of the Fish resolution, pertaining to establishment of a national Jewish homeland in Palestine; also resolution adopted by the congregation of Ohave Shalom, Pawtucket, R. I., urging passage of the Fish resolution; to the Committee on Foreign Affairs.

5718. By Mr. KISSEL: Petition of the Grain Trade Association of San Francisco Chamber of Commerce, San Francisco, relative to light wines and beer; to the Committee on the Judiciary.

5719. Also, petition of J. C. Francesconi & Co., New York City, N. Y., relative to the pending tariff bill, H. R. 7456; to the Committee on Ways and Means.

5720. By Mr. KNUTSON: Petition of sundry citizens of the State of Minnesota, opposing the passage of House bill 4388; to the Committee on the District of Columbia.

5721. By Mr. RAKER: Petition of Mr. P. A. Bacon, Mrs. Williams, Mrs. Clara V. Simonson, Rev. F. T. Griffith, A. E. Middleton, Mrs. Edith M. Adkins, William C. O'Neale, Mrs. Emma W. Anderson, J. A. Rutherford, G. C. West, Lucy Thormaiaes, Mrs. Katherine J. Fenton, Arthur Halsted, Julia M. Booth, Mabel C. Hawes, and H. L. Wilson, all of Washington, D. C., favoring the extension of the Ball rent act, and petition of Capt. A. F. Enquist, of Washington, D. C., protesting against the extension of the Ball rent act; to the Committee on the District of Columbia.

5722. Also, petition of N. L. Biehl, of Los Angeles, Calif., protesting against paragraph 1116 of the tariff bill, H. R. 7456; petition of Wisconsin Hemp Order, of Madison, Wis., relative to the duty on hemp; and resolution of the Legislature of the State

of Kentucky relative to the farmers and planters of this country who lost money in 1920; to the Committee on Ways and Means.

5723. Also, petition of William McConnell, city prosecutor, and J. Friedlander, assistant city prosecutor, city of Los Angeles, Calif., urging continuation of the appropriation for the Interdepartmental Social Hygiene Board; to the Committee on Appropriations.

5724. Also, petition of A. C. Denny, secretary of Upper Valley Grange No. 389, of Etna Mills, Calif., relative to the Federal Farm Loan Board and Federal land banks; to the Committee on Banking and Currency.

5725. Also, petition of Mrs. Arvilla Gardner, of Sacramento, Calif., urging the early passage of the Bursum and Morgan pension bills; to the Committee on Military affairs.

5726. By Mr. ROSENBLOOM: Resolution adopted by the Presbytery of Grafton, at Mannington, W. Va., indorsing House bill 9753, to secure Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia.

5727. Also, resolution adopted by the Presbytery of Grafton, at Mannington, W. Va., indorsing House Joint Resolution 131, relative to prohibiting polygamy and polygamous marriages, and also Senate Joint Resolution 31, relative to regulating the subject of marriage and divorce; to the Committee on the Judiciary.

5728. By Mr. RYAN: Petition of Edward D. Marshall and several hundred others, of New York City, ex-soldiers and ex-sailors of the World War, and other citizens of the United States, urging the passage of House bill 10890, adjusted compensation for veterans of the World War; to the Committee on Ways and Means.

5729. Also, petition of George W. Lewis and several hundred other ex-soldiers and ex-sailors of the World War, and other citizens of the United States, urging the passage of the bonus bill, H. R. 10890; to the Committee on Ways and Means.

5730. By Mr. SABATH: Petition of the Fraternal Order of Eagles No. 769, of Homestead, Pa., requesting modification of the present laws to permit the sale of light wines and beer; to the Committee on the Judiciary.

5731. Also, resolution of the International Association of Fire Fighters, favoring the modification of the national prohibition act to permit the manufacture and sale of beer and wine; to the Committee on the Judiciary.

5732. By Mr. SANDERS of New York: Petition of the Medina Automobile Club, of Medina, N. Y., through its president, L. J. Skinner, protesting against the passage of House bill 11251; to the Committee on Ways and Means.

5733. By Mr. WOODYARD: Memorial of the Huntington Chamber of Commerce, Huntington, W. Va., indorsing the fundamental principles of ship subsidy as embodied in the shipping act of 1922; to the Committee on the Merchant Marine and Fisheries.

SENATE.

TUESDAY, *May 23, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	Myers	Smoot
Ball	Glass	Nelson	Stanley
Borah	Gooding	Newberry	Sterling
Brandegee	Hale	Nicholson	Sutherland
Broussard	Harris	Oddie	Townsend
Bursum	Harrison	Overman	Underwood
Capper	Johnson	Page	Wadsworth
Colt	Jones, N. Mex.	Pepper	Walsh, Mass.
Culberson	Jones, Wash.	Phipps	Walsh, Mont.
Curtis	Kellogg	Pittman	Warren
Dial	Ladd	Poindexter	Watson, Ga.
Edge	Lodge	Ransdell	Williams
Elkins	McCumber	Rawson	Willis
Ernst	McLean	Robinson	
Fletcher	McNary	Sheppard	
France	Moses	Simmons	

Mr. LADD. I was requested to announce that the Senator from Nebraska [Mr. NORRIS], the Senator from Alabama [Mr. HEFLIN], and the Senator from Wyoming [Mr. KENDRICK] are detained at a hearing before the Committee on Agriculture and Forestry.

The VICE PRESIDENT. Sixty-one Senators having answered to their names, a quorum is present.

ACCOUNTS OF CHARLES B. STRECKER (S. DOC. NO. 203).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a draft of proposed bill authorizing an appropriation of $15,956 to be made, being the balance due the United States and remaining unadjusted in the accounts of the Treasurer of the United States and of Charles B. Strecker, former Assistant Treasurer of the United States at Boston, Mass., upon the discontinuance of the subtreasury at Boston on October 25, 1920, which was referred to the Committee on Appropriations and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 5018. An act to authorize the widening of First Street NE., and for other purposes;

H. R. 5020. An act to provide for the sale by the Commissioners of the District of Columbia of certain land in the District of Columbia acquired for a school site, and for other purposes; and

H. R. 6258. An act to exempt from taxation certain property of the Daughters of the American Revolution in Washington, D. C.

PETITIONS AND MEMORIALS.

Mr. TOWNSEND presented a resolution of the Michigan Automotive Trade Association, protesting against the enactment of legislation for the Federal taxation and registration of motor vehicles, which was referred to the Committee on Interstate Commerce.

He also presented a resolution of the Michigan Automotive Trade Association, favoring the passage of the so-called McNary-Smith cooperative reclamation bill, which was referred to the Committee on Irrigation and Reclamation.

He also presented a resolution of the Michigan Automotive Trade Association, favoring the construction of the Great Lakes-St. Lawrence waterway for ocean-going vessels, which was referred to the Committee on Commerce.

He also presented petitions of sundry citizens of Croswell, Yale, Melvin, Elkton, Pigeon, Bad Axe, Filion, North Branch, Almont, Dryden, Swartz Creek, Durand, and Vernon, all in the State of Michigan, praying for the imposition in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, which were referred to the Committee on Finance.

Mr. JONES of Washington presented petitions of sundry citizens of the State of Washington, praying that only a moderate duty on kid gloves be imposed in the pending tariff bill, which were ordered to lie on the table.

Mr. JONES of Washington. I ask unanimous consent to have printed in the RECORD a telegram which I have received from several Republican papers in my State, protesting against the failure of Congress to pass the proposed reclamation act.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

YAKIMA, WASH., *May 20, 1922.*

WESLEY L. JONES, *Washington, D. C.:*

Following a meeting here to-day of the Yakima-Benton-Kittitas group of the Washington State Press Association, Republican members of the group adopted the following resolution:

"Whereas the Republican Party in the last national campaign gave to the voters of the Nation its pledge to put into operation a speeded-up and enlarged program of reclamation; and

"Whereas the McNary-Smith bill, now pending in Congress, was framed as a fulfillment of that pledge and as such has received the official sanction of the administration; and

"Whereas said McNary-Smith bill has been unanimously recommended for passage by committees in both Houses of Congress; and

"Whereas enactment of said McNary-Smith bill will stimulate business and industry, relieve unemployment, contribute materially to the Nation's wealth, and inure to the special benefit of the returned soldiery without prejudice or preference to any project, section, or district of the unreclaimed areas of the Nation: Now therefore be it

Resolved by the following Republican newspaper publishers of the State of Washington, That failure of the Republican majority in Congress to pass the said McNary-Smith bill at the present session will be regarded by us as an inexcusable breach of faith on the part of the national Republican Party, and we hereby declare that we no longer consider ourselves either by reason of our past affiliations or the party's future promises bound to continue our support of the national Republican Party."

Republican newspapers represented at to-day's meeting were Ellensburg Record, Sunnyside Sun, Grandview Herald, Wapato Independent, Toppenish Review, Toppenish Tribune, Kennewick Courier-Reporter, Zillah Mirror, Richland Advocate, Prosser Record-Bulletin.

Mr. NELSON presented a resolution adopted by the Minnesota Tax Conference at Minneapolis, Minn., favoring the passage of House bill 9579, to amend section 5219 of the Revised Statutes of the United States, relative to taxation of national

banking associations, which was referred to the Committee on Banking and Currency.

He also presented memorials of sundry citizens of Bemidji, Minn., remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. CAPPER presented resolutions of the Central Parent-Teachers' Association, the Maccochaque Parent-Teachers' Association, the Western Highlands Study Club, and the Council of Clubs, all of Kansas City, Kans., favoring the enactment of legislation creating a department of education, which were referred to the Committee on Education and Labor.

Mr. WILLIS presented the petition of Mrs. S. S. Kelly and sundry other citizens of Cincinnati, Ohio, praying that only a moderate duty be imposed in the pending tariff bill on kid gloves, which was referred to the Committee on Finance.

He also presented the petition of G. W. Hoffer and sundry other citizens of Metamora and vicinity, in the State of Ohio, praying for the imposition in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, which was referred to the Committee on Finance.

Mr. SHORTRIDGE presented a resolution adopted by the Los Angeles Presbytery of the Presbyterian Church, at Long Beach, Calif., favoring an amendment to the Constitution providing for uniform marriage and divorce laws, which was referred to the Committee on the Judiciary.

He also presented a resolution adopted at the annual meeting of the Woman's Christian Temperance Union of Orange County, Calif., protesting against any weakening amendment to the so-called Volstead Act, which was referred to the Committee on the Judiciary.

He also presented resolutions adopted by the conference of the International Association of Fire Fighters, favoring the legalizing of the manufacture and sale of beers and light wines, the establishment of peace at home and abroad and granting to small nations the right of self-government, the restoration of the liberties of the people and the release of political and war prisoners, and the reduction of appropriations for war purposes, which were referred to the Committee on the Judiciary.

He also presented resolutions adopted by Berkeley Post, No. 7, American Legion, of Berkeley, Calif., commending the President of the United States in refusing clemency to political prisoners and protesting against reducing the strength of the military and naval forces of the United States, which were referred to the Committee on the Judiciary.

He also presented a resolution of the board of directors of the Sacramento (Calif.) Chamber of Commerce, protesting against any present change in the transportation act of 1920, which was referred to the Committee on Interstate Commerce.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WILLIS:

A bill (S. 3634) granting a pension to William Croft (with accompanying papers); to the Committee on Pensions.

By Mr. SHORTRIDGE:

A bill (S. 3635) for the relief of John R. Scupham; to the Committee on Claims.

A bill (S. 3636) authorizing the appointment of Leland C. McAuley to be a captain in the Air Service, United States Army; to the Committee on Military Affairs.

By Mr. ASHURST:

A bill (S. 3637) to establish an agricultural experiment station at Fort Mohave, in the county of Mohave, Ariz.; to the Committee on Agriculture and Forestry.

By Mr. McKINLEY:

A bill (S. 3638) to abolish the office of Superintendent of the Library Building and Grounds and to transfer the duties thereof to the Architect of the Capitol and the Librarian of Congress; to the Committee on the Library.

By Mr. CAPPER:

A bill (S. 3639) to provide credit facilities for the orderly marketing of agricultural products, and for the preservation and development of the live-stock industry of the United States; to amend the Federal reserve act; to extend and stabilize the market for United States bonds and other securities; to extend the powers of the Federal Farm Loan Board created by the farm loan act; to provide fiscal agents for the United States and for the War Finance Corporation; and for other purposes; to the Committee on Banking and Currency.

TARIFF BILL AMENDMENTS.

Mr. STERLING submitted two amendments intended to be proposed by him to House bill 7456, the tariff bill, which were ordered to lie on the table and to be printed.

Mr. McNARY submitted an amendment intended to be proposed by him to House bill 7456, the tariff bill, which was referred to the Committee on Finance and ordered to be printed.

Mr. POINDEXTER submitted two amendments intended to be proposed by him to House bill 7456, the tariff bill, which were ordered to lie on the table and to be printed.

LAND OFFICES IN NORTH DAKOTA.

Mr. McCUMBER submitted an amendment intended to be proposed by him to the bill (S. 3425) to continue the land offices at Belle Fourche, Timber Lake, and Lemmon, in the State of South Dakota, and for other purposes, which was ordered to lie on the table and to be printed.

LIBERIAN LOAN.

Mr. LODGE. I ask that the joint resolution from the House referring to the Liberian credit, which was put over because of my absence, may be referred to the Committee on Finance. It clearly ought to go to that committee, which has charge of all credits, and I ask that it be now so referred.

There being no objection, the joint resolution (H. J. Res. 270) authorizing the Secretary of the Treasury to establish a credit with the United States for the Government of Liberia was taken from the table and referred to the Committee on Finance.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on the District of Columbia:

H. R. 5018. An act to authorize the widening of First Street NE., and for other purposes;

H. R. 5020. An act to provide for the sale by the Commissioners of the District of Columbia of certain land in the District of Columbia acquired for a school site, and for other purposes; and

H. R. 6258. An act to exempt from taxation certain property of the Daughters of the American Revolution in Washington, D. C.

AMENDMENT OF WAREHOUSE ACT.

Mr. HARRIS. Mr. President, I ask unanimous consent for the present consideration of Senate bill 3220, which has been reported from the Committee on Agriculture and Forestry. I have discussed the proposed substitute bill with the Senator from Oregon [Mr. McNARY], one of the ablest lawyers in the Senate and a member of the Committee on Agriculture and Forestry. A number of other Senators have examined it, and all favor it. The Secretary of Agriculture requests the proposed changes, and the amendments in the bill were prepared by department officials. He recommends that the changes be made in the bill as reported and states that the amendments suggested are the result of experience in the administration of the act by the division in the Bureau of Markets. I will place his letter in the RECORD, showing the reasons for the change. There will be no objection, I am sure, on the part of any Senator who will examine it. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. The typewritten bill, sent to the desk by the Senator from Georgia, is not identical with the original bill?

Mr. HARRIS. It is the original bill with other amendments suggested by the Department of Agriculture. I ask that it be substituted for the original bill.

The VICE PRESIDENT. The bill will be reported for the information of the Senate.

The ASSISTANT SECRETARY. A bill (S. 3220) to amend section 2 of the United States warehouse act, approved August 11, 1916. The Senator from Georgia reports from the Committee on Agriculture and Forestry a substitute to strike out all after the enacting clause and insert.

Mr. SMOOT. The original bill was reported from that committee?

Mr. HARRIS. This is the bill reported from the Committee on Agriculture and Forestry. I am offering other amendments to the bill, all of which were prepared by the officials of the Department of Agriculture having charge of the administration of the act, and they have the approval of the Secretary of Agriculture, one of the best men who has ever occupied that position. The amendments, if adopted, will add to the security of persons making loans in these warehouses and also add to the security of farmers storing their agricultural products.

Mr. SMOOT. I want to know whether the proposed amendment offered by the Senator has been acted upon by the committee and whether he is authorized to report it as a substitute for the original bill now on the calendar.

Mr. HARRIS. The original bill was recommended by the Committee on Agriculture and Forestry, but related only to the matter of the products designated by the Secretary of Agri-

culture. The substitute I offer contains some other amendments which the Secretary of Agriculture asked me to offer when the bill was referred to him by the committee. The bill I have sent to the desk embraces all amendments, and I ask that it be substituted for the bill previously offered.

Mr. SMOOT. Do I understand that the Committee on Agriculture and Forestry has agreed to and authorized the Senator to offer these amendments, or is he offering them on his own account?

Mr. HARRIS. The Department of Agriculture approved the first amendment which I offered, allowing the Secretary of Agriculture to designate the agricultural products to be stored in a warehouse instead of naming them in the bill and limiting to a few products. The other amendments were all offered on the request of the Department of Agriculture.

Mr. SMOOT. The Secretary of Agriculture may ask it, but I think the committee had better act upon it before the Senate considers it.

Mr. PITTMAN. Mr. President, let me see if I understand the situation. There is a bill which has been reported from the committee and which is now on the calendar.

Mr. HARRIS. That is true.

Mr. PITTMAN. That bill has certain amendments put in it by the Committee on Agriculture and Forestry.

Mr. HARRIS. The bill was reported without amendment, but the committee agrees to the principal amendment.

Mr. PITTMAN. The Senator from Georgia is now asking unanimous consent to take up that bill, and that consent has been granted.

Mr. SMOOT. No; it has not been granted.

Mr. PITTMAN. I assumed that it had been granted.

Mr. SMOOT. Not yet.

Mr. PITTMAN. If it is granted and the bill is brought up for consideration, the Senator from Georgia is going to offer an amendment in the nature of a substitute.

Mr. SMOOT. The Senator from Nevada stated it just as I understand it, and as I stated it, but I went further than the Senator from Nevada, and asked the Senator from Georgia if the amendment had been approved by the Committee on Agriculture and Forestry.

Mr. PITTMAN. There are evidently some amendments in the substitute which the committee have not approved.

Mr. HARRIS. Some have and some have not been approved by the committee. At the request of the Senator from Utah I had the Senator from Oregon [Mr. MCNARY] go into the matter thoroughly. He approves all amendments and says they will strengthen the act. The Bureau of Markets, which has the administration of the measure, through the Secretary of Agriculture, requests that it shall be amended this way. The Government can lose nothing by these amendments; it issues a license and places warehousemen under bond; but it strengthens the act and affords the farmer—wool and tobacco growers—better protection, enabling them to get cheaper insurance, lower rates of interest on money borrowed, because the man who loans money on the products has a guarantee that the products on which he makes a loan are stable, in good condition, and the warehouseman's bond protects them.

Mr. SMOOT. I thought, of course, when the Senator spoke to me about it that these amendments had been approved by the committee. Therefore, I asked the Senator at the time to discuss the matter with the Senator from Oregon, who is a member of the committee and who was in the Chamber at the time.

Mr. HARRIS. Mr. President, in order to save the time of the Senate, I wonder if the Senator from Utah would not let this bill go through and let me place in the RECORD the reasons set forth by the Agricultural Department for the changes proposed, and to-morrow, if he objects to any of them, we can reconsider the vote by which the bill was passed and send it back to the committee. If he will agree to do that, I think it will save time, and I am sure no Senator will object to any of the changes proposed.

Mr. SMOOT. Of course, I do not know what they are.

Mr. HARRIS. One is to provide for licensing samplers in warehouses to ascertain values of products and insure a correct statement as to the condition of the products in a warehouse. It is designed to guarantee the man who lends the money on the products that the goods on which he makes the loan are not only in the warehouse and graded or classed so as to know the value, but that they are in good condition. Further, it is to place a penalty on the warehouseman if he fails to do his duty.

Mr. SMOOT. Is the Government responsible?

Mr. HARRIS. No. The Government licenses the warehouse. The warehouseman is under bond. If he makes a statement as to commodities in the warehouse which is untrue, or if he allows to go out of the warehouse goods on which there is a mortgage, this bill will make him liable, and the penalties will make him careful about everything pertaining to the products stored—weights, condition, etc.

Mr. UNDERWOOD. Mr. President, I hope the Senator from Utah, unless there be some grave cause, will allow the bill to go through. We have adopted the policy of allowing some uncontested measures to be acted upon, and it seems to me that policy should be followed in this instance.

Mr. SMOOT. It is not a question of not allowing it to be acted upon, but it seems to me that it involves a more or less serious question; and I really do not know, from what the Senator from Georgia has said, whether the Government of the United States is to be responsible in case the goods shall be removed from the warehouse.

Mr. HARRIS. The Government of the United States is not responsible. The bill is designed to make the warehouseman more particular about the goods in the Government warehouse. He is licensed to take charge of the goods in the warehouse. The bill will protect the man who lends money on farm products, and it will protect the farmer who places his products in the warehouse. Its enactment is requested because of the experience of the Agricultural Department in connection with Government warehouses in the past.

Mr. SMOOT. Who is going to lend the money on the products—the Government or the banks?

Mr. HARRIS. The banks; the Government has nothing to do with it. It simply gives a license to the warehouseman, places him under bond, and makes it a penalty for him to issue false receipts, dispose of, or damage agricultural products stored in the warehouse.

Mr. SMOOT. That is what I wanted to be sure of.

Mr. HARRIS. The bill does not impose any additional obligations on the Government.

Mr. UNDERWOOD. As I understand the proposition, some years ago we passed a Government warehouse bill, authorizing the Government to license warehouses. Whether that was right or wrong, that is the law; it is an established fact. Now, as I understand, the bill of the Senator from Georgia has the approval of the Secretary of Agriculture and of the chairman of the Agricultural Committee, even as to the amendment proposed. It is merely designed to impose such requirements as will better protect the warehouse certificate, so that the bank that lends the money may feel that it has better security than it has under existing law. That is all there is in the measure, and at this time it will be very useful. I hope the Senator will allow it to go through.

Mr. SMOOT. Mr. President, on the statement of the Senator from Georgia, I have no objection to having the bill considered now, but, after the proceedings are published in the RECORD and I understand more clearly what it involves, if I think it ought to be reconsidered I shall expect the Senator from Georgia not to object to its reconsideration.

Mr. HARRIS. Not at all; I shall be very glad to have the Senator, in that event, ask for its reconsideration.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3220) to amend section 2 of the United States warehouse act, approved August 11, 1916.

Mr. HARRIS. I offer to the bill the amendment in the nature of a substitute which I have sent to the desk.

The VICE PRESIDENT. The amendment proposed by the Senator from Georgia will be stated.

The READING CLERK. It is proposed to strike out all after the enacting clause and insert:

That section 2 of the United States warehouse act, approved August 11, 1916, is amended to read as follows:

"SEC. 2. That the term 'warehouse' as used in this act shall be deemed to mean every building, structure, or other protected inclosure in which any agricultural product is or may be stored for interstate or foreign commerce, or, if located within any place under the exclusive jurisdiction of the United States, in which any agricultural product is or may be stored. As used in this act 'person' includes a corporation or partnership or two or more persons having a joint or common interest; 'warehouseman' means a person lawfully engaged in the business of storing agricultural products; and 'receipt' means a warehouse receipt."

That section 5 of the United States warehouse act, approved August 11, 1916, is amended to read as follows:

"SEC. 5. That each license issued under sections 4 and 9 of this act shall terminate as therein provided, or in accordance with the terms of this act and the regulations thereunder, and may from time to time be modified or extended by a written instrument."

That section 11 of the United States warehouse act, approved August 11, 1916, is amended to read as follows:

"SEC. 11. That the Secretary of Agriculture may, upon presentation of satisfactory proof of competency, issue to any person a license to inspect, sample, or classify any agricultural product or products, stored

or to be stored in a warehouse licensed under this act, according to condition, grade, or otherwise, and to certificate the condition, grade, or other class thereof, or to weigh the same and certificate the weight thereof, or both to inspect, sample, or classify and weigh the same and to certificate the condition, grade, or other class and the weight thereof, upon condition that such person agree to comply with and abide by the terms of this act and of the rules and regulations prescribed hereunder so far as the same relate to him."

That section 12 of the United States warehouse act, approved August 11, 1916, is amended to read as follows:

"SEC. 12. That any license issued to any person to inspect, sample, or classify or to weigh any agricultural product or products under this act may be suspended or revoked by the Secretary of Agriculture whenever he is satisfied, after opportunity afforded to the licensee concerned for a hearing, that such licensee has failed to inspect, sample, or classify or to weigh any agricultural product or products correctly, or has violated any of the provisions of this act or of the rules and regulations prescribed hereunder, so far as the same may relate to him, or that he has used his license or allowed it to be used for any improper purpose whatever. Pending investigation, the Secretary of Agriculture, whenever he deems necessary, may suspend a license temporarily without hearing."

That section 15 of the United States warehouse act, approved August 11, 1916, is amended to read as follows:

SEC. 15. That any fundible agricultural product stored for interstate or foreign commerce, or in any place under the exclusive jurisdiction of the United States, in a warehouse licensed under this act shall be inspected and graded by a person duly licensed to grade the same under this act."

That section 19 of the United States warehouse act, approved August 11, 1916, is amended to read as follows:

"SEC. 19. That the Secretary of Agriculture is authorized, from time to time, to establish and promulgate standards for agricultural products by which their quality or value may be judged or determined: *Provided*, That the standards for any agricultural products which have been, or which in future may be, established by or under authority of any other act of Congress shall be, and are hereby, adopted for the purposes of this act as the official standards of the United States for the agricultural products to which they relate."

That section 29 of the United States warehouse act, approved August 11, 1916, is amended to read as follows:

"SEC. 29. That nothing in this act shall be construed to conflict with, or to authorize any conflict with, or in any way to impair or limit the effect or operation of the laws of any State relating to warehouses, warehousemen, weighers, graders, inspectors, samplers, or classifiers; but the Secretary of Agriculture is authorized to cooperate with such officials as are charged with the enforcement of such State laws in such States and through such cooperation to secure the enforcement of the provisions of this act; nor shall this act be construed so as to limit the operation of any statute of the United States relating to warehouses or warehousemen, weighers, graders, inspectors, samplers, or classifiers now in force in the District of Columbia or in any Territory or other place under the exclusive jurisdiction of the United States."

That section 30 of the United States warehouse act, approved August 11, 1916, is amended to read as follows:

"SEC. 30. That every person who shall forge, alter, counterfeit, simulate, or falsely represent, or shall without proper authority use, any license issued by the Secretary of Agriculture under this act, or who shall violate or fail to comply with any provision of section 8 of this act, or who shall issue or utter a false or fraudulent receipt or certificate, or any person who, without lawful authority, shall convert to his own use, or use for purposes of securing a loan, or remove from a licensed warehouse contrary to this act or the regulations promulgated thereunder, any agricultural products stored or to be stored in such warehouse and for which licensed receipts have been or are to be issued, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not more than $10,000 or double the value of the products involved if such double value exceeds $10,000, or imprisoned not more than one year, or both, in the discretion of the court, and the owner of the agricultural products so converted, used, or removed may, in the discretion of the Secretary of Agriculture, be reimbursed for the value thereof out of any fine collected hereunder, by check drawn on the Treasury at the direction of the Secretary of Agriculture, for the value of such product to the extent that such owner has not otherwise been reimbursed. That any person who shall draw with intent to deceive a false sample of, or who shall willfully mutilate or falsely represent a sample drawn under this act, or who shall classify, grade, or weigh fraudulently any agricultural products stored or to be stored under the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof fined not more than $500 or imprisoned for not more than six months, or both, in the discretion of the court."

During the reading of the amendment,

Mr. PITTMAN. Mr. President, I rise to a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state his parliamentary inquiry.

Mr. PITTMAN. Is the Secretary now reading the proposed amendment or is he reading the original bill?

Mr. HARRIS. He is reading the amendment submitted by me in the nature of a substitute.

Mr. PITTMAN. Has the original bill been read? I should like to have the bill read first, in order to ascertain what it is the amendment is directed to.

Mr. HARRIS. It is an amendment to the Government warehouse act.

The VICE PRESIDENT. It is Senate bill 3220, which, of course, has been printed.

Mr. PITTMAN. I understand what Senate bill 3220 is; I have it before me, but I should like to know whether Senate bill 3220 is incorporated in the proposed amendment?

Mr. HARRIS. It is.

Mr. PITTMAN. Entirely?

Mr. HARRIS. Entirely.

After the conclusion of the reading of the amendment,

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend sections 2, 5, 11, 12, 15, 19, 29, and 30 of the United States warehouse act, approved August 11, 1916."

Mr. HARRIS. Mr. President, I ask permission to place in the RECORD a letter from the Secretary of Agriculture in regard to the measure just passed, to which I previously referred, together with the accompanying memorandum of amendments requested by the department, which are the only amendments to the bill except the original amendment which I described, and which was the first to be considered. I ask permission also to have printed in the RECORD a statement which I have prepared of the benefits which will come to the warehouses which have been and will be licensed under the bill.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, May 13, 1922.

Hon. WILLIAM J. HARRIS,
United States Senate.

DEAR SENATOR: In accordance with an informal request which I understand you recently made of the Bureau of Markets and Crop Estimates, there have been prepared in that bureau by our people who are familiar with the subject some suggested amendments to the United States warehouse act, together with a memorandum in explanation thereof. This matter has been gone into very carefully, and these amendments are the result of experience in the administration of the act by the division in the Bureau of Markets and Crop Estimates that is charged with that responsibility.

Sincerely yours,

HENRY WALLACE, *Secretary.*

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF MARKETS AND CROP ESTIMATES,
Washington, May 11, 1922.

(Memorandum in explanation of suggested amendments to the United States warehouse act, attached hereto.)

In the suggested amendments to the United States warehouse act, attached hereto, additional or new language has been underscored. Where words are to be omitted lines are run through them and attention will be called thereto in this memorandum.

The first amendment suggested amends section 2 by striking out the following sentence: "The term 'agricultural product' wherever used in this act shall be deemed to mean cotton, wool, grain, tobacco, and flaxseed, or any of them."

In explanation of that amendment it should be said that the department has had a number of requests in the past several years to license warehouses which are used for the storage of agricultural products other than those now enumerated in the act. There are pending in Congress at this time several amendments to the act which have as their object enlarging the number of the products which might be stored in licensed warehouses and for which licensed receipts should be issued. These amendments range from specifying a few additional products to the inclusion of all agricultural or horticultural products. In addition there are pending a number of important bills providing for additional credit facilities based in part upon warehouse receipts for agricultural products. It is believed that the purpose of those seeking amendments to the act and the intent of the act, as well as that of proposed credit legislation, can best be carried out if it is left discretionary with the Secretary of Agriculture to determine what agricultural products are suitable for storage under the warehouse act.

The amendment made to section 5 removes the one-year limitation now placed upon licenses. No good reason is apparent for limiting the life of all licenses to one year. The limitation now in the act makes it necessary for a warehouseman to file an application and bond every year, causing both the warehouseman and the department unnecessary work. Under the suggested wording the license can be terminated any time the licensee fails to observe the act or the regulations promulgated thereunder.

Section 11 of the act it is suggested be amended to provide for licensing persons to inspect and sample products and to certificate the condition of such products. Section 11 now provides for the licensing of persons to classify and weigh agricultural products stored in warehouses licensed under the act. To properly classify certain products, such as tobacco and grain, it is highly important to have an accurate and representative sample of the commodity. Therefore licensing samplers it is believed will impress the samplers more keenly with the responsibility imposed upon them.

Section 12 it is suggested be amended by adding at two places the words "inspect, sample, or," so as to make this section conform with the amendment suggested to section 11, which provides for the licensing of samplers.

Section 15 of the act it is suggested be amended so as to strike out from the first line thereof the words "grain, flaxseed, or" and the word "other" in that same line, making the section read as indicated in the attached draft. As the section now reads, there has been doubt as to whether grain or flaxseed, regardless of the manner in which they may be stored, are not under all conditions made by the law fungible agricultural products. Under certain conditions grain is so stored as to make it no more fungible than any of the other products enumerated in the act. For instance, in the Northwest and on the Pacific coast generally it is customary to store grain in sacks; that is, the grain is all sacked before being placed in the warehouse. In other sections at times grain is specially binned. Either of these methods results in preserving the identity of the particular grain stored, and there is no valid reason why a requirement should be imposed by law

upon identity-preserved grain which is not imposed upon the other products, such as cotton, now mentioned in the act.

Section 19 it is suggested be amended by striking out the words "in this act defined." The amendment suggested to section 2 eliminates the definition of "agricultural product," and therefore the words "in this act defined" are useless.

The only suggested amendments to section 29 are to insert the words "inspectors" and "samplers" at the two places indicated. These changes are suggested to make this section harmonize with the suggested amendments to sections 11 and 12.

The amendments suggested to section 30 first enlarge the scope of offenses which a warehouseman might commit and for which he might be punished under this act; second, they increase the severity of the penalty which may be imposed; and, third, provision is made for imposing penalties on persons who draw, with intent to deceive, a false sample of a product or who willfully mutilate or falsely represent a sample drawn under the act, or who fraudulently grade or weigh agricultural products stored or to be stored under the provisions of the act.

It is not believed that the offenses now punishable under the act are sufficiently broad in scope, nor is it believed that penalties are severe enough. As the act reads now a warehouseman can be punished, first, if he forges, alters, counterfeits, simulates, or falsely represents a license, or if he represents himself to be licensed when he is not, or if he issues or utters a false or fraudulent receipt or certificate. It is believed that a warehouseman might commit any of the other acts enumerated in the suggested amendments and still not be punishable under the act. The commission of any of these acts would in many instances be more serious to the depositor of agricultural products than the commission of the acts which the law now provides for punishing. While the act provides that the Secretary shall require a bond before a warehouseman becomes licensed, and while it is the intention that this bond shall be for the protection of depositors, on the other hand it must be recognized that the amount of bond which should be required must not be prohibitive. This recognition has been made. Offenses such as the suggested amendments contemplate to reach might be committed in such amount as to wipe out the amount of bond and still leave unsatisfied claims of depositors. It is not believed that the amount of bond which is required can well be increased. It is believed, on the other hand, that the penalties which are suggested will have a salutary as well as deterring influence upon warehousemen who may be tempted to go wrong.

Because of the importance of drawing of proper and representative samples and of the importance of proper classification, grading and weighing to the integrity of the receipt for collateral purposes, the penalty section suggested for reaching samplers, classifiers, graders, and weighers should materially strengthen warehouse receipts issued under this act.

Mr. HARRIS. Mr. President, many benefits come to those warehouses licensed under the Federal act. The patrons of such warehouses will enjoy a 25 per cent reduction in insurance rates, and as warehousemen they themselves will be granted a reduction of 25 per cent in insurance rates on both the warehouses and their equipment.

Great progress has been made under the warehouse act during the past two years and great strides have occurred in the past year, according to Mr. H. S. Yohe, in charge of the administration of the United States warehouse act, under the Bureau of Markets and Crop Estimates in the Department of Agriculture. The warehouse act was passed in August, 1916. From that date until April 1, 1920, there were licensed 23 cotton warehouses, with a combined capacity of 40,050 bales, and only 5 grain warehouses, with a total capacity of 136,000 bushels. One year later, on April 1, 1920, there were licensed 238 cotton warehouses, with a combined capacity of 429,975 bales, and 56 grain warehouses, with a total capacity of 2,108,400 bushels.

There were no licensed wool warehouses on April 1, 1920, but one year later there were five licensed wool warehouses with a capacity of 97,500 bags, or approximately 24,375,000 pounds. Although the act applied to tobacco warehouses, no licenses were issued up to April 1, 1921.

The department had licensed 269 cotton warehouses with a combined capacity of approximately 1,250,000 bales up to April 1, 1922. On that date 264 grain warehouses, with a total capacity of approximately 15,000,000 bushels, had been licensed; 19 wool warehouses, which handled better than one-sixth of the entire wool clip of the last season, or about 35,000,000 pounds of wool; and 12 tobacco warehouses with a total capacity of about 68,000,000 pounds.

It will be noted, the department points out, that the total number of licensed warehouses on April 1, 1922, is not very much greater than the number on April 1, 1921, but the capacity is materially different. On April 1, 1921, the capacity was 429,975 bales of cotton, but one year later the capacity increased to 1,250,000 bales. The reason given is that a few large warehouses have seen the benefits of the warehouse act.

Mr. President, the department informed me that they could not interest any cotton warehousemen in the milling sections of New England until the close of 1921. There is now one large warehouse with a 30,000-bale compartment licensed in Massachusetts. The whole plant of that warehouseman will accomodate in the neighborhood of 150,000 bales, and he will increase his licensed space as the demand grows. Many large compress and warehouse companies in the South, operating on a large scale in the cotton-producing area, have become licensed within the past year.

The department informs me that the cooperative cotton growers' associations which were formed in different States during the past year have all manifested a great interest in the Federal warehouse act, and all of the associations have found the Federal warehouse receipt of immense value in arranging for finances.

The department has been informally advised that the associations which are now in process of organization in North Carolina, Georgia, Alabama, and Arkansas intend to avail themselves of the act.

At this time, when the Senate has just passed a bill extending the activities of the War Finance Corporation for one year from June 30, 1922, it is important to note that the corporation, in making its loans covering various products, informs me that in not a single instance has it refused to accept Federal warehouse receipts as security for loans which it has made to producers' associations.

The department says there has been an awakening on the part of grain warehousemen to the advantage of the warehouse act. During the months of August, September, and October of last year over 225 grain warehouses were licensed in Oregon, Idaho, and Washington. One grain grower in the Northwest section wrote the department that the licensing of these warehouses at once placed at the growers' disposal a warehouse receipt on which they were able to borrow, and despite the fact that before they had this receipt they experienced the greatest difficulty in making loans.

While the number of wool warehouses which are licensed appears small, according to the department, it will be recalled that those warehouses have handled more than one-sixth of last year's clip, which is operating on a large scale. It appears that practically all of the wool of Missouri will be handled this year through licensed warehouses.

Until November 20, 1921, only one small tobacco warehouse was operating under this act. There are now 14, with a total capacity of close to 70,000,000 pounds. Seven of these warehouses are in Wisconsin, 3 in Pennsylvania, and 4 in Kentucky. Those in Kentucky are very large and have an aggregate capacity of approximately 60,000,000 pounds. The department is expecting several more large warehouses in Kentucky to apply for licenses, as well as several in southern Ohio and Indiana.

The framers of the original warehouse act had in mind the developing of a form of warehouse receipt, according to my understanding, which would possess the greatest credit advantages. One illustration given me by Mr. Yohe, of the bureau who administers the act, was the recognition on the part of bankers of the value of the receipt when a large cotton plantation operator in the Delta section approached a New Orleans banker for a loan, offering as security some 300 cotton-warehouse receipts. The receipts were left with the banker so they might be examined, and later in the day the holder of the receipts returned to learn what amount the banker might loan on them. To his surprise the banker handed him about 10 or 12 receipts on which he told him he could not make a loan, but that he would loan on all of the others. The holder of the receipts asked no questions but glanced at the receipts which were returned and immediately noted that these receipts had been issued by the warehouse prior to its becoming licensed under the act. All of the other receipts were licensed receipts and were acceptable to the banker as collateral.

Mr. President, Governor Harding, of the Federal Reserve Board, in a letter to the warehousing official of the bureau last September, said:

> Generally speaking there can be no doubt, I think, that warehouse receipts issued by warehousemen licensed and bonded under the United States warehouse act will be considered by bankers as more desirable collateral security than those issued by warehousemen who are not licensed or bonded under any State or Federal law.

Continuing, Governor Harding wrote:

> The United States warehouse act specifies in detail what shall be stated on each receipt issued under that act, and these statements give very full information regarding the commodity which the receipt represents. The act also requires the warehousemen to keep records of all commodities stored or withdrawn and of all receipts issued and returned, and to make such reports to the Secretary of Agriculture as the Secretary shall require.

In discussing the relative desirability of the warehouse receipts issued by warehousemen licensed under the Federal act and those licensed under acts of the various States, Governor Harding wrote:

> It is my opinion, however, that there are certain advantages in being licensed under the Federal law and in being subject to the supervision of the Federal authorities, which advantages would be most apparent in cases where the holders of warehouse receipts desire to use them as collateral for loans from banks located in States other than those in which the warehouse happens to be located.

THE RUSSIAN SITUATION.

Mr. EDGE. Mr. President, on general principles I am opposed to the discussion on the floor of the Senate of subjects not regularly before this body. I am convinced that our very liberal rules, permitting discussion of any subject, any time, at any length, have much to do with the present admitted unsatisfactory progress of the tariff bill. However, the Senator from Idaho [Mr. BORAH] has introduced a resolution, upon which he has spoken, and the principle involved is of such unusual and far-reaching importance, that I believe the other side of the picture should at least be briefly stated.

On May 15 the Senator from Idaho [Mr. BORAH] presented the following resolution:

Resolved, That the Senate of the United States favors the recognition of the present soviet government of Russia.

I have a very high regard for the splendid intellect of the Senator and his magnificent service to his country, and it has been with great pleasure that I have on many occasions subscribed to his viewpoint on public matters; but it is absolutely impossible for me to follow the reasoning that would convince him of the wisdom of the recognition of the soviet government of Russia, especially when I recall his eloquence on many an occasion in upholding and protecting the constitutional principles of America.

The Constitution of the United States, as I interpret it, is built upon the principles of liberty and protection of property rights; and, while I recognize the right of any nation to establish its own government, I differentiate very decidedly on the question of America's recognition of that government if it destroys the fundamental and bedrock principle upon which our own Government is founded.

I would divide a brief discussion of this question into two parts:

First. That it is, anyhow, no business of the Senate to initiate such a program. Every Senator certainly appreciates that the recognition of new governments is, first of all, an Executive function. Frankly, in this connection, and so far as it can be ascertained or analyzed, the policy of the Secretary of State as to Russia's recognition has met the widespread approval of all America. He has clearly stated on different occasions, in effect, that our Government can have nothing to do with another government that denies the right of the protection of private property or the sacredness of contracts. The conference at Genoa has only served to accentuate the determination of the soviet government to adhere to these false policies.

Second. From an economic standpoint, how is it possible for our Government to recognize another government which, as stated, denies the right of private ownership, and through such recognition to encourage our merchants and business men to engage in trade with the Bolsheviki?

The fundamental principle of American Government has been the protection of American interests under any flag in the world; and how are we to protect American interests in a country whose government first refuse to recognize an American loan made to the Government the present soviet régime succeeded, and then positively asserts that property rights and protection form no part of their ritual? Are we not holding out to our business men a false security?

It appeals to me, Mr. President, that through such recognition we would be deceiving our own business men. It appeals to me that recognition would result in a confused situation somewhat like this: First, an approval of that government's direct statement that they propose to repudiate all their obligations and the war debt of the late World War that was conducted in the interest of civilization; second, if any American citizen owns property in Russia they refuse to restore that property to the American owner, because it is the policy of their government to confiscate private property. Therefore, to restore to the American citizen his property which he rightfully owned in Russia would be contrary to their governmental policy. But if a Russian national—and many of them do—owns private property in the United States the soviet government demands that he be placed in full possession of that property, because he appreciates that it is not the policy of the American Government to steal or confiscate private property.

It appeals to me, Mr. President, that to recognize the soviet government under such conditions is not only infamous but is destructive to all that Christianity has accomplished in the last 2,000 years.

During the war many American citizens bought Russian external bonds. That was to help the Allies win the war. At the time it was just as much a patriotic act as it was later to buy American Liberty bonds. They were bought, as I recall it, practically at par, and not at an unusual rate of interest for such securities. As stated, the present Russian government has repudiated this debt in its entirety.

How can we give aid to Russia in addition to making every effort, as we continually are, to feed the starving men, women, and children, partially the result of this impractical and inconsistent form of government? Certainly not by recognizing it and thus encouraging its continuation. We can never give aid to Russia under present conditions by the recognition of the political situation there. It seems impossible in European conferences to separate European politics from Old World economics. If it can not be done, then I see no immediate help beyond what we are now doing. If they insist on a continuation of the policy of repudiation, certainly our Government is more than justified in continuing, and the American people in my judgment demand that it continue, the policy of nonrecognition.

In other words, Mr. President, until the soviet government, or whatever it may be called, realizes the necessity for the recognition and guaranties of the rights of private property and contracts, then in justice to our own country and the policy and principles we have proclaimed for centuries recognition should and must be withheld. We owe it to our own people; we owe it to our present position of world leadership.

Personally, I should like to see America sitting around the table with the representatives of other recognized nations considering an adjustment of world economic problems. We are certainly not hostile to efforts to help balance the budgets; we are not deaf to suggestions providing for the proper deflation of bloated currencies; we are not averse to lending assistance in bringing about reduced expenditures rather than more taxation; we are not opposed to armament reduction and matters of that kind; but if participation in such conferences involves the recognition and thus the semi-indorsement of a false theory of government, then America had better by far continue its policy of isolation and national independence and national aloofness in its protection of American rights through the world.

Only a day or two ago, demonstrating, if the news reports are to be given credit—and I believe they are—that the representatives of the soviet government who have been at Genoa are unable really to represent the viewpoint of the leaders in authority in Russia, the report came to us that while Tchitcherin was giving assurances to the representatives of other nations at Genoa of Russia's cooperation in economic problems and Russia's nonaggression compact Trotsky was making war speeches to Russian cadets, and is reported to have said:

Don't believe in the Genoa speeches; trust only in your bayonets and your batteries. Conferences will not give us what we need. This can only be obtained by having the red army cross the frontier of capitalistic States and the red flag wave over the whole of Europe. Perhaps during the summer the red army will be called upon to give proof of its fighting force.

And in the same news report word was received from the Black Sea to the effect that the Russian batteries fired on the Italian steamer *Marie*, sinking the steamer and killing half of her crew.

The Italian Red Cross have just reported that southern Russia has been transformed into a "great cemetery of starving people. Men, women, and children are dying of starvation, not by the thousands but by the millions." In the meantime representatives of the Russian Government, of the Russian Soviet, deliver ultimatums to representatives of the civilized nations of the world that they must be permitted to continue with their policy of confiscation, and in the meantime that the nations of the world must loan them untold millions in order that their government may continue to survive.

No, Mr. President, the United States or its citizens will never hesitate in responding to calls of humanity, no matter how much a subject of justifiable criticism is the policy of the Government where such conditions exist; but America never should and never can, in justice to its own splendid convictions, subscribe to a recognition which at its best could only be looked upon as a possibility of securing commercial advantages at the cost of national dishonor.

Mr. BORAH. Mr. President, I have no intention at this time of undertaking to reply to the able Senator's argument against the recognition of Russia. I see, however, that the Senator, like most people who oppose Russia, accepts almost everything that is published with reference to Soviet Russia. There is such constant, persistent propaganda in the country in the misrepresentation of Russia that it is no surprise that anyone should be at times misled with reference to the true facts.

I say to the Senator that at the present time there are 14 nations that are doing business with Russia, have their diplomatic missions in Russia, are trading and carrying on business with Russia, and they are not losing any money in Russia. Furthermore, we ourselves are carrying on business with Russia

through another nation. Within the last 10 days I had the pleasure of hearing from a gentleman in New York who sold a very large amount of goods to Russia. He got his money; but, for some reason which is a little difficult for an American to understand, he had to do the business through an English merchant, and pay a commission to the Englishman for doing it.

My idea of the American business man is that if you give him an equal chance he will take care of himself anywhere that anybody else will, and in view of the fact that the English merchant is in a position to do business, do it successfully, and so successfully that he can also carry on the business of the American merchant and charge him a commission, I do not think we need to fear what may happen in case the American merchant undertakes to go in.

Another thing, Mr. President, it is constantly stated that Russia at Genoa was unwilling to restore the property of the nationals of other governments. Russia specifically stated that she would either restore the property or compensate for it. If the press dispatches are correct and Mr. Vanderlip is correct, that is the position which Russia took at the Genoa conference, and it is a position in no wise different from that of other governments which passed through the war. Property could not be restored in all instances, but she stood ready to compensate for the property, which, in my opinion, was the most manifest evidence of good faith.

Mr. Vanderlip says:

> The logic of this attitude was waved aside by the powers.

That is, the logic of the attitude of the Russian Government.

> The Russian's financial necessities were so extreme and pressing that Russia's representatives were prepared to forego their logic, acknowledge the old debts, and compensate for, if not restore, property to foreign nationals.

Mr. EDGE. Mr. President, will the Senator yield?

Mr. BORAH. Yes.

Mr. EDGE. Do I understand that Mr. Vanderlip also stated that the present government would acknowledge the old debt, meaning the loan granted by the United States to the former government?

Mr. BORAH. Yes; the Russian Government were willing to do that, providing the Allies would assist them in getting certain credits to continue business, and, as Mr. Vanderlip says, for the Russian Government to acknowledge the old debt and to have undertaken to restore the property and to have gone home without any assistance would have been to overthrow the Russian Government. The President of the United States would not assume the responsibility of disposing of or even adjusting the international debt in which the United States was interested. Poincare would not assume that responsibility upon the part of his Government. If he did assume it upon any such principle as was submitted to Russia, he undoubtedly would be retired to private life. Lloyd-George could not assume the responsibility which the Allies asked Russia to assume at the Genoa conference; but Russia said, If you, as the allied powers, will promise Russia a standing with reference to credits, and aid her in that respect, she will acknowledge the debt, and compensate for property where she can not restore it.

At the present time the communistic principle in Russia is a very limited proposition, comparatively speaking. It is by no means what it was three years ago or four years ago. At the present time the Government of Russia nationalizes the land and transportation, and to some extent some of the large industries, and that is all. Even as to the land, the farmer or the peasant is permitted to trade upon his own initiative and upon his own responsibility. The products which he raises are not taken charge of by the Government and disposed of. Those things have been modified, and my contention is that a recognition of the Government, and bringing it back into the family of nations, would inevitably result in Russia conforming herself to the business principles of the other nations of the world.

Mr. EDGE. Does Mr. Vanderlip state at all what security, if any, the Russian Government proposes to give for the loan of millions or billions?

Mr. BORAH. No; Mr. Vanderlip says in effect they never got that far; that the Allies rejected the proposition because the Allies were not in a position to furnish anything to Russia in return for what they were asking of Russia.

Let us understand the situation precisely. The proposition submitted to Russia at Genoa meant the dismemberment of Russia. The real, moving, driving power in Genoa was oil, not political recognition, not restoration of Russia, but the question which concerned them was what amount of natural resources and raw material of Russia each one of the allied powers could get hold of.

Mr. Vanderlip is not known as a radical, yet it is very clear from his article that he regarded the entire movement upon the part of the Allies as an impossible one. Let me read what he said:

> The London experts' report laid down a fantastically impossible program of demands on Russia.
>
> What did they ask?
>
> Those demands included liquidation of the past Russian obligations and recognition of all financial engagements heretofore entered into by all the authorities of Russia—local, provincial, or on account of public-utility undertakings.
>
> It proposed to impose on Russia the liability of all actual direct losses arising from breach of contract or otherwise suffered by nationals of other powers due to negligence of the soviet government or its predecessors.
>
> It proposed to set up a mixed arbitral tribunal to determine questions relating to debts, contracts, and losses. It proposed to establish a Russian debt commission, nominated by the powers, which would have authority to issue new Russian bonds to holders of the existing State and other bonds and allocate to the service of this commission new specific taxes and royalties.
>
> It proposed to control collection of such revenue, deal with the proceeds, and arrange the return of property formerly owned by nationals of the powers.
>
> The London experts further proposed to reorganize the Russian judicial system on a system of judicial protection for foreigners as complete as that established in China.

That was the proposition which was submitted to Russia, and the surprising thing is, of course, that Russia did not accept it. Some people seem at a loss to understand why Russia did not rush into this scheme, a scheme which would have made her a subject people, forfeited her nationality, and turned her vast wealth to her despoilers.

Mr. EDGE. Speaking of the author of that article, Mr. Vanderlip, was he not one of that group of so-termed international bankers who are so frequently the subject of more or less comment on the floor of the Senate?

Mr. BORAH. I suppose so; I hope so. He is adding respectability to the group; I should say, greater respectability.

By the decree of November 23, 1920—Laws of 1920, article 421—Russia has "guaranteed the property of those holding concessions in Russia against any sort of nationalization, requisition, or confiscation, and has given them various privileges which will allow them to carry on their business without interference." That is a part of the present law of Russia.

A special decree of the central executive committee—Laws of 1921, article 313—"guarantees the fulfillment of lease contracts and prescribes that they can only be set aside by the courts," as in this or any other country.

From article 188 of the Laws of 1921, which frees labor from the requirement to work for the State, to article 323 of the laws of the same year, they proclaim the freedom of all workers to choose their own employment without special authorization.

I quote again from the laws of Russia:

> In general, all contracts, including those to which the State is a party, are binding and enforceable by law, and any provision included in the contract excluding the parties from resorting to the courts renders it invalid.

Mr. President, as I said, I do not propose to discuss this matter to-day. I shall, however, discuss it more at length within a very short time.

Mr. FLETCHER subsequently said: Will the Senator from California allow me to interrupt him?

Mr. JOHNSON. I yield.

Mr. FLETCHER. In connection with the discussion regarding Russia this morning, I should like to have inserted in the RECORD an editorial from the Washington Post of Monday, May 22, entitled "The Crisis of May 31."

Mr. JOHNSON. The Senator asks that it be inserted in the RECORD, not read?

Mr. FLETCHER. Yes; in connection with that discussion, and before taking up the tariff bill.

Mr. JOHNSON. Very well; and upon that subject I hope to say something myself hereafter. The exigencies of the tariff bill have precluded investigations, studies, and the like, in other directions which might be more interesting, though perhaps not more profitable.

Mr. FLETCHER. I ask that the editorial be printed in 8-point type.

There being no objection, the matter referred to was ordered to be printed in the RECORD, in 8-point type, as follows:

[From the Washington Post, Monday, May 22, 1922.]

THE CRISIS OF MAY 31.

In his final remarks at Genoa Mr. Lloyd-George gave a pointed warning to the Russian Bolshevists who wrecked the conference by refusing to conform to the rules of civilization. He urged them not to make the mistake at The Hague which they made at Genoa, of running counter to the prejudices of western Europe. He added:

The first prejudice we have in western Europe is this, that if you sell goods to a man you expect to get paid for them. The second is that if you lend money to a man and he promises to repay you, you expect that he will repay you. The third is this, that if you go to a man who has already lent you money and say, "Will you lend me more?" he will say to you, "Do you propose to repay me what I gave you?" and if you say, "No; it is a matter of principle with me not to repay," there is the most extraordinary prejudice in the western mind against lending any more money to that person.

Mr. Lloyd-George might have observed that the farther west you go the stronger the prejudice. He could not have stated more admirably the attitude of the United States in regard to the war loans. Therefore the news that France is following the suit of Great Britain in providing for the early payment of an installment on the debt to the United States is most gratifying. It will serve as an object lesson to the Russian reds by proving that western nations are as punctilious when borrowers as they are when lenders.

The world will watch with interest the proceedings at The Hague to ascertain whether the Russian communists shall decide to throw over their doctrines for the sake of a loan or throw over a loan for the sake of communism. In the first case they will no longer be communists, and the prospects of European peace will be distinctly brighter. In the latter case, they will remain a menace to Europe. Whether they make one decision or the other, their good faith will still remain in doubt and nothing but events will show their true intent. If they can obtain a loan by promising reforms with such trickery as to enable them to break their promise, they will do so. It is up to the European Governments to prevent such treachery.

In the meantime the relations of Germany and France will press for adjustment. There are indications that an agreement is in the making, which may materialize before May 31, and which will enable France to escape the embarrassing alternative of employing military force. The subcommittee of bankers conferring under the Reparation Commission will strive to find a method of adjusting the situation on May 31 whereby France and Germany may be enabled to agree upon something more practicable than the present arrangement. The solution is in the hands of France, but possibly M. Poincare may not summon up the moral courage to apply it. In order to readjust the Franco-German relations on a basis that will yield reparation money without military compulsion, M. Poincare must agree to a reduction of the total sum demanded of Germany, and must further agree to release certain German assets, such as railroads, so that Germany may pledge them as security for a loan. From the loan France may collect an installment of reparation money, and Germany can proceed with the balance to obtain raw materials and improve her exchange.

Can M. Poincare induce France to relax her grip upon Germany to the extent outlined? He has not been in the position of advocating lenity toward Germany, even for the purpose of collecting reparations. One French premier after another has fallen because he was made to appear weak in dealing with the Germans. M. Poincare was one of M. Briand's sharpest critics on this point, and now M. Poincare is prodded by other critics. If M. Poincare had gone to Genoa he probably would have been condemned by the Chamber of Deputies, and his resignation would have followed. He retained power by reiterating his fixed determination to hold Germany to account on May 31 and by holding Mr. Lloyd-George and the Russian reds at arm's length. He ran the risk of impairing Anglo-French relations rather than yield a jot in dealing with Germany. Consequently he remains premier.

The question now is whether M. Poincare can persuade French opinion to adopt the plan for an international loan to Germany as a means of collecting reparations in the face of a stubborn belief that any relaxation of the grip upon Germany will be seized by the Germans as an opportunity for war preparations. That Germany will fail to reach the minimum demands due May 31 is a foregone conclusion. The Reparation Commission will so report, and the sanctions will then go into effect automatically unless arrangements are previously made to the contrary. M. Poincare has again given notice that France will act alone if after consultation with the Allies they decline to cooperate. The Versailles treaty seems to give each allied power the right to compel Germany to meet her obligations.

The making of an international loan to Germany is a task of extreme complexity. It amounts to the revision of the Versailles treaty in one of its most vital parts. It is, indeed, a readjustment of the relations of France and Germany. If the subcommittee of bankers about to engage in this task can accomplish it within the next few weeks, it will put the Paris and Genoa conferences to the blush, to say nothing of the supreme council and the conference of experts at The Hague.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President. I ask that the Senate proceed to the consideration of paragraph 383, the item of quicksilver, on page 87. I simply desire to say in relation thereto that the bill, as it passed the House, placed a duty of 35 cents per pound upon quicksilver. The Senate committee reduced it to 25 cents per pound, and as calomel is a product of quicksilver, in order to determine what the rate upon calomel, which is in the chemical schedule, shall be, it is necessary that we shall ascertain whether the reduction which the committee has recommended is to be adopted. As I understand, both California Senators are here this morning and are interested in this subject, and I ask that we may consider that paragraph.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will state the pending amendment.

The ASSISTANT SECRETARY. On page 87, line 1, the committee proposes to strike out "35" and to insert in lieu thereof "25," so as to read:

Quicksilver, 25 cents per pound.

Mr. JONES of New Mexico. We passed over the item of fluorspar, paragraph 207. If it will not inconvenience the California Senators too much, I want to discuss fluorspar in a brief way and get rid of it, because I desire to turn my attention to another subject as soon as we can dispose of this one item. If it will not inconvenience them too much, I will appreciate the privilege of saying what I have to say now on the subject of fluorspar.

Mr. McCUMBER. I will state to the Senator that I notified the California Senators, who are very much interested in this quicksilver item, that I would call up the quicksilver paragraph this morning, and they are prepared to go on. It is entirely agreeable to me, if it is agreeable to them, to have the Senator discuss the other item first.

Mr. JONES of New Mexico. I was prepared to go on with the fluorspar item last night, and I would like to get it off my mind.

Mr. McCUMBER. Whatever is convenient to the Senators will suit me. It is immaterial to me which question is taken up first.

Mr. JOHNSON. Mr. President, we will not delay the Senate long on the matter of the quicksilver item. I want to put the facts before the Senate, and then let it determine what shall be done. I can assure the Senator from New Mexico, and I think I can do this for my colleague, as well as myself, that the discussion will be brief, and the facts practically undisputed.

The item to which the Senator from North Dakota has referred, and which is now the subject of inquiry, is found on page 87, paragraph 383. The rate on quicksilver, 35 cents per pound under the bill as it came from the House, is reduced to 25 cents per pound by the Finance Committee of the Senate.

The item of quicksilver presents a unique case here. It is one, I believe, that is scarcely presented by any other item in the bill. The fact is that either the duty should be accorded which was given us by the House or there will be no quicksilver production in the United States, and the question comes very squarely to the Senate, therefore, Do you wish quicksilver production in the United States? Is that production of sufficient importance to give a tariff of 35 cents per pound, or do you believe the disadvantages which will accrue from a tariff of 35 cents per pound would outweigh the production of that particular and peculiar metal in our land?

When I speak of the facts in the case I speak from three sources of information. The first is that of a gentleman in California, now a State senator, Senator E. S. Rigdon, of Cambria, in the county of San Luis Obispo, a gentleman of the highest repute, whose every word, from my intimate knowledge of him, is entitled to full credence.

Secondly, from the statements which have been made by the State mineralogist of California, Fletcher Hamilton, a gentleman of ability and standing, and whose word concerning the mining industry of the West, I think, is taken as complete authority—quite as authoritative as that of any one individual.

Our friends in the East may not be aware that we have a particular officer in California called the State mineralogist. The office was created because of the importance to our Commonwealth of the mining industry, and since its creation, many years ago, it has been occupied by men familiar with mining and the mining industry, and they have been of inestimable service in conserving that industry for the State. So when I

say that Mr. Hamilton, the State mineralogist, indulges in the statements which I repeat here I say to you that the highest authority there is in California makes those statements.

The third source of my information is the Tariff Commission, which, I presume, presents in disinterested fashion the facts.

Let me read you an excerpt from Tariff Commission Series No. 21, page 245:

Quicksilver is an essential component of all mixtures for detonating high explosives. No satisfactory substitute has been found for military use. It is used in drugs and is the most satisfactory ingredient of antifouling paint for ships' bottoms, in addition to its numerous technical and scientific uses that are less direct, though not unimportant, factors in military operations.

Up to 50 per cent of the normal peace-time consumption of quicksilver is as the essential constituent of blasting caps. By virtue of this use it is a factor in the production of all metals and minerals and in most excavation and general construction work. In no single application is the amount required very great, but many industries would be crippled were they unable to secure the small but vitally necessary amount required.

Quicksilver production was at low ebb in the United States at the beginning of the war and increasing amounts of the metal were being imported to supplement the dwindling unprofitable output of the domestic mines. Relieved from foreign competition and stimulated by high prices, the domestic output increased to large proportions. The output in 1918 was 32,883 flasks (of 75 pounds), at least 50 per cent more than the normal peace-time consumption of the metal in the United States; in 1919, 21,348 flasks.

With the return of normal conditions it is believed that Spanish metal, which is controlled by British interests, will be imported and will depress the price in the American market, which during 1918 was two and one-half times the average price before the war, to below the present cost of production of most of the domestic producers.

The fact of the matter is, in relation to the production of quicksilver, that it dwindled up to the time of the war. Its necessary use for military purposes during the war stimulated, of course, that production; and the price, which had been prohibitive so far as production was concerned in the States of the West prior to the war, suddenly rose and enabled production to be had at a profit. Since the war the old conditions have obtained, until to-day I think I am safe in saying there is again practically no production of quicksilver in this country.

First, quicksilver is absolutely essential in case of war, and it is quite an essential domestic product in time of peace. If there be occasion for its use in time of war—and this has been so recently demonstrated that it is unnecessary, I take it, to go into detail concerning that matter—then, of course, we should in some fashion provide so that its production may be continuous and the art, as Mr. Hamilton, our State mineralogist, says, may not be entirely lost.

During three different wars the mines of this country have supplied the emergency—during the Civil War, the Spanish-American War, and the World War. To let the industry lapse now—and it is in grave danger and will lapse without an appropriate and a just duty—would leave us, if stress comes again, dependent entirely upon foreign nations, and I assume that is something none of us would wish to occur.

The London Morning Journal of February 11, 1922, reports a proposed European combination or trust to control the world's market through the House of Rothschild. The fact is at present the quicksilver output of Spain, where the greatest amount of quicksilver is produced, is in the hands of the House of Rothschild and is controlled essentially by their interests. It is true that that contract, as I recall its date, will expire in 1922; but nevertheless there have been statements of its renewal, and the industry has been practically in the hands of the Rothschilds by virtue of their control of the great Almaden mines of Spain.

Now, I desire to anticipate the argument which I have heard upon the floor, and which possibly will be again made, that the use of quicksilver in drugs will require every man, woman, and child in the United States to pay more for his medicine; and that we ought not, no matter what may be the languishing condition of industry, and no matter what may be the national needs in peace times or the national necessities in war, to put a tariff upon anything which would require an additional price to be paid for the compounds into which this particular item may enter. It is a fact which defies contradiction that in the preparations into which quicksilver enters and which are sold as drugs or compounds the additional cost because of the 35-cent tariff will be practically negligible. A couple of instances have been furnished by the Bureau of Standards, and I want to cite those so that Senators may have them in mind.

The Bureau of Standards estimates that 1 pound of quicksilver will make from 300 to 1,000 clinical thermometers, the latter being the usual size. With quicksilver at $1 per pound—and quicksilver would not be at $1 per pound even with a duty of 35 cents per pound—this would mean a cost, in addition, in these clinical thermometers of one-tenth of 1 cent. The thermometers are retailed often, as the Bureau of Standards relates, for $2 apiece.

Bichloride of mercury retails at 35 cents per bottle containing 25 tablets. Into bichloride of mercury, of course, this item goes. The calculation shows that the cost of quicksilver used in bichloride of mercury, which retails at 35 cents a bottle, would be a very small fraction of 1 cent per bottle.

I state these things in anticipation of the possible argument that may be made concerning the duty asked upon this article.

When this matter was before the House it was deemed of sufficient importance to the War Department to have the Secretary of War write a letter to the Hon. JOHN Q. TILSON, of the Ways and Means Committee, asking an appropriate duty. That letter I wish to read. It is dated July 15, 1921, and reads:

WAR DEPARTMENT,
Washington, July 15, 1921.

Hon. JOHN Q. TILSON,
Ways and Means Committee,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: Quicksilver (mercury) is an essential component in the manufacture of munitions, being used, as far as the military service is concerned, in the manufacture of mercury fulminate for use as a detonator of high explosives, in the manufacture of certain drugs and chemicals, and in certain electrical equipment.

A study of the past record of the industry indicates that it is capable of meeting the normal demands of the country in peace, and in a war involving the maximum effort; however, the steady reduction in the number of producing mines indicates that it will be but a short time before the normal peace demands of the country will have to be met from outside sources of supply. The normal peace demand is approximately 24,000 flasks, and the production in 1920 shows but 13,070 flasks. This decreasing production is due to a decline in prices consequent upon a decreasing demand for the home product due to the prevailing high cost of labor and supplies, the present demand being now met from surplus stocks accumulated during the war and from imports.

The number of producing mines has steadily decreased from 51 in 1917 to 14 in 1920—

I may say, from information I have, that they have now decreased to three, and without this duty those three will be eliminated—

This decline in productivity has been due to the conditions indicated above, and also to the importations from Europe, particularly Spain and Italy, where, due to cheaper and cruder refining methods, the cost per flask is below the cost of production in the United States.

The result of the above is that while there are sufficient mines and refineries in the United States capable of producing sufficient quicksilver to meet our needs in peace and war, the inability to work them, due to lack of profit in production, actually results, as a matter of fact, in a reduction in the resources of the Nation in this commodity for war purposes, in that this shutting down of the mines results in a corresponding deterioration of plant equipment and mine installation, and the longer such unproductiveness continues the greater does the menace to our war production increase, due to the increased time necessary to bring the mines back to a condition of productivity.

The War Department is of the opinion that in order that the needs of the country in war may be met from the resources available in the United States governmental protection of the quicksilver industry in time of peace is essential, and it is, therefore, recommended that such a tariff be placed upon imports as may be considered necessary by the Congress to enable this industry to be operated on a profitable basis in time of peace in order that it may be maintained in a condition to meet the needs of the country in time of war.

Sincerely yours,

JOHN W. WEEKS,
Secretary of War.

It was after that letter was received and read in the House that the duty of 35 cents was put upon the item.

Mr. Hamilton, to whom I have referred, in California Mineral Production in 1920, refers to the industry in this fashion:

Quicksilver, though not used in such quantities as is copper or some of the other metals, is not less vital in peace than in war. No completely successful substitute has yet been found for quicksilver in some of its uses. Except during the stimulated production resulting from the high prices of the war period our domestic output of quicksilver for a number of years has not kept pace with domestic consumption. This is not due to a lack of local sources, but mainly to the competition of low-cost foreign metal dumped onto our market through an almost negligible import duty. Other financial and economic conditions obtaining during the past year have also had their effect on the situation, but they could have been weathered had it not been that the lack of tariff protection permitted the too free entry of foreign metal. There is plenty of ground, even in California, in addition to what may be in Nevada and Texas, that will warrant development if only a fair price can be assured that will justify exploitation. Our domestic quicksilver industry is in danger of complete extinction if not soon given adequate protection against foreign importation. Manufactured mercurials should also be included in the dutiable tariff list as a protection to our detonator and drug manufacturers, which would in turn further assist the domestic mines. The manufacturers of mercurial products in the United States should join with the miners in the demand for an adequate protective tariff. We should not shortsightedly "conserve" our domestic quicksilver resources by forcing them to remain in the ground on account of foreign competition, only to wake up some day when faced with an emergency to find that quicksilver mining and metallurgy is a "lost art" in the United States and can not be revived at a moment's notice. Several months' time is required to properly equip and put in operation a reduction plant, and the knowledge of the art is even at present confined to a limited few.

The collapse of the industry is due entirely to cheaper production costs abroad. The present American price is about $55 per flask in the New York market. I never did quite understand why quicksilver should be measured by the flask, but the

fact remains that ever since we found it in this country we have measured it by the flask. A flask contains about 75 pounds. We have the peculiar nomenclature of this industry presented by the use of flask and its measurements in quite different fashion from that of any other.

Quicksilver from Spain can be sold in New York at $40 per flask with the present duty paid. The cost of production in California amounts to more than that price. The cost of production in Spain and Italy is from $8 to $15 per flask. It is quite a fact which may be descanted upon that ore in Spain is of a different character and of higher grade than the ore that has been found in California, Texas, Nevada, and the like.

The difference is very material. Nevertheless the ore can be produced in the Western States profitably with an adequate duty or the duty that was given by the House, and the industry can thus be saved.

I therefore present the bald question to the Senate: Here is an industry, different in character from most of the industries with which we deal in this bill, quite important in peace times and absolutely essential in war times——

Mr. SIMMONS. May I ask the Senator from California a question?

Mr. JOHNSON. Yes.

Mr. SIMMONS. I do not know that I understood the Senator from California a little while ago when he was comparing the domestic price to the consumer in New York and the Spanish price. I will ask the Senator to restate those figures.

Mr. JOHNSON. I was not comparing the prices. What I was saying was that quicksilver from Spain may be sold in New York with the duty paid at $40 per flask. Then I said—and this is where probably the Senator from North Carolina misapprehended—that the cost of production in Spain and Italy is from $8 to $15 a flask.

Mr. SIMMONS. The $15 was the cost as against $40 the selling price?

Mr. JOHNSON. Yes, sir.

Mr. SIMMONS. Now, what did I understand the Senator to say was the cost and the selling price of the domestic product?

Mr. JOHNSON. I said the market price at present is about $55 per flask, I am informed, in New York. It costs substantially that amount to produce quicksilver in the western mines.

Mr. SIMMONS. But it costs only $15 to produce it in Spain?

Mr. JOHNSON. Yes, sir.

Mr. SIMMONS. Then it costs to produce in this country a flask of quicksilver about $55, while it costs to produce it in Spain but $15?

Mr. JOHNSON. Those are the figures that are given me, and I believe them to be accurate.

Mr. SIMMONS. Does the Senator think, in view of that difference in the cost of production here and in Spain, that we ought to pay the higher price to protect the domestic industry rather than to purchase from Spain?

Mr. JOHNSON. Yes. We pay the higher price now in the New York market. The price of the foreign product in the New York market is maintained at a point where it can just undersell the domestic product. We do not get the benefit of a decreased price.

Mr. SIMMONS. I understood the Senator to say that the selling price of the Spanish product in the New York market was $40?

Mr. JOHNSON. I said the product could be sold in New York for $40, but that, in reality, we did not get the benefit of the cheap labor cost abroad. We get the benefit only of that price which enables the foreign product merely to undersell the domestic product. That is all the benefit that we get; and in that fashion the domestic industry is destroyed and the foreign product is given a practical monopoly.

As I stated in the beginning, I simply put to the Senate the question, Shall this industry be entirely eliminated from the United States? Is it of sufficient importance to this country in time of peace and of sufficient necessity in time of war so that we may have a tariff upon it which will enable it to continue in existence to answer the emergency when the emergency arises and to do that which it was found necessary it should do in our recent time of stress?

Mr. UNDERWOOD. Mr. President, I wish to say just a few words in reference to this item. I assume from the argument of the Senator from California that he favors the House rate of 35 cents a pound on quicksilver, and he contends that unless that rate be adopted the quicksilver industry in the United States will be destroyed. He then points out that there has been a falling off of production in the United States.

Mr. President, under the existing rate there may be large importations of quicksilver in competition with the domestic product. I am not sure that there are excessive importations; but, taking the Senator's own argument, I think he himself has demonstrated, and if Senators will look at the figures and compare the facts they will find, that there is no warrant for a tax of 35 cents a pound on this article, even if there is some justification for raising the present rate. The theory of those who wrote this bill is that there should be a protective tariff. Of course, so far as my theory of tariff legislation is concerned, it is entirely different from that of the committee; but, assuming that this tariff bill is going to be written from the standpoint of the principles of the Republican Party that a protective duty is required, I do not think the Senator from California can justify the proposal to increase this duty to 35 cents per pound.

Now, let us consider for a moment the history of this industry. In the years preceding the war, I think back to 1910, we were exporting some quicksilver. There was also a very modest amount of importations. I think after 1910 the exports ceased, but the imports were few; and we were producing 17 per cent of all the world's production of quicksilver, which was more than our proportion of the consumption of the commodity.

Now, let us look at the condition which then existed. At that time there was no fear as to the possibility of this industry living and existing in the United States when it was operating under the comparatively low duty of the then existing tariff law. We find that under the law of 1909, the so-called Payne-Aldrich law, the tax on quicksilver at the customhouse was 7 cents a pound; and at that time the unit value was about 43 cents a pound. When that law was superseded and the present law was written quicksilver was not placed on the free list, but an ad valorem duty of 10 cents a pound was placed on it. At 43 cents a pound, the unit value in 1914, a tax of 10 per cent ad valorem was equivalent to a tax of 4.3 cents at the customhouse, making a reduction of about 2.7 cents under the duty which existed prior to that time, when there was no question that the industry prospered in the country.

Under existing law the import unit value of this commodity as shown by the statistics for the two years 1919 and 1920 was ninety-nine and a fraction cents, or nearly a dollar a pound. Ten per cent of that would make a tax on this article of 9.9 cents, or practically 10 cents a pound under existing law, which is 3 cents more than the duty under the Payne-Aldrich law at the time when this industry was exporting the product abroad. Of course, if it was able to export abroad in reasonable quantities there was no danger to the industry at home.

I realize that world conditions have changed, but the Senator says—and I assume that he is right in giving his figures—that a flask of quicksilver containing 75 pounds imported from abroad is now selling in the New York market at $40. I do not know whether that is the importer's price or whether it is the import price with the profit of the importer added, but, assuming that to be the market value in New York, it indicates a unit value of this article to-day under the Senator's own figures of 53 cents a pound.

Mr. McCUMBER. Mr. President——

Mr. UNDERWOOD. I yield.

Mr. McCUMBER. If the Senator will allow me, I think that he is mistaken about quicksilver being sold in New York at $40 a flask. I can find no such record, although there may be some testimony to that effect. All of the reports place the quotation very much higher than that.

Mr. UNDERWOOD. I myself think it is higher. I did not make the assertion; the Senator from California made that statement, and I was arguing from his statement.

Mr. JOHNSON. Mr. President, will the Senator yield?

Mr. UNDERWOOD. I yield.

Mr. JOHNSON. I think, perhaps, I stated my position in a fashion that might have confused the Senator from Alabama. What I said was that the market price in New York was $55 a flask.

Mr. UNDERWOOD. I understood the Senator to say it was $40 a flask.

Mr. JOHNSON. No. What I said was that the Spanish output could be laid down in New York and sold there for $40 a flask, but I said further——

Mr. UNDERWOOD. That is what I understood the Senator to say, and if it could be laid down there and sold for $40 that would be the price.

Mr. JOHNSON. No. As I was advised by information conveyed to me three days ago, the present market price of quicksilver in New York is $55 a flask. I will ask the Senator from Utah if that is his information?

Mr. SMOOT. It is.

Mr. McCUMBER. I have the quotation here from the publication known as "Chemical and Metallurgical Engineering," which

gives the quotation as exactly $55 a flask on May 17. At that rate the price per pound would be 73 cents.

Mr. UNDERWOOD. It would be 73 cents a pound. I misunderstood the Senator from California. I thought he was quoting a lower rate. At $40 a flask the price per pound would be 53 cents, but at $55 a flask the price per pound would be about 73 cents. At 73 cents a pound under the present law a tax of 10 per cent ad valorem would be a somewhat higher tax than that imposed under the Payne-Aldrich law, which, as I have said, was 7 cents a pound.

I have only this to say: I think this is an article on which we can raise revenue. I thought so when the present law was written, and I believe that there is no reason why a reasonable tax should not be placed on it; but at the present price in New York of the imported article, 73 cents a pound, the existing law levies a tax of 7.3 cents a pound, and under the Payne-Aldrich law, when it was admitted that the industry was so flourishing that it could export its products, it had a duty of only 7 cents a pound, and now the Senator is asking that the Congress increase the rate to 35 cents a pound. Thirty-five cents a pound on an article which is selling in New York for 73 cents is an enormous tax; and it seems to me that it is clear that the result of this increase, if you went to that extent, would be to exclude foreign importation entirely.

I really think the rate of the committee itself in fixing the tax at 25 cents a pound is entirely too high. I should not object, under the present condition of the industry, to a reasonable increase over what it was before. I think it would produce more revenue and I think it might be justified; but I think a tax of 25 cents a pound is entirely too much on a raw material that does not involve very much labor, and I think the principal difficulty that the industry has in shipping its product from Texas and from California, where almost the entire output of the American industry comes from, is a question of freight rates. That is now subject to water transportation, so that I do not see any reason in the world why this enormous increase of either the committee or the proposal of the House making it 35 cents a pound in one instance and 25 cents in the other, should be agreed to, and especially I can see no reason why it should go higher than the House rate.

I understand, as the Senator from Utah suggests, that it is not the shipment of ore that we are talking about, because we all know that not only in this country but in Europe the reduction of the quicksilver ore into quicksilver itself is always done at the mine, so there is no question of transportation of ore. It is the finished product that is shipped, and a commodity that sells for as much as 73 cents a pound, when the pounds are small in bulk, because it is a very heavy substance, can stand a considerable freight rate. So I can see no justification in the world for the House rate of 35 cents a pound, and I really believe that when the proper time comes the Senate rate should be reduced lower than 25 cents, because I think that in itself is excessive.

Mr. SHORTRIDGE. Mr. President, perhaps it will serve no good purpose to detain the Senate upon this item, nor will it serve any useful purpose to repeat or restate the facts which the records abundantly demonstrate.

My colleague [Mr. JOHNSON] has stated clearly the facts as they relate to this particular industry—an industry which is important not only in the State whence we come but to other States of the Pacific coast—Nevada, Oregon, and Idaho—and also to a Gulf State—Texas.

Here is an opportunity to put to the acid test the principles of protection. Some gentlemen seem to be afraid of those principles when we seek to apply them. Personally, I believe in the doctrine which I think is very aptly called the American protective tariff system. There are other gentlemen, learned and who have had large experience, who hold to other doctrines, to other principles. I say this out of great respect for the committee. Perhaps it will not be regarded as offensive, however, for me to observe that none of us is infallible.

The great importance of this industry has been called to your attention. Its commercial importance in time of peace is manifest. Its national importance in time of war no one can for a moment question. There are certain outstanding facts which ought to be borne in mind—the cost of production in America and the cost of production abroad. We all have in mind America and Spain, Italy, and Austria. There are some things which are axiomatic. Where there is a material, substantial difference in the cost of production one of two things must happen: Either there must be a reduction and an equalization of the cost of production, or the higher-cost-of-production industry must perish, for there can be no successful survival of the one where the cost of production is far greater than that of the other.

The House bill provided a duty of 35 cents a pound on this metal. The Senate committee, in its wisdom—which I with deference question—has fixed it at 25 cents. A very great Democrat, abused by friend and slandered, it may be, by foe in his lifetime, but who now stands high among the statesmen of this Republic, once said that "it is a condition, not a theory, that confronts us." I use that phrase, and I suggest to my party associates and I appeal to my friends upon the other side of the political fence, and I remind them all that it is a condition, not a theory, which confronts us this day.

The miners of California, of Nevada, of Oregon, of Idaho, of Texas, and of other of the Western States that have large cinnabar deposits without a dissenting voice tell us that they can not compete with the foreign mine producer. They are men of character; they are men of intelligence; and they come here to us and say: "Under present conditions we can not open our closed mines. We can not pay the wages or all the incidental, itemized costs of producing this essential metal and compete even in the American market with the foreigner." That is the evidence. Does anybody seriously question it? That is the fact. Does anyone doubt it?

I submit to you that that is the situation, the condition, that confronts us. The mines are closed. Shall they remain closed? Is it desirable that they should remain closed? Is it wise that we should so legislate as to keep them closed? Or, to put the same thought differently, is it wise that we should refuse so to legislate as will open these mines?

No Senator who hears me can question the wisdom of carrying on this industry. Its importance in the industries of the country I need not dwell upon, nor will anyone question the prudence and the wisdom of continuing these mines in the eventuality of trouble with other nations. No thoughtful man can question the prudence and the wisdom of maintaining this industry in peace and in war times. My colleague [Mr. JOHNSON] has taken the liberty of reading to the Senate to-day the letter from the Secretary of War which was used when this bill was before the House. No one can question the correctness of the statements therein set out, nor can anyone question the wisdom of the course suggested by the Secretary of War.

These mines are closed. We know why they are closed. The question is, Shall they be opened? How can the Government help? So far as I know, unless we resort to a direct appropriation in aid of that industry—which I do not favor—unless we resort to that method, we can, and to open these mines we must impose a certain duty upon the imported article. Those whose capital is invested, those who have studied the question at the mouth of the mines or work in the levels below, tell us that this rate of 35 cents is essential, is absolutely necessary, to the opening of these mines and to continuing quicksilver mining in the States I have mentioned.

It is with the Congress to grant this relief or refuse it. You can put out this industry. But is it desirable to do so?

It seems to me that those who believe in the protective principle should be governed by the facts as they come to us here, and it seems to me that my friends of Democratic faith or principle should see in this industry an exception to their fundamental doctrines. Upon the score of revenue, instead of stopping importations, while I would not invite an increase of importations, I am very sure the proposed duty would not cause a reduction in the total amount of revenue so derived.

I shall not trouble Senators who listen with a prolonged speech, but I urge upon those who believe in our protective doctrine to grant the rate which we say is essential. It will not yield great profit to the miners; only a fair profit will come to the owners of these various mines; nor will it result in an increase of prices to an extent which will be a burden upon any branch of American industry or to any considerable number of the people of this country.

There is one other thought I wish to throw out for the consideration of the Senate. It has been suggested that our quicksilver deposits should be conserved. A certain type of publicists, certain importers, have advanced the notion that we should not exhaust these deposits, that we should not engage in this mining, that we should save them for future generations. Such a notion is utterly fallacious; it is entitled to no consideration whatever. Most of these mines are now closed, as I have said. They will be abandoned and ruined unless mining is resumed. The deposits are perhaps not inexhaustible, but they are very extensive. They can be greatly developed, as they were during the war time. They can be greatly developed, giving work and wages to American men and women, or they can remain closed, and the work and wages will be given to the foreign men and women.

The showing is complete; the evidence is before us; the necessity for the duty asked is established. I urge therefore upon

those who believe in protective principles to stand by the House rates—to give at least 35 cents a pound on this vastly important metal produced in America and thereby revive and prosper this American industry.

Mr. McCUMBER. Mr. President, before voting upon the pending amendment, I think I should present to the Senate some of the salient facts concerning the industry, and also some of the reasons which justified a majority of the majority of the Finance Committee in holding, after a reconsideration, to the views which they have expressed in offering this amendment. I will give some of the facts concerning the industry, and then the deductions therefrom.

The Payne-Aldrich rate, as we will remember, was 7 cents per pound. The Underwood-Simmons rate was 10 per cent ad valorem. The House rate is 35 cents per pound. The committee rate is 25 cents per pound.

The imports during the first eight months of 1921 amounted to 528,003 pounds, valued at $329,145, or 62 cents per pound. In 1920 the imports reached their maximum, when they amounted to 1,062,647 pounds, valued at $967,510, or 91 cents per pound. In 1905 the United States was the leading producer, with 30,534 flasks of 75 pounds each, amounting to 2,290,050 pounds. This fell to 16,548 flasks in 1914, and rose to 36,159 flasks in 1917. The estimated production in 1921 was 6,339 flasks.

The cost of production in the United States is greater than that in Spain, Italy, and Austria, because of the low-grade ore and the high labor cost. The domestic ore averages not over five-tenths of 1 per cent of quicksilver, while that of Spain runs eight-tenths of 1 per cent, that of Italy nine-tenths of 1 per cent, and that of Austria sixty-five one-hundredths of 1 per cent. The United States cost of production was about $1 per pound in 1921.

One of the outstanding features is the extreme low grade of the United States ore, which yields on the average not more than 10 pounds of the metal per ton. In Spain the mines are worked to a considerable extent by convict labor, but the cost of running and treatment is actually much higher per pound of ore than in this country. However, every ton of Spanish ore yields 150 pounds of metal to the ton, while ours yields only about 10 pounds.

I want to call attention to the fact that during the war our price ran as high as $300 per flask, or $4 per pound. This indicates the necessity of giving what we might consider adequate protection.

Let us look at the cost. I have stated that the import price in the first nine months of 1921 amounted to about 62 cents per pound, while the cost in the United States is about $1 per pound. If I look over the import prices in 1908, I find that the value per pound was about 45½ cents. In 1909 it was about 52.8 cents. In 1910 it was 54.1 cents. In 1911 it was 52.9 cents. In 1912 it was 52.4 cents. Then it dropped to as low as 43 cents in the beginning of 1913, and is now 62 cents per pound, importing value. But it must be remembered that that 62 cents includes 10 per cent ad valorem, the present rate of duty.

Assuming that it can be imported at 62 cents, and that the cost in the United States is $1, it would require 38 cents per pound to meet the difference. The House gave only 35 cents. The Senate committee cut that to 25 cents per pound, but in doing so the Senate committee took into consideration the fact that the present cost in the United States is probably the peak of the high cost of production, while the importing price is probably as low as it is likely to be.

We have very often been accused of attempting to uphold the present high production costs and continue the high cost of the products to the American people. I have stated on several occasions that the committee has scarcely ever in this bill given a rate that would actually measure the difference between the importing price of the foreign product and the price for which the American product is sold in the American market. We have in all instances made due allowance for the probable decrease in the American cost, and this is one of the examples of that. We believe that there will be a decline in the American cost, and while this does not measure up to the present standard or the present requirements to protect the American market on the present basis of the American cost, we have reason to believe that it will be a sufficient protection in a short time, and for that reason we have given less than is necessary for the present protection at the present American cost of production.

Mr. JOHNSON. Mr. President, permit me just a word in response. As to the statistical matter which has been suggested by the Senator from North Dakota, I want to emphasize that in the past year, out of 51 mines which existed in this country, not more than 3 or 4 have been able to be worked at all because of the prices for the output, and because they could not maintain and sustain the loss of working under present conditions.

As to the output, the figures read by the Senator from North Dakota are doubtless correct, but during this year, under existing conditions, whereby the mines have been compelled to shut down because of the losses sustained, not more than a couple of hundred flasks of quicksilver have been produced in this country at all.

One other item: The Senator from North Dakota very justly presents the difference, from the standpoint of the figures before him, in the cost of the production of this article abroad and that at home. He makes the difference between the cost at home and the cost abroad 38 cents a pound.

Mr. McCUMBER. If the Senator will allow me, I think one can justly say that there is a greater difference, because there is the 10 per cent ad valorem.

Mr. JOHNSON. Exactly.

Mr. McCUMBER. To which I called attention.

Mr. JOHNSON. Yes; the Senator did; and there is not only that greater difference of 10 per cent between the cost of production at home and abroad, but as the tariff survey shows, the costs abroad are now being lowered and are going down all the time. But take the Senator's figures. Without counting the 10 per cent, if 38 cents a pound is the difference in the cost of production abroad and at home, we are entitled to the 35 cents, the rate which has been given us by the House.

On no other theory of protection can it be said that a different rate or lower rate should be given. The justification of the majority of the Finance Committee is that they hope that in the future our cost of production in this country will lessen, so that instead of a differential of 38 cents a pound now existing with a tariff of 10 per cent added we may get down below the 25 cents a pound which they are willing to grant us. If there is a justification for this speculation, we may take into consideration as well the statements made by the tariff survey as to the reduced costs abroad, and they will equalize themselves.

So upon the argument that has been made by the Senator from North Dakota we are entitled to the 35 cents which the House gave us, and I hope that the amendment of the Senate will be voted down and the House rate retained.

Mr. SIMMONS. Mr. President, I wish to ask the Senator from California a question, with his permission.

Mr. JOHNSON. I gladly yield to the Senator from North Carolina.

Mr. SIMMONS. I wish to ask him if he agrees with the statement of the Senator from North Dakota that while 160 pounds of Spanish ore will yield 10 pounds of quicksilver, it takes a ton of American ore to yield an equal amount of quicksilver?

Mr. JOHNSON. I will say to the Senator in reply that I am not certain of the exact figures, but there is a very great disproportion. There is no question about that at all.

Mr. SIMMONS. If that is true, it means that a ton of American ore yields of this product only one-sixteenth as much as a ton of Spanish ore.

Mr. JOHNSON. I am not sure of the exact figures, as I said.

Mr. McCUMBER. I gave it as 150 and not 160, so it means practically one-fifteenth.

Mr. SIMMONS. A ton of Spanish ore yields fifteen times as much of this product as a ton of the American ore. If there is that difference in the yield of the ore, may not the difference in the price be attributed to the great inferiority of the American ore, it being necessary to mine 15 tons here against 1 ton in Spain to get the same quantity of product? Does the Senator think, if that condition exists, that the American people ought to be taxed in order to enable the mines of this country, yielding only one-fifteenth as much as the mines of another country, to compete successfully with that higher grade of product? I am merely asking for information. I am not asking this in a controversial spirit. I think there is where the trouble comes.

Mr. JOHNSON. No; I will tell the Senator where the trouble comes. The trouble comes in the fixing of the prices of quicksilver in the fact that the Rothschilds control the great output of the world. They do just as they please with the prices. The only time the prices ever got away from them was during the war, but during the war, of course, they soared high. Then a commission was appointed to sit and hear testimony and fix prices. My recollection is they fixed $1, but I am not entirely clear that that is accurate. However, the expert nods in assent, so I presume I have accurately stated that that price was fixed during the war by the War Industries Board, which went to San Francisco.

One of the strange things about quicksilver is the peculiar fluctuating market that we find, for which there has been no solution suggested except the one that the Rothschilds control the output of the great Spanish mines where this ore is found, and they do practically as they please concerning the prices.

Mr. SIMMONS. But in this country if there were two mining districts producing the same kind of ore, and the ore in one of those would yield fifteen times as much of the product as the ore in the other, of course the weaker mine must close or it must have a subsidy of some sort to keep it alive. Here is the same question with reference to America and Spain. We have the Spanish ore yielding fifteen times as much as the American ore. Now, the Senator from California, as I understand it, asks us to keep the weak mine alive by giving a tariff subsidy.

Mr. JOHNSON. There is another reason which the Senator evidently missed in the remarks that have been made. Fifty per cent of the normal production in this country is necessary for national defense, for war purposes; that is, it is necessary for percussion caps and munitions, a part of military necessities. If we destroy the ability to produce in this country we put this product wholly and entirely in the hands of a foreign nation.

Mr. McCUMBER. The Senator from California is entirely right in saying that heretofore the product has been under the great Rothschild trust, but the Rothschild lease, or interest, or agreement, whatever it may be called, expired in the early part of the year, and to-day the Spanish Government, which is probably as powerful as the trust, owns nearly all the quicksilver mines outside of the United States.

Mr. UNDERWOOD. Mr. President, I desire to say a few words before we vote on this question. I was rather surprised at the admission of the chairman of the committee that the rate was not adequate which the committee adjusted to cover the difference in cost. I may have misunderstood him, but I thought I understood him a while ago in the debate to say that the high cost of production of quicksilver in this country is $1 per pound. If I am wrong about that, I hope the Senator will correct me, but that is what I understood the Senator to say.

Mr. McCUMBER. I take that not from the report, but from the testimony before the committee.

Mr. UNDERWOOD. That is what I understood. That was the war-time cost of production. I find that in 1920 we exported some quicksilver to Japan, Canada, British India, Cuba, and Peru. We exported 116,000 pounds in round numbers, at a value of $129,000 in round numbers, which would make a cost-unit value of $1.10 per pound. We were exporting then at $1.10 per pound, which of course included the cost of manufacture and profit. So I think when the Senator said that the top notch of war-time production was $1 a pound, that is a high figure.

If we balance this industry in that cost of production, taking the facts which have been admitted here in debate by the Senator from California and the Senator from North Dakota, the present import price is 73 cents. If we add 25 cents, the rate which the committee reported, to 73 cents, we get 98 cents, which practically equals the top-notch cost of production in America during war times. If we add to it 35 cents, we get $1.08, which is way above the cost of production in America during the war period.

So, when the junior Senator from California [Mr. SHORTRIDGE] turned to the Republican side of the Chamber and said that he was going to put them to the acid test to vote for this 35 cents he was surely doing it, because he was asking them now to put a rate on the statute books for the time to come that would be 8 cents in excess of the highest cost of production during the World War period.

Then the Senator, in his usual eloquent style and forceful way, appealed to the Senate—or at least he appealed to Senators on the other side of the aisle who believe in this theory of high protection in the interest of the homes and the farmers and the American working men—that the people engaged in this production be made not only equal in tariff as to the difference in cost between the import price of to-day and the top-notch cost of production during the war, but to exceed it by 8 cents per pound. Of course, the eloquence we have heard on the floor continually in reference to all these items, that the factories and the foundries and the mines are shut down, and that they want a high tariff as a sort of salt solution to put in the veins of the corpse and bring it back to life again, does not apply to this item.

I happen to be connected in some way with the business of making pig iron. I want to say that since this unfortunate calamity in business has come to the American people every furnace in the plant in which I am interested has been shut down, without the smoke coming from a single stack, and it has remained that way for a year. I am glad to say they are creeping back into business again. But I never for a moment attributed that to a tariff condition. I knew the business conditions in America were such that the demand for pig iron had practically ceased, that there was no opportunity to make sales, and that those engaged in the business had to wait with patience until normal prosperous times returned to the people of the United States.

So it is with the quicksilver industry. It is apparent on the face of the thing. A great demand for quicksilver is to make munitions. It is used in medicines and in the arts to some extent, but the amount of quicksilver that is used to make thermometers for the doctors is infinitesimal compared with the amount that is used in the manufacture of munitions. Of course, we all know that we had a great overproduction of munitions when the war ceased, and so had the balance of the world. We temporarily stopped using quicksilver to make fulminating caps because we had an oversupply of shells and war materials, and we did not want to make any more because we wanted to use up what was left on our hands after the war. That is true of all the other large countries involved in the late war. Therefore they quit using quicksilver for that purpose, and the bottom of the market dropped out.

That is what is the matter with this industry. It is not any question of tariff. We do know that in normal conditions, when this industry prospered and exported its commodities before the Great War, the selling price was along about 43 cents per pound, and there is no reason to believe that it will not come back there. We know that during war time, when the Senator from North Dakota says the top notch of the cost of production in America was $1, this product had far more than doubled in value and that every other commodity and all supplies that a mining or industrial camp needed for production was far more than doubled in value. We know they are coming down and have been coming down every day to some extent, not as fast as we would like to have them, but gradually falling from that high top notch of production. And yet, taking the top notch of production during the middle of the war, when the producers of quicksilver were producing it for $1 a pound and selling it to the United States Government for $4 a pound, and taking the present cost of production of importations, the Senator from North Dakota in his amendment would add 25 cents, which will bring it within 2 cents of the top-notch cost of production during the war, and the Senator from California would add 35 cents a pound, which is 8 cents in excess of any evidence whatever to show that it costs over $1 a pound to produce it at any time.

I am not saying that this article should not have a reasonable rate; it is a commodity that will bear a reasonable rate; but when the junior Senator from California [Mr. SHORTRIDGE] says it should have 35 cents a pound, in order that the industry may survive, under those circumstances, I agree with him that he has put the acid test to his colleagues on the Republican side of the Chamber.

The PRESIDING OFFICER (Mr. BURSUM in the chair). The question is upon agreeing to the committee amendment.

Mr. JOHNSON. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. JONES of Washington (when his name was called). The Senator from Virginia [Mr. SWANSON] is necessarily absent from the city. I agreed to pair with him for the day, but I find I can transfer the pair to the junior Senator from Oregon [Mr. STANFIELD], and I do so, and shall vote. I vote "yea."

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. I transfer that pair to the junior Senator from Maryland [Mr. WELLER]. I will allow this announcement of the transfer of my pair to stand upon all votes to-day. I vote "yea."

Mr. STERLING (when his name was called). I transfer my pair with the Senator from South Carolina [Mr. SMITH] to my colleague, the junior Senator from South Dakota [Mr. NORBECK], and vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the junior Senator from Arizona [Mr. CAMERON]. Being unable to secure a transfer of that pair, I withhold my vote.

The roll call was concluded.

Mr. DIAL. I am paired with the junior Senator from Missouri [Mr. SPENCER], but I transfer that pair to the Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. GLASS. I have a general pair with the senior Senator from Vermont [Mr. DILLINGHAM], which I transfer to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. COLT. I have a general pair with the junior Senator from Florida [Mr. TRAMMELL]. I transfer that pair to the senior Senator from Pennsylvania [Mr. CROW] and vote "yea."

Mr. BALL. I inquire if the senior Senator from Florida [Mr. FLETCHER] has voted?

The PRESIDING OFFICER. That Senator has not voted.

Mr. BALL. I have a general pair with the senior Senator from Florida, and, as he has not voted, I withhold my vote.

Mr. EDGE. I have a general pair with the senior Senator from Oklahoma [Mr. OWEN]. Not being able to secure a transfer, I withhold my vote.

Mr. WILLIS (after having voted in the negative). I am paired with my colleague, the senior Senator from Ohio [Mr. POMERENE]. I am unable to obtain a transfer, and therefore withdraw my vote.

Mr. WALSH of Montana (after having voted in the affirmative). I observe that my pair, the Senator from New Jersey [Mr. FRELINGHUYSEN] is absent. I transfer that pair to the Senator from Missouri [Mr. REED] and allow my vote to stand.

Mr. HARRIS. I transfer my pair with the junior Senator from New York [Mr. CALDER] to the senior Senator from Montana [Mr. MYERS] and vote "yea."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES].

The result was announced—yeas 30, nays 25, as follows:

YEAS—30.

Borah	Harrison	Page	Stanley
Brandegee	Heflin	Pepper	Sutherland
Capper	Hitchcock	Ransdell	Underwood
Colt	Kendrick	Robinson	Wadsworth
Curtis	McCumber	Sheppard	Walsh, Mass.
Dial	McLean	Shields	Walsh, Mont.
Glass	Norris	Simmons	
Harris	Overman	Smoot	

NAYS—25.

Bursum	Johnson	Moses	Shortridge
Elkins	Jones, Wash.	Newberry	Sterling
Ernst	Kellogg	Nicholson	Townsend
France	Keyes	Oddie	Warren
Gooding	Ladd	Phipps	
Hale	Lodge	Poindexter	
Harreld	McNary	Rawson	

NOT VOTING—41.

Ashurst	Edge	McKinley	Stanfield
Ball	Fernald	Myers	Swanson
Broussard	Fletcher	Nelson	Trammell
Calder	Frelinghuysen	New	Watson, Ga.
Cameron	Gerry	Norbeck	Watson, Ind.
Caraway	Jones, N. Mex.	Owen	Weller
Crow	King	Pittman	Williams
Culberson	La Follette	Pomerene	Willis
Cummins	Lenroot	Reed	
Dillingham	McCormick	Smith	
du Pont	McKellar	Spencer	

So the committee amendment was agreed to.

Mr. SMOOT. Mr. President, I now ask to return to paragraph 16.

The PRESIDING OFFICER. The Secretary will state the amendment in paragraph 16.

The READING CLERK. In paragraph 16, page 6, line 16, before the words "per centum" the Committee on Finance propose to strike out the numerals "30" and insert the numerals "45", so as to make the paragraph read:

PAR. 16. Calomel, corrosive sublimate, and other mercurial preparations, 45 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. SIMMONS. Mr. President, calomel is a small item in respect of the quantity of production, consumption, and importation, but it is a very important item when we consider that it is one of the chief medicines used by the people of the United States. Especially is it important to the people in sections of our country which are more or less malarial. Calomel is the medicine of all the people, the poor and the rich alike, and in some sections of the United States that medicine is absolutely essential to health. Next to quinine, I consider calomel the most important medicine that is used generally among our people.

Personally I do not believe that it is wise public policy to tax genuine medicines. I have always entertained that view. There are some things that the Government may tax for revenue; there are some things that the Government may tax, according to the theory of a large element in this country, for purposes of protection; but I do not believe that the medicines of the people ought to be taxed, and, if they must be taxed at all, I think they ought to be very moderately taxed.

Here is this medicine of common use that the House proposes to tax at the rate of 30 per cent ad valorem. The Senate Finance Committee, for some reason, I do not know what, desire to raise that tax one-half and to impose a tax of 45 per cent ad valorem, a 50 per cent increase over the House rate. I had supposed, when we reduced the tax on quicksilver, out of which calomel is in large part made, that the committee would probably propose to reduce this 45 per cent tax, but they have made no such proposition.

Mr. SMOOT. In answer to that I will say to the Senator that the House provision was out of all balance. Nobody could justify the 30 per cent with a duty of 35 cents a pound on quicksilver. Some change must have been made on the floor of the House on quicksilver, and then they failed to make the difference on calomel, because the Senator will admit himself—I am sure the Senator will admit—that with 35 cents a pound on quicksilver and 30 per cent ad valorem on calomel there is no proportion between the two.

Mr. SIMMONS. That is exactly what I purpose to ascertain. Do you say that this is a compensatory duty which you are putting on calomel?

Mr. SMOOT. I can tell the Senator exactly, if he wants to know the compensatory duty. The compensatory duty is 25 per cent.

Mr. SIMMONS. Is it the purpose of the committee to impose a duty on calomel beyond the point of compensating for the duty imposed upon the ingredients out of which calomel is made?

Mr. SMOOT. Twenty per cent protection is all that the committee gives in this 45 per cent. Twenty-five per cent of it is compensatory duty and the other is a protective duty.

Mr. SIMMONS. Then we have this situation: Twenty-five per cent of this 45 per cent is compensatory duty and 20 per cent of it is a duty upon the calomel per se.

Mr. SMOOT. I will say to the Senator that, taking everything into consideration, outside of quicksilver, he may say that. I think that is a fair statement. To-day, under the existing law, we have a duty of 15 per cent ad valorem.

Mr. SIMMONS. Now, let me ask the Senator another question. We have just passed quicksilver. We have just put a duty of 25 cents a pound on that. I did not think we ought to have done so. I thought the 10 per cent duty was sufficient, and I think it was demonstrated that it was sufficient; but a duty of 25 cents a pound has been placed on quicksilver. What is quicksilver chiefly used for? Is it not used extensively for the purpose of manufacturing calomel and other medicinal mercurial preparations?

Mr. SMOOT. It is used for fulminates of all kinds, and for high explosives in mining camps, and it is used greatly in time of war. It is also used for the making of calomel. That is a very small part of the use, however.

Mr. SIMMONS. What part, will the Senator advise us?

Mr. SMOOT. I should not think it would be more than 15 or 20 per cent. I do not think that much is used for that purpose. On fulminates, of course, the percentage varies. Here is the use of quicksilver in the industries:

Drugs and chemicals, 8,500 flasks.
Fulminate, 4,850 flasks.
Vermilion red, 3,130 flasks.
Oxide, 3,000 flasks.
Electrical apparatus, 2,700 flasks.
Felt manufacture, 1,700 flasks.
Gold and silver amalgamating mills, 850 flasks.
Instruments, thermostats, gas governors, automatic sprinklers, etc., 630 flasks.
Miscellaneous, including boiler compounds and cosmetics, 1,000 flasks.

The figures I have given to the Senator are flasks, and each flask contains 75 pounds, so that, so far as the drugs and chemicals are concerned, there is 8,500 out of the 26,300.

Mr. SIMMONS. Then something in excess of 30 per cent of it is used for medicinal preparations and not 15 to 20 per cent, as the Senator had estimated.

Mr. President, here is an article, quicksilver, out of which a great many other things are made which are dutiable under this bill; and the proposition of the majority is that when placing duties upon these various products of quicksilver we shall give to each of them a compensatory duty to which a protection duty is added. Whether the sum of those compensatory duties will be equal to the duty upon the raw material, or whether the sum of those compensatory duties will be very much in excess of the duty on the raw material, I do not know, and no information is furnished us upon that point. By careful and expert calculation the answer might be disclosed; but I imagine, Mr. President, that in the case of these crude materials which are used to produce many things that are upon the

dutiable list the compensatory duty given on each of them would in the aggregate greatly exceed the duty imposed upon the raw material.

I say that, however, merely in passing. Let us assume that the Senator is right, that it is necessary to put a compensatory duty upon this medicine of the people because we have put a duty upon quicksilver of 25 cents a pound, when even under the old law, which carried a duty much less than that—only 4 or 5 cents a pound—there were negligible imports. Nevertheless, the tax has been levied. I think it was a great mistake. I think you at least ought to have excepted out of the quicksilver that part of it used in making mercurial medicinal preparations, such as calomel, and that you ought to have relieved this medicine of this compensatory duty; but if calomel had to be burdened with a compensatory duty of 25 per cent, certainly there can be no justification for adding a further 20 per cent as a protective tariff upon the medicine itself, unless it be the deliberately adopted policy of the majority to tax the medicine of the people when there are practically no importations of that medicine. With negligible importations, what, may I ask, are you "protecting" against?

Now, let us see what are the facts with reference to this article. I read from the Summary of Tariff Information prepared by the Tariff Commission. It says:

> The American production of mercurial salts in 1914 was 605,701 pounds, valued at $518,023, and in 1919, according to preliminary figures, increased to 1,143,800 pounds, valued at $1,775,000. This quantity supplies a large part of the domestic consumption, as imports are small.

Let us see how small they are, Mr. President.

In 1918 the imports were 500 pounds. In 1919 the imports were 325 pounds. In 1920 they were 3,301 pounds. In nine months of 1921 the imports were 120 pounds, valued at $138, the unit value being $1.15 a pound. The importation of 120 pounds, when it is stated that the domestic production is 1,143,800 pounds, would not seem to me to justify any duty at all; but if it be said, as it has been said about other articles, that this calomel is coming in at a ruinous price, and the producer of calomel in this country is not able to compete with that price, that is completely answered by the fact that calomel in 1908 was selling at only 59 cents a pound, while the price of the foreign article is now $1.15 per pound.

You can not therefore argue that American calomel needs now to be protected against low-priced importations.

In 1909 the foreign selling price was only 61 cents a pound. In 1910 it was only 66 cents a pound. I mean the foreign price of calomel was only 66 cents a pound in 1910, under the Payne-Aldrich law. The foreign price to-day is very nearly twice that much, or $1.15 a pound, so that you can not say that even the small quantity of foreign calomel which is coming into this country is sold at such an exceedingly low price that it is driving the domestic producer of calomel out of the market.

You have these arguments against this proposition: First, a medicine used by all the people is taxed 45 per cent, not a medicine which can be dispensed with but a medicine which is absolutely necessary for the health of the people, as every physician in the section of the country from which I come will tell you. There was imported of calomel during the nine months of 1921 only 120 pounds, as against the domestic production of 1,143,000 pounds. Is it not quite absurd and affronting to our intelligence therefore to claim that a protective duty is necessary to safeguard the American producer?

You can not justify this duty therefore by the quantity of the imports. You can not justify it for that reason. You can not justify it on the ground that imported calomel is selling now at so low a price that the American producer can not compete with it, bcause we competed with it when the Payne-Aldrich law was in effect, when the foreign selling price was 66 cents a pound, and if we could compete with it then, when the foreign article was selling at 66 cents a pound, certainly we can compete with it now, when the foreign article is selling at $1.15 a pound. I assert unhesitatingly that you can not escape these, to my mind, utterly overwhelming and unanswerable reasons why this medicine of the people ought not to be taxed.

Mr. SMOOT. Mr. President, as I stated, the House provision of 30 per cent was an error, no doubt. The House imposed a duty of 35 cents a pound upon quicksilver, and that was done on the floor, and when that was made 35 cents, the House did not give a compensatory duty on calomel. It is not balanced at all.

The Senate committee provision is much less than the House provision, very much less, taking into consideration the rate of 25 cents a pound, which the Senate committee has now voted to be the rate on quicksilver.

There are about 80 per cent of mercurials in quicksilver. So, as 80 per cent of 25 cents is 20 cents, the rate on mercurials would be 20 cents a pound. The present price of calomel is 94 cents. The price of corrosive sublimate is 76 cents. Twenty cents is about 25 per cent of the price of the mercurials.

The Payne-Aldrich rate on quicksilver was 7 cents a pound, and on calomel the rate was 35 per cent. The existing law carries a rate of 15 per cent on calomel and 10 per cent upon quicksilver, or a compensatory duty equal to 5 per cent upon the manufacture of calomel in this country.

Your committee reports an amendment to the House provision raising the rate to 45 per cent ad valorem. That is 45 per cent under the foreign valuation. The House had 30 per cent under the American valuation, with quicksilver at 7 cents a pound. So the Senator can plainly see that there was no balance whatever between the rates. With 7 cents a pound imposed under the Payne-Aldrich bill, the rate was 35 per cent. The House gave 35 cents on quicksilver, instead of 7 cents, as provided in the Payne-Aldrich law, and 10 per cent in the existing law. Your committee cut that from 35 cents a pound to 25 cents a pound, and we made the ad valorem duty on the calomel itself 45 per cent.

I have already put into the RECORD the figures showing the consumption of quicksilver in the United States, and I shall not do so again, it having been done in the time of the Senator from North Carolina [Mr. SIMMONS], at his suggestion.

I do not see that it is necessary to say anything further. I frankly admit that with 25 cents a pound upon quicksilver there will be an increase of duty, not only on calomel but on vermilion red as well, and I shall ask the Senate to take up the paragraph covering vermilion red just as soon as this paragraph is disposed of.

Mr. SIMMONS. I move to amend the committee amendment by inserting "15" in lieu of "45."

The PRESIDING OFFICER. The Secretary will state the amendment.

The READING CLERK. On page 6, line 16, strike out of the committee amendment "45" and insert "15," so that it will read:

> Fifteen per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina to the committee amendment.

Mr. HITCHCOCK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Harris	McLean	Rawson
Ball	Harrison	McNary	Robinson
Bursum	Heflin	Moses	Sheppard
Capper	Hitchcock	Nelson	Shields
Colt	Johnson	Newberry	Shortridge
Culberson	Jones, Wash.	Nicholson	Simmons
Curtis	Kellogg	Norris	Smoot
Dial	Kendrick	Oddie	Sutherland
Dillingham	Keyes	Overman	Townsend
Edge	Ladd	Page	Walsh, Mass.
Elkins	Lenroot	Pepper	Walsh, Mont.
Ernst	Lodge	Phipps	Warren
Gooding	McCumber	Poindexter	Watson, Ga.
Hale	McKinley	Ransdell	Willis

The PRESIDING OFFICER. Fifty-six Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment offered by the Senator from North Carolina to the committee amendment.

Mr. SIMMONS. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. HITCHCOCK. Mr. President, before we vote I want to say a word, because I doubt whether even the supporters of this bill realize what they are doing in voting for this tariff. The Senate just voted a tariff on quicksilver amounting to 25 cents a pound. Quicksilver is necessary in the manufacture of calomel.

The Payne-Aldrich law, which was notorious for its excessive tariffs, had a tariff of only 7 cents a pound on quicksilver, but you have raised it to 25 cents. That seems to make necessary a compensatory duty on calomel, in the manufacture of which a large proportion of quicksilver is used. The Senate committee, in endeavoring to meet this situation, has proposed a tariff of 45 per cent on calomel, and yet, practically speaking, no calomel is imported into this country under the present duty of 15 per cent. The importations last year, for instance, amounted to only 2,438 pounds. That was the total amount of calomel imported into the United States in 1921, and the consumption of calomel in the United States approximates 1,000,000 pounds, so that only a fraction of 1 per cent of the calomel used in this country is imported. Yet you propose to put a duty of 45 per cent on this necessary article in medicine.

I do not know whether it is done for the protection of American labor, but no one will claim that there is any considerable amount of labor employed in the manufacture of calomel. The Senator from North Carolina has indicated pretty plainly that calomel is a necessity. We know it is not a luxury. We know in certain parts of the country, where certain ailments prevail, calomel is an absolute necessity. It is a necessity for poor people. It is something they have to go out and buy when they are in distress. Yet here it is proposed to put on a duty of 45 per cent in place of the existing duty of 15 per cent. Can there be any justification for such a proceeding as that?

There is no claim that the American calomel industry is being destroyed by importations, because 1,000,000 pounds were made in the United States last year and less than 3,000 pounds imported. I merely want to lay that before my Republican friends to see what they have to say about it. Is there any Senator here on the majority side responsible for legislation to the people who can justify trebling the existing tariff on calomel, a necessary medicine for the people, when there are no importations, practically speaking—that is, when the importations are less than 3,000 pounds against a consumption of 1,000,000 pounds? If there is any Senator who can justify that from any standpoint, I wish he would take the floor and do it.

Mr. SIMMONS. I suggest that the Senator might add that the foreign price is nearly double to-day what it was in 1910 and 1911.

Mr. HITCHCOCK. I have not gone into the matter of the foreign prices. We know that the price of calomel has fluctuated widely, but at the present time it is not far from normal. It approximates something like 80 cents a pound, as I understand, at the present time. It has gone up above that and it has been below that. May I ask the Senator if that is correct?

Mr. SIMMONS. It was $1.15 at one time.

Mr. HITCHCOCK. Yes; it has gone up considerably. At the present time, however, with the American manufacturers practically dominating the market and meeting the demands, with calomel at a normal price, with almost no importations, it is proposed to treble the existing duty on this necessary article of the people. If we could select any article that would be entitled to a low duty or that might be entitled to go upon the free list it is such an article as calomel, which is necessary for so many millions of people to use at times. Yet the duty is to be made 45 per cent as against the existing duty of 15 per cent. I do not see how any Republican who has any regard for the needs of the American people, even on the theory of a protective tariff, even upon the theory of a tariff compensating for the difference in the cost of manufacture here and abroad, even upon the theory of merely making up the difference in the labor cost here and abroad, upon any theory at all that the Republican Party has ever stood for, can vote for trebling the existing tariff on this commodity.

Mr. SMOOT. I wish to say to the Senator, as I have already stated, that the ad valorem rate imposed upon calomel of 25 per cent comes largely from the rate that the Senate voted upon quicksilver. I do not think we need worry much about what the ultimate consumer of calomel is going to pay for it. I know this is not an argument generally upon products, but I am saying this to impress not only upon the Senate but the country at large where the evils of the high cost of living rests. I do not know of a better case, since the Senator from Nebraska has brought it up, than to point to this item.

During the war when the price of calomel was double what it is now every purchaser who went to the drug store and purchased a little bottle of calomel pills about an inch high, with about one-tenth of an ounce of calomel in it, paid 35 cents for the bottle. If he goes to-day he pays the same 35 cents for the same size bottle, when the price of quicksilver is only one-half of what it was previously, and 80 per cent of calomel is quicksilver. If we made it free the druggists would not sell that little bottle of calomel pills for any less than 35 cents.

I called attention the other day to the fact that many times the ingredients of every name and nature in a prescription would not cost to exceed 5 or 6 cents, and yet the druggists sell it for 75 cents or a dollar. No tariff is ever going to interfere with a proposition of that kind. They sell it for every cent they can get. Unfortunately, many of the prescriptions are sent by the doctor to a particular drug store to be filled, and no one who has a sick child or sick relative or sick friend, when he is about to have a prescription filled, is going to quibble over the price charged when the more quickly it is filled and the sooner the patient uses it the better for the patient, if he has faith in it.

As far as medicine is concerned, some time or other there will be an investigation made from one end of this land to the other, and the question of what is in a prescription and what it costs and what it sells for to the American public will be made clear to the people. When it is known, there will not be much criticism of the cost of the materials in a prescription.

Mr. WALSH of Massachusetts. Mr. President——

Mr. SMOOT. I yield to the Senator from Massachusetts.

Mr. WALSH of Massachusetts. Does not the Senator think we should have that information before fixing a tariff duty?

Mr. SMOOT. No. If we had a rate of 100 per cent on every item it would not make a particle of difference in the price charged for the prescriptions. I would say if the tariff were 200 per cent, it would make no difference.

Mr. WALSH of Massachusetts. We could at least prevent the charge of excessive prices by making those items free on which a high duty is proposed.

Mr. SMOOT. Oh, no; we could not do that. The prescriptions are filled upon the order of a doctor. One doctor will think one prescription is what a patient needs, and another doctor will think another prescription is what he needs. If it were a case of patent medicines it would be a different thing.

Mr. ROBINSON. Mr. President, there is no doubt that the profits upon many drugs are excessive beyond reason. The little investigation I made into the matter a year or two ago convinced me that as to many drugs the retail profits exceed from 200 to 300 per cent. But I can not understand how the Senator from Utah or anyone else can think that increasing the tariff on these products will in any way afford relief from prevailing excessive prices. The only effect that an increased tariff can have is to perpetuate the conditions which now exist.

Mr. NORRIS. Mr. President, I have no doubt in my mind that the Senator from Utah [Mr. SMOOT] has correctly stated the facts with relation to the sale of this drug as well as others by druggists. It may be that if the tariff were removed or lowered, the consumer would have to pay to the druggist an exorbitant price. But I do not want to see an instrumentality of the Government which will put the druggist in a position where he will be justified for charging those prices. It is no reason, in my judgment, why we should levy an exorbitant tariff on an article of necessity because the druggists are now charging too much for the article. The minute we do it, the druggist immediately has an argument to sustain him or tending to sustain him in the exorbitant price that he charges. He will immediately say, "The tariff has been increased and we are justified." It would be better, it seems to me, in a case of that kind, if there are importations that will come in, to cut the tariff off entirely and let them come in. Perhaps that would have a tendency to lower the price of the necessities of the common people who have to get them.

It may be, too, that people would be better off if they did not use so much calomel. But, however we may feel about that, it is a drug used universally for some diseases or difficulties, and whatever course we may pursue we can not affect that. The people who have to buy, buy it not because they want to but because they are compelled to buy it. It is not a luxury, even though to some extent some people, good people, too, claim that it is not a necessity. For practical purposes it is a necessity. But because the man with a sick child or a sick wife is charged an exorbitant price by a dealer in the article is not, to my mind, a justification for Congress to assist that dealer in asking the exorbitant price.

The condition which the Senator from Utah describes, I think, is true. It only admonishes us that there is more than one evil that we have to meet in this respect. We can not meet the evil that the consumer has to contend with by increasing the tariff, thus to some extent, at least, increasing the sale price of the article. We are only adding to it. Perhaps, at least in this legislation, we are not able to reach the druggist who charges the sick an exorbitant price for a medicine but, at least, we can take away from him the argument and in some respects the right to exact that kind of a profit. If the article is cheapened, it is fair to say that there will be druggists who will cut the price. It is fair to say that if it becomes too burdensome, philanthropic people in regions where a great deal of it is used will see that the money is supplied in order that the poor may get it at a fair price.

I once heard of a druggist who employed a new prescription clerk. After he had been working in his new place for a day or two he put up a prescription for a customer, and after the customer had gone away he discovered that the customer had given him a counterfeit bill. He was very much worried for fear he would lose his position because he had not been careful enough. He went immediately to the proprietor and showed him the bill. It was a $1 bill, and was evidently a counterfeit. But instead of the proprietor reprimanding the clerk, he said,

after he looked over the prescription carefully, "How much did you charge him for that prescription?" The clerk said, "I charged him $1.10." The proprietor asked, "What about the 10 cents; was that good or was that counterfeit?" The clerk said, "Oh, no; that was good." "Oh, well," said the proprietor, "it is not so serious, then. There is still a profit of 5 cents in the transaction."

That may continue, Mr. President; but we are acting now upon the supply of this article, or a business in which that practically controls not only the price in America but to some extent in the world. We are not dependent upon foreign importations; they amount practically to nothing. So we are not going to get any revenue out of this duty to amount to anything. We hardly derive revenue enough under the existing tariff rate to pay the expenses of collecting the duty; and if it be increased as is proposed, we shall not get enough revenue to pay the expense of making the collection.

It is not necessary as a protective duty. It seems to me that a protectionist must take the other side of this question. The protectionist does not want to build an embargo; he does not want to protect monopoly. If there is no protection, and if there is no revenue, then the protectionist is in favor of a low tariff, if he be consistent with the proper theory of protection.

So far as I am concerned, Mr. President, I should be glad to vote to reduce this duty. I would put the duty on the article a great deal lower. I would, if I had my way, fix the duty lower than does the existing law. It would bring some revenue if we decreased the duty low enough, but if it is increased sufficiently high the duty becomes an embargo and the Government gets no revenue.

Mr. HITCHCOCK. Mr. President, there has not a word been said about the druggists to which I wish to refer. I presented to the Senate on yesterday a resolution which had been adopted by the retail merchants of Lincoln, Nebr. Lincoln, Nebr., is the great Republican stronghold in my State. I think it is safe to say that two out of every three of the people living in Lincoln are Republicans, and yet the retail merchants of Lincoln at a meeting held this week adopted the following resolution:

Whereas the retail dealers of the city of Lincoln are unalterably opposed to unnecessary advances in the prices of commodities; and

Whereas higher prices will react unfavorably against the retailer; and

Whereas the proposed tariff bill under consideration in the United States Senate will inevitably cause an unnecessary increase in prices, due to the large increase in the tariff rates on nearly all classes of commodities: Therefore be it

Resolved, That the retail trade promotion subdivision of the Lincoln Chamber of Commerce, at a special meeting called for the purpose of considering the effects of a high tariff, request the board of directors of the Lincoln Chamber of Commerce to convey to the Representatives and Senators from Nebraska this resolution opposing the enactment of the proposed tariff bill now under consideration.

Mr. President, the retail merchants of Lincoln, Nebr., adopted that resolution in their own defense. They know from complaints received from their customers that the American people are irking under the present high prices, and they dread the prospect of an increase of prices to the American consumer as the result of the passage of this bill.

It has been said here that the druggists are selling prescriptions containing calomel at exorbitant prices, and we hear the charge made as to other commodities that the druggists are exorbitant in their charges. Does anybody know of any retail druggist who is getting very rich? Is it the retailers of the country, ordinarily speaking, who are making fortunes? Not by any means. Do Senators realize that last year in the United States there were over 21,000 business failures, the larger number of which was made up of retailers? Do Senators realize that during the first four months of this year there have been 9,000 business failures in the United States, and that at that rate we shall have 27,000 business failures in the United States during the current year, a very large proportion of them being in the retail trade?

We hear people decry the prices that the druggists are charging, and yet we all know that the average corner drug store is only eking out an existence. Practically everything that the druggist sells is taxed. In the chemical schedule which we have been discussing almost every article sold in the drug store is subject to a tax. That is true not only as to calomel but thousands of the chemicals that every druggist uses are subjected to a tax in this bill as they are subject to a tax under the present law.

The druggist is taxed for other articles; the toothbrushes which he sells are taxed; his combs are taxed; all toilet articles which he sells are taxed; the soda water which he dispenses is taxed, as well as cigars sold over his counter.

The trouble is we have loaded up the retail trade, particularly the drug trade, with a tremendous burden of taxes. The charge against the druggist is not the only charge which is brought against the retail trade. It is a common thing to hear denunciation of the butcher for the enormous profits he is supposed to be making, but nobody sees the butcher getting rich. The wealth is made behind the butcher, by those who supply the butcher, those who monopolize the trade. We hear the plumber denounced for the great charges that he makes, but whoever hears of a plumber getting rich? We hear the ordinary retail drug store charged with excessive prices, and yet there is a terrible business mortality among the drug stores, as indicated by failures that are recorded.

We hear people complain against the retailer because, unfortunately, the retailer is on the firing line; he is the man who has to deal with the people; but it is the law which taxes these articles of consumption which is responsible for the high prices that the people pay. They pay taxes on the lumber in the buildings they occupy; they pay taxes on the brick in the buildings they occupy; they pay taxes on the cement in the buildings they occupy; and if prices are high it is due, in the first place, to Congress, which is levying such heavy taxes on the consumption of the American people. The retailer is merely the man who is on the firing line, who must meet the complaints of the people.

Mr. President, I have said that the resolution quoted by me was adopted by the merchants of a great Republican city in my State. Now, I wish to read a paragraph of what the leading Republican paper in my State, the Lincoln Journal, has to say on the subject:

WHY RETAILERS FIGHT TARIFF.

Some of the reasons the retailers of Lincoln took their decided stand against the Fordney tariff bill were explained Thursday afternoon by J. E. Miller. The action taken by the retail trade subdivision asking the chamber of commerce to urge the Nebraska delegation in Congress to work against the bill was in line with a campaign against unwarranted increases in retail prices, and the merchants of Lincoln see in the proposed tariff measure many openings for manufacturers to raise their prices. Retailers are getting tired of taking the blame for high prices, it was brought out at the special meeting Thursday morning, and they do not propose to let a new tariff, or anything else conducive to high prices, get by without a protest.

There is much more than that, but I content myself with reading that paragraph and asking that the remainder of the article be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

Every single item of tariff is higher under the Fordney bill, Mr. Miller says, and not only higher than under the present Underwood measure but higher than under the McKinley or Payne-Aldrich bills. From the entire schedule he selected a number of items of general interest and commented on them:

Wire nails, now duty free, will pay a duty of 4½ cents a pound under the Fordney measure, and every man who builds a house or a garage or a chicken coop will help foot the bill.

Sewing needles, none of which are made in this country and which are now imported under a 20 per cent tariff, would pay $1.15 a thousand, plus 40 per cent. The pre-war price of 5 cents a package of 25 amounted to $2 a gross, about the same as the new tariff alone would be.

Scissors and shears, now taxed 30 per cent, would pay from 10 to 20 cents per pair, plus 50 to 55 per cent. Scissors that sold before the war for 50 cents would thus pay a duty of more than half that.

Razors, now paying 35 to 55 per cent duty, would pay 30 to 40 cents a piece, plus 50 per cent. A half dollar English blade would thus pay a tariff of 65 cents.

Surgical instruments that are now taxed 20 to 50 per cent would pay 60 cents to $1 a dozen, plus 60 per cent.

Crude aluminum tariff would be increased from 2 cents a pound, the present rate, to 5 cents under the Fordney bill. Aluminum plates now taxed 3½ cents would pay 9 cents.

Glove taxes would be considerably increased in every line, Mr. Miller said. The tariff on 12-inch leather gloves, now $1 a dozen, would be raised to $4, with an additional 50 cents for every inch in length and additional duties for linings and embroidered backs. On a 22-inch glove the tariff would be $15 a dozen.

Men's leather gloves, up to 12 inches long, now taxed $1 a dozen, would be taxed $5. Mr. Miller attributes this item to former Congressman Littauer, who came from the glove-manufacturing district and is always called in to write glove tariffs.

Cotton gloves, such as used to be purchased in France and Germany for 35 to 50 cents a pair and are now imported under a 35 per cent duty, would be taxed $3 a dozen. Cotton hosiery, now worth $1 a dozen and paying 30 per cent tariff, will pay 70 cents a dozen, plus 15 per cent. "Cotton hosiery is not much of an issue now," Mr. Miller said, "but it has been, and will be again. This is one of the increased cost items that will fall on the people least able to bear the burden."

Cotton hosiery, worth $2 to $3 a dozen and taxed 50 per cent, would pay $1.20 a dozen, plus 15 per cent under the Fordney bill. The $3 to $5 a dozen kind, also taxed 50 per cent now, would be taxed $2 a dozen, plus 15 per cent. Thus the $2 quality would pay $1.50 tariff, and the $3 quality $2.45 tariff. Ninety per cent of all kinds of hosiery, except woolen, is made in this country, Mr. Miller said.

A long chapter could be written on the wool schedules in the Fordney bill. It makes the duty on wool 24 cents a pound, the old rate being 11 cents. Blankets that now pay 25 per cent flat would pay 20 cents a pound and 30 per cent, about the equivalent of a 50 per cent duty. A certain $5 blanket now costs the American merchant $8.22, and will cost him $10.40 if the new measure is passed. Only a small amount of woolen goods and manufactures is imported.

Mr. HITCHCOCK. What my colleague [Mr. NORRIS] said is absolutely true. The druggists may be overcharging, but when

the tariff duty on the commodities he sells is increased it amounts to giving him a license and an excuse to overcharge. We ought not to do it. Instead of raising the price of the necessaries of life, whether sold by druggists or sold by other merchants, the Congress ought to busy itself in an effort to reduce those charges. It ought to contribute its part toward reducing the cost of living, toward making life more tolerable for the people. The great mass of the people who patronize retail stores do so from necessity, and they buy necessities rather than luxuries. When a child is sick in the household and the mother goes out to get calomel she can not haggle with the druggist over what he is to charge, and he is given an excuse for charging high prices when a tax is imposed upon every article of medicine which he sells to the American people. If we want retail prices to come down, let the Congress do its part by reducing the tax on the articles which the retailers sell.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from North Carolina [Mr. SIMMONS] to the amendment reported by the committee. On that question the yeas and nays have been ordered. The Secretary will call the roll.

Mr. WALSH of Massachusetts. I ask that the amendment may be stated.

The ASSISTANT SECRETARY. In the committee amendment on page 6, line 16, it is proposed to strike out "45" and insert "15," so as to read:

PAR. 16. Calomel, corrosive sublimate, and other mercurial preparations, 15 per cent ad valorem.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). I have a pair with the junior Senator from Missouri [Mr. SPENCER]. I transfer that pair to the Senator from Texas [Mr. CULBERSON], and vote "yea."

Mr. KENDRICK (when his name was called). I have a general pair with the Senator from Illinois [Mr. MCCORMICK]. I transfer that pair to the Senator from Nevada [Mr. PITTMAN], and vote "yea."

Mr. MCKINLEY (when his name was called). I have a general pair with the senior Senator from Arkansas [Mr. CARAWAY]. As he is absent, I withhold my vote.

Mr. WATSON of Georgia (when his name was called). Making the same announcement as heretofore with regard to my pair, I withhold my vote.

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Indiana [Mr. WATSON] to the Senator from Missouri [Mr. REED], and vote "yea."

Mr. WILLIS (when his name was called). I have a pair with my colleague the senior Senator from Ohio [Mr. POMERENE]. I transfer that pair to the junior Senator from Oklahoma [Mr. HARRELD] and will vote. I vote "nay."

The roll call was concluded.

Mr. DIAL. I desire to announce that the senior Senator from Arkansas [Mr. ROBINSON] is detained from the Senate on official business. He is paired with the Senator from West Virginia [Mr. SUTHERLAND]. If present, my colleague would vote "yea."

Mr. GLASS. Making the same announcement as on the preceding vote with regard to my pair and its transfer, I vote "yea."

Mr. EDGE. I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the senior Senator from Connecticut [Mr. BRANDEGEE] and vote "nay."

Mr. JONES of Washington. Making the same announcement as to my pair and its transfer as on the previous vote, I vote "nay."

Mr. SUTHERLAND (after having voted in the negative). I transfer my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from California [Mr. SHORTRIDGE] and allow my vote to stand.

Mr. HARRIS. I transfer my pair with the junior Senator from New York [Mr. CALDER] to the senior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. BALL (after having voted in the negative). I understand the senior Senator from Florida [Mr. FLETCHER], with whom I have a general pair, has not voted. I transfer my pair with him to my colleague the junior Senator from Delaware [Mr. DU PONT] and allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL]; and

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES].

The result was announced—yeas 16, nays 33, as follows:

YEAS—16.

Ashurst	Harrison	Myers	Stanley
Dial	Heflin	Norris	Underwood
Glass	Hitchcock	Sheppard	Walsh, Mass.
Harris	Kendrick	Simmons	Williams

NAYS—33.

Ball	Johnson	Moses	Smoot
Bursum	Jones, Wash.	Newberry	Sutherland
Capper	Kellogg	Nicholson	Townsend
Curtis	Ladd	Oddie	Wadsworth
Edge	Lenroot	Page	Warren
Elkins	Lodge	Pepper	Willis
France	McCumber	Phipps	
Gooding	McLean	Poindexter	
Hale	McNary	Rawson	

NOT VOTING—47.

Borah	Ernst	McKinley	Shortridge
Brandegee	Fernald	Nelson	Smith
Broussard	Fletcher	New	Spencer
Calder	Frelinghuysen	Norbeck	Stanfield
Cameron	Gerry	Overman	Sterling
Caraway	Harreld	Owen	Swanson
Colt	Jones, N. Mex.	Pittman	Trammell
Crow	Keyes	Pomerene	Walsh, Mont.
Culberson	King	Ransdell	Watson, Ga.
Cummins	La Follette	Reed	Watson, Ind.
Dillingham	McCormick	Robinson	Weller
du Pont	McKellar	Shields	

So the amendment of Mr. SIMMONS to the amendment reported by the committee was rejected.

The VICE PRESIDENT. The question now is on agreeing to the committee amendment.

Mr. HITCHCOCK. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. HITCHCOCK. Mr. President, this is a stupendous and unprecedented thing—that a necessity to the American people should have imposed upon it a tax 29 per cent higher than ever before in the history of American tariff taxation. The Payne-Aldrich bill had only a 35 per cent tax, and that was one of the bills that was infamous on account of its excessive taxes. Now, it is proposed to impose a 45 per cent tax on a necessary article of medicine of which the Americans use nearly a million dollars' worth a year. We want a record vote on that proposition.

Mr. SMOOT. Mr. President, just for the record, I wish to state that the Payne-Aldrich law carried a rate of duty of 35 per cent ad valorem, with the duty on quicksilver at 7 cents a pound. We have voted to-day to give quicksilver a rate of 25 cents a pound. Twenty-five cents a pound on quicksilver is equivalent to a little over 25 per cent ad valorem duty upon calomel; and the rate that we are voting upon now is not more than one-half of that of the Payne-Aldrich law when we take into consideration the compensatory duty of the rate imposed upon quicksilver.

Mr. HITCHCOCK. Mr. President, the Senator seeks to take advantage of his own wrong. Having made a great increase in the tariff on quicksilver, which is a necessary and large ingredient of calomel, he says: "Now, having done that thing, we have to do this extraordinary thing. We have to impose a tax on calomel 29 per cent higher than was ever known in the history of Republican taxation. We are responsible for it; we did it; and we have to do this because we did the other."

The VICE PRESIDENT. The question is on agreeing to the committee amendment, on which the yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. BALL (when his name was called). Making the same announcement as before of my pair and its transfer, I vote "yea."

Mr. DIAL (when his name was called). Making the same announcement as on the former roll call with regard to my pair and its transfer, I vote "nay."

Mr. EDGE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. GLASS (when his name was called). Making the same announcement as on the previous roll call, I vote "nay."

Mr. HARRIS (when his name was called). Making the same announcement of my pair, I vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement of my pair and its transfer as before, I vote "yea."

Mr. KENDRICK (when his name was called). Again announcing my pair with the Senator from Illinois [Mr. MCCORMICK] and being unable to obtain a transfer, I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. DIAL (when Mr. ROBINSON's name was called). Making the same announcement as on the former roll call as to the Senator from Arkansas [Mr. ROBINSON], I desire to state that if he were present he would vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as on the previous roll call with reference to my vote and its transfer, I vote "yea."

Mr. WATSON of Georgia (when his name was called). I transfer my general pair with the junior Senator from Arizona [Mr. CAMERON] to the senior Senator from Missouri [Mr. REED] and will vote. I vote "nay."

Mr. WILLIS (when his name was called). I transfer my pair with the senior Senator from Ohio [Mr. POMERENE] to the senior Senator from Iowa [Mr. CUMMINS] and will vote. I vote "yea."

Mr. McKINLEY. I have a pair with the junior Senator from Arkansas [Mr. CARAWAY], which I transfer to the junior Senator from New Hampshire [Mr. KEYES] and will vote. I vote "yea."

Mr. WARREN (after having voted in the affirmative). Has the junior Senator from North Carolina [Mr. OVERMAN] voted?

The VICE PRESIDENT. He has not.

Mr. WARREN. I transfer my pair with that Senator to the Senator from South Dakota [Mr. NORBECK] and will allow my vote to stand.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 35, nays 16, as follows:

YEAS—35.

Ball	Harreld	McLean	Poindexter
Broussard	Johnson	McNary	Rawson
Bursum	Jones, Wash.	Moses	Smoot
Capper	Kellogg	Newberry	Sutherland
Curtis	Ladd	Nicholson	Townsend
Edge	Lenroot	Oddie	Wadsworth
France	Lodge	Page	Warren
Gooding	McCumber	Pepper	Willis
Hale	McKinley	Phipps	

NAYS—16.

Ashurst	Harrison	Norris	Stanley
Dial	Heflin	Pittman	Underwood
Glass	Hitchcock	Sheppard	Walsh, Mass.
Harris	Myers	Simmons	Watson, Ga.

NOT VOTING—45.

Borah	Ernst	Nelson	Spencer
Brandegee	Fernald	New	Stanfield
Calder	Fletcher	Norbeck	Sterling
Cameron	Frelinghuysen	Overman	Swanson
Caraway	Gerry	Owen	Trammell
Colt	Jones, N. Mex.	Pomerene	Walsh, Mont.
Crow	Kendrick	Ransdell	Watson, Ind.
Culberson	Keyes	Reed	Weller
Cummins	King	Robinson	Williams
Dillingham	La Follette	Shields	
du Pont	McCormick	Shortridge	
Elkins	McKellar	Smith	

So the amendment of the committee was agreed to.

Mr. McCUMBER. I now ask that we may return to paragraph 73, which is another commodity which is dependent upon quicksilver as its base—vermilion red. The base of vermilion red is quicksilver, and its price is dependent upon that of quicksilver.

The VICE PRESIDENT. The amendment will be stated.

The READING CLERK. On page 27, line 24, it is proposed to strike out "33" and insert "28," so as to make the paragraph read:

Vermilion reds containing quicksilver, dry or ground in or mixed with oil or water, 28 cents per pound.

Mr. McCUMBER. I desire simply to give this data in that connection:

The Underwood rate is 15 per cent ad valorem. The Payne rate was 10 cents per pound, which amounted to from 17 to 20 per cent ad valorem. The rate fixed by the committee is 28 cents a pound. In paragraph 283 a rate of duty of 25 cents per pound is imposed upon quicksilver. Eighty-five per cent of a pound of vermilion red is made of quicksilver. The compensatory duty on vermilion red is, therefore, 85 per cent of 25 cents a pound, or 21 cents per pound.

The import price during the first nine months of 1921 was 88 cents per pound. On this basis the 28 cents per pound is equal to 32 per cent. The compensatory duty is, therefore, 24 per cent, and the protective duty is 8 per cent.

Mr. GOODING. Mr. President, I ask unanimous consent to have read and printed in the RECORD a telegram I received from the secretary of the Sheep & Goat Raisers' Association of Texas.

The VICE PRESIDENT. Without objection, the Secretary will read the telegram.

The reading clerk read as follows:

DEL RIO, TEX., *May 22, 1923.*

Senator FRANK R. GOODING,
Washington, D. C.:

At recent session of the executive committee of the Sheep and Goat Raisers' Association of Texas, representing a membership of about 1,000 sheep and goat raisers of this State, the following resolution was adopted unanimously:

"Whereas at the suggestion of certain southern Senators it is proposed to have a senatorial inquisition and investigation of the effects of the emergency tariff bill upon the industries for whose benefit the same was passed; and

"Whereas we desire to go on record as to the benefits derived by the wool and mohair industries of Texas from said act; and

"Whereas we know that the stoppage of the great flood of cheaply produced foreign wools and mohairs which were being dumped upon our unprotected markets has greatly relieved our overburdened industries and preserved them from financial destruction: Now therefore be it

"*Resolved*, That we here now declare that the emergency tariff bill has saved the great wool and mohair producing industries of this State; be it further

"*Resolved*, That our secretary be, and he is hereby, instructed to forward this resolution by wire to Senator Gooding, chairman of the agricultural tariff group of the United States Senate, and request him to have same inserted in the Senate Journal for the information of southern Senators."

GEO. M. THURMOND.

Mr. UNDERWOOD. Mr. President, I suppose that after Robin Hood's band had poached on a deer in a neighboring preserve, captured it, and fed themselves properly, the band would naturally pass resolutions declaring that Robin Hood was the greatest genius of his age. Of course, we expect laudatory comments on our work from those who are the beneficiaries of our labor. But I did not rise to discuss that question.

This morning we put a high duty on a raw material, quicksilver, whose production does not require a great deal of labor in proportion to the cost. For many years, at a very low rate of duty, the American product was able to compete in the markets of the world with quicksilver of other countries. It is the acid test of competition when the American producer can send his goods to foreign countries. Some has been exported recently, in the last year or two; but notwithstanding that fact, the Senate this morning, in its wisdom, placed a duty on quicksilver more than three times the rates which have heretofore existed. Then again this morning, when we were discussing the item of calomel, we were told that because of the tax on quicksilver we had to raise the tax on a very necessary medicine, which aids in preserving the lives and health of the American people.

Now we come to paint, a commodity that is necessary to preserve the homes, and the machinery of business and industry of the United States. The Senator from North Dakota, in charge of this bill, has made a very illuminating statement, and one which I hope the American people will understand and remember, as showing the basis on which the Senate of the United States proposes to write a protective tariff bill. The Senator from North Dakota is always very fair and candid in his statements. From his point of view he expresses his mind fully, and he has just told us that on this item of paint it is necessary to have this very high duty, not merely for protection but in order to compensate the manufacturer of this paint for the higher price he has to pay for quicksilver, and he set out in his statement wherein the difference comes.

He stated that out of this rate which it is now proposed to put on this paint, and which I have no doubt the majority Members of the Senate will come in and proceed to write into the law, 24 per cent of the tax is a compensatory tax, to make up to the paint manufacturer for the fact that the Senate has put a tax on quicksilver, one of the raw materials out of which this paint is made, and that 8 per cent of the tax is for protection; that the principle of a protective tariff would be thoroughly satisfied by taxing the American people on this item of paint 8 per cent, provided there were no compensatory duties to carry into the product; but in order to compensate these manufacturers for a duty levied on something else, the American people must pay an additional tax of 45 per cent on the value of this paint.

Unless you look at it from the standpoint of the man who is in the business, and is given warrant to tax the American people behind this tariff wall for his own industry and his own private property; unless you look at it from the standpoint of Robin Hood's band after they had captured the baron's goat, I can see no justification for such a system of taxation. But you

must write a bill, piling tax on tax, because of your initial mistake in leving the tax for the sake of building up somebody else's business, instead of levying it for the primary purpose of producing revenue for the Government. That applies not only to this quicksilver item but it applies to raw wool, and to a hundred other items in this bill, which is piling sky high the burdens of the American people.

Mr. McCUMBER. The Senator admits, however, that if we place a duty upon what to the manufacturer would be raw material we must put on a compensatory duty, the same as when we place 33 cents a pound on washed wool or scoured wool, we must necessarily impose a compensatory duty on the articles which are manufactured out of that wool. Admitting all the Senator says in criticism of the system, he would still agree with us that where we have that duty it is necessary to have a compensatory duty, would he not?

Mr. UNDERWOOD. If you were writing a bill on the protective theory, certainly. That is what I am complaining against. It would not be so if you were writing a bill on the revenue theory. Of course, if you would write it on the revenue theory and proceeded to put a high tax on the raw material and a low tax on the finished product you might cause serious injury; but if you were writing it from the standpoint of a revenue duty, you would not be so foolish as to put these unreasonable taxes on at all. However, when you write it from the standpoint of protection you have not only to protect the home manufacturer and producer from foreign competition but you have to protect him against your own acts, against your own legislation, which you put on the statute books, because he will be ruined if you proceed to tax his raw material and do not give him compensation for it. As you admit, of course, that is the theory of protection, and what we protest against is that in order to carry out this theory you have to pile tax after tax on the mass of the American people. If you would just wipe the decks clear and forget that you are going to try to build these industries up on stilts and let them come down to a natural, competitive basis, this great country could exist and thrive and prosper without this great burden. But under your system you put a tax on the American people primarily for some individual who wants to exploit the American people behind a tariff wall.

Mr. SMOOT. Mr. President, I want to say that not one pound of vermilion red ever goes into a paint used by a farmer.

Mr. UNDERWOOD. I have not said anything about farmers. Somebody is going to pay it. I said the American people.

Mr. SMOOT. The Senator said it was to be used on buildings, and I thought he said the machinery of the farm; but I may be mistaken.

Mr. UNDERWOOD. Oh, no. I do not blame the Senator for having the farmer on his mind, because what he has done to the American farmer is enough to make him think about him all the time.

Mr. SMOOT. The Senator spoke about the farmer every time we were considering a duty on any pigment, and it was very natural for me to think that he was going to talk about the farmer when vermilion red was before us. He did talk about houses. Vermilion red is too costly to use in paints for houses. It is a decorative paint; it is used in artists' paints, and, as far as they are concerned, the duty no doubt will be passed on in the cost of those articles.

I am not going to repeat what the Senator from North Dakota said. This simply means that if we had free quicksilver the rate which is put in here, if converted into an equivalent ad valorem duty, would be about 9 per cent.

Mr. SIMMONS. Mr. President, we have just placed a compensatory duty on calomel, because it is made in part of quicksilver. We put a compensatory duty of 25 per cent on calomel and then added on top of that for the benefit of the manufacturer a 20 per cent additional and protective duty. The item with which we are now dealing is paint pigments. It is so described in the book. This is also made, not altogether but in large part, out of quicksilver. Twenty-five cents is added to this as a compensatory duty because of the quicksilver content, and only 3 cents protection is added in addition to that for the benefit of the manufacturer.

So that we have this situation: We add 20 per cent protection to calomel a medicine, for the benefit of the manufacturer, and 3 cents protection to paints. Evidently the majority members are more disposed to accommodate the manufacturer of calomel and give him high protection than they are to accommodate and protect the manufacturer of paints. I think the situation ought to be reversed. Both of them are wrong, but they ought to be reversed. If you are going to impose high and excessive duties it would be better to impose them upon something other than medicine.

Mr. President, here we have had two items both closely related, because both are made largely out of the same substance. The latter item of the two is one with which the Payne-Aldrich law dealt, that highest tax bill ever enacted in the country, that tax bill which brought disaster to the party which passed it, which brought about an uprising among the people and a political revolution which swept the best organized party that ever existed in this country almost out of existence for the time, which took from it all the States in this great Union except two. Yet the duty imposed in the pending bill upon this very article is nearly three times as great as that which was imposed in the Payne-Aldrich law. The duty was 10 cents a pound in the Payne-Aldrich law, and it is 28 cents here.

The Payne-Aldrich law also put a duty upon quicksilver and carried that duty forward, we will assume, under the theory of the Republican Party as a compensatory duty, but with the compensatory duty in favor of quicksilver, the Payne-Aldrich law only carried a duty on vermilion red of 10 cents, and now we are asked to impose a tax upon the American people upon this particular article nearly three times as great as that imposed under the Payne-Aldrich law.

Mr. SMOOT. The compensatory duty is, however, exactly the same in both cases; that is, 3 cents a pound. Under the Payne-Aldrich law on vermilion red it was 10 cents and on quicksilver 7 cents, the differential being 3 cents. In the pending bill the Senate committee has given 25 cents on quicksilver and 28 cents on vermilion red, the difference being 3 cents.

Mr. SIMMONS. But that does not affect the proposition laid down by the Payne-Aldrich law providing for this compensatory duty on quicksilver upon these two products. The compensatory duty on vermilion red only carried 10 per cent as against 25. The Payne-Aldrich law had a compensatory duty and this bill has a compensatory duty. So taking the two things together, the compensatory duty proposed by the Payne-Aldrich law and the duty imposed for the benefit of the manufacturer of vermilion red, we have a duty three times the Payne-Aldrich rate.

Let me see what justification there is for that great increase in the rates. There have been but two arguments made here in favor of increasing rates, or in favor rather of the high rates in the bill. One of them has been the alleged great volume of the importations from abroad, and the alleged cheap prices at which those imports were coming in, thereby undermining and destroying, as was claimed, the prosperity of the American industry. Neither of those elements exists in this case, as it was pointed out that neither of them existed in the case of calomel.

First let me call attention of the Senate to the imports as compared with the production in this country. The last statement that we have of the production of vermilion red shows that it amounted to 327,000 pounds in 1919 and about the same in 1914. In 1914 it was 322,000 pounds. So we will assume that that is about the normal output of this country, approximately 325,000 pounds. In 1918 the imports of this product, as given by the Tariff Commission, amounted to only 2,368 pounds, valued at a little over $3,000.

In 1921, for the first nine months, there were 4,200 pounds imported, or, say, a little over 5,000 pounds for the whole year. There are imports, therefore, of 5,000 pounds, as against the domestic production of 327,000 pounds.

The importations have not increased. They have been growing less and less. The imports of vermilion red in 1909, under the Payne-Aldrich law, amounted to 65,000 pounds, more than twelve times as much as they amount to to-day. In 1911, under the Payne-Aldrich law, the importations amounted to 90,000 pounds, and in 1913, under the Payne-Aldrich law, to 84,000 pounds. They have been constantly decreasing. There has not been a single year since the present law went into effect when the importations were as great as they were under the Payne-Aldrich law. In fact, there has not been a single year when the importations under the Payne-Aldrich law were not at least three times as great as they have been under the present law. They have gone down and down, from 90,000 pounds under the Payne-Aldrich law to about 5,000 pounds during the year 1921.

But let us see now if there is any underselling to justify this duty. I find that the unit value of vermilion in 1921, of the imported product, was 88 cents a pound. I find that under the Payne-Aldrich law the unit value in 1909 was 53 cents per pound; in 1910, 56 cents; in 1911, 57 cents; in 1912, 55 cents; 1913, 50 cents; and 1914, 51 cents. So that the price to-day—the foreign price of the imported article with which the American producers compete—is one and one-half times as high as it was at any time during the life of the Payne-Aldrich law or that it was at any time before the war began. If anyone will tell me any reason under these circumstances for increas-

ing the duty from 10 cents to 28 cents, I would like to have him give it. If anyone says the compensatory duty exists here, I will say that there was a compensatory duty also under the Payne-Aldrich law.

Mr. President, the truth is that these duties have no justification in the conditions which exist in this country to-day upon any theory of protection as advocated now or that has ever been advocated by the Republican Party. It is protection run mad, and there is no way of accounting for it except upon the theory that the Finance Committee and the Ways and Means Committee, in their hurry to bring out a bill, did not for themselves adequately investigate these important questions. Of course, a question of imposing taxes upon a people must be an important question. These tariff taxes are just as real as the internal-revenue taxes which we imposed upon the people last year. In many instances these tariff duties are much heavier, much more burdensome, than those internal-revenue taxes, and in no instance scarcely are they as much justified as were those taxes. In levying taxes upon the people, I do not care whether they are direct taxes or indirect taxes, they ought to be levied with care and consideration not only for the industry affected but for the people themselves.

Here I take it is the only excuse of the committee—and it is a sorry excuse—that they did not investigate themselves; they did not know the facts. They permitted the manufacturers and producers of these products to come before them and demand what they wanted and then take it. If there is any other excuse for it, I can not find it. Does the Republican Party claim that when there are practically no imports of an article coming into the country, and when the few imports that do come in are selling to-day one and one-half times as high as they ever sold before, that imports of that character carrying prices of that height so imperil the domestic producer as to make it necessary, in order to preserve his industry from ruin, to impose these enormous taxes upon the people?

If protection means that, then protection means what I have never understood and what the people of the country have never before understood it to mean. When the people of the country learn that this kind of protection has been accorded to the special interests of the country, most or many of them trusts, I predict that the storm which swept the Republican Party out of existence temporarily in 1912 will become a cyclone, a tornado, that will sweep that party more permanently if not more completely out of existence than did the storm of 1912.

Mr. President, I wish to offer an amendment. I move to strike out "28 cents a pound" and insert "15 per cent ad valorem."

The PRESIDING OFFICER (Mr. CAPPER in the chair). The amendment will be stated.

The READING CLERK. On page 27, line 24, in the committee amendment, strike out "28 cents per pound" and insert "15 per cent ad valorem," so as to read:

PAR. 73. Vermilion reds containing quicksilver, dry or ground in or mixed with oil or water, 15 per cent ad valorem.

Mr. SIMMONS. On that I demand the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). I am paired with the junior Senator from Missouri [Mr. SPENCER]. I transfer that pair to the Senator from Texas [Mr. CULBERSON], and vote "yea."

Mr. EDGE (when his name was called). Transferring my general pair with the Senator from Oklahoma [Mr. OWEN] to the Senator from Connecticut [Mr. BRANDEGEE], I vote "nay."

Mr. HARRIS (when his name was called). Making the same announcement as to the transfer of my pair as heretofore, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. DIAL (when Mr. ROBINSON's name was called). Making the same announcement as to the Senator from Arkansas [Mr. ROBINSON] as on the former ballot, I desire to say that if present the Senator from Askansas would vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the Senator from Arizona [Mr. CAMERON], which I transfer to the Senator from Tennessee [Mr. SHIELDS], and vote "yea."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Indiana [Mr. WATSON] to the Senator from Missouri [Mr. REED], and vote "yea."

Mr. WILLIS (when his name was called). Transferring my pair with my colleague, the senior Senator from Ohio [Mr. POMERENE], to the senior Senator from Iowa [Mr. CUMMINS], I vote "nay."

The roll call was concluded.

Mr. McKINLEY. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. HARRISON (after having voted in the affirmative). I inquire if the junior Senator from West Virginia [Mr. ELKINS] has voted?

The PRESIDING OFFICER. He has not.

Mr. HARRISON. I transfer my general pair with him to the junior Senator from Rhode Island [Mr. GERRY], and allow my vote to stand.

Mr. STANLEY (after having voted in the affirmative). I inquire if my colleague, the junior Senator from Kentucky [Mr. ERNST], has voted?

The PRESIDING OFFICER. He has not.

Mr. STANLEY. I have a general pair with that Senator, and therefore withdraw my vote.

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New York [Mr. CALDER] with the Senator from Georgia [Mr. HARRIS];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Wyoming [Mr. WARREN] with the Senator from North Carolina [Mr. OVERMAN];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL]; and

The Senator from South Dakota [Mr. STERLING] with the Senator from South Carolina [Mr. SMITH].

The result was announced—yeas 18, nays 31, as follows:

YEAS—18.

Ashurst	Harrison	Pittman	Walsh, Mass.
Borah	Heflin	Ransdell	Watson, Ga.
Dial	Hitchcock	Sheppard	Williams
Fletcher	Myers	Simmons	
Harris	Norris	Underwood	

NAYS—31.

Broussard	Johnson	McLean	Phipps
Bursum	Jones, Wash.	McNary	Poindexter
Capper	Kellogg	Moses	Smoot
Curtis	Ladd	Newberry	Sutherland
Edge	Lenroot	Nicholson	Townsend
France	Lodge	Oddie	Wadsworth
Gooding	McCumber	Page	Willis
Hale	McKinley	Pepper	

NOT VOTING—47.

Ball	Ernst	McKellar	Smith
Brandegee	Fernald	Nelson	Spencer
Calder	Frelinghuysen	New	Stanfield
Cameron	Gerry	Norbeck	Stanley
Caraway	Glass	Overman	Sterling
Colt	Harreld	Owen	Swanson
Crow	Jones, N. Mex.	Pomerene	Trammell
Culberson	Kendrick	Rawson	Walsh, Mont.
Cummins	Keyes	Reed	Warren
Dillingham	King	Robinson	Watson, Ind.
du Pont	La Follette	Shields	Weller
Elkins	McCormick	Shortridge	

So the amendment proposed by Mr. SIMMONS to the amendment of the Committee on Finance was rejected.

The PRESIDING OFFICER. The question recurs on the amendment proposed by the Committee on Finance.

The amendment was agreed to.

Mr. McCUMBER. I ask the return to page 6, where, after line 19, I move to add a new paragraph dealing with casein.

The PRESIDING OFFICER. The amendment proposed by the Senator from North Dakota will be stated.

The SECRETARY. On page 6, after line 19, it is proposed to insert:

PAR. 17a. Casein or lactarene, 4 cents per pound.

Mr. McCUMBER. I call the attention of my colleague, the junior Senator from North Dakota [Mr. LADD], to the proposed amendment.

Mr. LADD. Mr. President, heretofore casein has been on the free list, but the time has come, it seems to me, in view of the gradual reduction in the quantity of casein produced in this country and a corresponding increase in the quantity being imported, it is necessary that it receive some degree of protection.

More than that, if we are to build up the dairy industry, then not only butter but its products need to be protected in the same manner. We have in this country 136 factories which are

producing casein. In 1920 we imported 21,238,822 pounds; in 1919 we imported 17,076,934 pounds, and our total consumption in that year was, in round numbers, 22,000,000 pounds. The consumption in this country averages between 25,000,000 and 30,000,000 pounds a year, and we produced about one-half of the casein used in this country until within the past few years, when casein has begun to be imported largely from Argentina. The casein so imported is of an inferior quality, which has to be mixed with the American casein in order to enable it to be used. The foreign casein is coming in at a considerably lower cost than that for which the American casein can be produced. Therefore it is proposed to impose a duty of 4 cents per pound on casein.

Casein is largely used as a sizing in paper; for the manufacture of glue; for the glue coating for airplanes; to some extent in soap manufacturing; for glue used in cabinetmaking; for the preparation of imitation ivory, tortoise shell, and various other commodities. Without some degree of protection against the Argentine casein our American factories will go out of existence in a few years.

There are now 17 States where casein is manufactured to a considerable extent, the two largest being New York and California. In New York the production in 1917 was 3,208,312 pounds, but in 1918, which appears to be the last year for which reports are available, the production had fallen to 1,619,116 pounds. In California in 1917 the production was 4,090,537 pounds, but in 1918 it had fallen to 2,873,391 pounds.

Before the war the price of casein was from 7 to 8 cents a pound. During the war it very rapidly increased, because of the shortage, until it reached 30 cents or more a pound. In 1921 the price had fallen back to from 12½ cents to 15 cents a pound in April of that year, which is the latest quotation I have.

In 1914 in this country we produced 8,000,000 pounds of casein. In 1920 there were less than 7,000,000 pounds produced, according to the latest record we have. The production of the casein has not kept pace with the rapidly increasing demand in this country; and with the bringing in of the casein at a much lower price and of an inferior quality from Argentina, which does not compare with the high-grade casein that formerly came in from France, our own factories are being forced to discontinue the manufacture.

This is one of the dairy products which, in connection with the manufacture of butter and of cheese, even as a by-product, along with milk sugar, should be produced in every factory in the United States where milk is worked; and sufficient to more than supply our demand would be produced with a fair degree of protection.

I do not know that it is necessary for me to say anything more in this connection.

Mr. McCUMBER. Mr. President, I should like my colleague, if he has the data, to inform us as to the number of pounds of casein that would be obtained, say, from 100 pounds of skim milk.

Mr. LADD. Usually about 3 pounds of casein from 100 pounds of milk. About 80 per cent of the total nitrogenous matter in the milk is in the form of casein, the rest being in other forms. It is made out of skim milk; it is also made from buttermilk, and some portions are made from the whey, after cheese has been made, in some factories. The amount imported in 1909 was only 2,388,008 pounds, while in 1920 it had increased to 21,238,822 pounds. Our own production has been gradually falling off.

Mr. WALSH of Massachusetts. Mr. President, this product was transferred from the free list at the request of the so-called agricultural tariff bloc. It has never before been on the dutiable list. This product is very extensively used by our manufacturing industries. Its uses are very numerous, including the manufacture of waterproof, coated paper, paints, plastics, foods, paint remover, polish, and so forth. Its chief use, however, is in coating paper, so that the paper manufacturers throughout the country are very much interested in this amendment. They are opposed to levying a duty on casein.

The evidence before us does not warrant the transfer of this product from the free list; certainly it does not warrant the imposition of the heavy duty proposed in this amendment. The imports of casein have always been less than the home production, and to-day the price of the domestic article and the imported article is substantially the same; and yet we are asked to levy a duty of 4 cents a pound upon casein when the domestic price is about 9 or 10 cents, and the imported product is selling in America for practically the same price—10 cents.

There never has been sufficient production of casein in this country to take care of the manufacturers' demand, and the manufacturing establishments in the eastern part of our country, and particularly along the Atlantic coast, have depended largely upon the importation of this product from South America. I can not understand how a duty of 4 cents a pound can be justified upon this product.

Among those opposed to this tariff duty, as I have said, are manufacturers of paper, who must use it in coating paper; and I want to read for the information of the Senate some letters which indicate the sentiment of the paper manufacturers in regard to this duty.

I read from a letter from J. A. & W. Bird & Co., paper coaters' supplies, of Boston, Mass. This letter is dated May 3, 1922, and is as follows:

BOSTON, MASS., *May 3, 1922.*

Hon. DAVID I. WALSH,
1712 H Street NW., Washington, D. C.

DEAR SIR: We understand that there is some agitation among the farmers for a duty of 4 cents a pound to be placed on the importation of casein.

Casein, as you probably are aware, is the precipitated albumen of milk. A certain amount of this is produced by the creameries in this country, and substantial quantities are imported, principally from South America.

We are not only large handlers of American casein but also importers from other countries. It will make very little difference to us whether we obtain our supply in the United States or import it. We are always anxious to see the American farmer well taken care of and protected, but it is somewhat of a question in our minds as to whether this method is not a mistake, and one which possibly will react unfavorably upon the American farmer for the following reason:

Casein is used very largely for paper coating, and any increase in the cost of casein will increase the cost of the finished paper, which, of course, is one more straw to affect thousands of consumers throughout the country.

Casein competes with glue. If the price of casein gets too high, the coaters will use hide glue, and thus the business will be lost entirely to the American farmer and will go to the large packers who produce the largest amount of glue.

In the last three or four years there has been great difficulty in reference to prices on all commodities, and of course the price of casein has been abnormally low, casein selling as low as 6½ cents a pound. This was due very largely to the abnormal stocks of casein which were in the hands of the consumers as well as the dealers of this country and South America and everyone's desire to unload. This condition has now changed. There are no large stocks of casein on hand, and the price of casein has to-day generally stiffened to a figure which should enable the American farmers to produce in competition with South America.

Ten years ago hide glue was used almost entirely by the paper coaters, who are the largest consumers of casein. In view of the fact that they could go back to glue if the price of casein gets too high—and any such duty as is suggested would bring it into this class—for the best interest of the American farmer we would suggest going very slowly on any such imposition of duty as suggested at the present time.

Yours very truly,

J. A. & W. BIRD & CO.

I might add that it is proposed to take this product from the free list and impose a specific duty equivalent to an ad valorem duty of practically 50 per cent, because the figures that I have show that the domestic product is selling now for 9 cents and the imported product for 10 cents. Unquestionably when this duty was asked for months ago and when this rate was fixed at 4½ cents casein was selling at its very lowest price of 6½ cents. One of the chief objections to this bill is that the committee fixed their rates at the time when many of these products were at bottom prices.

The prices of the domestic product when this bill was first being considered, many months ago, were exceedingly low, because of overproduction and decreased consumption, and the duty was fixed upon information as to what was the bottom domestic and import prices of all these products rather than what is the price to-day or what the price is likely to be when we get back to normal conditions. This item illustrates splendidly the absurdity of such a practice, because at the present time both the domestic product and the imported product are competing with each other, selling at the same price, and yet we are asked to fix a duty amounting to almost 50 per cent ad valorem upon this product. This means that the manufacturers will go back to the use of glue; and that means, as was said in the letter just read, a decided advantage and benefit to the packers, from whom they will buy their glue, for when casein reaches such a price that it is not profitable to use it the coaters of paper will substitute glue, which can be used just as well and answers the purposes exactly as well as casein.

I will read a telegram on this subject from the ex-mayor of the city of Holyoke, Mass., Mr. John J. White, a paper manufacturer in that city:

[Western Union telegram.]

HOLYOKE, MASS., *April 28, 1922.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.:

Proposed duty 4 cents on casein would be extremely disastrous to the paper manufacturers and others in kindred lines.

JOHN J. WHITE.

The following letter is from the Falulah Paper Co., of my own city of Fitchburg:

FITCHBURG, MASS., *May 2, 1922.*

Hon. DAVID I. WALSH,
United States Senator, Washington, D. C.

DEAR SENATOR: We have recently been advised that the Senate agricultural bloc are requesting the Senate Finance Committee for a duty of 4 cents on casein. Records submitted to us show that the amount of this material produced by domestic manufacturers represents only a small percentage of the amount actually consumed in this country. The inevitable result of such a duty will be an increase in the price of casein to the manufacturer.

As users of this material in the manufacture of our product, we are very much opposed to such a duty.

As Senator from this district, would appreciate your taking action against the imposition of such a duty.

Thanking you, we are,

Very respectfully yours,

FALULAH PAPER CO.,
FRANKLIN WYMAN,
Purchasing Agent.

Another letter from the United Manufacturing Co., of Springfield, Mass.:

SPRINGFIELD, MASS., *March 31, 1922.*

The Hon. Senator DAVID I. WALSH,
Washington, D. C.

DEAR SIR: We understand that there is an effort being made to have a duty of 4½ cents per pound put on imported casein, and we would ask that you use your influence in having the Ways and Means Committee leave the duty off casein.

As it is, United States manufacturers can only produce about 50 per cent of the quantity used, and so that a duty of 4½ cents will only mean that advance in price will benefit them at the expense of the consumers and public.

We trust you will do your best to have this material left on the free list.

Yours very truly, THE UNITED MFG. CO.

I have an interesting letter from the Feculose Co. of America, manufacturers of feculose and sizings, of Boston, Mass. I will not take the trouble to read it; but this company requests that this amendment be approved and enacted into law, because they say it will raise the price of casein so high that the product which they make will be used as a substitute, and that casein will go out of use. They write a very strong letter urging me to support this tariff rate because it will by increasing the price of casein, diminish its use, and give them a chance to develop their product, which is a substitute for casein.

I shall not take any more of the time of the Senate upon this question. Our manufacturers must use this product, they want to use it, they are anxious to patronize and help the American farmer, but they state that the American production is less than one-half of what is needed in America, that they must import it, and they protest very vigorously against the rate of 50 per cent ad valorem—for that is what it amounts to—on this product. How will our manufacturers enjoy paying one-half as much again for this product, which is only a by-product of the creamery industry?

It indicates the fatal weakness of this bill. This bill is a bill to maintain high prices in this country. It is a bill to perpetuate the high cost of living, and all these high tariff rates on these smaller products will be reflected in the increased prices charged to the consumers of this country.

We have heard again and again in this debate an appeal for protection for the working class, we have heard appeals for the manufacturers, but we have not heard enough about the rights of the consumers of America. They have some rights, and they have a right to demand of us and of the Congress that we allow free into this country those products which can not be produced here at reasonable prices in quantities sufficient for our consumption.

It amazed me the other day to hear a Senator on this floor argue for a high protective tariff for an industry which did not produce more than 1 or 2 per cent of the demand of the consuming public. That is preposterous. I will go as far as anybody in protecting an industry which can be developed to produce a reasonable amount of the demands of the American consumers at reasonable prices, but when it comes to putting high rates of duty on articles in order to protect industries that can not take care of our consumption it means simply that we are proceeding to extort for the benefit of a few from the great consuming public.

This case is a repetition of many other cases we have had before us in the discussion of this tariff bill. Here is a jump from the free list overnight to what amounts to a 50 per cent ad valorem. How can we justify it? Yesterday we had a similar case before us, a commodity taken from the free list and a 40 per cent ad valorem levied. I should think at least we would commence with a reasonable rate, about 10 or 15 per cent ad valorem, on commodities of this kind that have heretofore been on the free list.

But I suppose the die is cast. The agricultural bloc have demanded it, and that is enough to put it in the bill. It is part of the contract. This is a bill which has been made up from beginning to end of tariff duties levied at the request of blocs and cliques and special interests, those who are in influence and power here, without any defined policy, without any underlying theory. Every principle of Republican protection to infant industries, based upon the capacity eventually to produce sufficiently for the American consuming public, has been abandoned.

I ask that the amendment be defeated, and if I am correct the defeat of the amendment will retain this product upon the free list. At the proper time I will ask that a record vote be taken and that the amendment be rejected.

Mr. McCUMBER. Mr. President, I want to read a part of one paragraph from the report of the Tariff Commission. They say:

In 1914 over 18,000,000 pounds of casein were produced here, valued at about $1,000,000; and, in addition, about 11,000,000 pounds were imported, valued at about $700,000. The total consumption in 1914 was therefore about 30,000,000 pounds, valued at about $2,000,000. Since that time, however, the domestic production has decreased until at present only about one-half the consumption is supplied here. An increased production of evaporated and condensed milk stimulated by the war has decreased the available supply of skimmed milk to the casein manufacturer. The advance in the price of corn and other products required in feeding hogs resulted in an increased use of skimmed milk for that purpose.

I call especial attention to this last phrase:

The advance in the price of corn and other products required in feeding hogs resulted in an increased use of skimmed milk for that purpose.

What advance in the price of corn? Only last winter we were reading in our papers of farmers using corn for fuel because it was so cheap that it was advantageous to use it instead of coal or wood. At the same time undoubtedly many of the farmers who took their milk to the creameries or to the cheese factories were wasting the whey and the sour milk and the skimmed milk. I could not state how many million pounds were being wasted yearly as we have no report upon that, but I am inclined to think that if the farmer could have gotten something out of his skimmed milk by selling it for a certain price to the cheese factories or to the butter factories, he could have fed his corn to the pigs instead of feeding milk to them and burning his corn for fuel.

The conditions of our farmers throughout the Northwest are such that we believe if there is any possible way we can help them to secure a good price for their by-products so that they can utilize that by-product for some value, we had better do it. That is why we took casein from the free list and gave it a duty of 4 cents per pound.

This report further says:

This shortage was reflected in the increased price of skimmed milk. The shortage and high-wage demands of farm labor, as well as increased freight rates, had a further tendency to decrease the available supply of raw material.

In other words, the great increase in the cost of farm labor made it so that the farmer could not afford, with the present price of casein, to further consider that profit at all. This duty is placed upon it in the hope that, with this increased cost of labor, he may resume what he has done before, follow the practice of selling the sour milk and the skimmed milk and the whey to the manufacturer of cheese with the idea of getting a little something as a by-product of his main product.

Mr. LODGE. Mr. President, my colleague read and had inserted in the RECORD a letter from J. A. & W. Bird & Co., which I was about to read myself; so it need not be read again. But in that letter it will be noticed that the writer states:

There are no large stocks of casein on hand, and the price of casein has to-day generally stiffened to a figure which would enable the American farmers to produce in competition with South America.

He also read a letter from the Feculose Co. of America, where they take a different view, having different interests, and that letter I ask to have printed at the close of my remarks. (See Appendix.)

I only desire to say that it is as stated in the letter which I read and which was read by my colleague, that if caseln receives this duty of 4 cents the result will be to drive all the paper coating, for which casein is principally used, to hide glue. Therefore, the manufacturer is in no danger; the user is in no danger; he can resort to hide glue.

My own belief is that the best thing for the manufacturer, as well as the best thing for the farmer, would be to develop in this country, if we could, the largest possible production of casein. All these manufacturers want to use casein. They can import it now. They can import it even under the duty, but both these writers say very frankly that they should be glad to have the American product. I believe the American industry can be encouraged. Casein is largely a by-product, and they can use the whey, the skimmed milk, and other portions of the milk which would otherwise be thrown away. They can use

them to great advantage, and it seems to me it is an industry which ought to be cultivated and helped for the benefit of the consumer. The consumers of this article are not the average man and woman of the United States. It is not an edible. They are the people who use it for paper coating, and I am very firmly of the opinion that it will be for their benefit in the long run to have American casein developed.

I have given this matter some careful consideration, because there are manufacturers who think it is to their immediate benefit to get it as cheaply as possible from another country. I believe it is for their greater benefit in the long run—and it is used exclusively by manufacturers, I think—to have the American industry, developed by American competition, rather than leave the duty as it is, destroy the American industry, and force them back to the use of hide glue. I do not believe that should occur, and for that reason I shall support the duty on casein.

APPENDIX.

BOSTON, MASS., *April 20, 1922.*

Hon. HENRY CABOT LODGE,
Member of Congress, Washington, D. C.

DEAR SIR: We send you herewith a copy of a letter which we have sent to the Finance Committee of the United States Senate covering the matter of duty on casein.

If our plant could get the encouragement of a reasonable advance on the tariff, so that the casein prices could be advanced 2 or 3 cents per pound, we believe that it would pay us to make a determined effort to get the business of the American paper coaters.

We had that business during the casein shortage several years ago, and at that time casein went up to 18 cents to 19 cents per pound. Then the conditions changed after the end of the war, and the price of casein was reduced so that they could undersell our product, and it has never advanced sufficiently to enable us to compete successfully.

Therefore there has not been any inducement for us to spend the money necessary to educate the American paper coater, who positively can use feculose for 80 per cent to 90 per cent of his entire production.

We are asking Mr. John Traquair, who is one of the leading chemists in this country along the line of surfacing sizing of paper, to write you a letter covering that point.

Trusting that we may have your assistance, we remain,

Very truly yours,

FECULOSE CO. OF AMERICA.
HERALD N. PAXTON, *Treasurer.*

P. S.: There are about 20,000,000 pounds of size used in the coating business in this country per annum when the mills are running full.

FECULOSE CO. OF AMERICA.

APRIL 6, 1922.

FINANCE COMMITTEE OF THE UNITED STATES SENATE,
Washington, D. C.

GENTLEMEN: We understand that the importers of casein are objecting to any tariff on casein on the grounds that it is absolutely essential to industries in this country, particularly the paper-coating industry, and they claim that paper can not be coated successfully without it.

We beg to inform you that we do not believe that this point of view is altogether correct. The writer has been connected with the sale of products to the paper coaters for over 25 years, and during that period there have been four or five shortages in the world's supply of casein, so that it was impossible to obtain enough of it for the various uses for which it is adapted.

The last shortage was in 1915, 1916, and 1917, and during that period many products made from starches were put on the market to do the work of coating paper. A number of these products were successful and a number of them were not. The shortage of casein forced a hurried attempt on the part of some manufacturers to make a substitute for it, but, owing to the lack of time and their ignorance of the subject, they were not successful.

However, there were some who were successful, and this company put on the market Feculose, which is made from cornstarch and which was entirely successful. Numbers of millions of pounds of it were sold to coaters, and the paper went into consumption to the satisfaction of the ultimate consumers.

We will admit that for certain lithographic uses casein has certain advantages, but that use is a very small portion of all the paper that is coated; we estimate it to be not over 10 per cent. The bulk of the coated paper is used for magazines, catalogues, illustrations, and fine printing in general. For that purpose feculose-coated paper is perfectly satisfactory.

Therefore we wish to state that paper coaters of this country can, if they choose, use products made in this country from raw material produced in this country and give employment to American manufacturers and American labor. We do not quite see why we should foster the production of casein in South America or in other parts of the world and neglect our own interests.

Should this company get a reasonable amount of protection, it could easily increase its production to suit the requirements of this market, and furthermore enable consumers of the coated paper to purchase it on the average for less money than they are paying for the paper coated with casein.

We have hesitated to start any campaign of education among the consumers here owing to the lack of protection our industry has had. We should be very glad, indeed, to get some further information from paper coaters, if it is necessary to do so.

Trusting that you will give our side of the case consideration, we remain,

Very truly yours,

FECULOSE CO. OF AMERICA.
———— ————, *Treasurer.*

Mr. WALSH of Massachusetts. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. WALSH of Massachusetts. I ask that the Secretary state the amendment.

The ASSISTANT SECRETARY. On page 6, after line 19, insert a new paragraph, as follows:

PAR. 17a. Casein or lactarene, 4 cents per pound.

The Assistant Secretary proceeded to call the roll.

Mr. GLASS (when his name was called). Making the same announcement as on the previous vote as to my pair and transfer, I vote "nay."

Mr. HARRIS (when his name was called). I transfer my pair with the Senator from New York [Mr. CALDER] to the Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and transfer, I vote "yea."

Mr. SUTHERLAND (when his name was called). I transfer my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from South Dakota [Mr. NORBECK] and vote "yea."

Mr. WATSON of Georgia (when his name was called). I transfer my pair with the junior Senator from Arizona [Mr. CAMERON] to the senior Senator from Missouri [Mr. REED] and vote "nay."

Mr. WILLIS (when his name was called). I am paired for the week with my colleague, the senior Senator from Ohio [Mr. POMERENE]. Being unable to obtain a transfer, I am compelled to withhold my vote.

Mr. MCKINLEY. I transfer my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "yea."

Mr. STERLING. I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the junior Senator from Delaware [Mr. DU PONT] and vote "yea."

Mr. FRELINGHUYSEN (after having voted in the affirmative). I transfer my general pair with the Senator from Montana [Mr. WALSH] to the senior Senator from Pennsylvania [Mr. CROW] and allow my vote to stand.

Mr. DIAL. I have a general pair with the Senator from Missouri [Mr. SPENCER], which I transfer to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

While I am on my feet I wish to announce that the Senator from Arkansas [Mr. ROBINSON] has a general pair with the Senator from West Virginia [Mr. SUTHERLAND].

Mr. STANLEY (after having voted in the negative). Has my colleague [Mr. ERNST] voted?

The PRESIDING OFFICER. He has not voted.

Mr. STANLEY. I have a pair with my colleague. Being unable to obtain a transfer, I withdraw my vote.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 34, nays 18, as follows:

YEAS—34.

Ball	Kellogg	Moses	Poindexter
Brandegee	Kendrick	Nelson	Rawson
Bursum	Ladd	Newberry	Sterling
Capper	La Follette	Nicholson	Sutherland
Curtis	Lodge	Norris	Townsend
Frelinghuysen	McCumber	Oddie	Wadsworth
Gooding	McKinley	Page	Warren
Johnson	McLean	Pepper	
Jones, Wash.	McNary	Phipps	

NAYS—18.

Ashurst	Harris	Overman	Underwood
Dial	Heflin	Ransdell	Walsh, Mass.
Fletcher	Hitchcock	Sheppard	Watson, Ga.
Glass	Keyes	Shields	
Hale	Myers	Simmons	

NOT VOTING—44.

Borah	Edge	McCormick	Smoot
Broussard	Elkins	McKellar	Spencer
Calder	Ernst	New	Stanfield
Cameron	Fernald	Norbeck	Stanley
Caraway	France	Owen	Swanson
Colt	Gerry	Pittman	Trammell
Crow	Harreld	Pomerene	Walsh, Mont.
Culberson	Harrison	Reed	Watson, Ind.
Cummins	Jones, N. Mex.	Robinson	Weller
Dillingham	King	Shortridge	Williams
du Pont	Lenroot	Smith	Willis

So the committee amendment was agreed to.

Mr. McCUMBER. Mr. President, I ask that we return to paragraph 62, on page 25, where I offer as a substitute for the committee amendment in line 25, after the numerals "25," to insert "not specially provided for," so as to read "or other forms not specially provided for, 30 per cent ad valorem."

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. On page 25, line 25, after the words "other forms," insert the words "not specially provided for," so as to read:

PAR. 62. Paints, colors, and pigments commonly known as artists' paints or colors, whether in tubes, pans, cakes, or other forms, not otherwise provided for, 30 per cent ad valorem.

Mr. SIMMONS. I wish to say to the Senator from North Dakota that my understanding is that the junior Senator from Utah [Mr. KING] desired that this paragraph should go over so that he might discuss it in connection with paragraph 26, as it relates to that paragraph.

Mr. McCUMBER. I will say to the Senator from North Carolina that after this amendment is agreed to I am going to ask that the Senate disagree to the balance of the amendment on line 25, page 25, and lines 1, 2, and 3, page 26, which will eliminate all of that matter.

Mr. SIMMONS. All relating to coal-tar dyes?

Mr. McCUMBER. Yes.

Mr. SIMMONS. Very well. I think it was for that reason the Senator from Utah desired to discuss the matter.

Mr. McCUMBER. That eliminates it; and the only question will be upon the difference between 25 and 30 per cent ad valorem.

Mr. UNDERWOOD. The purpose of the Senator's amendment is to eliminate from these products any articles that have coal-tar dye in them?

Mr. McCUMBER. Yes. This would put them all under paragraph 26, but I wish to eliminate that, at least for the present, because as to some of the articles it is a question whether they are toys or what they are. That question may arise in the future, and I want to eliminate it from this paragraph.

Mr. UNDERWOOD. I am not prepared to discuss the subject now. Of course, we shall have the opportunity hereafter. Therefore, I do not desire to delay the Senator, because after the committee amendments are settled we can come back to this item. Of course, when you put a not specially provided for clause behind a tax bill it means that you are throwing the substance to some other tax, and, of course, if you are throwing it into the coal-tar tax you are throwing it into a very high classification. You make no limit on it. If there is any coal-tar dye in it at all you throw it all in the other paragraph. As a general rule, when a not specially provided for limitation is put in a tax it usually goes where the commodity of greatest value in the substance is found. For instance, if the greatest value in the paint is a coal-tar dye, then you might have some justification for throwing it in there, but as I understand the Senator, the way he proposes to throw it, if there is any coal-tar dye in it, it is thrown into a higher classification. I am not prepared to discuss it, because it will require some degree of thought and consideration.

Mr. McCUMBER. I will state generally now that under paragraph 62 it will be observed that we have paints, colors, and pigments, commonly known as artists' paints or colors, whether in tubes, pans, cakes, or other forms. There is a serious question as to what constitutes artists' colors and what may be the little colors that are also made out of coal-tar products, which have heretofore been denominated toys, and have come under the toy paragraph. I want to eliminate those at least from this paragraph, and when we get to the toy paragraph we can then consider, first, whether they should go under the toy paragraph; and, secondly, if they do, what duty should be placed upon them. But that would eliminate them from this paragraph.

Mr. UNDERWOOD. When you put an n. s. p. f. behind a tax it means something. I am not raising any question with the Senator now, because I do not know where he is leading to. I know it is leading somewhere, but what the effect is going to be I do not know. So far as I am concerned I am not going to make any further resistance to the Senator's motion, but if it goes through without my resistance, I do not want it understood that I am committing myself to any such proposition until I have looked into it.

Mr. McCUMBER. I will say to the Senator that he will have full opportunity to consider what we want to consider, and that is where and what rate of duty we should place upon those articles which have heretofore, until a very late decision, come under the general paragraph of toys. They are not artists' paints, because artists do not use them, and they do not belong, therefore, in a paragraph which deals with artists' paints and supplies, wherever else we may put them and whatever duty may be considered adequate.

Mr. SIMMONS. Will the Senator please read again what he proposes to have inserted between the word "forms" and the numerals "30" in line 25 on page 25?

Mr. McCUMBER. The House gives 25 per cent ad valorem on the American value. This would be 30 per cent upon the foreign value, which would be somewhat lower.

Mr. SIMMONS. Mr. President, the Senator misunderstood my question. I asked the Senator what was the language that he proposed to insert between the word "forms" and the figures "25."

Mr. McCUMBER. I propose to insert the words "not otherwise specially provided for."

Mr. SIMMONS. Now, let me ask the Senator this question: If that amendment be adopted, would it not accomplish exactly the same purpose as the adoption of the proviso which the Senator proposes to strike out?

Mr. McCUMBER. I am going to ask that the proviso be disagreed to.

Mr. SIMMONS. But I say, if the proviso is disagreed to and this amendment shall be made will not the amendment accomplish the same purpose which the proviso would accomplish?

Mr. McCUMBER. No; because there are some classes of these paints, as I have explained, as to which there is serious question where they belong and how we may make the division, where the line of demarcation is between those which are generally denominated as artists' supplies and those which have heretofore come in as toys.

Mr. SMOOT. If the Senator will turn to paragraph 26, page 14, line 11, of the bill, he will see that it reads:

That any article or product which is within the terms of paragraphs 1, 5, 35, 37, 56, 63, 79, or 1578—

Paragraph 62, which we are now considering, is not included in that list, nor do we intend to offer an amendment to paragraph 26. If it were included there, then, of course, the article would fall under paragraph 26.

Mr. SIMMONS. I wish to say very frankly to the senior Senator from Utah that I had as soon take this matter up now as at any other time; but I wish to ask him if he does not think his colleague, the junior Senator from Utah [Mr. KING], desired it to go over because it had some connection with dyestuffs, and he desired to discuss it in connection with that subject? I am only asking this because of what I suppose might be the wishes of the Senator's colleague. It may be that when the Senator's colleague returns he will not care anything about it.

Mr. SMOOT. The amendment that is now pending has nothing whatever to do with the coal-tar products, because of the fact, as the Senator from North Dakota has stated, that the committee will ask that the proviso be disagreed to. My colleague asks that paragraph 62 go over because of that amendment, as it particularly referred to paragraph 26.

Mr. SIMMONS. Will the Senator from Utah or the Senator from North Dakota in charge of the bill agree that if, when the junior Senator from Utah returns to the Chamber, he desires that this paragraph may be reconsidered, that action will be taken?

Mr. SMOOT. I see no objection to that.

Mr. SIMMONS. Very well, with that understanding I am willing that the paragraph shall be considered.

Mr. McCUMBER. If it is desired that the paragraph referred to by the Senator from North Carolina may be reconsidered, I shall have no objection.

Mr. SIMMONS. Very well.

Mr. SMOOT. Mr. President, I do not think there is anything else that I desire to say in reference to this matter. Unless the Senator from North Carolina [Mr. SIMMONS] desires to ask a question, we are ready for a vote upon the amendment.

Mr. SIMMONS. Mr. President, there seems to be very little information in reference to this item, but the Senate Finance Committee has reported to increase the rate as fixed in the House bill from 25 per cent to 30 per cent. The rate of the Payne-Aldrich law was 30 per cent; that of the present law is 20 per cent. It does not seem to be an important matter, but I should be very glad to have the Senator in charge of the paragraph indicate why it is necessary to impose this high duty, which is 50 per cent higher than the present law. There do not seem to have been any considerable importations. For the last nine months there were imported only about 143,000 pounds. There does not seem to be any great flood of importations.

Mr. SMOOT. The basket clause in this schedule, as the Senator knows, proposes a duty on all pigments and salts of 25 per cent; but artists' paints are the very highest class of manufactured paints; they are made from the very finest products. The

work involved in their production is sometimes four or five times as great as in the manufacture of pigments that go into ordinary paints, and they are put up in small packages. The difference of 5 per cent is to cover the additional cost of their manufacture.

Mr. SIMMONS. Mr. President, I understood either the Senator from Utah or the Senator from North Dakota to say a little while ago that these paints are used very largely in the making of the crude pictures on toys.

Mr. SMOOT. Oh, no.

Mr. McCUMBER. The Senator from North Carolina misunderstood me.

Mr. SMOOT. That is the item that it is desired to take out of the paragraph. It includes the little crayons which the school child uses at school for coloring pictures of rabbits or lions or houses or anything that the drawing teacher may ask him to color.

Mr. SIMMONS. Will the Senator tell me what is the foreign selling price?

Mr. SMOOT. It is impossible to tell that to the Senator. We could get the average unit value of the importations, but they are not classified as to whether they are paints or colors or whether they are in tubes or pans or cakes.

Mr. SIMMONS. The document I have only gives the figures for one year, but it shows that in 1919 the foreign price, which was the landing price with the duty added without any importer's profit, was $1.03 a pound.

Mr. SMOOT. The Senator knows that was a very high price for paint.

Mr. SIMMONS. That seems to be a pretty high price for paint, but is the foreign selling price, and, if the foreign price is $1.03 a pound, it does not seem to me that the domestic product is endangered in competing with that price. That is the point I am making.

Mr. SMOOT. The Senator is mistaken, because of all the paints made the finest and most costly of all fall in this paragraph. They are only used by artists.

Mr. SIMMONS. Does the Senator contend that, in the face of the facts found by the Tariff Commission, the paints that are coming into this country and being sold in competition with those produced in this country are being brought in at sacrifice prices or cheap prices when they are selling for $1.03 a pound without any profit added to the importer?

Mr. SMOOT. No; I do not claim that; but I do claim that there are artists in the United States who will not be contented unless they have the French artist paints, no matter what the price may be.

Mr. SIMMONS. And the Senator does not want them to have it?

Mr. SMOOT. That is not what I said. I was speaking of what the artists wanted; they will have the foreign paints, and this rate of 30 per cent is not going to keep it away from them.

Mr. SIMMONS. Is it the Senator's idea not to let the artists have the foreign article by imposing a duty so high that they probably can not afford to buy it?

Mr. SMOOT. No; that is not the object of the committee, nor will that be the effect of the rate proposed.

Mr. SIMMONS. In view of the fact that there are scarcely any imports coming in and the foreign price is very high as compared with the domestic price——

Mr. SMOOT. Oh, no.

Mr. SIMMONS. Why does the Senator want to impose this high rate?

Mr. SMOOT. I think I have told the Senator all that it is necessary to tell him. The rate on all pigments, salts, and compounds in the basket clause has been fixed at 25 per cent ad valorem throughout the bill.

Mr. President, the paints now under discussion are the very finest quality known in the world. They are used in small quantities and for special purposes, and the 30 per cent duty is for the very purpose of giving protection to the industry which produces them in this country.

Mr. SIMMONS. Mr. President, if the Senator should say that the duty is imposed because it is desired to make the painters of this country buy the domestic product, I could understand that; but what I am trying to get the Senator to tell me is upon what principle of protection he bases this duty. Does he claim that the foreign article is selling in this country for less than the domestic article and that the price of the foreign article must be raised up to the domestic price so as to bring about conditions of equality in competition? Does he claim that the cost of production abroad is so much less than it is here that the American producer must have a tariff? Upon what tariff principle has this rate been fixed? It is a very high rate; 30 per cent is nearly one-third the actual value of the product; that product is being given an artificial value of nearly one-third by reason of that duty, and the American people will have to pay that artificial inflation in price. We ought, therefore, to know upon what principle of tariff duty is levied. The Senator said a little while ago that $1.03 a pound was a very high price for paints.

Mr. SMOOT. It is, compared with ordinary pigments.

Mr. SIMMONS. Yes; it is a very high price; these are high-priced paints; but I want to ask the Senator if he contends that $1.03 a pound landed costs, with nothing added but the duty, is a high or a low price as compared with the price of the American product?

Mr. SMOOT. It is lower than the American price and lower than cost for which the American producers can make the comparable article.

Mr. SIMMONS. Can the Senator tell me what the American price is without the profits? The foreign price quoted is without the jobbers' profits and without the wholesalers' profits. The American price with the wholesalers' profit added is higher than the foreign price, but the Senator should eliminate from both the American product and the foreign product the wholesalers' profit, because the foreign price has nothing in it except landing cost and the duty, no importers' profit, no jobbers' profit, no wholesalers' profits, but only the manufacturers' profit, and that alone.

Mr. SMOOT. If under this paragraph there was only one commodity the figures, of course, would show that the unit value of that one commodity was $1.03, and then, if we made only one article to compete with it in the United States, and we knew the price of that article in the United States I could answer the Senator's question; but the average price of $1.03 is not computed from one commodity alone but from a number of them falling under this paragraph, whether in tubes, or in pans, or in cakes, or in any other form. So no one can say how much of each of the various article was imported under the rate named by the Senator. Therefore I can not tell the Senator what the price of any particular commodity would be. It would be impossible.

Mr. SIMMONS. Mr. President, if the Senator can not tell me what is the difference between the cost of production here and abroad, if he can not tell me what is the difference between the price in this market of the domestic article and of the foreign article, then it does not seem to me that the Senator was in possession of sufficient information to enable him to fix this rate.

Mr. SMOOT. The Senator was in possession of the information that on ordinary, common pigments, made in immense quantities in the United States, the difference was 25 per cent, and they carried a rate of 25 per cent. These, as I have already said, are the very finest of paints, and the Senator knows that it takes more labor to make them than it takes to make the ordinary, common pigments and paints, and that 5 per cent above the 25 per cent is no more than necessary to make the differential between the coarse, ordinary pigments and the fine artists' paints. There is not any doubt about that.

Mr. SIMMONS. Mr. President, the Senator has told us before that this was not ordinary paint. He said that this was extraordinary paint; that this was the highest class of paint.

Mr. SMOOT. That is what I say now.

Mr. SIMMONS. Of course, the Senator, in making his duties, is not going to compare this extraordinary, fine, fancy paint with these common paints that I can take a brush and put on a wall as well, perhaps, as anybody else.

Mr. SMOOT. If I did, the duty would be 25 per cent ad valorem; but if I am going to compare the finer ones, then there is that differential of 5 per cent and that is all, and that is the difference between 25 and 30 per cent.

Mr. SIMMONS. But with reference to this particular article, the Senator is not in a position to tell the Senate what is the difference between the cost of production here and the cost of production abroad, and what is the difference between the price of the domestic article and the price of the foreign article in this market.

Mr. SMOOT. I will say to the Senator that there is not one particular article. That is the average price of all the importations of the numerous articles.

Mr. SIMMONS. Mr. President, I desire to offer an amendment. In line 25, page 25, I move to strike out "30" and insert in lieu thereof "20."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 25, line 25, in lieu of the sum proposed to be inserted by the committee, "30," it is proposed to insert "20," so as to read:

Paints, colors, and pigments commonly known as artists' paints or colors, whether in tubes, pans, cakes, or other forms, 20 per cent ad valorem—

And so forth.

Mr. WATSON of Georgia addressed the Senate. After having spoken for some time,

Mr. WILLIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Ohio?

Mr. WATSON of Georgia. I yield.

Mr. WILLIS. The Senator knows how much I dislike to interrupt him, because I enjoy particularly his historic discourses, but I must leave the Chamber in a few minutes to be gone for a number of days, and there are two items in the bill which I think can be voted on in a few minutes. Will the Senator permit us to vote on them?

Mr. WATSON of Georgia. That will be perfectly agreeable to me.

Mr. WILLIS. I ask for a vote on the amendment on page 25, line 25.

Mr. SIMMONS. I ask that the Secretary may state the amendment.

The VICE PRESIDENT. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 25, line 25, the committee proposed to strike out "25" and to insert the words "and not specially provided for, 30." It is now proposed to strike out "30," proposed to be inserted by the committee, and to insert "20," so that, if amended, it will read:

Paints, colors, and pigments, commonly known as artists' paints or colors, whether in tubes, pans, cakes, or other forms, and not specially provided for, 20 per cent ad valorem.

Mr. SIMMONS. Mr. President, I shall not ask for a yea-and-nay vote on this amendment, because I know what the result of a yea-and-nay vote would probably be, and I do not ask it more particularly because I know the Senator from Ohio is very anxious to have the matter acted upon expeditiously.

Mr. SMOOT. I ask that the amendment to the amendment be disagreed to.

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question now is on the committee amendment.

The amendment was agreed to.

The VICE PRESIDENT. The Secretary will state the next amendment.

Mr. SMOOT. At the end of paragraph 62, on line 25, page 25, the committee proposed to amend by adding a proviso as follows:

Provided, That any of the foregoing articles which are composed in chief value of coal-tar dyes or colors shall be classified for duty under paragraph 26.

I ask that that amendment be disagreed to.

The amendment was rejected.

Mr. SMOOT. Now, I would like to turn to paragraph 82, on page 30, where, in the paragraph providing for strontium, the committee proposed to strike out "25" and to insert "50." I ask that that amendment be disagreed to, so that the rate will be 25 per cent ad valorem.

Mr. WILLIS. In order to simplify the matter, I will withdraw the amendment I offered to that paragraph.

Mr. SIMMONS. What is the amendment offered by the committee?

Mr. SMOOT. The committee asks that the House figure, "25," be stricken out and that the rate be made 50 per cent ad valorem. I now ask that that amendment be disagreed to, so that it will leave it 25 per cent, just as the House fixed it.

Mr. SIMMONS. Of course, I am not going to object to the committee cutting in two the rate it has placed upon this particular item, but I would like to know what light has come to the committee since it put this duty of 50 per cent on, which it now desires changed to 25 per cent.

The VICE PRESIDENT. The question is on agreeing to the committee amendment as modified.

Mr. SIMMONS. I have asked for some information from the Senator in charge of the bill. This is a very remarkable situation. The committee, after a few months' deliberation, decided to raise the duty as adopted by the House from 25 per cent to 50 per cent. Now they want to cut their own rate down from 50 to 25 per cent, and I ask the Senator from Utah what new situation has developed, what new information he has, which influences him to want to make that change, and why, if the House rate is correct, they doubled it?

Mr. SMOOT. The rate was changed to 50 per cent on the foreign valuation, as against 25 per cent on the American valuation. In the Reynolds report the Senator will find that that does not justify the difference between the 25 and the 50, even as it is shown in that report. Again, the committee had already recommended 40 per cent instead of 50, and with the importations as I stated, and it being virtually controlled by one corporation, the committee thought they could get along with 25 per cent. Therefore they ask that the Senate disagree to the committee amendment.

Mr. SIMMONS. Does the Senator mean the committee found that a trust had charge of this thing?

Mr. SMOOT. No; I did not say that. They have not. There are four concerns in the United States, but, as I said on the floor of the Senate the other day, most of it is made by the Du Pont Co.

Mr. SIMMONS. Then this doubling of the House rate was not because it was ascertained that the cost of production here and abroad, or the difference in the selling price of the domestic and foreign article in the American market, would justify a 50 per cent rate?

Mr. SMOOT. The Reynolds report showed that it would take at least 60 to 100 per cent at the time the Reynolds report was made, but the price has declined not only in Europe but also in this country, and under the rates existing to-day, this product being made as it is, the committee decided that it should carry only the 25 per cent.

Mr. SIMMONS. The moderation of the Senator amazes me to such an extent that I am almost persuaded not to make any further disturbance about it.

Mr. SMOOT. The Senator can make all the disturbance he desires.

Mr. SIMMONS. It was reported that 60 per cent would not have been too much of a duty; but, notwithstanding that, the Senator is willing to cut the 50 per cent duty in half. I am glad to know there is one item in the bill as to which the Senator is satisfied with a duty he thinks is less than is necessary. I must imagine that some influence on the other side of the Chamber—it may be coming from the junior Senator from Ohio [Mr. WILLIS], who shows great solicitude about this particular item—has prevailed upon the Senator from Utah and his colleagues to be moderate and considerate of the taxpayers of the country.

Mr. SMOOT. I want the Senator to know that this is not the only rate that would be cut if I had my way.

Mr. SIMMONS. The Senator says if he had his way he would cut all the balance of them?

Mr. SMOOT. I did not say any such thing.

The VICE PRESIDENT. The question is on agreeing to the committee amendment on page 30, line 8.

The amendment was rejected.

Mr. WILLIS. I want to ask my friend from Georgia to yield just a moment longer, in order that I may express to the Senator from Georgia, the Senator from North Carolina, and the members of the committee in charge of the bill my very great appreciation of their exceedingly great courtesy in this matter.

Mr. WATSON of Georgia resumed and concluded his speech, which is entire as follows:

THE RUSSIAN SITUATION.

Mr. WATSON of Georgia. Mr. President, in this afternoon's News, on the last page, at the bottom of the second column, I find this feature article:

SENATE WARNED—MUST KEEP HANDS OFF IN RUSSIAN POLICY IS INTIMATED.

The administration desires the Senate to keep its hands off the question of Russian recognition, according to intimations conveyed to Senators to-day.

For this reason Senator BORAH'S resolution putting the Senate on record as favoring recognition of the soviet government will either be rejected, or action on it will be blocked, Republican leaders indicated.

Mr. President, I happened to be looking over a collection of the speeches of Daniel Webster this afternoon, and I was interested to find on page 60 of Volume V of this particular collection, dedicated to Mrs. Caroline Le Roy Webster, the wife of the great statesman, the following resolution offered by Mr. Webster in the other House, of which he was then a Member:

Resolved, That provision ought to be made by law for defraying the expense incident to the appointment of an agent or commissioner to Greece whenever the President shall deem it expedient to make such appointment.

That is the end of the resolution. The comment on it by the editor of this edition of the speeches is as follows:

These, it is believed, are the first official expressions favorable to the independence of Greece uttered by any of the Governments of Christendom, and no doubt contributed powerfully toward the creation of that feeling throughout the civilized world which eventually led to the Battle of Navarino and the liberation of a portion of Greece from the Turkish yoke.

The House of Representatives having, on the 19th of January, resolved itself into a Committee of the Whole and this resolution being taken into consideration, Mr. Webster spoke to the following effect—

Then follows the speech delivered on the 19th day of January, 1824. The trend of the speech—and it is a very noble oration, apparently prepared with care—is all in favor of the recognition of the success of the revolution in Greece. I wish I had time to read it. It would be a splendid contribution to the literature of the discussion concerning the Russian situation. Mr. Webster was not admonished by President Monroe to let alone the matter of the recognition of a revolutionary government.

In the life of James Monroe, by Gilman, on page 160, I find that the President makes a grateful reference to the friendship which had always been shown by the Russian people to those of America.

On page 190, the President in his message referred to the South American States which were in rebellion against the King of Spain, and the President said:

Recent events have made it manifest that the colonies not only possess independence but are certain to retain it, and that the recognition of their independence by us should now be made; that it can not be regarded by Spain as improper, and may help shorten the struggle.

Mr. President, our Government is the only one that still maintains the fiction of the existence of the Kerensky government in Russia. That government sent to ours an ambassador, Bakhmeteff; he is still recognized as the ambassador of a government notoriously extinct; and our Government throws around this man, who is accused of having embezzled for his own purpose about $80,000,000 of American money, all the immunities of an ambassador.

Mr. President, there is not another government on earth that recognizes an ambassador sent by Kerensky. Ours is the only one that does it. Naturally, the question arises, Why do we do it? England does not do it. France does not do it. No other government on earth does it.

Mr. President, there has been a de facto government in Russia for more than four years. That government has its armies, its civil administration, its courts, its system of finance, its factories going, a complete machinery of modern civilization, yet we decline to recognize it.

When in 1910 there was a revolution in Portugal, following the assassination of a king, the Taft administration, without very much delay, recognized the new Republic.

If you compare the policy of this administration with that of President Washington in dealing with revolutionary France, you will be amazed at the difference. You will naturally have some curiosity to know what is the reason for this.

I have made a note of some of the events of the French Revolution, giving the dates.

In October, 1789, the great mob of women went out to the palace of Versailles, took the king a prisoner, and carried him into Paris. He never again returned to the great palace of Versailles.

In September, 1791, the national assembly adopted a constitution.

On August 10, 1792, the women of Marseille and the great mob of Paris marched upon the Tuileries, where the king had been lodged, stormed it, massacred the Swiss, and drove the king out of that palace into the hall where the assembly was sitting, from which hall he went to a prison, and from that prison went to the guillotine, he and his queen. This happened in December, 1792.

The French massacred the prisoners who were in jail, 1,089 of them, men and women, 30 of them being Roman Catholic priests.

The French confiscated the land both of the nobles and of the church.

Mr. President, the Russians did not massacre any prisoners. They did not massacre any priests. They went no further in confiscating property than the French did. That confiscated property of the church was never restored. Only in part was the property of the nobles returned, and that was done by Napoleon Bonaparte. He found that certain portions of that property, mostly those great old ancestral chateaus, had not been disposed of; and when be brought back to their homes those nobles who had gone into voluntary exile at the beginning of the revolution, he restored these family seats to those returned emigrés; and that accounts for the fact that so many of them now are in possession of the homes that were those of their ancestors a thousand or more years ago.

I find in this volume of the Messages and Papers of the Presidents, covering the period from 1789 to 1817, that President Washington was dealing with this Government the whole time. Never once did he sever relations with the French. Gouverneur Morris stayed there as our minister.

UNITED STATES, *March 5, 1792.*

Gentlemen of the Senate and of the House of Representatives:

Knowing the friendly interest you take in whatever may promote the happiness and prosperity of the French nation, it is with pleasure that I lay before you the translation of a letter which I have received from His Most Christian Majesty, announcing to the United States of America his acceptance of the constitution presented to him by his nation.

At that time the king was virtually a prisoner. He tested it by an attempt to escape in the direction of Varennes. He was pursued, overtaken, and brought back.

Here is a message on March 18, 1794:

Gentlemen of the Senate and of the House of Representatives:

The minister plenipotentiary of the French Republic having requested an advance of money, I transmit to Congress certain documents relative to that subject.

GEORGE WASHINGTON.

So you see, Mr. President, Washington had not only recognized the French Republic, whose garments dripped with blood, but he put up to Congress in a respectful way an application for a loan.

Here is the letter in reference to the French minister, Genet:

UNITED STATES, *January 20, 1794.*

Gentlemen of the Senate and of the House of Representatives:

Having already laid before you a letter of the 16th of August, 1793, from the Secretary of State to our minister at Paris, stating the conduct and urging the recall of the minister plenipotentiary of the Republic of France, I now communicate to you that his conduct has been unequivocally disapproved and that the strongest assurances have been given that his recall should be expedited without delay.

This letter which refers to Genet, who came over here as the minister of the French revolutionary government, and who made indiscreet speeches from the time he landed at Charleston until he got to Philadelphia, where the capital then was. Washington asked his recall of this revolutionary government, and he was dismissed.

Mr. President, before proceeding to say anything about the system of land ownership in Russia, I am reminded that according to the newspapers Lord Northcliffe praised the policy of this administration in not giving recognition to the soviet government. Lord Northcliffe owns 28 of the leading daily papers of this country, and he has by some means secured control of the foreign policy of the Saturday Evening Post. An investigation was made some time ago as to the ownership of all the leading daily papers in this country, and it is stated that, almost without exception, there is an English representative on the staff of every one of those papers. Therefore it seems we may be in danger of becoming English colonies again and having our foreign policy dictated from Downing Street.

Mr. President, I do not know whether Northcliffe has bought one of those confiscated estates which so many Englishmen bought after King Henry VIII confiscated the property of the Roman Catholic Church, but we all know that Westminster Abbey was once Roman Catholic property, and the seat of the Bryon family, Newstead Abbey, was once a monastery, and Welbeck Abbey another. There are hundreds and hundreds of those great estates whose titles began in confiscation, and it seems to me that before the virtuous statesmen of England and France say too much about Russian confiscation they had better study the origin of land titles in their own countries.

But, Mr. President, I want to say a word about Russia. On page 382 of McKenzie's Nineteenth Century is this statement:

Forty-eight million Russian peasants were in bondage—subject to the arbitrary will of an owner—bought and sold with the properties on which they labored. This unhappy system was no great antiquity, for it was not till the close of the sixteenth century that the Russian peasant became a serf. The evil institution had begun to die out in the west before it was legalized in Russia.

I read that for this purpose: It is only fair to remember that at least one-fourth of the population of Russia has never had any chance to experiment in government. The French peasant was outrageously mistreated, but I will not take the time of the Senate to enumerate the horrible conditions under which he lived, but the French peasant was never whipped to make him pay his taxes. He might be stripped of his substance until he starved or became a criminal, preying upon society; but in Russia the cruel knout, used by brutal Cossacks, scourged the peasant into paying his taxes either in labor or in kind or in cash.

Now we come to the land system, and I think it will be found interesting to the Senate and to the country:

The position of the Russian serf, although it had much to degrade, was without the repulsive features of ordinary slavery. The estate of the Russian landowner was divided into two portions. The smaller of the two—usually not more than one-third—was retained for the use of the proprietor. The larger was made over to the village community, by whom it was cultivated and to whom its fruits belonged. The members of that community were all serfs, owned by the great lord and subject to his will. He could punish them by stripes when they displeased him; when he sold his lands he sold also the population. He could make or enforce such claims upon their labor as seemed good to him. Custom, however, had imposed reasonable limitations on such claims. He selected a portion of his serfs to cultivate his field and form his retinue. The remainder divided their time equally between his fields and their own—three days in each week belonged to their master and three days belonged to themselves.

Again:

The continued occupation was not voluntary but compulsory; and no peasant may withdraw without consent of the whole community, which in the northern parts of the empire is gained only by purchase. The lands thus acquired are not owned by individuals but by the community. All obligations to the former proprietor or to the State are obligations of the associated villagers. The land system of the greater portion of Russia is thus a system of communism.

I think it important, Mr. President, that we should understand that communism has always existed amongs the Slavs, and once existed, from time immemorial, in the Orient. The Russians, as I understand it, are not departing so violently or so radically from their past system. What is happening is this: The aristocrats and the Czar have gone, and the people are there. True, they committed a foul crime when they murdered the Czar and his family. But what was it when the French sent to the guillotine the harmless Louis XVI, and afterwards sent his white-haired queen? What was it in England when Charles I was sent to the block?

Let us not affect too much saintliness. Are our skirts entirely clear of wrongdoing in Hawaii, the Philippines, and in San Domingo? Was there ever a time in the history of our country when there were more different crimes, of a more horrible character? Was there ever so much poverty, so much vice, so much murder, so much robbery? The police authorities are in despair. The law courts are well-nigh paralyzed; we hear sermon after sermon and read article after article about crime waves.

Why is it we do not recognize Russia as a de facto government? Why do we not see what is visible to the world? As a matter of fact, most of the world is dealing with her now, and we are letting pass unused golden opportunities for enlarged commerce and the consumption of American products.

Mr. President, the speech of Mr. Webster on the question of Grecian independence is not very long, and it is so very timely that I ask unanimous consent that it be printed in the RECORD following my remarks, and that it be set in 8-point type.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

(Speech delivered in the House of Representatives of the United States, January 19, 1824.)

Mr. Webster spoke to the following effect:

I am afraid, Mr. Chairman, that, so far as my part in this discussion is concerned, those expectations which the public excitement existing on the subject and certain associations easily suggested by it have conspired to raise may be disappointed. An occasion which calls the attention to a spot so distinguished, so connected with interesting recollections, as Greece may naturally create something of warmth and enthusiasm. In a grave political discussion, however, it is necessary that those feelings should be chastised. I shall endeavor properly to repress them, although it is impossible that they should be altogether extinguished. We must, indeed, fly beyond the civilized world; we must pass the dominion of law and the boundaries of knowledge; we must, more especially, withdraw ourselves from this place and the scenes and objects which here surround us if we would separate ourselves entirely from the influence of all those memorials of herself which ancient Greece has transmitted for the admiration and the benefit of mankind. This free form of government, this popular assembly, the common council held for the common good—where have we contemplated its earliest models? This practice of free debate and public discussion, the contest of mind with mind, and that popular eloquence which, if it were now here, on a subject like this would move the stones of the Capitol—whose was the language in which all these were first exhibited? Even the edifice in which we assemble, these proportioned columns, this ornamented architecture—all remind us that Greece has existed and that we, like the rest of mankind, are greatly her debtors. (The interior of the Hall of the House of Representatives is surrounded by a magnificent colonnade of the composite order.)

But I have not introduced this motion in the vain hope of discharging anything of this accumulated debt of centuries. I have not acted upon the expectation that we, who have inherited this obligation from our ancestors, should now attempt to pay it to those who may seem to have inherited from their ancestors a right to receive payment. My object is nearer and more immediate. I wish to take occasion of the struggle of an interesting and gallant people in the cause of liberty and Christianity, to draw the attention of the House to the circumstances which have accompanied that struggle and to the principles which appear to have governed the conduct of the great States of Europe in regard to it, and to the effects and consequences of these principles upon the independence of nations and especially upon the institutions of free governments. What I have to say of Greece, therefore, concerns the modern, not the ancient; the living, and not the dead. It regards her, not as she exists in history, triumphant over time and tyranny and ignorance, but as she now is, contending against fearful odds for being and for the common privileges of human nature.

As it is never difficult to recite commonplace remarks and trite aphorisms, so it may be easy, I am aware, on this occasion to remind me of the wisdom which dictates to men a care of their own affairs and admonishes them, instead of searching for adventures abroad, to leave other men's concerns in their own hands. It may be easy to call this resolution Quixotic, the emanation of a crusading or propagandist spirit. All this and more may be readily said, but all this and more will not be allowed to fix a character upon this proceeding until that is proved which it takes for granted. Let it first be shown that in this question there is nothing which can affect the interest, the character, or the duty of this country. Let it be proved that we are not called upon by either of these considerations to express an opinion on the subject to which the resolution relates. Let this be proved, and then it will indeed be made out that neither ought this resolution to pass nor ought the subject of it to have been mentioned in the communication of the President to us. But, in my opinion, this can not be shown. In my judgment the subject is interesting to the people and the Government of this country, and we are called upon by considerations of great weight and moment to express our opinions upon it. These considerations, I think, spring from a sense of our own duty, our character, and our own interest. I wish to treat the subject on such grounds exclusively as are truly American; but then, in considering it as an American question, I can not forget the age in which we live, the prevailing spirit of the age, the interesting questions which agitate it and our own peculiar relation in regard to these interesting questions. Let this be, then, and as far as I am concerned I hope it will be, purely an American discussion; but let it embrace, nevertheless, everything that fairly concerns America. Let it comprehend not merely her present advantage but her permanent interest, her elevated character as one of the free States of the world, and her duty toward those great principles which have hitherto maintained the relative independence of nations and which have, more especially, made her what she is.

At the commencement of the session the President, in the discharge of the high duties of his office, called our attention to the subject to which this resolution refers. "A strong hope," says that communication, "has been long entertained, founded on the heroic struggle of the Greeks, that they would succeed in their contest and resume their equal station among the nations of the earth. It is believed that the whole civilized world takes a deep interest in their welfare. Although no power has declared in their favor, yet none, according to our information, has taken part against them. Their cause and their name have protected them from dangers which might ere this have overwhelmed any other people. The ordinary calculations of interest, and of acquisition with a view to aggrandizement, which mingle so much in the transactions of nations, seem to have had no effect in regard to them. From the facts which have come to our knowledge, there is good cause to believe that their enemy has lost forever all dominion over them; that Greece will become again an independent nation."

It has appeared to me that the House should adopt some resolution reciprocating these sentiments, so far as it shall approve them. More than twenty years have elapsed since Congress first ceased to receive such a communication from the President as could properly be made the subject of a general answer. I do not mean to find fault with this relinquishment of a former and an ancient practice. It may have been attended with inconveniences which justified its abolition. But certainly there was one advantage belonging to it; and that is, that it furnished a fit opportunity for the expression of the opinion of the Houses of Congress upon those topics in the executive communication which were not expected to be made the immediate subjects of direct legislation. Since, therefore, the President's message does not now receive a general answer, it has seemed to me to be proper that in some mode agreeable to our own usual form of proceeding we should express our sentiments upon the important and interesting topics on which it treats.

If the sentiments of the message in respect to Greece be proper, it is equally proper that this House should reciprocate those sentiments. The present resolution is designed to have that extent, and no more. If it pass, it will leave any future proceeding where it now is, in the discretion of the executive government. It is but an expression, under those forms in which the House is accustomed to act, of the satisfaction of the House with the general sentiments expressed in regard to this subject in the message and of its readiness to defray the expense incident to any inquiry for the purpose of further information,

or any other agency which the President, in his discretion, shall see fit, in whatever manner and at whatever time to institute. The whole matter is still left in his judgment, and this resolution can in no way restrain its unlimited exercise.

I might well, Mr. Chairman, avoid the responsibility of this measure if it had, in my judgment, any tendency to change the policy of the country. With the general course of that policy I am quite satisfied. The Nation is prosperous, peaceful, and happy; and I should very reluctantly put its peace, prosperity, or happiness at risk. It appears to me, however, that this resolution is strictly conformable to our general policy and not only consistent with our interest, but even demanded by a large and liberal view of those interests.

It is certainly true that the just policy of this country is, in the first place, a peaceful policy. No nation ever had less to expect from forcible aggrandizement. The mighty agents which are working out our greatness are time, industry, and the arts. Our augmentation is by growth, not by acquisition; by internal development, not by external accession. No schemes can be suggested to us so magnificent as the prospects which a sober contemplation of our own condition, unaided by projects, uninfluenced by ambition, fairly spreads before us. A country of such vast extent, with such varieties of soil and climate, with so much public spirit and private enterprise, with a population increasing so much beyond former example, with capacities of improvement not only unapplied or unexhausted, but even in a great measure, as yet unexplored—so free in its institutions, so mild in its laws, so secure in the title it confers on every man to his own acquisitions—needs nothing but time and peace to carry it forward to almost any point of advancement.

In the next place, I take it for granted that the policy of this country, springing from the nature of our Government and the spirit of all our institutions is, so far as it respects the interesting questions which agitate the present age, on the side of liberal and enlightened sentiments. The age is extraordinary; the spirit that actuates it is peculiar and marked; and our own relation to the times we live in, and to the questions which interest them, is equally marked and peculiar. We are placed, by our good fortune and the wisdom and valor of our ancestors, in a condition in which we can act no obscure part. Be it for honor, or be it for dishonor, whatever we do is sure to attract the observation of the world. As one of the free States among the nations, as a great and rapidly rising Republic, it would be impossible for us, if we were so disposed, to prevent our principles, our sentiments, and our examples from producing some effect upon the opinions and hopes of society throughout the civilized world. It rests probably with ourselves to determine whether the influence of these shall be salutary or pernicious.

It can not be denied that the great political question of this age is that between absolute and regulated governments. The substance of the controversy is whether society shall have any part in its own government. Whether the form of government shall be that of limited monarchy, with more or less mixture of hereditary power, or wholly elective or representative, may perhaps be considered as subordinate. The main controversy is between that absolute rule which, while it promises to govern well, means, nevertheless, to govern without control, and that constitutional system which restrains sovereign discretion, and asserts that society may claim as matter of right some effective power in the establishment of the laws which are to regulate it. The spirit of the times sets with a most powerful current in favor of these last-mentioned opinions. It is opposed, however, whenever and wherever it shows itself, by certain of the great potentates of Europe; and it is opposed on grounds as applicable in one civilized nation as in another, and which would justify such opposition in relation to the United States, as well as in relation to any other State or nation, if time and circumstances should render such opposition expedient.

What part it becomes this country to take on a question of this sort, so far as it is called upon to take any part, can not be doubtful. Our side of this question is settled for us, even without our own volition. Our history, our situation, our character, necessarily decide our position and our course, before we have even time to ask whether we have an option. Our place is on the side of free institutions. From the earliest settlement of these States, their inhabitants were accustomed, in a greater or less degree, to the enjoyment of the powers of self-government; and for the last half century they have sustained systems of government entirely representative, yielding to themselves the greatest possible prosperity, and not leaving them without distinction and respect among the nations of the earth. This system we are not likely to abandon; and while we shall no further recommend its adoption to other nations, in whole or in part, than it may recommend itself by its visible influence on our own growth and prosperity, we are nevertheless interested to resist the establishment of doctrines which deny the legality of its foundations. We stand as an equal among nations, claiming the full benefit of the established international law; and it is our duty to oppose, from the earliest to the latest moment, any innovations upon that code which shall bring into doubt or question our own equal and independent rights.

I will now, Mr. Chairman, advert to those pretensions put forth by the allied sovereigns of continental Europe, which seem to me calculated, if unresisted, to bring into disrepute the principles of our Government, and, indeed, to be wholly incompatible with any degree of national independence. I do not introduce these considerations for the sake of topics. I am not about to declaim against crowned heads, nor to quarrel with any country for preferring a form of government different from our own. The right of choice that we exercise for ourselves I am quite willing to leave also to others. But it appears to me that the pretensions to which I have alluded are wholly inconsistent with the independence of nations generally, without regard to the question whether their governments be absolute, monarchial and limited, or purely popular and representative. I have a most deep and thorough conviction that a new era has arisen in the world, that new and dangerous combinations are taking place promulgating doctrines and fraught with consequences wholly subversive in their tendency of the public law of nations and of the general liberties of mankind. Whether this be so or not is the question which I now propose to examine upon such grounds of information as are afforded by the common and public means of knowledge.

Everybody knows that since the final restoration of the Bourbons to the throne of France the continental powers have entered into sundry alliances, which have been made public, and have held several meetings or congresses, at which the principles of their political conduct have been declared. These things must necessarily have an effect upon the international law of the States of the world. If that effect be good and according to the principles of that law, they deserve to be applauded. If, on the contrary, their effect and tendency be most dangerous, their principles wholly inadmissible, their pretensions such as would abolish every degree of national independence, then they are to be resisted.

I begin, Mr. Chairman, by drawing your attention to the treaty concluded at Paris in September, 1815, between Russia, Prussia, and Austria, commonly called the Holy Alliance. This singular alliance appears to have originated with the Emperor of Russia; for we are informed that a draft of it was exhibited by him, personally, to a plenipotentiary of one of the great powers of Europe, before it was presented to the other sovereigns who ultimately signed it. (See Lord Castlereagh's speech in the House of Commons, February 3, 1816. Debates in Parliament, vol. 36, p. 355; where, also, the treaty may be found at length.) This instrument professes nothing, certainly, which is not extremely commendable and praiseworthy. It promises only that the contracting parties, both in relation to other States and in regard to their own subjects, will observe the rules of justice and Christianity. In confirmation of these promises, it makes the most solemn and devout religious invocations. Now, although such an alliance is a novelty in European history, the world seems to have received this treaty, upon its first promulgation, with general charity. It was commonly understood as little or nothing more than an expression of thanks for the successful termination of the momentous contest in which those sovereigns had been engaged. It still seems somewhat unaccountable, however, that these good resolutions should require to be confirmed by treaty. Who doubted that these august sovereigns would treat each other with justice, and rule their own subjects in mercy? And what necessity was there for a solemn stipulation by treaty to insure the performance of that which is no more than the ordinary duty of every government? It would hardly be admitted by these sovereigns that by this compact they consider themselves bound to introduce an entire change, or any change, in the course of their own conduct. Nothing substantially new, certainly, can be supposed to have been intended. What principle, or what practice, therefore, called for this solemn declaration of the intention of the parties to observe the rules of religion and justice?

It is not a little remarkable that a writer of reputation upon the public law described, many years ago, not inaccurately, the character of this alliance. I allude to Puffendorf. "It seems useless," says he, "to frame any pacts or leagues barely for the defense and support of universal peace; for by such a league nothing is superadded to the obligation of natural law, and no agreement is made for the performance of anything which the parties were not previously bound to perform; nor is the original obligation rendered firmer or stronger by such an addition. Men of any tolerable culture and civilization might well be

ashamed of entering into any such compact, the conditions of which imply only that the parties concerned shall not offend in any clear point of duty. Besides, we should be guilty of great irreverence toward God should we suppose that His injunctions had not already laid a sufficient obligation upon us to act justly, unless we ourselves voluntarily consented to the same engagement; as if our obligation to obey His will depended upon our own pleasure.

"If one engage to serve another, he does not set it down expressly and particularly among the terms and conditions of the bargain, that he will not betray nor murder him, nor pillage nor burn his house. For the same reason that would be a dishonorable engagement, in which men should bind themselves to act properly and decently and not break the peace." (Law of Nature and Nations, Book II, ch. 2, sec. 11.)

Such were the sentiments of that eminent writer. How nearly he had anticipated the case of the Holy Alliance will appear from the preamble to that alliance. After stating that the allied sovereigns had become persuaded, by the events of the last three years, that "their relations with each other ought to be regulated exclusively by the sublime truths taught by the eternal religion of God the Saviour," they solemnly declare their fixed resolution "to adopt as the sole rule of their conduct, both in the administration of their respective States, and in their political relations with every other government, the precepts of that holy religion, namely, the precepts of justice, charity, and peace, which, far from being applicable to private life alone, ought, on the contrary, to have a direct influence upon the counsels of princes, and guide all their steps, as being the only means of consolidating human institutions, and remedying their imperfections." (Martens, Recueil des Traités, Tome XIII, p. 656.)

This measure, however, appears principally important, as it was the first of a series, and was followed afterwards by others of a more marked and practical nature. These measures, taken together, profess to establish two principles, which the allied powers would introduce as a part of the law of the civilized world and the establishment of which is to be enforced by a million and a half of bayonets.

The first of these principles is that all popular or constitutional rights are held no otherwise than as grants from the Crown. Society, upon this principle, has no rights of its own; it takes good government, when it gets it, as a boon and a concession, but can demand nothing. It is to live by that favor which emanates from royal authority, and if it have the misfortune to lose that favor, there is nothing to protect it against any degree of injustice and oppression. It can rightfully make no endeavor for a change by itself; its whole privilege is to receive the favors that may be dispensed by the sovereign power, and all its duty is described in the single word submission. This is the plain result of the principal continental State papers; indeed, it is nearly the identical text of some of them.

The circular dispatch addressed by the sovereigns assembled at Laybach in the spring of 1821 to their ministers at foreign courts alleges "that useful and necessary changes in legislation and in the administration of States ought only to emanate from the free will and intelligent and well-weighed conviction of those whom God has rendered responsible for power. All that deviates from this line necessarily leads to disorder, commotions, and evils far more insufferable than those which they pretend to remedy." (Annual Register for 1821, p. 601.) Now, sir, this principle would carry Europe back again at once into the middle of the Dark Ages. It is the old doctrine of the divine right of kings, advanced now by new advocates, and sustained by a formidable array of power. That the people hold their fundamental privileges as matter of concession or indulgence from the sovereign power, is a sentiment not easy to be diffused in this age any further than it is enforced by the direct operation of military means. It is true, certainly, that some six centuries ago the early founders of English liberty called the instrument which secured their rights a charter. It was, indeed, a concession; they had obtained it sword in hand from the king; and in many other cases whatever was obtained favorable to human rights from the tyranny and despotism of the feudal sovereigns was called by the names of privileges and liberties as being matter of special favor. Though we retain this language at the present time, the principle itself belongs to ages that have long passed by us. The civilized world has done with "the enormous faith of many made for one." Society asserts its own rights, and alleges them to be original, sacred, and inalienable. It is not satisfied with having kind masters; it demands a participation in its own government; and in States much advanced in civilization it urges this demand with a constancy and an energy that can not well nor long be resisted. There are, happily, enough of regulated governments in the world, and those among the most distinguished, to operate as constant examples and to keep alive an unceasing panting in the bosoms of men for the enjoyment of similar free institutions.

When the English revolution of 1688 took place the English people did not content themselves with the example of Runnymede; they did not build their hopes upon royal charters; they did not, like the authors of the Laybach circular, suppose that all useful changes in constitutions and laws must proceed from those only whom God has rendered responsible for power. They were somewhat better instructed in the principles of civil liberty, or at least they were better lovers of those principles than the sovereigns of Laybach. Instead of petitioning for charters, they declared their rights, and while they offered to the Prince of Orange the crown with one hand, they held in the other an enumeration of those privileges which they did not profess to hold as favors, but which they demanded and insisted upon as their undoubted rights.

I need not stop to observe, Mr. Chairman, how totally hostile are these doctrines of Laybach to the fundamental principles of our Government. They are in direct contradiction; the principles of good and evil are hardly more opposite. If these principles of the sovereigns be true, we are but in a state of rebellion or of anarchy, and are only tolerated among civilzed States because it has not yet been convenient to reduce us to the true standard.

But the second and, if possible, the still more objectionable principle avowed in these papers is the right of forcible interference in the affairs of other States. A right to control nations in their desire to change their own Government, wherever it may be conjectured or pretended that such change might furnish an example to the subjects of other States is plainly and distinctly asserted. The same Congress that made the declaration at Laybach had declared, before its removal from Troppau, "that the powers have an undoubted right to take a hostile attitude in regard to those States in which the overthrow of the Government may operate as an example."

There can not, as I think, be conceived a more flagrant violation of public law or national independence, than is contained in this short declaration.

No matter what be the character of the Government resisted, no matter with what weight the foot of the oppressor bears on the neck of the oppressed, if he struggle or if he complain, he sets a dangerous example of resistance, and from that moment he becomes an object of hostility to the most powerful potentates of the earth. I want words to express my abhorrence of this abominable principle. I trust every enlightened man throughout the world will oppose it, and that especially those who, like ourselves, are fortunately out of the reach of the bayonets that enforce it, will proclaim their detestation of it in a tone both loud and decisive. The avowed object of such declarations is to preserve the peace of the world. But by what means is it proposed to preserve this peace? Simply by bringing the power of all Governments to bear against all subjects. Here is to be established a sort of double or treble or quadruple or, for aught I know, quintuple allegiance. An offense against one king is to be an offense against all kings, and the power of all is to be put forth for the punishment of the offender. A right to interfere in extreme cases, in the case of contiguous States, and where imminent danger is threatened to one by what is occurring in another, is not without precedent in modern times, upon what has been called the law of vicinage; and when confined to extreme cases, and limited to a certain extent, it may perhaps be defended upon principles of necessity and self-defense. But to maintain that sovereigns may go to war upon the subjects of another State to repress an example, is monstrous indeed. What is to be the limit to such a principle, or to the practice growing out of it? What, in any case, but sovereign pleasure, is to decide whether the example be good or bad? And what, under the operation of such a rule, may be thought of our example? Why are we not as fair objects for the operation of the new principle as any of those who may attempt a reform of government on the other side of the Atlantic?

The ultimate effect of this alliance of sovereigns, for objects personal to themselves, or respecting only the permanence of their own power, must be the destruction of all just feeling and all natural sympathy between those who exercise the power of government and those who are subject to it. The old channels of mutual regard and confidence are to be dried up or cut off. Obedience can now be expected no longer than it is enforced. Instead of relying on the affections of the governed, sovereigns are to rely on the affections and friendship of other sovereigns. There are, in short, no longer to be nations.

Princes and people are no longer to unite for interests common to them both. There is to be an end of all patriotism as a distinct national feeling. Society is to be divided horizontally; all sovereigns above and all subjects below, the former coalescing for their own security and for the more certain subjection of the undistinguished multitude beneath. This, sir, is no picture drawn by imagination.

I have hardly used language stronger than that in which the authors of this new system have commented on their own work. M. de Chateaubriand in his speech in the French Chamber of Deputies in February last decared that he had a conference with the Emperor of Russia at Verona, in which that august sovereign uttered sentiments which appeared to him so precious that he immediately hastened home and wrote them down while yet fresh in his recollection. "The Emperor declared," said he, "that there can no longer be such a thing as an English, French, Russian, Prussian, or Austrian policy; there is henceforth but one policy, which, for the safety of all, should be adopted both by people and kings. It was for me first to show myself convinced of the principles upon which I founded the alliance; an occasion offered itself—the rising in Greece. Nothing certainly could occur more for my interests, for the interests of my people; nothing more acceptable to my country than a religious war in Turkey. But I have thought I perceived in the troubles of the Morea the sign of revolution, and I have held back. Providence has not put under my command 800,000 soldiers to satisfy my ambition, but to protect religion, morality, and justice, and to secure the prevalence of those principles of order on which human society rests. It may well be permitted that kings may have public alliances to defend themselves against secret enemies."

These, sir, are the words which the French minister thought so important that they deserved to be recorded; and I, too, sir, am of the same opinion. But if it be true that there is hereafter to be neither a Russian policy, nor a Prussian policy, nor an Austrian policy, nor a French policy, nor even, which yet I will not believe, an English policy, there will be, I trust in God, an American policy. If the authority of all these Governments be hereafter to be mixed and blended, and to flow in one augmented current of prerogative over the face of Europe, sweeping away all resistance in its course, it will yet remain for us to secure our own happiness by the preservation of our own principles, which I hope we shall have the manliness to express on all proper occasions and the spirit to defend in every extremity. The end and scope of this amalgamated policy are neither more nor less than this, to interfere by force for any government against any people who may resist it. Be the state of the people what it may, they shall not rise; be the government what it will, it shall not be opposed.

The practical commentary has corresponded with the plain language of the text. Look at Spain and at Greece. If men may not resist the Spanish inquisition and the Turkish cimeter, what is there to which humanity must not submit? Stronger cases can never arise. Is it not proper for us at all times, is it not our duty at this time to come forth and deny and condemn these monstrous principles? Where but here and in one other place are they likely to be resisted? They are advanced with equal coolness and boldness, and they are supported by immense power. The timid will shrink and give way, and many of the brave may be compelled to yield to force. Human liberty may yet, perhaps, be obliged to repose its principal hopes on the intelligence and the vigor of the Saxon race. As far as depends on us, at least, I trust those hopes will not be disappointed, and that, to the extent which may consist with our own settled, pacific policy, our opinions and sentiments may be brought to act on the right side and to the right end on an occasion which is in truth nothing less than a momentous question between an intelligent age, full of knowledge, thirsting for improvement, and quickened by a thousand impulses on one side, and the most arbitrary pretensions, sustained by unprecedented power, on the other.

This asserted right of forcible intervention in the affairs of other nations is in open violation of the public law of the world. Who has authorized these learned doctors of Troppau to establish new articles in this code? Whence are their diplomas? Is the whole world expected to acquiesce in principles which entirely subvert the independence of nations? On the basis of this independence has been reared the beautiful fabric of international law. On the principle of this independence Europe has seen a family of nations flourishing within its limits, the small among the large, protected not always by power but by a principle above power, by a sense of propriety and justice. On this principle the great commonwealth of civilized States has been hitherto upheld. There have been occasional departures or violations, and always disastrous, as in the case of Poland; but in general the harmony of the system has been wonderfully preserved. In the production and preservation of this sense of justice, this predominating principle, the Christian religion has acted a main part. Christianity and civilization have labored together; it seems, indeed, to be a law of our human condition that they can live and flourish only together. From their blended influence has arisen that delightful spectacle of the prevalence of reason and principle over power and interest, so well described by one who was an honor to the age—

> And sovereign law, the State's collected will,
> O'er thrones and globes elate,
> Sits empress, crowning good, repressing ill:
> Smit by her sacred frown,
> The fiend, Discretion, like a vapor, sinks,
> And e'en the all-dazzling crown,
> Hides his faint rays, and at her bidding shrinks—

but this vision is past. While the teachers of Laybach give the rule, there will be no law but the law of the strongest.

It may now be required of me to show what interest we have in resisting this new system. What is it to us, it may be asked, upon what principles, or what pretenses, the European Governments assert a right of interfering in the affairs of their neighbors? The thunder, it may be said, rolls at a distance. The wide Atlantic is between us and danger, and, however others may suffer, we shall remain safe.

I think it is a sufficient answer to this to say that we are one of the nations of the earth; that we have an interest, therefore, in the preservation of that system of national law and national intercourse which has heretofore subsisted so beneficially for all. Our system of government, it should also be remembered, is throughout founded on principles utterly hostile to the new code, and if we remain undisturbed by its operation we shall owe our security either to our situation or our spirit. The enterprising character of the age, our own active commercial spirit, the great increase which has taken place in the intercourse among civilized and commercial States, have necessarily connected us with other nations and given us a high concern in the preservation of those salutary principles upon which that intercourse is founded. We have as clear an interest in international law as individuals have in the laws of society.

But apart from the soundness of the policy, on the ground of direct interest, we have, sir, a duty connected with this subject which, I trust, we are willing to perform. What do we not owe to the cause of civil and religious liberty? To the principle of lawful resistance? To the principle that society has a right to partake in its own Government? As the leading Republic of the world, living and breathing in these principles and advanced by their operation with unequaled rapidity in our career, shall we give our consent to bring them into disrepute and disgrace? It is neither ostentation nor boasting to say that there lies before this country, in immediate prospect, a great extent and height of power. We are borne along toward this without effort and not always even with a full knowledge of the rapidity of our own motion. Circumstances which never combined before have cooperated in our favor, and a mighty current is setting us forward which we could not resist even if we would, and which, while we would stop to make an observation and take the sun, has set us, at the end of the operation, far in advance of the place where we commenced it. Does it not become us, then—is it not a duty imposed on us—to give our weight to the side of liberty and justice, to let mankind know that we are not tired of our own institutions, and to protest against the asserted power of altering at pleasure the law of the civilized world?

But whatever we do in this respect it becomes us to do upon clear and consistent principles. There is an important topic in the message to which I have yet hardly alluded. I mean the rumored combination of the European continental sovereigns against the newly established free States of South America. Whatever position this Government may take on that subject, I trust it will be one which can be defended on known and acknowledged grounds of right. The near approach or the remote distance of danger may affect policy but can not change principle. The same reason that would authorize us to protest against unwarrantable combinations to interfere between Spain and her former colonies would authorize us equally to protest if the same combination were directed against the smallest State in Europe, although our duty to ourselves, our policy, and wisdom might indicate very different courses as fit to be pursued by us in the two cases. We shall not, I trust, act upon the notion of dividing the world with the Holy Alliance and complain of nothing done by them in their hemisphere if they will not interfere with ours. At least this would not be such a course of policy as I could recommend or support. We

have not offended, and I hope we do not intend to offend, in regard to South America against any principle of national independence or of public law. We have done nothing, we shall do nothing, that we need to hush up or to compromise by forbearing to express our sympathy for the cause of the Greeks or our opinion of the course which other Governments have adopted in regard to them.

It may in the next place be asked perhaps, Supposing all this to be true, what can we do? Are we to go to war? Are we to interfere in the Greek cause or any other European cause? Are we to endanger our pacific relations? No; certainly not. What, then, the question recurs, remains for us? If we will not endanger our own peace, if we will neither furnish armies nor navies to the cause which we think the just one, what is there within our power?

Sir, this reasoning mistakes the age. The time has been, indeed, when fleets and armies and subsidies were the principal reliances even in the best cause. But, happily for mankind, a great change has taken place in this respect. Moral causes come into consideration in proportion as the progress of knowledge is advanced; and the public opinion of the civilized world is rapidly gaining an ascendency over mere brutal force. It is already able to oppose the most formidable obstruction to the progress of injustice and oppression, and as it grows more intelligent and more intense it will be more and more formidable. It may be silenced by military power, but it can not be conquered. It is elastic, irrepressible, and invulnerable to the weapons of ordinary warfare. It is that impassible, unextinguishable enemy of mere violence and arbitrary rule, which, like Milton's angels,

> Vital in every part, * * *
> Can not, but by annihilating, die.

Until this be propitiated or satisfied it is vain for power to talk either of triumphs or of repose. No matter what fields are desolated, what fortresses surrendered, what armies subdued, or what provinces overrun. In the history of the year that has passed by us, and in the instance of unhappy Spain, we have seen the vanity of all triumphs in a cause which violates the general sense of justice of the civilized world. It is nothing that the troops of France have passed from the Pyrenees to Cadiz; it is nothing that an unhappy and prostrate nation has fallen before them; it is nothing that arrests and confiscation and execution sweep away the little remnant of national resistance. There is an enemy that still exists to check the glory of these triumphs. It follows the conqueror back to the very scene of his ovations; it calls upon him to take notice that Europe, though silent, is yet indignant; it shows him that the scepter of his victory is a barren scepter; that it shall confer neither joy nor honor, but shall molder to dry ashes in his grasp. In the midst of his exultation it pierces his ear with the cry of injured justice; it denounces against him the indignation of an enlightened and civilized age; it turns to bitterness the cup of his rejoicing and wounds him with the sting which belongs to the consciousness of having outraged the opinion of mankind.

In my opinion, sir, the Spanish nation is now nearer, not only in point of time but in point of circumstance, to the acquisition of a regulated government than at the moment of the French invasion. Nations must, no doubt, undergo these trials in their progress to the establishment of free institutions. The very trials benefit them and render them more capable both of obtaining and of enjoying the object which they seek.

I shall not detain the committee, sir, by laying before it any statistical, geographical, or commercial account of Greece. I have no knowledge on these subjects which is not common to all. It is universally admitted that, within the last 30 or 40 years, the condition of Greece has been greatly improved. Her marine is at present respectable, containing the best sailors in the Mediterranean, better even, in that sea, than our own, as more accustomed to the long quarantines and other regulations which prevail in its ports. The number of her seamen has been estimated as high as 50,000, but I suppose that estimate must be much too large. She has probably 150,000 tons of shipping. It is not easy to ascertain the amount of the Greek population. The Turkish Government does not trouble itself with any of the calculations of political economy, and there has never been such a thing as an accurate census probably in any part of the Turkish Empire. In the absence of all official information, private opinions widely differ. By the tables which have been communicated, it would seem that there are 2,400,000 Greeks in Greece proper and the islands; an amount, as I am inclined to think, somewhat overrated. There are probably in the whole of European Turkey 5,000,000 Greeks and 2,000,000 more in the Asiatic dominions of that power.

The moral and intellectual progress of this numerous population, under the horrible oppression which crushes it, has been such as may well excite regard. Slaves, under barbarous masters, the Greeks have still aspired after the blessings of knowledge and civilization. Before the breaking out of the present revolution they had established schools, and colleges, and libraries, and the press. Wherever, as in Scio, owing to particular circumstances, the weight of oppression was mitigated, the natural vivacity of the Greeks and their aptitude for the arts were evinced. Though certainly not on an equality with the civilized and Christian States of Europe—and how is it possible, under such oppression as they endured, that they should be?—they yet furnished a striking contrast with their Tartar masters. It has been well said that it is not easy to form a just conception of the nature of the despotism exercised over them. Conquest and subjugation, as known among European States, are inadequate modes of expression by which to denote the dominion of the Turks. A conquest in the civilized world is generally no more than an acquisition of a new dominion to the conquering country. It does not imply a never-ending bondage imposed upon the conquered, a perpetual mark—an opprobrious distinction between them and their masters; a bitter and unending persecution of their religion; a habitual violation of their rights of person and property, and the unrestrained indulgence toward them of every passion which belongs to the character of a barbarous soldiery. Yet such is the state of Greece. The Ottoman power over them, obtained originally by the sword, is constantly preserved by the same means. Wherever it exists, it is a mere military power. The religious and civil code of the State being both fixed in the Koran, and equally the object of an ignorant and furious faith, have been found equally incapable of change. "The Turk," it has been said, "has been encamped in Europe for four centuries." He has hardly any more participation in European manners, knowledge, and arts than when he crossed the Bosphorus. But this is not the worst. The power of the Empire is fallen into anarchy, and as the principle which belongs to the head belongs also to the parts, there are as many despots as there are pachas, beys, and viziers. Wars are almost perpetual between the Sultan and some rebellious governor of a Province; and in the conflict of these despotisms the people are necessarily ground between the upper and the nether millstone. In short, the Christian subjects of the Sublime Porte feel daily all the miseries which flow from despotism, from anarchy, from slavery, and from religious persecution. If anything yet remains to heighten such a picture, let it be added that every office in the Government is not only actually but professedly venal; the pachalics, the vizierates, the cadiships, and whatsoever other denomination may denote the depositary of power. In the whole world, sir, there is no such oppression felt as by the Christian Greeks. In various parts of India, to be sure, the Government is bad enough; but then it is the government of barbarians over barbarians, and the feeling of oppression is, of course, not so keen. There the oppressed are perhaps not better than their oppressors; but in the case of Greece, there are millions of Christian men, not without knowledge, not without refinement, not without a strong thirst for all the pleasures of civilized life, trampled into the very earth, century after century, by a pillaging, savage, relentless soldiery. Sir, the case is unique. There exists, and has existed, nothing like it. The world has no such misery to show; there is no case in which Christian communities can be called upon with such emphasis of appeal.

But I have said enough, Mr. Chairman—indeed I need have said nothing—to satisfy the House that it must be some new combination of circumstances, or new views of policy in the cabinets of Europe, which have caused this interesting struggle not merely to be regarded with indifference but to be marked with opprobrium. The very statement of the case, as a contest between the Turks and Greeks, sufficiently indicates what must be the feeling of every individual and every government that is not biased by a particular interest or a particular feeling to disregard the dictates of justice and humanity.

And now, sir, what has been the conduct pursued by the allied powers in regard to this contest?

When the revolution broke out the sovereigns were assembled in congress at Laybach, and the papers of that assembly sufficiently manifest their sentiments. They proclaimed their abhorrence of those "criminal combinations which had been formed in the eastern parts of Europe"; and, although it is possible that this denunciation was aimed more particularly at the disturbances in the Provinces of Wallachia and Moldavia, yet no exception is made from its general terms in favor of those events in Greece which were properly the commencement of her revolution, and which could not but be well known at Laybach before the date of these declarations. Now it must

be remembered that Russia was a leading party in this denunciation of the efforts of the Greeks to achieve their liberation; and it can not but be expected by Russia that the world should also remember what part she herself has heretofore acted in the same concern. It is notorious that within the last half century she has again and again excited the Greeks to rebellion against the Porte, and that she has constantly kept alive in them the hope that she would, one day, by her own great power, break the yoke of their oppressor. Indeed, the earnest attention with which Russia has regarded Greece goes much further back than to the time I have mentioned. Ivan the Third, in 1482, having espoused a Grecian princess, heiress of the last Greek Emperor, discarded St. George from the Russian arms and adopted the Greek two-headed black eagle, which has continued in the Russian arms to the present day. In virtue of the same marriage the Russian princes claim the Greek throne as their inheritance.

Under Peter the Great the policy of Russia developed itself more fully. In 1696 he rendered himself master of Azof, and in 1698 obtained the right to pass the Dardanelles and to maintain, by that route, commercial intercourse with the Mediterranean. He had emissaries throughout Greece, and particularly applied himself to gain the clergy. He adopted the Labarum of Constantine, "In hoc signo vinces," and medals were struck, with the inscription, "Petrus I, Russo-Græcorum Imperator." In whatever new direction the principles of the Holy Alliance may now lead the politics of Russia, or whatever course she may suppose Christianity now prescribes to her in regard to the Greek cause, the time has been when she professed to be contending for that cause as identical with Christianity. The white banner under which the soldiers of Peter the First usually fought bore, as its inscription, "In the name of the Prince, and for our country." Relying on the aid of the Greeks in his war with the Porte, he changed the white flag to red and displayed on it the words "In the name of God, and for Christianity." The unfortunate issue of this war is well known. Though Anne and Elizabeth, the successors of Peter, did not possess his active character, they kept up a constant communication with Greece, and held out hopes of restoring the Greek Empire. Catharine the Second, as is well known, excited a general revolt in 1769. A Russian fleet appeared in the Mediterranean and a Russian army was landed in the Morea. The Greeks in the end were disgusted at being expected to take an oath of allegiance to Russia, and the Empress was disgusted because they refused to take it. In 1774 peace was signed between Russia and the Porte, and the Greeks of the Morea were left to their fate. By this treaty the Porte acknowledged the independence of the Kahn of the Crimea—a preliminary step to the acquisition of that country by Russia. It is not unworthy of remark as a circumstance which distinguished this from most other diplomatic transactions, that it conceded to the cabinet of St. Petersburg the right of intervention in the interior affairs of Turkey, in regard to whatever concerned the religion of the Greeks. The cruelties and massacres that happened to the Greeks after the peace between Russia and the Porte, notwithstanding the general pardon which had been stipulated for them, need not now be recited. Instead of retracing the deplorable picture, it is enough to say that in this respect the past is justly reflected in the present. The Empress soon after invaded and conquered the Crimea, and on one of the gates of Kerson, its capital, caused to be inscribed "The road to Byzantium." The present Emperor, on his accession to the throne, manifested an intention to adopt the policy of Catharine the Second as his own, and the world has not been right in all its suspicions if a project for the partition of Turkey did not form a part of the negotiations of Napoleon and Alexander at Tilsit.

All this course of policy seems suddenly to be changed. Turkey is no longer regarded, it would appear, as an object of partition or acquisition, and Greek revolts have all at once become, according to the declaration of Laybach, "criminal combinations."

The recent congress at Verona exceeded its predecessor at Laybach in its denunciations of the Greek struggle. In the circular of the 14th of December, 1822, it declared the Grecian resistance to the Turkish power to be rash and culpable, and lamented that "the firebrand of rebellion had been thrown into the Ottoman Empire." This rebuke and crimination we know to have proceeded on those settled principles of conduct which the continental powers had prescribed for themselves. The sovereigns saw, as well as others, the real condition of the Greeks; they knew as well as others that it was most natural and most justifiable that they should endeavor, at whatever hazard, to change that condition. They knew that they themselves, or at least one of them, had more than once urged the Greeks to similar efforts; that they themselves had thrown the same firebrand into the midst of the Ottoman Empire. And yet, so much does it seem to be their fixed object to discountenance whatsoever threatens to disturb the actual government of any country, that, Christians as they were, and allied, as they professed to be, for purposes most important to human happiness and religion, they have not hesitated to declare to the world that they have wholly forborne to exercise any compassion to the Greeks, simply because they thought that they saw in the struggles of the Morea the sign of revolution. This, then, is coming to a plain, practical result. The Grecian revolution has been discouraged, discountenanced, and denounced solely because it is a revolution. Independent of all inquiry into the reasonableness of its causes or the enormity of the oppression which produced it, regardless of the peculiar claims which Greece possesses upon the civilized world, and regardless of what has been their own conduct toward her for a century, regardless of the interest of the Christian religion, the sovereigns at Verona seized upon the case of the Greek revolution as one above all others calculated to illustrate the fixed principles of their policy. The abominable rule of the Porte on one side, the value and the sufferings of the Christian Greeks on the other, furnished a case likely to convince even an incredulous world of the sincerity of the professions of the allied powers. They embraced the occasion with apparent ardor, and the world, I trust, is satisfied.

We see here, Mr. Chairman, the direct and actual application of that system which I have attempted to describe. We see it in the very case of Greece. We learn, authentically and indisputably, that the allied powers, holding that all changes in legislation and administration ought to proceed from kings alone, were wholly inexorable to the sufferings of the Greeks and entirely hostile to their success. Now, it is upon this practical result of the principle of the continental powers that I wish this House to intimate its opinion. The great question is a question of principle. Greece is only the signal instance of the application of that principle. If the principle be right, if we esteem it conformable to the law of nations, if we have nothing to say against it, or if we deem ourselves unfit to express an opinion on the subject, then, of course, no resolution ought to pass. If, on the other hand, we see in the declarations of the allied powers principles not only utterly hostile to our own free institutions but hostile also to the independence of all nations and altogether opposed to the improvement of the condition of human nature; if in the instance before us we see a most striking exposition and application of those principles, and if we deem our opinions to be entitled to any weight in the estimation of mankind, then I think it is our duty to adopt some such measure as the proposed resolution.

It is worthy of observation, sir, that as early as July, 1821, Baron Strogonoff, the Russian minister at Constantinople, represented to the Porte that if the undistinguished massacres of the Greeks, both of such as were in open resistance and of those who remained patient in their submission, were continued and should become a settled habit, they would give just cause of war against the Porte to all Christian states. This was in 1821. (Annual Register for 1821, p. 251.) It was followed early in the next year by that indescribable enormity, that appalling monument of barbarian cruelty, the destruction of Scio, a scene I shall not attempt to describe; a scene from which human nature shrinks, shuddering, away; a scene having hardly a parallel in the history of fallen man. This scene, too, was quickly followed by the massacres in Cyprus; and all these things were perfectly known to the Christian powers assembled at Verona. Yet these powers, instead of acting upon the case supposed by Baron Strogonoff and which one would think had been then fully made out; instead of being moved by any compassion for the sufferings of the Greeks, these powers, these Christian powers, rebuke their gallantry and insult their sufferings by accusing them of "throwing a firebrand into the Ottoman Empire." Such, sir, appear to me to be the principles on which the continental powers of Europe have agreed hereafter to act, and this an eminent instance of the application of those principles.

I shall not detain the committee, Mr. Chairman, by any attempt to recite the events of the Greek struggle up to the present time. Its origin may be found, doubtless, in that improved state of knowledge which, for some years, has been gradually taking place in that country. The emancipation of the Greeks has been a subject frequently discussed in modern times. They themselves are represented as having a vivid remembrance of the distinction of their ancestors, not unmixed with an indignant feeling that civilized and Christian Europe should not ere now have aided them in breaking their intolerable fetters.

In 1816 a society was founded in Vienna for the encouragement of Grecian literature. It was connected with a similar in-

stitution at Athens, and another in Thessaly, called the "Gymnasium of Mount Pelion." The treasury and general office of the institution were established at Munich. No political object was avowed by these institutions, probably none contemplated. Still, however, they had their effect, no doubt, in hastening that condition of things in which the Greeks felt competent to the establishment of their independence. Many young men have been for years annually sent to the universities in the western States of Europe for their education; and, after the general pacification of Europe, many military men, discharged from other employment, were ready to enter even into so unpromising a service as that of the revolutionary Greeks.

In 1820 war commenced between the Porte and Ali, the well-known Pacha of Albania. Differences existed also with Persia and with Russia. In this state of things, at the beginning of 1821 an insurrection broke out in Moldavia, under the direction of Alexander Ypsilanti, a well-educated soldier, who had been major general in the Russian service. From his character, and the number of those who seemed inclined to join him, he was supposed to be countenanced by the court at St. Petersburg. This, however, was a great mistake, which the Emperor, then at Laybach, took an early opportunity to rectify. The Turkish Government was alarmed at these occurrences in the northern Provinces of European Turkey, and caused search to be made of all vessels entering the Black Sea, lest arms or other military means should be sent in that manner to the insurgents. This proved inconvenient to the commerce of Russia, and caused some unsatisfactory correspondence between the two powers. It may be worthy of remark, as an exhibition of national character, that, agitated by these appearances of intestine commotion, the Sultan issued a proclamation calling on all true Mussulmans to renounce the pleasures of social life, to prepare arms and horses, and to return to the manner of their ancestors, the life of the plains. The Turk seems to have thought that he had, at last, caught something of the dangerous contagion of European civilization, and that it was necessary to reform his habits, by recurring to the original manners of military roving barbarians.

It was about this time, that is to say, at the commencement of 1821, that the revolution burst out in various parts of Greece and the isles. Circumstances, certainly, were not unfavorable to the movement, as one portion of the Turkish Army was employed in the war against Ali Pacha in Albania, and another part in the Provinces north of the Danube. The Greeks soon possessed themselves of the open country of the Morea, and drove their enemy into the fortresses. Of these, that of Tripolitza, with the city, fell into their hands in the course of the summer. Having after these first movements obtained time to breathe, it became, of course, an early object to establish a government. For this purpose delegates of the people assembled, under that name which describes the assembly in which we ourselves sit, that name which "freed the Atlantic," a congress. A writer, who undertakes to render to the civilized world that service which was once performed by Edmund Burke—I mean the compiler of the English Annual Register—asks by what authority this assembly could call itself a congress. Simply, sir, by the same authority by which the people of the United States have given the same name to their own legislature. We, at least, should be naturally inclined to think, not only as far as names, but things also, are concerned, that the Greeks could hardly have begun their revolution under better auspices, since they have endeavored to render applicable to themselves the general principles of our form of government as well as its name.

This constitution went into operation at the commencement of the next year. In the meantime the war with Ali Pasha was ended, he having surrendered, and being afterwards assassinated by an instance of treachery and perfidy, which, if it had happened elsewhere than under the government of the Turks, would have deserved notice. The negotiations with Russia, too, took a turn unfavorable to the Greeks. The great point upon which Russia insisted, beside the abandonment of the measure of searching vessels bound to the Black Sea, was that the Porte should withdraw its armies from the neighborhood of the Russian frontiers; and the immediate consequence of this, when effected, was to add so much more to the disposable force ready to be employed against the Greeks. These events seemed to have left the whole force of the Ottoman Empire, at the commencement of 1822, in a condition to be employed against the Greek rebellion; and, accordingly, very many anticipated the immediate destruction of the cause. The event, however, was ordered otherwise. Where the greatest effort was made it was met and defeated. Entering the Morea with an army which seemed capable of bearing down all resistance, the Turks were nevertheless defeated and driven back, and pursued beyond the isthmus, within which, as far as it appears, from that time to the present, they have not been able to set their foot.

It was in April of this year that the destruction of Scio took place. That island, a sort of appanage of the Sultana mother, enjoyed many privileges peculiar to itself. In a population of 130,000 or 140,000 it had no more than 2,000 or 3,000 Turks; indeed, by some accounts, not near as many. The absence of these ruffian masters had in some degree allowed opportunity for the promotion of knowledge, the accumulation of wealth, and the general cultivation of society. Here was the seat of modern Greek literature; here were libraries, printing presses, and other establishments, which indicate some advancement in refinement and knowledge. Certain of the inhabitants of Samos, it would seem, envious of this comparative happiness of Scio, landed upon the island in an irregular multitude, for the purpose of compelling its inhabitants to make common cause with their countrymen against their oppressors. These, being joined by the peasantry, marched to the city and drove the Turks into the castle. The Turkish fleet, lately reinforced from Egypt, happened to be in the neighboring seas, and, learning these events, landed a force on the island of 15,000 men. There was nothing to resist such an army. These troops immediately entered the city and began an indiscriminate massacre. The city was fired; and in four days the fire and sword of the Turk rendered the beautiful Scio a clotted mass of blood and ashes. These details are too shocking to be recited. Forty thousand women and children, unhappily saved from the general destruction, were afterwards sold in the market of Smyrna and sent off into distant and hopeless servitude. Even on the wharves of our own cities, it has been said, have been sold the utensils of these hearths which now exist no longer. Of the whole population which I have mentioned, not above 900 persons were left living upon the island. I will only repeat, sir, that these tragical scenes were as fully known at the Congress of Verona as they are now known to us, and it is not too much to call on the powers that constituted that congress, in the name of conscience and in the name of humanity, to tell us if there be nothing even in these unparalleled excesses of Turkish barbarity to excite a sentiment of compassion; nothing which they regard as so objectionable as even the very idea of popular resistance to power.

The events of the year which has just passed by, as far as they have become known to us, have been even more favorable to the Greeks than those of the year preceding. I omit all details as being as well known to others as to myself. Suffice it to say that with no other enemy to contend with and no diversion of his force to other objects, the Porte has not been able to carry the war into the Morea; and that, by the last accounts, its armies were acting defensively in Thessaly. I pass over, also, the naval engagements of the Greeks, although that is a mode of warfare in which they are calculated to excel, and in which they have already performed actions of such distinguished skill and bravery as would draw applause upon the best mariners in the world. The present state of the war would seem to be that the Greeks possess the whole of the Morea, with the exception of the three fortresses of Patras, Coron, and Modon; all Candia, but one fortress, and most of the other islands. They possess the citadel of Athens, Missolonghi, and several other places in Livadia. They have been able to act on the offensive, and to carry the war beyond the isthmus. There is no reason to believe their marine is weakened; more probably, it is strengthened; but, what is most important of all, they have obtained time and experience. They have awakened a sympathy throughout Europe and throughout America, and they have formed a government which seems suited to the emergency of their condition.

Sir, they have done much. It would be great injustice to compare their achievements with our own. We began our Revolution, already possessed of government, and, comparatively, of civil liberty. Our ancestors had from the first been accustomed in a great measure to govern themselves. They were familiar with popular elections and legislative assemblies, and well acquainted with the general principles and practice of free governments. They had little else to do than to throw off the paramount authority of the parent State. Enough was still left, both of law and of organization, to conduct society in its accustomed course, and to unite men together for a common object. The Greeks, of course, could act with little concert at the beginning; they were unaccustomed to the exercise of power, without experience, with limited knowledge, without aid, and surrounded by nations which, whatever claims the Greeks might seem to have upon them, have afforded them nothing but discouragement and reproach. They have held out, however, for three campaigns; and that, at least, is something. Constantinople and the northern Provinces have sent forth thousands of troops—they have been defeated. Tripoli, and Algiers, and Egypt, have contributed their marine contingents—they have not

kept the ocean. Hordes of Tartars have crossed the Bosphorus—they have died where the Persians died. The powerful monarchies in the neighborhood have denounced their cause and admonished them to abandon it and submit to their fate. They have answered them, that, although 200,000 of their countrymen have offered up their lives, there yet remain lives to offer; and that it is the determination of all, "yes, of all," to persevere until they shall have established their liberty, or until the power of their oppressors shall have relieved them from the burden of existence.

It may now be asked, perhaps, whether the expression of our own sympathy, and that of the country, may do them good? I hope it may. It may give them courage and spirit, it may assure them of public regard, teach them that they are not wholly forgotten by the civilized world, and inspire them with constancy in the pursuit of their great end. At any rate, sir, it appears to me that the measure which I have proposed is due to our own character and called for by our own duty. When we shall have discharged that duty, we may leave the rest to the disposition of Providence.

I do not see how it can be doubted that this measure is entirely pacific. I profess my inability to perceive that it has any possible tendency to involve our neutral relations. If the resolution pass, it is not of necessity to be immediately acted on. It will not be acted on at all, unless, in the opinion of the President, a proper and safe occasion for acting upon it shall arise. If we adopt the resolution to-day, our relations with every foreign State will be to-morrow precisely what they now are. The resolution will be sufficient to express our sentiments on the subjects to which I have adverted. Useful for that purpose, it can be mischievous for no purpose. If the topic were properly introduced into the message, it can not be improperly introduced into discussion in this House. If it were proper, which no one doubts, for the President to express his opinions upon it, it can not, I think, be improper for us to express ours. The only certain effect of this resolution is to signify, in a form usual in bodies constituted like this, our approbation of the general sentiment of the message. Do we wish to withhold that approbation? The resolution confers on the President no new power, nor does it enjoin on him the exercise of any new duty; nor does it hasten him in the discharge of any existing duty.

I can not imagine that this resolution can add anything to those excitements which it has been supposed, I think very causelessly, might possibly provoke the Turkish Government to acts of hostility. There is already the message, expressing the hope of success to the Greeks and disaster to the Turks, in a much stronger manner than is to be implied from the terms of this resolution. There is the correspondence between the Secretary of State and the Greek agent in London, already made public, in which similar wishes are expressed, and a continuance of the correspondence apparently invited. I might add to this the unexampled burst of feeling which this cause has called forth from all classes of society, and the notorious fact of pecuniary contributions made throughout the country for its aid and advancement. After all this, whoever can see cause of danger to our pacific relations from the adoption of this resolution has a keener vision than I can pretend to. Sir, there is no augmented danger; there is no danger. The question comes at last to this, whether, on a subject of this sort, this House holds an opinion which is worthy to be expressed.

Even suppose, sir, an agent or commissioner were to be immediately sent—a measure which I myself believe to be the proper one—there is no breach of neutrality nor any just cause of offense. Such an agent, of course, would not be accredited; he would not be a public minister. The object would be inquiry and information; inquiry which we have a right to make, information which we are interested to possess. If a dismemberment of the Turkish Empire be taking place or has already taken place; if a new State be rising or be already risen in the Mediterranean, who can doubt that, without any breach of neutrality, we may inform ourselves of these events for the government of our own concerns? The Greeks have declared the Turkish coasts in a state of blockade; may we not inform ourselves whether this blockade be nominal or real, and, of course, whether it shall be regarded or disregarded? The greater our trade may happen to be with Smyrna, a consideration which seems to have alarmed some gentlemen, the greater is the reason, in my opinion, why we should seek to be accurately informed of those events which may affect its safety. It seems to me impossible, therefore, for any reasonable man to imagine that this resolution can expose us to the resentment of the Sublime Porte.

As little reason is there for fearing its consequences upon the conduct of the allied powers. They may, very naturally, dislike our sentiments upon the subject of the Greek revolution; but what those sentiments are they will much more explicitly learn in the President's message than in this resolution. They might, indeed, prefer that we should express no dissent from the doctrines which they have avowed and the application which they have made of those doctrines to the case of Greece. But I trust we are not disposed to leave them in any doubt as to our sentiments upon these important subjects. They have expressed their opinions and do not call that expression of opinion an interference, in which respect they are right, as the expression of opinion in such cases is not such an interference as would justify the Greeks in considering the powers at war with them. For the same reason any expression which we may make of different principles and different sympathies is no interference. No one would call the President's message an interference, and yet it is much stronger in that respect than this resolution. If either of them could be construed to be an interference no doubt it would be improper; at least it would be so according to my view of the subject, for the very thing which I have attempted to resist in the course of these observations is the right of foreign interference. But neither the message nor the resolution has that character. There is not a power in Europe which can suppose that, in expressing our opinions on this occasion, we are governed by any desire of aggrandizing ourselves or of injuring others. We do no more than to maintain those established principles in which we have an interest in common with other nations and to resist the introduction of new principles and new rules calculated to destroy the relative independence of States, and particularly hostile to the whole fabric of our Government.

I close then, sir, with repeating that the object of this resolution is to avail ourselves of the interesting occasion of the Greek revolution to make our protest against the doctrines of the allied powers, both as they are laid down in principle and as they are applied in practice. I think it right, too, sir, not to be unseasonable in the expression of our regard, and, as far as that goes, in a manifestation of our sympathy with a long oppressed and now struggling people. I am not of those who would, in the hour of utmost peril, withhold such encouragement as might be properly and lawfully given, and, when the crisis should be past, overwhelm the rescued sufferer with kindness and caresses. The Greeks address the civilized world with a pathos not easy to be resisted. They invoke our favor by more moving considerations than can well belong to the condition of any other people. They stretch out their arms to the Christian communities of the earth, beseeching them, by a generous recollection of their ancestors, by the consideration of their desolated and ruined cities and villages, by their wives and children sold into an accursed slavery, by their blood, which they seem willing to pour out like water, by the common faith, and in the name which unites all Christians, that they would extend to them at least some token of compassionate regard.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. What amendment does the Senator from North Dakota wish to take up now?

Mr. McCUMBER. On page 34, line 10.

The ASSISTANT SECRETARY. On page 34, line 10, after the word "fluorspar" and the comma, the committee proposes to strike out "$5 per ton of 2,000 pounds: *Provided*, That after the expiration of one year beginning on the day following the passage of this act, the duty on fluorspar shall be $4 per ton of 2,000 pounds," and to insert in lieu thereof "$5.60 per ton," so as to read:

Fluorspar, $5.60 per ton.

Mr. SIMMONS. Mr. President, I will say to the Senator from Utah [Mr. SMOOT] that the Senator from New Mexico [Mr. JONES] came down this morning expecting that this item of fluorspar would be called up. He wanted to present some remarks to the Senate. He stayed here a while, and the Senate then took up some other matter in which the Senators from California were interested. The Senator from New Mexico then left the Chamber and said he would probably not be able to return during the day. I have just called him on the telephone, and he requested me to ask that this item go over until to-morrow morning.

Mr. McCUMBER. Very well. If that is the desire, and if we are ready to go on with some other item, I have no objection.

Mr. SIMMONS. Mr. President, I make the point of no quorum. I was going to suggest to the Senator from North Dakota that if we could take up the item of carbon, the Senator from Texas [Mr. SHEPPARD] is ready to proceed, but the Sena-

tors who are to discuss some of the other items happen to be temporarily out of the Chamber. If it will satisfy the Senators in charge to take up the item of carbon, I am perfectly willing to withdraw the request for a quorum.

Mr. McCUMBER. What paragraph is it the Senator desires to take up?

Mr. SIMMONS. Paragraph 216, carbons and electrodes. I suggest to the Senator from North Dakota that we are ready to proceed with that paragraph. If the Senator is willing to take up that paragraph, we are ready to go on; otherwise I shall have to call for a quorum to bring here the Senators who can discuss some of the other paragraphs.

Mr. McCUMBER. Here, again, I think the Senator from Washington [Mr. POINDEXTER] is interested in graphite.

Mr. SHEPPARD. It is not the graphite paragraph to which the Senator from North Carolina is referring.

Mr. McCUMBER. It relates to articles or wares composed wholly or in part of carbon or graphite.

Mr. SHEPPARD. I will state, however, that the report of the Tariff Commission suggests that that clause be eliminated, as it is unnecessary and does not affect the sense of the paragraph. However, if the Senator feels that the Senator from Washington [Mr. POINDEXTER] is interested in it, I shall not insist on going ahead with it.

Mr. McCUMBER. If the Senator desires to go on with the discussion of paragraph 216, I have no objection to taking that up.

Mr. FLETCHER. Do I understand that paragraphs 211 and 213a are to go over until the Senator from Washington can be here? I think they might be considered together, as they bear on the same subject.

Mr. SMOOT. Why should paragraph 210 go over, then?

Mr. SHEPPARD. The Senator from North Carolina stated that certain Senators on this side of the Chamber are interested in paragraph 210, but are not here, and therefore he wanted it to go over.

Mr. McCUMBER. Does the Senator from North Carolina want paragraph 210 passed over?

Mr. SIMMONS. Yes; temporarily.

Mr. McCUMBER. Then I will ask that we may consider paragraph 216, and afterwards we will go back to paragraph 210.

The VICE PRESIDENT. The amendment will be stated.

The READING CLERK. On page 38, paragraph 216, carbons and electrodes, in line 19, the committee proposes to strike out the parenthesis and the word "composed" and insert in lieu thereof the word "composed"; in line 20, to strike out the parenthesis and the word "graphite" and insert in lieu the word "graphite"; and in line 21 to change "35" to "45" before the words "per cent ad valorem."

Mr. SHEPPARD. Mr. President, the carbon industry has four divisions or classifications, relating, respectivly, to light, heat, power applied to electrical apparatus, and miscellaneous specialties, including all remaining forms of manufactured carbon.

The first division includes all forms of electric-lighting carbon. These carbons are cylindrical rods, and are used in making the arc light, of which there are three types; first, that made from petroleum coke carbon, the light once used so generally for street illumination, but now almost out of fashion; second, that made from lampblack or flaming-arc carbon, and used for many purposes, notably every kind of photography, motion-picture projections, and searchlights of the most powerful grades; third, that made from homogeneous or solid flaming-arc carbons, and of which very little is used. There are practically no importations of carbons used in making the first and third type of electric light, but of those used in making the second type the importations had a value in 1919 of $20,967, while the home production exceeded $1,200,000.

Mr. A. C. Morrison, representing the carbon section of the Associated Manufacturers of Electrical Supplies, New York City, testified before the Ways and Means Committee of the House that the domestic demand of 20,000,000 carbons for motion-picture purposes was being handled by the American industry, and handled satisfactorily.

The second division of the carbon industry, the division relating to heat, comprises the production of electrodes; that is, carbon bars of various dimensions, some weighing as much as a ton. They are essential to the operation of electric furnaces, batteries, and to electrochemical or electrolytical processes; that is, processes whereby chemicals are deomposed with an electric current.

The third division comprises the manufacture of what is known as the carbon brush—a combination of small pieces of carbon which transmit the electric current from the dynamo to motors, generators, and similar machines. They are essential, therefore, to every form of electric power. Without them no dynamo could be utilized and no electric mechanism could be operated. Their production requires the highest skill and care as well as scientific and technical knowledge of the most accomplished nature. To so many uses is electricity put in modern times that there are about 8,000 different sizes and kinds of these carbon brushes.

The fourth division comprises all other carbon products, and are known as carbon specialties. They are so numerous that it is impracticable to cover them in a tariff law except through an ad valorem duty. Among these specialties are the carbon circuit-breaking contacts of electric elevators and of many other kinds of electrical equipment, carbon for electric welding, bearings, bushings, lightning arresters, hollow granules about three one-hundredths of an inch in diameter used in ear phones for the deaf, actuated carbon with the quality of absorbing poisonous gases to a larger degree than any other substance, packing rings, essential to the operation of turbine engines, minute carbon grains and carbon disks for telephones, and innumerable other articles leading into almost every detail of this mechanical and electric age.

I have already given the imports in the first division. In the other three the imports had a value in 1919 as follows: Electrodes, $6,209, as against a home production of $5,846,594; brushes, $173,122, as against a home production of $4,088,411.40; carbon specialties, about $62,000, as against a home production of over a million dollars; total imports for the entire industry in 1919, $254,298; total home production, $13,292,000; exports, $1,391,765. Total imports for 1920 were $484,020; exports, $1,477,831. I have not the figure for the home production, but it is safe to say that it has continued to increase. Total imports for the first nine months of 1921 were $325,000; exports, $347,306. I have not been able to find the production figures for 1921, but it may be reasonably inferred that the industry continued to grow and continued to outstrip imports in a ratio of something like 40 to 1. With home production forty times greater than imports a feeble case indeed has been made for protection.

The House committee decided that a rate of 35 per cent ad valorem should be imposed on all these carbon products, and its action was sustained by the House.

The Senate committee increased the rate to 45 per cent, without any hearing, in so far as I have been able to ascertain. I can not find any hearings on the earthenware schedule before the Senate Committee on Finance where the subject was mentioned, and yet the Senate committee increased the rate allowed by the House committee and adopted by the House from 35 per cent ad valorem to 45 per cent ad valorem.

Mr. President, it is the statement of Mr. Ingalls, one of the most reliable and careful students of American industry, that the electrical industry in all its phases is one of the most prosperous of all American industries; that it has grown literally by leaps and bounds; that it has doubled itself every five years within the last 20 or 30 years.

The existing law imposes an ad valorem rate of about 25 per cent on carbons. The act of 1909 imposed a rate on certain forms of carbon of 30 per cent ad valorem, and on other forms of carbon of 20 per cent ad valorem, and on still other forms it imposed a specific duty. Under the Treasury decisions, however, those who are interested in this industry claim that they have not been able to obtain the benefit of those duties; and yet, despite the adverse Treasury decisions, despite the low rates which were levied on competing imports, this industry has grown more rapidly perhaps than has any other industry in America. Nevertheless, the House committee increased the rate to 35 per cent ad valorem, and the Senate committee, evidently without any further evidence, increased the rate on the industry and on various forms of carbon to 45 per cent ad valorem.

The Senate committee has made out no case whatever for protection. It may be that a certain amount of revenue could be raised from a duty of 20 or 25 per cent ad valorem. Therefore I move to amend the amendment of the committee by striking out "45 per cent" and inserting "25 per cent," which is the existing rate, and under which the industry has continued to grow and prosper as, perhaps, has no other industry in the country. On the amendment I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. WARREN in the chair). There is a committee amendment in the paragraph before the point indicated by the Senator from Texas. The committee amendment will be stated.

The READING CLERK. On page 38, line 19, after the word "whereas," it is proposed to strike out "(composed" and to insert the word "composed."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The next amendment was, on page 38, line 20, after the words "carbon or," to strike out "graphite) " and insert "graphite."

Mr. SHEPPARD. Mr. President, I desire at this point to direct the attention of the chairman of the committee to the suggestion in the Summary of the Tariff Commission on page 306.

Mr. McCUMBER. It is with a view to the change suggested by the Tariff Commission on page 306 of the Tariff Summary that we propose to strike out the parenthesis.

Mr. SHEPPARD. The committee has made that motion?

Mr. McCUMBER. That is the amendment now under consideration.

Mr. WALSH of Montana. Mr. President, I do not desire to discuss this provision further than to call attention to the fact——

Mr. McCUMBER. If the Senator will excuse me for a moment, I wish to know whether we have agreed to the first amendment, whereby "(composed" was stricken out and the word "composed," without the parenthesis, inserted in lieu thereof?

The PRESIDING OFFICER. That has been agreed to.

Mr. McCUMBER. Then, if there is no objection, I hope we may agree to the amendment proposing to strike out "(graphite" and to insert in lieu thereof the word "graphite" without the parenthesis.

The PRESIDING OFFICER. Without objection, that amendment is agreed to.

The READING CLERK. The next amendment of the Committee on Finance is on page 38, line 21——

Mr. WALSH of Montana. Mr. President, graphite, of course, enters very largely into the construction of electrodes, as is indicated in the paragraph under consideration.

Mr. McCUMBER. Mr. President, I will ask the Senator if he has any objection to the amendment striking out the parenthesis?

Mr. WALSH of Montana. No; I have no objection to that amendment.

The PRESIDING OFFICER. The amendment was agreed to in the absence of objection.

Mr. WALSH of Montana. I merely wish to call attention to the provisions of the bill included in the parentheses which are now eliminated and to the feature of this paragraph embracing the consideration of the subject of graphite which is taken care of by paragraph 213a on the preceding page. I shall have something more to say on that subject when we reach it, but I simply remark here that a very high quality of graphite, equal to the best Ceylon graphite, is produced in the State of Montana. The industry was developed during the war. The ordinary American graphite is not very serviceable in the manufacture of crucibles for use in the production of steel and other foundry products, but the Montana graphite meets all the specifications. It is an infant industry and one that might very properly be encouraged.

Mr. McCUMBER. I do not want to disturb the Senator, but may I ask him if he is not considering the lump or plumbago graphite provided for in paragraph 213a?

Mr. WALSH of Montana. No. I have said that when that paragraph is reached I shall speak on it in some detail. I am now simply calling attention to the fact that the producers of the domestic material, the development of which certainly ought to be encouraged in every possible way, were denied anything like protection upon their product. They are given 10 per cent ad valorem, which means nothing at all, but the manufactured article, electrodes, into which this raw product enters, is protected by a duty of 45 per cent.

We understand, by repeated asseverations upon the other side, that the purpose is to encourage and protect every American industry, and that the manufacturer is not to be preferred at all over the producer of the raw material. I have invited attention heretofore to the fact that manganese, another important product of the State of Montana, utilized in the manufacture of steel and entering into its composition, has been placed upon the free list. Graphite, another raw product of my State used in the same industry, has been given a rate of duty of 10 per cent, while the manufactured product of which the graphite is a large constituent is given 45 per cent under the provision we are now considering.

Mr. FRELINGHUYSEN. Mr. President, may I ask the Senator a question? Is the finer quality of amorphous graphite produced in his State? Has he information to that effect? I understood that the crystalline flake graphite was a coarser graphite, used by the steel makers in making crucible steel in this country, but that the finer graphite, used for lubricating, was not produced in this country, and that was the information the committee had. It will be highly interesting if it is so.

Mr. WALSH of Montana. The competition comes largely from the Ceylon graphite, which is particularly valuable in the construction of crucibles.

Mr. FRELINGHUYSEN. Is it similar to the Ceylon graphite?

Mr. WALSH of Montana. It is similar to the Ceylon graphite, and that comes in in large quantities, and during the war shipments were made from Montana directly to Pittsburgh.

Mr. FRELINGHUYSEN. That is very interesting, indeed, as I was informed that none of that type of graphite was produced in this country, or very little.

Mr. WALSH of Montana. The documents available to the Senator disclose the fact as I have stated it.

Mr. SHEPPARD. Mr. President, did the Senator from Montana understand that the language within the parentheses was eliminated?

Mr. WALSH of Montana. Oh, no. As I understand, it reads now—

> And articles or wares composed wholly or in part of carbon or graphite, wholly or partly manufactured, not specially provided for, 45 per cent ad valorem.

Mr. SHEPPARD. That is correct.

Mr. WALSH of Montana. That is to say, the miner is given a 10 per cent duty on the graphite, but the manufacturer of electrodes is given 45 per cent on the product into which this graphite enters. Can the Senator tell me what State produces the greatest quantity of this product?

Mr. SHEPPARD. Does the Senator mean the raw material of carbon?

Mr. WALSH of Montana. No, no; the carbons and electrodes.

Mr. SHEPPARD. A number of States—Pennsylvania, West Virginia, New York—produce these articles, but in exactly what proportion I am unable to say.

Mr. WALSH of Montana. The General Electric Co.?

Mr. SHEPPARD. The General Electric Co. in New York may make some of these products.

Mr. WALSH of Montana. So that the General Electric Co. is protected to the extent of 45 per cent and the Montana miner to the extent of 10 per cent?

Mr. SHEPPARD. Exactly. The companies making the finished product get this preference.

Mr. SMOOT. Mr. President, of course the Senator knows that that is crystalline lump, chip, or dust, 20 per cent ad valorem, in paragraph 213a, and before they can be manufactured they have to go through that process.

Mr. WALSH. Oh, but that is the manufactured article.

Mr. SMOOT. No, no.

Mr. WALSH of Montana. Yes; that is crystalline lump.

Mr. SMOOT. That is the ore made into crystalline lump, chip, or dust.

Mr. WALSH of Montana. To be sure; it is treated.

Mr. SMOOT. Then the carbons and electrodes are manufactured from that product, and there is not the difference that the Senator says.

Mr. SHEPPARD. I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. The Senator from Texas proposes an amendment to the amendment of the committee, which will be stated.

The READING CLERK. On page 38, line 21, in the committee amendment, the Senator from Texas proposes to strike out "45" and to insert "25."

The PRESIDING OFFICER. On that amendment the Senator from Texas requests the yeas and nays.

The yeas and nays were ordered.

Mr. McCUMBER. Mr. President, I simply want to call attention to one table in the report of the Tariff Commission covering the articles included under the term "composed chiefly of lampblack or retort carbon."

I notice that in 1918 we imported 2,400 feet; in 1919, 322,400 feet; and a like increase in 1920. Then, in the first nine months of 1921, we imported 55,572,300 feet. At the same rate the year's importations for 1921 would be 74,096,400 feet, as against 2,400 feet in 1918. Nineteen hundred and eighteen, of course, was during the war, and the importations would necessarily, as they mostly come from Germany, be very light; but taking the highest importations prior to the war, they were 17,600,380 feet, and this has suddenly jumped in a single year to 74,096,400, or about 500 per cent.

Mr. SHEPPARD. Can the Senator give us the home production for the first nine months of 1921?

Mr. McCUMBER. I have not it right here.

Mr. SHEPPARD. Why does the Senator say "55,000,000"? The figures seem to be "555,000."

Mr. McCUMBER. No; that is multiplied by 100. Those represent that many hundred feet.

Mr. SHEPPARD. Where is the statement to that effect?

Mr. McCUMBER. Right at the head of the column. If the Senator will run the column up to the head, he will see that it says "100 feet," and therefore where it says "4" I gave it as "400 feet."

Mr. SHEPPARD. Does the same thing apply to the next column, in the matter of dollars—$177,000,000 instead of $177,000?

Mr. McCUMBER. No; not on dollars. This hundred is simply added in the case of feet. This is so many hundred feet. It goes by hundred feet rather than simply by so many feet. By multiplying by 100 in the case of each item you have the figures which I have just given.

Mr. SHEPPARD. Then I want to call the Senator's attention to an apparent contradiction in the figures there. Referring to the year 1920, the table states that 41,000—or 41,000,000 feet, as the Senator would read it—were imported, valued at $217,000.

Mr. McCUMBER. That would be 4,100,000, if you multiply that by 100.

Mr. SHEPPARD. And the valuation was $217,000; yet, for the first nine months of 1921—where, as the Senator states, the imports were 55,000,000 feet—the value is only $177,000.

Mr. McCUMBER. That would indicate just the reason why we are asking for this protection. The Senator will see that 4,186,800 feet were landed in 1920 at a cost of $217,947, whereas the 55,572,300 feet in 1921 came in at only $177,428, showing the enormous reduction in cost in Germany and in the inventory as the articles are brought into the United States.

Mr. SHEPPARD. Unless the Senator can give us the figures of the home production and the value of the home production we are not in position to judge the situation accurately. Besides, he is referring to but one of the carbon products, and the industry is treated as a whole in the bill. The rate proposed applies to all these carbon products.

Mr. McCUMBER. I have not the home production of this particular article. The value of the carbons for electric lighting produced in the United States in 1914 was only about $800,000; but in the case of the lampblack or retort carbons, these amounted in 1913 to 17,600,000 feet and in 1914 to 15,690,763 feet, whereas at the present time we have 74,096,000 feet of importations and at a price so low that that amount does not produce anything near what only a small fraction of the same importation produced in 1920.

Mr. NORRIS. Mr. President, I should like to ask the Senator from Texas or the Senator from North Dakota if there was a corresponding decline in the value of the domestic production? Evidently, from the figures the Senator from North Dakota has given, after the war the foreign article came down in value; but no figures have been given to show whether or not the same thing happened here.

Mr. SHEPPARD. Not at all as to this particular form of carbon.

Mr. McCUMBER. Mr. President, necessarily they either must go down in order to compete when the articles compete in price, or else they have to close business. One of two things must necessarily follow.

Mr. NORRIS. I assume that they have gone down.

Mr. McCUMBER. I have no doubt that they have gone down enormously since then.

Mr. NORRIS. Yes. In other words, I fear that the House rate is based on a war price in America, compared to an after-war price in a foreign country.

Mr. SHEPPARD. I call the attention of the Senator from Nebraska to the fact that during the first nine months of 1921 we exported these carbons to the value of $347,000; so it would seem that the industry has not been seriously affected by the importation.

Mr. NORRIS. In those nine months we exported, as I remember, more than we imported. Is that correct?

Mr. SHEPPARD. Yes; that is true. So it would seem that the industry is not suffering on account of the importations.

Mr. NORRIS. It would seem to me from that that it would not be necessary to make this wonderfully high increase here.

Mr. SHEPPARD. That is my contention.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Texas to the amendment of the committee, on which the yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as on the former vote as to my pair and its transfer, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as to my pair and its transfer, I vote "nay."

Mr. DIAL (when Mr. ROBINSON's name was called). I make the same announcement as to the pair of the Senator from Arkansas [Mr. ROBINSON] as on the previous vote. If he were present and not paired, he would vote "yea."

Mr. STERLING (when his name was called). Transferring my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Delaware [Mr. DU PONT], I vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. WATSON of Georgia (when his name was called). I transfer my general pair with the junior Senator from Arizona [Mr. CAMERON] to the senior Senator from Missouri [Mr. REED] and vote "yea."

The roll call was concluded.

Mr. McKINLEY. I transfer my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "nay."

Mr. LODGE. I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

Mr. HARRIS. I transfer my pair with the junior Senator from New York [Mr. CALDER] to the senior Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. GLASS. Making the same transfer of my pair as on the preceding vote, I vote "yea."

Mr. HARRISON. Has the junior Senator from West Virginia [Mr. ELKINS] voted?

The VICE PRESIDENT. He has not voted.

Mr. HARRISON. I transfer my pair with that Senator to the senior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

The roll call resulted—yeas 16, nays 31—as follows:

YEAS—16.

Dial	Harrison	Overman	Stanley
Fletcher	Heflin	Ransdell	Walsh, Mass.
Glass	Hitchcock	Sheppard	Walsh, Mont.
Harris	Norris	Simmons	Watson, Ga.

NAYS—31.

Ball	Hale	McCumber	Phipps
Brandegee	Jones, Wash.	McKinley	Poindexter
Capper	Kellogg	McLean	Smoot
Curtis	Kendrick	McNary	Sterling
Ernst	Keyes	Nelson	Sutherland
France	Ladd	Newberry	Townsend
Frelinghuysen	Lenroot	Nicholson	Warren
Gooding	Lodge	Oddie	

NOT VOTING—49.

Ashurst	Edge	New	Spencer
Borah	Elkins	Norbeck	Stanfield
Broussard	Fernald	Owen	Swanson
Bursum	Gerry	Page	Trammell
Calder	Harreld	Pepper	Underwood
Cameron	Johnson	Pittman	Wadsworth
Caraway	Jones, N. Mex.	Pomerene	Watson, Ind.
Colt	King	Rawson	Weller
Crow	La Follette	Reed	Williams
Culberson	McCormick	Robinson	Willis
Cummins	McKellar	Shields	
Dillingham	Moses	Shortridge	
du Pont	Myers	Smith	

The VICE PRESIDENT. On this question the yeas are 16 and the nays are 31. A quorum has not voted. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Harris	McKinley	Sheppard
Brandegee	Harrison	McLean	Simmons
Capper	Heflin	McNary	Smoot
Curtis	Hitchcock	Newberry	Stanley
Dial	Jones, Wash	Nicholson	Sterling
Ernst	Kellogg	Norris	Sutherland
Fletcher	Kendrick	Oddie	Townsend
France	Keyes	Overman	Wadsworth
Frelinghuysen	Ladd	Phipps	Walsh, Mass.
Gooding	Lodge	Poindexter	Walsh, Mont.
Hale	McCumber	Ransdell	Warren

The VICE PRESIDENT. Forty-four Senators have answered to their names. A quorum is not present. The Secretary will call the roll of absentees.

The reading clerk called the names of the absent Senators, and Mr. LENROOT answered to his name when called.

Mr. SHORTRIDGE entered the Chamber and answered to his name.

The VICE PRESIDENT. Forty-six Senators have answered to their names. A quorum is not present.

Mr. McCUMBER. Mr. President, I move that the Sergeant at Arms be directed to procure the attendance immediately of those Senators who are absenting themselves from the Chamber.

The motion was agreed to.

The VICE PRESIDENT. The Sergeant at Arms is so ordered.

Mr. LA FOLLETTE, Mr. SHIELDS, Mr. BURSUM, and Mr. RAWSON entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty Senators have answered to their names. A quorum is present. The question is on agreeing to the amendment of the Senator from Texas [Mr. SHEPPARD] to the committee amendment, on which the yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as before as to my pair and transfer, I vote "yea."

Mr. HARRIS (when his name was called). Making the same announcement as before as to my pair and its transfer, I vote "yea."

Mr. HARRISON (when his name was called). I transfer my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Missouri [Mr. REED] and vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and transfer, I vote "nay."

Mr. LODGE (when his name was called). Making the same transfer of my pair as before, I vote "nay."

Mr. McKINLEY (when his name was called). Making the same announcement as before, I vote "nay."

Mr. STERLING (when his name was called). Making the same announcement as to my pair and its transfer as on previous votes, I vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. DIAL. I desire to make the same announcement as to the Senator from Arkansas [Mr. ROBINSON] as on former votes. If the Senator from Arkansas were present, he would vote "yea."

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 15, nays 35, as follows:

YEAS—15.

Dial	Heflin	Ransdell	Stanley
Fletcher	La Follette	Sheppard	Walsh, Mass.
Harris	Norris	Shields	Walsh, Mont.
Harrison	Overman	Simmons	

NAYS—35.

Ball	Gooding	McCumber	Rawson
Brandegee	Hale	McKinley	Shortridge
Broussard	Jones, Wash.	McLean	Smoot
Bursum	Kellogg	McNary	Sterling
Capper	Kendrick	Newberry	Sutherland
Curtis	Keyes	Nicholson	Townsend
Ernst	Ladd	Oddie	Wadsworth
France	Lenroot	Phipps	Warren
Frelinghuysen	Lodge	Poindexter	

NOT VOTING—46.

Ashurst	Elkins	Myers	Spencer
Borah	Fernald	Nelson	Stanfield
Calder	Gerry	New	Swanson
Cameron	Glass	Norbeck	Trammell
Caraway	Harreld	Owen	Underwood
Colt	Hitchcock	Page	Watson, Ga.
Crow	Johnson	Pepper	Watson, Ind.
Culberson	Jones, N. Mex.	Pittman	Weller
Cummins	King	Pomerene	Williams
Dillingham	McCormick	Reed	Willis
du Pont	McKellar	Robinson	
Edge	Moses	Smith	

So Mr. SHEPPARD'S amendment to the committee amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. McCUMBER. Mr. President, I hope the Sergeant at Arms will not consider that the order which has been made ceases to be in force when there has been no recision on the part of the Senate. I shall ask later in the evening that the Sergeant at Arms make a report, because we ought to know why we can not keep Senators in the Chamber when there are more than a sufficient number to make a quorum at all times.

Mr. President, I now ask that the Senate consider paragraph 210.

The VICE PRESIDENT. The first amendment of the Committee on Finance in the paragraph will be stated.

The READING CLERK. On page 35, paragraph 210, line 19, after the word "manner," it is proposed to insert "25 per cent ad valorem; ornamented, incised, or decorated in any manner."

Mr. FLETCHER. Mr. President——

Mr. McCUMBER. Mr. President, before the Senator from Florida proceeds, let me explain that there are practically three classes of articles with different rates of duty embraced in the paragraph as it now stands with the amendment. On a certain class the duty proposed is 25 per cent ad valorem, as compared to a rate under the Underwood law of 15 per cent ad valorem. On another class, namely, decorated, the duty under the Underwood law is 20 per cent ad valorem, and under the Senate committee amendment 40 per cent ad valorem. Rockingham earthenware under the present Underwood law carries a 30 per cent ad valorem duty.

Now, I desire to make some changes in this paragraph. The first change will be to modify the first Senate committee amendment by striking out the numeral "25" and inserting in lieu thereof the numeral "15."

The duty will then be just the same as that in the present law. Secondly, I shall ask that the Senate disagree to the amendment on page 35, line 22. That will reinstate the Underwood law rate of 20 per cent. The third amendment will be to add at the end of line 23 the words "and Rockingham earthenware, 25 per cent ad valorem." That will be a less rate than that imposed by the present Underwood law. So on two classes of commodities the rate will be the same as in the Underwood law and on the third class the rate would be 5 per cent ad valorem less than in the Underwood law.

I will first move, on page 35, line 19, to strike out "25" and to insert in lieu thereof "15."

Mr. FLETCHER. Mr. President, I desired to make an inquiry of the Senator from North Dakota. I did not rise for the purpose of discussing the paragraph now before the Senate. I wished to inquire of the Senator from North Dakota whether he was going to pass over for the present paragraphs 211 and 213a? I have been requested to pay some attention to those paragraphs, and I wish to regulate my own movements. I want to ascertain whether or not those paragraphs will come up to-night?

Mr. McCUMBER. The Senator from North Carolina [Mr. SIMMONS] has asked that we pass over to paragraph 227, and I have agreed to do that. That is the paragraph relative to optical glasses.

Mr. FLETCHER. So the paragraphs to which I refer will not come up until after that paragraph shall have been considered?

Mr. McCUMBER. No; not just now.

Mr. FLETCHER. But will it come up later during the evening or will it go over until to-morrow? I should like to know.

Mr. McCUMBER. That is the paragraph which the Senator from Washington [Mr. POINDEXTER] desired to discuss, and as he has not been very well recently, I have agreed to let the paragraph go over for a day or two.

Mr. POINDEXTER. To which paragraph is the Senator from Florida referring?

Mr. FLETCHER. I had reference to paragraphs 211 and 213a. They might be considered now.

Mr. POINDEXTER. I am not asking that those paragraphs go over. The paragraph of magnesite is the only one that I asked to have go over.

Mr. FLETCHER. That is paragraph 204a.

Mr. McCUMBER. We may then return to paragraph 211 after we shall have considered paragraph 227, if that is agreeable.

The first amendment which I offer is to strike out "25" and insert in lieu thereof "15," in paragraph 210.

Mr. WALSH of Montana. Mr. President, I congratulate the chairman of the committee—and the country, for that matter—upon the change which he has suggested. I find that it is difficult to understand how the committee could ever have been led to suggest the amendments which they propose. This paragraph deals with "common yellow, brown, or gray earthenware made of natural, unwashed, and unmixed clay, plain or embossed; common salt-glazed stoneware; stoneware and earthenware crucibles," and so forth and so forth—the ordinary dishes of the household, cups and saucers, plates, and other like vessels that are necessities in every home. These articles under the

Underwood law carried duties of 15 and 20 per cent; that is, 15 per cent when they are plain and 20 per cent when they are ornamented or decorated in any way. The House bill imposed a duty of 20 per cent on all of them without distinction as to decoration or ornamentation, but the Senate committee concluded to increase the rate fixed by the Underwood law upon the plain crockery 66⅔ per cent and on the decorated or ornamented crockery 100 per cent, making the rates 25 per cent and 40 per cent, respectively.

Mr. McCUMBER. Mr. President, the Senator should modify his last statement. His first statement, of course, is correct, but in connection with his last statement he must recall that the House rate is 20 per cent upon the American valuation, and 40 per cent on the foreign valuation would not be any increase of duty of at least 100 per cent.

Mr. WALSH of Montana. I was comparing the rate proposed by the Senate committee with the rate fixed in the existing law.

Mr. SMOOT. The Senator is right from that standpoint.

Mr. WALSH of Montana. The Senate committee propose an increase upon the plain ware of 66⅔ per cent over the present rate and on the ornamented or decorated ware of 100 per cent over the existing rate, increasing the duty from 20 per cent to 40 per cent, and that, Mr. President, in view of the fact that the domestic production is enormous and the imports are negligible.

Mr. DIAL. Mr. President——

Mr. WALSH of Montana. I yield to the Senator.

Mr. DIAL. Is that the material out of which flower jars are made?

Mr. WALSH of Montana. Yes; that is, plain flower jars. There are fancy flower jars which are taken care of in two subsequent paragraphs.

Mr. DIAL. So that it would seem that we shall not be able to have a few flowers without a tariff duty being imposed on the flower jars.

Mr. WALSH of Montana. No. "Red earthenware, usually porous, is made from red burning clays." That is the material of which flower pots are usually made, and that is covered by this paragraph.

Mr. SMOOT. Mr. President, do I understand the Senator to intimate that he desires to reduce these rates lower than those of the existing law?

Mr. WALSH of Montana. No; I am quite content to leave them as the committee now propose to fix them.

Let me call attention to the fact that of this particular kind of ware there was produced in this country, in 1914, $4,409,205 worth; in 1916, $4,852,639 worth; in 1918, $5,361,025 worth; and in 1920, $7,242,579 worth—a very gratifying growth, as will be observed, in the production. On the other hand, the importations were as follows:

In 1918 earthenware not decorated, ornamented, or incised in any manner to the extent of $5,251 was introduced.

The importations of earthenware, decorated, ornamented, or incised in any manner, and manufactures of such ware, in 1918 were $2,726. The importations of crucibles of stone and earthenware in 1918 were $3,019. So that practically $10,000 worth of these things was imported in 1918; in 1919 there was a little more; in 1920 there was about $30,000 worth; in 1921 about $21,000 worth, the quantity being entirely negligible.

I suppose this must have been a mere inadvertence on the part of the committee, because I can not conceive that, considering the facts laid before them by the Tariff Commission, they would ever have thought of imposing this tremendous burden upon a household necessity and upon every household in the country; so I feel highly gratified and pleased that the Senate committee has concluded not to raise the rates on this class of articles.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from North Dakota, on behalf of the committee, to the committee amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. I ask that the Senate disagree to the committee amendment on page 35, line 22.

Mr. WALSH of Montana. Would not the proper procedure be simply to submit the amendment?

Mr. McCUMBER. I am not going to make a formal motion, but I simply ask the Senate to disagree to the committee amendment.

The VICE PRESIDENT. The next amendment will be stated.

The next amendment was, on page 35, line 22, after the words "provided for," to strike out "20" and insert "and Rockingham earthenware, 40," so as to read:

And manufactures wholly or in chief value of such ware, not specially provided for, and Rockingham earthenware, 40 per cent ad valorem.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. McCUMBER. I now move to add, after the words "ad valorem," the words "and Rockingham earthenware, 25 per cent ad valorem."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from North Dakota on behalf of the committee.

The amendment was agreed to.

Mr. McCUMBER. I now ask that we turn to page 45, paragraph 227.

Mr. WALSH of Montana. Mr. President, before passing to that, something was said concerning paragraph 211 and the related paragraph 213a. There are a number of Senators who desire to say something on those paragraphs who are not prepared to discuss them this evening. I should like to inquire of the Senator if it would be agreeable to him to let those stand over?

Mr. McCUMBER. I understand that there was some Senator—I do not remember now which one it was—who desired to have those passed over some time ago. I do not know whether that Senator is ready to go on or not.

Mr. NICHOLSON. I wanted to go on to-morrow morning.

Mr. McCUMBER. The Senator from Colorado informs me that he desires to take up that subject to-morrow morning; and the Senator from North Carolina has asked that we consider paragraph 227, if it is agreeable. I ask that the Secretary state the first amendment in paragraph 227.

The PRINCIPAL LEGISLATIVE CLERK. On page 45, line 19, after the word "optical," it is proposed to strike out "glass" with a comma, and to insert "glass."

The amendment was agreed to.

The PRINCIPAL LEGISLATIVE CLERK. On page 45, line 21, it is proposed to strike out "equipment" and to insert "equipment" with a comma.

The amendment was agreed to.

The PRINCIPAL LEGISLATIVE CLERK. On the same line, after the word "or," where it occurs the second time, it is proposed to insert the word "for."

The amendment was agreed to.

The PRINCIPAL LEGISLATIVE CLERK. On page 45, line 22, it is proposed to strike out "35" and to insert "55," so as to make the paragraph read:

Optical glass or glass used in the manufacture of lenses or prisms for spectacles, or for optical instruments or equipment, or for optical parts, scientific or commercial, in any and all forms, 55 per cent ad valorem.

Mr. SHEPPARD. I move to amend the committee amendment by inserting, in lieu of "55," the figures "25."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Texas to the amendment of the committee.

Mr. SHEPPARD. Mr. President, the Republican tariff act of 1919 contained a paragraph to the effect that glass plates or disks, rough cut or unwrought, for use in the manufacture of optical instruments, spectacles, and eyeglasses, and suitable only for such use, should be admitted free of duty, provided that such disks exceeding 8 inches in diameter might be polished sufficiently to enable the character of the glass to be determined.

The Democratic tariff act of 1913, the act now in force, reenacted this paragraph without change. In other words, the Payne-Aldrich Act of 1909 placed this article on the free list. The Democratic tariff act of 1913 contained the same provision.

Mr. SMOOT. Mr. President, I suppose the Senator knows that at that time we had no industry in the United States. It has been developed entirely since that date.

Mr. SHEPPARD. I am coming to that. I am merely referring to these former acts in order to give the recent history of the tariff on this question.

The Republican tariff bill of 1922, as it passed the House, levies a duty of 35 per cent ad valorem on optical glass or glass used in the manufacture of lenses or prisms for spectacles, or for optical instruments or equipment or optical parts, scientific or commercial, in any and all forms.

This Republican bill of 1922, as reported to the Senate, increases the House rate from 35 per cent ad valorem to 55 per cent ad valorem.

Optical glass is one of the most important articles of human use. It is one of the supreme physical essentials of scientific progress. It has supplemented and strengthened the fragile organs of mortal vision to an extent almost impossible to measure. It has made possible the microscope, the telescope, the field glass, the range finder, the modern gun sight, the periscope, the aiming circle, the photographic lens, the control and direction of troop movements, and artillery fire. It is

therefore a fundamental element of national defense. In supporting and relieving the eye it becomes a beneficient factor in the health and efficiency of humankind.

It was not produced in any substantial degree in the United States before 1918. Our entry into the war the year before necessitated urgent endeavors to establish industries here for the making of optical glass. With the assistance of the Government and certain noted scientists, four establishments were erected with a combined capacity equal to our requirements. During the seven months, from April to October, 1918, these establishments turned out 475,924 pounds of this glass.

American manufacturers, according to the Tariff Commission, have developed formulas and processes for practically every kind of optical glass. There are practically no exports, while imports for the first 10 months of 1920 had a value of nearly $750,000. Imports from England amounted to $393,967, from Germany $152,166, from France $136,456. Home production amounts to about $250,000 per annum, if my inferences from the meager testimony on this phase of the subject are correct.

I have been unable to find in any of the data before Congress and the Senate and House committees a definite statement as to the amount of home production in 1920.

I ask the Senator from Utah if he has any data as to the home production of this article in 1920?

Mr. SMOOT. I do not think we have any information since that time.

Mr. SHEPPARD. I have been unable to find the home production for 1920 in any of the hearings or reports.

Mr. SMOOT. The Senator will notice, however, the great increase in imports.

Mr. SHEPPARD. That is true; and I am also coming to that phase of the question.

Mr. SMOOT. As soon as the Senator gets through, I will make a short statement.

Mr. SHEPPARD. This is undoubtedly a new industry in the United States, and undoubtedly some measure of protection is justifiable from a sound economic viewpoint. It will be illuminating at this point to give the Senate the comment of the Tariff Commission on this particular phase of the subject:

Says the Tariff Commission:

> This new industry in the United States has the materials, the scientific knowledge, the equipment, and the capacity to compete with some of the best products of foreign manufacture. During the past three years Germany has been shut out of our market and American manufactures have perfected and increased their output.
>
> We have not as yet produced all of the varieties required for domestic consumption; we are still (1918) obliged to import about one-half of the normal amounts (1913–14) of unwrought and rough cut optical glass and in addition large quantities of optical glass in a finished condition as parts of optical instruments. In December, 1917, we were making but a few fundamental varieties of optical glass. At that time a scientific authority stated—

And I desire to say that that authority was the Metallurgical and Chemical Engineering Journal for December 15, 1917—

> At that time a scientific authority stated that "the four most necessary varieties of glass, to wit, a very light and transparent crown suitable for field-glass prisms, an ordinary crown of slightly higher index, a typical heavy flint, and a typical light flint, are already in production. The two next in importance are a heavy baryta crown and a light baryta flint used particularly in photographic lenses, and these, we learn, are under way, with every prospect of reaching suitable commercial developments. If a good supply of well-annealed material, even of the half-dozen sorts here enumerated, can be had, the country will be in pretty good shape to make its own optical instruments. The matter of suitable mixing and annealing for the production of disks of large size may be trusted to the future."
>
> It was not until after five years of scientific research and experiment that the Jena works, of Germany, developed 28 new kinds of optical glass. This firm had the advantage of 25 years' experience in producing optical glass, and in this field was practically without a competitor. It is not reasonable to expect that American manufacturers and scientists could in less than three years attain the required standards of knowledge and efficiency to meet the demands of domestic consumption and the inroads of foreign competition.
>
> During the war the optical industries of Germany, France, and England have been driven to a high state of industrial activity and the scientific precision essential in the production of perfect optical glass. Under the tariff act of 1913 optical glass is admitted free of duty into the United States. The new American industry under such conditions is unequal to the task of engaging in successful competition with the output of the highly developed industry and the experienced scientists and manufacturers of the countries named.

Such is the comment of the Tariff Commission on the condition of this industry at the present time. Undoubtedly the superior experience and the long period of operation of factories in foreign countries make it impracticable at present for the new enterprises in this country, industries only three or four years old, to compete with them successfully. Consequently, the question is, What is a reasonable tariff rate?

One of the manufacturers of this article, optical glass, appeared before the Ways and Means Committee of the House and stated that as nearly as he could determine, and as nearly as his company could determine, European prices ranged from 40 to 70 per cent of our prices. That gentleman was Mr. Harvey N. Ott, of the Spencer Lens Co., of Buffalo, N. Y.

It seems that the House committee took him practically at his word. It would seem to be the part of prudence, in granting protection, to discount to some extent the claims of those directly interested. Nobody else appeared before the House committee except this interested manufacturer, and the House committee gave him practically what he asked—35 per cent. I take it that it would be a prudent thing to discount what he said at least 10 per cent, and that a rate of 25 per cent would be proper and legitimate under the circumstances.

When the bill reached the Senate, the same gentleman appeared before the Senate Finance Committee and asked for protection on optical glass by a rate of 50 per cent, and the Senate committee gave him 55 per cent.

Mr. SMOOT. He asked 50 per cent on the American valuation.

Mr. SHEPPARD. This is his testimony before the Senate Finance Committee.

Mr. SMOOT. I am perfectly aware of that; and it was on the American valuation.

Mr. SHEPPARD. He said nothing about that in his testimony.

Mr. SMOOT. If the Senator desires, I can call his attention to it, and then he will not make such a statement.

Mr. SHEPPARD. I will read the testimony.

Mr. SMOOT. I have it here.

Mr. SHEPPARD. I have it, too.

Mr. SMOOT. He said:

> In the present bill, as it passed the House, there is a duty of 35 per cent ad valorem on optical glass. That is, of course, based on the American valuation. It helps out considerably over what it would be under the old valuation, but the unfortunate part of it is that of six of the more important kinds of optical glass our average cost is now $2.43 per pound, due to some extent to recent increase in cost of natural gas. On the other hand, the average import price, or quotations, other dealers have been getting on these glasses plus 35 per cent ad valorem American valuation amounts to $2.20 per pound. In other words, the average cost of these six kinds of glass is 23 cents more than they can be imported for on the 35 per cent ad valorem rate. We therefore ask for a 50 per cent duty—

On the American valuation.

Mr. SHEPPARD. Then he must have been asking for an outrageously high rate. It is clear from his testimony that his request of the House committee was based on the House standard—that is, American valuation—but that his request of the Senate committee was based on the Senate committee's standard. The percentages, if added to the American valuation, will be much higher than they are when based on the standard adopted by the Senate committee. But he asked for a higher rate from the Senate committee.

Mr. SMOOT. I am perfectly aware of that. I wanted the Senator to know that he asked for 50 per cent on the American valuation, and that the Senate committee gave him 55 on the foreign valuation.

Mr. SHEPPARD. I intended to quote from his testimony and to make the point that a man who would ask for a rate of that kind could not well be trusted to present the situation accurately and properly. I mean no personal reflection. He would be unconsciously influenced by self-interest.

Mr. SMOOT. I want to say to the Senator that his testimony was not all that we had before the committee. Some of the Government officials were very much interested in this item. The Senator, of course, knows that we were left almost helpless when the war came on, and the Government of the United States, in order to get the industry established at all, advanced money for that very purpose.

Mr. SHEPPARD. I have outlined the difficulties we encountered during the war, and I have said that this industry having been developed during the war, and being of great importance, ought to have a rate which would aid it to develop until it could compete with the foreigners. The only testimony in the hearings is the testimony of this interested manufacturer, and the other testimony to which the Senator refers is not in these hearings.

I ask for the yeas and nays on my amendment.

Mr. SMOOT. What is the Senator's amendment?

Mr. SHEPPARD. To reduce the rate to 25 per cent.

The yeas and nays were ordered.

Mr. FRELINGHUYSEN. Mr. President, before the yeas and nays are called, I want to say to the Senator from Texas that he does not understand the plight this country was in when we entered the war, and the imports of this optical glass from Germany were cut off.

Mr. SHEPPARD. I have referred to that.

Mr. FRELINGHUYSEN. There were four manufacturers in this country who undertook, under the direction of scientists

and Army officers, to supply the demand. This glass is very necessary in warfare, as the Senator knows. These industries were established, and to-day, with Germany practically having had control of the market prior to the war, this highly technical industry having been established in the United States, the question is whether we are to be independent of any foreign country, develop the industry here, and protect ourselves against the low-production cost in Germany.

From the standpoint of national defense, it is necessary that this proper protection be given. Of course, if the Senator wants to imperil the industry by putting a rate of 25 per cent on the article, which I am informed is too low, he is entitled to his viewpoint, but after the House had studied the question of the American valuation, they gave them 25 per cent on the American valuation. We are competing with very low production costs abroad in this optical-glass matter, and 55 per cent is the essential tariff, based upon the foreign valuation.

Mr. SHEPPARD. The representative of the optical glass firm who appeared before the committee asked for only 50 per cent. They gave him 55. He asked for bread, and they gave him cake.

The principal legislative clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as before, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. McKINLEY (when his name was called). I have a permanent pair with the junior Senator from Arkansas [Mr. CARAWAY], which I transfer to the senior Senator from California [Mr. JOHNSON], and vote "nay."

Mr. DIAL (when Mr. ROBINSON's name was called). I make the same announcement as before with reference to the pair of the Senator from Arkansas [Mr. ROBINSON]. If he were present and not paired, he would vote "yea."

Mr. STERLING (when his name was called). Making the same announcement as on the previous vote, I vote "nay."

Mr. SUTHERLAND (when his name was called). I make the same announcement as on the previous vote with reference to my pair and its transfer, and vote "nay."

Mr. WATSON of Georgia (when his name was called). I transfer my pair with the junior Senator from Arizona [Mr. CAMERON] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

The roll call was concluded.

Mr. LODGE. Making the same announcement as before as to the transfer of my pair, I vote "nay."

Mr. EDGE (after having voted in the negative). I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the senior Senator from Iowa [Mr. CUMMINS] and allow my vote to stand.

Mr. HARRIS. Making the same announcement as before, I vote "yea."

Mr. HARRISON. I transfer my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. JONES of New Mexico. Making the same announcement as previously with reference to the transfer of my pair, I vote "yea."

The result was announced—yeas 14, nays 38, as follows:

YEAS—14.

Dial	Heflin	Sheppard	Walsh, Mass.
Fletcher	Jones, N. Mex.	Shields	Watson, Ga.
Harris	La Follette	Simmons	
Harrison	Overman	Stanley	

NAYS—38.

Ball	Hale	McKinley	Rawson
Brandegee	Harreld	McLean	Shortridge
Bursum	Jones, Wash.	McNary	Smoot
Capper	Kellogg	Moses	Sterling
Curtis	Kendrick	Newberry	Sutherland
Edge	Keyes	Nicholson	Townsend
Ernst	Ladd	Oddie	Wadsworth
France	Lenroot	Page	Warren
Frelinghuysen	Lodge	Pepper	
Gooding	McCumber	Phipps	

NOT VOTING—44.

Ashurst	du Pont	Nelson	Smith
Borah	Elkins	New	Spencer
Broussard	Fernald	Norbeck	Stanfield
Calder	Gerry	Norris	Swanson
Cameron	Glass	Owen	Trammell
Caraway	Hitchcock	Pittman	Underwood
Colt	Johnson	Poindexter	Walsh, Mont.
Crow	King	Pomerene	Watson, Ind.
Culberson	McCormick	Ransdell	Weller
Cummins	McKellar	Reed	Williams
Dillingham	Myers	Robinson	Willis

So Mr. SHEPPARD's amendment to the committee amendment was rejected.

Mr. McCUMBER. Mr. President, I wish to move to reduce the rate of duty proposed by the Senate committee, but before doing so desire to read a portion of the testimony that was given before the Ways and Means Committee of the House. I read from the testimony of Mr. Harvey N. Ott, of the Spencer Lens Co., of Buffalo, N. Y.:

I am a member of the Spencer Lens Co., of Buffalo, and I am here particularly interested in the optical glass question, and I have a brief which I want to leave with you, but there are two or three points which I want to stress to you a little further. That is the fact that the foreign optical glass concerns increased their facilities during the war very greatly, and very naturally they are looking now for a place to unload it, and they have been coming to this country with prices which, with their years of experience and their organization, etc., we, as a new industry, are not able to meet. No optical glass was made in this country before the war, and it is an entirely new industry that we have developed here. It is one of the infant industries, and it is something that has taken a lot of work and a lot of investigation and a lot of hard knocks. We have succeeded, so far as quality is concerned, in making as good optical glass as we were ever able to import. We have not been able to make it at prices at which we can compete with the foreign glass as it is now coming in.

Two years ago we imported something like $217,000 worth of optical glass. During the first 10 months of 1920 we imported $817,000 worth of optical glass. We ourselves made and sold, including what we used, perhaps $125,000 worth of optical glass. But as the year advanced and as more and more of the European competition was felt our business has correspondingly dropped off. We must have some protection in this optical glass. You know how serious the condition was during the war. You have not forgotten that during the war you people sent out a call for field glasses, opera glasses, and spyglasses and everything else, because we did not have the optical glass in this country.

Further on Mr. Ott said:

A month ago the factory manager of one of our largest competitors in Germany visited us in Buffalo, and he told me that they were paying skilled mechanics 400 marks a week. Well, 400 marks a week at the present value of the mark, which ranges anywhere from a cent and a third to a cent and a half, will make that man getting anywhere from $5 to $6 a week, as against our skilled workmen that we pay from $35 to $40 a week. Of course, this rate of exchange we are all hoping will be better, and it won't be as bad in the future, but that is the condition we are facing now, and the same thing is true of all of our scientific apparatus.

As stated, this is an infant industry—an industry that has been just started in this country. The sore need of having such an industry was manifested when we went into the war. We want to keep the industry, now that we have established it. We want to give the protection that is necessary to maintain that industry in the United States. After looking over the testimony again I am satisfied, however, that we have given a rate somewhat higher than is absolutely necessary for protection. Taking the testimony altogether, although they asked for 50 per cent ad valorem on the American valuation, I think the testimony of Mr. Ott himself shows that 45 per cent upon the foreign valuation will sufficiently protect the American manufacturer.

I therefore move to amend by striking out the figures "55" and inserting in lieu thereof the figures "45."

The PRESIDING OFFICER (Mr. LADD in the chair). The amendment to the amendment will be stated.

The READING CLERK. On page 45, line 19, strike out "55," as proposed by the committee, and insert in lieu thereof "45."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SHEPPARD. Mr. President, I desire to ask the Senator in charge of the bill if the next paragraph, 228, which relates evidently to this question and relates to instruments that are made of optical glass, can not also be disposed of at this time. I suggest that we might dispose of it now.

Mr. McCUMBER. I think we can go to the next paragraph at this time. I will move to amend that by striking out the figures "55," as proposed by the committee, and inserting in lieu thereof "45"; but there is an amendment in the beginning that should be agreed to first, which I ask may be stated.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. On page 45, line 24, paragraph 228, the committee proposes to strike out the word "photographic" and insert in lieu thereof "azimuth mirrors, sextants, and octants; photographic."

The amendment was agreed to.

The next amendment of the committee was, on page 46, line 1, to strike out the words "surveying instrument" and the comma.

The amendment was agreed to.

Mr. McCUMBER. On page 46, line 3, I move to strike out the numerals "55" and to insert in lieu thereof the numerals "45."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. Mr. President, we are ready to take up paragraph 214.

Mr. FLETCHER. Mr. President, I understood the Senator was going to take up paragraphs 211 and 213a.

Mr. McCUMBER. The Senator from North Carolina asked that these paragraphs should go over.

Mr. FLETCHER. Does the Senator from North Carolina understand that I am ready to go on with paragraphs 211 and 213? I thought the Senator perhaps was thinking someone else was going to discuss those paragraphs.

Mr. SIMMONS. My recollection is that I was told those paragraphs were to go over on account of the Senator from Washington [Mr. POINDEXTER].

Mr. SMOOT. He asked that they should go over.

Mr. FLETCHER. The Senator from Washington said to-night that he did not ask to have them go over. He said that what he had reference to was paragraph 204a, and that he did not ask to have paragraph 211 go over.

Mr. SMOOT. The Senator from Colorado [Mr. NICHOLSON] asked that it go over.

Mr. NICHOLSON. Mr. President, I have asked to have this item go over until to-morrow morning. There are some data which I desire to present that I can not secure until that time.

Mr. FLETCHER. This is a new Richmond in the field. I never heard of the Senator from Colorado making the request. I knew that the Senator from North Dakota supposed that the Senator from Washington wanted it to go over, but I was present when the Senator from Washington said he did not desire to have it go over. Consequently, I was prepared to take it up and I understood that we were going to return to that paragraph.

Mr. McCUMBER. The Senator from Colorado [Mr. NICHOLSON] said that he did, and so I allowed it to go over.

Mr. FLETCHER. I did not understand that the Senator from Colorado wanted it to go over. When last it was mentioned I think it was stated that the Senator from North Carolina [Mr. SIMMONS] wanted it to go over.

Mr. McCUMBER. I simply wish to call up paragraph 214; that is all; and then I will yield the floor.

Mr. FLETCHER. I do not know whether or not the Senator from North Carolina desires to take up another paragraph.

Mr. SIMMONS. I am in no hurry.

Mr. FLETCHER. Would the Senator from North Dakota mind, so long as we have gotten down to paragraph 230, going on with paragraphs 230 and 231? I think we might go on with those paragraphs now.

Mr. McCUMBER. Is there any objection to going on with paragraph 214? Is there any Senator who desires that it be passed over? If so, why?

Mr. FLETCHER. I understood that paragraph had been passed over.

Mr. SIMMONS. If the Senator from Florida is ready to have that paragraph taken up, I hope the Senator from North Dakota will let him do so.

Mr. McCUMBER. Certainly; I will do so, if it is asked. What paragraph does the Senator from Florida desire to be now taken up?

Mr. FLETCHER. Paragraph 230. It is a continuation of the paragraph we have just finished.

Mr. McCUMBER. Very well. Then I will ask that we proceed to consider paragraph 230.

The PRESIDING OFFICER. The amendment proposed by the Committee on Finance to paragraph 230 will be stated.

The ASSISTANT SECRETARY. On page 46, paragraph 230, line 8, the Committee on Finance proposes to strike out "all mirrors" and to insert "and all mirrors not specially provided for."

Mr. FLETCHER. I think there is no objection to that amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to. The next amendment proposed by the committee in paragraph 230 will be stated.

The ASSISTANT SECRETARY. On page 46, line 10, it is proposed to strike out the word "cases" and to insert "cases, 60 per cent ad valorem."

Mr. FLETCHER. Mr. President, with regard to that amendment, I wish to submit some data which I have gathered from such investigation as I have been able to make of the paragraph. The first observation I will make in reference to it is that under the act of 1913 the duty was 30 per cent ad valorem on all this glass. The act of 1913 reads:

PAR. 95. Stained or painted glass windows or parts thereof and all mirrors not exceeding in size 144 square inches, with or without frames or cases; * * * and all glass or manufactures of glass or paste or of which glass or paste is the component material of chief value, not specially provided for in this section, 30 per cent ad valorem.

The act of 1909 covered identically the same classification so far as I can see from reading it over, but the duty under the act of 1909 was 45 per cent ad valorem. The pending bill, House bill 7456, as it came from the other House, provided for a 30 per cent ad valorem duty. That is the same duty, so far as I can see, as was provided for under the act of 1913. Now the Senate committee proposes to change the rate of the House bill so that "stained or painted glass windows and parts thereof and all mirrors not specially provided for, not exceeding in size 144 square inches, with or without frames or cases," shall bear a duty of 60 per cent ad valorem.

That is twice what the House rate was; it is twice what the act of 1913 provided and 15 per cent greater than the duty imposed by the act of 1909. The amendment following in this same paragraph provides for a 60 per cent ad valorem duty on "all glass or manufactures of glass or paste, or of which glass or paste is the component material of chief value, not specially provided for."

That is just twice the amount of the duty which is carried in the act of 1913 and is 15 per cent higher than the duty carried by the act of 1909.

It seems to me that these increases are unwarranted and that there is no occasion for them; that there can be no good results follow either by way of adding to the amount of revenue coming into the Treasury from the imposition of the duties or even by way of protection to any worthy industry in this country.

I quote from the Tariff Information Summary as follows:

Stained glass windows are made of small pieces of glass colored in any of the ways mentioned and held together by strips of lead. Sometimes pictorial effects are obtained by painting on single pieces of glass.

In this country in 1912 the gross production "is estimated at about $7,000,000, which would include articles other than stained-glass windows. Competition is principally from Germany and Austria."

The imports of stained glass, or parts, and small mirrors amounted to $418,445, the maximum, in 1914.

In the subsequent years there was a very decided falling off in the imports. In 1918 the value of the imports was $24,173; in 1919 it was $26,999; in 1920 it was $94,861; and for nine months of 1921 it was $92,640.

There has been some revenue produced under the 30 per cent duty of the act of 1913. In 1918 the amount of revenue was $7,252, in 1919 it was $8,100, and in 1920 it was $28,458.

The raising of that duty to 60 per cent, it seems to me, would more than likely very greatly decrease the importations; and, as I have said, there would be no gain by way of increase in the revenue by adding to the duty, because the importations are now very small, the total importations during nine months of 1921 amounting only to $92,640. The exports are not given in the Summary of Tariff Information.

With reference to the second amendment proposed by the committee increasing the duty from 30 per cent to 60 per cent ad valorem on manufactures of glass or paste we find that the "paste is specially prepared glass," which is "known also as 'strass' from which imitation gems are manufactured. The requisite qualities of purity, transparency, and high refractivity are comprised in the highest degree in lead-flint glass of unusual density because of the large percentage of lead it contains."

The imports "represent the combined figures for manufactures of glass and of paste not specially provided for, amounting to $427,391 in 1914." In the later years the importations fell off. In 1918 their value was $117,794; in 1919 it was $121,834; in 1920 it was $273,295; and in 1921 it was $260,863.

Under the duty of 30 per cent a certain amount of revenue came into the Treasury. Imports, as will be seen, are comparatively small, and if we raise the duty to twice the present rate and make it 60 per cent in all probability we shall so reduce the imports that we shall get no revenue. The American industry does not require or demand the protection proposed. Therefore I can not see the occasion for making these increases.

The exports of glass and glassware not specially provided for have been as follows:

Calendar year: 1918, $5,401,395; 1919, $8,328,944; 1920, $12,874,614; and the first nine months of 1921, $6,295,511.

In other words, against small importations, ranging from $117,000 to $273,000 a year, we have been exporting $5,000,000 worth, $8,000,000 worth, $12,000,000 worth, and during the last nine months over $6,000,000 worth of these goods.

The exports have been principally to Canada, to the United Kingdom, to Cuba, and to Mexico. I can not see, therefore, any sort of argument to support the increased rates suggested by the committee. The imporations are almost nominal now, and they are coming in under the rate of 30 per cent ad valorem. The proposition of the committee is to raise that rate to 60 per cent ad valorem. If that is done, it can not be hoped to have any imports at all. It seems to me it would be proposing a prohibitive tariff.

There is no need for this duty, as I have said, by reason of its protective effect, because the exportations show that we are

producing vast quantities of these commodities which we do not require in this country, and we are exporting to other countries which I have mentioned vast quantities, in value running into the millions and millions of dollars, whereas the importations are practically nominal.

For these reasons, Mr. President, I object to the changes suggested by this proposed amendment. I think 30 per cent ad valorem is an amply high rate of duty, and that we shall derive more revenue by retaining that duty than we shall by imposing a higher rate of duty; and we shall not in anywise be jeopardizing the interest of any industry or manufacturing enterprise in this country. If there is any reason for these proposed increases, I should be very glad to be enlightened in reference to them.

Mr. SMOOT. Mr. President, this paragraph must be taken into consideration in connection with paragraph 1688. Paragraph 1688 places certain stained window glass on the free list, all above $15 per square foot. As the bill passed the House, some of the representatives of the religious denominations were rather perturbed over the effects of the bill. The manufacturers of stained glass felt quite sure that if there was not an amendment to section 1688 the stained-glass industry would be completely destroyed in the United States, as 90 per cent of all of the stained glass manufactured or imported into the United States goes into houses of worship.

The committee had before it a delegation of laboring men representing every manufacturer of stained window glass in the United States, and I understand that after the committee of laboring men met with the committee and pleaded for their industry they did meet with certain representatives of religious organizations, particularly the representatives of the Catholic Church.

Your committee was informed, not only by the laboring men but by the representatives of the religious denominations who appeared before it, that they recognized the fact that the industry was an important one in the United States; that 70 per cent of the cost of the stained window is labor, and they were perfectly satisfied if the committee would limit the free entry to stained window glass that cost over $15, as I remember, per square foot; and then as to the balance of it, whatever they used, that was made in this country—and really more could be made here than was used in this country—they had no objection whatever to the rates provided for in this bill.

This is the substance of the testimony that was given in connection with what the Tariff Commission reports:

> Labor in the United States for the stained-glass window industry averages $1 per hour. Floor painters receive $1.50, as against 20 cents in Germany. The entire manufacturing operation is handwork, no machinery being used or possible. Labor forms 70 per cent of total cost of production.
>
> In 1914 the production of stained-glass windows in the United States amounted to $212,000. In 1920, owing to the exclusion brought about by the war, the production had increased to $500,000. To-day orders have been placed in Germany to the extent of $800,000 and domestic plants are running at 30 per cent capacity.
>
> American stained-glass windows are comparable to any produced abroad.
>
> Rates suggested: On stained-glass windows, 63 per cent ad valorem and the elimination of the provision of paragraph 1688 permitting the importation of stained-glass windows without payment of duty if imported for presentation to houses of worship. The suggested ad valorem rate was obtained by a comparison of costs on the same window manufactured in the United States and in a representative German plant, as explained in detail in the Ways and Means Committee hearings, page 1673.

Mr. FLETCHER. What paragraph is that?

Mr. SMOOT. Paragraph 1688.

Mr. President, I have a comparison, made by the officials of our Government, showing the result of an investigation that was made as to the mirrors spoken of in this paragraph, made in Germany; and, allowing the importer a profit of 33⅓ per cent on his invoice price, and comparing it with the price of the American product, it would require an ad valorem duty of 350 per cent to equalize the two. This is the result, and I will ask the Senator to note it.

Mirrors in Germany by the dozen were 27¼ cents; the landing charges were 5.1 cents; the selling price of the imported article in the United States was $1.11. The selling price of a comparable article made in America was $1.72. With 33⅓ per cent profit, it would require an ad valorem duty of 350 per cent to equalize the two articles. We are not asking for that, nor did the workingmen ask for it; but these smaller, less valuable mirrors and stained glass can be handled in the United States in connection with the larger ones, and it was finally agreed by all interested parties, both the representatives of the religious denominations and the labor people themselves, that they would be satisfied with the 60 per cent, the labor people claiming that they would try to make ends meet with that and the representatives of the religious denominations saying that they were perfectly willing to meet that situation.

It is rather a grave situation as the conditions exist to-day, and if we intend to keep that industry here I want to say frankly to the Senator from Florida that it can not be done at less than a duty of 60 per cent on the foreign valuation.

Mr. FLETCHER. Mr. President, I can not quite understand that. Of course I do not question what the Senator has said as to the statements by these various witnesses, parties appearing in their own interest, and all that sort of thing, which we ought always to consider; but if we look at the statistics bearing on this item, I can not believe that there is any great threatening of the industry in this country, because we are evidently manufacturing a great deal more of the product than we need, and we are exporting it, according to these figures, by the millions of dollars' worth, and importing it by the hundreds of dollars' worth.

Mr. SMOOT. I will say to the Senator that the testimony from those who ought to know, as they represented the church organizations, showed that there had been placed during this year, at the time they appeared before the committee, orders in Germany alone for $800,000 worth of this glass. The Senator knows that, of course, it takes some time to make those stained windows. They are works of art, and sometimes it takes six months, sometimes more than that to prepare them for shipment.

Mr. FLETCHER. I can understand that; but in 1914 the greatest amount of importation was only $418,425 under the first head of stained or painted glass windows and small mirrors, and under the second head of manufactures of glass or paste the importations in 1914 were $427,391 of value. That was when we had a duty of 30 per cent, showing that in the past we have not been troubled very much by these importations; that a duty of 30 per cent was ample protection, evidently, for this industry, because we made a great deal more than we required in this country, and we brought very little into the country.

The provision with regard to the churches, which the Senator mentions, does not seem to me to be very helpful. For instance, it provides, in paragraph 1688:

> Works of art, productions of American artists residing temporarily abroad, or other works of art, including pictorial paintings on glass, imported expressly for presentation to a national institution or to any State or municipal corporation or incorporated religious society—

Of course, thus far we do not get any benefit; we have not reached the subject, except to a limited degree, where these commodities are manufactured expressly as gifts; but, going on further—

> college, or other public institution, including stained or painted window glass or stained or painted glass windows—

And there we reach this subject—

> which are works of art and valued at $15 or more per square foot, when imported to be used in houses of worship.

That limits this product very materially. In order to come in free it must be a work of art; it must be valued at $15 per square foot or more.

Mr. SMOOT. I will assure the Senator that there is hardly any of it that ever goes into a church that does not cost more than $15 a square foot; and that was perfectly satisfactory to the representatives of the religious denominations in this country.

Mr. FLETCHER. But where is this to be valued—valued over yonder at $15 per square foot?

Mr. SMOOT. Yes; but if the Senator has ever bought any art stained-glass windows, or any kind of art stained glass, he will find out that he, or whoever did pay for it, paid much more than $15 a square foot. I will say to the Senator that many times it runs to $200 and $250 and $300 per square foot.

Mr. FLETCHER. Of course, then it is really a work of art.

Mr. SMOOT. All of this is a luxury. Everything that is in the paragraph is a luxury.

Mr. FLETCHER. Yes; but where it is for the benefit of churches, houses of worship, it is confined to material valued at over $15 a square foot over there. That means that the price here would be $45, $50, or $60 a square foot.

Mr. SMOOT. If there is anything that comes in here that is claimed to be art work, and costs less than $15 per square foot, you can depend upon it that there is not very much art in it, or there is not very much work attached to it. It can not be done by machinery. The glass itself has to be cut many times in the smallest particles, and colored just so.

The figures are made out of glass. Many times a figure is composed of a thousand pieces of glass, every piece fitting so closely with the others that the eye can not see that there is such a thing as a joining. It takes a master hand to make

these things. It takes an artist of the very highest type. It would perhaps take him five or six weeks, in some cases nearly a year, to make one of these masterpieces. So I assure the Senator that the church representatives are perfectly satisfied with the $15 a square foot provision. The importations under existing law to which the Senator has referred are of commodities which come in free.

The figures quoted relate to an article which came in under a duty of 30 per cent and went into the general commerce of the country. I am sure that this is one of the paragraphs under which nobody is going to be hurt.

The men engaged in this pursuit qualify for this work, and none other. They begin when they are young, as apprentices. They live in it. They know nothing whatever other than the work of preparing the stained glass, and when they are thrown out of employment they are in the same situation in which an ordinary common laborer finds himself. No matter how much it has cost them to learn the trade, no matter how many years they have served at it, if the industry ceases in the United States they are just as helpless, if they are 50 years old, as a man who has never done a particle of work up to the time he is 50 years old, never had to work at a thing, and all at once is thrown upon his own responsibility to make a living. They would be the most helpless of men.

Mr. FLETCHER. Mr. President, this paragraph covers something more than mere works of art. You may call them works of art if you like, but it covers other things than these works which should be worth from $15 up to $200 a square foot. Under the act of 1913 there was a paragraph to this effect:

Works of art, productions of American artists residing temporarily abroad, or other works of art, including pictorial paintings on glass, imported expressly for presentation to a national institution or to any State or municipal corporation or incorporated religious society, college, or other public institution, including stained or painted window glass or stained or painted glass windows imported to be used in houses of worship, and excluding any article, in whole or in part, molded, cast, or mechanically wrought from metal within 20 years prior to importation; but such exemption shall be subject to such regulations as the Secretary of the Treasury may prescribe [free].

This paragraph now is changed so as to limit it to this painted window glass, "including stained or painted window glass or stained or painted glass windows which are works of art and valued at $15 or more per square foot, when imported to be used in houses of worship," and so forth. That is added to the provision of a similar character in the act of 1913. They not only must be imported now to go into houses of worship, but they must be worth $15 a square foot before they come in free.

I was pointing out that as this paragraph reads it is pretty broad. It covers not only such articles as I think the Senator from Utah has mentioned and described, but all manufactures of which glass or paste is the component material of chief value, not specially provided for, 60 per cent ad valorem. That is a very broad description, and covers something more than what, strictly speaking, may be called works of art. This paste material is not so much for glass windows and works of art, but it is used to make what they call imitation gems. It is that from which imitation gems are manufactured, and that is largely what the paste is used for. But, as I say, the paragraph is so broad as, it seems to me, to open the door wide for something more than the mere handling of these works of art or glass of this extraordinary kind and character, but requires that any sort of glass or manufactures of glass of which glass or paste is a component part shall pay a duty of 60 per cent.

Undoubtedly one effect is going to be to advance the price in this country if this duty is levied. I do not think there is any question about that. I do not believe that is to the interest of the general public, and I do not believe the industry requires any such result. The manufacturers doing that business, of course, are inclined to keep out all foreign competition, and we again hear Germany spoken of as a competitor which will run these manufactures out unless they are amply protected. They never did it when the duty was 30 per cent, and I do not see how it is possible for them to do it now, with the industry thoroughly established and with the exportations far exceeding the importations of these commodities, and in view of the broad description here I can not escape the feeling that the effect will be not in any wise to increase the revenue coming to the Government, but the effect will be to enable them to raise their prices to the consumers of this country.

That paragraph in the free list, paragraph 1688, only gives admission free duty to those works of art and that kind of glass of the value of $15 a square foot, and brought in for use of churches exclusively. It does not include a very large proportion of the manufactures from this material.

I do not care to say anything further about it. I still feel that 30 per cent is ample, and I move that in line 10 the numeral "60" be stricken out and the numeral "30" be inserted.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The ASSISTANT SECRETARY. On page 46, line 10, strike out "60" and insert "30."

Mr. FLETCHER. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement in regard to my pair and its transfer, I vote "nay."

Mr. HARRISON (when his name was called). I transfer my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nebraska [Mr. HITCHCOCK], and vote "yea."

Mr. FRELINGHUYSEN (when his name was called). I transfer my pair with the junior Senator from Montana [Mr. WALSH] to the junior Senator from Washington [Mr. POINDEXTER], and vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as to the transfer of my pair as on the previous vote, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as heretofore with reference to my pair and its transfer, I vote "nay."

Mr. LODGE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. MCKINLEY (when his name was called). I transfer my pair from the junior Senator from Arkansas [Mr. CARAWAY] to the senior Senator from Minnesota [Mr. NELSON], and vote "nay."

Mr. STERLING (when his name was called). Making the same announcement as on the previous vote, I vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "nay."

Mr. WATSON of Georgia (when his name was called). Transferring my pair with the junior Senator from Arizona [Mr. CAMERON] to the junior Senator from Rhode Island [Mr. GERRY], I vote "yea."

The roll call was concluded.

Mr. HARRIS. Making the same announcement as to my pair, I vote "yea."

Mr. DIAL. Making the same announcement as to my pair and transfer, I vote "yea."

Mr. EDGE. I transfer my general pair with the Senator from Oklahoma [Mr. OWEN] to the Senator from South Dakota [Mr. NORBECK] and vote "nay."

Mr. ERNST. I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "nay."

The result was announced—yeas 13, nays 41, as follows:

YEAS—13.

Dial	Jones, N. Mex.	Sheppard	Watson, Ga.
Fletcher	La Follette	Shields	
Harris	Overman	Simmons	
Harrison	Robinson	Underwood	

NAYS—41.

Ball	Frelinghuysen	McCumber	Rawson
Brandegee	Gooding	McKinley	Shortridge
Bursum	Hale	McLean	Smoot
Capper	Johnson	McNary	Sterling
Colt	Jones, Wash.	Moses	Sutherland
Cummins	Kellogg	Newberry	Townsend
Curtis	Kendrick	Nicholson	Wadsworth
Edge	Keyes	Oddie	Warren
Elkins	Ladd	Page	
Ernst	Lenroot	Pepper	
France	Lodge	Phipps	

NOT VOTING—42.

Ashurst	Gerry	Norbeck	Stanley
Borah	Glass	Norris	Swanson
Broussard	Harreld	Owen	Trammell
Calder	Heflin	Pittman	Walsh, Mass.
Cameron	Hitchcock	Poindexter	Walsh, Mont.
Caraway	King	Pomerene	Watson, Ind.
Crow	McCormick	Ransdell	Weller
Culberson	McKellar	Reed	Williams
Dillingham	Myers	Smith	Willis
du Pont	Nelson	Spencer	
Fernald	New	Stanfield	

So Mr. FLETCHER's amendment to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The ASSISTANT SECRETARY. On page 46, line 13, the committee proposes to strike out "30" and to insert "60," so as to read:

And all glass or manufactures of glass or paste, or of which glass or paste is the component material of chief value, not specially provided for, 60 per cent ad valorem.

Mr. FLETCHER. Mr. President, I think that the 30 per cent ad valorem rate as carried in the bill as it came from the House is excessive. It is really higher than it should be, but instead of making a motion to change the 60 per cent as proposed by the committee to 30 per cent I shall merely ask that the committee amendment be not agreed to.

This amendment has reference to "all glass or manufactures of glass or paste, or of which glass or paste is a component material of chief value, not specially provided for," and the bill as it came from the House carries a rate of 30 per cent. The Finance Committee proposes to change it to 60 per cent, which is twice as much as the bill carried as it came from the House, twice what the House considered a proper rate, which is twice the rate provided by the law of 1913, and which is 15 per cent more than the law provided in 1909.

Therefore, I ask for the yeas and nays on the question of agreeing to the Senate committee amendment. I think the committee amendment ought to be disagreed to.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before, I vote "yea."

Mr. DIAL (when his name was called). Making the same announcement as to my pair and its transfer, I vote "nay."

Mr. EDGE (when his name was called). Making the same announcement as to my pair and transfer, I vote "yea."

Mr. FRELINGHUYSEN (when his name was called). I transfer my pair with the Senator from Montana [Mr. WALSH] to the Senator from Washington [Mr. POINDEXTER] and vote "yea."

Mr. HARRIS (when his name was called). Making the same announcement as to my pair and transfer, I vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and transfer, I vote "yea."

Mr. STERLING (when his name was called). Making the same announcement as before, I vote "yea."

Mr. WATSON of Georgia (when his name was called). Making the same announcement as before as to my pair and transfer, I vote "nay."

The roll call was concluded.

Mr. McKINLEY. Making the same announcement as before, I vote "yea."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 42, nays 14, as follows:

YEAS—42.

Ball	France	Lenroot	Phipps
Brandegee	Frelinghuysen	Lodge	Rawson
Broussard	Gooding	McCumber	Shortridge
Bursum	Hale	McKinley	Smoot
Capper	Harreld	McLean	Sterling
Colt	Johnson	McNary	Sutherland
Cummins	Jones, Wash.	Moses	Townsend
Curtis	Kellogg	Newberry	Wadsworth
Edge	Kendrick	Nicholson	Warren
Elkins	Keyes	Oddie	
Ernst	Ladd	Page	

NAYS—14.

Dial	La Follette	Sheppard	Underwood
Fletcher	Overman	Shields	Watson, Ga.
Harris	Pepper	Simmons	
Heflin	Robinson	Stanley	

NOT VOTING—40.

Ashurst	Gerry	New	Spencer
Borah	Glass	Norbeck	Stanfield
Calder	Harrison	Norris	Swanson
Cameron	Hitchcock	Owen	Trammell
Caraway	Jones, N. Mex.	Pittman	Walsh, Mass.
Crow	King	Poindexter	Walsh, Mont.
Culberson	McCormick	Pomerene	Watson, Ind.
Dillingham	McKellar	Ransdell	Weller
du Pont	Myers	Reed	Williams
Fernald	Nelson	Smith	Willis

So the committee amendment was agreed to.

Mr. FLETCHER. If the chairman of the committee desires, I am ready to proceed with the next paragraph.

Mr. McCUMBER. Very well.

The ASSISTANT SECRETARY. On page 46, line 17, the committee proposes to strike out "23" and insert "30," so that if amended the paragraph will read:

PAR. 231. Smalts, frostings, and all ceramic and glass colors, fluxes, glazes, and enamels, all the foregoing, ground or pulverized, 30 per cent ad valorem.

Mr. FLETCHER. Mr. President, this is not a very large industry and I shall not take a great deal of the time of the Senate in a discussion of the paragraph. I desire to call attention, however, to the fact that the bill, as it came from the House, carried very considerable increases in this paragraph over the rates provided in the act of 1913. The committee amendment proposes very greatly to increase the duties as levied by the bill as it came from the House.

The description of this commodity is as follows:

Smalt is a deep-blue pigment made by fusing the oxide of cobalt with silica and potash to form a glass. This product is reduced to a powder and used in the arts, although at present it is largely replaced by cobalt blue and artificial ultramarine. Frostings are made from coarsely powdered, thin flakes of glass and are used for decorative work, signs and the like.

Under the head of "Production" the Summary of Tariff Information informs us that—

Data as to domestic production have not been obtained, but it is not large.

I said in the beginning this is not a very large industry—

This is due partly to the comparatively small output of hand-decorated china and to the use of imported ceramic colors and decalcomanias (see par. 1306) for decorating domestic pottery. England, France, and Germany have developed the manufacture of these colors to a high degree.

Now, this is the significant thing:

Reduction of duty (1913) from 30 per cent to 15 per cent was followed by an increase in imports of fluxes, glazes, enamels, and colors, ceramic and glass. The average import during the three years, 1911 to 1913, was $13,589, and the average annual revenue for the same period under the 30 per cent rate was $4,077. In 1915–16 the average was valued at $67,460, and the revenue was $10,119 per year. In 1917–18, owing to war conditions, the imports and consequently the revenue were considerably lower.

In other words, the act of 1909 carried a duty of 30 per cent and the importations under that act, under the duty of 30 per cent, were only $13,589 a year, yielding revenue of only $4,077 a year. The Underwood-Simmons Act of 1913 reduced that duty to 15 per cent, and the result following, as shown by the statistics, was that in 1915–16 the average of importations was valued at $67,460 a year, instead of $13,589 as under the act of 1909, and the revenue derived from those importations and flowing into the Treasury of the United States was $10,119 per year under the rate of 15 per cent, whereas it was only $4,077 a year under the rate of 30 per cent.

The reduction from 30 per cent ad valorem to 15 per cent ad valorem resulted in nearly three times the amount of importations and three times the revenue.

Now it is proposed to raise this duty from 15 per cent to 30 per cent. It is proposed to go back to the rate provided in the act of 1909; and what can we expect? Here is the actual experience under these two laws. So far as I know, the facts are not disputed; they can not be questioned at all. There is a clear demonstration that the Government derived more revenue under the 15 per cent duty than it did under the 30 per cent duty—nearly three times as much—and now it is proposed to go back to the 30 per cent duty. What can we expect? Necessarily that the importations will drop down practically to where they were before, of only $13,589 worth a year, yielding revenue of only $4,077; and, of course, the other result follows—that is, an increase in the price of these articles to the consumer.

Later statistics for 1918 show that the value of the imports was $21,854, yielding $3,281 of revenue; in 1919 the imports were $30,137 in value, 25,841 pounds, yielding a revenue of $4,521. That was under the 15 per cent rate. In 1920 the importations were 63,202 pounds, with a value of $63,588 and a revenue of $9,538; and for the nine months of 1921 the importations were 25,791 pounds, of a value of $31,510. There was an increase in the unit of value of these commodities to some extent.

The exports are not recorded. The proposition now is to take no advantage of that experience and what has been demonstrated to us, that we derived nearly three times as much revenue under a duty of 15 per cent on this article as we did under a duty of 30 per cent, but it is now proposed to abandon the 15 per cent ad valorem rate of the present law and go back to the 30 per cent ad valorem rate of the act of 1909. That is the proposition.

The other proposal is to change the rate on fusible and glass enamel, not specially provided for otherwise, from 20 per cent

ad valorem, as in the present law, to 40 per cent ad valorem. The House fixed the rate at 35 per cent, but the Senate committee now proposes to increase that 35 per cent to 40 per cent.

The third proposal in this paragraph is to change the present law so far as it applies to "opal enamel or cylinder glass, tiles, tiling, and rods" from 30 per cent ad valorem to 40 per cent ad valorem.

The House fixed the rate at 35 per cent ad valorem, but the Senate committee propose to increase it to 40 per cent ad valorem. Under the act of 1909 the duty on fusible enamel was 25 per cent ad valorem, and on opal or cylinder glass tiles or tiling 60 per cent ad valorem. It is now proposed to make those rates, respectively, 40 per cent and 40 per cent.

As I have said, Mr. President, the industry is not a very extensive one. As to the production of enamel in this country, in 1914 there were 77 establishments engaged in the industry, with a production valued at $2,166,000; in 1919 the corresponding figures were 74 establishments, with a production valued at $2,645,000. The imports in 1914 amounted to $18,028, and in 1918 to $8,052. The largest amount in the period from 1908 to 1918 was $21,431, which was in 1909.

Later statistics show that in 1918 the importations were valued at $4,106, from which we derived a revenue of only $821 under the ad valorem rate of 20 per cent. In 1919 the value of the importations was $17,727; in 1920, $31,331; and for 9 months in 1921, $9,478. The figures refer to enamel, which is described as—

Glass applied by fusion as a coating to any substance which will bear the necessary heat, especially to metals and to pottery.

Now, the proposal is to increase the duty to 40 per cent. Under the present rate of 20 per cent the importations are nominal, very little of the goods coming into the country and there being little revenue derived. I can not see any justification at all for the increased duties proposed in the paragraph. I do not think I shall delay the Senate by asking for yea-and-nay votes on the committee amendments, but I move to amend the committee amendment on page 46, line 17, by striking out "30" and inserting "15." The rate of 30 per cent recommended by the Senate committee on smalts, frostings, and all ceramic and glass colors, and so forth, is an increase of 7 per cent over the rate proposed by the House committee.

The PRESIDING OFFICER. The amendment proposed by the Senator from Florida to the amendment reported by the committee will be stated.

The ASSISTANT SECRETARY. In the committee amendment, on page 46, line 17, after the word "pulverized," it is proposed to strike out "30" and insert "15," so as to read:

PAR. 231. Smalts, frostings, and all ceramic and glass colors, fluxes, glazes, and enamels, all the foregoing, ground or pulverized, 15 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Florida to the amendment reported by the committee.

Mr. McCUMBER. Mr. President, just a word on the items in general embraced in paragraph 231. There was a very considerable increase in the importations when we reduced the duty from 30 per cent ad valorem to 15 per cent ad valorem, as is shown by the Tariff Commission's report. The war followed, and all industry and commerce were shattered. Germany has not regained her place as yet; but is there any possible reason for believing that she can not produce now, with an even lower labor cost, as cheaply as she could prior to the war. The average wages paid in Germany are below pre-war levels. I assume, therefore, this being a home product, the raw materials of which she does not have to import, that she can produce the commodity at least as cheaply as she could prior to the war. We have got to take those factors into consideration. Furthermore, we have got to frame this bill with the idea that we will return to stable and to a more nearly normal condition than we are in to-day. What may we expect?

I think I can give a pretty fair illustration by taking up two or three of these items statistics for which are furnished by the Reynolds report. Taking the very first item, which is smalts, coarse ground, I find that the price in Germany at the time the report was prepared—which was in August, 1921—to be 7 cents a pound; the landing cost seven-tenths of a cent; the foreign article was sold in this country for 15 cents. The comparable American article is sold for 20 cents. To bring the foreign article up to the selling price of the domestic article, after allowing 33⅓ per cent profit to the importer, would require 104 per cent in order to equalize the two prices. Instead of giving 104 per cent we have given 30 per cent.

Now, let us take the next one—frostings, glass, blown. The price in Germany was 4.2 cents, the cost of importing was 2 cents, the article is sold in this country for 18 cents; the comparable American article is sold for 21 cents. Allowing 33⅓ per cent profit to the importer, we would have to have 228 per cent duty in order to equalize the importing value with the American selling value.

Mr. FLETCHER. May I ask the Senator if 33⅓ per cent is not a very extraordinary allowance of profit?

Mr. McCUMBER. Yes; it is.

Now, take the next one—ceramic and glass colors. Those are imported from England. In Great Britain the labor cost is so enormously higher than that in Germany that this would require a per cent very much less than we have allowed.

Now take the next—fusible enamels. They are imported from France. The price is 22 cents in France; the landing cost is 1.4 cents, and it is sold for 42 cents, as against a comparable American article of 43 cents. Taking the French cost price at 22 cents, and allowing 33⅓ per cent profit, it would require just an even 40 per cent, such as we have allowed in that instance, to meet that condition.

So, on the whole, we have made our duty very much below what the evidence in this report would show to be necessary.

I assume that wages will go down to some extent. The cost of production will undoubtedly go down to some extent. I hope the freight rates will go down. We have taken all of those things into consideration; but even then we must assume an enormous gap between the cost of production in the foreign country, especially in Germany, and the cost of production in the United States. I believe, however, that although the duties we have allowed do not measure the difference, when we take into consideration the fact that the American producer is right here at home and can meet his orders immediately, that fact will give him an advantage that may equal what he fails to secure from the standpoint of equalization in the rates we have given him.

Mr. FLETCHER. Mr. President, just one word further.

As I stated in the outset, there was a very considerable increase in the importations after the reduction of the duty from 30 per cent under the act of 1909 to 15 per cent under the act of 1913; but that increase still did not signify very much. It was a very great increase, but no enormous volume of importation came in after that. The increase was from $13,589 a year prior to 1913 to $67,460 a year after the act of 1913 went into effect; but $67,000 worth of these imports constitutes almost a bagatelle. There is no danger to the industry with only that much importation against it, and the statistics show that the amount of revenue derived by the Government was nearly three times as much under the act of 1913, with a reduction to 15 per cent, as it was under the duty of 30 per cent in the act of 1909. Even though there is an increase in the volume of importation, it does not necessarily mean that that threatens any injury to any industry in this country. It depends, of course, on what the original amount of the importation was. In the case of white glass enamel, for instance, the statistics show that there are several domestic manufacturers of glass tiles and opal glass, but no statistics are available. Imports have not exceeded $500 in any one year. There could be an enormous increase in the imports and still not threaten any harm to any industry in this country in that case.

I just ask for a vote on that amendment.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Florida to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment.

The amendment of the committee was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The ASSISTANT SECRETARY. On page 46, line 18, the committee proposes to strike out "35" and to insert "40," so that, if amended, it will read:

In any other form, 40 per cent ad valorem.

Mr. FLETCHER. I move to amend by striking out "40" and inserting "20," so that the rate will be 20 per cent ad valorem.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In lieu of the sum proposed to be inserted by the committee, "40," it is proposed to insert "20."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Florida to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the amendment of the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment of the committee.

The ASSISTANT SECRETARY. On line 18, it is proposed to strike out the word "opal" and to insert the same word with a comma immediately thereafter.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 19, it is proposed to strike out "35" and to insert "40," so that, if amended, it will read:

Opal, enamel or cylinder glass tiles, tiling, and rods, 40 per cent ad valorem.

Mr. FLETCHER. I move to amend by striking out "40" and inserting "20."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In lieu of the sum proposed to be inserted by the committee, "40," it is proposed to insert "20."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Florida to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On page 47, line 8, the committee proposes to strike out "17" and insert "20," so as to read:

Marble, breccia, and onyx, in block, rough or squared only, 65 cents per cubic foot; marble, breccia, and onyx, sawed or dressed, over 2 inches in thickness, $1 per cubic foot; slabs and paving tiles of marble, breccia, or onyx, containing not less than 4 superficial inches, if not more than 1 inch in thickness, 8 cents per superficial foot; if more than 1 inch and not more than 1½ inches in thickness, 10 cents per superficial foot; if more than 1½ inches and not more than 2 inches in thickness, 13 cents per superficial foot; if rubbed in whole or in part, 3 cents per superficial foot in addition; mosaic cubes of marble, breccia, or onyx, not exceeding 2 cubic inches in size, if loose, one-fourth of 1 cent per pound and 20 per cent ad valorem.

Mr. ROBINSON. Mr. President, an examination of the survey of marble made by the Tariff Commission does not disclose, in my opinion, any justification for the increases in the rates on marble reported in the committee amendments.

The information available upon the subject shows that the production of domestic marble aggregates from six million to eight million dollars' worth per annum. Only about a third of the production is marketed as rough blocks. The domestic producers export large quantities of the rough blocks to Canada and considerable amounts of dressed building rock and other manufactured products to all parts of the world. I quote from page 7 of Survey B–11:

Every year since 1910 exports of all grades of marble have been larger than the imports.

European deposits of marble are very high grade, and many fancy varieties are produced which are not available in the United States.

Omitting part of the statement:

Imports consist of large amounts of rough block marble—chiefly the fancy grades that are not produced at domestic quarries—and small amounts of slabs, tiles, and mosaics. Imports of all grades are decreasing steadily.

There is a statement on page 8 of this survey to which I invite the attention of the Senate. It shows that in this particular industry the domestic producers are not at a disadvantage, because of the losses which occur in transportation. These losses, due to breakage, more than overcome the difference in the labor cost. I will read a part of the paragraph in which that statement is contained:

Domestic producers control the market for ordinary grades, but fancy marbles will be imported until domestic supplies of similar grade have been developed. The brittleness of marble in thin sections and the breakage loss in overseas shipments counterbalance any advantage that the foreign producer possesses due to lower-priced labor. The use of power cutters and surfacers, little used abroad, is another factor in favor of the domestic manufacturing industry.

With respect to the prices for building or ornamental marble, on page 13 of the same document I find this statement:

Prices for building and ornamental marble vary widely with the physical characteristics of the product and the distance from quarry to market. Most of the rough material is sold by the cubic foot. In 1913 the price of domestic rough marble varied from $1.14 per cubic foot for interior building marble to $1.59 for the same product from another district. By 1917 prices had increased to between $1.75 and $2 per cubic foot.

In view of the facts referred to, I do not understand the theory upon which the committee justifies its proposed increases in these rates. I therefore move to amend in line 8, page 47, by striking out "20" and inserting "10."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 47, line 8, it is proposed to amend the committee amendment by inserting, in lieu of the sum proposed to be inserted by the committee, the numerals "10."

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Arkansas to the amendment of the committee. [Putting the question.] The noes appear to have it.

Mr. HARRISON. I ask for a division.

Mr. McCUMBER. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before, I vote "nay."

Mr. DIAL (when his name was called). Repeating my announcement made on the former vote, I vote "yea."

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HARRIS (when his name was called). Making the same announcement as before, I vote "yea."

Mr. CURTIS (when Mr. KEYES's name was called). I was requested to announce the absence of the Senator from New Hampshire [Mr. KEYES] on account of illness.

Mr. McKINLEY (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WATSON of Georgia (when his name was called). Making the same announcement as before concerning the transfer of my pair, I vote "yea."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before, I vote "nay."

Mr. JONES of Washington. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. STERLING. Making the same announcement as before as to my pair and its transfer, I vote "nay."

Mr. GLASS. I transfer my general pair with the Senator from Vermont [Mr. DILLINGHAM] to the Senator from Nebraska [Mr. HITCHCOCK], and vote "yea."

The result was announced—yeas 16, nays 41, not voting 39, as follows:

YEAS—16.

Dial	Harrison	Robinson	Stanley
Fletcher	Heflin	Sheppard	Underwood
Glass	La Follette	Shields	Walsh, Mass.
Harris	Overman	Simmons	Watson, Ga.

NAYS—41.

Ball	Frelinghuysen	McCumber	Ransdell
Brandegee	Gooding	McKinley	Shortridge
Broussard	Hale	McLean	Smoot
Bursum	Harreld	McNary	Sterling
Capper	Johnson	Moses	Sutherland
Colt	Jones, Wash.	Newberry	Townsend
Curtis	Kellogg	Nicholson	Wadsworth
Edge	Kendrick	Oddie	Warren
Elkins	Ladd	Page	
Ernst	Lenroot	Pepper	
France	Lodge	Phipps	

NOT VOTING—39.

Ashurst	Fernald	New	Spencer
Borah	Gerry	Norbeck	Stanfield
Calder	Hitchcock	Norris	Swanson
Cameron	Jones, N. Mex.	Owen	Trammell
Caraway	Keyes	Pittman	Walsh, Mont.
Crow	King	Poindexter	Watson, Ind.
Culberson	McCormick	Pomerene	Weller
Cummins	McKellar	Rawson	Williams
Dillingham	Myers	Reed	Willis
du Pont	Nelson	Smith	

So Mr. ROBINSON's amendment to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 47, in line 9, before the words "per cent ad valorem," to strike out "26" and to insert "35," so as to make the paragraph read:

PAR. 232. Marble, breccia, and onyx, in block, rough, or squared only, 65 cents per cubic foot; marble, breccia, and onyx, sawed or dressed, over 2 inches in thickness, $1 per cubic foot; slabs and paving tiles of marble, breccia, or onyx, containing not less than 4 superficial inches, if not more than 1 inch in thickness, 8 cents per superficial foot; if more than 1 inch and not more than 1½ inches in thickness, 10 cents per superficial foot; if more than 1½ inches and not more than 2 inches in thickness, 13 cents per superficial foot; if rubbed in whole or in part, 3 cents per superficial foot in addition; mosaic cubes of marble, breccia,

or onyx, not exceeding 2 cubic inches in size, if loose, one-fourth of 1 cent per pound and 20 per cent ad valorem; if attached to paper or other material, 5 cents per superficial foot and 35 per cent ad valorem.

Mr. ROBINSON. Mr. President, I was entirely content to take the vote upon the last amendment submitted by myself by division, but those in charge of the bill insisted upon consuming the time of the Senate and delaying the progress of the measure by demanding the yeas and nays. The action, of course, was in the nature of a filibuster by the friends of the bill. With an overwhelming majority lining up and supporting the committee, with the committee reporting material advances over the rates fixed by the House in almost every instance, with no explanation given in many instances for the increases here proposed, with no facts available to enable the Senate to justify any rate on marble in excess of the rate now in force, as a result of the filibuster by the majority we have just imposed a very material increase upon one class of marble.

Substantially all the facts presented a few moments ago in connection with the amendment which I then proposed, relating to line 8, apply with equal force to the pending amendment. The House imposed a duty of 5 cents per superficial foot and 26 per cent ad valorem. The Finance Committee, in pursuance of its custom, with no facts in the record justifying its action, reported an amendment raising the ad valorem rate adopted by the House from 26 per cent to 35 per cent.

I move to strike out "35," in line 9, and to insert in lieu thereof "15," so that as amended it will read:

If attached to paper or other material, 5 cents per superficial foot and 15 per cent ad valorem.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 47, line 19, before the words "per centum," to strike out the figure "40" and insert "60"; so as to make the paragraph read:

PAR. 233. Marble, breccia, onyx, alabaster, and jet, wholly or partly manufactured into monuments, benches, vases, and other articles, and articles of which these substances or any of them is the component material of chief value, and all articles composed wholly or in chief value of agate, rock crystal, or other semiprecious stone, except such as are cut into shapes and forms fitting them expressly for use in the construction of jewelry, not specially provided for, 60 per cent ad valorem.

Mr. ROBINSON. I move to strike out "60," in line 19, and insert in lieu thereof "30."

Mr. UNDERWOOD. Mr. President, I suppose this is a case of a poor little rich girl who has not anybody who will sympathize with her. The items reported under this paragraph apply to people who have money to spend. We need all the taxes we can get out of the rich, and out of other people, too, if the present expenditures of the Government continue, but I see no reason for this large increase in the duty on this item.

Within the paragraph are a few articles, like alabaster, which is not made in this country at all, and jet, which is more or less an ornament out of which to make jewelry; but the main object which the article intends to tax is stone. I read the description of the article as set forth by the Tariff Commission, as it is one which can be easily understood:

Stone manufactures include, besides tombstones and monuments made of marble and kindred stones, a large and diverse list such as commercial and religious statuary, paper weights, inkwells, table tops, and jet spangles for ornamenting textiles and millinery goods. The manufacturing industry aside from the production of monuments is of very minor importance. Stone monuments—

which form the item of importance in this paragraph—

are produced in all parts of the United States. The plants are usually located close to burial grounds, but some large quarry organizations ship to distant domestic markets. Desk and novelty articles are produced as a side line by manufacturers of monuments, as well as by makers of novelties, and also on special order. The manufacture of jet is an important industry in many parts of Europe, but not here. The stone-working industries of Greece and Italy have been famous for centuries because of their fine marble and excellent workmanship.

Tombstones, monuments, and grave markers can usually be cut and finished by stone-working machinery, which eliminates handwork to a large extent. Up to this point the domestic industry can compete favorably with European goods—

It is the Tariff Commission that says that up to this point the domestic industry can compete favorably with European goods—

but in carving, which is entirely handwork, European producers possess a considerable advantage because of their lower-priced labor.

A vast deal of these importations are not carved stone, but the stone is cut by machinery, as to which the Tariff Commission says the American industry can compete with the European production favorably.

In 1914, the year of the beginning of the European war, there were in the United States 4,901 establishments engaged in marble and stone work, with an output value of $107,055,000. In 1919 the corresponding figures were 4,208 establishments and the output was valued at $127,993,000. The production of monuments and tombstones alone in 1914 was valued at over $40,000,000.

The imports of these articles are derived chiefly from Italy and France. In 1914 they were valued at $224,700,000. Now let me read the figures of the imports which have been coming in since the war. In 1918 they were valued at $30,863; in 1919, $46,622; in 1920, $83,768; and for nine months in 1921, $86,617. So that, at the greatest, the imports coming into this country of these articles amounted to less than $100,000. The exports of manufactured stone, including marble not specially provided for, are destined chiefly for Canada, Cuba, and the United Kingdom, the statistics being as follows for the calendar years: 1918, $1,208,164; 1919, $1,508,997; 1920, $2,158,764; for nine months of 1921, $1,355,335.

These are the chief articles involved in the paragraph now under consideration. The other articles are of minor importance, both in value, in consumption, and in imports, and some of them are not made in this country at all, with the result that we find the total industry for 1919 is given as $127,000,000. In monuments alone in 1914 it amounted to about $40,000,000. The imports coming into this country are less than $100,000 and the exports vary from $1,500,000 to $2,000,000.

When we consider the value of the production in America as over $100,000,000 and the imports as less than $100,000, we realize the imports are one one-hundredth of 1 per cent, and yet the committee seems to think that the industry is so greatly jeopardized by imports coming from abroad and that the American industry is in such danger that it must have this high protection. Notwithstanding the books which they themselves publish, carrying the reports of the Tariff Commission, which state that on account of these articles, until they are carved—and most of the imports are not carved—they can compete favorably with the foreign production, what does the committee do? The House sent the bill over with a tax of 40 per cent on these articles and the Finance Committee raises it to 60 per cent.

There was a tax on these articles under the present law which I think is too high, 45 per cent, and which ought to have been reduced. Certainly if I had charge of writing a tariff bill to-day I would reduce it. But with $100,000 of imports and over $100,000,000 of production in an industry which the Tariff Commission says in the main can compete with foreign production—and that is shown conclusively by the importations—how are we to grant an additional tax? I do not understand it. I suppose there is a great deal of this tax paid by dead men's estates, by people who want to put up fine monuments. It is not always paid by the rich. Sentiment has a great deal to do with these things, and sometimes people who can not well afford to do so erect handsome monuments. It was said many years ago that the ordinary Republican tariff bill taxes everything from the cradle to the grave, and this item is at the grave.

It is no great burden on the American people, but I can see no justification whatever for the increase. I suppose the Senate is going to grant the increase, and is going to increase the rate over what is carried in the House bill, 45 per cent, to the rate proposed by the Senate committee, 60 per cent. In other words, if you want to buy a tombstone and it is worth $100 now, you will have to pay $160 to satisfy the committee.

I am not going to continue my argument further. I think it merely illustrates that the Finance Committee in writing the bill thought the only way they could be sure to make a protective bill was to raise the rate, that it did not make any difference what rate they found in the present law, high or low, the only safe thing for them to do was to raise the rate. I can see no other justification or reason for the increase in this particular instance.

Mr. McCUMBER. Mr. President, when it comes to luxuries it is always difficult for anyone to know what a given rate will produce. When everything is flourishing, when everyone is prosperous, jewelry, diamonds, and other luxuries sell much more freely. They are imported much more freely. When times are hard very little comes in if it is purely a luxury at the foreign price. There are very few of these luxuries coming in now. If any gentleman of reasonable wealth is pleased to die, he perhaps will not be arranging for an onyx tombstone.

Mr. UNDERWOOD. Mr. President, will the Senator permit me to interrupt him?

Mr. McCUMBER. Certainly.

Mr. UNDERWOOD. I always like to have the figures correct. Will the Senator tell me of any time within the last 20 years when any considerable amount of this particular article came into the United States?

Mr. McCUMBER. I will show the Senator something of what we have been getting if the Senator will be patient.

Mr. UNDERWOOD. I am not talking about any theoretical proposition; but will the Senator refer me to the statistics when the imports to this country, compared to the $127,000,000 domestic production, amounted to anything?

Mr. McCUMBER. I will give the Senator the figures.

Mr. UNDERWOOD. I shall be glad to have them.

Mr. McCUMBER. I do not care so much about the importations in quantity as I do about what we are getting out of the luxuries. When the Senator in his own bill fixed a rate of 45 per cent ad valorem, he did not fix it for protection. He placed that duty in the Underwood bill for revenue only, because he wanted to get a good revenue out of these luxuries. The country is a great deal more distressed to-day than it was in 1913. The country needs money more. If it needed 45 per cent then, it certainly needs 60 per cent now if it can get more out of it by raising the rate to 60 per cent.

I stated that I would give the Senator a few figures to indicate what effect the change of rates upon these luxuries had in the matter of the revenues received therefrom. Paragraph 232, which we just passed, covers mosaic cubes of marble, breccia, and onyx, and paragraph 233 covers marble, breccia, onyx, alabaster, and jet, and also agate, rock crystal, or other semiprecious stone.

On mosaic cubes in the year 1917 we had a duty of 1 cent per pound and 30 per cent ad valorem. We collected revenue from that one particular article amounting to $46,326; in 1908 we collected $43,375; in 1909, $26,988; in 1910—they were then divided into two brackets—we collected for one class $2,256 and for the other $17,589. That made nearly $20,000 received in that year. In 1911 we collected $11,000; in 1912, $12,975; and in 1913 we received $15,000.

Then came 1914 with the reduction in the tariff rate, and our receipts immediately dropped to $4,025, a loss of nearly three-fourths of the revenue.

This is a revenue duty only; a revenue duty levied upon luxuries. If we take all of these commodities together as they are grouped in the statistics of imports and duties, we find that in 1910, with a 50 per cent ad valorem, we collected $105,695; in 1911 we collected with the same duty $109,000; in 1912 we collected $116,000; in 1913 we collected $121,000. Then the rates were changed, and we collected $37,620—quite a heavy loss in revenue.

This is a duty not for the purpose of protection; I do not think we need for protection so heavy a duty; but, in my opinion, when conditions become normal in this country and the people begin to make a little more money than they are now making in these hard times, they will purchase more of this Italian marble and onyx, and so forth, for their homes, for statues, and so forth, and we shall get considerably more revenue. That is all we expect from it.

Mr. UNDERWOOD. Mr. President, I only have this to say in answer to the Senator from North Dakota: When a luxury is taxed the greatest amount of revenue is not always received by levying the highest tax. To a certain extent, people will pay the price for a luxury; but when the price of the luxury is raised above what their pocketbooks can afford, then they are going to do without it, as they can always do without a luxury. If the tax should be reduced and some importations be invited, the revenue of the Government might be very largely increased, but when the tax is raised higher and gets nearer to the prohibitive point, in my judgment, revenue will be cut off.

I am satisfied the Senator from North Dakota, however, is not writing this bill on the principle of levying taxes for revenue. I noticed in paragraph 1429 a tax of 10 per cent is levied on diamonds, which most people consider a luxury. A duty of 20 per cent is levied on pearl. On such luxuries as monuments or tombstones the tax is 60 per cent, while a woman is taxed 10 per cent for the pearl necklace which she wears.

Mr. McCUMBER. It is rather difficult to hide a tombstone in the heel of one's shoe, but it is not difficult to hide a $200,000 diamond there. We have had some experience in attempting to collect a large duty from diamonds, and the Senator from Alabama himself, realizing that, only imposed a duty of 10 per cent upon diamonds in the tariff for revenue only bill which bears his name.

Mr. President, when the duties on diamonds ran as high as 20 per cent it was ascertained that the diamonds brought into this country exceeded in value by several times the diamonds which came in under a lesser duty, whereas there was not collected anywhere nearly as much revenue as was collected when the lower duty was levied. Were it possible to prevent smuggling we should all be in favor of an extremely high duty upon that luxury, but after many years of trial we ascertained that the imposition of a higher duty simply induces smuggling, because it makes profitable the smuggling of an article that may easily be smuggled into the country. We have to look at the situation from the practical standpoint.

Mr. ROBINSON. Mr. President, I inquire of the Senator from North Dakota whether the Finance Committee in its studies of the tariff on marble, and particularly the tariff to be imposed under this paragraph, considered the question of the maximum revenue rate? Did the committee look into that question? I am asking for information.

Mr. McCUMBER. I think we have fixed it at the maximum revenue rate.

Mr. ROBINSON. That is not the question I asked.

Mr McCUMBER. I should not think so unless I had gone into it to some extent. When the Senator asks me the question I say yes, I do think so.

Mr. ROBINSON. Mr. President, I agree with the Senator from Alabama that a tax of 60 per cent will more than likely prove prohibitive, or, at least, will diminish rather than increase the revenue. I also agree with the Senator from Alabama that the rate under existing law is probably too high for a maximum revenue rate.

Mr. McCUMBER. If the Senator will allow me, I should like to suggest that under a 50 per cent rate we collected considerably more revenue than was derived under a lower rate. That rate did not seem to check the revenue.

Mr. ROBINSON. But I point out to the Senator that there has been an enormous development in the marble industry in the United States since that time. The revenue derived from this item under existing law is comparatively small. On articles of onyx it averaged during the last few years less than $1,000 a year, probably less than $500 a year; on articles of alabaster the revenue averaged between $2,000 and $3,000 a year during the last four or five years; on articles of agate less than $10,000 a year; on articles of rock crystal approximately $500 a year; and on other semiprecious stone embraced in the paragraph the importations were small and the duty collected comparatively unimportant.

Everyone knows there is a point at which an increase in tariff rates operates to diminish importations. I have not the slightest doubt, although I confess the committee has not furnished information on which to form a scientific conclusion relative to the subject, that under the conditions now surrounding the industry in the United States the proposed rate, if adopted, will result in a diminution of revenue rather than an increase.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Arkansas [Mr. ROBINSON] to the amendment reported by the committee.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question recurs on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The next amendment was, on page 47, line 21, after the word "millstones," to strike out "13" and insert "15," so as to read:

PAR. 234. Burrstones, manufactured or bound up into millstones, 15 per cent ad valorem.

Mr. SIMMONS. Mr. President, there is but little to be said about this item. The duty under the Payne-Aldrich bill on this commodity was 15 per cent ad valorem. In the pending bill the House provided a duty of 13 per cent ad valorem, which the Senate committee has increased up to the Payne-Aldrich rate. Under the act of 1913, the present law, this product came in free.

Burrstones is another name for what we commonly call in this country millstones. In the olden days, as I remember, nearly all the grain that we crushed in my section of the country, at any rate—and I think the statement applies to all sections of the country—was crushed by millstones, operating horizontally and mashing the grain into meal. The process has somewhat changed from that day to this.

The production in this country is not large and neither is the consumption. In 1912 we only produced about $71,000 worth of these stones; in 1918 the production had increased to $92,000 worth. The imports are very small, and they come principally from France. During nine months of the year 1921 the imports amounted only to $9,678 worth. That is about 10 per cent of what we produced in 1918 in this country, and probably 15 per cent of what we produced in 1912. That is all of this article that came in when it was upon the free list. If you impose a duty of 15 per cent upon it, I suppose that none at all will come in. I presume that will be practically prohibitive.

Mr. McCUMBER. Mr. President, if the Senator desires, I will tell him why we left this just as the House put it in.

The Senator has read correctly about all the importation we have, but even that very little importation is about 40 per cent

of the domestic production; and the House put in the millstones, which are produced only in two places, so far as I know, as they are not used very much now. They are practically obsolete, but some are made in Virginia and some are made in New York; and the House gave a duty of 13 per cent ad valorem upon the American valuation. We simply converted that as nearly as we could into the foreign valuation, and left it at 15 per cent.

If the House had left the item on the free list, we would not have taken the trouble to put it upon the dutiable list; but it was such a small item, so unimportant, such a mere bagatelle, that we did not think it was worth while to take up our time in the conference to agree on it, even if it did not take over 10 or 15 minutes.

Mr. SIMMONS. Mr. President, I want to say to the Senator that while these stones are not as generally used now as they used to be, in the rural districts they still have the old water mills, and there are a great many people who believe that meal ground in a water mill is much better than that ground at a mill run by steam.

Mr. McCUMBER. I think it is, too.

Mr. SIMMONS. While there are not many of them used in this country, there are some used, and I do not see any necessity for increasing the price.

As I said, while this article is upon the free list there is only $9,000 worth of it imported. The Senator is right when he says that in one year 40 per cent was imported, but that time is past. That was in 1917. In 1921, or at the present time, there is only $9,000 worth brought in, as against something like $63,000 worth produced in this country.

I think the duty is prohibitive, and I do not know of any reason why we should impose a prohibitive duty against France. France is the only country from which we get these stones, I believe, and I do not see why they should not be allowed to remain on the free list; but, as the Senator says, the item is small, and I am willing to have a vote without any further discussion.

Mr. McCUMBER. Before we vote on that amendment I wish to ask unanimous consent that when the Senate closes its session for this calendar day it be to recess until to-morrow at 11 o'clock.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. SIMMONS. I will offer an amendment to reduce the rate to 5 per cent. I would move to put the article on the free list, but I believe some contention has been made here that that was not permissible; and I therefore move to reduce the duty to 5 per cent instead of 15 per cent.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 47, line 21, in lieu of the sum inserted by the committee, "15," it is proposed to insert "5."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from North Carolina to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question now is on the committee amendment.

Mr. HEFLIN. Let us have the yeas and nays on that.

The yeas and nays were not ordered, and the amendment was agreed to.

The VICE PRESIDENT. The next amendment will be stated.

The ASSISTANT SECRETARY. On page 48, line 1, the committee proposes to strike out "40" and insert "50," so as to read:

Freestone, granite, sandstone, limestone, lava, and all other stone suitable for use as monumental or building stone, except marble, breccia, and onyx, not specially provided for, hewn, dressed, or polished, or otherwise manufactured, 50 per cent ad valorem; unmanufactured, or not dressed, hewn, or polished, 15 cents per cubic foot.

Mr. ROBINSON. Mr. President, this amendment proposed by the committee relates to freestone and other forms of building material and monumental material not embraced within paragraphs 232 and 233, which relate to marble, breccia, and onyx. The present rate, if I am correctly informed, is 25 per cent ad valorem. Under that rate production in the United States has been very large, and imports have been comparatively small.

Upon referring to the surveys made by the Tariff Commission, it is found that the production of these stones during the years 1910 to 1920, inclusive, ranged from something more than $5,500,000 to approximately $7,500,000. The imports of these stones for building in 1914 were valued at a little more than $72,000.

Referring to granite, the production of that commodity in 1919 was almost $20,000,000. The duty received was negligible, the imports ranging from approximately $25,000 to something more than $100,000.

Under the conditions existing, considering the very high cost of building materials, I do not believe that any tax higher than that now proposed is justified; and I therefore offer the following amendment.

On page 48, line 1, strike out "50" and insert "25."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 48, line 1, in lieu of the sum proposed to be inserted by the committee, "50," it is proposed to insert "25."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Arkansas to the amendment of the committee.

Mr. ROBINSON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as on the former vote, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. McKINLEY (when his name was called). Making the same announcement as before, I vote "nay."

Mr. STERLING (when his name was called). Making the same announcement as on the previous vote, I vote "nay."

The roll call was concluded.

Mr. HARRIS. Making the same announcement of my pair and its transfer, I vote "yea."

Mr. COLT. Making the same announcement as before, I vote "nay."

Mr. EDGE. Making the same announcement as before, I vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR];

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 14, nays 36, as follows:

YEAS—14.

Dial	Heflin	Robinson	Stanley
Fletcher	La Follette	Sheppard	Underwood
Harris	Overman	Shields	
Harrison	Pittman	Simmons	

NAYS—36.

Ball	France	Lenroot	Pepper
Brandegee	Frelinghuysen	Lodge	Phipps
Broussard	Hale	McCumber	Ransdell
Bursum	Harreld	McKinley	Smoot
Capper	Johnson	McLean	Sterling
Colt	Jones, Wash.	Moses	Sutherland
Curtis	Kellogg	Newberry	Townsend
Edge	Kendrick	Nicholson	Wadsworth
Ernst	Ladd	Oddie	Warren

NOT VOTING—46.

Ashurst	Gerry	New	Stanfield
Borah	Glass	Norbeck	Swanson
Calder	Gooding	Norris	Trammell
Cameron	Hitchcock	Owen	Walsh, Mass.
Caraway	Jones, N. Mex.	Page	Walsh, Mont.
Crow	Keyes	Poindexter	Watson, Ga.
Culberson	King	Pomerene	Watson, Ind.
Cummins	McCormick	Rawson	Weller
Dillingham	McKellar	Reed	Williams
du Pont	McNary	Shortridge	Willis
Elkins	Myers	Smith	
Fernald	Nelson	Spencer	

So Mr. ROBINSON's amendment to the committee amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 48, line 4, to strike out "$2" and insert in lieu thereof "$1.75," so as to read:

Grindstones, finished or unfinished, $1.75 per ton.

Mr. SIMMONS. Mr. President, this article does not require much discussion. We all know what the grindstone is. It is used on every farm, and it is also used in connection with mak-

ing pulp and paper. The value of grindstones and pulp stones produced in the United States in 1917 was $1,147,784. Most of them were produced in Ohio. The chief competitor of the grindstone it seems is a grinding wheel made of artificial abrasives. The value of the domestic product in 1920 was $1,707,004. The importations in 1913 were $139,000. The importations in 1920 were $77,000, and in the nine months of 1921 they were $67,000. It appears, therefore, that the importations have been falling off. They are just about half what they were in 1913. The production has been increasing. It increased from $1,147,000 in 1917 to $1,707,000 in 1920.

But that is not all. The exports, largely to Canada and to Cuba, have been as follows:

In 1918 they were $210,889, as against $55,583 imports in the same year. In 1919 the exports were $297,000, as against imports of $50,000.

In 1920 we exported of this product $424,322 worth, as against imports for that year of $77,000. Our exports have been five or six times the amount of the imports, and our imports have been less than one-twentieth of our domestic production.

Under these circumstances there would seem to be no reason for increasing the present duty, which is $1.50 per ton, and I offer an amendment to substitute $1.50 for $1.75. The difference is very little; but I submit that the imports and the exports, taken in connection with domestic production, do not justify any increase in the rate.

Mr. McCUMBER. Mr. President, I do not desire to take up any time. I simply wish to say to the Senator that if he can explain why he wants $1.50 duty a ton on grindstones I can easily explain why I want $1.75, or an extra 25 cents over the rate asked by the Senator.

Mr. SIMMONS. I explained it. I do not think, as a matter of fact, the circumstances are such as to require any duty upon this article at all, and if the Senator is not satisfied, I will offer as an amendment that it be reduced to $1. I move that amendment to the amendment of the committee.

Mr. McCUMBER. Let us have a vote on it.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from North Carolina to the committee amendment.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question recurs on the committee amendment.

The amendment was agreed to.

The next amendment of the committee was, on page 48, line 8, before the words "per centum," to strike out "17" and insert in lieu thereof "15," so as to read:

Slates, slate chimney pieces, mantles, slabs for tables, roofing slates, and all other manufactures of slate, not specially provided for, 15 per cent ad valorem.

Mr. ROBINSON. Mr. President, the prevailing rate on this commodity, slate, is 10 per cent ad valorem. Under that rate importations have never exceeded approximately $4,500, the highest being in the year 1920. The duty derived from the commodity now is negligible. Slates, as everyone knows, are very useful in construction. I move to strike out "15" and to insert in lieu thereof "10."

The amendment to the amendment was rejected.

The amendment of the committee was agreed to.

Mr. HEFLIN. Mr. President, I wonder if the chairman of the committee is willing now to have a short executive session, or would he like to proceed for a couple of hours longer?

Mr. SMOOT. We have just one more amendment that we want to have acted on.

Mr. McCUMBER. There is one more paragraph in this schedule, and I wish we could vote on that and then take our recess.

Mr. HEFLIN. What is the proposition the Senator desires to vote on?

Mr. McCUMBER. I propose that we shall take a recess as soon as we vote on the next item.

Mr. HEFLIN. What is that item?

Mr. McCUMBER. Watch crystals.

Mr. SMOOT. It is a new industry established in this country during the war.

The VICE PRESIDENT. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 48, line 9, strike out "40" and insert in lieu thereof "60," so as to read:

Watch crystals, 60 per cent ad valorem.

Mr. ROBINSON. Mr. President, the information furnished the Senate respecting this item is to the effect that the manufacture of watch crystals is a new industry in the United States. The principal importations formerly came from France, Germany, Switzerland, and Austria. With the beginning of the war, importations were suspended and a new industry developed in the United States. It does not appear, however, that there are any importations now under the existing rate.

Mr. SMOOT. They are classified under a basket clause, and therefore we can not tell exactly what are the importations.

Mr. ROBINSON. I am inclined to think that the prevailing rate is adequate. So I offer an amendment to strike out "60," in line 9, and insert in lieu thereof "30."

The amendment to the amendment was rejected.

The amendment of the committee was agreed to.

BENEFICIARIES OF UNITED STATES VETERANS' BUREAU (S. DOC. NO. 204).

The VICE PRESIDENT laid before the Senate a communication from the Director of the United States Veterans' Bureau, transmitting a draft of a proposed joint resolution providing for the making of allotments of appropriations by the United States Veterans' Bureau to the United States Public Health Service, which was referred to the Committee on Appropriations and ordered to be printed.

EXECUTIVE SESSION.

Mr. LODGE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened; and (at 10 o'clock and 5 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Wednesday, May 24, 1922, at 11 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 23 (legislative day of April 20), 1922.

PROMOTIONS IN THE NAVY.

To be ensigns in the Navy.

HOUSE OF REPRESENTATIVES.

TUESDAY, *May 23, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O God, the author of all good, we can not tell the fullness of Thy name nor understand the resources of Thy bounty and wisdom, but deeply grateful are we to be counted in the train of Thy servants. With this spirit we would accept the yoke and receive the burden. Let love of human praise, hope of personal gain, and delusive happiness be far from us. Let all laws be just and their administration equal and right. Bless those righteous forces which are rising up in enlightened souls of men and are striving against the wrong. O inspire us with intelligent confidence that the Lord of all the earth will do right. Through Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

READJUSTMENT OF ARMY AND NAVY PAY.

Mr. McKENZIE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 10972, disagree to all of the Senate amendments, and ask for a conference.

Mr. OLIVER. Mr. Speaker, reserving the right to object, as I understand, the gentleman will give the House an opportunity to vote on the amendment providing for the retired pay of colonels, lieutenant colonels, and majors?

Mr. McKENZIE. I will say to the gentleman that I have not changed my mind from what I stated yesterday, that I do not feel disposed to go to conference with my hands tied. I prefer to go to conference untrammeled and with the aid of my assistant conferees on the part of the House try to bring back a reasonable compromise, if a compromise is necessary. But whatever report I brought back it would be up to the House to accept or reject.

Mr. OLIVER. There will probably not be a conferee but that is in sympathy with the action of the House, and in view of that it seems to me that the matter ought to be brought back to the House for a vote.

Mr. McKENZIE. I will not consent to that. I feel that the proposition that the gentleman from Alabama is interested in is a very material matter and might be very essential in arriving at an agreement with the Senate on other matters. Therefore I can not consent.

The SPEAKER. Is there objection?

Mr. OLIVER. I object.

NATIONAL BANK CHARTERS.

Mr. CAMPBELL of Kansas. Mr. Speaker, I submit a privileged report from the Committee on Rules.

The SPEAKER. The gentleman from Kansas submits a privileged report from the Committee on Rules, which the Clerk will report.

The Clerk read as follows:

House Resolution 337 (Rept. No. 1023).

Resolved, That upon the adoption of this resolution it shall be in order to consider the bill H. R. 9527, being "A bill to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations."

Mr. CAMPBELL of Kansas. Mr. Speaker, this is a unanimous report from the Committee on Rules. I have only this to say about the matter, that it makes in order the bill referred to providing for the extension of national bank charters. I understand it to be the fact that under the present law national bank charters will generally expire on the 1st day of July. If there are exceptions to that, it is where a special charter has been granted, and I have no information as to cases of that kind.

I yield five minutes to the gentleman from Arkansas [Mr. WINGO] and reserve the remainder of my time.

Mr. WINGO. Mr. Speaker, while I am opposed to the bill, I shall not oppose the rule, because I recognize that there should be legislation. The chairman of the Committee on Rules is in error, though, in suggesting that the bill is for the extension of charters of national banks. That is not the object of the bill. I should not object to that. The object of the bill is confessedly to grant perpetual charters to national banks.

Now, when the national bank act was passed we gave 20-year charters. In 1882 we passed an act authorizing, under certain restrictions and limitations, a further extension of 20 years. Then in 1902, at the expiration of that 20-year period, we passed a bill authorizing a further extension of 20 years. Each time that the question of perpetual charters came up Congress decided by an overwhelming vote that it would retain its control and not grant a perpetual charter to a banking corporation, and it has been the policy of both parties for over 50 years to give them simply 20-year charters.

Now, I shall offer as an amendment a 20-year extension, and I hope that the Members of the House will see the wisdom of accepting that as a substitute for a perpetual charter. There is no necessity for perpetual charters for national banks. It is a dangerous policy. I am opposed to a Federal charter for any kind of an institution of that nature. That is my only objection. I do not object to the rule. There ought to be legislation, but it ought to be by passing the customary 20-year extension authorization act.

Mr. MOORE of Virginia. Will the gentleman from Kansas yield?

Mr. CAMPBELL of Kansas. I yield.

Mr. MOORE of Virginia. I wanted to ask the gentleman a question as to the practice of the Committee on Rules. This is it: Suppose the Committee on Rules orders a resolution of investigation to be favorably reported and directs the chairman to favorably report it, is the chairman under any compulsion to report it or has he unlimited discretion which will enable him to postpone indefinitely any report of that resolution or any presentation of it to the House at all? I have in mind the Daugherty investigation resolution—the Woodruff-Johnson resolution.

Mr. CAMPBELL of Kansas. That is a question I will answer to the Committee on Rules and to the majority of the House at the proper time.

Mr. GARNER. Will the gentleman yield for a question?

Mr. CAMPBELL of Kansas. Relative to this matter?

Mr. GARNER. I did not intend to refer to the Woodruff resolution; I will not refer to it.

Mr. CAMPBELL of Kansas. I realize the anxiety of certain gentlemen at this time with respect to certain indictments that have already been found by Federal grand juries and about certain other indictments that are in contemplation. I also realize the anxiety of certain gentlemen with respect to civil actions for the recovery of money or property. But I do not intend to contribute in any way, directly or indirectly, to the defense, in either civil or criminal action, by assailing the Attorney General at this time. [Applause.]

Mr. GARNER. The gentleman will realize that I have not assailed the Attorney General. I did not know that the gentleman from Kansas was going to get "wrought up."

Mr. CAMPBELL of Kansas. I have been asked whether or not I was going to bring up a resolution calling for an investigation.

Mr. GARNER. I did not ask the gentleman that question. I did not suppose he was going to get "wrought up." I did not know whether he would bring the resolution out or whether he was opposed to it.

I understand you have several bills from the Committee on Banking and Currency. You have offered one resolution concerning the consideration of one bill, and I was wondering if you were going to bring in a resolution for the consideration of all these bills separately?

Mr. CAMPBELL of Kansas. Yes.

Mr. GARNER. That is what I wanted to know. The gentleman seemed to fear that the Attorney General was going to be assaulted. I think the gentleman from Kansas has contributed more to the assault of the Attorney General than anybody else, as chairman of the Committee on Rules, in bringing out the Woodruff resolution. He is the man responsible for it. It could not have been brought out without the consent of the gentleman from Kansas.

Mr. CAMPBELL of Kansas. "The gentleman from Kansas" assumes entire responsibility for what he has already done, for what he is now doing, or what he may do in the future.

Mr. Speaker, I move the previous question on the adoption of the resolution.

Mr. KINCHELOE. Mr. Speaker, will the gentleman yield? I want to ask the gentleman a question.

Mr. CAMPBELL of Kansas. I yield for a question—and I assume that it is germane to the subject matter now under discussion.

Mr. KINCHELOE. It is in reference to a subsequent rule in which I am interested.

Mr. CAMPBELL of Kansas. Yes.

The SPEAKER. Does the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. KINCHELOE. I understood the gentleman to say, in answer to the interrogatory of the gentleman from Texas [Mr. GARNER], that you are bringing out a rule to cover the bill from the Committee on Banking and Currency?

Mr. CAMPBELL of Kansas. Yes.

Mr. KINCHELOE. I have been trying to obtain information as to what the procedure of the Committee on Rules will be when the Committee on Agriculture is given the right of way. Will you bring in a separate rule for each measure that is to come?

Mr. CAMPBELL of Kansas. The Committee on Rules unanimously reported a rule giving the Committee on Agriculture three days in which to dispose of business that it has on the Union and House Calendars.

Mr. KINCHELOE. That is what I wanted to know. Is the Committee on Agriculture itself to determine as to what bills shall be considered during that time?

Mr. CAMPBELL of Kansas. Why, certainly.

Mr. Speaker, I move the previous question.

The SPEAKER. The gentleman from Kansas moves the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

The SPEAKER. The gentleman from Pennsylvania [Mr. McFADDEN] is recognized.

Mr. McFADDEN. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. This is a House Calendar bill, and it does not require that.

Mr. McFADDEN. Very well. I call up the bill H. R. 9527.

The SPEAKER. The gentleman from Pennsylvania, chairman of the Committee on Banking and Currency, calls up the bill H. R. 9527, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations.

Be it enacted, etc., That section 5136 of the Revised Statutes of the United States be amended so that the paragraph therein designated as "Second" shall read as follows:

"Second. To have perpetual succession until it shall be dissolved by the act of its shareholders owning two-thirds of its stock, unless its franchise shall become forfeited by reason of violation of law, or unless it shall be terminated by the provision of act of Congress hereinafter enacted."

SEC. 2. That all acts or parts of acts providing for the extension of the period of succession of national banking associations for 20 years are hereby repealed, and the provisions of paragraph second of section 5136, Revised Statutes, as herein amended shall apply to all national banking associations now organized and operating under any law of the United States.

Mr. McFADDEN. Mr. Speaker, this bill is made necessary because of the arrival of that period of time at which the third extension of the charter rights of national banks is necessary.

Back in the sixties, when the national bank act was passed, there was some doubt, perhaps, in the mind of the Congress as to the advisability of permitting the national banks to have an existence in perpetuity, so that Congress saw fit to put a limitation of 20 years thereon. Just prior to the expiration of that 20 years a bill giving the right to the national banks to continue their existence for an additional 20 years was enacted. In 1902 the situation was treated in a similar manner.

We are now up to the point where the time for the third extension has arrived, and it is necessary that some action be taken by the Congress, or else the charter rights of national banks will begin to expire on July 1.

The Committee on Banking and Currency gave very careful consideration to this proposition. They heard the Secretary of the Treasury, the Comptroller of the Currency, and members of the Federal Reserve Board. All of these people were in favor of granting charter rights to banks as is provided in this bill.

One of the controlling reasons for this was the fact that in the formation of the Federal reserve act and amendments thereto national banks were given the right to act in a fiduciary capacity. In acting in a fiduciary capacity it is necessary for institutions to take on long-time trusts, in some instances as long as 400 years. It is a great handicap to the national banks not to have the right to act in a fiduciary capacity only under the rules and regulations laid down by the Federal Reserve Board, and they are not able to take on these trusts in competition with the State banks and trust companies, because the people who have charge of these trusts are loath to give them to national banks whose charters expire each 20 years, because of the fact that it means that the charters might not be renewed and they might have trouble in handling or transferring their trusts. Therefore, the national banks who have been given this power by Congress feel that they are entitled to have a right to take on these trusts under fiduciary powers.

Mr. WALSH. Mr. Speaker, will the gentleman yield?

Mr. McFADDEN. Certainly.

Mr. WALSH. These national banks are dependent upon Congress for their charters, are they not?

Mr. McFADDEN. They are.

Mr. WALSH. Then, why should they feel that they are entitled to have perpetual succession?

Mr. McFADDEN. Because they have been given the right to act in a fiduciary capacity in taking on trusts that have a long time to run—much longer than their own charter rights.

Mr. WALSH. Certainly; but when they were given that right they were given it under the law that permitted their succession in every 20 years.

Mr. McFADDEN. That is true; but it is impossible for them to take on these trusts that have been given them by the Congress, because many of these trusts run beyond 20 years—the present life of a national bank.

Mr. WALSH. Can the gentleman give us information as to how many national banks have taken on trusts or instruments of trusts to run for 400 years?

Mr. McFADDEN. I can not give the gentleman exact information on that, but many national banks have taken on these trusts, but many preliminary formalities with respect to compliance with regulations and other things pertaining to the solvency of the institutions are taken into consideration and passed upon by the Reserve Board. A great many of these institutions have qualified in that way, especially in the larger cities, where there is a large amount of this trust business.

Mr. WALSH. Can the gentleman give us information as to how many of these institutions have been hampered or hindered in any way in taking on these trusts by reason of the 20-year limitation?

Mr. McFADDEN. Yes. I have letters from national banks from all over the country, and the Comptroller of the Currency and the Federal Reserve Board have received letters from these banks complaining because of this limitation, and they are asking to be given this right of succession in order to be able to compete with the State banks and trust companies who are delving into the preserves of national banks. This is one of the things that would permit national banks to compete with these great State banks and trust companies.

Mr. WALSH. Of course, if there is a lot of national banks that have taken on this duty notwithstanding the stringent regulations of the Federal Reserve Board in reference to it, it does not make any difference whether they have a 20-year or a 30-year or a 50-year limitation or longer.

Mr. McFADDEN. There is no reason, as a matter of fact, why we should limit them at all; no reason that I can see. These banks are under the supervision of the Comptroller of the Currency, who is there to see to it that these banks comply with the law, and the Congress has the right to repeal the law at any time; and, besides that, practically 47 States are permitting charters to be issued either in perpetuity or for a longer time than 20 years. It is certainly a fact that if we expect the national banks to exercise their rights under the law which has been passed by Congress, we must take off the restrictions and the limitations, so that they can assume the full responsibility which was contemplated when these fiduciary powers were granted to them. In my own State the courts will not permit national banks to handle trusts or estates that are under the jurisdiction of the State laws because of this 20-year limitation. It is not fair, especially when the State banks and trust companies do all the other kinds of business that the national banks do.

Mr. WALSH. Will the gentleman yield further?

Mr. McFADDEN. Yes.

Mr. WALSH. This will be the second extension?

Mr. McFADDEN. No; the third extension.

Mr. WALSH. There has never been any difficulty about getting an extension by Congress, has there?

Mr. McFADDEN. No; I do not think there has been.

Mr. WALSH. Is this the first time they have ever asked for perpetual succession?

Mr. McFADDEN. This is the first time since the fiduciary rights were given them under the Federal reserve law. Twenty years ago they did not have the right to act in a fiduciary capacity.

Mr. LUCE. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. LUCE. For the benefit of my colleague [Mr. WALSH] I will say that in our own State at least one of the judges is inclined to hold that national banks must give sureties, in the case of trusts, which puts the banks at a decided disadvantage in comparison with the trust companies, from whom sureties are not required.

Mr. COOPER of Wisconsin. Mr. Speaker, will the gentleman permit a question?

Mr. McFADDEN. I will.

Mr. COOPER of Wisconsin. It is customary in national laws granting charters for the law to reserve to Congress the right to alter, amend, or repeal. Does the gentleman construe the language in line 9, page 1, and lines 1 and 2 on page 2 of the pending bill as being equivalent to that reservation?

Mr. McFADDEN. I believe that Congress has the right, of course, to repeal this law. That is expressly provided for here.

Mr. COOPER of Wisconsin. That is what I want to understand. The language is—

unless its franchise shall become forfeited by reason of violation of law—

That is one thing——

Mr. McFADDEN. Yes.

Mr. COOPER of Wisconsin. But there follows—

or unless it shall be terminated by act of Congress hereafter enacted.

Is that clause equivalent to the ordinary reservation——

Mr. McFADDEN. I so understand it.

Mr. COOPER of Wisconsin. That the right to alter, amend, or repeal is expressly reserved.

Mr. McFADDEN. Yes. I am not a lawyer, but I construe it that way.

Mr. NEWTON of Minnesota. Will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. NEWTON of Minnesota. As I understand it, quite a large number of the States have given perpetual succession to State banking institutions.

Mr. McFADDEN. Yes; and I would like to put into the RECORD at this point a brief which has been prepared by the counsel of the American Bankers' Association, setting forth the rights which the different States have given in the matter of perpetual or limited charters:

DURATION OF CHARTERS OF STATE BANKS, SAVINGS BANKS, AND TRUST COMPANIES.

ALABAMA.

Twenty years' limitation by constitutional provision (Const. of 1901, sec. 251): "Every bank or banking company shall be required to cease all banking operations within 20 years from the time of its organization, unless the time be extended by law, and promptly thereafter close its business."

Does this apply to trust companies? This is a matter for the courts. In this connection Alabama Code (1907), section 3528, is suggestive. This provides that trust companies "shall be amenable to the general banking laws of the State in so far as said laws are applicable to trust companies."

ARIZONA.

Corporations generally have perpetual succession. Banks, savings banks, and trust companies must take out an annual license to do business.

Corporations have the power of "perpetual succession" (Ariz. Rev. Stat., p. 2097 (1)): "The duties of the bank comptroller shall be to prepare and furnish to every building and loan association, savings bank, banker, and banking company or trust company incorporated under the laws of this State, or any State or country, and doing business in this State, applying therefor in writing, a license, in the form to be prescribed by said comptroller, authorizing such corporations to use the name and transact the business of a building and loan society, association, savings bank, banker, bank, banking company, or trust company during the fiscal year of issuance thereof."

ARKANSAS.

No limitation as to duration of banks, trust companies, and savings banks.

CALIFORNIA.

Corporations generally are limited to a duration of 50 years. No specific provisions as to banks, etc.

"Articles of incorporation must be prepared, setting forth: * * * (4) the term for which it is to exist, not exceeding 50 years." (Calif. Civ. Code No. 290.)

"Every corporation, as such, has power:

"1. Of succession, by its corporate name, for the period limited; and when no period is limited, perpetually." (No. 354, Calif. Civ. Code.)

COLORADO.

Corporations generally are limited to 20 years; this may apply to banks and certainly does to trust companies.

The certificate of incorporation of a corporation, among other things, shall state "the term of its existence, not to exceed 20 years, except as hereinafter provided, save and except to make perpetual corporations insuring lives of individuals." (Courtrights Colo. St. 847.)

"Corporations formed under this act shall be bodies corporate and politic in fact and in name, by the name stated in such certificate, and by that name have succession for the period for which they are organized." (Courtrights Colo. St. 854.)

Persons associating to form a trust, deposit, and security business "shall subscribe articles of association which shall contain: * * *

"Fifth. The period for which such association is to be incorporated." (Id. 295.)

The certificate of organization of a bank shall state "(f) the period during which such corporation is to exist." (Id. 269.)

The definition of a "bank" is contained in No. 265: "The word 'bank,' as used in this act, shall include every person, copartnership, and corporation, except national banks, engaged in the business of banking in the State of Colorado."

COLORADO.

Persons associating to form a trust company "shall execute articles of incorporation as provided by section 2 of chapter 19 of the general statutes of the State." (Id. No. 304.) A footnote states that "the section above referred to is section 847," which, as we have seen, provides for a statement of "the term of its existence, not to exceed 20 years," etc.

CONNECTICUT.

State banks, trust companies, and savings banks are not limited in their duration.

"Every corporation shall have power * * * (1) to have succession by its corporate name for the time stated in its charter, certificate of incorporation, or articles of association, and when no period is limited, perpetually." (Gen. Stat. of Conn. 1918, No. 3421.)

The certificate of incorporation of a corporation shall state "(6) The period, if any, limited for the duration of the corporation." (Id. No. 3508.)

No. 3948 of such general statutes, prescribing what the certificate of incorporation of a State bank or trust company shall contain, includes no statement as to duration of the charter.

As to savings banks no specific provisions were found.

DELAWARE.

Corporations generally have unlimited succession. The duration of banks, trust companies, and savings banks can be determined only by an examination of their special charters.

Section 1 of article 9 of the constitution of Delaware expressly provides that the provisions therein requiring corporations to be "created, amended, renewed," etc., "shall not apply to * * * banks." Under this permission banks, trust companies, and savings banks are created by special charters. See, for example, chapters 273, 274, 275, 276, 277, 278, 280, 281, 282, and 283 of the laws of 1919 and chapter 280 of the laws of 1915. These special charters must be examined in order to ascertain the policy of the State as to the duration of the existence of these corporations.

The general policy as to corporations is shown by No. 1916 of the revised code of 1915: "Every corporation created under the provisions of this chapter shall have power: 1. To have succession, by its corporate name, for the time stated in its certificate of incorporation, and when no period is limited it shall be perpetual."

FLORIDA.

Banks, trust companies, and savings banks are not limited in their duration.

"The provisions of this title (that of corporations, which title includes the other sections quoted) shall extend to all corporations, whether chartered by special act of the legislature or under general law in their respective classes." (Rev. Gen. St. of Fla., No. 4045.)

"Every corporation by virtue of its existence as such shall have power: 1. To have succession by its corporate name for the period limited in its charter and, when no period is limited, perpetually." (Id. No. 4047.)

"The proposed charter of an intended corporation * * * shall set forth: * * * (4) The term for which it is to exist." (Id. 4051.)

The statutes affecting banks, trust companies, and savings banks contain nothing taking them out of the operation of these general provisions, which apply to "all corporations."

GEORGIA.

Thirty years' limitation, applicable to State banks, trust companies, and savings banks.

The banking act of 1919, article 17, section 1 (No. 136) provides:

"A bank organized under this act shall have power: (1) To have continual succession for the term of 30 years, with the rights of renewal herein provided for."

Article 1, section 1 of this act defines the term "bank." "The term 'bank,' as used in this act * * * shall include incorporated banks, banking companies, trust companies, and other corporations doing a banking business in this State."

IDAHO.

Fifty-year limitation.

"Every corporation, as such, has power: 1. Of succession, by its corporate name, for the period limited, and when no period is limited, perpetually." (Idaho Comp. St. of 1919. No. 4752.)

"Articles of incorporation (of private corporations) must be prepared setting forth: * * * 4. The term for which it is to exist, not exceeding 50 years." (Id. No. 4696.)

"Unless otherwise provided herein, the general corporation laws of this State shall apply to all corporations organized and operating under this chapter." (Id. No. 5220.) "This chapter" is the one dealing with banks and savings banks.

"Articles of incorporation (of trust companies) must be prepared setting forth: * * * 4. The term for which it is to exist, not exceeding 50 years." (Id. No. 5222.)

ILLINOIS.

No limitation.

The application for organization as a bank or banking institution shall state "the time for which such association shall continue." (Callaghan's Ill. Laws, 1917–1920, Supp., No. 688 (2).)

The banking laws of Illinois provide that "associations organized under this act shall be bodies corporate and politic for the period for which they may be organized. (Id. No. 688 (8).)

As no definite limitation is set it would seem that banks may be organized with a perpetual charter.

The corporation act does not aid, since that provides that "corporations may be organized in the manner provided in this act for any lawful purpose except for the purpose of banking," etc.

However, this general corporation act does apply to trust companies. No. 2559 of Callaghan's Illinois Statutes, 1913, provides that "any corporation which has or shall be incorporated under the general incorporation laws of this State * * * and all amendments thereof for the purpose of accepting and executing trusts, etc." This indicates that trust companies are organized under the general corporation act.

The general corporation act provides that "Each corporation organized under this act shall * * * have the following powers, rights, and privileges: 1. To have succession by its corporate name for the period limited in its certificate of incorporation, or any amendment thereof." (Callaghan's Ill. Laws, 1917–1920, Supplement No. 2446 (6).)

The statement of incorporation under the general corporation act shall "set forth the following: (4) The period of duration."

There is no indication that this period of duration may not be perpetual.

There seems to be no specific provisions affecting savings banks.

INDIANA.

Constitutional limitation to 20 years. The application of this to other than banks of "issue" is not certain.

"Every bank, or banking company, shall be required to cease all banking operations from the time of its organization, and promptly thereafter close its business." (Indiana Constitution, p. 209, art. 11, sec. 10.) The first section of this article provides that "The general assembly shall not have power to establish or incorporate any bank or banking company or moneyed institution for the purpose of issuing bills of credit or bills payable to order or bearer, except under the conditions prescribed in this constitution" (p. 200). The courts might possibly hold that the whole article was limited to banks of "issue." (See Pape *v.* Capitol Bank, 20 Kans. 440.)

The statutes contain no specific provision relating to banks, savings banks, or trust companies, so far as duration of charter is concerned.

The general corporation act provides for articles of incorporation stating "(h) The length of life of the corporation, not exceeding 50 years." This act, however, does not apply to "the organization or control * * * of * * * banks and trust companies, or corporations doing a banking business."

IOWA.

Savings banks are limited to 50 years; banks and trust companies to 20 years.

"The articles of incorporation of a savings bank shall * * * give * * * the time of its existence, which shall not exceed 50 years." (Compiled Code of Iowa (1919), 5768.)

"The corporators (of savings banks) and their successors shall be a body corporate, with the right of succession for the period limited." (Id. 5770.)

"Articles of incorporation (of State banks) shall state: 3. The time of the commencement and termination of the corporation, which shall in no case exceed 20 years. (Id. No. 5791.)

Trust companies are evidently formed under the general corporation law since code section 5814 refers to "corporations organized under the provisions of chapters 1, 2, and 3, title 17 (general corporation law), whose articles of incorporation authorize the acceptance and execution of trusts."

Two provisions of this general act are pertinent. "Among the powers of such corporations are the following: 1. To have perpetual succession." (Id. No. 5329.) Corporations "for the establishment and conduct of savings banks * * * may be formed to endure 50 years; those for other purposes not to exceed 20 years." (Sec. 5348.)

KANSAS.

Limitation of 50 years.

The general corporation law provides: "The purposes for which private corporations may be formed are: * * * (41). The organization of loan and trust companies * * * (43). The organization and control of banks * * * (44). The organization and control of savings banks. (Gen. Stat. of Kansas (1915) No. 2099.)

"The existence of private corporations shall begin on the day the charter is filed in the office of the secretary of state, and shall continue for a period of 50 years." (Id. No. 2110.)

KENTUCKY.

No limitation.

The general corporation law provides that "banking, building and loan, trust, insurance, and railroad corporations shall, in addition to the provisions of this article, which are not inconsistent with the law relating especially to them, be organized in the manner and subject to the provisions of such laws." (Ky. Stat. Carroll (1915) No. 538.)

The incorporators "shall execute articles of incorporation which shall specify: (6) The time when it is to commence and the period it is to continue." (Id. No. 539.)

The inference is that the period may be indefinite.

LOUISIANA.

Limitation of 99 years.

"Any number of persons, not less than five, associating themselves for the purpose of conducting a savings, safe-deposit, and trust banking business in any of its branches may constitute themselves a corporation, with power and authority, first, to have and enjoy succession by a corporate name, to be selected by themselves, for a period that shall be expressed and limited in the articles of association, not exceeding 99 years." (Banking laws compiled by State examiner (1917), p. 20; act 45, of 1902, No. 1.)

Banks and State banks "organized under this act shall have power and authority (1) to have and enjoy succession by a corporate name, to be selected by themselves, for a period stipulated in the act of incorporation, and which shall not exceed 99 years." (Id., p. 1; act 179, of 1902.)

MAINE.

No limitation.

"All savings banks or institutions for savings lawfully organized are corporations possessed of the powers and functions of corporations generally, and as such have power:

"1. To have perpetual succession, each by its corporate name." (Rev. Stat. of Maine (1916), p. 809, ch. 52, No. 6.)

The articles of incorporation of banks and trust companies need not state any limitation of duration. (Id., p. 826; ch. 52, No. 64.)

Banks, savings banks, and trust companies may not be organized under the general corporation law. (Id., p. 782; ch. 51, No. 7.)

MARYLAND.

Limitation of 40 years for State banks and trust companies. No limitation as to savings banks (mutual).

The general corporation law provides:

"Corporations may be formed under the provisions of this article for any one or more lawful purposes, except such as are excluded from the operation of a general law by the constitution of this State. And except where special provisions inconsistent herewith are made in this article for particular classes all corporations shall be formed in manner following." (Bagby's Ann. Code, pp. 535, 536; art. 23, No. 2.)

It further provides: "Every corporation which is subject to the provisions of this article shall have the following general powers, except where the special provisions relating to any particular classes of corporations are inconsistent herewith:

"1. To have perpetual succession by its corporate name." (Id., pp. 538, 539, art. 23, No. 7.)

No inconsistent provisions exist with respect to savings banks, which, however, must be mutual.

Articles of incorporation of trust companies shall "specifically state: * * * Fifth. The term of its existence, not exceeding 40 years." (Ch. 268 of Laws of 1920, reenacting sec. 42 of art. 11 of the Annotated Code.)

Articles of incorporation of banks shall state: "* * * Fifth. The period for which such bank is organized, not exceeding 40 years." (Bagby's Ann. Code, p. 239, art. 11, No. 21.)

MASSACHUSETTS.

No limitation found in constitution or statutes.

No references to duration.

MICHIGAN.

Thirty years' limitation.

"No corporation shall be created for a longer period than 30 years, except for municipal, railroad, insurance, canal, or cemetery purposes, or corporations organized without any capital stock for religious, benevolent, social, or fraternal purposes," followed with provisions for renewal of charter. (Constitution, art. 12, No. 3.)

Articles of association of banks and savings banks "shall specify: Sixth. The period for which the bank is organized, which shall not exceed 30 years." (Mich. Comp. Laws, 1915, No. 7968.)

Articles of association of trust companies shall contain: "* * * Fifth. The period for which such corporation is to be incorporated, not to exceed the period of time authorized by the constitution of this State." (Id. sec. 8046.)

MINNESOTA.

No limitation.

The general corporation law provides:

"Corporations may be formed for any one of the following purposes:

"1. Carrying on the business of banking. * * *

"3. Creating and conducting savings banks. * * *

"4. Transacting business as a trust company in conformity with the laws relating thereto." (Minn. Gen. Stat., 1913, No. 6145.)

The certificate of incorporation of a corporation shall specify: "2. The period of its duration, if limited." (Id. No. 6147.)

The inference is that the duration may be unlimited. It is clear that this provision includes the institutions under consideration. See for additional evidence subdivision 1 of No. 6147.

MISSISSIPPI.

Limitation to 50 years.

"No charter for any private corporation for pecuniary gain shall be granted for a longer period than 99 years." (Const., No. 178.)

"The persons associating shall execute articles of incorporation, which shall specify: * * * Third. The nature of its business, whether that of a commercial bank, savings bank, trust company, or any combination thereof. * * * Sixth. The period for which the bank (savings bank or trust company) is organized, which shall not exceed 50 years." (Hemingway's Miss. Code (1917), No. 3585.)

MISSOURI.

Apparently no limitation as to State banks and trust companies. Fifty years' limitation as to savings banks.

The articles of agreement of banks "may provide for the number of years the corporation is to continue, which shall not exceed 50 years, or may provide that the existence of the corporation shall continue until the corporation shall be dissolved by consent of the stockholders or by proceedings instituted by the State under any statute now in force or hereafter enacted." (Mo. Rev. Stat. (1919), No. 11728.)

An exact duplication of this provision as applied to trust companies is found in Missouri Revised Statutes (1919), No. 11790.

"The articles of agreement (of savings banks) shall set out: * * * Sixth. The number of years the corporation is to continue, which in no case shall exceed 50 years." (Id., No. 11868.)

The general corporation law provides: "Every corporation, as such, has power: * * * First. To have succession by its corporate name for the period limited in its charter, and when no period is limited, for 20 years."

MONTANA.

Fifty years' limitation.

"Any three or more persons desiring to associate themselves together for the purpose of becoming a corporation to engage in any one or more of all the businesses mentioned in section 2 (this section provides for the following classes of banks: (a) Commercial banks, (b) savings banks, (c) trust companies, (d) investment companies) of this act, shall sign * * * articles of agreement, which shall set forth: 6. The number of years the corporation is to continue, which in no case shall exceed 50 years." (Rev. Codes of Mont. (1915 Suppl.), No. 3915.)

NEBRASKA.

No limitation.

"Every corporation, as such, has power: First. To have succession by its corporate name." (Nebr. Rev. Stat. (1913), No. 566.) This would be a logical place to insert a limitation if any were intended.

Notice of incorporation of corporations generally must contain: Fifth. The time of commencement and termination of the corporation. (No. 572.) Here again no limitation is found. No specific provisions were found with reference to the precise institutions under investigation.

NEVADA.

Fifty years' limitation.

"Any three or more persons, a majority of whom shall be residents of this State, may execute articles of incorporation and be incorporated as a banking corporation in the manner hereinafter provided. Said articles of incorporation shall contain: * * * Seventh. The length of time the corporation is to exist, which shall not exceed 50 years." (Rev. Laws of Nev. (1912), No. 616.)

The following provisions show the applicability of this limitation to trust companies and savings banks. "Any corporation organized under this act may state in its articles of incorporation that it will carry on a trust company business, either exclusively or in connection with the banking business." (Id., No. 620.)

"Any banking corporation designating its business as that of a savings banks shall have power to carry on a savings bank business as prescribed and limited in this act." (Id., No. 621.)

NEW HAMPSHIRE.

No limitation.

"Existing charters of savings banks shall be perpetual, although expressly limited to a term of years." (General laws of New Hampshire (1901), ch. 165, No. 1, p. 546.)

"Every corporation subject to the provisions of this act (business corporations act) shall have the following powers and privileges and be subject to the following liabilities: (a) To have perpetual succession in its corporate name unless incorporated or formed for a limited term or dissolved as provided by law." (Laws of 1919, ch. 92, No. 4.)

"The term 'business corporation,' as used in this act, shall mean any corporation having a capital stock and established for the purpose of carrying on business for profit." (Laws of 1919, ch. 92, No. 1.)

In a chapter headed "banks of issue" is the provision that "every such bank and its stockholders shall be subject to the laws of the State applicable to corporations generally, unless the same are controlled by the provisions of the charter or by some special law of the State or United States." (General laws of 1901, ch. 163, No. 4.) While there are technically no State banks of issue, this section is significant.

NEW JERSEY.

No limitation.

"Every corporation shall have power: 1. To have succession, by its corporate name, for the period limited in its charter or certificate of incorporation, and when no period is limited, perpetually." (New Jersey Comp. St. (1910) Corps., No. 1.) This is the "act concerning corporations" referred to the sections hereafter quoted.

"The certificate of incorporation * * * shall set forth: VI. The period, if any, limited for the duration of the company." (Id. No. 8.)

The certificate of incorporation of a bank "shall specifically state: VI. The period, if any, limited for the duration of the bank." (Comp. St. (1910) chapter on banks and banking, No. 2.)

"In addition to the general powers conferred by the 'act concerning corporations,' so far as the same are not inconsistent with this act, every bank shall have power," etc. (Id. No. 6.)

The certificate of incorporation of a savings bank shall "set forth * * *. V. The period, if any, limited for its duration." (N. J. Comp. St. (1910) chapter on savings banks, No. 3.)

"All savings banks organized under and by virtue of this act are hereby declared to be corporations possessed of the powers and functions of corporations mentioned in the first section of the act entitled 'An act concerning corporations'; and, as such, shall have power," etc. (Id. No. 1.)

The certificate of incorporation of a trust company "shall specifically state: * * * VI. The period, if any, limited for the duration of the company." (N. J. Comp. St. of 1910, chapter on trust companies, No. 2.)

"In addition to the general powers conferred by the 'act concerning corporations,' so far as the same are not inconsistent with this act, every trust company shall have power," etc. (Id. No. 6.)

NEW MEXICO.

Fifty years' limitation as to trust companies; apparently no limitation as to State banks and savings banks.

"Banks are divided into the following classes:

"(a) Commercial banks;

"(b) Savings banks; and

"(c) Trust companies. (N. M. Laws of 1915, c. 67, No. 2.)

"Any number of persons not less than three may organize a corporation to engage in the business of banking." The certificate shall specify: (f) The period during which said corporation is to exist. * * * The provisions of this section shall not be construed to apply to "Trust companies" (id., No. 10), as amended by laws of 1919, chapter 120.

The articles of agreement of a trust company "shall set out: * * * Sixth. The number of years the corporation shall continue, which in no case shall exceed 50 years." (Id., No. 58.)

"Upon executing * * * a certificate pursuant to all the provisions of this article, three or more persons may become a corporation for any lawful purpose or purposes whatever, except * * * commercial banks, trust companies," etc. (Laws of 1917, c. 112, amending No. 889 of the codification of 1915.)

A certificate of incorporation "shall set forth: * * * VI. The period limited for the duration of the corporation, not exceeding 50 years." (Laws of 1917, c. 112, amending No. 891 of the codification of 1915.) This section applies to corporations generally. It would not seem to apply to commercial banks and trust companies. It is questionable if it would apply to savings banks.

NEW YORK.

No limitation.

The organization certificate of a State bank "shall specifically state: * * * 5. The term of its existence, which may be perpetual." Banking law No. 100.

The organization certificate of a trust company "shall specifically state: * * * 5. The term of its existence, which may be perpetual." (Banking law No. 180.)

The organization certificate of a savings bank does not require a statement as to its term of existence. (Banking law No. 230.)

In addition to the powers conferred by the general corporation law, "every savings bank shall have * * * the following powers," etc. (Banking law No. 238.)

General corporation law No. 11 provides that "every corporation as such has power, though not specified in the law, under which it is incorporated: 1. To have succession for the period specified in its certificate of incorporation or by law, and perpetually when no period is specified."

NORTH CAROLINA.

Apparently no limitation.

"Every corporation has power: 1. To have succession by its corporate name for the period limited in its charter, and when the charter contains no time limit, for a period of 60 years." (North Carolina Consolidated Statutes of 1919, No. 1126; General Corporation Law.)

NOTE.—The limitation of 60 years applies when "the charter contains no time limit." The inference that any time limit contained in the charter, even though longer than 60 years, would control.

A certificate of incorporation shall "set forth: * * * 6. The period, if any, limited for the duration of the corporation." (Id. No. 1114; General Corporation Law.)

"All of the provisions of law relating to private corporations, and particularly those enumerated in the chapter entitled 'Corporation' (Nos. 1126, 1114 are part of this chapter), not inconsistent with this chapter, or with the business of banking, are applicable to banks." (Id. No. 236; Banking Law.)

"In addition to the powers conferred by law upon private corporations, a banking corporation and banking and trust company doing a fiduciary and surety business has power," etc. (Id. No. 220.)

"Three or more persons may be incorporated for the purpose of establishing and operating commercial banks of deposit and discount, or savings banks of loan and deposit, or banks with both classes of business, or banks with a trust, fiduciary, and surety business, by setting forth in a certificate of incorporation * * *. 6. The period, if any, for the duration of the corporation." (Id. No. 216; in "6" the word "limited" was apparently omitted.)

NORTH DAKOTA.

Twenty-five years' limitation as to State banks and savings banks. Trust companies have perpetual charters.

A State bank has "the power: * * * 2. To have succession for a period of 25 years from its organization, unless it is sooner dissolved, according to the provisions of this chapter, or unless its franchise becomes forfeited by some violation of law." (N. D. Comp. Laws (1913), No. 5150.)

A savings bank "shall be vested with the powers provided for in" such section 5150 of the Compiled Laws. (Id. No. 5193.)

Trust companies "shall have perpetual succession." (Id. 5205.)

OHIO.

No limitation.

The certificate of incorporation of a commercial bank, a savings bank, or a trust company need not state any limited period of duration. Banking Law of 1919, secs. 710–41.

The incorporators of a bank, savings bank, or trust company upon recording the articles of incorporation "shall become a body corporate with succession." (Id. 710–47.) A limitation if intended would have been inserted here.

OKLAHOMA.

Twenty-five years' limitation for banks and savings banks. Fifty years' limitation for trust companies.

The certificate of incorporation of a bank (and it would seem of a savings bank) "shall contain * * * the length of time the corporation is to exist, which shall not exceed 25 years." (Rev. Laws of Okla. (1910) No. 257.)

The certificate of incorporation of a trust company "shall set out: * * * Sixth: The number of years the corporation is to continue, which in no case shall exceed 50 years." (Bunn's Annot. Suppl. to Rev. Laws (1918) No. 308.)

OREGON.

No limitation.

The "articles of incorporation (of a State bank) shall specify: * * * 5. The term of its existence, which may be perpetual." (Oreg. Gen. Laws (1920) No. 6196.)

The articles of incorporation of a trust company "shall specifically state: * * * (5) The term of its existence, which may be perpetual." (Id. No. 6224.)

A savings bank would seem to come within the definition of a State bank. "Any person, firm, or corporation (except national banks) having a place of business within this State where credits are opened by the deposit or collection of money or currency or negotiable paper subject to be paid or remitted upon draft, receipt, check, or order, shall be regarded as a bank or banker, and as doing a banking business under the provisions of this act." (Id. No. 6200.)

PENNSYLVANIA.

No limitation as to savings banks and trust companies. Twenty years' limitation as to commercial banks.

A bank shall "have succession by the name designated in its articles of association for the term of 20 years from the date of the letters patent, unless sooner dissolved under the provisions of its articles of association, or under this act." (West's Pa. Stats. (1920) 1186.)

A savings bank shall "have succession by the name designated in its articles of association, perpetually from the date of the letters patent, unless sooner dissolved under the provisions of the articles of association or by the provisions of any act of assembly." (Id. 19745.)

Each corporation formed under the general corporation act "by virtue of its existence as such, shall have the following powers, unless otherwise specially provided: 1. To have succession by its corporate name for the period limited by its charter and when no period is limited thereby, or by this act, perpetually, subject to the power of the general assembly, under the constitution of the Commonwealth." (Id. 5592.) This section is applicable to trust companies which are governed by the provisions of the general corporation law. This is the inference from the placing of Nos. 6335–6349, relating to trust companies in the general corporation act.

RHODE ISLAND.

No limitation.

"It is hereby specifically provided that every corporation shall have power: (a) to have perpetual succession in its corporate name, unless a period for its duration is limited in its articles of association or charter." Ch. 1925 of the Laws of R. I., 5. (Laws of 1920, p. 186.)

"Except as in this act otherwise provided, this title (Business corporations) shall not apply to * * * the business of a bank, savings bank, trust company." Id. No. 3 (Id. p. 185).

"Every bank, savings bank, and trust company shall have the powers, rights, and privileges, and be subject to all the duties, restrictions, and liabilities conferred and imposed upon them respectively by this title (Banking), and in addition thereto shall have all the powers, rights, and privileges, and be subject to all the duties, restrictions, and liabilities set forth in chapter 213, so far only as not repugnant to or inconsistent with the provisions of this title." Ch. 231 of the general laws of 1909. (Ch. 213 contained general provisions affecting corporations, No. 1 of which provided that "all corporations shall, whenever no other provision is specially made, have perpetual succession.") This chapter was repealed by the above ch. 1925, which, however, provided in No. 90 thereof that if a corporation excepted from the operation of ch. 1925 should be "entitled to the benefits of section 1 * * * of ch. 213 * * * section 5 hereof * * * shall with respect to each such corporation be deemed to be in lieu of and substituted for said provisions of said chapters * * * and so far as the provisions of the act or statute creating such corporation or under which it is incorporated be deemed to apply thereto."

The statutory provisions with respect to the incorporation of banks and trust companies (ch. 229 of the laws of 1909) contain nothing with reference to the duration of such corporations. The agreement of incorporation need contain nothing with reference to the term of existence.

The same is true with reference to chapter 230, relating to the incorporation of savings banks.

It follows from the above that State banks, trust companies, and savings banks are not limited in their duration.

SOUTH CAROLINA.

No limitation.

"Every private corporation, as such, has power: 1. To have succession, by its corporate name for the period limited in its charter; and when no period is limited, in perpetuity." (S. C. Code (1912), No. 2792.)

With the exception of railroad, railway, turnpike, and canal corporations, and with the exception of municipal purposes, corporations "for any purpose * * * whatsoever" may be formed under the article entitled "Business corporations." (Code, No. 2834.)

"All charters granted under the provisions of this article shall continue in force perpetually, unless limited by the terms of the petition." (Code No. 2848, contained in "Business corporations" article.)

"Every corporation chartered under this article shall have the following powers, to wit: 1. To have perpetual succession." (Codes No. 2850, part of the "Business corporations" article.)

It would seem that banks, savings banks, and trust companies are organized under the business corporations law, except when granted special charters.

SOUTH DAKOTA.

Twenty years' limitation on banks and savings banks. No limitation as to trust companies, unless perhaps when they exercise banking powers.

"Every bank, banking company, or corporation shall be required to cease all banking operations within 20 years from the time of its organization and promptly thereafter close its business, * * * but the legislature may provide by general law for the reorganization of such banks." (Constitution, art. 18, No. 2.)

"For the purpose of this chapter (banking), every corporation, association, firm, or individual in this State whose business, in whole or in part, consists in the taking of deposits or buying and selling exchange shall be held a bank." (Code of 1919, No. 8948.)

The articles of incorporation of a bank as so defined, which would seem to include a savings bank, shall contain a statement of "6. The period for which the bank is organized, not exceeding 20 years, and the date on which it shall commence and terminate its corporate existence." (Id. No. 8950.)

Persons associating to form a trust company "shall make * * * written articles of incorporation containing: * * * 6. The period for which such trust company is organized, which may be perpetual." (Id. No. 9035.)

Trust companies "may also do a banking business and in doing such business shall be governed by, and be subject to, all the provisions of the preceding chapter (which included Rev. Code No. 8950) and to any amendments or modifications thereof which may hereafter be adopted." (Id. No. 9033.) It is a question of statutory and constitutional construction whether trust companies doing a "banking business" are limited in their duration to 20 years.

TENNESSEE.

No limitation.

No limitation on the duration of State banks, savings banks, and trust companies has been found. For instance, Thompson's Shannon's Code (1918), No. 2091, relating to powers of banks, and No. 2054, relating to powers of corporations, contain no such limitation.

TEXAS.

Fifty-year limitation.

"The articles of association (of a bank) shall set out * * * 6. The number of years the corporation is to continue, which in no case shall exceed 50 years." Complete Texas Statutes (1920)) art. 371.

"The articles of agreement (of a 'banking and trust company') shall set out: * * * 6. The number of years the corporation is to continue, which in no case shall exceed 50 years. (Id., art. 381.)

The articles of agreement of a savings bank "shall set out: * * * 6. The number of years the corporation is to continue, which in no case is to exceed 50 years." (Id. art. 387.)

UTAH.

One hundred year limitation.

The general incorporation act provides for articles of association, stating:

"4. The time of its duration, which shall not in any case be less than 3 nor more than 100 years." (Comp. Laws (1917), p. 861.)

"Corporation to conduct commercial savings banks or banks having departments for both such classes of business may be formed under the provisions of chapter 1 of title 19, Compiled Laws of Utah, 1917 (pp. 860–899), respecting corporations for pecuniary profit, and all the rights, privileges, and powers, and all the duties and obligations of such corporations and the officers and stockholders thereof shall be as provided in said chapter, except as in this chapter otherwise provided." (Id. p. 979.)

"Loan, trust, and guaranty associations may be incorporated under the provisions of chapter 1 of this title (pp. 860–899) respecting corporations for pecuniary profit." (Id. p. 1200.)

VERMONT.

No limitation.

"Subject to the additional or varied requirements stated in this chapter, a corporation may be formed pursuant to the provisions of the general corporation law for the purpose of conducting the business:

"1. Of a savings bank having no capital stock; or

"2. Of a trust company." (General Laws of Vermont (1917), sec. 5341.)

The general corporation law provides: "Unless the articles place some limit on the duration of the corporation, it shall exist forever or until its existence is terminated according to law." (Id. p. 4899.)

These are only applicable provisions found.

VIRGINIA.

No limitation.

"Every corporation of this State shall have power: (a) To have succession for the time stated in its charter, certificate of incorporation, or articles of association. But when no period is so limited, it shall be perpetual, subject to the power of repeal reserved by the constitution by the general assembly." (Virginia Code (1919), p. 3777.)

The certificate of incorporation of a corporation "shall set forth: * * * (e) The period, if any, limited for the duration of the corporation." (Id. 3850.)

Banks of discount and deposit (id. 4098), savings banks (id. 4137), and trust companies (id. 4137) are incorporated under the general corporation law, and are in general governed by its provisions.

WASHINGTON.

Fifty years' limitation.

The "articles of incorporation (of a bank or trust company) shall state: * * * 5. The period for which such corporation is organized, which shall not exceed 50 years." (Pierce's Wash. Code (1919), 271.)

"Upon the issuance of a certificate of authority to a bank the persons named in the articles of incorporation and their successors shall thereupon become a corporation and shall have power: * * * 2. To have succession for the term of years mentioned in its articles of incorporation." (Id. 273.)

"Upon the issuance of a certificate of authority to a trust company the persons named in the articles of incorporation and their successors shall thereupon become a corporation and shall have power: 1. To execute all the powers and possess all the privileges conferred on banks." (Id. 274.)

"Any bank which shall designate its business as that of a savings bank shall have the power to carry on the business of banking as prescribed and limited in this act." (Id. 406–411.) This indicates that stock savings banks are included in the term "bank" as above used.

The certificate of incorporation of a mutual savings bank need make no specific statement with reference to the duration of the corporation. (Id. 355.)

As for corporations generally, the articles of incorporation shall state "the time of its existence, not to exceed 50 years: *Provided*, That this limit of existence shall not apply to any life, accident, and health insurance company." (Id. 4505.)

Corporations generally shall "have succession for the period limited." (Id. 4515.)

WEST VIRGINIA.

No limitation.

"Every corporation as such shall have succession by its corporate name for the time limited in its charter or by law, and if no time be limited, perpetually." (W. Va. Code (1913), No. 2811; in ch. 52.)

Corporations may be formed under the joint-stock company law "for the following purposes: * * * 9. For banks of issue and circulation and of discount and deposit and for savings institutions. * * * 10. And for any other purpose or business useful to the public for which a firm or copartnership may be lawfully formed in this State." (Id. No. 2896; in ch. 54.)

An agreement for incorporation "shall set forth: 6. The period limited for the duration of the corporation." (Id. No. 2899; in ch. 54.)

"Banks of issue or of discount and deposit * * * shall be subject to the provisions of this chapter, and of chapters 52 and 53 of the code, so far as the same are applicable and not inconsistent with the following sections of this chapter." (Id. No. 3029; in ch. 54.)

"All savings banks, cooperative banking associations, and trust companies engaged in a general banking business shall be subject to the provisions of this chapter." (No. 3036; in ch. 54.)

"The words 'bank' or 'banking company' in this act shall be taken and construed to include any bank, banker, banking company, or trust company." (Id. No. 3046; in ch. 54.)

"Savings banks incorporated under this act shall be subject to the provisions of the fifty-second, fifty-third, fifty-fourth, and fifty-fifth chapters of this code so far as the same are applicable and not inconsistent with anything hereinbefore contained." (Supp. W. Va. Code, 1918, No. 3110.)

A trust company "shall, as to such business of banking, be subject to all the provisions of chapter 54 of the code * * * and not inconsistent with the powers hereby granted to such company." (Laws of 1919, ch. 80.)

WISCONSIN.

Banks and trust companies limited to 50 years. No limitation as to mutual savings banks.

The articles of incorporation of a bank shall contain: Fifth. The period for which such bank is organized, not exceeding 50 years." (Wis. banking law, No. 2024–7.)

"Trust companies may be organized pursuant to the provisions of subchapter 2, entitled 'State banks,' and be subject to all the provisions, requirements, and liabilities of subchapters 1 and 2, so far as applicable, except sections 2024–32 and 2024–35, and except as otherwise hereinafter provided." (Id. No. 2024–771.) The first-quoted statute, No. 2024–7, is contained in such subchapter 2, entitled "State banks."

The incorporators of a mutual savings bank "shall make, sign, and acknowledge written articles of incorporation containing: * * * Fifth. Such other articles or provisions, not inconsistent with law, as they may deem proper to be therein inserted for the interests of such corporation or the accomplishment of the purposes thereof, including, if desired, the duration of its existence." (Id. No. 2024–58.)

"Every mutual savings bank formed hereunder shall possess the powers and be subject to the provisions of the general laws relating to corporations, so far as the same may be applicable." (Id. No. 2024–76.)

The general corporation law provides for articles of incorporation "containing: * * * (7) Such other provisions or articles, if any, not inconsistent with law, as they may deem proper to be therein inserted for the interests of such corporation or the accomplishment of the purposes thereof, including, if desired, the duration of its existence." (Wisconsin Stat. (1915), No. 1772.)

WYOMING.

Fifty years' limitation.

The articles of incorporation of a "general banking, savings bank, and loan and trust business" shall "specifically state: * * * Third. The term of its existence, not to exceed 50 years." (Wyoming Comp. Stat. of 1920, No. 5135.)

Such a corporation "shall have power: * * * Second. To have succession for a period not to exceed 50 years from its organization, unless it is sooner dissolved according to the provisions of its articles of association, or by the act of its shareholders owning two-thirds of its stock, or unless its franchise becomes forfeited by some violation of law." (Id. No. 5135.)

"Trust company banks may be organized pursuant to the provisions of section 5135." (Id. No. 5189.)

The general provision with respect to corporations is that the articles of incorporation shall state among other things "the terms of its existence, not to exceed 50 years." (Id. No. 5037.)

The general corporation law provides that "Every corporation under the provisions of this chapter, as such, has power: * * * First. To have succession by its corporation name for the period limited in its certificate of charter." (Id. No. 5093.) Note: This merely shows the general policy of the State with respect to the duration of corporations.

SUMMARY.

Of the 48 States, 21 have absolutely no limitation in terms of years as to the period of existence of State banks, savings banks, and trust companies; 25 have limitations as to one or more of the three classes. Arizona has no limitation in terms, but an annual license must be taken. In Delaware the duration is governed by the special charter of the particular institution.

It is to be noted that the States limiting duration are not consistent as to particular class limited or to the period of limitation. For instance, Missouri limits savings banks to 50 years, with apparently no

limitation as to commercial banks and trust companies, while Wisconsin limits banks and trust companies to 50 years, but imposes no limitation on savings banks. Again, New Mexico has a 50-year limitation as to trust companies, with apparently no limitation as to commercial and savings banks, while North Dakota gives trust companies perpetual charters, at the same time limiting commercial and savings banks to 25 years.

It is absolutely impossible to determine any fixed policy which is operative throughout the various States. The Iowa statutes contain the most glaring example of the hit-and-miss character of these statutes. One section of the code provides for "perpetual succession" of corporations. Nineteen sections further on is a general limitation of the existence of corporations to 20 years.

Strange, also, are the provisions of the California statutes. Section 290 of the Civil Code requires the articles of incorporation of a corporation to set forth "the term for which it is to exist, not exceeding 50 years," while section 354 of the same code provides that "every corporation, as such, has power (1) of succession, by its corporate name, for the period limited; and when no period is limited, perpetually."

The statutes as to the duration of corporate existence are not the work of skillful legislators, with a clear definite public policy in mind.

States limiting duration:
1. Alabama (with possible exception of trust companies).
2. California.
3. Colorado (trust companies, with question as to banks).
4. Georgia.
5. Idaho.
6. Indiana (limited to banks of issue).
7. Iowa.
8. Kansas.
9. Louisiana.
10. Maryland (exclude mutual savings banks).
11. Michigan.
12. Mississippi.
13. Missouri (savings banks).
14. Montana.
15. Nevada.
16. New Mexico (trust companies).
17. North Dakota (exclude trust companies).
18. Oklahoma.
19. Pennsylvania (commercial banks only).
20. South Dakota (banks and savings banks).
21. Texas.
22. Utah.
23. Washington.
24. Wisconsin (banks and trust companies).
25. Wyoming.

States with no limitation of duration:
1. Arkansas.
2. Connecticut.
3. Florida.
4. Illinois.
5. Kentucky.
6. Maine.
7. Massachusetts.
8. Minnesota.
9. Nebraska.
10. New Hampshire.
11. New Jersey.
12. New York.
13. North Carolina.
14. Ohio.
15. Oregon.
16. Rhode Island.
17. South Carolina.
18. Tennessee.
19. Vermont.
20. Virginia.
21. West Virginia.

Note that this list includes the large and commercially important States of Illinois, Massachusetts, New Jersey, and New York.

Periods of limitation:
Utah, 100 years.
Louisiana, 99 years.
California, 50 years.
Idaho, 50 years.
Iowa (savings banks), 50 years.
Kansas, 50 years.
Mississippi, 50 years.
Missouri (savings banks), 50 years.
Montana, 50 years.
Nevada, 50 years.
New Mexico (trust companies), 50 years.
Oklahoma (trust companies), 50 years.
Texas, 50 years.
Washington, 50 years.
Wisconsin (banks and trust companies), 50 years.
Wyoming, 50 years.
Maryland, 40 years.
Georgia, 30 years.
Michigan, 30 years.
North Dakota (excluding trust companies), 25 years.
Oklahoma (banks and savings banks), 25 years.
Alabama, 20 years.
Colorado, 20 years.
Indiana, 20 years.
Iowa (banks and trust companies), 20 years.
Pennsylvania (commercial banks), 20 years.
South Dakota (banks and savings banks), 20 years.

Constitutional provisions limiting duration:
1. Alabama.
2. Indiana (limited to banks of issue?).
3. Michigan.
4. Mississippi.
5. South Dakota.

Some States in which corporations generally are limited in duration:
1. California.
2. Colorado.
3. Idaho.
4. Iowa.
5. Kansas.
6. Michigan.
7. New Mexico.
8. Utah.
9. Washington.
10. Wyoming.

[NOTE.—No special public policy has led these States to distinguish between banks, trust companies, and savings banks on one hand and other corporations on the other, so as to limit the duration in one case and not in the other.]

States in which duration is at least to some extent a question of statutory or constitutional construction:
1. Colorado (State banks).
2. Alabama (trust companies).
3. Indiana (constitution limited to banks of issue?).
4. Missouri (construction comparatively clear).
5. New Mexico.
6. North Carolina.
7. South Dakota (trust companies).

[NOTE.—The public policy has been so indefinite in these cases as to lead the legislature to express its intention in uncertain language.]

Mr. NEWTON of Minnesota. If the law should be amended in accordance with the proposed bill, the present law will be changed only in so far as the right of succession is concerned?

Mr. McFADDEN. That is the only change.

Mr. NEWTON of Minnesota. The right of the Comptroller of the Currency or other officials to revoke charters for mismanagement or some breach of the law still exists?

Mr. McFADDEN. In the same manner as it does now, exactly.

Mr. NEWTON of Minnesota. In addition to that, of course, Congress can repeal the law, either generally or specifically as to a particular bank, if it so desires.

Mr. McFADDEN. I think the gentleman is right. I do not think but what this bill is in proper form and is constitutional, and I desire to submit here a statement on this particular point, prepared by Thomas B. Paton, a noted New York attorney:

CONSTITUTIONALITY OF NATIONAL BANK PERPETUAL-CHARTER BILLS.

[By Thomas B. Paton.]

Under existing law (U. S. Rev. Stats., sec. 5138) a national bank has power "to have succession for the period of 20 years from its organization" unless sooner dissolved or its franchise is forfeited as provided by law, but it may, with the approval of the Comptroller of the Currency, extend or reextend its corporate existence for further 20-year periods as provided in the extension acts of July 12, 1882, and of April 12, 1902. Under these acts a shareholder not assenting to extension may give notice of withdrawal to the board of directors and is entitled to receive from the bank the value of his shares appraised as therein provided.

Bills are now pending in Senate and House (S. 3255; H. R. 9527), which have the approval of the American Bankers' Association, the Federal Reserve Board, and the Comptroller of the Currency, to amend section 5136 by removing the 20-year limitation and empowering a national bank "to have succession until it shall be dissolved by act of its shareholders owning two-thirds of its stock, unless its franchise shall be forfeited by reason of violation of law, or unless it shall be terminated by act of Congress hereinafter enacted." These bills, which have been favorably reported from the respective Committees on Banking and Currency, repeal "all acts or parts of acts providing for the extension of the period of succession of national banking associations for 20 years" (i. e., acts of July 12, 1882, and of April 12, 1902) and provide that section 5136, as amended, shall apply to existing banks.

A national-bank officer of prominence has questioned the constitutionality of these bills as applied to existing banks and thinks that the proposed law should be changed so as to perpetuate charters as they expire and are renewed. He says:

"Where a stockholder has put in his money for a 20-year period and that period is approaching its completion and he decides to withdraw his funds at the end of the time, I do not believe a law would be constitutional which would deprive him of this right."

This raises a question which is worthy of consideration. The fifth amendment of the Federal Constitution, which provides that no person shall be "deprived of life, liberty, or property without due process of law," secures the individual against any action of the Federal Government divesting vested right, and the question arises whether the provision of the pending bills, making the law applicable to existing banks, would deprive any nonassenting shareholder of a vested right guaranteed him by the Federal Constitution.

The right of a shareholder to withdraw when a national bank reaches the end of its 20-year period of existence, while a right conferred by the existing law does not accrue until certificate of approval of extension has been made by the Comptroller of the Currency and until such time it is rather in the nature of a contingent or expectant than a vested right. The occasion for its exercise may never arise. The bank may not avail itself of the privilege of extension but by vote of the requisite number of its shareholders may go into voluntary liquidation; or before the 20-year period has elapsed there is always the contingency that the bank may be placed in the hands of a receiver or that its charter may be forfeited for some violation of law.

"A right can not be considered a vested right unless it is something more than such a mere expectancy as may be based upon an anticipated continuance of the present general laws; it must have become a title, legal or equitable, to the present or future enjoyment of property." (Cooley, Const. Lim. quoted in Stratton v. Morris, 89 Tenn. 497, 516.)

It is a well-established rule of law that any right conferred by statute may be taken away by statute before it has become vested, in which event the constitutional guaranty is not violated. The decided cases afford numerous illustrations of this.

In Pearsall v. Great Northern Railway Co. (161 U. S. 646) where a railroad was granted by the State of Minnesota the general power to consolidate with, purchase, lease, or acquire the stock of other roads, it was held by the Supreme Court of the United States that a subsequent enactment taking away such power before it had been executed, in cases where such other roads were parallel or competing, did not impair any vested right.

In Black v. State, 59 So. (Ala.) 523, a statute provided that witness fees unclaimed for more than two years should be paid into the State treasury and be transferred to the general fund of the State. A subsequent statute made the county treasurer custodian of unclaimed fees and the general county fund the ultimate beneficiary. It was contended

certain witness fees collected by court clerks, and which should have been and were not paid over to the State before the passage of the later act, belonged to the State. But the court held that the later act governed, saying:

"It is a general rule that when a statute is repealed it stands as if it had never existed, unless as to vested rights which have accrued under its operation. Under the act of 1909 the State had acquired no vested rights in the fees in question. Doubtless it had prior to the act of 1911 right to compel respondent to report and pay them over to the State treasurer as their appointed custodian, but except as it had been already executed the influence and operation of the act of 1909 was completely nullified by its repeal in 1911. The legislature has full power to take away by statute rights, not vested, which have been conferred by statute."

In Jackson Hill Coal and Coke Co. *v.* Board of Commissioners, 104 N. E. (Ind.) 497, the court said: "Any rights bestowed by legislation can be taken away, except such as affect vested interests in real or personal property," citing numerous cases.

In this case an act was passed by the Legislature of Indiana which permitted taxpayers to recover taxes erroneously assessed. At the time this act was passed the right to recover such taxes was barred by a former statute of limitation. It was held no vested right was violated.

In Adams *v.* Iten Biscuit Co., 162 Pac. (Okla.) 938, the workmen's compensation law was held constitutional, although it took away the employee's common-law right of action for damages and substituted compensation according to the act. The court said:

"It may be safely stated as a general rule that the citizen has no property in a rule of law, and that while rights which have accrued to him under the operation of existing laws and have thereby become vested may not be taken away by a change of the rules, he can not be heard to complain if the rule is changed before any rights have accrued to him thereunder."

In Hinckley *v.* Schwarzschild & Co. (107 App. Div. 470, 86 N. E. 1125), the statute of New York at the time a corporation was organized authorized corporations to issue preferred stock by unanimous consent of stockholders. Under this any single stockholder had the right to prevent the issue of preferred stock by objecting. Later the law was amended to authorize issue of preferred stock by consent of two-thirds of stockholders. It was held this was within the reserved power of the legislature to alter the charter of a corporation and did not interfere with vested rights.

The foregoing authorities and the principle upon which they are based point to the conclusion that the bills pending in Congress to grant succession to national banks, as therein provided, do not, in their application to existing banks, deprive nonassenting shareholders of any vested rights guaranteed by the Federal Constitution. As soon as one of these bills becomes law national banks now existing will have succession according to its provisions and will not at the end of 20 years from the time when they were originally created or their charters were reextended be required to take any action for extension of charter. Such shareholders who at the end of the 20-year period might otherwise have been unwilling to consent to an extension and have exercised the right to withdraw and receive payment for their stock at an appraised value will no longer have this right, and as such right will have never become vested they will not be deprived of any right of property guaranteed by the Federal Constitution.

Mr. BEGG. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. BEGG. Is there anything in the way of protection afforded to patrons of a bank by having a termination other than the right to refuse a new charter if they have not lived up to the letter of the law?

Mr. McFADDEN. I do not consider that there is. The Comptroller of the Currency in answer to that question said that there was no advantage in having these 20-year expirations, so far as the management of their institutions is concerned. The law assumes that it is the function of the comptroller to see to it that the banks are always in prime condition. Some people have argued that perhaps this 20-year limitation gave the opportunity to the comptroller to force the banks to clean up things that had been criticized before granting a renewal of the charter.

Mr. BEGG. There is a good deal of inconvenience to the bank in getting a renewal, is there not?

Mr. McFADDEN. Yes; there is sometimes.

Mr. BEGG. There is no forfeiture of the right of the Government to close the bank if the bank does not comply with the law?

Mr. McFADDEN. No.

Mr. BEGG. The Government has sanctioned a permanent charter in the case of the stock land banks and the Federal reserve banks, has it not?

Mr. McFADDEN. I think so.

Mr. BEGG. I can not see any reason why the national banks should not be given the same basis.

Mr. COOPER of Wisconsin. I want to ask the chairman of the committee a question for information. I notice in the report of the committee the statement that—

the request was made for a longer term of charter, or preferably for a perpetual charter.

Mr. McFADDEN. Yes.

Mr. COOPER of Wisconsin. Who made the request originally for the longer term, and for how long a term was the original request made?

Mr. McFADDEN. I regret to say that I did not look up that proposition, but I suppose it was during the discussion in Congress.

Mr. COOPER of Wisconsin. It would look as if the original request of the banks—I assume for a longer term than 20 years or for a perpetual charter, and I was curious to know for how long a term they first asked.

Mr. McFADDEN. I tried to make it clear that the demand would not have arisen at this time had it not been for the Federal reserve act giving the banks the right to act in a fiduciary capacity.

Mr. LAWRENCE. Will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. LAWRENCE. I want to say in answer to the gentleman from Wisconsin that at the hearings I asked the Comptroller of the Currency if there was any objection to extending the charters for 50 years instead of 20 years, and the comptroller said he would rather have it without limit.

Mr. COOPER of Wisconsin. Who made the request for the perpetual charter?

Mr. LAWRENCE. I suppose the banks, through the comptroller.

Mr. COOPER of Wisconsin. The language at the end of the first page and top of the second page, "unless its franchise shall become forfeited by reason of violation of law or unless it shall be terminated by act of Congress hereinafter enacted," provides only for an absolute termination of the charter and not in any way for altering or amending it, which is the customary language of such reservations.

Mr. McFADDEN. I think the gentleman is right.

Mr. COOPER of Wisconsin. So the charter would have to be absolutely terminated, otherwise it must continue with the existing provisions.

Mr. McFADDEN. This is a proposition to continue the charters, and it does not affect the other provisions of the law.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. WILLIAMSON. In line 1, page 2, it says "by act of Congress hereinafter enacted." Would it not be better to use the words "hereafter enacted"?

Mr. McFADDEN. Perhaps it would be better.

Mr. HILL. Will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. HILL. I want to ask the gentleman reporting the bill in reference to the same clause of the bill which the gentleman from Wisconsin inquired about. I know that the national banks in Baltimore are somewhat hampered by the fact that the life of their charter is short. Personally I am in favor of taking away that limitation. But I want to ask this question. Should we change the Federal banking system there can be a new charter imposed, and this provision as to the termination of the charter does not give Congress the right to do anything in the way of amending, but it must absolutely terminate the charter. I want to ask if it would not be better to say "unless it shall be terminated or modified"?

Mr. COOPER of Wisconsin. Or amended.

Mr. HILL. Yes; terminated or amended.

Mr. McFADDEN. The gentleman is a lawyer and the gentleman in charge of the bill is not. I want to say that the bill has been looked over carefully by the counsel for the Treasury Department and the representative of the national banks, and I have an opinion on the subject which seems to bring it within the Constitution and the questions that gentlemen have raised.

Mr. HILL. I want to say that I am in favor of removing the limit, but I think Congress should reserve the right to alter or amend, to continue the banking system.

Mr. LAWRENCE. In section 14 of the act of 1882, which is not repealed by this act, it provides that Congress may at any time amend, alter, or repeal the act to which this is amendatory.

Mr. HILL. I understand from the gentleman, then, that this is covered by other provisions of the banking act.

Mr. LAWRENCE. Yes, section 14 of the extension act of 1882, which is not repealed in this bill, provides that Congress may at any time amend, alter, or repeal this act and acts of which it is amendatory.

Mr. COOPER of Wisconsin. But if the gentleman will look at section 2 of the pending bill he will see this language—

All acts or parts of acts provided for the extension of the period of session of national banking associations for 20 years are hereby repealed.

Therefore, if this bill shall become law it will repeal everything that is in conflict with its provisions.

Mr. WINGO. Will the gentleman yield?

Mr. McFADDEN. I will yield to the gentleman.

Mr. WINGO. I want to call the gentleman's attention to the fact that the act of 1882 repealed subsection 2 of the act of

1864. Now you propose by this bill to reinstate subsection 2 of the act of 1864, and we repeal the act of 1882 both by implication and special provision. The proponents of the bill say that you ought to take away the power of Congress so that you will have some stability. I will say that it is intentional to put it beyond the power of Congress except in special cases.

Mr. COOPER of Wisconsin. I would like to ask the gentleman from Arkansas a question.

Mr. McFADDEN. I yield.

Mr. COOPER of Wisconsin. I would like to ask if he knows of any national charter granted since the decision in the Dartmouth College case which has not contained in express terms some reservation that Congress may repeal, alter, or amend the charter?

Mr. WINGO. Certainly; but this is intentional to leave all that out of this bill.

Mr. STEVENSON. Mr. Speaker, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. STEVENSON. I want to direct the attention of the gentlemen who are raising that question, especially the Dartmouth College question, to the fact that that is by force of a section of the Federal Constitution which prohibits a State from interfering with or impairing the obligations of a contract. There is no provision of the Federal Constitution which prohibits Congress at any time repealing or impairing the obligations of a contract or of a charter which it has granted, and the Supreme Court has so held.

Mr. COOPER of Wisconsin. Nobody questioned the authority of Congress to grant a perpetual charter, but since the decision in the Dartmouth College case Congress has taken especial pains as a matter of public policy not to grant perpetual charters, and all the States have likewise since that decision inserted in their respective constitutions a provision making it impossible for them to grant charters except subject to the right to alter, amend, or repeal. Congress has refrained from granting perpetual charters not because it has not under the Constitution the authority, but because on grounds of public policy it ought not to exercise the authority.

Mr. STEVENSON. But the question that is being raised is whether Congress, if it did not say a word about granting these charters or repealing them, could do it. Congress could repeal them any time it wanted to. There is nothing to prevent it, but a State which has granted a charter without reserving those rights has entered into a contract which, under the Dartmouth College case and under the Federal Constitution, can not be impaired by the States, and therefore the States were obliged to put those provisions in their constitutions.

Mr. WALSH. Mr. Speaker, will the gentleman from South Carolina yield?

Mr. STEVENSON. If I have the floor, yes.

Mr. WALSH. What right exists under the present law, if this amendment be adopted, to cancel the charter of any national bank?

Mr. STEVENSON. The right is preserved under this bill that we have before us.

Mr. WALSH. I am not asking about this bill. I mean without act of Congress.

Mr. STEVENSON. There is the right to forfeit the charter if the bank violates the law.

Mr. WALSH. Who does that?

Mr. STEVENSON. The Comptroller of the Currency, which is a proceeding whereby the bank is put into the hands of a receiver and wound up.

Mr. WINGO. But that is the matter of court procedure.

Mr. STEVENSON. Yes.

Mr. HILL. Mr. Speaker, will the gentleman from Pennsylvania yield to me?

Mr. McFADDEN. Yes.

Mr. HILL. Under the second clause of this bill there are several ways of terminating the succession; one, by voluntary dissolution; two, by reason of forfeiture by violation of law; three, by congressional reservation of termination of the charter.

I would like to ask the gentleman if the word "termination," in his opinion, includes the power of amendment? I should suppose it might. If you can terminate a charter, you have a right to insist that a charter be accepted of a certain sort. Would there be any objection to putting in after the word "termination" the words "or amendment"?

Mr. McFADDEN. Where they assume these trusts in perpetuity, I think that would be a breach of faith, which would not be proper. I think the gentleman from Arkansas [Mr. WINGO] made it quite clear in regard to this matter, that this is understood to be a restriction.

Mr. HILL. That would be a definite termination, and not a modification.

Mr. McFADDEN. I should think so.

Mr. HILL. I think it is well to have that clear, because the question is likely to undergo judicial inquiry later on.

Mr. MILLSPAUGH. Mr. Speaker, as a matter of fact, have not some comptrollers of the past exercised their arbitrary power over a national bank which seeks the renewal of its charter to hold up the charter until probably the day before the new charter was necessary, and by so doing forced the bank to put some arbitrary regulation in its by-laws to the detriment of the bank and to the great expense and detriment of the community?

Mr. McFADDEN. The gentleman is correct in that. There have been instances of that kind.

Mr. MILLSPAUGH. I know of one case in Illinois that happened within the past three years, where the Comptroller of the Currency held up a bank with assets of over a million dollars until the day before the charter expired, forcing the bank to put a provision in its by-laws to satisfy his personal whim. That is a very dangerous power to lodge in a Comptroller of the Currency.

Mr. McFADDEN. The gentleman is correct about that. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has 32 minutes.

Mr. McFADDEN. Does the gentleman from Arkansas desire to use some time now?

Mr. WINGO. Yes.

Mr. McFADDEN. I reserve the remainder of my time.

The SPEAKER. Does the gentleman yield the floor?

Mr. McFADDEN. How much time does the gentleman from Arkansas want?

Mr. WINGO. I was going to ask for an hour in opposition to the bill.

The SPEAKER. Of course, if the gentleman yields the floor, the Chair will recognize the gentleman from Arkansas.

Mr. WINGO. It was the understanding that we were to have an hour on a side.

Mr. McFADDEN. I want to expedite the consideration of this bill, if I can. We have two or three other bills here, and if the gentleman can get along with less I would be very glad to be generous in yielding him time.

Mr. WINGO. But the gentleman understands that we were proceeding upon the theory that we would have an hour on a side. The gentleman knows that I promised one gentleman 30 minutes and he promised him 15. That would give me only a very little time to explain my objection.

Mr. McFADDEN. It was my understanding that there would be an hour on this bill.

Mr. WINGO. Oh, no; it was the understanding that there was to be an hour on a side.

Mr. McFADDEN. I do not want to break faith with the gentleman.

Mr. WINGO. Mr. Speaker, I want the gentleman to retain control of the floor, but at the same time I want to control one hour in opposition to the bill in debate. I ask unanimous consent that the time for debate be extended so that the total debate shall be two hours, of which the gentleman will yield me one hour, and that will give him control of the floor.

The SPEAKER. The same result is accomplished by the statement the gentleman has already made.

Mr. WINGO. The Chair will appreciate the situation. I do not want to take advantage of the parliamentary situation. I shall offer a motion to recommit and make my fight on that line and not try to take the floor away from the gentleman for the purpose of amendment.

Mr. McFADDEN. Mr. Speaker, under the circumstances I ask unanimous consent that the gentleman from Arkansas be permitted to have one hour.

Mr. WALSH. Well——

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that debate be extended one hour.

Mr. WALSH. Mr. Speaker, reserving the right to object, is there going to be any opportunity or any desire to offer an amendment to this bill? Does the gentleman from Pennsylvania expect to permit any amendments?

Mr. McFADDEN. I prefer not to have any amendment to it. It has been carefully considered by the committee.

Mr. WALSH. If that is true the gentleman from Pennsylvania had better use his time or yield the floor or move the previous question, rather than extend the debate an hour. I think the gentleman should exercise his choice. I object to extending the debate an hour.

Mr. McFADDEN. If the gentleman will get along with an hour's time I am willing to yield him 30 minutes and an additional 30 minutes will give him an hour; but there are other bills coming up, and I think we can arrange the time satisfactorily.

Mr. WINGO. I fear the gentleman is laboring under a misapprehension as to the parliamentary situation, of which I do not want to take any advantage. As I understand, the gentleman has 32 minutes. If he does not move the previous question on this bill, he will lose control of the floor, and I want him to be advised. I would like to have an hour, but if the gentleman will give me 30 minutes that will still leave him two minutes to move the previous question. Of course, that will interfere with the agreement I have with some other gentlemen.

Mr. McFADDEN. How much time have I remaining?

The SPEAKER. Thirty-two minutes.

Mr. McFADDEN. I will yield the gentleman 30 minutes.

Mr. WINGO. Mr. Speaker, I hope the lawyers of the House will read this bill. Some of the gentlemen who are enthusiastically in favor of it are not lawyers, and I am charitable to think of them that if they were they would not be in favor of it aside from the general policy. Now, in reference to the construction as to the word perpetuity, my friend from South Carolina said that it is not a perpetual charter, which is a fact; it is a continuous charter; but what is the difference? Take the matter of terminating the charter by a law. Of course, the limitation that has been referred to in the Constitution is a limitation upon the States, but I challenge any lawyer to contradict this proposition that, when Congress grants a charter of this kind and provides in the charter granted the terms and conditions under which Congress will exercise its power to terminate, Congress will protect the holders of the charter, and that Congress can not come in and terminate it in any other way, manner, or condition.

Mr. STEVENSON. Will the gentleman yield before going further? But when Congress provides that Congress can terminate it by its own act, it retains the right over the court or anybody else to terminate.

Mr. WINGO. I am glad the gentleman called attention to that. I am familiar with this fight. It is part of the fight for the branch bank system and further to drive the State banks out of existence. It is not new. The first entering wedge was in giving the fiduciary power to national banks. No man who knows anything about the philosophy of banking could try to defend it. The gentleman says that Congress reserves the right to terminate. Now, notice the peculiar language of this bill. I made the statement advisedly that this language was carefully drawn for certain specific purposes, and it will give stability and permanency to the charter, so there will be no question as to fiduciary powers. It says:

Unless its franchise shall become forfeited by reason of violation of law or unless it shall be terminated—

That is, the charter of each institution—

terminated by act of Congress hereinafter enacted.

There are just two methods by which Congress can amend this charter under the decision of the court, because you have undertaken to limit by the grant itself the future exercise of your unlimited authority or of a future Congress, and you specifically covenant with these charter holders to grant a perpetual charter subject to two reservations, one of which says "by reason of violation of law." That sounds very nice.

Gentlemen, any lawyer who has had any experience at all can give the comptroller a run for his money if he seeks to take away the charter of a national bank. I will not call names, but there are men who know there was a Member of Congress who charged a former Comptroller of the Currency with trying to drive him out of business and trying to close his bank, and they were bitter enemies. One Member of this House charged that John Skelton Williams was trying to drive him out of business and close his bank, and even with those bitter feelings he could not even close the doors or put the bank in the hands of a receiver or get grounds on which he could refuse an extension of charter.

Mr. WILLIAMSON. If I understood the gentleman correctly, you stated that under this bill national banks might establish branch banks?

Mr. WINGO. No. This is a part of the scheme to establish the branch-bank system in the United States. I was talking about another proposition. Certainly these banks ought not to be haled up by the power of one man. The Comptroller of the Currency has not that power now. He has got to go into court and have a judicial determination.

What is the other provision? Unless the charter of each bank shall be terminated by the action of Congress. It is the intention of those back of this, confessedly, to give national banks such a permanency that they can compete with State banks as trustees, acting in a fiduciary capacity, and they could not have that permanently unless you have the law say that if you want to terminate the charter of the First National Bank of Boston you would have to introduce a special bill in Congress, not by repeal or general amendment.

Mr. WALSH. What would be the effect if Congress should repeal the whole act? Would not that terminate all of these charters?

Mr. WINGO. Congress has unquestionably the unlimited power to repeal, alter, or amend, except as some men are afraid, under decisions of the Supreme Court, it would assume that it has the unlimited power, and, having the unlimited power, it can by its own act restrict the exercise of that power; it can covenant with people who put up property, and therefore obtain what the courts have determined to be vested rights, and Congress by that act has covenanted with these incorporators that put money in that "We will give you perpetual succession, subject only to certain restrictions by Congress." One is that you forfeit your charter by violation of law, and another is that Congress can take up and repeal by special act the charter of any particular bank.

Mr. NEWTON of Minnesota. The gentleman admits, then, that Congress under this would have the right to terminate a charter of a bank in a specific act?

Mr. WINGO. Does the gentleman think that would be worth anything to the public?

Mr. NEWTON of Minnesota. Does not the gentleman agree that that right is within the proposition as proposed in the act, that one charter or a dozen charters might be described in the same act, and therefore——

Mr. WINGO. There must be a specific termination. Is it worth anything?

Mr. NEWTON of Minnesota. It is worth a good deal.

Mr. WINGO. Let us see what it would mean. As I told one of the gentlemen, I think it will do you more harm than good, because of this: Say that some Member of Congress should become politically opposed by a national bank in his district, and there would be a bitter feeling between them, as I have known in some instances.

I know a bank that was closed once in my district, a national bank, and I had plenty of ground on which I could have driven that bank to the wall and terminated its charter if this had been the law. That would have been a local bill like a bridge bill. It is ridiculous to talk about that. Here is what you ought to do. You ought to put in this act the customary provision that was in both of the other acts, the right of modification or repeal. We will take the act of 1882, which reads "or unless hereafter modified or repealed."

But I want to get to another proposition.

Mr. WALSH. Is not the final sentence in the act of 1882 a reservation of the right to alter, amend, or repeal?

Mr. WINGO. I think it is "modify or repeal." I think one other uses the language the gentleman suggests. But the act of 1882 says "modify or repeal."

Mr. MOORE of Virginia. Will the gentleman yield?

Mr. WINGO. I can not just now.

Now, the gentlemen have stated that there have been reasons given for this bill, and one is that Congress in a misguided moment granted fiduciary powers to national banks. The other is that the 21 States named now give perpetual charters to State banks. What was the argument when you passed the fiduciary bill? Its opponents admit that it was ridiculous to talk about a commercial bank acting as trustee. The gentleman from Massachusetts [Mr. LUCE] said that one of his judges had ruled that they would have to give security. If I had any interest in a trust and a demand deposit, commercial bank sought to act as trustee, I would insist on its giving some security.

Mr. LUCE. How would the gentleman discriminate between the situation of a State bank and a national bank, side by side, doing similar business?

Mr. WINGO. I do not discriminate. Because the States have done an unwise and unsound thing is no argument why the National Government should compete with them and enter into the same mad race. That is the argument. In justification of this bill it is contended that 21 States now grant perpetual charters to State banks. I challenge that statement. Arkansas is listed in the report. The gentleman finds no limitation in the banking law of the State, but he fails to take the restriction on the granting of charters to all the corporations of the State. That is true of a few other States mentioned in the list. Even if it were true, shall you inflict upon the remaining 27 States

of this Union an unsound and unwise policy because the legislatures of the other 21 States have embarked upon an unsound policy?

Why the pressure? They want to drive the State banks out of business. I say that there is room for both. It is a matter for the people of the community to determine whether they will take a State or national charter. I am in favor of keeping them on an equality, but an equality of banking. There is one State that permits a State bank under its charter to run everything from a sawmill to a boarding house, and if you follow that theory you would see that because a State bank should operate a sawmill you should give that same power to a national bank in order to compete with it. Will you say that you will permit a national bank to engage in certain business because State banks do so?

Mr. WALSH. What is the objection to permitting either a State or national bank, both of which are under strict supervision and examination, from acting in a fiduciary capacity? Or is the gentleman opposed to any banking institution acting in such capacity?

Mr. WINGO. Oh, no. That would make a long discussion, and I would suggest this to the gentleman, that there was a reason why practical business men sought to organize trust companies as distinguished from demand deposit banks. One is real investment banking. There are two or three clearly defined branches of banking, each one controlled by a different philosophy. One is a commercial bank, as you know—demand deposits. It has to keep its assets liquid, because the depositors may come in on any day and demand all the cash. Then there is the savings bank. You know what it is. Then there is that other great banking institution, the trust company—investment banking pure and simple. It and it alone ought to be permitted as a banking institution to act in a fiduciary capacity. I would not own stock—I would own stock, but I would not act as a director—in a commercial bank or a State bank that acted in a fiduciary capacity.

Mr. WALSH. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. WALSH. Do not most of the trust companies carry on an ordinary banking business, having funds subject to demand?

Mr. WINGO. Yes; to an incidental extent. But there is quite a difference in their privileges and their rights under the law. That is so, for instance, in the case of a savings bank.

Mr. WALSH. Do they not carry on an ordinary banking business, having funds on deposit subject to check?

Mr. WINGO. Yes; incidentally.

Mr. WALSH. If they act in a fiduciary capacity, carrying on that kind of business, why should not the national banks do the same kind of business?

Mr. WINGO. It is the difference between the investment bank, dealing with long-term securities, and the commercial bank, dealing with short-term securities; a bank that has got to meet demands at all times for cash.

Mr. WALSH. Is not a national bank considered as an investment bank?

Mr. WINGO. No. A national bank is a purely commercial bank. It is restricted as to the kinds of securities in which it can invest its funds in a great many instances.

Mr. FAIRFIELD. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. FAIRFIELD. Is it not in the very nature of things impossible for a bank to carry on this dual process—that is, comply with the law in a fiduciary capacity and at the same time hold funds that will permit it under the law, with inspection, to do an ordinary commercial banking business?

Mr. WINGO. Yes; I agree with the gentleman. I never have been able to find out how any man who knew anything about banking would want to permit a commercial banking business to act in a fiduciary capacity.

Mr. FAIRFIELD. They do in the State of Indiana.

Mr. WINGO. I know they do in some States.

Mr. FAIRFIELD. I was just wondering if there is anything in the nature of banking that would make it impossible, under proper restrictions, for a bank to act in a fiduciary capacity and at the same time conduct an ordinary mercantile bank?

Mr. WINGO. I am talking about the wisdom of it from the standpoint of good banking. Of course you can do it, and you are permitting them to do it; but I am talking about the wisdom of doing it. In doing it you are playing with fire. Instead of scrambling the banking institutions of America in this manner we ought to insist that each one of them should keep within its separate field.

Mr. WALSH. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. WALSH. Does the gentleman know of any abuses or misfortunes that have occurred by reason of permitting these banking institutions to engage in fiduciary business?

Mr. WINGO. I know of one in one city about which I am very much disturbed.

Mr. WALSH. Have the stockholders or the beneficiaries suffered on account of it?

Mr. WINGO. If the gentleman knew much about banking conditions, he would know that they are skating on thin ice in many parts of the country. I happen to be interested in a friendly way in a trust, a State bank that is acting in a fiduciary capacity.

Mr. WALSH. Is not the danger of loss or misfortune just as great from the purchase of long-time securities, such as the gentleman from Arkansas has mentioned as being a common practice in the case of trust companies and institutions of like character?

Mr. WINGO. No; I think not. I think if a man will study the standard works on banking he will find this to be true, that the very reason why we refer to certain paper as being "frozen" paper is not alone because it has long maturity but because of the fact that the longer a piece of paper has to run as a banking proposition, where it is not bottomed on permanent investment, the security is liable to deteriorate.

A short-time commercial bank keeps its business in short paper, first, because of the demand deposits, and the next reason is that they are doing a commercial business, and a man may be doing a great business to-day which six months from now he would not be doing; and changes take place in commercial conditions which are very great, and the current of business may shift from one locality to another; and there may be a seasonal failure of crops in a community that would affect a short-term note, commercial paper; whereas when a trust company or a savings bank goes to invest in stocks and bonds in most of the States they are limited to specific securities that are declared to be eligible for investment for savings banks and trust companies. Those are the gilt-edge securities that are shown to be sound through a series of years, which have back of them assets of a permanent character that will give them a degree of permanency and solidity that will make them a sound and safe investment.

Mr. GRAHAM of Illinois. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Certainly.

Mr. GRAHAM of Illinois. I notice that there are a number of States quoted in the report which issue unlimited charters to State banking institutions, and it is stated in the report that the duration of charters is unlimited in 21 States of the Union. Now, take the State of Missouri, which is not mentioned. I assume that in Missouri there is a limitation on the length of the charter of a State bank.

Mr. WINGO. Surely.

Mr. GRAHAM of Illinois. Now, suppose the national banks are given an unlimited tenure of life. What effect will that have on the State banks with which they come in competition?

Mr. WINGO. Mr. Speaker, how much time have I left?

The SPEAKER. The gentleman has eight minutes remaining.

Mr. GRAHAM of Illinois. I do not want to take up much of the gentleman's time, but it seems to me it would have a deleterious effect.

Mr. WINGO. No; it would not have a deleterious effect for length of charter does not control. Here you are not considering what is sound, but you are entering into a mad race with State banks. Because 21 States have permitted State banks to do this, you propose to put national banks on an exact footing with a State bank, so that they can increase their profits by doing a fiduciary business. The fact is they can make profits in selling potatoes, or in engaging in life insurance, or in fire insurance; but I say that a national bank established as a commercial bank with demand deposits, ought to be held down to that. The States are waking up to that. I predict that the next State legislatures in 1923 and 1924 will change the law in the respect the gentleman mentions in many cases. The truth is, if you had a fair, square vote in the Bankers' Association on this question, they would say to the States, "You people must remedy the evil instead of asking Congress to permit national banks to engage in a similar practice." But be that as it may, I think we ought to reenact the statute of 1902, which simply provides that the national bank charters may be extended another 20 years.

The gentleman from Pennsylvania [Mr. MCFADDEN] said a lot of them would expire on July 1, or all of them possibly. Is that what the gentleman said?

Mr. McFADDEN. Oh, no; the gentleman misunderstood me.

Mr. WINGO. What was it the gentleman said about July 1?

Mr. McFADDEN. Some of the charters will expire at that time. I know the gentleman argues that if they made their application beforehand they would get an extension.

Mr. WINGO. Yes; they have had two years, every bank whose charter expires. Of course, the gentleman is wrong on his dates. Technically he may be right with regard to some bank that had its charter renewed after the act of April 12, 1902, but on July 1 any bank whose charter will then expire has had two years to apply for a renewal.

The comptroller issued charters last month. Those banks have charters running 20 years. It simply means this, and I think the gentleman's contention may be well taken about that, that those whose charters expire after April 12—not July 1—might not have the right to a further extension unless authorized by Congress. What I say is that we ought to enact a statute which instead of reviving subsection 2 of the act of 1864 would contain the same identical language as the act which was passed in 1902, giving the Comptroller of the Currency, under existing limitations, the right to give them a further extension of 20 years. Under the national banking laws they have prospered and become a great banking system. They have already had two extensions. It would be easy to obtain another. The only reason they want this change so as to give them charters in perpetuity is in order that they may act in a fiduciary capacity. Another argument made is that you ought to give them perpetual charters, because that will give them a better standing and credit. That is absurd. But gentlemen may say, Why object to their having a perpetual charter? What is the objection to that? The man who instinctively is not opposed to the idea of giving a perpetual charter to a banking corporation is a man on whom it is no use to waste your time to reason with him. You are giving to that corporation a powerful charter, a charter with wonderful privileges, and you propose to breathe into that corporate charter and into that corporate existence an eternal soul that never dies. Men may come and men may go and their estates be wound up, but whenever you once give these national banks a perpetual charter you are giving to them something which man does not possess, and that is an immortality to their bodily being and corporate existence. There is no use in trying to reason with a man to whose spirit that is not revolting. If you want arguments on this subject, go and read the debates in Congress when the first national banking act of 1864 was enacted. Go and read the debates in 1882 when this question was up again. Go and read the debates in 1902 when there was plenty of time to discuss the question and plenty of time to amend.

You will find there the records of past Congresses replete with arguments from both Republicans and Democrats. And, strange to say, in 1864 the strongest arguments against perpetual charters came from the Republican side of the Chamber, whereas before that, in the days of Andrew Jackson, the fight upon bank charters had been made by Democrats. The Republican Party up to this time has maintained on this question a policy of deliberate opposition to perpetual charters for national banks. The Republican Party twice before when it was in power has refused to give the banks perpetual charters. You have the votes to-day, so that you can do it; but if you are going to do it I beg of you reserve the unlimited right to alter, amend, or repeal. Do not say, as you do in this act deliberately, that Congress will exercise its power in only two ways; that would be absurd.

Mr. BURTON. Will the gentleman yield for a question?

Mr. WINGO. I yield to the gentleman from Ohio.

Mr. BURTON. Does not the act of 1882 pertaining to national banks give the right to alter, amend, or repeal in the most unlimited terms?

Mr. WINGO. Yes; and that is the thing I want here.

Mr. BURTON. But that is general, pertaining to the whole banking system.

Mr. WINGO. Yes.

Mr. BURTON. May I ask the gentleman a further question?

Mr. WINGO. But before we get away from that, this bill specifically repeals that.

Mr. BURTON. I do not think so. That is a general provision pertaining to all banks. I think the gentleman read the wrong provision in regard to that. It is a singular fact that in the original act creating national banks there was not a general provision authorizing Congress to alter, amend, or repeal. I had occasion to look that up some years ago. But just at the end of the act of 1882——

Mr. WINGO. There is no dispute about that, and I have only a moment left.

Mr. BURTON. It provided that Congress may at any time alter, amend, or repeal this act and the acts to which this is amendatory. That gives the broadest authority to alter, amend, or repeal. I had occasion to look that up some time ago.

Mr. WINGO. Yes; but in 1882, when we specifically took up this question of the extension of charters, we said, "Unless altered, amended, or repealed." In 1902 we passed a provision providing that in the language of the act of 1882 the Comptroller might grant a further extension of 20 years. I am going to offer a motion to recommit which will be practically an exact copy of the act of 1902, except that it will do this, that I will add the words "April 12, 1902," after the words "July, 1882"—that is, in the act of 1902. In other words, have the status continued as it is now for another 20-year period, and I hope gentlemen will vote for that.

Mr. McFADDEN. Mr. Speaker, I yield to the gentleman from New Jersey [Mr. APPLEBY].

Mr. APPLEBY. Mr. Speaker, this bill now under consideration calls for perpetual charters for national banks.

I am offering to you my experience of many years as a director of a State bank. The State of New Jersey grants perpetual and liberal charters to its trust companies as well as to its State banks. Why should national banks operating in that State be placed in a position of having a renewable charter?

If you were going to make a choice between banking institutions as to which one you would select as your executor, you certainly would not decide in favor of an institution having a limited legal life. Only one-third of the national banks are members of the Federal reserve system. There are apparently reasons why more of the banks have not become members of that splendid system. If the passage of this act will cause more banking institutions to become members, I am for this bill. Its enactment into law is fully justified.

Mr. McFADDEN. Mr. Speaker and gentlemen of the House, this is simply a proposition to allow banks to continue during good behavior, to continue in perpetuity, so that they can assume trust conditions given them under the law. There is no preconceived idea of perpetuating branch banks through this system. If there is any such idea I know nothing about it, and I have heard no argument to that effect.

Mr. MOORE of Virginia. Will the gentleman allow me to ask him one question?

Mr. McFADDEN. Yes.

Mr. MOORE of Virginia. The bill provides, and something has been said on that point, that Congress shall have power to terminate charters at any time. Nothing is better settled than that; without any such reservation Congress has power, in its discretion, to repeal or amend any Federal charter.

The SPEAKER. The hour has expired.

Mr. McFADDEN. Mr. Speaker, I move the previous question on the bill and all amendments thereto.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. WINGO. Mr. Speaker, I move to recommit the bill with the following instructions.

The Clerk read as follows:

Mr. WINGO moves to recommit to the Committee on Banking and Currency and report forthwith with an amendment striking out all after the enacting clause and substitute the following:

"That the Comptroller of the Currency is hereby authorized, in the manner provided by, and under the conditions and limitations, the act of July 12, 1882, and of April 12, 1902, to extend for a further period of 20 years the charter of any national banking association extended under said acts which shall desire to continue its existence after expiration of its charter."

Mr. McFADDEN. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion of the gentleman from Arkansas to recommit the bill with instructions.

The question was taken; and on a division (demanded by Mr. WINGO) there were 13 ayes and 46 noes.

Mr. WINGO. Mr. Speaker, I object to the vote on the ground that no quorum is present, and I make the point that no quorum is present.

The SPEAKER. The gentleman from Arkansas makes the point that no quorum is present. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees. All those in favor of the motion to recommit will answer "yea" when their names are called, and all those opposed will answer "nay."

The question was taken, and there were—yeas 65, nays 211, answered "present" 1, not voting 154, as follows:

So the motion to recommit was rejected.

The Clerk announced the following pairs:

Until further notice:

Mr. Snell with Mr. Garrett of Tennessee.
Mr. Treadway with Mr. Cockran.
Mr. Paige with Mr. Sullivan.
Mr. Langley with Mr. Clark of Florida.
Mr. Maloney with Mr. Rayburn.
Mr. Cooper of Ohio with Mr. Kitchin.
Mr. Davis of Minnesota with Mr. Barkley.
Mr. Hukriede with Mr. Overstreet.
Mr. Michaelson with Mr. Cantrill.
Mr. Stiness with Mr. Sears.
Mr. Strong of Pennsylvania with Mr. Drewry.
Mr. A. P. Nelson with Mr. Gallivan.
Mr. Evans with Mr. Tillman.
Mr. Fenn with Mr. Riordan.
Mr. Kearns with Mr. Deal.
Mr. Olpp with Mr. O'Brien.
Mr. Anthony with Mr. Collins.
Mr. Patterson of New Jersey with Mr. Rainey of Illinois.
Mr. Beck with Mr. Tague.
Mr. Taylor of New Jersey with Mr. Driver.
Mr. Mondell with Mr. Hudspeth.
Mr. Layton with Mr. Smithwick.
Mr. Johnson of Washington with Mr. Griffin.
Mr. Snyder with Mr. Martin.
Mr. Dowell with Mr. Taylor of Colorado.
Mr. Dickinson with Mr. Drane.
Mr. Vestel with Mr. Bland of Virginia.
Mr. Ansorge with Mr. Stoll.
Mr. Kennedy with Mr. Fields.
Mr. Atkeson with Mr. Taylor of Arkansas.
Mr. Frothingham with Mr. Cullen.
Mr. Knight with Mr. Brand.
Mr. Goodykoontz with Mr. Kindred.
Mr. Chandler of Oklahoma with Mr. McSwain.
Mr. Graham of Pennsylvania with Mr. Park of Georgia.
Mr. McArthur with Mr. Mansfield.
Mr. Sanders of Indiana with Mr. Kunz.
Mr. Henry with Mr. Jacoway.
Mr. Colton with Mr. Upshaw.
Mr. McPherson with Mr. Rainey of Alabama.

The result of the vote was announced as above recorded.

The doors were opened.

The SPEAKER pro tempore (Mr. MAPES). The question is on the passage of the bill.

The question was taken, and the bill was passed.

On motion of Mr. MCFADDEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. LAWRENCE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the bill just passed.

The SPEAKER pro tempore. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD on the bill just passed. Is there objection?

There was no objection.

Mr. LAWRENCE. Mr. Speaker, the purpose of H. R. 9527 is to remove the time limit on the articles of association of national banks.

The law relating to articles of association, or charters, as passed in 1864 and amended in 1882 and 1902, reads as follows:

> To have succession for the period of 20 years from its organization, unless it is sooner dissolved according to the provisions of its articles of association, or by the act of its shareholders owning two-thirds of its stock, or unless its franchise becomes forfeited by some violation of law.

In recent years there has grown up a great amount of fiduciary business, which is one branch of the banking business, but one which national banks could not handle until, by an amendment passed by Congress in 1918, known as section 611k of the Federal reserve act, the right was conferred on national banks to act as trustee, executor, administrator, register of stocks and bonds, guardian of estates, assignee, receiver, committee of estates of lunatics, and other fiduciary capacity in which State banks and trust companies, which come in competition with national banks, are permitted to act under the laws of that State in which the national bank is located.

It is also provided that a national bank desiring to exercise any of the above powers shall first make application to the Federal Reserve Board, and, if found to comply with the regulations prescribed by State law, such permission may be granted.

The national banks now find themselves handicapped in exercising the powers intended to be conferred by the act of 1918, by reason of the short term of their charters. Many of the States grant continuous charters, and, if a person, firm, or corporation is creating a trust to run for a long term of

years, they will naturally select the bank or trust company whose charter does not terminate within a few years.

The Comptroller of the Currency informed our committee that many of the large national banks were surrendering their charters and taking charters under the State laws, and that this was especially true in the large financial centers of such States as New York, Massachusetts, Pennsylvania, Illinois, Ohio, and New Jersey, where there is no limit in the time of charters. I might say here that about one-half of the States do not limit the charters and about half place a limit, which is usually 50 years, although they vary in different States.

This bill does not in any way relax the supervision of the comptroller or abridge the right to terminate the existence of any national bank for violation of law. This bill would also save the Government a considerable sum of money in the saving of labor; and the Comptroller of the Currency estimates that already there has been lost to the Government the sum of $1,500,000 in paper for bank notes alone, for, as the law now stands, when the charter of a national bank is extended the bank must provide new plates for the printing of currency and all the notes on hand must be destroyed.

It would also save a vast amount in the aggregate to the national banks, not only in the ordinary expense of renewing their charter but the expense of new plates from which currency for the banks is printed.

We do not desire by this bill to give the national banks any advantage over the State banks, but to put them on an equality, for we must remember that the national banks are the backbone of our Federal reserve system, and all national banks are compelled by law to become stockholders in the Federal reserve bank of that district in which they are situated; and when a national bank surrenders its charter for a State charter it is then optional whether or not they remain a member of the Federal reserve system.

There are in the United States, as per statistics published for October 31, 1921, 8,179 national banks, all of them members of the Federal reserve system, and there are more than 22,000 State banks and trust companies doing a banking business. Of these, 1,615 are members of the Federal reserve system, so you may readily see that five-sixths of the member banks are national banks. Many of the State banks are small and not eligible for membership and many others do not become members because they can secure all the benefits through some member banks.

I am not criticizing the State banks. I am only asking that we make the law for national banks as liberal as regards charters as that of the State law, that we may not lose these banks to the Federal reserve system.

When the national bank act was passed, in the sixties, it was passed largely as a war measure to provide a market for Government bonds, and, as this was an experiment on the part of the National Government, there was, perhaps, a reason for the limit of 20 years; but as they have now proven their worth in the financial world for nearly 60 years, there can be no good reason for the limitation. Unless this bill becomes a law, it will be necessary for Congress to provide for the extension of the present law, as was done in 1882 and 1902.

The charters of 519 national banks will expire during the year ending October 31, 1922. It is estimated that it will cost these banks about $130,000 for new plates alone, without taking into account other expenditures, which would perhaps cost these banks more than a quarter of a million dollars. This, we believe, is unnecessary expense and one which will be saved to them if this bill becomes a law.

In closing I would call your attention to the fact that Congress would in no way lessen its control over national banks by the adoption of this bill, as the extension act, July 14, 1882, provides that—

> Congress may at any time amend, alter, or repeal this act and the acts of which it is amendatory.

The Comptroller of the Currency has given this bill his hearty approval.

AMENDMENT TO FEDERAL RESERVE ACT.

Mr. CAMPBELL of Kansas. Mr. Speaker, I submit the following privileged report from the Committee on Rules, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 339 (Rept. No. 1026).

Resolved, That upon the adoption of this resolution it shall be in order for the Committee on Banking and Currency to move that the House resolve itself into Committee of the Whole House on the state of the Union to consider the bill S. 2263, being "An act to amend the Federal reserve act approved December 23, 1913"; that there shall be not to exceed one hour of debate on said bill. At the conclusion of the debate the bill shall be considered for amendment under the five-minute rule, whereupon the bill shall be reported back to the House with amendments, if any, and the previous question shall be considered as ordered on the bill and all amendments thereto to final passage, without intervening motion except one motion to recommit.

Mr. CAMPBELL of Kansas. Mr. Speaker, the rule provides for the consideration of Senate bill 2263, to amend the Federal reserve act approved December 23, 1913, by the appointment of an additional member on the Federal Reserve Board, with the provision that there shall be a member representing agriculture.

Mr. WINGO. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. WINGO. I notice that the rule provides for one hour of general debate.

Mr. CAMPBELL of Kansas. Yes.

Mr. WINGO. Will not the gentleman extend that and make it two hours? The Members who wanted to talk on these general subjects would prefer very much to speak on this bill and not on the other that is yet to be passed.

Mr. CAMPBELL of Kansas. The other bill, as I understand it, provides for a reduction in the number of reports required from national banks?

Mr. WINGO. Yes. It is a different subject entirely from this. I think most of the debate on both sides of a general character would be better made on this bill.

Mr. CAMPBELL of Kansas. Mr. Speaker, as I say, this provides for the consideration of Senate bill 2263. A similar House bill is on the calendar and, of course, will be laid upon the table after this bill is acted upon. The rule as presented provides for one hour of general debate. It is my understanding from members of the Committee on Banking and Currency that they would like to have the time for general debate extended to two hours. I therefore ask unanimous consent to so amend the resolution.

The SPEAKER. The gentleman from Kansas asks unanimous consent to amend the resolution in the manner in which the Clerk will report.

The Clerk read as follows:

> Amend the resolution, page 1, line 7, by striking out the words "one hour" and inserting in lieu thereof the words "two hours."

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question now is on agreeing to the resolution as amended.

The resolution was agreed to.

Mr. McFADDEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 2263) to amend the Federal reserve act, approved December 23, 1913.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill S. 2263, with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 10 of the Federal reserve act, approved December 23, 1913, is amended to read as follows:

SEC. 10. A Federal Reserve Board is hereby created which shall consist of eight members, including the Secretary of the Treasury and the Comptroller of the Currency, who shall be members ex officio, and six members appointed by the President of the United States, by and with the advice and consent of the Senate. In selecting the six appointive members of the Federal Reserve Board, not more than one of whom shall be selected from any one Federal reserve district, the President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographical divisions of the country. The six members of the Federal Reserve Board appointed by the President and confirmed as aforesaid shall devote their entire time to the business of the Federal Reserve Board and shall receive an annual salary of $12,000, payable monthly, together with actual necessary traveling expenses, and the Comptroller of the Currency, as ex officio member of the Federal Reserve Board, shall, in addition to the salary now paid him as Comptroller of the Currency, receive the sum of $7,000 annually for his services as a member of said board.

The Secretary of the Treasury and the Comptroller of the Currency shall be ineligible during the time they are in office and for two years thereafter to hold any office, position, or employment in any member bank. The appointive members of the Federal Reserve Board shall be ineligible during the time they are in office and for two years thereafter to hold any office, position, or employment in any member bank, except that this restriction shall not apply to a member who has served the full term for which he was appointed. Of the six members thus appointed by the President one shall be designated by the President to serve for 2, one for 4, one for 6, one for 8, and the balance of the members for 10 years, and thereafter each member so appointed shall serve for a term of 10 years, unless sooner removed for cause by the President. Of the six persons thus appointed, one shall be designated by the President as governor and one as vice governor of the Federal Reserve Board. The governor of the Federal Reserve Board, subject to its supervision, shall be the active executive officer. The Secretary of the Treasury may assign offices in the Department of the Treasury for the use of the Federal Reserve Board. Each member of the Federal

Reserve Board shall within 15 days after notice of appointment make and subscribe to the oath of office.

The Federal Reserve Board shall have power to levy semiannually upon the Federal reserve banks, in proportion to their capital stock and surplus, an assessment sufficient to pay its estimated expenses and the salaries of its members and employees for the half year succeeding the levying of such assessment, together with any deficit carried forward from the preceding half year.

The first meeting of the Federal Reserve Board shall be held in Washington, D. C., as soon as may be after the passage of this act, at a date to be fixed by the reserve bank organization committee. The Secretary of the Treasury shall be ex officio chairman of the Federal Reserve Board. No member of the Federal Reserve Board shall be an officer or director of any bank, banking institution, trust company, or Federal reserve bank, nor hold stock in any bank, banking institution, or trust company; and before entering upon his duties as a member of the Federal Reserve Board he shall certify under oath to the Secretary of the Treasury that he has complied with this requirement. Whenever a vacancy shall occur, other than by expiration of term, among the six members of the Federal Reserve Board appointed by the President, as above provided, a successor shall be appointed by the President, with the advice and consent of the Senate, to fill such vacancy, and when appointed he shall hold office for the unexpired term of the member whose place he is selected to fill.

The President shall have power to fill all vacancies that may happen on the Federal Reserve Board during the recess of the Senate by granting commissions, which shall expire 30 days after the next session of the Senate convenes.

Nothing in this act contained shall be construed as taking away any powers heretofore vested by law in the Secretary of the Treasury which relate to the supervision, management, and control of the Treasury Department and bureaus under such department, and wherever any power vested by this act in the Federal Reserve Board or the Federal reserve agent appears to conflict with the powers of the Secretary of the Treasury such powers shall be exercised subject to the supervision and control of the Secretary.

The Federal Reserve Board shall annually make a full report of its operations to the Speaker of the House of Representatives, who shall cause the same to be printed for the information of the Congress.

Section 324 of the Revised Statutes of the United States shall be amended so as to read as follows: There shall be in the Department of the Treasury a bureau charged with the execution of all laws passed by Congress relating to the issue and regulation of national currency secured by United States bonds and, under the general supervision of the Federal Reserve Board, of all Federal reserve notes, the chief officer of which bureau shall be called the Comptroller of the Currency, and shall perform his duties under the general directions of the Secretary of the Treasury.

No Federal reserve bank shall have authority hereafter to enter into any contract or contracts for the execution of any building of any kind or character or to authorize the erection of any building in excess of $250,000 without the consent of Congress having previously been given therefor in express terms: *Provided*, That nothing herein shall apply to any building now under construction.

With the following committee amendments:

On page 1, line 6, strike out "eight" and insert "seven."
On page 1, line 8, strike out "six" and insert "five."
On page 1, line 10, strike out "six" and insert "five."
On page 2, line 3, after the word "industrial," strike out the comma and insert "and"; and insert a comma after the word "interests" in same line.
On page 2, line 4, strike out "six" and insert "five."
On page 2, line 23, strike out "six" and insert "five."
On page 2, line 25, strike out the words "the balance of the" and insert "one."
On page 3, line 1, strike out the word "members."
On page 3, line 3, strike out "six" and insert "five."
On page 4, line 8, strike out "six" and insert "five."
On page 4, line 18, strike out the words "30 days after" and insert "with"; at the end of the same line insert a period.
On page 4, line 19, strike out the word "convenes" and the period.
On page 5, commencing with line 20, strike out down to and including line 2, on page 6.

Mr. McFADDEN. Mr. Chairman, this bill was largely drawn on the floor of the Senate. It came into the committee and was given very careful and minute consideration by the committee. Several amendments were made to the bill. The most important amendments were striking out that portion of the bill which provided for an increase in the membership of the Federal Reserve Board to six appointive members. The present law provides for five appointive members. The committee felt that it was not proper to increase the membership of the board at this time. The committee heard members of the Federal Reserve Board, the Secretary of the Treasury, and other interested parties. The other important amendment is on page 4, line 15, which simply makes the law comply with section 2 of the Constitution in respect to vacancies that may happen on the Federal Reserve Board, so that the President shall have power to fill all vacancies that may happen on the Federal Reserve Board during the recess of the Senate by granting commissions which shall expire with the next session of the Senate, instead of 30 days after the Senate convenes.

The other section in the bill which was amended provided a limitation on the amount which the Federal reserve banks shall expend for buildings. The committee struck that section out because of the fact that practically all of the buildings were either constructed or contracts were let for them, that were being built in the United States by the Federal reserve bank and its branches. We felt that to lock the barn after the horse had been stolen was not quite proper, that the matter could be better covered probably if Congress saw fit to do so, by making an investigation into the cost of the buildings, and therefore we struck out that provision in the bill.

Mr. KINCHELOE. Will the gentleman yield?

Mr. McFADDEN. I will yield.

Mr. KINCHELOE. Is this the bill that is supposed to authorize, or rather direct, the President to appoint a farmer as a member of this board?

Mr. McFADDEN. Yes; I will say to the gentleman that on page 2, line 1—

The President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests.

The present law reads:

That he shall have due regard to the industrial and commercial interests.

Mr. KINCHELOE. I was familiar with that.

Mr. McFADDEN. The change we made in this bill is that it adds the word "financial" and the word "agricultural" to that section of the bill.

Mr. KINCHELOE. I want to ask the gentleman if he thinks under that language the President will be compelled to appoint a farmer as a member of this board?

Mr. McFADDEN. I do not; no, sir. I think as far as that feature is concerned it might be all stricken out, because it is simply a suggestion, or as one man has put it, a gesture, to the President, but my understanding is that some gentlemen who are responsible for this special legislation have discussed that matter, and they are practically assured that there will be recognition of a man representing the agricultural interests of the country when the next selection is made.

Mr. KINCHELOE. The President could under this provision appoint a lawyer if he thought it of advantage to and had due regard to agriculture?

Mr. McFADDEN. Certainly; for he is not compelled, as far as this bill is concerned, to appoint a farmer as a member of the Reserve Board.

Mr. KINCHELOE. It is entirely in the hands of the President to appoint whomsoever he sees fit?

Mr. TINCHER. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. TINCHER. In the law as it is now the word "agriculture" does not appear with the several industries that are mentioned in the present law?

Mr. McFADDEN. No; it does not.

Mr. TINCHER. And the number of the board now is five?

Mr. McFADDEN. The appointive members are five, and two ex officio members.

Mr. TINCHER. And this bill by the committee amendment provides for six members of the board?

Mr. McFADDEN. Six. This bill provides for an increase of one appointive member, the inference being that that would permit a representative of the agricultural interests to be appointed.

Mr. TINCHER. I understand that the President and Secretary of Agriculture are perfectly willing to give that recognition to an agriculturist on the board.

Mr. McFADDEN. Well, it has been so stated. I think the Secretary of Agriculture before our committee was willing to increase the membership of the Federal Reserve Board to 15 or 18 men, and I think he so stated.

Mr. TINCHER. It is the understanding that by the increase they will have a representative of agriculture on the board.

Mr. McFADDEN. Governor Harding, I will say to the gentleman, stated before the committee as follows:

Mr. MACGREGOR. I see this act makes no requirement for agriculture, but does for banking and finance.

Governor HARDING. Yes; but there is not occasion to amend the law in order to do that, because there is going to be a vacancy on the Federal Reserve Board in August, my term expiring at that time, and if you leave the law as it is, there is nothing to prevent the President from appointing a farmer. Why do you want to amend the law? I am not speaking from a selfish standpoint at all.

Mr. TINCHER. Is that one place in the testimony that the gentleman has reference to the locking of the barn after the horse is stolen?

Mr. McFADDEN. No; it is not.

Mr. TINCHER. I will suggest to the gentleman who was giving that testimony by his process of deflation as against the agricultural interests that if his term had expired a year ago last the farmers would have been much better off.

Mr. ANDREWS of Nebraska. The year before that.

Mr. LONDON. Is there anything in the existing law to prevent the President from appointing an agriculturist on the board?

Mr. McFADDEN. There is not.

Mr. LONDON. There is nothing in the proposed law that makes it obligatory for the President to appoint an agriculturist?

Mr. McFADDEN. There is not.

Mr. LONDON. Every legislator is supposed to legislate for the interests of the entire people, and every appointee is supposed to act for the entire people. Is not that the theory?

Mr. McFADDEN. It is my theory at any rate.

Mr. LONDON. I do not know that people live up to it, but that is the theory.

Mr. DOWELL. Has the gentleman assurance that the President will appoint a farmer to fill this vacancy?

Mr. McFADDEN. What does the gentleman mean by assurance?

Mr. DOWELL. I mean what it purports to mean.

Mr. McFADDEN. I have just referred to what Governor Harding stated. I will say to the gentleman, what Governor Harding said in the hearing which I just quoted is that if they wanted to have a representative from the agricultural interests on the board the opportunity presents itself when the next vacancy occurs, in August; and I understand it to be perfectly frank. Some Members of Congress have told me that the President proposed to recognize agricultural interests in the selection of the next member to the Federal Reserve Board.

Mr. DOWELL. Will the gentleman state what information he has on the subject?

Mr. McFADDEN. I will say that I have no special information on the subject.

Mr. ANDREWS of Nebraska. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. ANDREWS of Nebraska. Is it generally understood that Governor Harding is seeking a reappointment?

Mr. McFADDEN. It is not.

Mr. ANDREWS of Nebraska. I have been so advised.

Mr. McFADDEN. In fact, he stated here in the hearings quite emphatically that he is not. He might be in worse business, however.

Mr. ANDREWS of Nebraska. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. ANDREWS of Nebraska. If the gentleman can give us that assurance I think that it will have a tendency to quiet a feeling on the part of some Members.

Mr. McFADDEN. I will say to the gentleman, I think it can be reasonably inferred if he wishes that Governor Harding be not reappointed he should vote for the bill as it now is.

Mr. STEVENSON. Referring to the hearings, I will ask if the Secretary of Agriculture [Mr. Wallace] has not expressed himself as being very much in favor of adding a member and increasing the Federal Reserve Board?

Mr. McFADDEN. The Secretary of Agriculture did say that, and I rather gleaned from his statement that he would not object to being appointed himself.

Mr. TINCHER. If he was, agriculture would surely have one representative on the board, and that is more than it has had.

Mr. KING. How can he expect to be appointed or have any ambition along that line when that great farmer Eugene Meyer is looking for the position?

Mr. RAKER. Under the provisions of this bill when the terms of the present officers expire the President appoints new directors?

Mr. McFADDEN. This applies to vacancies that may occur from time to time. Governor Harding is the next member whose term expires, and that will be in next August.

Mr. RAKER. How do you account for the provision in lines 14 to 25, on page 2, in regard to the fixing of terms? These other officers have been there for some time, and when will their terms expire?

Mr. McFADDEN. That is a repetition of the present statute on that, which brings it up to the additional member and providing for his full term of 10 years.

Mr. WINGO. Will the gentleman permit?

Mr. McFADDEN. I will.

Mr. WINGO. The first part of the section provides that section 13 of the Federal reserve act "shall be amended to read as follows." It simply repeats the existing law and with the changes that are made——

Mr. McFADDEN. Providing that the term of each member of the Federal Reserve Board then shall be 10 years.

Mr. WINGO. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. WINGO. Reference was made some time ago to the intention of the President to appoint a dirt farmer. The gentleman says that he had not been definitely informed, but had been told by Members of Congress that he intended to do that when there was a vacancy. The same source could give the information that the President would appoint such a member if you gave him another member.

Mr. McFADDEN. It was a matter of information from the Members of the House. My information did not come direct from the President, but more from men who claimed to have talked with him on the subject. I will say, however, that it seems that it would be a little more sure if the membership of the board was increased. If this was a legitimate demand, and the agricultural interests feel that they want a man on the board, it seems that with this vacancy and with the assurance that some Members claim to have that Governor Harding will not be appointed, and the assurance that the President has given that he would recognize agriculture in his next appointment, it would give them the opportunity to secure what they want without increasing the size of the board.

Mr. WINGO. Does not the gentleman know that nobody has been found who seems to be able to speak with authority for the President, except the general statement that was made on the floor of the Senate and in the press of the country that the Senators who went down and consulted him assured the farmers of this country that if they had no representative on the board they would then get a farmer as a representative? Does not the gentleman know that that is the only——

Mr. McFADDEN. I can not say that. I think the President has given the assurance that he will recognize agriculture. He is in favor of doing it and of helping the agricultural interests, and seeing that they are properly taken care of. I have confidence that he will do the right thing with the agricultural interests.

Mr. TINCHER. The gentleman will concede that if the bill was going to specify any industry in the first place, the word "agriculture" should have been inserted with the other descriptions in the bill?

Mr. McFADDEN. It was the result of a condition that arose at that time, when the bankers felt that this was an institution that they owned and felt they should have been in control of. And it was a compromise, as most legislation is, when it was originally passed, and that designation was put in it. I do not think it has ever had any influence on the judgment of the President as to appointing members to the Federal Reserve Board, whether it was in or whether it was out.

Mr. TINCHER. Are not the people engaged in agricultural sections justified in taking some interest in these matters at this time, by reason of the horrible clamor as to this deflation policy under Governor Harding and what it did to the agricultural interests?

Mr. McFADDEN. I can not agree with the gentleman there. I think agriculture has the right to be interested in all such matters.

Mr. ARENTZ. Is it not possible that if we had had a dirt farmer all these years there would have been seen the necessity of increasing loans from $5,000 to $10,000? Will you tell the committee when the bill is going to come out?

Mr. McFADDEN. The gentleman is referring to loans on mortgages in the farm loan system?

Mr. ARENTZ. To loans on mortgages.

Mr. McFADDEN. That bill has not been considered by the committee of late. The last time it was considered by the Congress it was voted down by quite a large majority on a motion by Representative McLAUGHLIN of Nebraska.

Mr. ARENTZ. Since that time some consideration has been given to it by the committee?

Mr. McFADDEN. There has been none. It may have come up casually during the consideration of rural credit legislation.

Mr. ARENTZ. There is a good deal of feeling by people throughout the country that this sort of a thing would be the proper legislation to pass.

Mr. McFADDEN. It is in the minds of some people, but so long as the farm loan system is selling the tax-exempt securities I do not think it is policy to grant the farm loan system the right to loan rich farmers to the detriment of the small farmers who need the help. I would rather keep 10 small farmers than one or two big farmers who should be able to take care of themselves.

Mr. ARENTZ. I just wanted to get that information from the gentleman from Pennsylvania.

Mr. WALSH. Will the gentleman from Pennsylvania yield?

Mr. McFADDEN. I will.

Mr. WALSH. Has the War Finance Corporation run out of funds and ceased functioning?

Mr. McFADDEN. Not to my knowledge. I think the War Finance Corporation has plenty of funds so long as the Public Treasury has funds. It is really the back door of the Treasury.

Mr. WALSH. And wide open most of the time.

Mr. McFADDEN. They have loaned some $300,000,000 to the farmers. My understanding is now that loans are being repaid

more rapidly than new loans are being made, and we are hoping this afternoon, if possible, to pass that bill, which has been reported out of the committee, permitting the extension of the existence of the War Finance Corporation for another year.

Mr. ANDREWS of Nebraska. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. ANDREWS of Nebraska. Would not the opportunity for securing a suitable representative for agriculture on the board be greater by leaving the bill as it stood—for six appointive members instead of five?

Mr. McFADDEN. You mean as the bill came to our committee, not as amended?

Mr. ANDREWS of Nebraska. Yes.

Mr. McFADDEN. Well, it would give one additional chance.

Mr. ANDREWS of Nebraska. That is what I mean. Are not the agricultural interests of the country really expecting something to be done through this bill?

Mr. McFADDEN. I think that certain leaders of agricultural organizations who claim to represent farmers are very actively engaged in promoting this legislation and securing an increase of the membership of the board.

Mr. ANDREWS of Nebraska. It gives a larger opportunity for securing a member now?

Mr. McFADDEN. Yes; one more chance.

Mr. ANDREWS of Nebraska. What objection is there to that except the objection to increasing the membership of the board?

Mr. McFADDEN. Inasmuch as this comes from a certain class of people, I think it is particularly unfortunate in that respect.

Mr. ANDREWS of Nebraska. In other words, you think that agriculture should not be recognized in dealing with this subject?

Mr. McFADDEN. I think it is not expedient that we should pass class legislation.

Mr. ANDREWS of Nebraska. But you think the bankers should have control of it inasmuch as it relates to banking?

Mr. McFADDEN. The bankers own the stock in it, and therefore they think they should have at least two men on the board who know something of banking and finance.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. WALSH. If you are not willing to trust the appointing power, why did not the committee in framing this legislation provide the person by name that they want to present to represent agriculture? If they want a real agricultural representative, I would be glad, if the committee will open this up for amendment, to put in nomination a gentleman right now who I am sure will represent the agricultural interests of the country, both the dirt farmer and the millionaire farmer. I nominate the gentleman who represents one of the districts in the State of Kansas. I am sure the agriculturists would hail his nomination with acclamation. [Applause.]

Mr. TINCHER. I decline, because I think that agriculture still needs some representation here at times. [Laughter.]

Mr. WALSH. That is not necessary. They are in control here, and have been for months, operating the steam roller. [Laughter.]

Mr. McFADDEN. In answering the gentleman's question, I do not think the committee felt that it wanted to assume the responsibility of dictating the management of the Federal reserve system. I do not think we have arrived at that point where Congress wants to assume the responsibility of operating our financial system.

Mr. RAKER. Mr. Chairman, will the gentleman yield there?

Mr. McFADDEN. Yes.

Mr. RAKER. At present the Senate can not confirm and nominate certain members of this board.

Mr. WALSH. It can be provided in the act, the same as it is stated that the Secretary of the Treasury and the Secretary of Agriculture shall be members. But gentlemen do not seem to trust the appointing power in carrying out this purpose.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. DOWELL. Was the purpose of the amendment in reducing the number as provided by the Senate bill to lessen the opportunity of a farmer to be appointed on the board?

Mr. McFADDEN. No. It was designed to leave it as it is now, because seven is the accepted number, and to add one would be to make an even number, and we thought it was unnecessary and uncalled for to make the change.

Mr. DOWELL. But the gentleman said a moment ago that he was opposed to what he termed as "class legislation," of naming a specific member of the board to represent a class——

Mr. STRONG of Kansas. Unless he was a banker.

Mr. DOWELL. The gentleman said he was opposed to this appointment of a farmer on the board, and therefore it would lessen the chances of a farmer being appointed by putting on the amendment.

Mr. McFADDEN. I am not opposed to a farmer being on the board, but I am opposed to singling out any class and legislating for a class.

I want to call attention to the fact that a provision was stricken out in the Senate, a provision in the Federal reserve act, to the effect that at least two of the members must have had experience in finance or banking. That has been stricken out, and they have included in the first two lines of this bill "for representation of the financial and agricultural interests," with no designation as to qualifications. My own judgment is—and I do not believe there is a man here who will dissent from that—that there should be at least two men who are experienced in finance or banking to run this financial system. That does not mean to imply that the men who are appointed and who have disconnected themselves from their financial institutions will be the big financial men of the country at all. It will only mean that they will be experienced in the line in which they will be engaged. I think that is important, and ought to be put in this bill. It is not in the bill, but I hope some Member will offer that provision as an amendment and put it in this bill.

Mr. DOWELL. But the bankers are already represented on the board. The question now arises of the opportunity of having a farmer appointed on the board.

Mr. McFADDEN. I will say to the gentleman that that very opportunity is afforded to do that when the term of the present governor expires.

Mr. DOWELL. But the question I was raising, after the gentleman had made the statement that he opposed what he termed as "class legislation," was if the reduction in the number provided by the Senate was intended to reduce the opportunity of a farmer getting an appointment on the board?

Mr. McFADDEN. No; I do not think so.

Mr. TINCHER. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. TINCHER. I have no question in my mind at all but that with the word "five" substituted for the word "six" the President will appoint a representative of the agricultural interests on the board; that is, a man familiar with the agricultural interests. However, after the comma on line 3 the bill provides the geographical divisions of the country. It is my understanding that the present administration—that is, at least, the Secretary of Agriculture—thinks that they should have six members in order to properly distribute the membership of that board. I do not want to be understood for a moment as thinking that the President would not appoint an agriculturist as one of the five, but I think there should be six members.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. KINCHELOE. Does not the gentleman think, in view of the anxiety which gentlemen seem to show at the proposition that the board shall be maintained with only five members instead of six, that the manifestation of alarm on the part of Republicans here is another manifestation of their distrust of their President?

Mr. STRONG of Kansas. The Republicans are not alarmed. It is the bankers that are alarmed.

Mr. McFADDEN. I am satisfied that the President intends to do the right thing by the agricultural interests.

Mr. KINCHELOE. But the gentleman's colleagues do not seem to think so.

Mr. TINCHER. You know we are a little leery, because under the old wording of the law and the old administration of the law you came pretty near putting agriculture out of business in the United States of America.

Mr. KINCHELOE. Everybody knows that the farmers were more prosperous under that administration than they are now and are very sorry of the change.

Mr. ANDREWS of Nebraska. I think we can understand the condition of the gentleman from Kentucky. He is in need of treatment at Dawsonsprings Hospital for a little while in order to restore his faith and belief in regard to this side of the House, politically. [Laughter.]

Mr. KINCHELOE. If the gentleman would come down and take a good purgative down there, he would be a better man himself and not so suspicious, perhaps, of his President. [Laughter.]

Mr. ANDREWS of Nebraska. I am not questioning that proposition. I am simply prescribing for the gentleman from Kentucky.

Now, coming back to the question whether the number shall be five or six, after the discussion that has taken place in the Senate and in the press and in the general understanding which seems to prevail throughout the country, would it not be misconstrued unfavorably if we struck out the word "six" and inserted the word "five"? To make the number of the appointive members of the board six would give an enlarged opportunity to the Executive to meet the needs of the agricultural interests, which up to this time have been denied.

Mr. McFADDEN. I do not agree with the gentleman there, because I think the agricultural interests have not been denied. I think the results of the investigation of the Anderson Commission will prove that the agricultural interests have had great relief from the operations of the Federal reserve system.

I would also call the attention of the gentleman to the fact that a year ago, when our committee were considering the bill, we wrote into the bill the very language which is in this bill, which would give the agricultural interests consideration by the President. The committee voluntarily a year ago wrote that into a bill, which bill was not passed out of the committee, however; but the committee were practically unanimous in the view that they should include in that designation the word "agriculture." It seems to me that places agriculture on the same plane as the other interests. I do not see how there is any advantage to be gained by having any designation in there as an attempt to influence the President in his selection. I have confidence that the President will choose the right kind of men to represent the various business interests of the country, including agriculture, on this important board.

Mr. ANDREWS of Nebraska. Will the gentleman yield once more?

Mr. McFADDEN. I will.

Mr. ANDREWS of Nebraska. No doubt the gentleman's keen observation of financial conditions recalls the fact that in 1920 the Federal Reserve Board pursued a course that meant tremendous oppression to the agricultural interests of the country, and practically forced thousands of people into bankruptcy. Now, with no representation upon this board as the voice of agriculture, why should we close the door here by reducing the number from six to five, when the very purpose of this bill was to open that door and give the opportunity for an additional number?

Mr. McFADDEN. I will say to the gentleman that we are not decreasing the membership of the board. We are leaving the board exactly where it is, with the assurance, as I understand, to the gentlemen who claim to sponsor the agricultural interests of the country and to see that everything is done for the farmer that should be done, that the President will recognize the agricultural interests in the appointment of the next member of the board.

Mr. WALSH. Will the gentleman yield?

Mr. ANDREWS of Nebraska. Yes.

Mr. WALSH. I should like to ask the gentleman from Nebraska what was the particular course followed by the Federal Reserve Board that drove thousands of people into bankruptcy who ought not to have been put there?

Mr. ANDREWS of Nebraska. Loans were called in, and the regional banks denied extensions of credit to the banks in the territory where agriculture was active and depressed. Now, with that denial of the extension of credit, the farmers were compelled to liquidate their loans, and they were driven into bankruptcy because the Federal reserve system did not give relief where it was expected in its very creation that it should give relief.

Mr. WALSH. That did not drive them into bankruptcy.

Mr. McFADDEN. Mr. Chairman, how much time have I?

The CHAIRMAN. The gentleman from Pennsylvania has 30 minutes remaining.

Mr. BLACK. Will the gentleman yield to me?

Mr. McFADDEN. I yield to the gentleman from Texas.

Mr. BLACK. With reference to the statement of the gentleman from Nebraska that the Federal Reserve Board by some arbitrary act shut off credits in agricultural sections, I have here a chart published by Hon. John Skelton Williams, seeking to establish the contention that it was by reason of some arbitrary action on the part of the Federal Reserve Board that agricultural products were reduced in price. I find from inspecting this chart that in January, 1920, wheat was quoted at $2.63 a bushel, and the outstanding loans of the Federal reserve banks at that time were $2,736,670,000. On the 1st of December, 11 months after that, wheat was quoted at $2.01 a bushel, which was a decline of 62 cents a bushel, whereas the loans of the Federal reserve system were then $2,974,000,000, an increase of more than $200,000,000 over the first of the year. Now, if you will permit me, let me also give the figures as to cotton, because there has been in my opinion a great deal of misunderstanding on this question. Cotton on the 1st of January, 1920, was selling at 40 cents a pound. On the 1st of December it had declined to 14.4 cents a pound, which was a net decline of nearly 66⅔ per cent.

Now, one would think from the arguments used by Mr. Williams in his chart and by gentlemen in this debate that if the board brought this deflation about there would be a decline in the Federal reserve bank loans of at least something like in proportion, whereas as a matter of fact the outstanding loans of the Federal reserve system in December, 1920, instead of being less than on January 1, 1920, are $238,000,000 more.

Mr. KING. How much did they have up in New York City?

Mr. STRONG of Kansas. The farmers didn't get it.

Mr. McFADDEN. Mr. Chairman, I yield two minutes to the gentleman from Massachusetts [Mr. LUCE].

Mr. LUCE. Mr. Chairman, the agricultural bloc secured an investigation, and that commission reports as follows:

1. That the expansion of bank loans in rural districts during the period of inflation ending June, 1920, was relatively greater than in the industrial sections, taken as a whole.
2. That the action of the Federal Reserve Board and the Federal reserve banks during the 15 months preceding April 28, 1921, did not produce a greater curtailment of bank loans in the rural districts than in the financial and industrial sections.
3. Credit was not absorbed by the financial centers at the expense of rural communities for the purpose of speculative activities.

That is the verdict of the agricultural bloc itself.

Mr. McFADDEN. Mr. Chairman, I yield two minutes to the gentleman from Illinois [Mr. KING].

Mr. KING. Mr. Chairman, on this particular point as to who deflated the farmers in September, 1920, there can be no question. The Anderson investigation committee has not investigated that feature, is not doing it, and does not intend to investigate it, but if they do they will find that at that time the farmers were meeting at Kansas City and other places to maintain a decent price for wheat. The local banks having been advised directly to call the farmers' loans, began to call them; and how could the farmer maintain his price when he had to rush to the bank to get an extension of his loan? He could not get the extension and had to sell his products on the market for what he could get out of it, and the speculators were looking for it. In my judgment it was a plain, deliberate robbery of the farmers of the United States, nothing less, deliberately planned and carried out by no other agency than the Federal Reserve Board, which has exercised such a reign of terrorism over the banks of the country that they dare not claim their souls as their own. [Applause.]

Mr. McFADDEN. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 22 minutes.

Mr. WINGO. Mr. Chairman——

The CHAIRMAN. The gentleman from Arkansas is recognied for an hour.

Mr. WINGO. Mr. Chairman, I yield 30 minutes to the gentleman from Maryland [Mr. GOLDSBOROUGH].

STABILIZING THE PURCHASING POWER OF MONEY.

Mr. GOLDSBOROUGH. Mr. Chairman and gentlemen of the committee, I am taking advantage of the opportunity presented by the general debate on this bill to talk for a few minutes very briefly and very generally about a matter upon which long consideration induced me to introduce a bill in this House this morning. For a great many years, in fact, ever since I have been old enough to think very much, I have wondered about the gradual expansion and contraction of general price levels through long periods of years, but never until I became a Member of Congress did it seem that I had time enough to even attempt any sort of a real analysis. Last summer on the occasion of a dinner, at which former Vice President Marshall and I were guests, I brought up the subject and found that he had given the matter a great deal of consideration, and he made several luminous suggestions based upon his study and supported by his splendid common sense. I am profoundly convinced that the problem of stabilizing the purchasing power of money is soluble. I believe it is the second problem of economic importance confronting the people of the world at this time, and I believe this to be the psychological time to bring the matter up for serious consideration.

For the purpose of this discussion I have not in mind stabilization outside of this country. World-wide stabilization will come only when the Allies realize that Germany can pay her war indemnity only in goods directly or indirectly, and when we come to recognize that the allied debt to us can be paid only in the goods of the Allies and the goods of Germany which will indirectly pay it. With an indemnity due by Germany of around $33,000,000,000 and only about $9,000,000,000 of gold

coinage in the world, all the gold coin in the world, if it were held by Germany, would pay but one-fourth of the reparations, and if perchance through some inconceivable and baleful natural force or artificial process Germany should acquire the gold with which to pay her indemnity and should pay it, the human mind can not conceive of the world-wide hell of inflation, worse than that of Austria or of Russia, which would come about, resulting in riot, revolution, and destruction of values until the sanity left in the world should have an opportunity to reassert itself and establish a new monetary basis. World-wide stabilization can never come about, and the German indemnity and the allied debt can never be paid while the tariff walls are being raised higher and higher and our markets cut off from the commerce of the world. [Applause.]

My friends, our people are staggering under a burden of a war debt of about $25,000,000,000. That means that the backs of our people are to be burdened with a load of taxation such as has never been known before in the history of this country. A large part of that burden must ultimately be borne by the consumer, which term has come to mean that part of our people who from necessity live from hand to mouth and to whom the price of commodities means so much. When we speak of the consumer we have in mind the long, long line of men and women and little children for whom the beautiful things of life, the things which so largely make up the sum of human happiness in this world of ours, are obscured by gaunt necessity. Half of this burden can be lifted if we make it possible for the allied debt to be paid. If the present tariff bill becomes a law it can never be paid. I am forced to think that its framers know it can never be paid. Already the same influences which culminated in this tariff bill have been feeling out the American people on the question of canceling the allied debt. This seemed the thinly veiled theme of several of the addresses made at the meetings of the United States Chamber of Commerce held last week in this city, the Capital of the Nation. We will find out in the next congressional election whether the American people will permit this monstrous thing to be done. If this country had gone into the League of Nations in 1920, world-wide economic conditions would be largely stabilized now. Thousands of little children who have perished on the steppes of Russia from starvation and exposure would have been saved. Four million men and women would not now be walking the streets of this country begging for means with which to earn their daily bread, and the allied debt would now be in process of liquidation and payment.

I am in no sense a pessimist. I have an abiding faith in the good sense and clear vision of the American people; and I prophesy here and now, without the slightest hesitation, that within 10 years we will have a league of nations composed of the nations of the world and based substantially on the treaty which we failed to ratify; and I prophesy that as a reaction from that league of nations will come world-wide economic stability. Will anyone say that we are not interested in world-wide conditions? When a country or a people does not produce normally for itself because of faulty economic conditions, that country or that people will inevitably be fed and clothed to a greater or less extent by other countries and other peoples; and therefore our poorest people, our people who are most needy, together with every other element of the country, will enjoy the greatest degree of prosperity when the people of every nation are able to feed and clothe and house themselves and when the blessed sun of reasonable plenty shines most brightly everywhere.

Now, I have digressed a great deal in a way, have gone outside of the limits of the matter I started out to discuss, but the things I have been speaking of are correlated matters about which I feel very deeply and which may serve to emphasize the subject matter of this speech. My bill was drafted more particularly with reference to conditions affecting gradual rises and falls in general commodity prices which are not within the control of the Federal Reserve Board. In other words, now that we have this splendid banking system, it seems to me that the next step should be an attempt to prevent gradual rises or falls in general commodity prices through long periods of years, causing all concerned misery, misunderstanding, and bad feeling, and culminating in makeshift legislation, radicalism, and sometimes even in revolution and war.

In the Bureau of Labor Statistics in Washington there is what is known as an index number, which, as a rough explanation, I will say is computed by averaging the price levels of various commodities. These commodities are in nine groups—farm products; food, and so forth; clothes and clothing; fuel and lighting; metals and metal products; lumber and building materials; drugs and chemicals; house-furnishing goods; and miscellaneous. There are, I think, 243 commodities listed in the nine groups, the wholesale price of each being accurately kept for the purpose of ascertaining the tendency of prices to rise or fall. A chart is kept which by means of a curved line graphically indicates the trend of prices. As your finger traverses this line from 1873 to 1896 you find prices constantly falling; from 1896 to 1914 prices constantly rising, with a sharp upward trend through the period of the war. As I looked at this chart the other day memories of the hard worked and poorly paid farmer of my boyhood flooded back to me. It used to seem to me that this man who did so much for everyone else was able to do very little for himself. I remembered how almost impossible it was for him to pay his loans and mortgages. I remembered how the money lender flourished, and I began to see as clearly as we see the sun at noonday that during this period of constantly falling prices, which means ever higher money, the man who had commodities to sell suffered and the man who had money to sell flourished as the green bay tree; and as my finger traveled up the curve of high prices from 1896 I remembered how the man with the fixed income began to suffer, the complaints of the wage earner; that the school-teacher, the clerk, the office man, the salaried person of every type began to feel the pinch and eventually to actually suffer from this condition; and I saw pictured in letters of fire that the "Wayfaring man, though he were a fool," might read and understand, the fixed income of these people becoming cheap and the commodities that they had to buy for their support and the support of their families correspondingly high.

Some may say, What of it? Where one person is injured another is benefited, but this is not the case. From about 1879 until 1896 populism rose from small beginnings, chiefly in the great agricultural areas of the Middle West; the money lender and the bondholder were held up to every reproach and contumely; the names of Russell Sage and Hetty Green were thought of as the name of "Shylock." Discontent, bad feeling, and difficult financing reduced very much economic output and culminated in the free-silver campaign of 1896.

Shortly after the beginning of the rise of 1896—that is, at about the beginning of this century—the rise in prices began to spread the seeds of socialism among the worker and the man with the fixed income; industrial unrest began, labor unions were formed and became powerful, strikes common, and many of the seeds of the great war were sown.

Nowhere throughout that part of the world using our monetary standard was the rise in prices felt with any more cruelty than among the middle classes and the toilers of Germany, and this discontent among the great bulk of the people went a long way toward creating the opportunity and, in the minds of some possibly, the national necessity for war.

A great teacher once said to his students: "Divide the study of any social situation into four questions: What is it? Why is it? What of it? What are you going to do about it?" I have talked about the first three questions. I fully realize that the study of the problem of stabilizing the purchasing power of money is in its period of early conception, and that the agony of birth and the gamut of the diseases of infancy and childhood must be run before we can hope to see the thing in the wondrous beauty of its maturity.

But some basis of discussion should be established, some concrete plan should be made the target of constructive criticism, and to that end I have introduced a bill, referred to the Committee on Banking and Currency, which attempts to stabilize average commodity wholesale prices by controlling the quantity of money and credits in relation to the volume of trade by increasing or diminishing that quantity as the average price level goes down or up.

It is probably as well not to undertake a detailed discussion of the bill here and now, but to let the matter finally develop from the committee if it should deem my views worthy of consideration as a framework for legislation.

Years of reflection convince me that equality of economic opportunity is probably the most serious concern of statesmanship. Class legislation lessens the creative enthusiasm of the group favored by it and restrains the economic development of the group outside the favored class.

All of us here to-day must in a few short years and in the fullness of time be gathered to our fathers; the eyes of none of us will shine with the light of those who see the blessed brotherhood that one day will come, when the lion and the lamb shall lie down together; but I firmly believe it lies within the power of Congress during the next few years to solve this problem of stabilizing the purchasing power of money, which will add so much to human happiness and help so largely in solving the gravest political questions.

Right here, as a matter demanding immediate consideration, I feel that it should be suggested to the Federal Reserve Board and to the bankers of the country and to the great thinking

public, whose sentiment will so largely control the financial policy at this period of reaction from war inflation; that billions of dollars of war bonds of the Government were paid for in inflated—that is, cheap—money, that to double the price of the money with which these bonds will have to be paid, as is being seriously discussed as a part of a policy of deflation, will change the burden on the taxpayers of this country from twenty-five billions to the equivalent of fifty billions of dollars—that is, will double the burden—that numberless private contracts were entered into at or near the peak, and that practically the actual contract price would be thus doubled; that millions of dollars' worth of farm lands were bought and farm mortgages given during the area of high prices, and that such a policy would probably cut the price of these farms in two and double the burden of the mortgage.

I firmly believe that the purchasing power of money can be stabilized. I believe that the solution, when we have it, will be found to be simple; and I trust that that solution will soon be embodied in legislation. I never want to see agriculture and industrial enterprise struggling in the agony of a long period of falling prices or to see the young, active, bright business man, naturally uninformed as to financial science and portents, feel that he is rising to prosperity on the tide of rising prices only to find his business bankrupt and his hope blasted in the inevitable crisis just beyond the peak.

I spoke a while ago of class legislation. It is mighty hard to control the class spirit which fosters such legislation. We all have the class tendency. With some it is social, with some economic, with some religious, with some sectional, with some a combination of two or more; but in whatever guise it appears, the result is antisocial and detrimental to the people as a whole.

The spectacle we have now in the Senate, and had in the House last summer, of the representatives of powerful interests parceling out among themselves the resources of the country through the tariff bill with a reckless abandon, the same in principle with that of the buccaneers of the West Indies as they divided the loot from the captured trader, is simply a manifestation of the class spirit of powerful economic units, in utter disregard of the interests of the average man, woman, and child, of the person with a comparatively small or fixed income, of the farmer, the small business man, and the laboring man.

Stabilizing the purchasing power of money, if it can be done, strikes at the very root of class advantage and tends to prevent the inception of movements of special privilege. It is mighty easy to get in the habit of losing sight of the under dog, mighty easy to garb with the cloak of conservatism the golden calf of indifference to the common weal.

We all want to be conservatives in protecting the people from the doctrinaire, the political adventurer, or the dealer in the same quack remedies and short-cut treatments which through the ages have gone along with the disintegration and downfall of peoples, but "Where there is no vision, the people perish," and the lessons of the war and postwar period have prepared the minds of the people for two great strides in government of the people, by the people, and for the people—a league of the nations of the world, providing for mutual reciprocal disarmament and legislation stabilizing the purchasing power of money.

In the consideration of this legislation the question of necessary cooperation with other nations need not be controlling, as we are dealing now with a much more uncertain exchange situation than any which independent stabilization by this country could possibly create.

On May 12, at Philadelphia, before the American Academy of Political and Social Science, Mr. Edmund Platt, vice governor of the Federal Reserve Board, speaking on "America and the debts of Europe," had this to say in connection with foreign exchange:

> It seems probable that the major depressions of exchange mark periods when our people were seeking to convert foreign balances into dollars, and that exchange recovered when most of the conversions had been made and losses wiped out. Some very large American exporters are known to have taken considerable losses in this way. They sold in terms of foreign currencies and found them when payments became due considerably depressed, but when recovery was delayed beyond their expectations they finally bought dollars and took their losses. Very large losses are also known to have been charged off by some of our bankers.

Again:

> No longer ago than April 1 the editor of the Economic World, whose articles are always worth reading and usually sound, predicted that "no person now living will ever see the value of the present French franc of actual currency normally and regularly equal to one-half of that of the gold franc established by law as the monetary unit of France." At the time that was published the French franc was quoted at about 9 cents in our currency. It had been as low as 5.79 in 1921 but had recovered to 8.13 at the end of December. Within a little more than two weeks after Mr. March made this prediction French francs sold at 9.37½, and had little more than a quarter of a cent to go to reach half par. They have since fallen back somewhat, but I see no reason why they should not continue to advance if France makes progress toward balancing her budget. They are not lower now than our Civil War greenbacks were at one time, and complete restoration does not appear impossible, though it may take a considerable number of years.

We involuntarily shrink from the serious study of economic questions with which we are comparatively unfamiliar. It is irksome and subjects us to criticism of various kinds. Personally, in my own periods of complaisance with things as they are, I have gotten inspiration from the following lines of the American poet, James Russell Lowell:

> Said Christ our Lord, "I will go and see
> How the men, my brethren, believe in me."
> He passed not again through the gate of birth,
> But made Himself known to the children of earth.
>
> Then said the chief priests, and rulers, and kings,
> "Behold, now, the Giver of all good things;
> Go to, let us welcome with pomp and state
> Him who alone is mighty and great."
>
> With carpets of gold the ground they spread
> Wherever the Son of Man should tread,
> And in palace chambers lofty and rare
> They lodged Him, and served Him with kingly fare.
>
> Great organs surged through arches dim
> Their jubilant floods in praise of Him;
> And in church, and palace, and judgment hall,
> He saw His own image high over all.
>
> But still, wherever His steps they led,
> The Lord in sorrow bent down His head,
> And from under the heavy foundation stones
> The Son of Mary heard bitter groans.
>
> And in church, and palace, and judgment hall,
> He marked great fissures that rent the wall,
> And opened wider and yet more wide
> As the living foundation heaved and sighed.
>
> "Have ye founded your thrones and altars, then,
> On the bodies and souls of living men?
> And think ye that building shall endure
> Which shelters the noble and crushes the poor?
>
> "With gates of silver and bars of gold
> Ye have fenced my sheep from their Father's fold.
> I have heard the dropping of their tears
> In heaven these eighteen hundred years."
>
> "O Lord and Master, not ours the guilt;
> We build but as our fathers built;
> Behold Thine images, how they stand,
> Sovereign and sole, through all our land.
>
> "Our task is hard—with sword and flame
> To hold Thine earth forever the same,
> And with sharp crooks of steel to keep
> Still, as Thou leftest them, Thy sheep."
>
> Then Christ sought out an artisan,
> A low-browed, stunted, haggard man,
> And a motherless girl, whose fingers thin
> Pushed from her faintly want and sin.
>
> These set He in the midst of them,
> And as they drew back their garment hem,
> For fear of defilement, "Lo, here," said He,
> "The images ye have made of Me!"

The Anglo-Saxon peoples have gone a long way since those words were written, but, my friends, the next time you watch the glory of the winter storm, in warmth and comfort, consider to what percentage of the people that storm means only misery and hardship. That thought has often made me feel with terrible distinctness the long, long hill humanity has got to climb to relieve the agony of the world.

I am confident the subject of these remarks is entitled to our most painstaking consideration. I am not so confident that the suggestions embodied in my bill even approximate a solution. I have an abiding conviction that this great body will at the proper time approach the matter with the caution which it demands, but with courage, with resolution, with vision, and with hope. [Applause.]

Mr. WINGO. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. BLACK].

Mr. BLACK. Mr. Chairman, I am heartily in favor of this bill which makes a provision of law requiring that the great industry of agriculture should be one of those considered in determining the membership of the Federal Reserve Board. I think it is perfectly proper and logical for us to pass an act of this kind. The Federal reserve system is governed by the Federal Reserve Board. That is to say, its policies are largely determined by the board. Therefore, agriculture, being one of the great basic industries of the Nation, should have a voice in determining those policies; not for the purpose of obtaining any selfish advantage, but for the purpose of seeing that its situation and interests are properly presented and are understood. I am in favor of the Senate bill as it originally passed that body, increasing the membership of the board by one member. I think that is perfectly proper. We have 12 Federal reserve districts, we have 12 Federal reserve banks with various branches, and I

think a board with a membership of six appointed members—we have two ex officio members, the Comptroller and Secretary of the Treasury—is a proper number, and I think the House will do a wise thing to defeat the committee amendment and adhere to the Senate bill as originally written.

I am not supporting this bill because I take any part in the wholesale denunciation of the Federal Reserve Board heard here to-day and elsewhere in the country for supposedly deliberately forcing down the price of farm products. I am not here to say that the Federal Reserve Board makes no mistakes. I am not here to say that it administered the Federal reserve act with a perfect degree of wisdom. But, as I undertook to show a while ago in response to a question by the gentleman from Nebraska [Mr. ANDREWS], taking the chart which Hon. John Skelton Williams has printed, we find that during the 12-month period beginning January 1, 1920, and ending December 31, 1920, when there was a very drastic decline in the prices of agricultural products, there was not a decline in the amount of loans in the Federal reserve banks. On the contrary, there was a large amount of increase in the loans and also in the amount of Federal reserve notes in circulation. Let me say right here that if I thought the Federal Reserve Board was responsible for the decline in the price of farm products, I would condemn them just as severely as anyone, because I have, and the people I represent have, suffered just about as severely from price declines as anywhere in the United States. I have earnestly and diligently studied the whole question with its various ramifications, and I can not bring myself to see where the Federal Reserve Board or anyone else could have prevented a decline from the high prices of early 1920. The board might have adopted some temporary policy which would have postponed the decline for some months, but it is very probable that if such policy had been adopted the decline would have been all the worse when it did come and all the more disastrous.

It is said here to-day in debate that the Federal Reserve Board deflated prices by deflating credits. I find the dictionary definition of the word "deflation" is to reduce from inflation by releasing the air or gas. Let us see whether the records will sustain the charge that prices of farm products were "deflated" by "deflating" bank credits. Let us examine the case of one agricultural product that I did not mention a while ago. Corn in January, 1920, according to the chart prepared by Mr. Williams, was $1.47 a bushel. The outstanding loans of the Federal reserve system at that time were $2,736,670,000. Twelve months after this time, in December, 1920, corn had gone down from $1.47 a bushel to 73 cents a bushel, a shrinkage of little more than half, and therefore according to Mr. Williams's logic, and those who support his views, the loans of the Federal reserve system should show a decline of approximately one-half, whereas, as a matter of fact, on December 1, 1920, the loans instead of having decreased had increased from $2,736,670,000 to $2,974,836,000. Looks to me like these figures show that Mr. Williams's theory is working backward from the way he is contending.

Mr. ANDREWS of Nebraska. Mr. Chairman, will the gentleman now yield?

Mr. BLACK. Yes.

Mr. ANDREWS of Nebraska. That increase did not go to the agricultural sections. It went to the large centers, and the men who ran the deal on sugar advancing the price from 5 and 6 cents a pound to 25 and 30 cents a pound. They were the men who got the money.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLACK. Mr. Chairman, will the gentleman yield me a few minutes more?

Mr. WINGO. Mr. Chairman, I yield the gentleman three minutes more.

Mr. BLACK. Let us see about sugar. That is one of the products shown here on Mr. Williams's chart. Sugar on the 1st of January, 1920, was worth 15.37 cents a pound. The gentleman from Nebraska says what? He says that the Federal Reserve Board was transferring its funds from the agricultural section to the financial centers to hold up sugar to 25 and 30 cents a pound. Well, if they were doing it, which they were not, they did not succeed, because on December 1, 1920, sugar also had declined from 15.37 cents a pound to 8 cents a pound, practically a corresponding decline in percentage with that of corn.

The most insistent critic of the Federal Reserve Board has been Hon. John Skelton Williams, former Comptroller of the Currency, and nearly all of the criticism heard here to-day is based on figures that he has published. He has a right, of course, to freely voice his opinion, but let me read from the annual report which he filed as Comptroller of the Currency immediately before he retired from office, and which was after all of these alleged misdoings of the Federal Reserve Board had taken place. I read from page 52 of that report; the report is dated December 6, 1920, and reads:

> Largely through the aid and excellent functioning of the Federal reserve system the business and banking interests of the country have passed successfully through the perils of inflation and the strain and losses of deflation without panic and without the demoralization which has been produced in the past at various times from far less serious and racking causes. Those banking and other interests which at the outset so vigorously opposed the Federal reserve system are now among its warmest advocates.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. BLACK. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BLACK. Mr. Chairman, when my time expired I had intended to go further and answer more completely the allegation contained in the question asked me by the gentleman from Nebraska [Mr. ANDREWS], which was to the effect that while it was true that the loans of the Federal reserve banks increased from $2,736,670,000, January 1, 1920, to $2,974,836,000, December 1, 1920, it was also true that this increase in loans was to the big financial centers and there was an actual decrease in the agricultural sections.

Now, if that statement were correct it would furnish argument that it was deflation of credits in agricultural sections which caused the decline in prices of farm products. It is not true, however. It is very far from being correct. I presume it is the Kansas City Federal Reserve Bank which serves the State of Nebraska, in which the gentleman, Mr. ANDREWS, lives. The Kansas City Federal Reserve Bank had $110,380,000 rediscounts on January 1, 1920. These credits had expanded to $139,402,000 on January 1, 1921, and its Federal reserve note issue had increased in the same period $7,500,000. Total expansions, $36,522,000. Now, take the Federal reserve bank of my own district, that at Dallas, Tex. It held $28,371,000 in discounted paper on January 1, 1920, whereas the amount had been increased to $97,392,000 on January 1, 1921.

Yet, in the very same period that the rediscounts of the Federal reserve bank at Dallas had been increased threefold, the price of cotton had fallen from 40 cents per pound to 15 cents per pound.

Does that look like it was deflation of credits which brought about the decline in the price of cotton?

Anyone is entitled to his opinion and I have no quarrel with him for expressing it.

The following are the reasons which I think are in the main responsible for the decline in prices:

(1) Millions of men who were engaged in war and were therefore strictly consumers and not producers during such time they were so engaged were, when the war closed, released to follow productive occupations instead of destructive ones, and the result of which has naturally been to increase production and relieve scarcity.

(2) Great quantities of raw materials which had been stored in remote parts of the world during the war when there was no shipping available to transport them to markets were released immediately when the shipping was available, and for many months this resulted in an oversupply of such commodities as wheat, wool, hides, vegetable oils, sugar, and cotton.

(3) Exhaustion of European credits. During the war France, England, Italy, Belgium, and Russia borrowed about $10,000,000,000 from the United States and spent it all here in buying cotton, food supplies, and munitions of war. Their war needs were of the kind which had to be supplied immediately, therefore their purchasing agents paid most any price that was asked. When these credits became exhausted early in 1920 these nations found it increasingly difficult, and altogether impossible in some cases, to finance their purchases of our products, and, as a natural consequence, the market for all of our exportable surplus, including cotton, was greatly curtailed. Of course, prices began to tumble when manufactured goods and farm products began to accumulate in warehouses instead of going into the channels of consumption.

It is a whole lot easier to make somebody the goat than it is to dig down and find out the fundamental causes which brought about the decline. Let us get busy and try to correct the present unfavorable situation of agriculture by constructive means instead of spending so much time criticizing the Federal Reserve Board.

The extension of remarks referred to are here printed in full as follows:

Mr. BLACK. Mr. Speaker, I secured leave to extend my remarks in the RECORD. I want to now take advantage of that

leave by making a short statement of my support of the bill and of other constructive legislation which I have supported since I have been a Member of Congress.

Let me say at the beginning that I think it is highly desirable that the Federal Reserve Board should at all times have some member on it who has a broad and intimate knowledge of agriculture and live stock. The board should be so composed that its membership will have a cross-section view of the composite activities of the country, and this can not be done if a representative of agriculture is omitted.

The Senate bill which the House passed and which I was glad to support provides that this be done by including "a fair representation of the financial, agricultural, industrial, and commercial interests and geographical divisions of the country." I think it is a very desirable piece of legislation and will contribute to the value of the Federal reserve system. Other constructive measures which I have supported since I have been a Member of Congress are as follows:

UNITED STATES SHIPPING BOARD.

To establish and encourage and develop a merchant marine so that American commerce, including our heavy tonnage of exported agricultural products, will not have to depend on foreign ships for ocean transportation. I am against any ship subsidy law. (May 20, 1916, p. 8374, CONGRESSIONAL RECORD.)

GOOD ROADS LAW.

This bill provides a system of cooperation between the Federal and State Governments in the building of hard-surfaced highways. Liberal appropriations have been made by Congress under it, and as a consequence more improved highways have been built than during any other similar period in American history. (January 25, 1916, pp. 1536–1537, CONGRESSIONAL RECORD.)

IMMIGRATION RESTRICTION.

To regulate entry of aliens into the United States and provide certain restrictions against their entry. This law was amended in 1921 and 1922 to still further restrict the number of admissible aliens, and I voted for these amendments in both cases. Also supported legislation to deport undesirable aliens, such as Emma Goldman and Alexander Berkman. (March 30, 1916, p. 5194, CONGRESSIONAL RECORD.)

FARM LOAN ACT.

Established system of 12 farm loan banks, 1 of which is located at Houston, Tex. System affords farmers opportunity to borrow money to be used in purchasing or improving homes, at low rate of interest and long terms of payment. The most recent statement of the Farm Loan Board shows that more than $500,000,000 has been loaned by the system in the United States and more than $55,000,000 of which has been loaned by the Houston (Tex.) Farm Loan Bank. (May 15, 1916, p. 8017, CONGRESSIONAL RECORD.)

WAR REVENUE ACT.

To provide money for defraying the expenses of the war, levying high surtaxes on large incomes and excess-profits tax on corporations making large profits during the war. (May 23, 1917, pp. 2818–2819, CONGRESSIONAL RECORD.)

FOOD CONTROL.

To prohibit hoarding of foodstuffs, insure ample supply, and to prevent profiteering in foodstuffs. (June 23, 1917, p. 4190, CONGRESSIONAL RECORD.)

WAR RISK INSURANCE LAW, ALLOTMENT AND ALLOWANCE.

Provided insurance for soldiers, sailors, and marines at low rate, made provisions for compensating those wounded and disabled in service, extended financial assistance to dependents of soldiers, sailors, and marines.

When this bill was being considered in Congress I offered a series of amendments designed to equalize and make uniform its benefits, which were adopted by an overwhelming vote in the House and were accepted by the Senate. The purpose and effect of these amendments is briefly explained in the following account which was published at the time by the Survey, one of the leading magazines of the country:

By a vote of 139 to 3 the House wrote into the soldiers and sailors' insurance bill, before its passage on September 13, the principle of equal care as between the dependents of officers and of private soldiers and sailors. The amendments offered by Representative BLACK, of Texas, indorsed in this decisive fashion, provide that the payment to be made to the dependents of soldiers and sailors killed or totally disabled shall be specific rather than based on a percentage of the pay of the dead or disabled man.

Congressman BLACK, with a number of other Members of the House, assailed the committee's plan of compensation, based on the rate of pay of the soldier or officer, as being an attempt to establish class and caste in America "while we are carrying on a war for democracy." Mr. BLACK termed it "preserving the distinction of rank and pay beyond the borders of the grave."

Representative Alexander, of Missouri, one of the Members who had charge of the bill in the House, gave his entire approval to the Black amendments when the measure was finally passed. He said:

"It was clearly demonstrated in the debate that the House considered it only fair that there be established complete equality in treatment as to this compensation on the Government's part of the dependents of all in the service." (September 13, 1917, p. 7104, CONGRESSIONAL RECORD.)

FARM LOAN BONDS.

Authorized the Secretary of the Treasury to purchase farm loan bonds during the time when the bond market was being absorbed in the sale of Liberty bonds. Under the law the Secretary of the Treasury purchased $195,175,000 farm loan bonds, which money was in turn loaned by the farm loan banks to the farmers of the United States. The Treasury still holds $182,285,000 of these bonds for their orderly redemption at maturity. The Treasury will not suffer any loss from this purchase, but it was of great assistance to the farm loan system. (January 4, 1918, p. 615, CONGRESSIONAL RECORD.)

WHEAT GUARANTY.

Provided for fulfillment of Government promise of guaranteed price of wheat raised by the producers. (February 22, 1919, pp. 4051–4052, CONGRESSIONAL RECORD.)

AMEND AND LIBERALIZE WAR RISK INSURANCE ACT.

This bill, usually known as the Sweet bill, amended the war risk insurance act so as to provide a larger amount of compensation to the wounded and disabled veterans of the World War. The act applies in equal degree to officers and privates. (September 13, 1919, p. 5351, CONGRESSIONAL RECORD.)

RELINQUISH GOVERNMENT OPERATION OF RAILROADS.

This bill provided for the relinquishing of Government operation of the railroads March 1, 1920, and for private operation thereafter under Government regulation. It was this bill which created the Railroad Labor Board to settle controversies between the carriers and their employees with reference to wages and working conditions. The law creating the Labor Board does not forbid strikes, but its chief virtue consists in the fact that it affords a definite tribunal for settlement of controversies, and in my judgment renders strikes in the railroad industry on a national scale quite unlikely.

When the railroad brotherhoods filed their brief and argument in docket No. 142 before the United States Labor Board upon the question of the jurisdiction of the board, they used as a part of their brief a quotation from my speech on the transportation act. This brief consisted of 42 pages, and was sent to me by Mr. W. S. Carter, president of the Brotherhood of Locomotive Firemen and Enginemen. It quotes in support of labor's contention from a message of President Wilson and from two speeches delivered in the Senate and two in the House during the debate on the transportation act. The two Senators quoted are Senator CUMMINS, who was the author of the bill in the Senate, and Senator ROBINSON, of Arkansas, Democrat, who was one of its strongest and ablest supporters. The two Members of the House whose speeches are quoted are Mr. Esch, of Wisconsin, author of the bill in the House, and myself. I take pleasure in giving herewith that part of my speech which is quoted. It is:

I believe that the first legitimate charge in any industry is a fair and just wage to its employees. I would not vote for any bill which I thought would impair the rights of labor in securing this fair and just wage. In my judgment, the establishment of the Labor Board, which is created by this bill, will go a long way toward solving labor difficulties in a constructive way. This labor provision gives recognition to that principle, and unless I very erroneously appraise its value, it will serve just as useful a purpose in securing and protecting the just rights of labor as it will the rights of capital and the public. I especially indorse that provision of the section which says:

"In determining the justness and reasonableness of such wages and salaries or working conditions, the board shall, so far as practicable, take into consideration, among other relevant circumstances, the scale of wages paid for similar kinds of work in other industries. Second, the relation between wages and the cost of living. Third, the hazards of the employment. Fourth, the training and skill required. Fifth, the degree of responsibility. And sixth, the character and regularity of employment. These provisions will insure a square deal to labor." (February 21, 1920, p. 3315, CONGRESSIONAL RECORD.)

VETERANS' BUREAU.

Creates an independent bureau under the President, known as the Veterans' Bureau, and coordinates under one head hospitalization, vocational training, war risk insurance, and compensation payments of veterans of the World War. This saves much duplication of work, and if properly administered should enable ex-service men to secure more prompt consideration of their claims. (August 2, 1921, p. 4562, CONGRESSIONAL RECORD.)

WAR FINANCE CORPORATION.

A bill to enlarge and extend the facilities of the War Finance Corporation and enable it to make advances to banks, cooperative organizations of farmers, and other financing institutions to assist in production of farm products and live stock and help

in the orderly marketing of same. Under this bill already more than $350,000,000 in loans have been made for agricultural and live-stock purposes, and the sum is increasing from day to day and has done much to help the situation in the agricultural and live-stock States. (August 22, 1921, p. 5449, CONGRESSIONAL RECORD.)

FARM LOAN BANK DEPOSITS.

This bill authorizes and directs the Secretary of the Treasury to deposit from time to time, as the needs of the farm loan banks may require, $25,000,000 to be used by said banks in making farm loans during the time sales of farm loan bonds are taking place, said money so deposited to be returned to the Treasury as soon as the sale of bonds is effected. This law is working with excellent results. Under its operation the Treasury has suffered no loss and the loan operations of the farm loan banks have been greatly helped. (June 24, 1921, p. 3043, CONGRESSIONAL RECORD.)

VETERANS' HOSPITALS.

The Langley bill provides for the construction and purchase immediately of additional hospitals for sick and disabled veterans of the World War and appropriates $17,000,000 for said purpose. (March 31, 1922, p. 4892, CONGRESSIONAL RECORD.)

GOOD ROADS MACHINERY.

A bill requiring the Secretary of War to turn over to the Secretary of Agriculture for distribution in the several States through the State highway commissions all surplus Army trucks and other suitable tools and machinery for use in road building. This has put to good use much surplus war material which otherwise would had to have been sold at great loss. (November 6, 1919, p. 8049, CONGRESSIONAL RECORD.)

POSTAL SALARY BILL.

A bill to increase salaries of postal employees and put their compensation on a more equitable basis. I was a member of the committee which drew this bill, and so carefully was it drawn so as to do justice to the postal employees as well as to be fair to the taxpayers that it passed the House by a vote of 344 to 0, and I think has given general satisfaction. (June 3, 1920, p. 8397, CONGRESSIONAL RECORD.)

FARM ORGANIZATION BILL.

This bill, usually referred to as the Capper-Volstead bill, makes broad and liberal provisions for the organization of farmers in the following language:

> Persons engaged in the production of agricultural products as farmers, planters, ranchmen, dairymen, nut or fruit growers may act together in associations, corporate or otherwise, with or without capital stock, in collectively processing, preparing for market, handling, and marketing in interstate and foreign commerce, such products of persons so engaged.
>
> Such associations and their members may make the necessary contracts and agreements to effect such purposes.

If there ever was the slightest doubt about the complete authority of the farmers to organize and bargain collectively, that doubt has now been entirely removed. (February 11, 1922, CONGRESSIONAL RECORD.)

Mr. Speaker, in conclusion, let me say that I am glad that we live in a Republic where the people are the source of power, and where public officials must account to them for the way they have discharged the duties of their office. Such is my purpose in giving the foregoing brief recital of some of the most important measures which I have worked for and supported since I have been a Member of Congress.

Mr. McFADDEN. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. BURTON].

Mr. BURTON. Mr. Chairman, I do not believe in this specification of the qualifications for members of the Federal Reserve Board at all. When the bill of the monetary commission was under consideration some Member suggested that the Secretary of Agriculture be one of the ex officio members. The suggestion was treated at first as a joke, but we all recognized that agriculture was of such vital importance in this country that it was inserted in the bill as it was originally introduced. It may be very well to give agriculture a member on this board, but what will we have next? We will soon have a demand for representation from the mining interests, and then from the lumber interests, and then perhaps from the labor unions, and next from the women's clubs.

If there is anything that should be left in the bill it is the provision that is left out, that not less than two of the members shall be possessed of experience in banking and finance. The function of this Federal Reserve Board is banking and finance, and there should be men appointed who have had experience in those lines.

I must entirely disagree with some of the things that have been said here to-day as to any responsibility resting on the Federal Reserve Board for the misfortunes which have come upon the country. What ought to have been done, and I assert it with confidence, was immediately after the armistice to increase the rate of discount by the Federal reserve banks so as to put a check upon the inflation that was then in vogue. After the enormous demands of the war had ceased it was inevitable that prices should fall, but instead of that, what happened? By a policy of inflation, by an overdegree of confidence, prices did not reach their peak until April and May of 1920. That was altogether abnormal. I do not believe there should have been any sudden increase after the armistice, but a gradual increase to put the brake on those false hopes which were so deluding men in all branches of industry.

There has been some criticism of Governor Harding. I should regret very much if Mr. Harding should cease to be a member of the Federal Reserve Board. I regret that he has been selected here for objurgation and attack. In good faith and with skill, I think, he has performed the duties of the head of that board. In view of the fact that it is the sentiment of the House that there should be a special representative of agriculture on the board, I shall vote for the eight members as provided by the Senate rather than the seven members provided by the House, so that Governor Harding may be chosen.

We faced a condition when the war came to an end. Inevitably, sooner or later prices must go down. I do not believe there was any discrimination against the agricultural interests of the country. It was true the fall in agricultural products was more rapid, but naturally the banking interests of the country call in their loans where the security is insufficient. If the calamities rested more heavily on agriculture, much as we deplore the fact, it was due to conditions beyond the control of the Federal Reserve Board.

Mr. TINCHER. Mr. Chairman, will the gentleman yield?

Mr. BURTON. I have not the time. The price of farm products was determined for the most part by the international demand.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. McFADDEN. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. CONNALLY].

Mr. CONNALLY of Texas. Mr. Chairman and gentlemen of the committee, the gentleman from Ohio [Mr. BURTON] inveighs against that particular language of the bill which directs that the President in making selections for the Federal Reserve Board "shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographical divisions of the country."

The particular objection, judging from his remarks, is not against the industrial representation and commercial representation but against the agricultural——

Mr. BURTON. If the gentleman will just yield for a moment, the gentleman misapprehends in regard to that. I think they should have representation by their general qualifications, wiping out those words, industrial, commercial, and all along.

Mr. CONNALLY of Texas. The present law, as I understand it, does specify.

Mr. BURTON. Financial, commercial, and geographic.

Mr. CONNALLY of Texas. Financial and commercial—I grant the gentleman that. The law now provides that he shall consider "financial and commercial" interests, and unless this bill is passed the same conditions will continue. We still have commercial and industrial representation, whereas the gentleman from Ohio believes in wiping out all designations, leaving it to their general qualifications. I will suggest to the gentleman from Ohio that the language of this bill does not compel the President to select members of the Federal Reserve Board from any one particular class of citizens, as does the present law. He will not be as much restricted in his choice as he is restricted by existing law. The present law provides that in making appointments to the Federal Reserve Board he "shall have due regard to a fair representation of the financial and commercial interests and geographical divisions of the country." The pending bill adds "agricultural" to the interests that shall be considered. It is intended to secure a well-balanced board.

The provisions of this bill direct the President in making selections for this board to have due regard for the claims of agriculture, to have a representative on the board who understands and knows something about the demands, the commercial demands, and the financial needs of the agricultural interests. That man may be an agriculturist or he may be a banker; that man may be a business man; that man may be any other citizen provided he knows and understands and is in sympathy with the needs, the commercial needs, of the agricultural interests of this Union. I would remind the gentleman from Ohio that his financial institutions and his commercial

institutions and his industrial institutions that are to be considered for representation on the reserve board will finally fail to prosper and fail to succeed if agriculture does not receive its proper recognition by the financial, commercial, and industrial institutions of this country. If agriculture fails to receive its just reward, its distress and lack of purchasing power will be reflected in business and commerce. Agricultural depression and poor markets for farm products spell poor business for merchants and business men, distress for bankers in the agricultural sections, and general business depression.

Agriculture is the basic industry of the United States. A third of the people are directly engaged in that pursuit. Agricultural products feed and clothe the American people. The interests and needs of agriculture should and must be regarded in connection with the operations of the Federal reserve system. Agricultural credit and currency needs are differentiated from the needs of commercial enterprises, from the needs of industry, and from the needs of finance. Commercial dealings usually only require short-time credits. Whereas agriculture, with only an annual turnover, requires a longer credit period. Mr. Eugene Meyer, jr., managing director of the War Finance Corporation, recently made the statement that agriculture required a credit period of at least nine months. His experience as head of the War Finance Corporation brought him to that conclusion. But for that experience he probably would never have learned that wholesome lesson, though he is a banker and financier of long experience.

AGRICULTURAL REPRESENTATIVE ON FEDERAL RESERVE BOARD.

Mr. Chairman, under this bill the President will be empowered to appoint an additional member of the reserve board, and it is intended that that new member shall have a knowledge of agricultural credit needs, that he shall understand market conditions in the agricultural sections, that he shall bring that knowledge to bear in the discharge of his duties, and that the Federal Reserve Board shall be made a valuable agency to supply credit and currency needs to agricultural interests, in producing crops and in marketing those crops when produced. Another splendid provision of the bill is that prohibiting Federal reserve banks from erecting any building at a cost greater than $250,000 without the consent of Congress having previously been expressly given. This limitation is wise and prevents extravagant expenditures for such purposes.

CONTINUANCE OF WAR FINANCE CORPORATION.

Mr. Chairman, that brings me to the matter of continuing the War Finance Corporation for at least another year. The War Finance Corporation was created to assist in financing the sale of American products at home and in foreign countries. Exporters, bankers, farmers' marketing associations, and selling pools have been able to secure advances from the War Finance Corporation to finance the sale or exportation of farm and other products. Millions of dollars have been advanced to finance the exportation of cotton and wheat. The cattlemen and ranchmen have received material assistance from this agency. Unless continued the law creating the War Finance Corporation will expire on July 1, 1922. The committee has reported a bill continuing its operation until July 1, 1923, and will call up that bill to-day, if it is possible to reach it. I strongly favor the continued existence of the War Finance Corporation, and if the bill is not reached to-day shall urge that it be passed well before July 1. Such action will make possible the continuance of the very helpful and useful functions of that institution especially helpful to agriculture and stock-raising interests.

FREIGHT RATES.

Agriculture and cattle interests have suffered greatly in the past two years. They have suffered not only because of low prices for their products, but they have suffered because of high freight rates—freight rates so high that they were a burden to trade and commerce.

I voted against the Esch-Cummins railroad bill when it was passed by Congress. I spoke against its passage. I pointed out then that its passage would increase freight rates. That forecast came true. Rates were increased after the passage of that bill.

BILL TO REDUCE RATES.

On May 26, 1921, I introduced a bill (H. R. 6642) which, if enacted, would have restored to the Interstate Commerce Commission the power to fix "just, fair, and reasonable" rates, just as that power existed before the passage of the Esch-Cummins bill. Under my bill the guaranty feature of the railroad bill would have been repealed, and the Interstate Commerce Commission would have been empowered to lower all freight rates regardless of the guaranty feature. My bill should have been passed. If it had passed, freight rates could long since have been lowered.

THREE AIDS TO AGRICULTURE AND BUSINESS.

Representation on the Federal Reserve Board, the continuance of the War Finance Corporation, and reduced freight rates are all designed to give agriculture and business in agricultural and stock-raising communities a chance to live, a chance to sell their products at a fair price. I have stood and now stand for all of them. I am gratified that this bill is before us.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STEAGALL. I yield the gentleman one additional minute.

Mr. CONNALLY of Texas. And I think that hand in hand with this bill should go the other bill that is to be acted upon this afternoon, continuing the War Finance Corporation for another period. What is the trouble to-day in America? It is not because we have not goods. It is not because we have not hands that are ready to work; it is not because our people are unwilling to apply themselves to industry, but it is because the people of America have no place to profitably sell their goods. The foreign markets have dried up because the foreign purchasers can not pay in gold. A Republican tariff helps to still further destroy foreign markets. The War Finance Corporation can assist in financing exports of cotton and other farm products to foreign countries in the future even more than it has in the past. These measures can and must be made agencies for great good to agriculture and American business. [Applause.]

The CHAIRMAN. The time of the gentleman has again expired.

Mr. WINGO. I yield 10 minutes to the gentleman from South Carolina [Mr. STEVENSON].

Mr. STEVENSON. Mr. Chairman and gentlemen, I want your attention for a minute to what will be the net result if we pass this bill as amended here as proposed to be amended by the Committee on Banking and Currency. It will simply result in inserting in these classes that are to be considered in appointing a member of the Federal board to two words, "financial" and "agricultural," so that the President in appointing will give due consideration to financial, agricultural, commercial, and industrial interests instead of the commercial and industrial, as it is now. Then, after that, to strike out that provision which will make it mandatory to appoint two members who are expert bankers and financiers. That is all it amounts to if we pass it as amended and, as proposed, I would say from my standpoint it is not worth a cent. What is the use in telling the President that he must consider agriculture? Does not everybody know that the President considers agriculture and every great interest anyway? You do not give him another member whereby he can put an agricultural-minded man on the board. That is what we want done, and it will take away the power immediately to do that. Now, I want to call attention to what the Secretary of Agriculture says about that, and the gentleman from Pennsylvania said the Secretary of Agriculture intimated that it might be very agreeable for him to go on this board. I think the gentleman is mistaken, and that he will not find anything of that kind in the hearings.

Speaking to the general proposition of increasing the membership of the board—

Says Secretary Wallace—

I think it is quite true, as has been said here, that, if you are thinking of a purely administrative body, the larger the body very often the more difficult to administer the affairs of the organization. I have not thought of the Federal Reserve Board as a purely administrative body, but as an institution which determines the general financial and credit policies of the country, and from that standpoint I am not able to agree with the suggestion that a larger membership would be inadvisable.

That is what the Secretary of Agriculture says about it, and he is a man who has a broader conception of the problems of the agricultural interests of this country than any man in this Government since I have been in Washington in any official position. [Applause.]

And in reply to the suggestion of the gentleman from Pennsylvania that possibly Mr. Wallace would like to go on this board, I will say that if this bill is passed, and he is put on this board, I will take off my hat to him and to the President both, because I think he would make a good addition to the board. There is no question of the benefit of it, and it ought to be adopted in such form that the President can do something for that industry.

He says:

On the contrary, it seems to me that the membership of the board, which in time, if not now, will, through the exercise of its administration of the great credit machinery of the country, have a direct influence upon prices and upon business in general should be a cross section of our industrial life, including agriculture—I am not using the words "industrial life" in a restrictive sense. Such a board might well represent a cross section of the entire business life of the Nation.

And I agree with the Secretary of Agriculture, and I think the House ought to reject the amendment offered by the Banking and Currency Committee of this House and adopt the bill as it came from the Senate and give the President an opportunity now to answer the call of the farmers' organizations of this country and give them an agriculturally minded man, and not in months hereafter, and let him begin to function.

Now, Mr. Chairman, there is another feature of this bill that I want to say just one word about. There is a provision that prohibits any Federal reserve bank from spending over $250,000 for building a house in which to operate without the consent of Congress. The committee saw fit to strike that out. I am opposed to that. The committee before struck out an amendment making the limit $500,000, and I say that is enough for the Federal Reserve Board or any Federal reserve bank to spend without having the consent of Congress.

I am opposed to that amendment and I hope the amendment will be rejected. It is said that this is not our money, but that it is the money of the banks. Let us see about that. Let us look just a minute at the seventh section of the Federal reserve act. When the Federal reserve banks are wound up all the surplus that they are putting into these buildings will belong to the Government of the United States, and all the surplus they have over and above what it takes to pay back the face value of the stock goes into the Treasury of the United States. In section 7 it says:

> Should a Federal reserve bank be dissolved or go into liquidation, any surplus remaining after the payment of all debts, dividend requirements as hereinbefore provided, and the par value of the stock shall be paid to and become the property of the United States and shall be similarly applied.

In the report in this bill it is contended that the surplus that the banks are expending on these enormously expensive buildings—$20,000,000 in New York—belongs to the banks and stockholders. I say it does not, because all that they are entitled to is the 6 per cent dividend, and after their liquidation all the surplus of the stock and surplus earnings belong to the Government of the United States; and we ought to put a string on it and stop the extravagance that makes the people cry out to high heaven about the buildings that are constructed and have been constructed by the Federal reserve banks in this country.

Mr. ANDREWS of Nebraska. Will the gentleman yield?

Mr. STEVENSON. I will.

Mr. ANDREWS of Nebraska. Unless the string is made secure, would not these banks be able to utilize the credit of the Government of the United States for individual profit?

Mr. STEVENSON. There is no doubt about that. They can take the money that belongs to the United States and invest it in property that will not be salable when we come to wind up, if we ever wind up, and it is the money of the United States, and we have no right to sit down and allow this extravagance, that has gone on for the last year or two in constructing buildings and purchasing expensive plants, to go on unchecked, and say Congress will not care for any of those things, like a man in the Scripture when they beat somebody in front of the judgment seat.

Mr. KING. Is it not a fact that they have ordered all of these buildings except one?

Mr. STEVENSON. Yes; but they have established all the branches all over this country and have not yet begun the building.

Mr. KING. And they did that to get ahead of this legislation?

Mr. STEVENSON. Yes, sir. They have undertaken to forestall legislation, and all the parent banks are now provided for by contract, except one in St. Louis, and we will certainly deal squarely with St. Louis when we come to it, but Congress should assert its right and say, "We will let you have a building, all right, but we propose to say that you will not get more than you are entitled to and bring about such criticism of the Federal reserve system as may wreck it in the minds of the people and wreck it as a political institution in the near future."

Now, Mr. Chairman, as to the balance of the bill, there is absolutely nothing to it if you adopt the amendments that have been proposed by the Banking and Currency Committee and that were put through that committee by a bare majority of the committee. You might just as well write "finis" across it and throw it in the wastebasket. It is not worth a cent to anybody or to the country, and will be a bagatelle and an insult to the farmers who have asked to be represented on that board. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. McFADDEN. Mr. Chairman, I yield eight minutes to the gentleman from Kansas [Mr. STRONG].

Mr. STRONG of Kansas. Mr. Chairman and gentlemen of the committee, this bill and the one reviving the War Finance Corporation are the two bills now pending before the Congress in which the farmers of the country are most interested. Whether it is admitted that the agricultural interests were deflated in 1920 or not, the farmers of this country believe that they were, and started an investigation to see why it was that their appeals for credit were refused. They discovered that they had no representation on the Federal Reserve Board, and looking into the law they found the act creating the board directed the President to take into consideration the "commercial and industrial interests," but said nothing of the agricultural interests. And so they came to Congress and asked that the agricultural interests of the country be included among those interests to which the attention of the President was directed in the appointment of this board. When they fully considered the matter they found that if they were to have a member appointed upon the board at this time they must increase the membership, otherwise they would be compelled to wait until the expiration of the term of some present member. So the agricultural representatives in the Senate, after a conference at the White House, wrote this bill, in which the members of the Federal Reserve Board were increased to six, and in which agriculture was listed as one of the industries in this country that should be taken into consideration by the President in the appointment of the board. The bill was passed by the Senate and came to the Banking and Currency Committee of the House, where it was bitterly attacked, and the friends of agriculture on the committee had to submit to amendments against increasing the board in order to get the bill out of the committee. Now we are asking that the House defeat the committee amendments and pass the bill as it came from the Senate, which will increase by one the members of the board.

I want to say to the members of this committee that if you do not increase the membership of this board you might as well not pass this bill. If you want to make the farmers wait until the expiration of the term of some member of the board for the President to give agriculture representation on the Federal Reserve Board, leave the law as it is. But if you want to give that representation to the agricultural interests of the country now, you must defeat the committee amendments and increase the membership of the board.

I can say to the membership of this House that if this bill is passed as it came from the Senate I know that the President will appoint a man who is in sympathy with agriculture in this country to the Federal Reserve Board. Now, if you will refer to the hearings had before the committee on the bill you will find that Secretary Mellon is not in favor of increasing the board nor is he in favor of the bill. You will find that Governor Harding of the Federal Reserve Board is not in favor of it.

Mr. BURTON. Mr. Chairman, will the gentleman submit to an interruption there?

Mr. STRONG of Kansas. Yes.

Mr. BURTON. I myself am in favor of increasing the number, but the main argument with them is that the number should be an odd number.

Mr. STRONG of Kansas. Yes; but who ever heard of the Federal Reserve Board locking horns on any question before them? They are all bankers. They know how they want to operate the financial affairs of this country. No one ever heard of their coming to a deadlock on that.

The Merchants' Association of New York wrote to the chairman of the Committee on Banking and Currency on February 11, 1922, and inclosed their resolutions on this subject, and this is what they say:

> The Merchants' Association of New York views with regret and grave concern the action of the United States Senate in passing a bill enlarging the membership of the Federal Reserve Board for the purpose of adding to it a member representing the agricultural interests.

It is the same with respect to the Pennsylvania Bankers' Association, who, on January 16 of this year, wrote to Mr. McFADDEN, the chairman of the Committee on Banking and Currency, in part, as follows:

> In the name of the Pennsylvania Bankers' Association I hereby express unreserved disapproval of the pending bills requiring the appointment of a representative of the agricultural interests on the Federal Reserve Board and appeal to you to use your influence to defeat the proposed legislation.

It is the same with the Association of Credit Men, of Toledo, Ohio. On January 19, 1922, they state:

> DEAR SIR: It has come to our attention that a bill has been presented to the Senate and passed by them making it obligatory for the President to appoint a farmer as a member of the Federal Reserve Board.
>
> The Toledo Association of Credit Men, numbering 300 wholesalers, bankers, and manufacturers, and being one of 134 similar organizations in the United States, believe it would be unwise to have any particular group or class of people represented on the board.

Of course the bankers do not want a representative of agriculture on the Federal Reserve Board. Why? Is it possible

that with the Federal Reserve Board composed of five bankers, and the Secretary of the Treasury and the Comptroller of the Currency also bankers, they will be terror-stricken because one man goes on that board favoring the interests of agriculture?

Now, let us see what the farmers of the country say about it. Gray Silver, representing the American Farm Bureau, is in favor of the bill as it came from the Senate. Mr. Barrett, president of the Farmers' Union of America, is in favor of it. Mr. Atkeson, of the National Grange, is in favor of it. And what does Secretary of Agriculture Wallace say? This is what he said before our committee:

> Speaking to the general proposition of increasing the membership of the board, I think it is quite true, as has been said here, that if you are thinking of a purely administrative body, the larger the body, very often the more difficult to administer efficiently the affairs of the organization.
>
> I have not thought of the Federal Reserve Board as a purely administrative body, but rather as an institution which determines the general financial and credit policies of the country, and from that standpoint I am not able to agree with the suggestion that a larger membership would be inadvisable. On the contrary, it seems to me that the membership of a board which in time, if not now, will, through the exercise of its administration of the great credit machinery of the country, have a very direct influence upon prices and upon business in general should be a cross section of our industrial life, including agriculture—I am not using the words "industrial life" in a restrictive sense. Such a board might well represent a cross section of the entire business life of the Nation. I am not able to see the force in an objection to the increase of the membership of that board either from four to six or to any other number. It is highly desirable that the membership should be sufficiently large to bring into the councils of that board a direct personal knowledge of the business and industries in which the people in the various sections of this country are engaged.
>
> I make a distinction between a board whose chief business it is to determine policies and a board whose chief business it is to carry on the purely administrative affairs of an institution. In the one case, the larger the board the more difficult to administer the business; in the other case, the larger the board, within reasonable limits, the wiser the conclusions that board will reach.
>
> Now, for my part, I see not only no objection to increasing the membership but I can see very decided advantages in doing so, and no disadvantages in increasing that membership within reasonable limits.
>
> * * * * * * *
>
> Let me give you a homely illustration of the need of having various sections represented on this board and the various industries. Take the case, for example, the general policy of extending credit on grains and live stock. Take the case of corn and cattle. In the corn belt a large surplus of corn is produced, and a large part of that is fed to cattle or hogs, say 35 to 50 per cent to hogs. You can imagine this situation, where a policy might be determined which would restrict loans on corn and give very liberal loans on live stock to which the corn naturally would be fed. What would be the result? You would put up the price of feeding cattle and feeding hogs and you would lower the price of corn.
>
> That is not a matter of simply making the loan; it is a general policy which might be pursued, and that same thing applies to business throughout the country. It is in the power of this board—I am not talking now of anything that has been done in the past—to so administer the credit machinery of the Nation as to increase or decrease prices in a very large way between industries or as between other activities. For that reason it seems to me highly desirable that the various larger activities of this country should be represented on the board. Agriculture should be represented, not necessarily by a man who comes from the farm but by a man who is agriculturally minded, who understands and is appreciative of agricultural conditions, and at the same time has real training as a banker. It is absurd to suggest that a man who does not understand general financial matters should be made a member of this board. I do not think that anybody has suggested it, and yet some criticisms that have been made seem to assume that the thought is to go into the field and take a man who knows nothing of banking and finance and credits and make him a member of this board. Such criticisms are unfair. It is important that there should be on this board some men who are agriculturally minded, who appreciate the effect upon agriculture and upon prices of certain large policies in administering our great credit machinery.
>
> And the same thing is true of other industries. As I said to begin with, I think the membership of this board should be a fair cross section of the business, industrial, and agricultural life of the Nation, to the end that the general policies which influence prices, which influence the welfare of these various interests shall be fair, intelligent policies. You have got to go further and you have got to consider our relations with other nations in the administration of our credit machinery and their effect on the industries of all of this country.
>
> So that, Mr. Chairman, as I say, I can see no objection to the necessary increase in the membership of the board, and I think it is highly desirable that inasmuch as the law already provides for representation—industrial and commercial—you should add agriculture, which certainly is the fundamental industry of this country, no matter how we may dispute as to the actual number of dollars produced. Surely all must agree that in considering the financial, industrial, and commercial interests of the country agriculture also should be included.

Now, gentlemen——

Mr. MOORE of Virginia. Mr. Chairman, may I ask the gentleman a question?

Mr. STRONG of Kansas. Certainly.

Mr. MOORE of Virginia. If the bill as reported here with the amendments made by the committee passes the House and the Senate, leaving the number of the members of the board just as at present, there would be no opportunity, as I understand, for the appointment of an agricultural representative at this time?

Mr. STRONG of Kansas. No; and there would be no use in passing the bill.

Mr. MOORE of Virginia. There would be no opportunity to appoint such a representative until next August, and should no such appointment be made then, there would be no opportunity for such an appointment until two years thereafter?

Mr. STRONG of Kansas. That is correct; but if you want to pass the bill as the farmers are asking for it, vote down the committee amendments and pass it as it came from the Senate. [Applause.]

Mr. McFADDEN. Mr. Chairman, I yield two minutes to the gentleman from New Jersey [Mr. APPLEBY].

The CHAIRMAN. The gentleman from New Jersey is recognized for two minutes.

Mr. APPLEBY. Mr. Chairman, as a member of the Banking and Currency Committee I had the pleasure of listening to the arguments for and against this important measure. Strong arguments were presented for as well as against the bill now before us. In listening to the many reasons presented why the bill should or should not be enacted into law, I reached the conclusion that the agricultural interests of this country should be represented on this important board. The majority of the members of the committee were of the same opinion, and, consequently, the committee, after mature deliberation, reported favorably the measure now before us. In part the bill reads:

> In selecting the appointive members of the Federal Reserve Board, not more than one of whom shall be selected from any one Federal reserve district, the President shall have due regard for a fair representation of the financial, agricultural, industrial, and commercial interests, and geographical divisions of the country.

We all agree that the agricultural interests are vast and are among the most important in the country. I agree with Secretary Wallace that an agricultural-minded man will be a great asset to this board. From my own experience and observations I know a number of farmers who are valuable directors of banks. They are uniformly deliberate and fair-minded men. Agriculturists connected with banks in various parts of the country who have appeared before our committee have impressed me with the thought that these so-called "country bankers" are extremely competent to serve on the Federal Reserve Board. Gentlemen, I thank you for the few minutes allotted me on this important subject. [Applause.]

Mr. WINGO. Mr. Chairman, I yield the remainder of my time to the gentleman from Alabama [Mr. STEAGALL].

The CHAIRMAN. The gentleman from Alabama is recognized for 14 minutes.

Mr. STEAGALL. Mr. Chairman, no one appreciates our great Federal reserve system more than I do. Under its operation the legitimate business interests of the country experienced for the first time their liberation from the little coterie of financiers who for many years controlled the supply of credit, dictated prices, and held the business interests of the country practically in their power. Under the new system the Nation enjoyed a prosperity unparalleled in our history. The producing masses of the South and West were given a decent chance and enjoyed a progress and prosperity unknown before. I think it is agreed on all hands that the Federal reserve system alone made it possible for our Government to play its part in financing and winning the great World War. Under this system the masses of our people will recover from the shock of the great storm that shook the foundations of the world and get on their feet again. I do not say for a moment that the Federal Reserve Board has made no mistakes. I think they have, and I have not hesitated to criticize them when I thought so. I have sought in an humble way, whenever I have had opportunity, to aid in correcting mistakes and by constructive methods to cure any errors which have crept into the system. No thoughtful man could have expected that all mistakes could have been avoided even in normal times. Surely conditions during and subsequent to the war embodied difficulties which could not be handled without mistakes. Such was true of bankers in general and of all pursuits having place in our national life.

The Federal reserve system needs constructive, helpful criticism. I have supported every amendment to the law which I regarded as helpful. I have supported every change proposed by which its provisions could be safely liberalized. I expect to continue to do so. I voted to report the bill now before us. I hope it will pass, though I do not regard it as of great importance. The bill, even as it passed the Senate, does not mean a great deal. It does not mean anything as now presented by the committee. [Applause.]

The original act provided that in appointing members of the Federal Reserve Board due regard should be paid to the commercial, industrial, and financial interests of the country. I do not suppose it was thought that any man who would ever serve this great agricultural Nation as President would be unmindful

of our agricultural interests. But during the disturbed conditions in the agricultural sections of the country in recent months and since certain criticism against the Federal Reserve Board in this connection, it has been pointed out that the original act specifically designated the commercial, industrial, and financial interests of the country for consideration in the selection of members of the Federal Reserve Board without mentioning agricultural interests. Since this discussion and in view of the apparent discrimination shown by the letter of the law, it has been insisted that the act should be amended so as to name agricultural interests. Possibly to do so may tend to relieve the feeling which exists to the effect that agriculture has not been treated fairly. I am perfectly willing to amend the act so as particularly to mention agriculture, and to treat it as deserving the same consideration as commerce, industry, and finance. But the amendment may mean something or it may not. After all, it leaves us right where we were when we started.

The whole thing will still be in the hands of the President as regards the appointment of members of the Federal Reserve Board. If he desires that a man agriculturally minded, or who has the viewpoint of one identified with agriculture, be appointed, the President will have all that great class of our population from whom to select a new member of the board, but this will give only one appointee out of a board of seven or eight members. So, if we are to proceed upon the idea that this one member of the board is the only one who has due regard for the agricultural interests of the country, what would be accomplished? One vote would not control the entire board. But some benefit may come from having a man on the board who will approach questions from the viewpoint of agriculture; and since the question has been raised, I think it well enough to amend the law for this purpose. It may result in some good.

The Senate had in mind a plan to add a member to the board, which it was expected would result in the selection by the President of an appointee peculiarly in touch with the needs of agriculture, and whose appointment would be acceptable to the farmers of the country. If the Senate bill is accepted, the President will be free to appoint such a man without disturbing the board as at present constituted. Therefore, if we are going to pass the bill at all, we should take it as it came from the Senate.

The committee has also amended the Senate bill by striking out the provision which limits the amount to be expended for the construction of buildings for Federal reserve banks.

I think it was a mistake to expend the large sums which have been spent and contracted for in the erection of buildings for Federal reserve banks. For this reason I hope that the Senate provision will be adopted, which makes it necessary that we vote down the committee amendment striking out this provision. But only one of the Federal reserve banks will be affected by this provision, and I take it that that bank will have taken necessary steps to construct a building satisfactory to the officers of the bank before this act will become a law. However, the legislation will serve to prevent extravagant expenditures for branch buildings in the future. But, gentlemen, when we get through with all this, no man will contend that the Federal reserve system has been changed in such substantial way as to meet the requirements of agriculture. Everybody who has given study to the question recognizes that the farmer needs a longer-term credit in financing yearly crops and raising live stock than is to be afforded by deposit banks. So I venture to say that Congress might employ its time with more benefit to the farmers of the country in amending the Federal reserve act in some of its essentials, so that agricultural paper might be given more advantageous rediscount privileges, or by establishing some new credit agency, really adapted to the needs of our farmers. In the presence of such a necessity, the efforts devoted to the bill before us are almost as so much idle talk.

While we are engaged in consideration of this bill the farm loan act is in need of amendment to make that legislation responsive to the requirements of agriculture. The farm loan act is the greatest piece of legislation ever passed, specifically for the benefit of the farmer. Yet we have allowed that great system to be choked down for many months and to drag along in a half-handed way, unable to take care of the demands for loans. When the act was sustained by the Supreme Court the friends of the farm loan system, recognizing the peculiar need for the kind of credit which the system was intended to afford, undertook to secure the passage of a bill authorizing the Secretary of the Treasury to carry deposits with the land banks to the extent of $50,000,000 to furnish sufficient capital or turnover to enable the banks to market their bonds and resume business upon a scale commensurate with the demands upon the banks. Some of us wanted to offer greater relief, but we were unable to bring a majority of the Committee on Banking and Currency to our way of thinking. Finally we succeeded in reaching an agreement to report a bill authorizing the Secretary of the Treasury to deposit funds with the land banks to the extent of $50,000,000. We instructed the chairman to ask for a special rule for the consideration of the bill. After the matter drifted for about 10 days the chairman of the committee called the Banking and Currency Committee together again and insisted that after advising with others it had been decided that the amount carried in the bill should be reduced to $25,000,000. This was done against the insistence of every member of the minority on the committee. The bill was reported and passed accordingly.

Some of us carried the fight to the floor of the House and insisted on increasing the amount of relief to be afforded the land banks; but we were defeated. Since then the land banks have been dragging along, unable to meeet the demands upon them. In the meantime Congress has been passing other legislation designed to afford better credit facilities to the farmer. Some of the land banks have been refusing to receive applications for loans or to furnish blanks to applicants. It is deplorable that this great agency of credit, which has been upheld by the highest court in the land, which is the safest and most practicable method yet found for furnishing credit to the farmer upon reasonable terms and interest rates, and to which we are permanently committed, should not have been utilized to afford effective relief during the last year and a half.

Mr. STRONG of Kansas. Will the gentleman yield?

Mr. STEAGALL. I have not sufficient time. I am sorry. I do not hesitate to say that our time could have been devoted with better results in effort to put the farm loan banks of the country in condition to do business than in splitting hairs over amendments to the Federal reserve act which carry little or no practical results.

There is another point, Mr. Chairman, at which the farmer needs relief and is not getting it. The railroads of the country are levying rates upon the agricultural products of the Nation that are absolutely destructive of prosperity and in many instances positively prohibitive.

The products of the farmer are rotting at his door because he has no way of transporting them to the centers of consumption. If we were to take the gold and supply it free to the farmers of my State and to the banks there with which to pay every dollar they owe and give them enough to finance a new crop the relief would not last unless there were coupled with it a reduction in transportation charges. There can be no real prosperity for the farmer until he is relieved of the unjustifiable transportation rates imposed by the railroads. But a new light has dawned and a new hope has arisen! We learn through the press that the President has appealed to the generosity of the railroads! What a confession of impotency and helplessness! It is a serious indictment against this administration that no relief has been obtained save such as the railroads have voluntarily put into effect. Maybe the President was somewhat justified in the conclusion that he should throw himself upon the generosity of the railroad owners!

Mr. ANDREWS of Nebraska. Will the gentleman yield?

Mr. STEAGALL. I have not the time. I call attention to another thing which the farmers of the country desire and which has not been done. They have been speaking through their organizations as with one voice for the development of the great property at Muscle Shoals on the Tennessee River and urging that its development be turned over to that great genius, Henry Ford, the master mind of the modern industrial world, that the great power and machinery wasting there might be utilized in benefit to agriculture, which would extend to all classes and all sections of the Union.

The property stands idle. An investment of the Government, amounting to about $100,000,000, lies unused, while the Government spends about $500,000 yearly in protecting that investment. The Ford offer was submitted last summer. It slept down in the office of the Secretary of War until some time in February or March of this year. Since then all time has been devoted to holding hearings and taking testimony from special interests that are opposed to the successful development of this great property. Thomas A. Edison, the greatest scientist on earth, has indorsed the Ford proposition and says this property can be developed to furnish the farmers of the country fertilizers of a better quality and at a lower price. Not only have we failed to take advantage of this offer without delay but even while this opportunity is before us unimproved, we are about to levy an enormous tariff of $50 a ton on potash used by farmers of the country as fertilizer. [Applause.] Farmers of the United States use about one-quarter of a million tons of

potash. About one-fifth of this amount is produced in the United States. A few men with just a few millions invested, and who made back over and over again in profit from the Government during the war every dollar invested by them, are demanding this tribute and placing this indefensible burden on the farmers of the country at this time when they are entitled as never before to at least a just, if not a generous, policy on the part of the Government.

Ah, gentlemen, there are measures of concern to farmers more important than merely writing into the Federal reserve act a provision directing the President's exercise of discretion in appointing members of the Federal Reserve Board. Let us show our interests in the farmers of the country in dealing with these substantial measures, which afford opportunity for substantial service, and which they can recognize and put their hands on. I hope this Congress will take up and accomplish the larger and better tasks. [Applause.]

Mr. McFADDEN. Mr. Chairman, I call attention to the fact that the railroad rates which the gentleman has referred to were levied by the Interstate Commerce Commission appointed by a previous administration. [Applause.] Mr. Chairman, I am not willing to agree to some of the statements made here to-day in criticism of the Federal Reserve Board. I think the Federal Reserve Board and the administration of the system under Governor Harding has been a great success. If I was at all afraid that the President of the United States would not reappoint Governor Harding on the board, and by increasing the membership of the board to eight he would reappoint him, I certainly would vote for the amendment as proposed here to-day. I believe that Governor Harding's administration of the board has been a most excellent one, and when we stop to consider the great responsibilities and duties that were placed on the board during the period of great stress we can only pick out one or two things subject to criticism. That system has carried the country over a very trying period. The proposition to amend the act was largely aimed at Governor Harding. The proposal in the other body of this Congress was aimed directly at him, and one Senator offered an amendment providing that the next appointed member should be an agriculturist for the sole purpose of keeping Governor Harding off the board. I say that his record deserves consideration by Congress and the people of this country, and I hope the President of the United States, in his wisdom, will recognize the great work that he has done. The financial people of the country are recognizing it, and so are the agriculturists, just now as we are getting away from the immediate stress so that they can get a clearer view of what happened, and I want to have read a resolution adopted by a group of Iowa bankers at a recent meeting at Council Bluffs, Iowa.

The Clerk read as follows:

Resolutions adopted by a group of Iowa bankers at a recent meeting at Council Bluffs, Iowa.

The Federal reserve system has made a splendid record for service during the war and since the armistice and is entitled to the indorsement of the people. Because of that service, unquestionably hundreds of banks and business houses had been saved from failure and thousands of individuals saved from bankruptcy during the business cycle of expansion, extravagance and speculation, deflation and inflation, which was the inevitable aftermath of war.

It would be too much to expect that a financial institution developing from a beginning to such large proportions in a period of seven years would be a perfect machine. Constructive and intelligent criticism should always be welcomed. In any changes, however, which may be made in the workings of that system it should be remembered that its chief function is to hold the reserves that are carried against the deposits in our commercial banks, and that the safety of these deposits requires that all investments made from such reserves should be of a short and liquid character.

We especially deprecate the efforts from some sources to bring this institution and its management into the contentions of politics and deplore the uninformed criticisms of this institution and misrepresentations which attempt to hold it responsible for everybody's misfortunes, the greater number of which have grown out of the natural and inevitable working of laws of supply and demand, both at home and abroad.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That section 10 of the Federal reserve act, approved December 23, 1913, is amended to read as follows:

SEC. 10. A Federal Reserve Board is hereby created which shall consist of eight members, including the Secretary of the Treasury and the Comptroller of the Currency, who shall be members ex officio, and six members appointed by the President of the United States, by and with the advice and consent of the Senate. In selecting the six appointive members of the Federal Reserve Board, not more than one of whom shall be selected from any one Federal reserve district, the President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographical divisions of the country. The six members of the Federal Reserve Board appointed by the President and confirmed as aforesaid shall devote their entire time to the business of the Federal Reserve Board and shall each receive an annual salary of $12,000, payable monthly, together with actual necessary traveling expenses, and the Comptroller of the Currency, as ex officio member of the Federal Reserve Board, shall, in addition to the salary now paid him as Comptroller of the Currency, receive the sum of $7,000 annually for his services as a member of said board.

The Secretary of the Treasury and the Comptroller of the Currency shall be ineligible during the time they are in office and for two years thereafter to hold any office, position, or employment in any member bank. The appointive members of the Federal Reserve Board shall be ineligible during the time they are in office and for two years thereafter to hold any office, position, or employment in any member bank, except that this restriction shall not apply to a member who has served the full term for which he was appointed. Of the six members thus appointed by the President, one shall be designated by the President to serve for two, one for four, one for six, one for eight, and the balance of the members for 10 years, and thereafter each member so appointed shall serve for a term of 10 years, unless sooner removed for cause by the President. Of the six persons thus appointed, one shall be designated by the President as governor and one as vice governor of the Federal Reserve Board. The governor of the Federal Reserve Board, subject to its supervision, shall be the active executive officer. The Secretary of the Treasury may assign offices in the Department of the Treasury for the use of the Federal Reserve Board. Each member of the Federal Reserve Board shall within 15 days after notice of appointment make and subscribe to the oath of office.

The Federal Reserve Board shall have power to levy semiannually upon the Federal reserve banks, in proportion to their capital stock and surplus, an assessment sufficient to pay its estimated expenses and the salaries of its members and employees for the half year succeeding the levying of such assessment, together with any deficit carried forward from the preceding half year.

The first meeting of the Federal Reserve Board shall be held in Washington, D. C., as soon as may be after the passage of this act, at a date to be fixed by the reserve bank organization committee. The Secretary of the Treasury shall be ex officio chairman of the Federal Reserve Board. No member of the Federal Reserve Board shall be an officer or director of any bank, banking institution, trust company, or Federal reserve bank, nor hold stock in any bank, banking institution, or trust company; and before entering upon his duties as a member of the Federal Reserve Board he shall certify under oath to the Secretary of the Treasury that he has complied with this requirement. Whenever a vacancy shall occur, other than by expiration of term, among the six members of the Federal Reserve Board appointed by the President, as above provided, a successor shall be appointed by the President, with the advice and consent of the Senate, to fill such vacancy, and when appointed he shall hold office for the unexpired term of the member whose place he is selected to fill.

The President shall have power to fill all vacancies that may happen on the Federal Reserve Board during the recess of the Senate by granting commissions which shall expire 30 days after the next session of the Senate convenes.

Nothing in this act contained shall be construed as taking away any powers heretofore vested by law in the Secretary of the Treasury which relate to the supervision, management, and control of the Treasury Department and bureaus under such department, and wherever any power vested by this act in the Federal Reserve Board or the Federal reserve agent appears to conflict with the powers of the Secretary of the Treasury, such powers shall be exercised subject to the supervision and control of the Secretary.

The Federal Reserve Board shall annually make a full report of its operations to the Speaker of the House of Representatives, who shall cause the same to be printed for the information of the Congress.

Section 324 of the Revised Statutes of the United States shall be amended so as to read as follows: There shall be in the Department of the Treasury a bureau charged with the execution of all laws passed by Congress relating to the issue and regulation of national currency secured by United States bonds and, under the general supervision of the Federal Reserve Board, of all Federal reserve notes, the chief officer of which bureau shall be called the Comptroller of the Currency and shall perform his duties under the general directions of the Secretary of the Treasury.

No Federal reserve bank shall have authority hereafter to enter into any contract or contracts for the erection of any building of any kind or character, or to authorize the erection of any building, in excess of $250,000, without the consent of Congress having previously been given therefor in express terms: *Provided*, That nothing herein shall apply to any building now under construction.

The Clerk read the following committee amendment:

Page 1, line 6, strike out the word "eight" and insert the word "seven."

Mr. WINGO. Mr. Chairman, as I understand, we are to vote on each committee amendment separately, so there is no need of reporting them all at once.

The CHAIRMAN. The amendments will be acted upon as they are read.

Mr. WINGO. Mr. Chairman, other Members have called attention to what is back of this amendment. The bill as it passed the Senate amended the law so that there would be six appointive members, and that would mean an additional member. The committee amendment simply kills that amendment to the law as made by the Senate; and if you adopt the committee amendment you leave the law as it stands, with five appointive members on the board. There is no use dodging the purpose. The bill has been heralded over the country as a proposal to give the farmers a representation on the Federal Reserve Board. It has been openly stated in the Senate, it has been openly stated upon the highest authority in the newspapers, that the President has promised that if you would give an additional member he would appoint a "dirt farmer" as a member of the Federal Reserve Board. Ordinarily this side of the House takes the position that it would oppose any increase in the number of offices which the opposite party could fill by one of its own members. But this goes beyond that question; and we Democrats have taken the position that we are perfectly willing to enlarge the board, to give the Republican President the power to fill another important position, because we believe

that it will have a fine effect if he selects as a member of that board a representative of agriculture.

Gentlemen may say that it will not amount to anything, assuming that the farm member would be outvoted; but, gentlemen, if you make it possible for the President to appoint a representative of agriculture on that board it will have a fine effect on agriculture and upon the mind of the American farmer, and for that reason I think it will be worth the additional burden by putting on an additional member of the board, for in the last analysis the expense does not come out of the Treasury of the United States but out of the banks themselves. That is all there is involved in it; and if you really and sincerely want to have agriculture represented on the Federal Reserve Board, if you want to give the President an opportunity to carry out what you have heralded as his intention, give the President the opportunity to appoint as an additional member a dirt farmer, you will vote down the committee amendment. We Democrats are united in favor of giving agriculture a representative on the Federal Reserve Board; and if enough Republicans will join us and vote down the committee amendment, the President then will have the opportunity to do as he has promised and make such appointment.

Mr. TINCHER. Mr. Chairman, ordinarily I do not agree with the sentiment of criticizing public officials on the floor of the House, and I do not think criticism should ever be indulged in unless the person indulging in the criticism is somewhat familiar with the situation and is willing to be specific in respect to the facts. I would like to be able to agree with the distinguished gentleman from Ohio [Mr. BURTON], for whose opinion ordinarily, unless absolutely informed otherwise, I have the highest regard, but I hope, Mr. Chairman, that we have not forgotten that the policy advocated by the distinguished gentleman from Ohio in respect to deflation after the war was not carried out by the Federal Reserve Board. Instead, what did they do? They came to the House of Representatives and asked us for an amendment to the Federal reserve act permitting them to put in effect what they called a graduated scale of interest charges for the purpose of reconstruction after the war. I had the pleasure of opposing that on the floor of the House. What was the result of it? They started their deflation under the leadership of this man, Governor Harding, and they charged the member banks of my section of the country, who were loaning for agricultural purposes alone, as high as 60 per cent interest on the money, thus insuring to the country that they would destroy agriculture or have deflation, while at the same time in New York the Federal reserve bank was furnishing money for industry at 6 per cent.

Mr. Chairman, I want to say that that discrimination against the basic industry of this Nation is unpardonable and will go down in history as the crowning infamy to destroy the present leader of the Federal Reserve Board. If President Warren G. Harding wants to send to the people of my section of the country a message that he has no regard for their rights and acts at the suggestion of some clique of eastern bankers, he will reappoint Mr. Harding of the Federal Reserve Board, but if he wants the agricultural interests of the country to understand that they have a friend in the White House, he will never make that reappointment. [Applause.]

Mr. Chairman, I am for the Senate bill. There will be but one vacancy, and that is to come in August. The horrible example of what the Federal Reserve Board without a man on it interested in agriculture has done for agriculture should make the American Congress willing to act, not to-morrow, but to-day, and we should give President Warren G. Harding an opportunity to put upon that board a representative of the basic industry of the country, and not wait 24 hours to do it. [Applause.] I hope, Mr. Chairman, that every amendment suggested by the committee to the Senate bill will be voted down. [Continued applause.]

Mr. LUCE. It is unfortunate that gentlemen from Kansas should get their wires crossed. If they would have more consultation with each other they might avoid such unfortunate declarations as that to which we have just listened. There is another gentleman from Kansas, he whom the newspapers have freely announced in late months as the chairman of the so-called agricultural bloc. I have already referred this afternoon to the report of the Commission of Agricultural Inquiry. Of this commission the chairman of the so-called agricultural bloc was a member. The report of this commission was unanimous except that in one particular the gentleman from New York [Mr. MILLS] differed from his associates. This commission, including the gentleman from Kansas, who is the chairman of the agricultural bloc, said that its only criticism of the policy of the Federal Reserve Board was not that it did not deflate but that it did not begin the deflation quick enough. Gentlemen may go and look for themselves and see how far apart these spokesmen for Kansas stand in their verdict on this question. I appeal from the gentleman in front of me to the chairman of the agricultural bloc and the report in which he says the only fault he finds with the board is that it did not begin the deflation quick enough.

As to the governor of the Federal Reserve Board, I stand with the chairman and with nearly every member of the Committee on Banking and Currency. That committee has had the opportunity to watch at close range the course of the Federal Reserve Board. As a result, its members, regardless of party, are almost a unit in believing that the best interests of the country call for the continuance of Governor Harding in his position. Reappointment should come to him as a reward for work wonderfully done. It should be given to him in resentment of the slanders and the libels that unjust critics have showered on his efforts. I join with those who call for his reappointment in order to vindicate him and to vindicate his board, so that the administration may tell the country it will pay no heed to all this unwarranted abuse.

Mr. TINCHER. Mr. Chairman, will the gentleman yield?

Mr. LUCE. I have only five minutes.

Mr. TINCHER. I was specific in the facts. Will the gentleman deny anything I said that that board did? Did they not go and lobby for this bill? Did they not go to Kansas City and put in that rate? Did they not charge the member banks of my section of the country as high as 60 per cent and force them to sell their agricultural products while the rate in New York was but 6 per cent?

Mr. LUCE. Oh, I merely asked the gentleman to get together with the other gentleman from Kansas, the chairman of the agricultural bloc.

Mr. TINCHER. Perhaps the gentleman will be surprised that I do not happen to know what was in some report, but I ask him not to think for a minute that we are not together. Do not get that into your head.

Mr. LUCE. For one other purpose I want to enter an appeal. This time it is from my Democratic friends who have to-day spoken on this floor to another Democrat, a Senator, who in one of the most remarkable addresses ever delivered in either branch of Congress, an address conspicuous for its oratorical excellence, for its ample and exact statement of facts, for its power and force, defended the Federal Reserve Board. That address did high credit to his party as well as to himself. I appeal from those of his partisans who have spoken here to-day to the man who perhaps more than any other one man was responsible for giving the Federal Reserve System the form it took. For adequate defense against the aspersions that to-day have been cast on it once more, I refer you to the unanswerable argument of the Senator from Virginia.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. McFADDEN. Mr. Chairman, in support of the amendment I take this opportunity to make a brief statement in regard to the deflation policy of the Federal Reserve Board, referred to by the gentleman from Kansas [Mr. TINCHER]. If the gentleman will go to the records of the Federal Reserve Board, he will find that the Federal Reserve Board went on record officially in regard to deflation a year before deflation took place. The facts are that the domination of the Secretary of the Treasury at that time prohibited putting into operation what would have been an orderly deflation.

Had the then Federal Reserve Board had their way at that time in 1918 and 1919, and had they been permitted to announce to the country a year before they did their deflation policies, there would have been an orderly deflation and the men who were engaged in production should not have been permitted to go ahead and produce the great quantity of foodstuffs which they did, and which afterwards they had to suffer a loss by the sudden deflation due to the fear of the Treasury. I think it is only fair to put this blame where it belongs in regard to the question which has just been raised and stop blaming the Federal Reserve Board. The deflation was world-wide, and the records prove the fact——

Mr. STEVENSON. Will the gentleman yield for just one question?

Mr. McFADDEN. I will.

Mr. STEVENSON. Was not that policy necessitated by the fact that we had to sell $5,000,000,000 of Victory loans, and if they were deflated we could not possibly sell them?

Mr. McFADDEN. That, I believe, was the theory advanced by the Secretary of the Treasury at that time, although I believe this, that if the Secretary of the Treasury had appealed to public-spirited citizens and acted wisely, he could have sold the bonds; the people would have bought; then these people

would have supported the Treasury if the facts were made known to them. The public never refused to buy the Government's issues of bonds.

Mr. HOCH. And having permitted the policy of inflation to continue for such a long period, does the gentleman think it was wise or proper to begin such a drastic deflation policy?

Mr. McFADDEN. I am not in favor of a drastic deflation policy any more than any other gentlemen. It is a very unfortunate affair, but it is due to the fact that we had to make a sudden beginning, this wild extravagance had to stop some time, and we had to begin somewhere. If the Federal Reserve Board had not been interfered with by the Treasury, we would not have had this serious time of deflation—nothing could stop it at that late date.

Mr. KING. What year was the Victory loan placed?

Mr. McFADDEN. 1918.

Mr. WINGO. I gather from my friend's statement he agrees with this so-called joint committee inquiry report referred to, and is of the opinion that the farmer was skinned just a year too late.

Mr. McFADDEN. I do not agree with the gentleman's words in that respect at all. No one was out to skin the farmer at all. It was a condition no one could help.

Mr. WINGO. What else was to be expected but what has developed?

Mr. McFADDEN. If the farmer and all others had been advised a year or two before what the action of the Federal Reserve Board desired, the farmer would not have planted such large crops and would have marketed his crops already on hand at good prices, but the Secretary would not let the warning go out.

Mr. WINGO. That would be very delightful, to tell the farmer to let his soil lie out. That is the trouble with you gentlemen, you do not know anything about agriculture.

Mr. MORGAN. Will the gentleman yield? In view of the fact that the gentleman has made a study of finance and the deflation policies of the Federal Reserve Board, will the gentleman explain to the committee just what element was responsible for the discrimination in the production of crops resulting in a serious depression of agriculture but maintaining industrial interests to the extent of $30,000,000,000 artificially where agriculture was deflated to below normal?

Mr. McFADDEN. I can not subscribe to that. The statement of the actual figures and the actual situation do not justify a statement of that kind. Mr. Chairman, inasmuch as the amendment just offered and several other amendments in the bill apply to the change of number of the membership of the board, I would suggest that we vote on those amendments which involve a change in the membership en bloc.

The CHAIRMAN. The time of the gentleman has expired. The time for debate has been exhausted.

Mr. WINGO. Let me offer this suggestion, that the chairman ask unanimous consent that the other committee amendments affecting the size of the board be now reported and that all of them shall be voted on en bloc. That will be acceptable to us.

Mr. McFADDEN. I make that request.

Mr. DOWELL. That amendment is in the first paragraph of the bill.

Mr. WINGO. There are several places, or, in other words, those which affect the size of the board.

The CHAIRMAN. Without objection, the Clerk will report all of the amendments——

Mr. BEGGG. Mr. Chairman, a parliamentary inquiry: How can we vote on all of the amendments in regard to the size when they vary in number? One is six, another eight——

The CHAIRMAN. The Chair's understanding is that there is only a difference between five to six.

Mr. WINGO. The eight members include the ex officio members; the six are appointive members.

The CHAIRMAN. The difference between the committee amendment and the Senate bill is the difference of between five and six. The Clerk will report the additional amendments.

The Clerk read as follows:

Page 1, line 8, strike out "six" and insert "five." Page 1, line 10, strike out "six" and insert "five." Page 2, line 4, strike out "six" and insert "five." Page 2, line 23, strike out "six" and insert "five." Page 3, line 3, strike out "six" and insert "five." Page 2, line 25, strike out the words "the balance of the members" and insert the word "one." Page 3, line 3, strike out the word "six" and insert the word "five." Page 4, line 8, strike out the word "six" and insert the word "five."

The CHAIRMAN. Is there objection to voting upon these amendments en bloc? [After a pause.] The Chair hears none.

Mr. SWING. Mr. Chairman, I rise in opposition to the amendments.

The CHAIRMAN. The gentleman from California is recognized.

Mr. SWING. Mr. Chairman and gentlemen of the committee, this proposal to add an additional member to the Federal Reserve Board is here because there is an urgent need that agriculture and its interests be heard by this board.

I can not understand how men can continue to deny that the deflation policy adopted by the Federal Reserve Board was not deliberately aimed at the farmers of this country. I was present at a meeting of the bankers of southern California, held at El Centro, in my district, in the middle of November, 1920, when W. A. Day, then deputy governor of the Federal Reserve Bank of San Francisco, spoke for the Federal reserve bank, and delivered the message which he said he was sent there to deliver. He told the bankers there assembled that they were not to loan to any farmer any money for the purpose of enabling the farmer to hold any of his crops beyond harvest time. If they did he said the Federal reserve bank would refuse to rediscount a single piece of paper taken on such a transaction. He declared that all the farmers should sell all of their crops at harvest time unless they had money of their own to finance them, as the Federal reserve bank would do nothing toward helping the farmers hold back any part of their crop, no matter what the condition of the market.

Mr. COOPER of Wisconsin. Did the gentleman from California hear that?

Mr. SWING. I did; I think I was the only person present who was not a banker. This was, in a way, confidential advice being given by the Federal reserve bank for the guidance of the smaller banks, many of whom were members. One of the bankers asked Mr. Day this question, "If you say to us we can not loan the farmer the money with which to hold his crop, to whom may we loan money to hold the crop until it can be taken up by the market in an orderly way according to the demands of the consumers?" "Oh," said Mr. Day, "of course, we will have to loan money to the middlemen to take up the crop and hold it until the market is ready for it."

I say that that was the declared policy of the Federal Reserve Board made by an officer of the board delegated for the purpose of making the announcement for the information and guidance of the bankers of my district. No one could be in doubt for one minute as to what the natural, logical, and necessary consequences of such a policy would be. If the entire crop of the country is thrown on the market at the time of harvest, of course, the market would be depressed. You can "bear" the market or you can "bull" the market. The Federal reserve bank deliberately set out to "bear" the market. They succeeded so well that they broke the market—not only broke the market but broke the farmers as well. We there saw the strange spectacle of the farmer citizens of this country being ruined by being forced to sell their products on a glutted market, at less than what it cost to grow them, as a direct result of a policy adopted by their own Government—a Government created to aid them, not to harass them. I say it was criminal, it was damnable for this all-powerful agency of our Government to deliberately crucify the farmers of this country. And that it may not happen again, I hope we adopt this bill as written by the Senate and provide a place on the board for a representative of the farming interests so that hereafter their voice may be heard—yes, heard and heeded. [Applause.]

Mr. McFADDEN. Mr. Chairman, I ask unanimous consent that all debate on these amendments be now closed.

Mr. QUIN. I object. I want to speak on this bill.

Mr. McFADDEN. How much time does the gentleman desire?

Mr. QUIN. Five minutes.

Mr. McFADDEN. I ask unanimous consent that all debate on all the amendments close in five minutes.

The CHAIRMAN. The gentleman from Pennsylvania asks that debate on the amendments close in five minutes. Is there objection? [After a pause.] The Chair hears none.

The gentleman from Mississippi [Mr. QUIN] is recognized.

Mr. QUIN. Mr. Chairman and gentlemen of the committee, I do not know what the purport in full of this bill is. The Republican leaders have advertised it as a guaranty that a farmer will be named on the Federal Reserve Board. I am for a real farmer to be named. I am against all the Republican amendments offered on the floor to revise the report of the full committee. Gentlemen seem to be divided. I know one thing, that there should be something done to give the farmers of the United States representation on the Federal Reserve Board. They do not have it to-day.

You people talk about inflation and deflation. It does not take a smart man, my friend, to understand the questions you asked the gentleman from Pennsylvania. Every man in the United States that has been on a farm or has handled farm products knew that through the Federal Reserve Board and the

Secretary of the Treasury the farmers in the fall of 1920 and spring of 1921 were robbed of 65 per cent of the value of their products. There was no friend of the farmer on the Federal Reserve Board at that time. Who could get the money? The sweet-singing mocking birds of Wall Street always got the money they wanted [laughter], but the farmer, who produced by toil the cotton, the meat, the corn, the wheat, and the wool of the United States, could not get a dime of money through the Federal Reserve Board. Whose fault was it? It was the head of the Federal Reserve Board and Secretary Houston, of the Treasury. I have no praise for Governor Harding, and still less for Secretary Houston, who occupied the office of Secretary of the Treasury at that time. But you are not fooling the farmers as to who was robbing them at that time. They knew who was getting the value of the products. It was natural for deflation to set in, but the gentleman from Pennsylvania now tells us that this Federal Reserve Board informed the committee that 12 months beforehand they cold-bloodedly notified the farmers to get ready to stand up and be robbed, for they were coming to rob them. I do not think they gave any such notice to the cotton farmers of the South. That bunch kept it a profound secret from the farmers and from all of us friends of the farmers. Certainly the Federal Reserve Board knew they were going to rob the farmers by deflation and at the same time enhance the property of those who held the securities and financed the middlemen who were preying on the farmer at that time. The cotton farmers of the South were robbed. Their cotton was reduced from 48 cents per pound to 12 cents a pound. Your Federal Reserve Board would not loan the cotton farmers a dollar on their cotton, and they would not allow the local banks to rediscount any notes with cotton as security.

The people of the United States knew that somebody was doing that. Who was it? The gentlemen here to-day have exposed it. It was the Federal Reserve Board. Is there a man on this floor who does not believe that the agricultural interests of the United States ought to have a man on that board? Even though it be written in the law, I do not want to trust the Secretary of the Treasury or any other Cabinet officer to go and pick him. Let the farmers' organizations select the man and put him before the President to be named. Let it be in the law that it shall be a man who is in sympathy with the dirt farmers of the United States, with the men who toil in season and out of season to produce the necessary food and raiment to keep the wheels of commerce running throughout these United States. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired. The question is on agreeing to the committee amendments reported.

The question was taken, and the Chairman announced that the "noes" appeared to have it.

Mr. TINCHER. Mr. Chairman, a division.

The CHAIRMAN. A division is asked for.

The committee divided; and there were—ayes 19, noes 90.

So the committee amendments were rejected.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Page 2, line 3, after the word "industrial," insert the word "and."

Mr. WINGO. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WINGO. As I understand it, we will consider the committee amendments first, and then if that is in order we will take up all the others in one paragraph as a parliamentary section?

The CHAIRMAN. The gentleman is correct. The Clerk will again report the amendment.

The amendment was again read.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. MOORE of Virginia. Mr. Chairman, I simply want to suggest a point to the committee that has been considered by several lawyers on this side of the House. Some of them are of opinion that as the first section of the bill is a sweeping amendment of the existing law and provides for an increase in the number of members of the board it may operate to cause the board to be reconstituted, there being no expression which would prevent that result.

I have no very definite and final view of the question, but the opinion is entertained by several capable and experienced lawyers, among them a former chief justice of a State court, that such would be the result; that unless it is explicitly provided that the members who are now in office shall retain their positions, it would be within the province of the President to make new appointments of all the members of the board. That is, of course, not intended, but I think if there is a possibility of that occurring it ought to be taken into account. Anyway, the point should be mentioned here, so that if the House should determine that the opinion is incorrect a court in construing the statute will at least be advised of the attitude of the House.

Mr. STEVENSON. Mr. Chairman, the question raised is an interesting one, but viewing it from the standpoint of practice in this body, ever since I have been here, certainly it is nothing unusual to amend a law so that a section will hereafter "read as follows." Now, I find in Sutherland's Statutory Constructions the following, where it deals with cases of that kind:

The amendment operates to repeal all of the section amended not embraced in the amended form.

For instance, here, where it says there shall be seven members, that is not reenacted. It says "eight" members, and, therefore, it repeals the word "seven." The portions of the amended section which are merely copied without change are not considered as repealed and again enacted, but have been the law all along, so that all the provisions here that have not been changed are simply restated as being the law already and merely the change is being enacted, and the new parts or changed portions are to be taken as the law enacted at this time. So that the word "eight" where it was "seven" before is to be taken as being the law from this time henceforth but not in the past, and all the balance which has not been changed has been the law all the time.

Mr. BLACK. Will the gentleman yield?

Mr. STEVENSON. Yes.

Mr. BLACK. My recollection is that we passed a section very similar to this, increasing the membership of the Interstate Commerce Commission from seven to nine, I think it was, and I have never heard it contended that that amendment worked a repeal of the law with reference to the Interstate Commerce Commission.

Mr. STEVENSON. Now, Mr. Chairman, to conclude what I was saying, that is the general rule, and that has been the practice in this House. What would be the result if the contention of the gentleman from Virginia [Mr. MOORE] should be correct? The result would merely be that we would have repealed the term of office of the men who are now on that board who are appointive. That might be, but who is to question it? Somebody who wanted to get clear of them would have to bring a proceeding in the nature of a quo warranto to determine whether they were officers or not. If that were done and it turned out that that provision had been repealed, then it would be a simple matter for the President to reappoint them.

Mr. WILLIAMSON. Is not the effect of the amendment simply to add one person to the present board?

Mr. STEVENSON. Yes; and to provide for his term of office. That is all, and it does not affect the other members.

Mr. MOORE of Virginia. What would be his term of office?

SEVERAL MEMBERS. Ten years.

Mr. MOORE of Virginia. It is not made expressly 10 years for the new appointee. The bill does not so provide.

Mr. FUNK. The balance of the board are for 10 years.

Mr. MOORE of Virginia. The balance of the board are for 10 years, but who are the balance?

Mr. McFADDEN. The present members. The new appointive member would be appointed for the term of 10 years and the old members would continue to serve out their terms, their original appointment having been for the period of 10 years.

Mr. STEVENSON. That is correct.

Mr. MOORE of Virginia. That is, of course, the construction for which the gentlemen contend. I said before, and I will say again, that I am not attempting to press any very definite and final opinion upon the House; but the authorities are not entirely clear, and it is at least possible it might be held that a new element, which is to be the basis for the formation of the board, being introduced, and there being no declaration that the new member shall be appointed for 10 years, the President is given the right to re-create the board by appointing anew all of its members. Now, with respect to the Interstate Commerce Commission that is not necessarily an analogy.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Virginia. I ask for two minutes more.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that his time be extended two minutes. Is there objection?

There was no objection.

Mr. MOORE of Virginia. So far as that analogy suggested by my friend from Texas is concerned, we can not regard it as of any force unless we get the law and examine its language. It may be that the law as amended covered the very difficulty

that has been suggested here. I have sent for a copy of it in order to have an opportunity to read it and see whether it is parallel to the provisions of this bill.

The CHAIRMAN. All debate on this amendment has expired. The question is on agreeing to the amendment.

Mr. TINCHER. What is the amendment?

The CHAIRMAN. It is the insertion of the word "and."

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 4, line 18, after the word "expire," strike out the words "30 days after" and insert the word "with."

Mr. BURTON. Mr. Chairman, with reference to this amendment I want to read a very familiar clause in the Constitution of the United States which provides that—

The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions which shall expire at the end of their next session.

It would seem that the bill as originally drawn in the Senate ignored that provision of the Constitution.

Mr. TOWNER. Mr. Chairman, a parliamentary inquiry. Has the amendment in line 25, on page 2, been acted upon?

The CHAIRMAN. That amendment was voted on and lost.

Mr. TOWNER. I did not so understand it.

The CHAIRMAN. That was included among the amendments voted on and lost.

Mr. McFADDEN. Mr. Chairman, I hope this amendment will be adopted. It is a practical amendment and should be adopted.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Page 4, line 19, after the word "Senate," strike out the word "convenes."

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Page 5, line 20, strike out the words:

"No Federal reserve bank shall have authority hereafter to enter into any contract or contracts for the erection of any building of any kind or character, or to authorize the erection of any building, in excess of $250,000, without the consent of Congress having previously been given therefor in express terms: *Provided*, That nothing herein shall apply to any building now under construction."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. McFADDEN. Mr. Chairman, I hope the committee will adopt this committee amendment. The buildings are all under contract or have been built with the exception of one. This is a retaliatory measure, it seems to me, and is an attempt on the part of Congress to interfere with private enterprise. There is just as much reason for limiting the cost of the national-bank buildings as there is to limit the cost of these buildings, and after all is said and done the buildings are all under contract, I understand, except one in St. Louis. My understanding is that there is no particular objection to the arrangements for the building at St. Louis. If Congress wants to deal with the building situation, if it feels that the Federal reserve banks have been extravagant, it should come in another form rather than a restriction now that will not amount to anything.

Mr. KING. Mr. Chairman, I think the amendment ought to be adopted, but not for the reason stated by the chairman of the committee. There is some propaganda going abroad that the Federal reserve banks and all of their money belong to the bankers. It does not; it belongs to the people. The money for the buildings erected belongs to the people of the United States and not the bankers. As a matter of fact, they rushed the thing along, knowing that legislation was coming. The reserve banks let contracts while they had the authority for all these bank buildings except at St. Louis. Now, why should St. Louis be discriminated against when all the rest have got a chance to erect their buildings? If you adopt the amendment it will permit them to do it, but if you do not, all of the rest of the cities will have these fine million-dollar buildings and St. Louis will be without one.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. KING. Yes.

Mr. WILLIAMSON. Do I understand that the proposed building at St. Louis is the only building affected by this amendment?

Mr. KING. Yes.

Mr. WILLIAMSON. The other buildings have all been started?

Mr. KING. They have been started or under contract.

Mr. O'CONNOR. Will the gentleman yield?

Mr. KING. Yes.

Mr. O'CONNOR. Is not New Orleans in the same position as St. Louis?

Mr. KING. The building at St. Louis has not been begun unless it is within the last week, since the meeting of the Committee on Banking and Currency.

Mr. O'CONNOR. The committee amendment will permit New Orleans people to go along and construct their building the same as St. Louis.

Mr. McFADDEN. My understanding is that that building is under contract now.

Mr. O'CONNOR. I think it is under contract but not under construction.

Mr. McFADDEN. These restrictions would not apply to any building under contract. Mr. Chairman, I ask unanimous consent that all debate on this amendment and amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that all debate on this amendment and all amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. WINGO. Mr. Chairman, I am surprised at the statement of the gentleman from Illinois [Mr. KING] and the gentleman from Pennsylvania [Mr. McFADDEN] that it will not affect any of the buildings except at St. Louis. It may affect about 11 buildings if you include branch bank buildings. They already propose to erect a branch bank building at Little Rock, in my State. They want to start out with a good building, and I favor it, but they think I am very disloyal to my State because I insist on Congress approving and limiting costs. I am not willing for them to build without consent of Congress a building at Little Rock, St. Louis, or anywhere else, a public building the title to which will be in the United States, for you may camouflage all you will, it is built by money that in the last analysis would go into the Public Treasury of the United States. It is a public building, and I believe if it is necessary to build a branch building at Little Rock the Arkansas delegation can convince Congress of the necessity for the building, and if we can not do it we are not entitled to it.

They can build branch buildings all over the country. Why, what do they propose? I would be delighted for them to build a half-a-million-dollar building at Little Rock, and every Member of Congress would be delighted to have a fine branch bank building, and sooner or later, as one Member suggests, they think they would get a two or three million dollar building in some cities. Gentlemen, you can not defend the extravagant expenditure for these Federal reserve buildings built in Richmond and New York. This board has permitted extravagant expenditures that no man can defend; and we ought to say that when they want to spend over $250,000 for a public building they shall come to Congress for approval.

Mr. COOPER of Wisconsin. How much are they spending on the New York building?

Mr. WINGO. The Lord only knows. They made two or three different statements in the report that they made to the Senate. Mathematically they contradicted themselves two or three times. You will trust the Federal Reserve Board, and yet you will not trust the Postmaster General to build a $25,000 post-office building when he thinks it is necessary. If you can trust the Federal Reserve Board to spend millions in buildings, why can you not say that you will trust the Postmaster General to build a $50,000 post office whenever he thinks it proper. We would not trust him. Gentlemen, it is just a question of whether or not you are going to keep control of this matter so as to check what is confessedly an extravagant and wasteful policy of building Federal reserve buildings. I am in favor of public buildings, but they must be kept in the bounds of reason.

The CHAIRMAN. The time of the gentleman from Arkansas has expired. All time has expired. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

Mr. LONDON. Mr. Chairman, I have an amendment which I desire to offer.

The CHAIRMAN. The chairman of the committee has sent an amendment to the desk, which he has offered.

Mr. McFADDEN. Mr. Chairman, I offer the amendment which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. McFADDEN: On page 3, line 3, strike out the period after the word "President" and insert a comma and the words "and of the six members thus appointed at least two shall be persons experienced in banking or finance."

Mr. McFADDEN. Mr. Chairman, that is the provision in the present law. I do not believe the Members of the House

will be opposed to the principle that at least two of these six men shall be experienced in finance or banking. I believe it is a safeguard that ought to be put in the law, and I sincerely hope that the Members of the House will agree to it.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. DOWELL. A few moments ago, when the gentleman was discussing the question of having a farmer on the board, he vigorously protested against having what he called class legislation.

Mr. McFADDEN. That is not the point. This is the leading financial system of the country, and there must be at all times on that board men who have knowledge of banking or finance.

Mr. DOWELL. Does not the gentleman believe and know that the President will take care of the situation and appoint a competent board to take charge?

Mr. McFADDEN. I believe this President will, but we have changes of Presidents every now and then, and for the good of the farmers of this country I say that this system should be competently managed. This is a banking system, a specialized system, and it needs experienced men who know the science of banking and credits to administer it. And when I suggest only two men upon this board shall be such men, I believe the suggestion is a worthy one. If this system had been managed by men of the type that are now criticizing the management of the system during this trying credit strain, we would no doubt have some such a condition as prevails at present in Europe, where the money is greatly depleted in value. The wise management of this system has saved us from that.

Mr. MOORE of Virginia. Mr. Chairman, I rise simply for the purpose of renewing the suggestion I made a moment ago. Reference was made to the statute amending the act to regulate commerce. Let us see what happened when the act to regulate commerce was amended on August 9, 1917. The number of interstate commerce commissioners had been seven, and by the amendment the number was increased to nine. The act amended section 24 "to read as follows," the form being the same as employed in this bill. The amendment increased the number from seven to nine. I want to quote the language of the act and suggest in the interest of safety that at some stage of this legislation similar language should be incorporated in the present bill:

> Such enlargement of the commission shall be accomplished through the appointment by the President, by and with the advice and consent of the Senate, of two additional interstate commerce commissioners, one for a term expiring December 31, 1921, and one for a term expiring December 31, 1922. The terms of the present commissioners or any successor appointed to fill a vacancy caused by death or resignation of any of the present commissioners shall expire as heretofore provided by law.

That language made it perfectly clear that the additional members were to be appointed for specified periods. In order to relieve the matter that we are dealing with of any doubt, it seems to me the proper thing is to make a specific provision that the additional member shall be appointed for a term of 10 years. I shall, however, leave the matter to the committee without offering an amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania.

Mr. MONTAGUE. Mr. Chairman, let us have the amendment again reported.

There was no objection, and the Clerk again reported the amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

Mr. LONDON. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

> Amendment offered by Mr. LONDON: Page 2, line 2, after the word "the," insert the word "labor" and a comma.

Mr. LONDON. Mr. Chairman, I shall not take much time. We have heard enough noisy speeches about the profound love of the Congress for the farmer. I shall be brief.

The bill has been hailed as a bill to put a "dirt farmer" on the Federal Reserve Board, which is the principal governmental financial agency. The law which this measure proposes to amend provides that in selecting the appointive members the President shall have due regard to a fair representation of the different "commercial, industrial, and geographical divisions of the country." By the terms of this bill the President in making his appointments shall have due regard to a fair representation of "the financial, agricultural, industrial, and commercial interests and geographical divisions." The bill thus adds two interests which the President is to take notice of, namely, the financial and the agricultural interests. My amendment proposes the addition of one more group of interests, namely, that of labor.

It has been brought out during the discussion that the President will be under no obligation, if this bill becomes a law, to nominate a farmer for membership on the board. Nor is there anything which would prevent the President from appointing a farmer now. Why, then, is this measure proclaimed to be a remedy for the ills of the farmer?

The answer is simple. In many States, particularly in those where there was a strong Populist movement years ago, there is an insistent demand by the agricultural classes that something should be done for them. They are discontented. They know there is something wrong somewhere. They are beginning to demand recognition of their claims and of their grievances. They are beginning to organize.

By providing that in nominating members of the Federal Reserve Board the President shall not overlook to give representation to agricultural interests, the authors of this bill hope to be able to convince the farmer that his interests will be taken care of.

The number of tenant farmers is growing. The number of mortgaged farms is increasing. The farmers' opportunity to sell his product is diminishing and his lot is becoming harder every day. The proponents of this bill hope to satisfy him that they have done something for him when they have inserted the word "agricultural" in section 10 of the Federal reserve act. They are giving him a word instead of a reality.

But words are not without value. While words are intended to be the symbols of ideas the very employment of a word very often suggests ideas. Intended to throw sand in the eyes of the farmer, the employment of the word "agricultural" may acquire real significance when the tillers of the soil will become conscious of their real rights and interests. The fact that the framers of the law have been compelled to concede that the agricultural interests as such require representation on the personnel of the financial agency of the country may some day lead the farmer to understand that to be truly represented he must have spokesmen whose interests are identical with his. And if he is to have his spokesmen on the financial board of the Government, why not in the legislative branch of the Government?

Without it ever having been intended, this bill will help do away with the fiction that there are no group or class interests in society.

I propose my amendment not because I expect that it will be of any more benefit to labor than it will be to the farmer but solely for the purpose of completing a logical process. If the financial, the commercial, the industrial, and the agricultural interests are to be respectively represented, why not labor?

I expect a unanimous vote in support of my amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The question was taken, and the Chair announced the noes appeared to have it.

On a division (demanded by Mr. LONDON) there were—ayes 21, noes 47.

So the amendment was rejected.

The CHAIRMAN. The Chair suggests in line 10, page 5, following the colon, the word "section 324" should be inserted.

Mr. WINGO. What is the suggestion?

The CHAIRMAN. That in line 10, following the colon, "section 324" should be inserted, so as to read, "Section 324."

Mr. McFADDEN. I will say that is in the bill I have here.

The CHAIRMAN. It is not in the copy the Chair has, and it is not in the copy which the Clerk has at the desk.

Mr. MONDELL. Mr. Chairman, line 9, page 5, reads:

> "Section 324 of the Revised Statutes of the United States shall be amended so as to read as follows:

Mr. McFADDEN. I ask unanimous consent the correction may be made.

The CHAIRMAN. Without objection, the amendment will be agreed to.

There was no objection.

The CHAIRMAN. Automatically, no other amendments being offered, and none pending, the committee will rise, and the Chair will report the bill to the House with sundry amendments.

Accordingly the committee rose; and the Speaker having resumed the Chair, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill S. 2263, under the rule the bill was read for amendment, and being concluded, no amendments pending, the Chair automatically directed that the committee rise and report the bill to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Under the rule, the previous question being ordered, the question comes, Is a separate vote demanded on any amendment?

Mr. WINGO. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WINGO. I would like to know, so as to be correct, if the only amendments are on page 2, line 3, and on page 4, lines 18 and 19. Those are the only amendments adopted by the committee.

The SPEAKER. Those were the only amendments. If not, the Chair will put the amendments in gross.

The question was taken, and the amendments were agreed to.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. McFADDEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. KRAUS, for three days, on account of attendance at a convention.

To Mr. J. M. NELSON, indefinitely.

EXTENSION OF REMARKS.

Mr. ANDREWS of Nebraska. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill just passed.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. KING. Mr. Speaker, I ask unanimous consent to extend my remarks on Senate Joint Resolution 160.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. McFADDEN. Mr. Speaker, I ask unanimous consent that all who have spoken on this bill have leave to extend their remarks in the RECORD.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that all who have spoken on the bill have leave to extend their remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. LONDON. Mr. Speaker, I ask leave to extend my remarks on the bill just passed.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks on the bill just passed. Is there objection? [After a pause.] The Chair hears none.

Mr. GOLDSBOROUGH. Mr. Speaker, I ask unanimous consent to revise and extend my remarks made on the floor to-day in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

WAR FINANCE CORPORATION.

Mr. McFADDEN. Mr. Speaker, I ask unanimous consent to take up for consideration the bill S. 2775. This is an amendment to the War Finance Corporation, extending the life of the corporation for one year.

Mr. LUCE. Mr. Speaker, I object.

Mr. McFADDEN. Mr. Speaker, this will not bring forth any particular discussion.

Mr. GARNER. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. GARNER. Does the gentleman intend to pass this bill extending the life of the War Finance Corporation?

Mr. MONDELL. It will be passed and become a law in due time.

Mr. CAMPBELL of Kansas. I have a rule here that I would present this evening if it were not after 5 o'clock.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 17 minutes p. m.) the House adjourned until Wednesday, May 24, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

615. Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting tentative draft of a bill relative to adjustment of the accounts of the former Assistant Treasurer of the Unied States at Boston, Mass., was taken from the Speaker's table and referred to the Committee on Claims.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII.

Mr. GRAHAM of Illinois: Committee on Interstate and Foreign Commerce. H. R. 11409. A bill granting the consent of Congress to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River; with amendments (Rept. No. 1024). Referred to the House Calendar.

Mr. GRAHAM of Illinois: Committee on Interstate and Foreign Commerce. H. R. 11408. A bill granting the consent of Congress to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, in said town of Rockton; with an amendment (Rept. No. 1025). Referred to the House Calendar.

Mr. DEMPSEY: Committee on Rivers and Harbors. H. Res. 305. A resolution directing the Secretary of War to transmit certain facts to the House of Representatives; with an amendment (Rept. No. 1027). Referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MORGAN: A bill (H. R. 11762) to authorize the coinage of a 50-cent piece in commemoration of the one hundredth anniversary of the birth of the late President Rutherford Birchard Hayes, at Delaware, in the State of Ohio; to the Committee on Coinage, Weights, and Measures.

By Mr. McFADDEN: A bill (H. R. 11763) to provide adequate credit facilities for the orderly marketing of agricultural products, and for the preservation and development of the livestock industry of the United States; to amend the Federal reserve act; to extend and stabilize the market for United States bonds and other securities; to extend the powers of the Federal Farm Loan Board created by the farm loan act; to provide fiscal agents for the United States and for the War Finance Corporation; and for other purposes; to the Committee on Banking and Currency.

By Mr. QUIN: Joint resolution (H. J. Res. 331) to appropriate $2,000,000, or so much thereof as may be necessary, for the purchase of milch cows and suitable planting seeds to be supplied to farmers in the overflowed areas in Mississippi and Louisiana and other portions of the United States, said amount to be expended under rules and regulations prescribed by the Secretary of Agriculture; to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CHANDLER of Oklahoma: A bill (H. R. 11764) for the relief of J. H. Arnold; to the Committee on War Claims.

By Mr. GORMAN: A bill (H. R. 11765) for the relief of Christine Mygatt; to the Committee on Claims.

By Mr. JEFFERIS of Nebraska: A bill (H. R. 11766) for the relief of William Quinlan; to the Committee on Claims.

By Mr. KNUTSON: A bill (H. R. 11767) for the relief of Andrew A. Gieriet; to the Committee on War Claims.

By Mr. SNYDER: A bill (H. R. 11768) granting a pension to Anna E. Davidson; to the Committee on Pensions.

By Mr. SLEMP: A bill (H. R. 11769) granting a pension to Rebecca A. Montgomery; to the Committee on Pensions.

By Mr. TOWNER: A bill (H. R. 11770) granting a pension to Frances Jackson; to the Committee on Invalid Pensions.

By Mr. WOODYARD: A bill (H. R. 11771) granting a pension to Lillian Rowley; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5734. By Mr. BARBOUR: Petition of Common Council of the City of San Diego, Calif., indorsing House bill 11449, to provide for the protection and development of the lower Colorado River basin; to the Committee on Irrigation of Arid Lands.

5735. Also, petition of Grand Council of Royal and Select Master Masons of the State of California, indorsing the Towner-Sterling educational bill; to the Committee on Education.

5736. Also, petition of Grand Commandery of Knights Templar of the State of California, indorsing the Towner-Sterling educational bill; to the Committee on Education.

5737. By Mr. CAREW: Resolution adopted by the Texas Chamber of Commerce, relative to tax-free securities; to the Committee on Ways and Means.

5738. Also, resolutions adopted by the Texas Chamber of Commerce, relative to section 28 of the Jones shipping bill; to the Committee on the Merchant Marine and Fisheries.

5739. By Mr. CULLEN: Resolution adopted by the American Marine Association of New York City, indorsing Senate bill 3217 and House bill 10644 and urging their early passage; to the Committee on the Merchant Marine and Fisheries.

5740. By Mr. CURRY: Resolution of the Henry W. Lawton Camp, United Spanish War Veterans, at their nineteenth annual encampment, favoring the retention and development of the Mare Island Navy Yard; to the Committee on Naval Affairs.

5741. By Mr. KIESS: Petition of residents of Millport, Pa., protesting against the passage of House bills 9753 and 4388 and Senate bill 1948; to the Committee on the District of Columbia.

5742. By Mr. KISSEL: Petition of Naval Militia, New York City, N. Y., relative to an additional appropriation for the Naval Reserve Force; to the Committee on Appropriations.

5743. Also, petition of board of estimate and apportionment, city of New York, N. Y., indorsing the Bacharach bill; to the Committee on the Judiciary.

5744. By Mr. LINTHICUM: Petitions of Regal Laundry, Baltimore, and Manhattan Laundry Service Corporation, Washington, protesting against duties levied on foreign vegetable oils, etc.; also petitions of Merchants and Manufacturers Association and Doyle & Keyser, Baltimore, protesting against proposed duty on linens; also petition of Hendler Creamery Co., Baltimore, protesting against proposed tariff on salt; also petition of Baugh & Sons Co., Baltimore, protesting against proposed tariff on potash, etc.; also letters protesting against insufficient tariff on canned goods; to the Committee on Ways and Means.

5745. Also, petition of James H. Jones, Baltimore, Md., favoring passage of Bursum and Morgan bills for benefit of Civil War veterans; to the Committee on Invalid Pensions.

5746. Also, petition of Charles F. Namuth, Baltimore, favoring increase of retirement amount to each individual; to the Committee on Reform in the Civil Service.

5747. Also, petition of North Carolina Pine Box & Shook Manufacturing Co., Baltimore, protesting against transfer of United States Forest Service from Department of Agriculture to Department of Interior; to the Committee on Agriculture.

5748. Also, petition of C. F. Macklin, Baltimore, favoring extra appropriation for training of civilian portion of Naval Reserves; to the Committee on Appropriations.

5749. Also, petition of Rev. J. Howard Braunlein and John C. Thomas, Baltimore; S. E. Persons, Annapolis; and Rev. W. H. Settlemeyer, Middletown, Md., appealing for proper protection to the Armenians; to the Committee on Foreign Affairs.

5750. By Mr. MACGREGOR: Resolutions adopted by the Presbytery of Caledonia at Mumford, N. Y., indorsing House Joint Resolution No. 131, relative to prohibiting polygamy and polygamous marriages in the United States, and also Senate Joint Resolution No. 31, relative to enacting uniform laws on the subject of marriage and divorce; to the Committee on the Judiciary.

5751. Also, resolution adopted by the Presbytery of Caledonia at Mumford, N. Y., indorsing House bill 9753, to secure Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia.

5752. Also, resolution adopted by the council of the city of Buffalo indorsing the river and harbor bill; to the Committee on Rivers and Harbors.

SENATE.

WEDNESDAY, *May 24, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed the bill (S. 2263) to amend the Federal reserve act approved December 23, 1913, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. LADD presented a resolution adopted at the annual meeting of the Pennsylvania Branch, Women's International League for Peace and Freedom, at Philadelphia, Pa., favoring the prompt declaration of a general amnesty by the President of the United States, which was referred to the Committee on the Judiciary.

Mr. SHORTRIDGE presented a memorial of sundry citizens of Oakland, Calif., remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented resolutions adopted by the Santa Rosa Chamber of Commerce, of Santa Rosa, Calif., protesting against any present change in the transportation act of 1920, which were referred to the Committee on Interstate Commerce.

Mr. CAPPER presented a resolution adopted by Golden Rule Lodge, No. 90, Ancient Free and Accepted Masons, of North Topeka, Kans., favoring the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

Mr. SHEPPARD presented resolutions adopted by the Presbytery of Brownwood, Presbyterian Church, at Winters, Tex., favoring amendments to the Constitution prohibiting polygamy and providing for uniform marriage and divorce laws, which were referred to the Committee on the Judiciary.

He also presented a resolution adopted by the Presbytery of Brownwood, Presbyterian Church, at Winters, Tex., favoring the enactment of legislation providing for Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. NEWBERRY presented resolutions adopted by the Presbytery of Grand Rapids, Presbyterian Church, at Grand Rapids, Mich., favoring amendments to the Constitution prohibiting polygamy and providing for uniform marriage and divorce laws, which were referred to the Committee on the Judiciary.

He also presented a resolution adopted by the Presbytery of Grand Rapids, Presbyterian Church, at Grand Rapids, Mich., favoring the enactment of legislation providing for Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

REPORTS OF THE COMMITTEE ON NAVAL AFFAIRS.

Mr. NEWBERRY, from the Committee on Naval Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

H. R. 3754. An act for the relief of Rear Admiral Livingston Hunt, Supply Corps, United States Navy (Rept. No. 722); and

H. R. 3508. An act for the relief of Rear Admiral J. S. Carpenter, Supply Corps, United States Navy (Rept. No. 723).

ENROLLED BILLS PRESENTED.

Mr. SUTHERLAND, from the Committee on Enrolled Bills, reported that they presented to the President of the United States the following enrolled bills:

On May 20, 1922:

S. 1162. An act declaring Lake George, Yazoo County, Miss., to be a nonnavigable stream; and

On May 22, 1922:

S. 2919. An act to extend for the period of two years the provisions of Title II of the food control and the District of Columbia rents act, approved October 22, 1919, as amended.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WALSH of Montana:

A bill (S. 3640) for the relief of the estate of James W. Mardis; to the Committee on Claims.

By Mr. FLETCHER:

A bill (S. 3641) to grant and confirm to the State of Florida title in and to sections 16 within the exterior limits of the area patented to the State of Florida April 23, 1903, and for other purposes; to the Committee on Public Lands and Surveys.

FIRST LIEUT. WILLIAM EDWARD TIDWELL.

Mr. FLETCHER. I ask unanimous consent that I may withdraw report No. 694 of the Committee on Military Affairs, which accompanies the bill (S. 1672) for the appointment of William Edward Tidwell as first lieutenant in the United States Army, and substitute another report which is somewhat fuller than the original.

The VICE PRESIDENT. Without objection, leave will be granted.

TARIFF BILL AMENDMENTS.

Mr. JONES of Washington submitted two amendments intended to be proposed by him to House bill 7456, the tariff bill, which were ordered to lie on the table and to be printed.

ST. LAWRENCE RIVER IMPROVEMENT.

Mr. MOSES submitted the following concurrent resolution (S. Con. Res. 24), which was referred to the Committee on Printing:

Resolved by the Senate (the House of Representatives concurring), That there shall be printed 5,000 additional copies of Senate Document No. 179, Sixty-seventh Congress, entitled "Report of the United States and Canadian Government engineers on the improvement of the St. Lawrence River from Montreal to Lake Ontario," of which 3,000 copies shall be for the use of the Senate Document Room, and 2,000 copies for the House Document Room.

AMENDMENT OF FEDERAL RESERVE ACT.

Mr. KELLOGG. I ask the Chair to lay before the Senate the amendments of the House to Senate bill 2263.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 2263) to amend the Federal reserve act approved December 23, 1913, which were, on page 2, lines 2 and 3, to strike out "industrial, commercial interests," and to insert "industrial and commercial interests"; on page 4, line 18, to strike out "30 days after," and to insert "with"; on page 4, line 19, strike out "convenes"; on page 5, line 11, after "follows," to make a new paragraph and to insert "Sec. 324"; on page 5, line 20, to insert quotation marks before the word "no"; and on page 6, line 2, to insert quotation marks after the word "construction."

Mr. ROBINSON. I understand that the amendments which the House made to the bill relate more to form than to substance, and that none of them materially change the bill as passed by the Senate.

Mr. KELLOGG. That is quite true, except that a House amendment provides that the commission of the Federal Reserve Board shall expire with the next session of Congress instead of 30 days after.

Mr. ROBINSON. The Senator does not regard that as a material change?

Mr. KELLOGG. No; I do not. It does not affect the merits or change the substance.

The VICE PRESIDENT. The question is on agreeing to the amendments of the House.

The amendments were agreed to.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The Secretary will report the next amendment of the Committee on Finance.

Mr. NICHOLSON. Mr. President, I desire to call up my amendments to paragraph 213a, where I propose that a specific duty shall be imposed on amorphous graphite instead of the ad valorem duty proposed by the Finance Committee.

Mr. McCUMBER. It is satisfactory to return to that paragraph.

Mr. UNDERWOOD. What is the suggestion?

Mr. McCUMBER. To take up paragraph 213a.

The VICE PRESIDENT. The Secretary will report the proposed amendment of the committee.

The READING CLERK. On page 37, after line 8, the committee proposes to insert a new paragraph, as follows:

PAR. 213a. Graphite or plumbago, crude or refined: Amorphous, 10 per cent ad valorem; crystalline lump, chip, or dust, 20 per cent ad valorem; crystalline flake, 2 cents per pound. As used in this paragraph, the term "crystalline flake" means graphite or plumbago which occurs disseminated as a relatively thin flake throughout its containing rock, decomposed or not, and which may be or has been separated therefrom by ordinary crushing, pulverizing, screening, or mechanical concentration process, such flake being made up of a number of parallel laminæ, which may be separated by mechanical means.

Mr. UNDERWOOD. Mr. President, I have not anything to say on the paragraph, but I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Ernst	Jones, N. Mex.	Nelson
Borah	Fletcher	Jones, Wash.	Newberry
Brandegee	France	Kellogg	Nicholson
Broussard	Frelinghuysen	Kendrick	Oddie
Bursum	Glass	Ladd	Page
Calder	Gooding	Lodge	Pepper
Capper	Hale	McCumber	Phipps
Caraway	Harreld	McKinley	Poindexter
Culberson	Harris	McLean	Ransdell
Curtis	Harrison	McNary	Rawson
Dial	Heflin	Moses	Robinson
Edge	Johnson	Myers	Sheppard
Shortridge	Sterling	Wadsworth	Williams
Simmons	Sutherland	Walsh, Mass.	
Smith	Swanson	Walsh, Mont.	
Smoot	Underwood	Watson, Ga.	

The VICE PRESIDENT. Sixty-one Senators have answered to their names. A quorum is present.

Mr. HARRISON obtained the floor.

Mr. CARAWAY. Mr. President, will the Senator from Mississippi yield to me?

Mr. HARRISON. I yield to the Senator from Arkansas.

Mr. NICHOLSON. Mr. President, will the Senator from Arkansas yield? I thought I had the floor. I had recognition from the Presiding Officer before the roll was called.

The VICE PRESIDENT. The Chair understood that the Senator from Colorado had yielded the floor.

Mr. CARAWAY. I shall not hold the floor very long.

Mr. NICHOLSON. How long does the Senator wish to hold the floor?

Mr. CARAWAY. I do not know, but not a great while.

Mr. NICHOLSON. If the Senator will kindly let me proceed, after I finish I shall be glad to yield the floor to him.

Mr. CARAWAY. There is a matter I desire to discuss right now. I would like to accommodate the Senator, but I do not want to yield the floor at this time.

The VICE PRESIDENT. The Senator from Arkansas is entitled to the floor, and will proceed.

ATTORNEY GENERAL DAUGHERTY.

Mr. CARAWAY. Mr. President, yesterday the titular Attorney General issued a statement. I desire to read it to the Senate:

The correspondence of former President Taft and Attorney General Wickersham, which was again published this month, clearly shows my connection with the Morse cases of many years ago, both civil and criminal. The incentive and motives inspiring this and other agitation will not accomplish the results hoped for by those behind the scenes.

The various prosecutions of war fraud cases will be carried out as expeditiously as possible, irrespective of these and other activities and attacks which will be expected. I have faith that the people of the country appreciate the situation and have confidence in the Department of Justice being fair, judicious, and effective.

The Washington Post in its headlines—and usually the Post knows what the administration thinks before the administration thinks it—says this morning:

Daugherty, meeting attacks, pushes war fraud cases—Replying to CARAWAY, he declares present activities, or others expected, will not halt prosecutions.

Just for historic accuracy I want to repeat what has heretofore been said. The resolution for investigation of the Department of Justice came not from CARAWAY, as the Post would imply, but from Congressman ROYAL JOHNSON, of South Dakota, and Congressman ROY WOODRUFF, of Michigan, both Republicans, both former service men, both men who laid down their civil employment at the call to arms and bared their breasts to the shot and shell of the country's enemy. I can not believe, Mr. President, that they are actuated by any desire to shield men who stayed at home and robbed their Government while they went out prepared to shed their blood in defense of it.

If Mr. Daugherty thinks the American people are going to believe that those two former soldiers, who had offered to die for their flag, are now attacking him to defend grafters who would not fight, Mr. Daugherty really never knew the true American. People like Felder, with whom he associated so intimately, do not represent the American sentiment, never did, and never will.

But the Attorney General is not candid, and I use that word to be polite. It is not what I mean, and what everybody knows. The Attorney General said that the letters of Mr. Taft and Mr. Wickersham "clearly disclose" his connection with the Morse case. They do not. They do not disclose the fact that Daugherty and Felder made a contract for a $25,000 fee contingent upon their ability to get Morse out of the penitentiary. He knows that.

Those letters do not disclose the fact that at the time they made the contract, Taft, as President, had already refused to grant a pardon or a commutation of sentence, and he knows that.

They do not disclose the fact which Felder disclosed in his letter of 1917, that when they, Felder and Daugherty, were in conference with Morse in the penitentiary, not knowing by what means they would approach the administration, they told Morse that his case looked hopeless, but that Taft had said they might call at a later date and get a different answer. They do not disclose that Morse then made another contract with them in which he agreed to pay these two gentlemen, these two ethical lawyers, $100,000 instead of $25,000 to accomplish the same result, nor that vague, uncertain promise "to make both of them rich." These letters of Taft and Wickersham do not disclose the fact, Mr. President, that in the conversation a "cue" was obtained—and I am using the exact language of

Felder—a "cue" was obtained from the appearance of Morse that maybe he was not in good health, and that with that idea in view they called in Doctor Fowler, who had been the physician of the penitentiary in Atlanta where Morse was first confined, and had him make an examination which "disclosed," according to Fowler, that Morse had "Bright's disease."

The letters to which Daugherty refers do not disclose that thereupon Daugherty and Felder came to Washington and got a promise in advance from Taft and Wickersham, the latter of whom was then the Attorney General, that if they could establish the fact that Morse's health was poor and that he was likely to die in confinement he would be released. That is not disclosed in those two letters which Daugherty says disclose his whole relation to the case.

The two letters do not disclose that they went back to Atlanta and had Morse examined by a board of physicians, which found that there was nothing seriously wrong with him. These letters do not disclose that they then had another board of physicians appointed and got a report that Morse was in a bad fix. These letters from Taft and Wickersham do not disclose that thereupon they had Morse put in some place outside of the penitentiary where he could be examined, and, incidentally, where Fowler could see him, of course. They do not disclose the fact, which Felder himself states, that the department had afterwards acquired evidence to show that each time before this board of physicians should examine Morse that Morse was given some kind of a chemical to make his kidneys bleed and thereby deceive the doctors. The Attorney General knows that these letters do not disclose that.

The Attorney General knows that they do not disclose the further fact that Morse had contracted with Daugherty and Felder in advance that he should submit to whatever course they might suggest; a contract the character of which I leave for every lawyer on the floor of the Senate and every one in this country to judge. No reputable lawyer would ever think of demanding of his client a contract which said, "You must do everything that we suggest." It is significant. It suggests, at least—I will not say it does, but it suggests—that they were going to frame up some kind of pretense on which they were to get him out, and in advance they made Morse sign away his right to tell the truth. They made him contract that he would submit to conditions they suggested, and it seems they suggested that he had "Bright's disease."

Daugherty knew that; and Felder has put in writing the fact that it was he, and not Morse, who found out that Morse had the "disease" that led to his commutation of sentence; that it was Daugherty and Felder who discovered that and it was Doctor Fowler who confirmed it. Incidentally, among the very first acts that the Attorney General did was to put back in his old position at the penitentiary at Atlanta this same Doctor Fowler, rewarding him for the deception he had helped them to perpetrate upon the President, Mr. Taft.

The Attorney General knows that none of those facts were disclosed in the two letters to which he calls attention. These letters do not disclose the fact that the Attorney General told the senior Senator from Indiana [Mr. WATSON] that he had had absolutely nothing to do with the Morse case. He knows they do not disclose those things.

Why, then, should the Attorney General have said yesterday that the two letters written in 1915 disclosed his entire connection with the Morse case when he knows they disclosed nothing of the significant parts of the Morse case at all? Oh, Mr. President, just merely as an illustration and not an accusation, I think it was Mark Twain who once said that a "lie is such a precious thing that you ought never to tell it if the truth would answer." I am not applying that language to the Attorney General; it is merely a suggestion. Why was he not candid about it?

I know he told the Senator from Indiana that he had nothing to do with the Morse case, and thereby induced the Senator from Indiana to make the statement which he did on the floor of the Senate when he, the Attorney General, knew he did have something to do with it. I have asked over and over again, Why did he deny his connection with this unsavory case?

Well, Mr. President, the Attorney General then, by way of what the affable Senator from New Hampshire [Mr. MOSES] calls "throwing up a smoke screen," intimates that he is being attacked because he is prosecuting war grafters. That charge is so foolish that I hesitate to believe the Attorney General made it; but I presume he did or the Washington Post would not have asserted it, because the Post knows absolutely; it has got first-hand information as to what the administration thinks or what it is going to think. If the statement had appeared in some other journal, there could have been some doubt about it, but, published in the Post, I know the Attorney General said it.

The charge, Mr. President, against the Attorney General for not enforcing the law, as I have said, came from ROYAL C. JOHNSON and ROY O. WOODRUFF, two Republican Members of Congress in the other House, both being former service men, both men whose character I know that no man will take the responsibility of questioning. Therefore, I know that when the Attorney General undertakes to blacken the reputation of those two Members of Congress of his own party in order to shield himself, he stoops lower than his friends thought it possible even for him to go.

Mr. President, it is a very unfortunate thing to write letters if the writer is going to make hurtful statements. I am going to read here some letters. Incidentally, and incidentally only, they reflect upon the former Secretary of War, Mr. Baker, and the present Secretary of War, Mr. Weeks. I am not going to follow the example of the Senator from New Hampshire and say that there is politics in it. I am not going to say one word in defense of former Secretary of War Baker. If he is guilty of wrongdoing he will never find me apologizing for him here or elsewhere. I am going to do, though, what the Senator from New Hampshire would not do; I am going to say in defense of the present Secretary of War, who is a Republican, that I do not believe he is dishonest; I do not believe that at all; I do not believe he was actuated by bad faith in anything he did, and it will take a great deal more evidence than the apparent circumstances to make me believe that he is anything but an honest man and a gentleman. I go that far for the present Secretary of War, who is a Republican, and to show that I have not any bias in the matter I shall say nothing in defense of the former Secretary of War, who is a Democrat. You can make what you will out of it.

Mr. President, let me go back for just a moment. These charges of Congressmen WOODRUFF and JOHNSON came about through a disclosure that former Maj. W. O. Watts made to ROYAL C. JOHNSON and ROY WOODRUFF of conditions which existed in the Attorney General's office. Watts was a special examiner. He made up his mind that the Attorney General was not going to enforce the law, and that grafters were going to be whitewashed and turned loose. After repeatedly trying to get the Attorney General to act, he went to the two Republican Members of Congress, and in the presence of a Republican Senator, who is now a Member of this body, disclosed what facts he had.

At their request and with their concurrence he made public this information by giving it to them and consenting that they should use it upon the floor. For that he was discharged, Mr. President, by a letter written by Assistant Attorney General Holland. I will read it again into the RECORD. It is as follows:

DEPARTMENT OF JUSTICE,
Washington, D. C., April 24, 1922.

Mr. W. O. WATTS,
Special Agent, Department of Justice.

SIR: By direction of the Attorney General, you are dismissed from the service of this department, effective immediately upon receipt of this letter.

You are removed for disloyalty to the Department of Justice, inasmuch as you knowingly and willfully violated the rules of the department, which, as you must be aware, constitutes a breach of trust.

Upon application to the disbursing office of this department your salary will be paid up to this time.

Respectfully,

RUSH L. HOLLAND,
Assistant Attorney General,
(For the Attorney General.)

For the enlightenment of the Senate and the country, I want to read to the Senate the manly letter which Mr. Watts wrote in reply to the letter from the Assistant Attorney General. The letter is as follows:

718 NINETEENTH STREET NW.,
Washington, D. C., April 26, 1922.

The ATTORNEY GENERAL,
Washington, D. C.

SIR: Receipt is acknowledged of letter dated April 24, 1922, signed by Mr. Rush L. Holland, Assistant to the Attorney General, dismissing me "for disloyalty to the Department of Justice."

You are informed that I accept your characterization of my discharge as a distinct compliment, knowing the facts and circumstances involved, although it is wholly false and unjustifiable. It is particularly gratifying to me to note that you either did not feel warranted or have the moral courage to charge me with "disloyalty" to the Government. This, Mr. Attorney General, you can not do. My loyalty to the Government is well founded and of lifelong standing. I have followed and defended the flag in the Spanish-American War, the Philippine insurrection, and the late World War with honor and distinction, and I have performed every duty that has ever been assigned to me in a loyal and faithful manner; my record for loyalty is well known and unimpeachable.

My conception of loyalty in the highest sense is the defense and protection of the Government's interests under all circumstances and at all hazards. I do not recognize or subscribe to your theory of loyalty to corrupt an autocratic authority now so common in Government bureaus at Washington, which subverts the national welfare and public interests.

If you were at all informed on the departmental affairs of your high office, you must be aware of the outstanding facts that I have devoted more than two years of loyal and faithful efforts to protect

the interests of the Government when a combination of certain Government officials and other common crooks have been assaulting and raiding the public Treasury on a scale so gigantic as to be almost unbelievable.

You must be aware that even a private citizen is required by statute to report to the authorities the commission of a felony which comes within his knowledge. A public officer is further bound by oath to uphold the law, and when an agency of the Government ceases to function, it is the letter and the spirit of the law that appeal should be made to some authority of the United States which will be interested and enforce correction. The record is clear and clean cut and will show that organized interests are looting the Government, and no man can charge me with a breach of trust, so far as the interests of the people are concerned. The real issue is: Shall this be a government by Harry M. Daugherty and Abram F. Myers, or a government "of the people, for the people, and by the people"?

Disloyalty is a loathsome word, especially when applied to one who has responded to the call to arms in every crisis which has confronted the country during the past 25 years. You have seen fit in the prosecution of the war graft cases to deprive the Government of the services of men who have served their country in both peace and war and to surround yourself in this great work by men who sought and secured exemption from military service when these crimes were being committed. You are entitled to share with yourself your conceptions of loyalty, and the people can judge whether or not the stigma you have attempted to place upon myself and my children is just.

Tens of thousands of people have sojourned in Washington long enough to know that this country is being strangled by an invisible government, and the fight for righteous government has at last been forced into the open. I call upon every man, woman, and child in America, and especially my comrades of recent wars and every 100 per cent American in Congress, to join in the cry of "Down with Daughertyism."

Respectfully, W. O. WATTS.

A brief word about Watts, if I may. He was born in one of the poorest counties in my State, of a splendid family. When he was 10 years old he went to Tennessee. When he was a mere boy, when a call to arms came, when the Spanish-American War was declared, he laid aside his employment and carried a musket as a common soldier through the war with Spain and through the Philippine insurrection. He has in his possession what Daugherty can not take from him, an honorable discharge for honorable services rendered. When the war with Germany came he again laid aside his employment, though he is a man of family and no means, and again went into the service of his country and stayed with it honorably until the war was over. When the war was over he was put to investigating certain abuses in the War Department and discovered that grafters had looted the country while he and others were offering to die to save the country. He brought that to the attention of his superiors, and when he was ready to make his report Col. A. W. Yates, of the Quartermaster Corps, now in the Army, said to him, "Major"—he had reached the rank of major—"if you will change your report and make it favorable instead of adverse you will be commissioned a major in the Regular Establishment and put at the head of your class." He would have been a colonel now, Mr. President; and Watts, the man that Daugherty now attacks, the man that Daugherty kicked out of the public service, said, "I will not do it. I fought for my country, and I will not lie for a place to make a living under its flag."

He left the Army, Mr. President, though he had no means of support, and I have the testimony not of Democrats but of Republicans that he stayed on the job as a private citizen for months and months, without one penny of compensation, urging that somebody should prosecute these people. He knew that the Government had been robbed; he wanted to see the thieves brought to justice; and he worked day and night without a cent, and reported to the department having to deal with the prosecution of these cases.

The Republicans wanted to investigate the War Department when they came into control of the Government, and a resolution to that effect was passed in the House, and I voted for it. I do not want a thief protected, whether he is a Democrat or a Republican; I do not care who he is. I was perfectly willing for the facts to be known, and if the facts should not show that the officers of the Army had been honest or the contractors that had dealt with the Government had been honest, I then wanted and I now want the facts to be disclosed and I want the guilty punished to the full extent of the law.

Watts then became an investigator for the so-called Graham committee, a committee appointed in the House, of 10 Republicans and 5 Democrats, to investigate the War Department, these fraudulent contracts. Mr. GRAHAM of Illinois, a Republican—who, I understand, is to be appointed a judge to succeed Judge Landis—was made chairman. Watts reported to him without a bit of compensation, though Watts had been a Democrat. He reported to him, and gave him the information that he had, and worked for months without pay. Finally Graham paid him $250 for all that he had done.

But here is a letter that I want to read. This letter bears date of April 22, 1921, and shows who Watts is. It is addressed to Hon. John W. Weeks, and is as follows:

APRIL 22, 1921.

Hon. JOHN W. WEEKS,
Secretary of War, Washington, D. C.

DEAR SIR: We, the undersigned, late members of the Select Committee on Expenditures in the War Department, believe it will be to the best interest of your department and the service if Maj. W. O. Watts, late an officer in the Quartermaster Corps, be reinstated in your department, either in a civilian capacity or as a commissioned officer in the Quartermaster Corps.

He, in our judgment, is an efficient, honest, and capable man, and was removed from his rank entirely on account of his objections to questionable transactions in the Surplus Property and Sales Division of the War Department and because he did not submit to the same.

As some of the signers hereof have already stated to you personally, we believe he will be of great assistance to you in investigating matters which necessarily will come before you for investigation.

Very truly yours,

_____.

Who signed that letter, Mr. President? It will be rather interesting to know. The first signature is that of WILLIAM J. GRAHAM, the chairman of the committee, a Republican from Illinois, a Member of Congress whom you expect to elevate to the bench.

Who was the next? JAMES A. FREAR, a fearless Republican from Wisconsin.

Who was the next? JOHN C. MCKENZIE, a member of the Military Affairs Committee, a Republican Member of Congress from Illinois, a man of high character and long service.

Who was the next man? ROYAL C. JOHNSON, a Republican from South Dakota, a young man who voted against war because he was opposed to war, but when war came he laid down his commission as a Member of Congress and went out here to Camp Meade as a private soldier and served through the war and shed his blood on the fighting front in France. He came home and was reelected to Congress.

Who was the next man that signed this letter? C. F. REAVIS, an able, fearless Republican Member of Congress from Nebraska, a somewhat bitter partisan, but a fearlessly honest and able man. He signed it.

Who else signed it? WALTER W. MAGEE, an able Member of Congress, a Republican from the great State of New York, a man that the Republican Party has been attempting to make governor of the State.

Who is the next man that signed it? OSCAR E. BLAND, a Republican Member of Congress from Indiana, and one of the leaders on the Republican side of the House.

Who else signed it? ALBERT W. JEFFERIS, a Republican Member of Congress from Nebraska, a man who was one of the appointees during the war, who helped to shape some of the policies.

Who was the next? CLARENCE MACGREGOR, a Member of Congress from New York.

Then it is signed by five Democrats; I will omit their names, because I am offering Republican testimony altogether, so that the Senator from New Hampshire [Mr. MOSES] can be persuaded.

Let me read you another letter, Mr. President. Incidentally, let me remark, here are these nine Members of Congress, Republicans, testifying to the good character of Major Watts, and here is the Attorney General, under fire, who says Watts is trying to shield criminals. There is not a court or a jury anywhere in the land, if these men were put against Harry Daugherty on that issue, who would not find a verdict against Daugherty without leaving the jury box, and I know it.

Here is another letter:

HOUSE OF REPRESENTATIVES,
SELECT COMMITTEE ON EXPENDITURES IN THE WAR DEPARTMENT,
Washington, D. C., April 25, 1921.

Hon. JOHN W. WEEKS,
Secretary of War, Washington, D. C.

DEAR SIR: I am inclosing herewith a letter signed by 9 of the 10 Republican members of the late Select Committee on Expenditures in the War Department. The remaining Republican member, Mr. MCCULLOCH, is not in town, and hence I was unable to see him. I trust the letter will have your consideration, and, if possible, your early approval.

As I stated to you recently, Major Watts is a veteran of both the Spanish-American and World Wars. I have no doubt, on inspection of his record, that you will find it a creditable one in both instances. He is a Tennessean, and a man of very considerable capacity and ability.

Now, look here—

He could have retained his commission in the Army if he had been willing to refuse to notice matters that were going on within his jurisdiction where he felt the Government was being defrauded.

I am well aware that his appointment will not meet with the approval of General Rogers, Chief of the Quartermaster Corps, and of several other officers with whom he had dealings while in the service, and who feel resentful toward him. However, the fact remains that he was done a manifest injustice by these same officers, and was caused to suffer for doing what he considered to be his duty to the Government.

I would be very loath to ask any action, as would be the other members of my late committee, that would injuriously affect your department; however, I believe the reinstatement of Major Watts, in either a civilian or military capacity, will be the best example you can give

to those in your department of your desire to do complete justice, and to have every man and woman understand that their first duty is to defend the interest of the Government.

Yours respectfully, W. J. GRAHAM.

Here is another, Mr. President:

HOUSE OF REPRESENTATIVES, UNITED STATES,
Washington, D. C., June 22, 1921.

Hon. H. M. DAUGHERTY,
Attorney General of the United States,
Department of Justice, Washington, D. C.

MY DEAR MR. DAUGHERTY: In connection with the investigation relative to war contracts which you are initiating in your department, permit me to call your attention to Maj. W. O. Watts, a former officer in the Quartermaster Corps, and who served with distinction in both the Spanish-American and World Wars.

Major Watts has rendered invaluable assistance to the Select Committee on War Expenditures, and has demonstrated to me on every occasion his entire honesty and fealty to the Government. His information is so extensive that he would be of invaluable assistance in your investigation, and would save large expenditures of time and money in acquiring the information that your bureau must have. I know a great deal of adverse criticism has been made against him by officers in the War Department, but these criticisms have been made because he has opposed them in practices which were pernicious and contrary to the interests of the Government. I sincerely trust that you may find it possible to use him in some capacity. Since his discharge, on account of his refusing to stand for the practices in the War Department, he has been in Washington with his family, constantly endeavoring to enlist the attention of the authorities to the practices that were going on, and I have no doubt, by his unsupported efforts, he has thus far saved the National Treasury millions of dollars, but always without compensation and employment of any kind.

I sincerely trust that he may be employed by your investigating bureau.

Yours very truly, W. J. GRAHAM.

The same Member of Congress.

Here is another letter, Mr. President. I am glad they wrote them.

HOUSE OF REPRESENTATIVES,
Washington, June 22, 1921.

Hon. H. M. DAUGHERTY,
Attorney General of the United States, Washington, D. C.

MY DEAR MR. DAUGHERTY: I desire to invite your attention to Maj. W. O. Watts, formerly an officer in the quartermaster's section, War Department, during the recent war and who possesses first-hand information on the contracts entered into by the War Department, and which are now being investigated by you.

Major Watts's testimony before the Committee on War Expenditures, of which I am a member, greatly assisted the committee in making the findings which are now in your hands. His fidelity to principle was at all times manifest, and his dismissal from the War Department followed his activities in bringing the facts to light. After his discharge he continued to interest himself in the various contracts, and, despite rebuffs, endeavored without ceasing to interest high officials in safeguarding the Nation's rights under the agreements.

That his contentions have a basis in fact can not be disputed in view of the recent action of your department in canceling the so-called "harness contracts." This is one of the agreements to which Major Watts entered forceful objections, and his knowledge of the facts would be of immense value to you in the investigations of the entire matter. His discharge from the War Department is a credit to him, and demonstrates that he possessed and was anxious to divulge information which would bring certain individuals to justice.

I respectfully urge that you place Major Watts on the rolls in your department, and avail yourself of his valued aid.

Yours very truly,

ALBERT W. JEFFERIS, *Member of Congress.*

Mr. JEFFERIS is a Member of Congress from Nebraska, and a Republican. That is not all, Mr. President. Here is a very interesting letter, indeed. Here is one from the Department of Justice, dated Washington, D. C., June 27, 1921. It is a memorandum for Colonel Goff, the great prosecutor, and reads:

In response to your inquiry as to the status of former Maj. W. O. Watts I have to report the following:

Major Watts's assistance to the Department of Justice began in January of this year. The department had at that time been investigating the contract with the United States Harness Co., and it was learned that former Major Watts (and former Capt. George C. Bosson)—

By the way, he has been discharged also—

had recently testified before the Graham committee relative to the contract in question. On request from me Major Watts (and also Captain Bosson) promptly responded. Major Watts had an intimate knowledge of the conditions at the War Department as to personnel, methods, etc., and with a view to using him as a witness in the case I made free use of information which he brought.

Listen to this:

Major Watts has been most useful to the department and you will recall that I endeavored, with your approval, to get Mr. Secretary Weeks, in April, to reinstate both Major Watts and Captain Bosson in the War Department in order to secure the help there of which the Department of Justice was then sorely in need. You will probably recall that they were both appointed by Mr. Weeks, but the strong opposition to Major Watts caused Mr. Weeks—I feel because he did not fully understand all the circumstances—to revoke Major Watts's appointment 15 minutes after he had made it.

Major Watts's great interest in the case has caused him to continue to bring to the department much information which came to him from former associates. As a matter of fact, I believe that no day has passed since January that Major Watts has not called at the department, and the information which he has brought has been invaluable.

You will recall that I suggested to you, in view of the great help which Major Watts would be able to render in assisting in the preparation of the papers and securing further evidence for the criminal trial in the harness case—and several other cases which I believe will end in criminal prosecutions and recovery of money—that I hoped you would be able to appoint him as a special agent as soon as the contract with the harness company was canceled. The department could have used his full services to great advantage before this, but, in view of the strong opposition at the War Department to him, it seemed wise to defer his appointment until certain parties at the War Department could not use such appointment to prejudice our case. While I have not all the evidence to establish the fact definitely, there is no particle of doubt in my mind but that Major Watts was discharged from the Army because he reported dishonest methods, and his presence was unwelcome to some of the parties involved in the harness case, through whose influence his discharge was brought about. Major Watts can not be too highly commended for his untiring efforts to see that the right prevailed, and this when he was without income and has been compelled to go into debt for his actual living expenses for months past.

This memorandum seems unnecessarily long, yet I feel that you wish to know the various circumstances, particularly as to the past services rendered and to Major Watts's present needs, when you fix the amount of his compensation.

CHAS. B. BREWER,
Special Assistant to the Attorney General.

The Attorney General now is rather hard put to it, when, in order to shield himself from the righteous indignation of the American people, he in an interview says that Major Watts is trying to shield criminals. The man who would make that charge, in the face of what the Attorney General knows the facts to be, can not and will not retain the confidence of any honest, intelligent American citizen anywhere, whatever his political affiliations may be.

Daugherty is content to blacken Watts's reputation because Watts would not acquiesce in the Attorney General whitewashing criminals who had robbed the Government. Watts was discharged by the Attorney General, as he was discharged by what these Republicans themselves say were corrupt interests in the War Department, for exactly the same reason—because he would not condone crime. They drove him out of the Army for being honest. They drove him out of the Attorney General's office because he would not sell his soul; and now the Attorney General, to defend himself, attacks Watts's reputation. We love some men for the enemies they make.

The Attorney General has attacked Captain Scaife, who was also a soldier, and is an honest officer. It is true that the Senator from Ohio [Mr. WILLIS] and myself were led into an error. I thought that Captain Scaife had been discharged, but that is not the fact. Captain Scaife says in a letter to me—and the records show it—that he tried and tried and tried to get the Attorney General to prosecute certain criminals and to recover millions of dollars out of which the Government had been defrauded. When the Attorney General would not act, although the Attorney General knew the facts, because Scaife talked to him about it, Scaife resigned from the department, refusing to be a party to the conditions there existing. If that is to his discredit, I wish we had more who were willing to be discredited that way.

These men are attacked by the Attorney General in this interview, which he gave out yesterday; they are accused of trying to throw up what the Senator from New Hampshire calls a "smoke screen" to cover criminals.

These facts were put in the RECORD, except these letters, by these two Republican Members of Congress. A Republican Senator who knew about the facts considered that they should be so used. So this disposes of that part of the Attorney General's plea that he is being persecuted to shield grafters. I know that nobody believes—I know that the Attorney General does not believe—these two Members of Congress of his own party and these two soldiers were trying to shield grafters. They had exposed themselves, however, to attack in order to uncover grafters.

There is a letter in the RECORD which never has been answered by the Attorney General. It has been in the RECORD two months now. It charges that as soon as JOHNSON and WOODRUFF, the two Members of Congress, made these charges against the Attorney General, he at once put Secret Service agents on their trail to try to frame them up. Among these agents is a negro, who is his chauffeur, but whom he has on his pay roll as an investigator. He put this negro to trailing these two Congressmen, and had their mail searched, according to that statement. In this open letter the Attorney General was asked if he would deny it, and he never has.

If the Attorney General wants to be vindicated, to get the kind of vindication to which he is entitled, I will furnish him a witness who will testify that he has had Secret Service men trailing Members of the Senate; spying upon Members of the House and Members of the Senate. If you gentlemen who desire to defend the Attorney General want to submit to that condition, it is up to you to do so. I do not intend to reveal the name of this witness, because she has a place of employment in the Government, until the Attorney General wants an investigation, and you Republicans are willing to have it. Whenever he does, and you are willing, I will furnish a witness

who will establish the facts, if things may be established by human testimony.

I can submit to this condition. But I object rather seriously to his putting a negro on our trail. I would rather be trailed by a white man. I think, however, a negro is a very worthy representative of the man who put him on the trail of white Members of Congress.

That is not all. The Attorney General said in this interview which he gave out yesterday that the country would not lose confidence in the Department of Justice. Let me read it:

The various prosecutions of war fraud cases will be carried out as expeditiously as possible, irrespective of these and other activities and attacks which will be expected. I have faith that the people of the country appreciate the situation and have confidence in the Department of Justice being fair, judicious, and effective.

Let us see how much the Attorney General's faith in the American people ought to be justified. Here is a letter which went into the RECORD, being put in the RECORD by Republican Members of Congress and thereby vouched for, written by a former Army officer, a man whom the Attorney General had appointed to office, but who would not stand for the frightful conditions in that office, and resigned rather than to do it. He makes this charge, and the Attorney General never has denied it, though it has been a matter of public print since the 15th day of May, and this is the 24th day of May. I want to read this letter again, which has been in the RECORD, because I want the Senate to get its significance. It bears date May 5, 1922, and is addressed to Hon. ROY O. WOODRUFF, House of Representatives, Washington, D. C. ROY WOODRUFF is a Republican Member of Congress. It reads:

MY DEAR MR. WOODRUFF: Before bringing to your attention my memorandum to Col. Guy D. Goff, Acting Attorney General, dated March 18, 1922, and incorporated in your speech to Congress on April 11, I desired to be sure that Hon. H. M. Daugherty, the Attorney General, was personally acquainted with and fully informed as to all matters involved in the situation at the Department of Justice, in order that he might act in the premises if he desired to do so.

I was informed that Col. T. B. Felder—

I have heard that name before—

was a very close personal friend of Mr. Daugherty, and I was brought in contact with Colonel Felder and explained the situation to him and requested him to call the attention of the Attorney General to the reports that I had filed and to inform him that unless he acted I would pursue the course indicated in the memorandum referred to.

That is, make it public. I would like to pause here long enough to say that the writer of this is a reputable lawyer, a citizen of South Carolina, who the Senator from South Carolina [Mr. DIAL] says is a man of unimpeachable integrity and high character. He was working for the Government under the appointment of the Attorney General. He had made investigations and wanted to report to the Attorney General, but he could not see the Attorney General. He had to hunt up a man whose reputation is that of being a notorious lobbyist, and get to the Attorney General through Thomas B. Felder, instead of going to his chief himself. He could not reach the Attorney General, but had to reach him through Mr. Felder, the lobbyist, the man whose picture has been painted in this RECORD until everybody will remember Felder; the man who wanted me to waive my personal immunity so that my death might be hastened. After I had done so, he never has said a word to me. He has disappointed the people who are to be the beneficiaries of my life-insurance policies, because they expected to collect, but Felder has not shown up yet. He went to Felder and Felder got access immediately to the Attorney General. Honest people could not.

He said:

The next day—

That shows that Felder could get immediate action—

The next day I was called to the office of the Attorney General and he stated to me that he had my reports before him, and I then ascertained that he had been personally acquainted with the situation.

The Attorney General stated to me that he would call me into conference on the following Tuesday, but I heard nothing further from him, and after waiting a sufficient time to give him every opportunity to act, I formally transmitted the matter to you, as is now well known. I might add that I had never known Colonel Felder before meeting him on this occasion and for the purpose stated, and subsequent thereto have only seen him casually until last night.

Yesterday I had a message from Colonel Felder to meet him in his room at the Shoreham Hotel, which I did last night, and in the presence of a witness I engaged with him in an extended discussion of conditions in the Department of Justice, of which I had complained. I stated to him that I had no animus against the Attorney General, but that I felt most bitter against the conditions which he was permitting in the Department of Justice. During the course of the conversation Colonel Felder stated that he had been retained as counsel for the Bosch Magneto Co.—

That is, the old German owners—

and that he desired to associate me with him in the case. He told me that he had been with the Attorney General during the afternoon and had gone into the matter with him fully and that the Attorney General wanted him to see me. He stated that the Attorney General had agreed to cooperate with us and that he had also talked with Col. Guy D. Goff for an hour and a half during the afternoon and that everything had been arranged for us to proceed.

Before leaving his room in the Shoreham Hotel Colonel Felder stated that he was going to spend the night with the Attorney General at the Wardman Park Hotel and that they would talk about the matter until 8 o'clock that night. Each time Colonel Felder broached the subject of my employment I shifted the subject, and when we parted he asked me to do nothing in my fight until he could see me next day. When we parted Colonel Felder took a taxi for the Wardman Park Hotel and asked me to join him that far out on my way home, but I declined. This morning I received a letter from Colonel Felder notifying me that I had been retained in the Bosch Magneto case, a copy of which is hereto attached.

While I think it is eminently proper that a suit should be brought to set aside the Bosch Magneto sale, and while under ordinary circumstances I would have had no hesitation in being employed in the case when Colonel Felder disclosed the fact that he had come to me from the Attorney General and with the arrangements that had been suggested, the impropriety of the proposal I consider reprehensible, and I desire that you be acquainted with the facts.

In order that there may be no misconception of my true position and intentions in the matter in case I am further approached, I am reducing the foregoing statement to writing and will have this letter duly witnessed.

Very truly yours, H. L. SCAIFE.

—

SHOREHAM HOTEL,
Washington.

DEAR CAPTAIN SCAIFE: Am obliged to return to New York to-night. Sorry I did not see you before my departure. I expect to return on Monday or Tuesday next, when I will complete our tentative arrangements. You may consider yourself retained in the Bosch Magneto case. We will discuss the details on my return.

Very truly yours, THOS. B. FELDER.

The letter bears date of May 5, 1922.

Now, Mr. President, I do not say what the facts are. Here is a man by the name of Scaife, a former captain and for whom the Senator from South Carolina [Mr. DIAL] vouches as a man of most unimpeachable integrity. He says Felder came to him with the statement that he came at the request of the Attorney General; that the Attorney General and Felder had made up an agreement touching this matter about which an investigation is presumed now to be going on; that they had reached an understanding, the Attorney General representing the Government and Mr. Felder representing the other party hostile in interest. But the Attorney General, knowing that Mr. Scaife was the man who had the information, made one of the conditions of the settlement—that is what the language implies—that Felder would get in touch with Scaife and employ him.

Now, the Attorney General has not denied the statements contained in that letter. I do not know what answer the Attorney General could make unless to answer as he did yesterday, that "somebody is trying to keep him from doing his duty." But no one would believe him if he thus answered.

I say, Mr. President, if that letter goes unanswered it stamps with corruption the administration of the Attorney General's office that he can not escape. He has not answered yet. The letter, placed there by a Republican Member of Congress, has been in the RECORD now for more than two weeks. The Attorney General's attention has been called to it, but he has never dared to say that he did not have this corrupt understanding with Thomas B. Felder, or that he did not send Felder to employ Captain Scaife. He owes it to himself, if he has any self-respect, to tell what the facts are. He owes it to the President of these United States, who named him as the head of the Department of Justice, to clear up that incident. The Attorney General can not answer it by attacking Major Watts or Captain Scaife or Congressman JOHNSON or Congressman WOODRUFF or me.

I am not trying to thrust myself into the forefront of this picture, although the Post this morning says I am the one answered. I presume the Post knows; but from a mere reading of the Attorney General's interview no one could tell whom he meant. Perhaps the Post was told confidentially by the Attorney General that he was speaking of me. If so, I say now, and I defy the Attorney General to refute it, that I have not talked with a single man, woman, or child who is or was interested in protecting a man, woman, or child from prosecution in war-graft cases or any other. I am not interested, never have been, and never will be interested in the defense of any man who corruptly defrauded his Government. I would not accept employment as his attorney; I would not do anything in his behalf. I am not interested; I never have been interested; I never have talked with a man, woman, or child who is interested in such a defense. Nobody so interested has inspired me to speak in this case. The Attorney General has his "nigger" chauffeur that he puts to spy us out. Let him take my statement and verify it. I defy him to do it.

If the Attorney General will ask for an investigation, I will help him get it, if he wants me to do so. He is also welcome to every letter that has come to my office in this matter. He is welcome to everything in my files. He may have everything

I have that is connected with this case, and I now defy him to ask the House to pass this resolution of investigation. If he does not, and does not clear up the incident mentioned in the Scaife letter, he stands convicted before the American people as a man who has entered into a corrupt agreement touching a matter in which the Government has a vital interest, and he is the Attorney General of the United States. If his party will not let him be investigated, with his party must rest the responsibility.

In this interview given out last night the Attorney General asserts that those behind this criticism of him are actuated by a desire to shield war grafters. If he included me in that charge he uttered a malicious falsehood. I defy him to bring his proof. He will not do it.

Everyone knows how I came into this case. It is not worth while possibly to relate it again. But in the interest of honest history, although the record is clear, I am going to state it again.

I was criticizing the President of the United States for refusing to see a lot of little children who had come a thousand miles to beg for mercy for their fathers. The President had that day seen two variety actresses, the tallest man in the world, and the shortest man; he had seen every kind and variety of man; he was at that time setting out to play a game of golf with his close friend, and everybody knows who he is. He would not see the children. I incidentally said that I presumed if these children had had money, instead of merely hope, so they could have employed an influential pardon attorney, as the present Attorney General was before he was appointed as Attorney General, and could have paid him $25,000, they would have been able to see the President.

The Senator from Indiana [Mr. WATSON] thereupon rose, and with some heat said that the Attorney General had had nothing to do with getting Morse's pardon. I asked him how he knew, and he said the Attorney General had told him so. The colloquy went on until the Senator from Indiana—and I have great respect for him and believe he told the truth—said the Attorney General had told him he had nothing to do with getting the pardon and absolutely never had anything to do with it at all. It was embarrassing. I then looked up the old newspaper files. I found that the Attorney General had given out an interview in which he said that he had secured this pardon. The controversy flarred up from time to time when someone stirred it until finally the Senator from New York [Mr. WADSWORTH], in his anxiety to vindicate the very "worthy" attorney from New York, Mr. Felder, put in the RECORD a letter from Felder. I then read into the RECORD a photostatic copy of Daugherty's contract to free Morse and another letter from Felder which showed how they freed him. If they did not practice fraud on the Government, after they learned that it had been done they condoned the fraud by appearing in the defense of Morse to keep the Attorney General from asking the President to revoke the pardon. That is the history of the case, so far as I am concerned. The Attorney General now says this attack is a smoke screen to deter him from doing his duty.

I repeat that when the charges were made by WOODRUFF and JOHNSON in the House, based upon information given them by Major Watts and Captain Scaife, the Attorney General was not doing anything. If any persons were interested in the defense of war grafters, they could not have been made happier than by this inaction of the Attorney General. He was doing nothing. The statute of limitation was running. This action stirred him up. He may take action now. He wanted $500,000 to investigate the charges, and I want him to have it. I do not know what use he will make of it. I do not know whether he will give it to his "nigger" chauffeur or not. He wanted a special grand jury. I wanted him to have it; so did ROYAL JOHNSON and ROY WOODRUFF, both of them voting for his propositions in the House. But the Attorney General now insults the intelligence of the American people by saying that these brave soldiers and Congressmen are actuated by a desire to keep him from prosecuting the war grafters. That defense will not be accepted by anyone except the feeble-minded.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The Secretary will state the pending amendment to the amendment of the committee.

The ASSISTANT SECRETARY. In the amendment of the committee, in paragraph 213a, on page 37, line 10, after the word "Amorphous," the Senator from Colorado [Mr. NICHOLSON] moves to strike out "10 per cent ad valorem" and to insert "1 cent per pound," so as to read:

Graphite or plumbago, crude or refined: Amorphous, 1 cent per pound.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Colorado to the amendment reported by the committee.

Mr. NICHOLSON. Mr. President, the amendment proposed by me to the graphite schedule in paragraph 213a of the bill as reported by the Finance Committee providing for the specific rates of 1 cent per pound duty on amorphous graphite, 3 cents per pound on lump, chip, and dust graphite, and 5 cents per pound on flake graphite is offered because:

First. There are practically unlimited reserves of graphite ore in the United States to meet the requirements of the country under any circumstances.

Second. The American graphite is equal in quality to any foreign graphite for any purpose, and superior to all foreign graphites for some purposes.

Third. The American graphite mines have greatly reduced production, and but few of them are now in operation.

Fourth. The rates asked will not increase the cost of graphite products to the consumer in the United States.

Fifth. The manufacturers of graphite products are receiving a great deal more than compensatory protection under paragraph 216 of the bill, and they can have no consistent complaint to make.

Sixth. It is estimated that there are over $10,000,000 invested in graphite mines and mills in the United States, which will be practically entirely lost unless adequate protection is given the industry.

Seventh. Graphite is a very important and necessary article of commerce in peace times and an absolute essential in time of war, and therefore the industry should not be allowed to die.

Mr. President, graphite ore is found in 24 States of the Union and also in Alaska. Considerable mining and development have occurred in 12 different States, with some development in the other States and in Alaska. In United States Geological Survey Bulletin 666–L on graphite, Mr. Henry G. Ferguson, of the survey, says, "It will be seen that the United States possesses a considerable reserve of crystalline graphite, for the most part suitable for crucible manufacture." The fact that we have ample reserves of graphite has never been disputed by anyone and is conceded by all concerned.

The manufacturers of crucibles and other graphite products who wish to continue their imports free and to maintain their present position by means of the most degraded and ill-treated labor on earth have persisted in the exploded argument that American graphite is inferior to foreign graphite and will not do the work. All importers seem to use this same threadbare argument in connection with whatever material they are particularly interested in, claiming that all American raw products are inferior and not to be compared with foreign raw products. Their argument is absurd, unfair, and unpatriotic and can be readily disproved in practically every instance by anyone with a knowledge of the facts. When confronted with the facts in the case of American graphite the manufacturers of graphite products have the temerity to dispute them in the most brazen manner, and they practically argue that facts are not facts at all unless they favor their selfish argument.

With regard to American amorphous graphite, of which there are large deposits in Colorado and several other Western and Southern States, the manufacturers of amorphous graphite products have been reluctantly compelled to admit that the physical properties and the chemical analysis of this material are identical with the physical properties and chemical analysis of the foreign amorphous. Every man who can reason knows that when this is the case there can be no difference between the two materials. But these manufacturers still cry that the foreign material is "different," although they can not show and have not shown wherein the foreign material is "different," nor why. There are two firms in the United States which admittedly own and operate amorphous graphite mines in Mexico, where they went, of course, to get an advantage over the American miner by way of the cheap labor to be had there, and it is these two foreign investors who are most strenuously objecting to the American miner receiving enough protection on amorphous graphite to put him on something like an equal footing with the Mexican. These foreign investors demand that, in addition to the advantage they gain through the cheap labor of Mexico, they also be given the advantage of free imports from that country, regardless of what happens to our American mines, our American invest-

ments, and our American labor. Their position is absolutely untenable.

With regard to American crystalline graphite, the opposition to adequate protection on that grade of material comes from the crucible makers, or, at least, from all the crucible makers but one. These importing crucible makers also run true to form and argue that American crystalline graphite is no good and will not do the work, at least so far as crucible making is concerned. They do admit, however, that for certain other purposes, notably for lubrication, the American crystalline flake graphite is the best in the world, but most of them do not make lubricants. Some of the crucible makers have investments in foreign graphite fields, although this was denied in testimony given before the Finance Committee. In McRae's Blue Book for 1921, on page 697, however, the advertisement of the very crucible maker who made the denial clearly indicates that he, at least, has such an investment.

There is, however, one American crucible-making company in Buffalo, N. Y.—the Electro-Refractories Corporation—which is making and selling a graphite crucible and using no graphite in the mixture except American flake. This company has absolutely demonstrated the superiority of American flake graphite for crucible use and their crucibles are standing an average of 85 heats to the crucible as against an average of 26 to 30 heats, which is the most the crucible made from the best foreign graphite will do. Because of the much longer life of the American graphite crucible the price to the consumer is less than half the price of the foreign graphite crucible, even adding to the cost the full duty asked in my proposed amendment. It is significant that this Buffalo company—to which the old-line crucible makers do not care to refer—which is the only crucible-making concern in the United States using all-American graphite in its crucibles, is also the only one not opposing protection to the graphite producers.

During the war, when foreign graphite was not easily obtainable, the Jonathan Bartley Crucible Co., of Trenton, N. J., made a crucible of American graphite and American clay and advertised it and sold it to the American consumer as the best crucible ever made.

Mr. FRELINGHUYSEN. Mr. President, would the Senator object to stating again the name of the New Jersey company to which he has referred?

Mr. NICHOLSON. The name to which the Senator from New Jersey has reference is the Jonathan Bartley Crucible Co., of Trenton, N. J.

Mr. FRELINGHUYSEN. I thank the Senator.

Mr. NICHOLSON. They represented this crucible as "a triumph of American skill, perseverance, methods, and materials over foreign materials."

Mr. Guthrie, recently the practical head of the crucible-making department of the Crucible Steel Co. of America, made the open statement a number of times to a number of reputable men, at a time when there was no discussion of a tariff on graphite, that American flake graphite would make a perfectly satisfactory crucible, and that he himself had demonstrated that fact. Mr. Guthrie repeated this statement in his testimony before the Committee on Mines and Mining, United States Senate, Sixty-fifth Congress, H. R. 11259, page 284.

In 1917 a test was made by Mr. F. P. Aschman, professor of chemistry in the University of Pittsburgh, of a crucible developed by the Lava Crucible Co., which test was witnessed by a number of brass and steel manufacturers of the Pittsburgh district. The graphite used in this crucible was entirely American, and the crucible stood 70 consecutive heats of brass.

The fact that the Japanese, the English, the French, and the German crucible makers have been making and are making satisfactory crucibles out of flake graphite is further testimony to the suitability of flake for the purpose.

But this Government itself has gone to the trouble and expense of finding out the truth of the whole matter, and through the Bureau of Mines has absolutely demonstrated the superiority of the American flake graphite for crucible use. Doctor Stull, of the bureau, has made exhaustive tests with both graphite and clay, and these tests have been entirely completed so far as brass melting is concerned. He reports that the crucible made of American flake graphite and American clay is superior to a crucible made of the much-vaunted foreign graphite. The old-line crucible makers until quite recently stoutly maintained that American clay was also no good for crucibles, and that the clay had to be imported from Germany, as it always had been before the war. Doctor Stull found that, besides having the best graphite, we also have the best clay for crucibles. He found two American clays for brasswork and 13 American clays for steelwork that were better than the German clays. The crucible makers have accepted Doctor Stull's verdict on the clay, but they refused to accept it on the graphite. Why? Because the life of the American graphite crucible is so much longer than the life of the foreign graphite crucible that if they use the American graphite the American consumer will not need to buy half as many crucibles; also they wish to protect their foreign investments. They seem to have no consideration for either the American producer or the American consumer.

The American graphite mines have practically ceased production and can not resume without adequate protection. Many of the mining companies, of which there are 53 in this country, are in bankruptcy and thousands of miners and their wives and families are in utter distress and have been in this condition now so long that their story is pitiful in the extreme. We should extend a helping hand to these people, even if the tariff asked should add a few cents to the cost of manufactured graphite products, which, however, it will not do. On the grade of graphite which the crucible makers say must be used in crucibles we are asking a duty of 3 cents per pound. The Bureau of Mines reports that, even if this full 3 cents is passed on to the consumer, it will add only thirty-nine one-thousandths of 1 cent a pound to the cost of the metal melted. This is infinitesimal and can not be traced in any manufactured article. But outside of the interests opposing the tariff on graphite, where is the man in this country who would not be willing to pay thirty-nine one-thousandths of a cent a pound more for the steel in a hammer or a saw—or in an automobile, for that matter—in order that this industry may survive?

The rates asked in the amendment to the graphite schedule are fair, and, if agreed to, there is no question that instead of increasing the prices of graphite products to the consumer the prices will be reduced. In the case of an all-American crucible taking 85 heats as against the present form of graphite crucible taking 26 to 30 heats, the advantage to the consumer in the longer life of the American crucible can be readily seen. Even with the full proposed tariff rate added, the American crucible will cost less than half its present price, as has been shown in the hearings. In the case of practically all other graphite products the price can be reduced, will be reduced, and ought to be reduced. Domestic production will be extended to the limit of the demand, and this will be followed by such keen competition amongst domestic producers that it will compel proper and reasonable prices. If the present manufacturers refuse to conform to the new conditions under this proposed tariff and continue to charge their exorbitant prices, the opportunity will certainly invite manufacturing competition from the producers themselves, and that will assuredly have the desired effect. Give the producers a chance to get on their feet and once again demonstrate the efficacy of protective tariff.

For 50 years the importers and manufacturers of graphite products have had their own way in this matter. During all these years graphite has been on the free list and never has the producer been in a position to name a price for his product. He has had to accept what the manufacturer offered or close his mine. Even during the war a great many of the producers lost money; but, according to Moody's Manual, the Joseph Dixon Crucible Co. increased its surplus of $1,854,169 in 1914 to $4,976,570 in 1917 and paid 100 per cent on its capital, or $2,000,000, in 1917. The history of the manufacture of graphite products under protection has been success; the history of the production of graphite under free trade has been failure. To-day the producer could not get an offer for any grade of his product; if he could, it would not exceed 3 cents a pound for No. 1 flake and half a cent for dust. But what is the consumer paying to-day? For crucibles he is paying exactly double the pre-war price. For lubricants these packages will illustrate:

Here is a 1-pound can of Dixon's No. 1 American flake graphite and here is a half-pound can of Dixon's automobile graphite. This invoice shows the purchase of these articles to be of recent date, and the prices to be 75 cents a pound for the flake and $1.50 per pound for the dust or powdered graphite. The flake is exactly as it leaves the producer's refinery, with nothing done to it at all, while the automobile graphite is dust, and mostly the attrition or by-product from the manufacture of the flake, which the producer tries to avoid as much as possible.

I have here a slip showing the price paid for this product, the purchase having been made here in the city of Washington. It was bought from Barber & Ross, who are the dealers in this product.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER (Mr. KELLOGG in the chair). Does the Senator from Colorado yield to the Senator from Massachusetts?

Mr. NICHOLSON. I yield.

Mr. WALSH of Massachusetts. Will the Senator state the domestic and the import price at the present time of crystalline flake graphite?

Mr. NICHOLSON. The domestic price and the foreign price, of course, would be practically the same, because the article is on the free list.

Mr. WALSH of Massachusetts. How much does it sell for per pound or per ton?

Mr. NICHOLSON. The latest information that I have on that subject is as of January 7, 1922. The price on amorphous was from half a cent to 2 cents a pound. That was the selling price in the market as of January 7, 1922.

Mr. WALSH of Massachusetts. Was that the domestic or the imported article?

Mr. NICHOLSON. Both the domestic and the imported. Of course, the domestic production would have to meet the foreign price.

Mr. WALSH of Massachusetts. That is a pretty wide variance—from half a cent to 2 cents a pound.

Mr. NICHOLSON. It depends on grade. The grades vary. There are three different grades.

Mr. WALSH of Massachusetts. Different grades of flake?

Mr. NICHOLSON. Yes; three different grades of the material.

Mr. WALSH of Massachusetts. The Senator's amendment proposes to put a rate of how many cents per pound upon flake graphite?

Mr. NICHOLSON. On graphite or plumbago, crude or refined, amorphous, the committee placed a duty of 10 per cent ad valorem. On the basis of the present selling price the protection would be two-tenths of a cent or one-tenth of a cent, as the case might be. That would be all the protection that that tariff would afford the miner, and I ask for 1 cent per pound duty on that particular grade. I want a 1-cent duty instead of the 10 per cent ad valorem. My amendment provides for a specific duty instead of an ad valorem duty.

Mr. WALSH of Massachusetts. So I understand. What is the specific duty that the Senator asks for on crystalline flake graphite?

Mr. NICHOLSON. Crystalline lump, chip, or dust comes next.

Mr. WALSH of Massachusetts. Yes; that is the second bracket in the paragraph.

Mr. NICHOLSON. The committee placed an ad valorem duty of 20 per cent on that grade, and my amendment provides for a specific duty of 3 cents per pound.

Mr. WALSH of Massachusetts. Now the crystalline flake?

Mr. NICHOLSON. On crystalline flake, the Finance Committee placed a duty of 2 cents a pound, and my amendment provides for a duty of 5 cents a pound; but I want to direct the attention of the Senator to the price at which the manufacturer is selling this product—75 cents a pound and $1.50 a pound when you purchase it from the manufacturer.

Mr. WALSH of Massachusetts. I understood the Senator to say that the crystalline flake graphite was selling for from one-half to 2 cents per pound.

Mr. NICHOLSON. Amorphous.

Mr. WALSH of Massachusetts. The Senator proposes to put a duty of 5 cents per pound upon that flake, so that the prices—assuming that the duty is reflected in an increased price of the domestic product—will be 5½ cents per pound and 7 cents per pound?

Mr. NICHOLSON. Yes; that will be about the price.

Mr. WALSH of Massachusetts. In other words, the Senator proposes to increase the price of this flake graphite from 300 to 500 per cent?

Mr. NICHOLSON. No; I would not say it would increase it 300 per cent. The crystalline graphite sells at 5 to 6 cents a pound. The amorphous sells at the lower price, and the crystalline flake and lump and chip sell at 3 cents a pound.

Mr. WALSH of Massachusetts. The flake graphite is the grade on which the Senator asks for the largest increase of duty?

Mr. NICHOLSON. Yes; on the crystalline we ask for the larger increase.

Mr. WALSH of Massachusetts. The crystalline flake?

Mr. NICHOLSON. Yes; the crystalline flake.

Mr. WALSH of Massachusetts. And that means that you are going to increase the price, if the duty is reflected in the domestic price, by from 150 to 200 per cent?

Mr. NICHOLSON. No; in no event will it increase the price over 100 per cent, because if crystalline graphite is selling at 6 cents, and you add a 5-cent duty, you do not quite double the price.

Mr. WALSH of Massachusetts. The Senator has said to me that flake graphite was selling for 3 cents a pound.

Mr. SHEPPARD. Mr. President, will the Senator tell us what, in his opinion, would be the increase in price of these various raw articles?

Mr. NICHOLSON. By adding this tariff?

Mr. SHEPPARD. As a result of the tariff the Senator proposes.

Mr. NICHOLSON. Replying to the Senator from Texas, I can not see that there can be any increase to the consumer if this tariff is added, because of the fact that an exorbitant price is being charged for this material now. As I have shown, this material, costing anywhere from a cent and a half to 5 cents a pound, depending on the grade of material, is selling at 75 cents to $1.50 per pound. Can any sane man reason that an added tariff of this small amount is going to increase the cost to the consumer? I want to say frankly that if the Federal Trade Commission were attending to its business this imposition would not be permitted upon the general public—this exorbitant charge which is being made by the manufacturers of graphite selling their product to the general public.

Mr. SHEPPARD. Then the effect of the tariff will be to compel the manufacturer to treat the miner with more fairness in paying him for his article?

Mr. NICHOLSON. That is the idea—to protect the miner against the cheap foreign product.

Under the proposed tariff the miner is trying to get a 7 or 8 cent market for this product that sells at 75 cents a pound, and a 2 or 3 cent market for this product that sells at $1.50 a pound. With this demonstration before our eyes can anyone argue that with free trade in graphite either the producer or the consumer has been fairly treated? No; the benefit has all been to the manufacturing importer and the foreigner. I think that answers the question of the Senator from Texas.

Mr. TOWNSEND. Mr. President, will the Senator yield?

Mr. NICHOLSON. I yield.

Mr. TOWNSEND. If it is true that the American manufacturer is charging these exorbitant prices, which ought to be regulated, as the Senator suggests, by the Federal Trade Commission, why is not this a most attractive investment for the American producers of graphite?

Mr. NICHOLSON. Not for the miner. The Senator is correct so far as the manufacturer is concerned; but the miner has no means with which to build a manufacturing plant, and the present condition does not help him as long as the raw product which enters into the production of this material comes from cheap foreign sources.

The opposition to adequate tariff on graphite is selfish and utterly inconsistent. Under paragraph 216 of the bill the manufacturer gets 45 per cent protection on his crucibles and other graphite products, which is an increase of 125 per cent over what he has in the Underwood law. He claims he must have foreign lump and chip graphite for his crucibles, and on this grade we are asking 3 cents per pound. In a No. 70 crucible there are 17 pounds of graphite, which at 3 cents a pound means that the producer would be protected on the graphite in it to the extent of 51 cents. That is what the producer would get, and all he would get, if the full 3 cents were added. Suppose the 3-cent duty raises the price to the manufacturer from 7 to 10 cents, and he has then to pay $1.70 for the 17 pounds of graphite in the crucible? On this $1.70 the manufacturer is to get 45 per cent protection, or 76½ cents, whereas the producer gets only 51 cents. This gives the manufacturer his compensatory protection on the graphite and 15 per cent besides; but the manufacturer gets much more. He gets his 45 per cent on the total value of the crucible, which includes every single item entering into its cost. This No. 70 crucible sells to-day for about 10 cents a number, or, say, $7 for the crucible, double the pre-war price, with graphite half the pre-war price. The Japanese crucible in competition has been selling for from 1 cent to 1½ cents per number less, or, say, $6 for the Japanese crucible. Under the Underwood tariff of 20 per cent this would make the Japanese invoice price $5. Figuring the 45 per cent on the foreign value of $5 gives the manufacturer the handsome protection of $2.25 on this crucible as against the graphite producers' 51 cents. In other words, the manufacturer gets his compensatory protection on the graphite in the crucible and about 35 per cent besides with which to meet the Japanese competition. Yet he is not satisfied and is unwilling that the producer should have anything. These manufacturing importers

are strong, well organized, and well financed, and, after having matters all their own way with the consumer for 50 years, it would be strange if they were not. They have circularized the Senate, they have circularized and alarmed the foundry trade. However, they caught a Tartar amongst the foundry men, a man who went "broke" in the attempt to make a living producing graphite and who drifted into the foundry business. They did not frighten him, because he happened to understand the whole situation. His reply to one of their circulars is a document of considerable human interest, which I send to the desk and ask to have the Secretary read and to have it incorporated as part of my remarks.

The PRESIDING OFFICER. The Secretary will read as requested.

The Assistant Secretary read as follows:

TALLADEGA, ALA., *April 24, 1922.*

JOSEPH DIXON CRUCIBLE CO.,
Jersey City, N. J.

GENTLEMEN: We have your circular letter of the 17th instant urging all buyers of crucibles to immediately get in touch with Congressmen and Senators to oppose the proposed tariff on graphite, and especially the amendment offered by Senator NICHOLSON providing a 5-cent duty on No. 1 flake.

We can not comprehend you. First, we would like to ask what is the difference between the selling price of crucibles now and in 1917–18, when you were paying 15 cents and up for crucible graphite.

We understand that you are able to buy foreign graphite No. 1 at 5 cents per pound and that you use these quotations against the American miner.

The stock arguments that foreign graphite is a necessity in crucible making have been so thoroughly exploded by Government test and commercial manufacture that we will not recount them here. And this fact leaves your opposition to a reasonable tariff resting solely upon the fact that your duty-free graphite is produced abroad by the most degraded labor known to the world.

You are making a tariff-protected crucible from raw material produced by this unfortunate class of labor, and you sell these crucibles to American business men who look upon their employees as men and not dogs.

You go on grinding these unfortunate people deeper and deeper in poverty and you ask us to help you influence Congress to either exterminate the American graphite industry or level its labor conditions to that of Ceylon, where the daily wage runs from 10 cents to 20 cents.

We have in mind a sad picture with which you are not unfamiliar; women, children, old men, and cripples crawling in and out of holes in the ground like human rats, bringing out this graphite in baskets; they are without decent clothing, food, shelter, or homes; they are without joy, hope, happiness, or education for themselves or their children.

"Is it nothing to you" that life like that is equivalent to death? "Is it nothing to you" that your profits are based on their degradation? "Is it nothing to you" that, at the call of our Government in her time of peril, your fellow citizens put millions of dollars into the development of the graphite mines of this country to meet Government necessities? And are you now asking us, your customers, to combine and, through action of Congress, either wipe out these millions or degrade American manhood and womanhood to match conditions on foreign soil?

You have bitterly fought any graphite tariff from the start, while American mines have been caving in and American mills rusting into disuse and decay. You have used the misfortunes, poverty, and degradation of foreign labor as a bludgeon to beat to his knees the American graphite miner, and now, as Congress evinces a disposition to give a fighting show, you rush into the mails to corral your customers in a general onslaught to block out such a possibility.

If the action you urge means anything, it means death to the American mines. To live they must abolish our child labor laws; they must refuse every comfort that distinguishes our free men from the serfs of poverty and degradation that dig your Ceylon graphite from holes in the ground by hand; they must teach their labor to live in hovels instead of homes, and to die a thousand deaths in the living of a single life. We must send our women and children and old men into the mines to work, unskilled, unclothed, unfed, and uneducated because underpaid. We must debase our labor to the level of the Far East, grind them in poverty, ignorance, hopelessness, and death that you may buy your raw material of a people of that sort and sell your protected crucibles to a people of our sort.

We write this to say that if you are engaged in a campaign of that kind you will have to go without us; if you think you can influence Congress to kill the graphite industry of America for your trade benefit, we, for one, do not believe you can succeed. If you should succeed, bear in mind that the records are being kept and that more potent than the saving of a few cents a number on crucibles is the wrath of an outraged and devastated industry that has as much right to life as has the making of crucibles.

Respectfully yours,

TALLADEGA FOUNDRY & MACHINE CO.,
By W. B. LADD.

Mr. NICHOLSON. There is a larger investment in graphite mines and mills in the United States than in factories making graphite products. If investments are to be considered, this fact is entitled to its proportionate consideration. A large part of the investment in graphite mines and mills was made at the urgent appeal of the Government during the war. Foreign graphite was meeting the demand when the world was at peace, but when war came the foreign supply was unequal to the demand and we were compelled, in large measure, to look to our own resources for these supplies. Fortunately, we had the graphite at home, and the war situation was fully met by our own mines and miners. Are we now, for the sake of a few foreign investments and a hitherto privileged class, to destroy this industry that did its full part in helping to win the war, or are we to protect this industry that protected us by the continued production of war essentials? While there are many industries in this country receiving the benefits of a protective tariff none is more deserving of consideration than the graphite mining industry.

If this amendment is agreed to—and I earnestly hope it may be—we will not only save this key industry and safeguard the Nation, but we will also have better and cheaper graphite products in this country without injury to any existing industry, and we will give employment to thousands of people in those States in which the graphite mines are located, which employment will build up prosperous communities, thereby creating additional home markets for the products of the farm.

Mr. TOWNSEND. Mr. President, I would like to speak to those Senators who are interested in the subject; but I feel that I can not do it. I do not feel, however, that I ought to let this opportunity pass without expressing my views on this subject.

I am a protectionist. I believe in adequate protection. I believe in encouraging American industry. I believe, however, that that principle involves generally the protection of such industries as ought to be encouraged in the United States, with the hope that eventually, under proper development, they can meet the demands of this country by being placed on equal terms with their foreign competitors.

I realize that at this time, however, we are legislating under most unusual and unnatural conditions. The industries of the country have been and are greatly disturbed. It is almost an impossiblity to determine the difference in the cost of production here and abroad, and therefore I have voted for some amendments because there was indicated to me the need of a duty to protect the American producer in this country, and especially American labor.

I am not departing from that principle when I oppose not only the amendment offered by the Senator from Colorado [Mr. NICHOLSON], but the amendment of the committee in the bill now before us. I not only believe it will encourage no legitimate industry but I also believe that the placing of a duty upon amorphous graphite will not promote any legitimate industry in our country. I believe, in fact, that it will add to the expense of amorphous graphite products, without any compensating good to any producer of graphite in the United States.

I propose to confine my remarks solely, or largely so, to the question of amorphous graphite. I have not gone into an investigation of the other varieties of graphite, and therefore shall not attempt to speak with any authority on those matters.

It is a fact, as stated by the Senator from Colorado, that graphite has been on the free list for at least 50 years. If the profits of this concern are as great as those named by the Senator from Colorado, I am at a loss to understand why more concerns have not entered this industry in the United States. If I have been correctly informed, amorphous graphite, such as is used in the manufacture of paints, brushes, blacking, and so forth, can not be obtained in the United States, the statements of the Senator from Colorado to the contrary notwithstanding. I believe that he has been misinformed.

Up in Saginaw, Mich., is located what is known as the United States Graphite Co. It has been in business for 30 years. It owns mines of graphite in Mexico. It has been operating those mines for many years, but it costs that company more under existing law to get its graphite from its mines in Mexico than it would to purchase the American product here at home. It costs over $16 per ton freight to ship it from Mexico to Saginaw. The company realizes that this is a very great rate. It has tried for years to obtain in this country a product suitable to its uses.

A few years ago the Saginaw company went out into Colorado and took an option on one of the best mines of that State. This option permitted it to purchase property for about 5 per cent of what its investment is in Mexico to-day. It could ship that product at about $9 per ton from the Colorado mines to Saginaw. It obviously would be a saving to this company if it could use American graphite. Under the contract it shipped hundreds of tons to Saginaw. It tested that graphite very thoroughly, because it evidently was for its financial interest to use the Colorado graphite if it could be used. As the Senator from Colorado says, it analyzes practically the same as the graphite from Mexico, only it is less rich in carbon or graphite than the Mexican product. But when the company attempted to use the material in the manufacture of its manufactures, it found that it did not fill the qualifications required for amorphous graphite and it could not use it. I repeat, sir, that the company obtained an option from the Colorado company for its mine and it desired to use that product in the interest of economy, but the product did not measure up to its necessary specifications and qualities.

Mr. NICHOLSON. Mr. President, will the Senator yield for an interruption?

Mr. TOWNSEND. I yield.

Mr. NICHOLSON. I have here a letter dated September 7, 1918, from the United States Graphite Co., of Saginaw, Mich., in which they make this statement:

We might, however, if you intend to operate the mines, place quite a considerable order for graphite ore, provided, of course, a satisfactory contract can be arranged between us.

That makes no complaint as to the material.

We would not be interested in the purchase of your graphite property at the price which has been named.

As to the quality, there is no objection raised in the letter and no indication that the graphite is of an inferior grade or character.

Mr. TOWNSEND. I am repeating the facts as they exist. They did get an option on the mine. They did ship more than a hundred tons from the mine to Saginaw. The product was not fitted for their uses. This concern manufactures high-grade products. It has established a market all over the world because of the character and quality of its products. It shipped from Saginaw even over to Japan large quantities of amorphous graphite. Japan could probably obtain their amorphous graphite more cheaply from Austria and other countries, but they find it is better for them to purchase the Saginaw amorphous graphite as manufactured there because of the character and quality of the material in the pencils and the other articles which they manufacture out of graphite.

So, if I believed what the Senator from Colorado says, that this is a proposition to compete with the cheap labor of India or of Mexico, I could agree with him in feeling that we at least ought to have the amendment offered by the committee. But I can not agree with him, because from all the investigations that I have made of the matter I know it is more expensive to the Saginaw concern to own, mine, and ship its own products from Mexico than it would be to purchase the product in the United States if it could be obtained here, and the proposed amendments by the committee will not aid a single manufacturer, a single laborer, or a single consumer in the United States.

Mr. NICHOLSON. Will the Senator permit me to interrupt him again?

Mr. TOWNSEND. Yes.

Mr. NICHOLSON. In order to acquaint the Senator with some further facts in connection with the shipment from Colorado, I will say that there were 27 cars shipped, as stated in the wire of March 22. Twenty-seven cars at 40 tons to the car would exceed 1,000 tons. When the 27 carloads had been used they were still willing, if they could make a satisfactory contract, to continue the use of the Colorado product; but of course it naturally followed that the product which was mined in Mexico could be obtained more cheaply than the Colorado product. There is nothing here to show that the Colorado ore is of an inferior grade in any way. There were over 1,000 tons shipped to their factory, and at the completion of the use of the thousand tons of course they were looking, as it appears to me, for a cheaper contract, and they obtained it in Mexico.

Mr. TOWNSEND. Does the Senator have anything of record that indicates they were satisfied with the Colorado product?

Mr. NICHOLSON. Yes. I read it again:

We might, however, if you intend to operate the mines, place quite a considerable order for graphite ore, provided, of course, a satisfactory contract can be arranged between us.

They were still willing to continue to use the Colorado product.

Mr. TOWNSEND. There are certain products which can be made from American graphite, and which are being made from it. The higher qualities of graphite, however, needed for the products I have mentioned can not be obtained from American amorphous graphite. If they can be obtained in the United States, then the facts have been misrepresented to me. I have confidence in what has been told me and therefore I am arguing the case.

As I stated, the United States Graphite Co., at Saginaw, uses about 65 per cent of the amorphous graphite that is shipped into the United States. If we impose a tax of 1 cent a pound, of course, which to me is unthinkable, I must admit that the cost of these products will either be increased to the public or they will be made of an inferior character or quality. There is no other way to meet it. If we put a 10 per cent duty, as proposed by the committee, I do not think it will materially interfere with the business of the concern. I think it will add some expense, but that would be simply a revenue duty, and that alone, and it would take from this company about $15,000 a year, which lost $70,000 on its business last year.

If we are going to place the tax on a revenue basis, perhaps this is the proper place to put it. If we are going to impose a tax upon one concern which will pay from 65 to 80 per cent of the entire tax, then place it here. But in doing that we will have departed from the policy which I have always advocated and in which the party has believed, namely, that we favor duties for protection with incidental revenue. I think it would be unjust to this concern to impose a tax which will be of no benefit—I insist that it would be of no benefit—to any man, woman, or child in the United States. There is no benefit that can come from it, as it seems to me, and so I have felt, in perfect consistency with my advocacy of a protective tariff, that this article, amorphous graphite, ought to be on the free list, where it has been for 50 years.

The imposition of a duty on amorphous graphite would be of no benefit to anybody in the world unless to a number of brokers in the country who have been exploiting the amorphous deposits all over the United States.

They have been exploiting these mines. They are naturally anxious to have them made important for speculative purposes. I am not interested in that. All I am interested in is in conserving and serving the best interests of the American people and all of them. I am for the protection of American industries because I think that means the good of all the people. I am opposed to a tariff for revenue only. In that respect I differ from Senators on the other side of the aisle. So, believing and knowing that this is purely a revenue item which always enhances the price to the consumer, where there is no legitimate competition, of course, if we add a duty we increase the price. In a protective tariff we create competition and thereby tend to lower the price, as has been the history of tariff legislation from the beginning.

So, Mr. President, without desiring to injure any legitimate industry in the country and protesting that the proposition which I submit is one which would not injure any legitimate industry, I am strongly opposed to the amendment offered by the Senator from Colorado, and I shall vote for the amendment which I have presented, namely, to strike out "amorphous, 10 per cent ad valorem." I do not care to discuss the other branch of graphite because, as I said, I know very little about it.

Mr. NICHOLSON. May I ask the Senator from Michigan another question?

Mr. TOWNSEND. Certainly.

Mr. NICHOLSON. Does the Senator contend that there is not sufficient amorphous graphite in the United States to meet the needs and the demands of the graphite manufacturers?

Mr. TOWNSEND. I do.

Mr. NICHOLSON. Is that the Senator's position?

Mr. TOWNSEND. It is. I contend that there is not the quality of amorphous graphite in the United States which meets the demand for production of certain material or certain goods which are made in the United States. There is no question about there being a vast amount of graphite in the United States, and if these people are as hard up as they say they are, and it can be produced more cheaply than graphite can be shipped into this country from abroad, then why is it not being used now? Why do we need protection to get this cheaper product, this equally good product as they say it is, into our American manufactures?

Mr. FRELINGHUYSEN obtained the floor.

Mr. NICHOLSON. Mr. President, will the Senator yield to me for another brief statement?

Mr. FRELINGHUYSEN. I yield to the Senator from Colorado.

Mr. NICHOLSON. I wish to call the attention of the Senator from Michigan to the report by the United States Tariff Commission for the use of the Senate Committee on Finance concerning the question of graphite:

The United States has heretofore not been considered independent in the matter of crucible graphite. Crucible makers, who use about 15,000 tons a year, have insisted on having Ceylon graphite. Montana produces a graphite that has been accepted by crucible manufacturers as equal to Ceylon material. The quantity ultimately available has not been proved, but may be sufficient to satisfy domestic demands for many years. It would appear that crucibles properly made from Alabama flake will give as good service as those made from the Ceylon material.

That is from the Tariff Commission.

Mr. TOWNSEND. As I said a moment ago, I am not discussing the crucible situation. But this is a fact which the Senate ought not to forget: During the years from 1913 up until this year, inclusive, there have been shipped into the United States from abroad only about 66,000 tons of graphite.

Mr. NICHOLSON. Just a moment, if the Senator from New Jersey will yield to me to reply to the statement made by the Senator from Michigan——

Mr. FRELINGHUYSEN. I yield.

Mr. NICHOLSON. The imports in the year 1916 into the United States were 42,930 tons. In 1917 imports were 42,577 tons, and the foreign product was produced by the very cheapest labor in the world.

Mr. TOWNSEND. I am speaking about amorphous graphite, Mr. President.

Mr. HEFLIN. Will the Senator from Colorado yield before he takes his seat?

Mr. FRELINGHUYSEN. I believe I have the floor. I yielded to the Senator from Colorado, and I now yield to the Senator from Alabama.

Mr. HEFLIN. I beg the Senator's pardon. I did not know he had obtained the floor. However, I wish to ask the Senator from Colorado a question. In 1917 and 1918 the imports of this commodity fell off considerably, did they not?

Mr. NICHOLSON. Yes, sir.

Mr. HEFLIN. What was the reason for that?

Mr. NICHOLSON. I take it that the situation in Mexico was the principal reason.

Mr. HEFLIN. In 1919 and 1920 did as much of the foreign product come in as in the two or three years prior to that time?

Mr. NICHOLSON. Does the Senator refer to imports in 1916?

Mr. HEFLIN. I refer to imports.

Mr. NICHOLSON. The imports were larger in 1916 and 1917.

Mr. HEFLIN. Then they fell off in 1918 and in 1919?

Mr. NICHOLSON. In 1918 and 1919 they fell off, and also in 1920.

Mr. HEFLIN. What was the reason for that?

Mr. NICHOLSON. I suppose there was a decline in the trade of the country to some extent, which may have accounted for it.

Mr. BURSUM. I suggest that, perhaps, the disturbed condition in Mexico might have had a great deal to do with the amount of exports from that country. While the rebellion and revolution were on down there probably there would not be a great quantity of exports.

Mr. HEFLIN. At that same time our Government was encouraging the industry here at home, was it not?

Mr. NICHOLSON. Yes, sir; the Government was encouraging the industry at home.

Mr. HEFLIN. Now, have the imports become so large that the home industry has shut down?

Mr. NICHOLSON. I do not know that the imports have become so large, but the foreigners are able to ship their materials so cheaply to our shores that the American miner can not compete with the foreign labor.

Mr. HEFLIN. Then the imports that have come in are so cheap that they have caused the American industry to close down?

Mr. NICHOLSON. Yes, sir; absolutely. There are but few graphite mines in America to-day in operation.

Mr. SMOOT. I will say to the Senator from Alabama——

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Utah?

Mr. FRELINGHUYSEN. I yield.

Mr. SMOOT. During the years 1920 and 1921 most of the mines in the United States were closed. At the same time not many crucibles were manufactured, because there was not the ordinary demand for them. The graphite is used very largely for the manufacture of crucibles, from 45 to 50 per cent of the graphite produced, not only in the United States but in the world, being used for that purpose. For instance, in the State of Utah we had few mines operating; nearly every one was closed. The great copper mines were closed down and most of the lead mines were closed down; only a very few of them were operating. During that time there was not the demand for crucibles, and there being no demand for crucibles there was not such a demand for the graphite.

Mr. HEFLIN. The Senator believes now that there should be some tariff tax rate placed on imports of graphite?

Mr. SMOOT. I do not want to take the time to discuss that question while the Senator from New Jersey [Mr. FRELINGHUYSEN] has the floor.

Mr. FRELINGHUYSEN. Mr. President, I, of course, oppose the rates of duty proposed by the Senator from Colorado [Mr. NICHOLSON] in his amendment to the committee amendment. The rates proposed by the Senator from Colorado may be fully justified by present conditions, but the committee, in making these rates, recognized that the world's markets were abnormal. Foreign graphite is cheaper than ever in the history of the industry, whereas American costs, when mines were last operated, were fully 10 cents per pound.

Mr. NICHOLSON. That was the war cost, was it not?

Mr. FRELINGHUYSEN. Undoubtedly that was the war cost.

The committee felt that the American cost would eventually be reduced to less than 6 cents per pound. It also believed, and still believes, that the normal price for Madagascar graphite, which now is sold for 3 cents or less per pound in New York, which is an abnormally low price, will come back to 4 cents or thereabouts.

There are three qualities of graphite. There is the amorphous, which is imported principally from Mexico, although I understand there are deposits of amorphous graphite also in Colorado and Alabama and to some extent in Montana. There is the lump graphite, all of it imported by one company, which comes from Ceylon, and is produced by the cheap labor mentioned in the highly characteristic outburst from Mr. Ladd, of the Talladega Foundry & Machine Co., of Alabama. Then there is the Madagascar flake, which comes very directly in competition with the American product from the mines that are located in the State of Alabama.

The committee was confronted with this situation: Under the Payne-Aldrich law and the Underwood-Simmons law all classes of graphite were free. The Fordney bill places a duty of 10 per cent ad valorem on amorphous graphite, 10 per cent on the crystalline lump, and 10 per cent on the flake.

People from Alabama came before the committee and asked that a duty of 5 cents per pound be placed upon flake graphite, which is produced in Alabama. The committee considered the cost of the imported article, now 4 cents a pound, and figured that 2 cents a pound was ample duty. The Madagascar flake is selling to-day in New York at 4 cents a pound. The committee put a duty of 2 cents a pound on the crystalline flake to protect the industry in Alabama.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from New Jersey yield to the Senator from Kentucky?

Mr. FRELINGHUYSEN. I yield.

Mr. STANLEY. Is it not a fact that the graphite produced in Ceylon is produced by naked Polynesians?

Mr. FRELINGHUYSEN. Yes; that is true, Mr. President.

Mr. STANLEY. By slaves?

Mr. FRELINGHUYSEN. I refuse to yield further for an interruption of that kind.

Mr. STANLEY. One moment. I should like to have the Senator state just what wages they receive. Graphite, as I understand, is produced in the United States by cultured American citizens, and I am grieved beyond measure to hear the great defender of American labor from New Jersey pleading in behalf of a powerful corporation, one of the richest in the world, the Steel Trust and other trusts, in an endeavor to take the bread and meat and milk from the mouths of American labor and give the work to Polynesian slaves who toil for about 3 cents a day. Oh, I can not stand it, Mr. President; I must leave; I am overcome with horror and grief. [Laughter.]

Mr. FRELINGHUYSEN. Mr. President, the crystalline flake graphite which comes from Madagascar, as I have said, is sold at 4 cents a pound. The committee placed a duty upon it of 2 cents a pound, which is equivalent to 50 per cent ad valorem. Now, the Senator from Colorado asks that a duty of 5 cents a pound be imposed upon that type of graphite, which is selling for 4 cents.

The representative of one of the manufacturing industries—and it was the one in Michigan—which uses amorphous graphite said to me that they could buy the Colorado graphite at $10 per ton, with a freight to Michigan of $9 per ton added, and yet they had to use Mexican grahphite and pay $17 freight rate from Mexico because the physical qualities of the Colorado graphite were not satisfactory for use in connection with their product.

Mr. President, the Senator from Kentucky in his outburst——

Mr. BURSUM. Mr. President, will the Senator yield for a moment?

Mr. FRELINGHUYSEN. I yield to the Senator from New Mexico.

Mr. BURSUM. What was the character of the Colorado graphite? Was it in the ore or was it concentrated?

Mr. FRELINGHUYSEN. I presume it was concentrated.

Mr. BURSUM. Why was the Mexican graphite worth more?

Mr. FRELINGHUYSEN. The Mexican product was worth more because its physical qualities rendered it suitable for manufacturing the products of the Michigan concern while the Colorado graphite was not. It was of such low physical qualities that the Michigan manufacturer could not use it.

Mr. BURSUM. Was it not because there was a higher percentage of graphite in the ore?

Mr. FRELINGHUYSEN. No.

Mr. BURSUM. That does not correspond with the statement made by the Senator from Colorado and the analogy which has been made between the American and the foreign product.

Mr. FRELINGHUYSEN. Mr. President, there is a great deal that does not correspond with the statements of the Senator from Colorado.

Mr. NICHOLSON. Mr. President, will the Senator from New Jersey yield for a moment?

Mr. FRELINGHUYSEN. Yes.

Mr. NICHOLSON. I take it from the statement made by the senior Senator from New Jersey that he claims that the American graphite is inferior and can not be used by the crucible makers. Is that his contention?

Mr. FRELINGHUYSEN. No. Some of the domestic product is used after being mixed with the amorphous and the crystalline lump.

Mr. NICHOLSON. Now, I should like to read for the information of the senior Senator from New Jersey an advertisement which I find in the Mining and Scientific Press, which reads as follows:

Bartley crucibles should be made your standard. First, because they are made of American materials.

Mr. FRELINGHUYSEN. Mr. President, I will read a communication from Jonathan Bartley, president of the Bartley Crucible Co., dated March 25, 1922. He was sent certain questions by the American Mining Congress regarding graphite. To the gentlemen who sent the letter he replied as follows:

When I first read your letter it was in my mind to positively refuse your request, on the ground that "it was no quarrel of mine," because, so far as I am concerned, it does not make any difference whatsoever how high a tariff might be put on. But after giving the matter more careful consideration, and having before me the memory of more than 33 years' association with graphite interests, I have changed my mind, and here is what I have to say about these "graphite facts," as this paper calls them:

By actual count there are 19 reasons given in this propaganda to be presented to the Senate Finance Committee to show them why this tariff should be placed on graphite, but there are only 5 that really state any specific reasons, and the statements contained in these 5 are so palpably false and misleading that I shall confine myself to them only, the other 14 being mere "bunk" and unworthy of notice.

Paragraph 4 reads, "That the American deposits of graphite are adequate, both in quantity and quality, to supply any domestic consumption," and inasmuch as paragraph 6 reflects the same statement, I will quote it and answer both at the same time. Paragraph 6 reads, "That recent experiments establish the superiority of American graphite over all foreign graphite for crucibles."

To the uninitiated, who have never experienced the trials and tribulations of the graphite crucible maker, statements of this kind might carry a certain force on account of their boldness, but with one who carries the scars of many hard-fought battles in the crucible field they stand out as utterly absurd and ridiculous. Furthermore, the person who wrote these paragraphs must have known when he wrote them that he was misrepresenting open facts that only require observation and a small amount of ordinary reasoning to understand.

Mr. NICHOLSON. Mr. President, will the Senator permit a question?

Mr. FRELINGHUYSEN. No; I am quoting from the letter.

Mr. NICHOLSON. I want to quote from the same gentleman the Senator is quoting from.

Mr. FRELINGHUYSEN. All right; the Senator can do so after I have finished reading this letter and one other.

There are 13 operating crucible plants in the United States to-day, and some of them have been in operation nearly 100 years. Every one of these 13 plants has experimented largely to produce a serviceable crucible from domestic graphite. Thousands of dollars have been spent in this direction without satisfactory results, and they are all using Ceylon graphite to-day, notwithstanding the fact that they can buy the domestic product at a lower price. I want to ask you this simple question: Would you consider a man sane to go 10,000 miles away and pay 50 per cent more for a raw product if he could buy an equally good product at his door?

I shall not read all of the letter, but it is signed by Jonathan Bartley.

Mr. President, I do not want any controversy with the Senator from Colorado. He is trying to protect the product of his mines in Colorado.

Mr. NICHOLSON. No; the mines of the citizens of Colorado.

Mr. FRELINGHUYSEN. I understand; in representing the State the Senator represents it in a possessive way. Everyone does, and it is perfectly justified. The question is as to the percentage of duty. We have given practically 10 per cent, which is more or less a revenue duty, because these foundry men will not use the domestic product. They will use the flake graphite and mix it with the imported product for crucible making and for other purposes.

The Senator from Kentucky spoke of this great trust, the United States Steel Corporation, the Crucible Steel Corporation. I do not think they manufacture or use graphite. They use the crucibles, but there is no trust. There are probably 30 or 40 concerns in this country using this product; and I have here numerous letters from manufacturers protesting against this rate, or an extension of it, as too high. I am going to put them in the RECORD, but I want to read to the Senator from Colorado just one letter, which I think clearly and without prejudice expresses the opinion of the manufacturers in regard to a high, excessive duty on this product. This is from J. H. Gautier & Co., manufacturers of black-lead crucibles, Jersey City, N. J., dated April 4. They say:

We recognize the difficult position in which the committee has been placed in endeavoring to meet the conflicting views of opposing industries, and especially the desire to advance certain protective efforts without penalizing established industries.

The claim that the graphite-crucible industry is selfish in its opposition to a duty applied on graphite is not based on facts. The necessity at one time during the stress of the World War required us to use domestic graphite to an extent which was impractical, and the work performed by the Bureau of Mines in an effort to determine the value of the domestic graphite for crucible purposes has not been carried far enough to demonstrate conclusively the value of domestic flake for crucible purposes. We had been using domestic graphite to the limit of its value for 20 years and never had been able to produce a crucible of competitive value with a larger proportion of domestic product. It is ridiculous to assume that we would prefer to go around the world for a product if it could be found at our own door.

Another argument introduced by the domestic producers which would carry a lot of weight if not understood—that is, the fact that one manufacturing company is using 100 per cent of domestic graphite in their crucibles. It would be interesting to know what percentage of graphite they do use. Our crucibles contain practically 50 per cent of graphite, but the crucible referred to above we understand is manufactured principally of silicon carbide, an article that is either produced in this country or imported from Canada free. Would we not be warranted in assuming that it would be of advantage to them to have our material taxed if it widened the difference between production costs of our crucibles?

We hesitate to bring more fallacies to your attention, but if you wish we can truthfully refute many of the statements which have been introduced to influence the Senate Finance Committee in reaching a decision favorable to a high tariff on graphite.

For revenue purposes a tax may be required, but to provide protection to the domestic producers would not necessitate the assessment of high rates which would increase the cost of the material that is required for crucibles, and so jeopardize the existence of the already established crucible industry, employing more labor and capital than can ever be expected to be employed in the production of graphite in the United States.

It is not our intention to prolong the discussion, and if the Senate Finance Committee concludes to apply the rates of 10 per cent on amorphous, 20 per cent on lump, chip, and dust, and 2 cents a pound on crystalline flake, these duties will be carried into the cost of the crucible and absorbed by the public generally; but it can never force a manufacturer to employ an ingredient in his manufacture that will be a detriment to quality production.

Please keep in mind that we ourselves could only use a limited quantity of domestic product at any cost, and whatever duty is fixed on flake will equally affect all other grades in costs to us. We candidly think a duty will rather help toward an elimination of the use of crucibles and a consequent reduction in demand for flake graphite. Why penalize the other industries using graphite for all kinds of purposes to enable a few producers of flake to get a higher price on a small part of their product from a small number of possible users?

I want the Senator to listen to this:

The domestic producers prior to 1914 made profits on 5-cent and 6-cent graphite, notwithstanding the statements now made that it costs 10 cents a pound to produce, and some of the present producers seem to be able to offer graphite at 4 cents and 5 cents, and we inclose a circular letter with one paragraph marked, to illustrate what we are trying to explain.

We want to be perfectly fair in every way and take a broad view of the situation, but it is difficult to let things like this be put over without giving you the data that will help you in solving problems like the graphite one.

I ask that these letters—not from any trust, certainly not from the Steel Trust, but from reputable concerns, small manufacturing concerns using graphite—be printed in the RECORD.

The VICE PRESIDENT. Is there objection?

Mr. PHIPPS. Mr. President, will the Senator yield for just one moment?

Mr. FRELINGHUYSEN. I yield.

Mr. PHIPPS. Before the letters go into the RECORD I will ask the Senator if he will kindly turn to the circular letter referred to in the one he just read and read us the paragraph that is marked.

Mr. FRELINGHUYSEN. I do not find that. I will look for it in my files.

Mr. PHIPPS. I want to know what they were advertising that they would sell the material for.

Mr. FRELINGHUYSEN. I will supply that.

The VICE PRESIDENT. Without objection, the letters referred to will be printed in the RECORD.

The letters are as follows:

CARTERET, N. J., *April 1, 1922.*

Hon. JOSEPH L. FRELINGHUYSEN,
United States Senator from New Jersey, Washington, D. C.

MY DEAR SENATOR: I am writing you in the hopes that you will have the manufacturing consumers in mind when the tariff question on Ceylon graphite comes up in the Senate.

While favoring home products in all its branches, we feel the American graphite interests are going too far in insisting on a 20 per cent duty on Ceylon graphites, this in view of the fact that the Ceylon

product is indispensable for use in the manufacture of foundry facings and crucibles, of which we, among others, are very large consumers.

We thoroughly believe that this product should enter free, but if there must be a tariff it should not exceed 10 per cent ad valorem.

An excessive tariff on Ceylon will increase the costs of brass and iron making, which costs will naturally be passed to the consumer at a time when we are trying to reduce costs and get to a pre-war basis as early as possible.

We respectfully solicit your cooperation.

Yours very truly,

WHEELER CONDENSER & ENGINEERING CO.,
F. J. SCHAFFER, *Purchasing Agent.*

JERSEY CITY, N. J., *April 4, 1922.*

Hon. JOSEPH S. FRELINGHUYSEN,
United States Senate, Senate Office Building, Washington, D. C.

DEAR SENATOR: Permit us to thank you very much for your courteous attention of the 2d in regard to the proposition to tax graphite.

We recognize the difficult position in which the committee has been placed in endeavoring to meet the conflicting views of opposing industries, and especially the desire to advance certain productive efforts without penalizing established industries.

The claim that the graphite crucible industry is selfish in its opposition to a duty applied on graphite is not based on facts. The necessity at one time during the stress of the World War required us to use domestic graphite to an extent which was impractical, and the work performed by the Bureau of Mines in an effort to determine the value of domestic graphite for crucible purposes has not been carried far enough to demonstrate conclusively the value of domestic flake for crucible purposes. We had been using domestic graphite to the limit of its value for 20 years, and never had been able to produce a crucible of competitive value with a larger proportion of domestic product. It is ridiculous to assume that we would prefer to go around the world for a product if it could be found at our own door.

Another argument introduced by the domestic producers which would carry a lot of weight if not understood—that is, the fact that one manufacturing company is using 100 per cent of domestic graphite in their crucibles. It would be interesting to know what percentage of graphite they do use. Our crucibles contain practically 50 per cent of graphite, but the crucible referred to above, we understand, is manufactured principally of silicon carbide, an article that is either produced in this country or imported from Canada free. Would we not be warranted in assuming that it would be of advantage to them to have our material taxed if it widened the difference between production costs of our crucibles?

We hesitate to bring more fallacies to your attention, but if you wish we can truthfully refute many of the statements which have been introduced to influence the Senate Finance Committee in reaching a decision favorable to a high tariff on graphite.

For revenue purposes a tax may be required, but to provide protection to the domestic producers would not necessitate the assessment of high rates which would increase the cost of the material that is required for crucibles, and so jeopardize the existence of the already established crucible industry, employing more labor and capital than can ever be expected to be employed in the production of graphite in the United States.

It is not our intention to prolong the discussion, and if the Senate Finance Committee conclude to apply the rates of 10 per cent on amorphous, 20 per cent on lump, chip, and dust, and 2 cents a pound on crystalline flake, these duties will be carried into the cost of the crucible and absorbed by the public generally, but it can never force a manufacturer to employ an ingredient in his manufacture that will be a detriment to quality production.

Please keep in mind that we ourselves could only use a limited quantity of domestic product at any cost, and whatever duty is fixed on flake will equally affect all other grades in costs to us. We candidly think a duty will rather help toward an elimination of the use of crucibles and a consequent reduction in demand for flake graphite. Why penalize the other industries using graphite for all kinds of purposes to enable a few producers of flake to get a higher price on a small part of their product from a small number of possible users?

The domestic producers prior to 1914 made profits on 5-cent and 6-cent graphite, notwithstanding the statements now made that it costs 10 cents a pound to produce, and some of the present producers seem to be able to offer graphite at 4 and 5 cents, and we inclose a circular letter with one paragraph marked, to illustrate what we are trying to explain.

We want to be perfectly fair in every way and take a broad view of the situation, but it is difficult to let things like this be put over without giving you the data that will help you in solving problems like the graphite one.

Yours very sincerely,

J. H. GAUTIER & CO.,
A. E. ACHESON,
Secretary and General Manager.

(Inclosure attached.)

BOSTON, MASS., *March 31, 1922.*

J. H. GAUTIER & CO.,
1 Greene Street, Jersey City, N. J.

DEAR SIR: If your firm is one of those which believes with us that the road to better business lies through the channels of economy, efficiency, and cooperation you will be interested in this letter and in the sample of graphite which is being mailed you under separate cover.

Economy because we are in a position to undersell any other producer in the market. Our mine is so located that we can sell our product at a profit for less than the cost of production at the average mine in the United States.

Efficiency because we will be glad to allow you as a saving in price what we would have to pay a crew of salesmen to do what we are trying to accomplish by this letter. This is the first time our product has been offered directly to the trade, and we want you to share with us what we are able to save.

Cooperation: If you will cooperate with us to the extent of examining our sample and sending us the following information, we believe it will be to our mutual advantage.

This is a fair average sample of our pulverized air floated graphite, unscreened. We can supply it in any grade, screened, if necessary, to any mesh desired. Or if you have facilities to do your own pulverizing, we can supply you in crude form as it comes from the mine at a slightly lower price.

Kindly advise us of your requirements covering the above points, also chemical composition, indicating the quantities in which you would be likely to buy, and we will be glad to quote you prices. When you receive our quotations possibly you will find it to your advantage to make a liberal use of our product in your formulas where formerly you may have used graphite more sparingly on account of either high price or inferior quality. We would be pleased to receive for comparison samples of the graphite you are now using.

Let us hear from you, and advise us if you wish a larger trial sample or if we can be of further service in any way.

Yours for cooperation and prosperity,

NATIONAL GRAPHITE CO.,
By DAVID ELDER, *Treasurer.*

NEWARK, N. J., *April 5, 1922.*

Hon. JOSEPH FRELINGHUYSEN,
Senate Chamber, Washington, D. C.

DEAR SIR: We desire to register our protest against the clause now in the bill before the Senate Finance Committee making a duty of 20 per cent ad valorem on Ceylon graphite. It has been our experience during the past 48 years that there is no American product equal to Ceylon graphite and are consequently opposed to passing this high duty of 20 per cent upon the imported product.

In our work the Ceylon product is indispensable, and the raising of the tariff rate would not result in our business being transferred to American graphite.

We trust that this matter will receive your serious attention.

Yours very truly,

FLOCKHART FOUNDRY CO.,
By ROBERT E. MOORE, *Vice President and Treasurer.*

STERLING, ILL., *April 6, 1922.*

Senator JOSEPH S. FRELINGHUYSEN,
Senate Chamber, Washington, D. C.

SIR: The question of contracting for Ceylon graphite came up recently, and we have to defer such proceedings pending the action of the United States Senate on what is known as the H. R. 11815 bill, disposed of by the House on a basis of a 10 per cent tariff.

The Senate bill being prepared, we understand, has doubled this tax.

A good many of the people are wondering what Congress is trying to do. We have the income tax to pay, then a surtax, and now a tariff tax. The people at large are in a quandary to know whether our representatives in Congress are representing the people or some other interests, or whether they are trying to perpetuate themselves in office, or whether our whole foundation of government as administered in Washington is only a political basis rather than a business basis. The people are beginning to think the Government is giving no thought to business conditions and that it is all political activity.

We are told that some of the Senators and Congressmen are deeply interested in American graphite mines, and that it is for a personal interest that they are promoting the extreme penalty of tariff on Ceylon lead, a commodity that can not be produced in America.

Why tax such commodities? It simply means passing the burden on to the consumer. Congress is burdening the consumer to death. There is no incentive for business men to invest capital in business as long as our Government in Washington is being handled on a political basis without any consideration of business conditions.

The people expected something from this Congress, but I am fearful that a large number of Senators and Congressmen will be defeated, as the people are losing patience and confidence in their present representatives, and if it is possible to get business men in Congress, the people are going to let the politicians stay at home.

What is the sense or reason for taxing a commodity that can not be produced in this country and should come in free for the benefit of American people?

Will you please answer this question?

Respectfully yours,

BLACK SILK STOVE POLISH WORKS,
L. K. WYNN, *President.*

JERSEY CITY, N. J., *April 29, 1922.*

Hon. JOSEPH FRELINGHUYSEN,
Washington, D. C.

DEAR SIR: As our business is largely dependent on our being able to obtain supplies at reasonable prices, we feel compelled to appeal to you regarding the tariff as applied to graphite or plumbago. After several hearings and much consideration, Senate bill reported April 10, 1922, calls for the following rates:

Graphite, amorphous, 10 per cent ad valorem; graphite, lump, chip, and dust, 20 per cent ad valorem (Ceylon); graphite flake, 2 cents per pound (Madagascar).

The above suggested increase in the cost of graphite would entail somewhat of a hardship on our business, but since the above bill was reported an amendment has been offered by Senator NICHOLSON, of Colorado, changing the original bill to read as follows:

Graphite, amorphous, from 10 per cent to 1 cent per pound; graphite, lump, chip, and dust, from 20 per cent ad valorem to 3 cents per pound (Ceylon); graphite, flake, from 2 cents per pound to 5 cents per pound (Madagascar).

Duties proposed by this amendment add from 100 per cent to 200 per cent to the present import selling price of these grades. Crucibles are now selling at less than half what they were during the war period.

Notwithstanding reports to the contrary, the average American graphite can not be substituted for the more granular Ceylon crystalline graphite, and if this large duty is levied the crucible user will be legislated against in two ways: First, by having to pay more for his crucibles; second, he will get crucibles of an inferior quality.

We understand that this duty is laid with the idea of favoring the southern graphite promoter. At the same time it must be borne in mind that it will operate directly against the user of the graphite crucible and against the manufacturer of that article.

When we consider the rapid development of the electric melting furnace it is perfectly evident that in the face of increase in the cost of crucibles and a decrease in the quality it will very seriously operate against the crucible industry, and therefore against the large use of graphite.

If the price of crucibles is made prohibitive, naturally the graphite industry will be eliminated.

We most earnestly protest the high duty called for by the Nicholson amendment to the Senate bill and trust you will use your influence in every way possible against its passage.

Graphite, you will kindly note, has been on the free list upward of 50 years, and if you now feel a duty should be placed on same for revenue, please do so with a view of saving the crucible industry, where at least 75 per cent of the crystalline graphite produced in the world is now used.

It is our opinion that graphite should be continued on the free list and there has been no good reason why it should be placed on the dutiable list; we therefore hope you will use your vote and influence to continue graphite on the free list.

Very truly yours,

E. A. WILLIAMS & SON (INC.),
THOMAS H. WILLIAMS, *President.*

—

NEWARK, N. J., *May 1, 1922.*

PRESIDENT OF THE SENATE,
Washington, D. C.

DEAR SIR: As our business is largely dependent on our being able to obtain supplies at reasonable prices, we feel compelled to appeal to you regarding the tariff as applied to graphite, or plumbago. After several hearings and much consideration, Senate bill reported April 10 calls for the following rates:

Graphite, amorphous, 10 per cent ad valorem.
Graphite: Lump, chip, and dust, 20 per cent ad valorem (Ceylon).
Graphite flake, 2 cents per pound (Madagascar).

The above suggested increase in the cost of graphite would entail somewhat of a hardship on our business, but since the above bill was reported an amendment to said bill has been offered by Senator NICHOLSON, of Colorado, changing the bill, original, as follows:

Graphite, amorphous, from 10 per cent ad valorem to 1 cent a pound.
Graphite: Lump, chip, and dust, from 20 per cent ad valorem to 3 cents a pound.
Graphite flake, from 2 to 5 cents a pound.

It is our opinion that graphite should be continued on the free list, and there has been no good reason advanced why it should be placed on the dutiable list, and we therefore hope you will use your vote and influence to continue graphite on the free list.

Yours truly,

F. & H. FOUNDRY CO. (INC.).
C. FRANZ.

—

THE PLUMBAGO CRUCIBLE ASSOCIATION,
New York, May 1, 1922.

Hon. JOSEPH S. FRELINGHUYSEN,
United States Senator, Washington, D. C.

DEAR MR. SENATOR: Your support is earnestly solicited in the effort of the graphite crucible manufacturers of the United States to protect themselves against the series of rates on graphite—or plumbago, as it is generally called—proposed in an amendment to the pending tariff bill by Senator NICHOLSON, of Colorado.

In the House bill a duty of 10 per cent ad valorem had been assessed against graphite of all kinds, with which we were content, realizing the need for more revenue, although for 50 years Congress has recognized our necessity to purchase abroad and has permitted graphite to remain on the free list.

The European war required measures and activities that were uneconomic and that would be ineffectual in peace times. Certain interests, chiefly located in the South, now desire to capitalize those necessities and are claiming that high tariff rates must be put into effect to protect an infant industry—the American graphite producer.

This infant industry has been in existence for about 60 years, and in pre-war times was able to market so much of its product as could be used for crucible purposes.

Unfortunately, it has always been and still is necessary to supplement this domestic product with imported graphite of a grade that will enable the crucible manufacturers to make a high-grade and satisfactory crucible.

There are 13 manufacturers of crucibles using graphite as the principal ingredient of their product. Not one of them has been able to use a large percentage of domestic graphite and produce a crucible competitively satisfactory in quality.

If we can not produce crucibles that will provide a melting cost within reasonable limits imported crucibles will be used.

Moreover, should crucible costs be too high other methods of melting will be developed and extended, to the entire elimination of the crucible industry and the consequent reduction in graphite consumption, both domestic and foreign.

Would the Government not be better off to establish a low tariff rate on a large import rather than a high rate on a reduced and vanishing import?

Notwithstanding assertions continuously reiterated, this is the situation existing to-day. If economic conditions require that we submit to extinction, we can submit, but we do not wish to be forced out of business without a vigorous protest.

Should not the graphite industry in this country be permitted to build itself up on its own merits, instead of by means of a subsidy? Is it fair to lay a compulsory tax on every user of a graphite product to induce consumption of American graphite, which is unfitted by character and quality for all the mechanical purposes in which graphite is now used?

We hesitate to arouse the crucible-consuming public to the seriousness of the situation and flood the mails with their protests, neither do we deem this to be necessary to convince one of your broad knowledge of the urgency of this request for your support and protection, not only for ourselves but also for those users of our products who are actually interested in maintaining our manufacturing prestige.

This defensive struggle has been carried on for almost four years. It is a matter of record in the tariff hearings, and we will be glad to furnish you with additional data or answer any questions you may care to ask.

Yours truly,

C. H. ROHRBACH, *Secretary.*

—

JERSEY CITY, N. J., *May 3, 1922.*

Hon. JOSEPH S. FRELINGHUYSEN,
United States Senate, Washington, D. C.

DEAR SIR: Without desire to interfere in the matter of proper duties to be levied on manufactured goods, we do believe, and we know our contemporaries agree, that where raw materials not available in this country are concerned, they should come in free in so far as that is possible.

Our attention has been called to paragraph 213 of the Senate tariff bill duty on graphite: Amorphous, 10 per cent ad valorem; lump, chip, and dust, 20 per cent ad valorem; flake, 2 cents per pound.

These, we understand, are not produced in the United States or can they be. Why, therefore, add to the consumer's burden by this unnecessary tariff?

We ask that you vote against it.

Yours very truly,

VOORHEES RUBBER MANUFACTURING CO.,
G. F. COVELL, *Sales Manager.*

—

NEWARK, N. J., *May 4, 1922.*

Hon. JOS. S. FRELINGHUYSEN,
United States Senate, Washington, D. C.

DEAR MR. FRELINGHUYSEN: We wish to direct your attention to paragraph 213 of the Senate tariff bill, calling for a duty on foreign graphite, as follows: Amorphous, 10 per cent ad valorem; lump, chip, and dust, 20 per cent ad valorem; and flake graphite, 2 cents per pound.

The above rates have been amended by Senator NICHOLSON, of Colorado, as follows: Amorphous, 1 cent per pound; lump, chip, and dust, 3 cents per pound; and flake, 5 cents per pound.

Considering the commodity, these rates certainly are enormous. As one of the users of foreign graphite, we strenuously object to any duty on same, because it will only add to the burden of the consumer, who will be compelled to pay the price; for where foreign graphite must be used, the American product can not take its place.

In view of the foregoing, we can not urge you too strongly to give this matter your consideration, and to offer an amendment permitting foreign crystalline graphite, or Ceylon plumbago, to come in free of duty.

We can assure you that your kind attention to this matter will be highly appreciated.

Respectfully yours,

EMPRESS MANUFACTURING CO. (INC.).

—

RIVERSIDE, N. J., *May 8, 1922.*

Hon. JOSEPH S. FRELINGHUYSEN,
Chairman of the Finance Committee,
United States Senate, Washington, D. C.

DEAR SIR: We have noted the amendment offered by Senator NICHOLSON, of Colorado, materially increasing the graphite schedule from that reported in the Senate bill of April 10, 1922, and inasmuch as we are large users of graphite crucibles, we thought it well to call your attention to the amendment and advise you that it has been our experience that crucibles manufactured from domestic graphite are much inferior to those containing the foreign product, and we feel that if this higher duty is levied, that crucible users will be harmed in two ways:

1. By having to pay more for crucibles.
2. That they would be able to obtain crucibles only of an inferior quality.

In view of this, it is our hope that graphite may be continued on the free list, where it has been for many years, thus enabling us to obtain a higher grade of crucible at a reasonable price.

Very truly yours,

THE RIVERSIDE METAL CO.,
H. L. RANDALL, *President.*

—

DOVER, N. J., *May 8, 1922.*

Senator JOSEPH FRELINGHUYSEN,
Washington, D. C.

MY DEAR SENATOR: The question of a recent amendment offered by one of the western Senators calls for a duty of 3 cents per pound on Ceylon plumbago. There is no reason in this, because there has never been anything found in America which will take the place of Ceylon for foundry practice. If there was an American-mined material that was satisfactory, we would gladly use it, as we favor protection to home industries, but this is one of the products with which there is no honest competition in America. It means to us the manufacturer must pay this 3 cents a pound, and then we must pay the 3 cents a pound and a profit on that to the manufacturer. We believe it is all wrong.

Trusting you can see your way clear to combat this matter, we remain,

Yours very truly,

RICHARDSON & BOYNTON CO.,
WILLIAM L. R. LYND, *Secretary.*

Mr. FRELINGHUYSEN. Mr. President, the committee, however, did accept the statement that domestic flake was of acceptable quality for making crucibles. It desired to give protection to the mines, and placed a duty of 2 cents a pound on that product which in the market now is selling for 4 cents a pound.

Mr. NICHOLSON. Mr. President, after listening to the letters read by the senior Senator from New Jersey from the gentlemen connected with the crucible companies, it would seem that they are gentlemen of great adaptability. When they are asking for free raw products, the American graphite is of a very inferior quality, as indicated by the letters read by the Senator. Let me call the attention of the Senator, however, to an advertisement of the American-made crucibles manufactured by the Jonathan Bartley Crucible Co., showing what they have to say about them:

Primarily called "Victory," because they represent a triumph of American skill, perseverance, methods, and materials over foreign materials.

At that time they did not call attention to the fact that this graphite was of inferior character; and I submit that when they had these advertisements sent broadcast throughout the land they were either imposing upon the general public or they are not honest with the general public now.

Mr. HEFLIN. Mr. President, the graphite which is being imported is inferior to the graphite produced in the United States. The finest flake graphite in the world is produced in

the mines of my State, and there is quite a supply of it in those mines. They were operated for a little while during the war, when the Government needed some of this material; and since the war is over, and the graphite mined by the slave labor of Ceylon is coming in, and some from Mexico, these mines have closed. They are shut tight now. They are not moving a peg, and the people who worked in these mines are out of employment, and the people who bought these mines and invested their money in them have them on their hands, and they are unable to operate them under present conditions.

Mr. FRELINGHUYSEN. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from New Jersey?

Mr. HEFLIN. I am glad to yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. I want the Senator to understand clearly that I did not say that the domestic flake graphite was of inferior quality to the imported product. I understand that the domestic product of flake graphite is equal in quality to the imported product.

Mr. HEFLIN. Mr. President, it seems to me the Senator from Colorado [Mr. NICHOLSON] has justified the contention that some import tax should be laid upon the graphite brought into the United States. We have heard a good deal, and especially from the distinguished Senator from New Jersey, to the effect that he is trying to protect the laboring man, that he wants to do something for the laboring man in the United States. Here is an opportunity to put to work laboring men who are now out of employment, who are seeking something to do; and if there is anything in the position of the Republican Party that it is the friend of the laboring man and will do something for an industry in order to give working people employment there, how can the Senator justify the position he is taking in favor of making graphite free?

Mr. FRELINGHUYSEN. Mr. President——

Mr. HEFLIN. I am not a free trader. I believe in deriving revenue for the Government from imports, and if an incidental benefit goes to those who own the mines, well and good. I yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. I have no objection to the Senator's efforts to discredit my statements, but I want him to be accurate when he attempts to repeat a statement I have made. He asks why I want graphite put on the free list. I have not asked that graphite be placed on the free list. I have simply supported the committee amendment—that the duty on flake graphite shall be placed at 2 cents a pound.

Mr. HEFLIN. Does the Senator think that is an adequate rate?

Mr. FRELINGHUYSEN. I feel that it is, with the imported article selling at 4 cents a pound. Does the Senator want a higher rate of duty?

Mr. HEFLIN. I want whatever is just and necessary, and the Senator from Colorado has shown, it seems to me, that the rate provided for by the Senator from New Jersey and those with him on the committee is not quite sufficient.

Mr. FRELINGHUYSEN. The Senator from Alabama has an industry in his State which produces flake graphite. He ought to know the cost of production and what rate is necessary to protect it. Of course, now that he has left the fold of free trade and has come into the fold of protection, I would like to have him state to the committee and to the Senate what rate he thinks would protect his industry, and the workingmen of Alabama, about whom he is talking.

Mr. HEFLIN. Mr. President, I am not a free trader, as I stated at the outset. I believe in a tariff for revenue. I stated before that if incidental aid goes to those who own or work in the mine, all well and good; but a Republican can not justify his position when he stands here and advocates a tariff, and a high tariff at that, for one thing, as the Senator from New Jersey did last night when he secured a tariff tax on sand, and then oppose a proposition so meritorious as that of deriving revenue and incidentally aiding an American industry now closed and out of business.

Mr. BURSUM. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from New Mexico?

Mr. HEFLIN. I gladly yield.

Mr. BURSUM. I desire to obtain some light as to the facts relating to the cost of production. The Senator from New Jersey submitted that flake graphite, which is produced in Alabama, can be utilized to advantage, that it is of sufficient quality, and that the selling price will be around 4 cents per pound. Can the Senator from Alabama tell us the cost of production and marketing of this flake graphite, which is produced in Alabama?

Mr. HEFLIN. It varies. I am unable to say exactly what the cost of production is; but I am able to say to the Senator that the mines are closed. There is no production now. There are no sales now. The laborers are gone. The mines are shut up. These people are seeking employment, and the investments there are idle. Where is the Republican Party going to find escape from a proposition like that, when it voted to tax salt, which everybody consumes, and this is an effort to protect a great corporation which uses flake graphite produced in my State?

The other night we asked the genial and distinguished Senator from New Jersey [Mr. FRELINGHUYSEN] how he justified a tax on sand, and he expressed the fear that the sand sifters and sand sellers of the United States would have serious competition some time from those who haul sand into the United States.

The tariff he succeeded in getting put on it is founded upon the fear or upon his very splendid and vivid imagination. Two or three ships came from abroad, having sold American products in foreign markets, and needing something as ballast, to hold the ships steady in the sea, they took on a cargo of sand, came home and unloaded, and gave somebody up in New Jersey an opportunity to say, "Here is a chance to increase the price of sand to the American consumer, by saying that we see a bugaboo of competition in sand coming from abroad," when the sea is heaving sand up by the millions of tons, and there is no such thing as exhausting the supply of sand. As I said in my speech the other night, the Bible reminds us of the inexhaustible supply of the sands of the sea, and yet the Senator from New Jersey succeeded in getting a tariff on sand, and he is now fighting a proposition to lay a tariff upon graphite, when the American mines are closed, and the foreigners have got the American market all to themselves.

Mr. WATSON of Georgia. Mr. President, does the Senator from Alabama understand that the handsome and brilliant Senator from New Jersey is afraid that somebody will bring sand in from the Sahara Desert?

Mr. HEFLIN. It may be that some such fear disturbs him.

Mr. EDGE. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from New Jersey?

Mr. HEFLIN. I yield.

Mr. EDGE. I understand that flake graphite is on the free list under the Underwood law. I would like to ask our new and welcome convert to protection why there was not an effort made when the Underwood bill was under discussion to place a tariff on flake graphite. At that time they apparently thought that it was not necessary.

Mr. HEFLIN. At the time that law was enacted the industry did not exist in the United States to amount to anything, and I do not know whether any effort was made to have any tax laid on the imports of graphite at that time or not. The industry sprang up out of necessity. The Government called for investigations to see what we had, and it resulted in finding one of the greatest graphite mines in the world down in my State, producing the very finest flake graphite on earth.

Mr. FRELINGHUYSEN. Mr. President, before the Senator starts this sand storm of his again, will he kindly answer my question and tell me what duty he is pleading for to protect his industry in Alabama? He has failed to answer my question. I should like to have him state whether he is for the duty proposed by the Senator from Colorado [Mr. NICHOLSON], or whether he is for the committee duty, 2 cents. I should like to have an answer to that question.

Mr. HEFLIN. Mr. President, I am very grateful to the distinguished Senator from New Jersey for suggesting sand storms. That is better than the sand I talked about. They saw a sand storm up there on the seashore, and they had an idea that sand was being blown from abroad, and they undertook to put a wall up to protect the sand sifters and sellers of New Jersey. That is what the Senator succeeded in doing the other night. He succeeded in having a tariff tax put on sand. I told how the people would be affected by it, that everybody who used glass, plain glass, cut glass, and every other kind of glass would be affected. Under this bill the mirror in which they look upon their manly and handsome forms, as the distinguished Senator from New Jersey can do, is taxed. They make glass out of this beautiful white sand, and I never dreamed that the day would come when they would tax the sands of the sea and undertake to build a wall to keep people from bringing sand into the United States. But it is done, and I am pleading, and the Senator from Colorado is pleading, for the imposition of an import tax which will bring revenue to the Government and a little aid to an American industry

which is being choked to death by the position of a big corporation in New Jersey that uses graphite.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Kentucky?

Mr. HEFLIN. I yield to the brilliant Senator from Kentucky.

Mr. STANLEY. My colleague overlooks one fact in pleading for this duty upon graphite. The argument that you ought to equalize the labor costs at home and abroad is made for every protective duty. This graphite in Alabama is produced by highly skilled and intelligent labor. The principal supply of graphite coming into this country, as I understand it, comes from the island of Ceylon, where naked Asiatics, in a tropical clime, live on coconuts, are covered with a single cotton shift, if they wear anything, and get a few cents a day for mining this graphite, which comes over here as ballast.

Mr. FRELINGHUYSEN. Mr. President, I want to correct the Senator. The kind of graphite which comes from Alabama is comparable only with that which comes from Madagascar, not Ceylon, possibly both employing the same color of labor.

Mr. STANLEY. The Senator goes from bad to worse. Labor conditions are worse in Madagascar, if anything, than they are in Ceylon, but it is the same kind of labor.

Neither of the distinguished Senators from New Jersey will deny that there is no comparison between the condition of the foreign laborer and the American laborer with his family, his home, and his high level of wages, with his children to educate, and all that sort of thing. He is put out of business, as I understand it, by naked, blanket-wearing, polygamous, Polynesian savages, and now come the two Senators from New Jersey with the blanket of the savage, waving it like a banner in this assemblage.

In addition to that, beside the question of equalizing the labor cost is the question of fostering an infant industry. This industry still has the bottle in its mouth. It is a war baby. They discovered this graphite in certain sections during the war, when we could not import it. It has its hippens on, and yet these great protectionist Senators come here and kill an industrial baby because it happens to live down South.

Mr. FRELINGHUYSEN. Mr. President, I have asked the Senator from Alabama what rate of protection he wants. I should like to ask the Senator from Kentucky, the Senator from Alabama having failed to answer the question, what rate of duty he believes should be placed upon this Alabama corporation which the Senator from Alabama is defending, which, I understand, is owned by eastern capitalists?

Mr. STANLEY. I would not give them a red copper. I am exposing, in the discussion of this graphite item, the whole callous, conscienceless hypocrisy of these pleaders for American labor. Is not a man digging graphite in Alabama in as honest an employ as a man working a loom in Connecticut or in New Jersey? Is not the man who is engaged in this business as much an American citizen as a silk spinner in Paterson, N. J.? Why this difference? What argument can you make in favor of the 200 per cent on silk that you can not make for 10 per cent on graphite? This graphite proposition is a fine illustration of the utter indifference, even to consistency, of the trust-mad, protection-mad advocates of this incoherent makeshift, this crazy quilt of a bill.

If the Senator from Alabama will permit, I will call his attention to the reason why you can not get a duty on graphite but can get it on silk and can get it on the cotton fabrics of New Jersey and can get it on any other thing, though you can not get it on the fertilizer for the farmer. It is because the plain, voiceless millions do not buy graphite to any extent.

It is sold to the greatest trust in the world, the owners of crucibles, the men who make this fine crucible steel, who have cost sheets, who know the buncombe and the absurdity, who know the naked, silly falsity of the charge that a man will pay more for labor because he makes more from his business, who know what you pay for labor, what you pay for materials, what you must pay in the open market of the country, and they tell you they do not want any duty on graphite. The same powers, the same trusts, the same masters that demand the duty upon the finished product will take it off of the raw material, and you obey both, taking the public for driveling fools.

Mr. FRELINGHUYSEN. Mr. President——

Mr. HEFLIN. I am glad to yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. They do not say they do not want a duty on graphite. They want a duty of 50 per cent ad valorem. They are willing to stand it, although they say they can not use the American product.

Mr. STANLEY. Does not the Senator know that a duty of 2 cents on graphite produced in Alabama would not protect it one minute against the practically pure ores found in Madagascar and Ceylon? It would not produce an ounce of Alabama graphite, and the Senator knows it. That is handing us a gold brick.

Mr. HEFLIN. Mr. President, the Senator from Kentucky has pointed out that the graphite which comes from over the seas into our country and now controls the American market is produced by slaves. I am told that the graphite diggers over there get 3 cents a day. The American miner of graphite can not compete with those conditions. It will be difficult for Senators on the other side of the Chamber, who are not willing now to aid an infant industry just getting on its feet, to explain their position on this item.

The war ended and the graphite from abroad came in and knocked this American graphite infant down, and it is lying there now prone upon the ground. The Republican leaders who have boasted of their friendship for American industry have here an opportunity to show their friendship for this industry in my State, which has been driven out of the American market by the graphite of foreign countries.

The Senator from New Jersey reminds the Senate and reminds me that I am defending an industry in my State owned by eastern capital. I do not care where the capital comes from. It is American money. It is the money of American citizens, and when they come to my State to invest their money I want them treated fairly. In coming to my State, the greatest State in the Union, they show good judgment and good taste. I give them whole-hearted welcome. I want every legitimate industry in my State to prosper. I want the laboring man, who is dependent upon his skill, his genius, and his strength, to have something to do and a decent wage which will enable him to provide the wherewith to take care of himself and family.

I would like to see the mines in my State opened again. I would like to go out and gather in the men who are now running around seeking employment and eking out a disagreeable existence. Here is an opportunity to take men from the army of the unemployed, give them something to do, and start the wheels of the graphite industry humming down in my State. Is it to be said that a foreign concern or a great corporation which uses the products of that foreign concern has more influence in the United States Senate than the common rights of American labor and the welfare of American industry? It remains to be seen, Mr. President, by the vote upon this question. Here is an industry closed, out of business, and the men who worked there out of employment.

I am not an expert upon the matter of rates. I do not know what is a fair and just rate. The Senator from Colorado has shown that the rate agreeable to the Senator from New Jersey [Mr. FRELINGHUYSEN] is not sufficient. I think there ought to be a duty somewhat larger than the one offered by the committee.

I want to say to the distinguished Senator from New Jersey [Mr. FRELINGHUYSEN], who voted to put a tax upon salt, that he did the thing which helped to produce the French Revolution. That was one of the causes of the French Revolution, because every man, woman, and child used salt, and when the King insisted upon taxing the salt of the French people they rebelled against it. So I say that was one of the things which brought about the French Revolution. I have seen the Senator vote to put salt upon the tax list, bearing a burden of 40 cents a sack. Every man, woman, and child in the country uses salt. The Senator is not now willing to place a fair tax upon graphite, which is used by one great corporate concern in his State. He is willing to deprive the Government of the revenue that it would derive on foreign graphite and willing to turn the American graphite market over to foreign graphite free, while the producers of American graphite are forced to close their mines.

The cause of American labor does not seem to hang very heavily now upon the conscience of the Senator from New Jersey. The desire to aid an infant industry seems to have been lost somewhere in the protection head of the Senator from New Jersey now. Here is a concrete proposition of doing justice to an American industry, aiding the industry to get upon its feet, and the Senator and his colleagues have attacked the proposition of extending that helping hand to that American industry. Oh, "Consistency, thou art a jewel!"

I submit that by imposing an import duty on foreign graphite we can put money in the United States Treasury and prevent the ruin of an infant industry in our own country.

Mr. WALSH of Massachusetts. Mr. President, the minority members of the Finance Committee are not only opposed to the amendment offered by the Senator from Colorado [Mr. NICHOL-

SON], but believe that this product should be upon the free list, where it has been for 50 years. During those 50 years there have grown up in this country many substantial industries engaged in the business of manufacturing graphite products. They are very numerous. Graphite is used extensively in the manufacture of stove polish, in the making of pencils, crucibles, foundry facings, motor brushes, and other like commodities, with factories located in all parts of the country.

A good deal has been said upon this subject, but it seems to me the real question is this: Does the imported graphite compete with the domestic graphite? The evidence which I have obtained from manufacturers of graphite products in my State shows that it does not. I want to say in this connection that all the small foundries in the country, and there are an exceedingly large number of them, use graphite in making foundry products. The information which I get from the foundries in my State is to the effect that the imported graphite does not compete with the domestic graphite, that the domestic graphite is not suitable or fit for making certain graphite products which this and other industries are manufacturing. As has been said by the Senator from New Jersey, the domestic graphite is used in small quantities by mixing it with the imported graphite.

The best proof, however, that the imported graphite does not compete with the domestic graphite is in the matter of price. The undisputed information shows that we have been importing a much larger amount of graphite than has been mined in America and that the prices of the imported graphite have been in excess of the prices of the domestic product. It is absurd to claim, if the domestic graphite was equal in quality to the imported graphite, that our manufacturers would refuse to use the domestic graphite and to their own loss pay a higher price to the importers for the foreign graphite.

The figures furnished to us by the Tariff Commission show that in the last nine years the average price of the domestic graphite has been $11.45 per ton; the average price of the Mexican graphite has been $36.39 per ton, and the average price of the Korean graphite $20 per ton. What more proof do we need that the imported graphite does not compete with the domestic? Our manufacturers are not fools. Our business men are not going into foreign markets to pay $36 per ton for graphite if they can buy a graphite of equal quality and serviceability in America for $11 per ton.

Why have they been obliged to buy the foreign graphite and pay a higher price? It is because there are certain qualities in the foreign graphite that are indispensible in the making of certain graphite products. For instance, the graphite deposit in the United States is not suitable for manufacturing purposes, such as stove polish. Stove polish made from it lacks being glossy. Lead pencils made from it break too easily. For foundry purposes it lacks the necessary heat requirements.

It is true that a chemical analysis of the domestic graphite may show but very little difference between it and the foreign product, but the fact is that the domestic graphite is not competing with the foreign graphite.

The question resolves itself into this: Our manufacturers of graphite products must have the imported graphite. What is it proposed to do in this amendment? It is proposed in the amendment offered by the Senator from Colorado to impose upon the manufacturers a great burden, because, after all, we can not tell just how heavy a tax is being levied when we only speak of tariff duties in specific rates; but when those specific duties are transposed into ad valorem rates we can get some conception of the seriousness of the amendment offered by the Senator from Colorado in the increased cost that will be exacted from the users of graphite in the various manufacturing industries of the country.

The present prices are very much below normal prices. It is hardly fair to measure the normal prices of graphite by the present prices, but at even present prices amorphous graphite, selling as it does for 1 cent per pound, would bear an ad valorem duty of 100 per cent under the amendment offered by the Senator from Colorado [Mr. NICHOLSON]. Lump graphite, selling for from 6 to 8 cents per pound, would bear an ad valorem rate of from 38 to 50 per cent per pound. Flake graphite, selling for from 3 to 4 cents per pound, would bear an ad valorem rate of from 133 to 167 per cent.

Under normal prices let us see how the computation would work out. On amorphous graphite, which sells normally for 2 cents per pound, the duty suggested by the Senator from Colorado in his amendment would be equivalent to an ad valorem rate of 50 per cent; on lump graphite, at the normal price of 10 cents per pound, the rate proposed by the amendment offered by the Senator from Colorado would be equivalent to an ad valorem duty of 30 per cent, and on flake graphite, at the normal price of 7 cents per pound, the ad valorem equivalent would be about 71 per cent.

The minority members of the Finance Committee, as I have said, not only are opposed to the amendment offered by the Senator from Colorado but will support the amendment to be offered by the Senator from Michigan which, I understand, is designed to place amorphous graphite upon the free list. If that amendment shall be adopted, I shall then move an amendment putting the graphite in the other brackets, lump and flake, upon the free list likewise.

Mr. TOWNSEND. Will the Senator from Massachusetts yield to me?

Mr. WALSH of Massachusetts. I yield to the Senator from Michigan.

Mr. TOWNSEND. It was suggested by the Senator from Colorado that the placing of a duty by the Committee on Finance on amorphous graphite had been compensated for by an increase of duty on some of the products manufactured from amorphous graphite. If that be true, I desire to state now that if the proposal to put amorphous graphite on the free list shall prevail I shall be very willing, indeed, to have reduced the duties on the products manufactured from amorphous graphite which have been increased because of the duty imposed by the bill on the raw product. As I have said heretofore, while I am a protectionist, I agree with the Senator from Massachusetts that no industry in the United States can be protected, encouraged, or benefited, in my judgment, by placing a duty on this product which, under the present state of art, at least, must be imported from abroad in order to meet the demands of the trade.

Mr. WALSH of Massachusetts. Mr. President, I am very glad to have the additional statement of the Senator from Michigan. I want to call attention to the seriousness of the situation brought about by the committee amendment as it affects the manufacturer of graphite products. The Senator from Michigan has spoken about its effect upon the users of amorphous graphite. I want to say a word to show how it will add materially to the cost of the finished products manufactured from flake graphite.

The Senator from New Jersey [Mr. FRELINGHUYSEN] said that flake graphite is now selling for 4 cents a pound; yet the committee proposes to put a duty of 2 cents per pound—50 per cent ad valorem—on flake graphite. It is proposed overnight to take that commodity from the free list and impose upon it an ad valorem duty of 50 per cent. How can that be justified?

The trouble with this bill is that on the raw materials, which are among the first items we have considered, the rates have been placed so high that when we come to the finished product, in order to provide compensatory duties, a pyramid has been built up until the rates proposed reach the sky line, so that the cost of living and the cost of the manufacturing products in this country will be up higher than ever. There can not be any other result from the action proposed. It would almost seem, however unbelievable it may be, that those who drafted this bill not only propose to keep prices up but really to increase prices, for nothing else can happen in view of the high rates that have been placed upon so-called raw materials which go into the finished product. Here is an example in an increase of 50 per cent ad valorem. I have some figures which I will read in a moment from some of the manufacturers of my State, one of whom informed me by telegram this morning that his consumption of flake graphite amounts to $50,000 per year. Now, it is proposed to place a duty of 50 per cent ad valorem upon the raw product used by this manufacturer, which means that on this one little article which is used in the manufacturing of graphite products a duty of $25,000 must be paid.

Mr. WALSH of Montana. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator.

Mr. WALSH of Montana. I inquire of the Senator, if we are going to apply the principle of imposing duties upon articles of domestic production sufficient to equalize the difference between the cost of production at home and abroad—and that is the principle which it is said has controlled the committee—what objection could there be to a duty of 2 cents a pound on graphite?

Mr. WALSH of Massachusetts. None whatever; in fact, the duty ought to be more.

Mr. WALSH of Montana. In other words, in this particular case the committee has not observed any such rule.

Mr. WALSH of Massachusetts. No; but I think this particular case has this further difference—I am not convinced that the foreign graphite competes with the domestic graphite. The information that comes to me from the users of foreign graphite in America—and I am going to read some letters to confirm that statement—is that they are not in serious competition. However, it would make no difference whether they were or not, so far as this item in the bill is concerned. These rates have been agreed to haphazardly, according to information furnished for

the most part by industries developed during the war, and which made excessive profits. The graphite-mining industry is one of them. More graphite mines were opened during the war and more graphite stock was floated in America than ever before. This is really an attempt to protect a war baby, so called, an industry that came into being during the war, when it was impossible to import sufficient graphite from foreign countries.

Mr. BORAH. Mr. President——

Mr. WALSH of Massachusetts. I gladly yield to the Senator from Idaho.

Mr. BORAH. I understood the Senator to say that his information was that the foreign graphite did not come in competition with the domestic graphite.

Mr. WALSH of Massachusetts. That is my information.

Mr. BORAH. Then, if there is no competition, what difference will it make to the manufacturer or to the users of graphite in Massachusetts, for instance, whether a tariff duty is levied?

Mr. WALSH of Massachusetts. It will make no difference, except that it will increase the cost of the raw material, which will be passed on to the consumer. Graphite is now on the free list, as the Senator understands. Under one of the amendments now proposed the imported graphite will have to pay a duty equivalent to 50 per cent ad valorem. Therefore, the manufacturers who use this graphite as part of their raw material will have to pass that burden to the consumer of the finished product, and thereby increase the cost that much more.

Mr. BROUSSARD. Mr. President——

Mr. WALSH of Massachusetts. I yield.

Mr. BROUSSARD. May I inquire of the Senator whether or not the commodities produced by the company which is complaining against the rate on graphite are on the dutiable list or on the free list?

Mr. WALSH of Massachusetts. I beg the Senator's pardon. Will he repeat his question?

Mr. BROUSSARD. I wish to know whether or not the articles manufactured from graphite produced by the parties who protest against the duty on graphite enjoy the benefits of protection or are on the free list?

Mr. WALSH of Massachusetts. I can not tell the Senator without examining other paragraphs of the bill; but I think all of them are on the dutiable list.

Mr. BROUSSARD. Then, is it not fair, if the finished product is on the dutiable list, to put a duty on the raw product?

Mr. WALSH of Massachusetts. I quite agree with the Senator as to that, but on most of the finished products there are two duties.

There is, first, what is called a compensatory duty, which is duty on the finished article, supposed to take care of the duty upon the raw material, and then there is also a protective duty. That is illustrated in the case of shoes. On shoes there is a compensatory duty levied in this bill because of the duty levied on hides, and then there is a protective duty in addition to that for the benefit of the shoe manufacturer, supposed to represent the difference in cost of manufacturing here and abroad.

Mr. BROUSSARD. The parties who make the complaint of which the Senator from Massachusetts has spoken are not protesting against the duties which they enjoy under this bill, are they?

Mr. WALSH of Massachusetts. They are complaining about new duties being placed upon commodities which are now upon the free list, duties so high as to be almost prohibitory. But I am complaining in the interest of the public, who will finally pay all these duties.

Mr. BROUSSARD. But they are not complaining against the additional protection which has been accorded their product?

Mr. WALSH of Montana. Mr. President, if the Senator from Massachusetts will pardon me, the answer to the question addressed to him by the Senator from Louisiana is found in paragraph 216, which provides:

and articles or wares composed wholly or in part of carbon or graphite, wholly or partly manufactured, not specially provided for, 45 per cent ad valorem.

In other words, the bill imposes a duty of 10 per cent upon the raw product and 45 per cent upon the manufactured product. I read as follows from the bill.

PAR. 216. Carbons and electrodes, of whatever material composed, and wholly or partly manufactured, for producing electric arc light; electrodes, composed wholly or in part of carbon or graphite, and wholly or partly manufactured, for electric furnace or electrolytic purposes; brushes, of whatever material composed, and wholly or partly manufactured, for electric motors, generators, or other electrical machines or appliances; plates, rods, and other forms, of whatever material composed and wholly or partly manufactured, for manufacturing into the aforesaid brushes; and articles or wares composed wholly or in part of carbon or graphite, wholly or partly manufactured, not specially provided for, 45 per cent ad valorem.

The 45 per cent rate applies, apparently, to all manufactures into which graphite enters, including crucibles.

Mr. WALSH of Massachusetts. Mr. President, I will now read some letters which I have received and which I think are important in view of the discussion which has taken place here and the claim which has been urged that the imported graphite does compete with the domestic graphite. I first read from a letter from Hunt-Spiller Manufacturing Corporation, of Boston, Mass.:

HUNT-SPILLER MANUFACTURING CORPORATION,
BOSTON, *June 10, 1922.*

Hon. DAVID L. WALSH,
United States Senate, Washington, D. C.

DEAR SIR: Replying to yours of June 4 relative to the proposed tariff on graphite:

I have been advised by the manufacturers of foundry facings of further proof that American mine graphite can not be used in the manufacture of crucibles and foundry facings.

The Dixon Crucible Co., of New York, probably the largest graphite manufacturers in the world, own extensive graphite mine interests in New York and Alabama. They consider the American crystalline graphite superior to the imported for use in the manufacture of lubricating greases and some other purposes, but it is considered by them that this graphite can not be used in the manufacture of either crucibles or foundry facings.

Other manufacturers of these two commodities agree with the Dixon Co., that in the mixture of graphite for crucibles or facings only 10 per cent of domestic graphite can be efficiently used. These facts are borne out from records obtained after experimenting for seven consecutive years. I am advised that laboratory tests have shown that a larger percentage than 10 could be used, but practical use has demonstrated this to be only a theory.

The American flake graphite is much thinner than the Ceylon grade, and takes up a larger percentage of clay in the mixture. This increased percentage of clay prevents heating the clay in the mixture rapidly, and requires about twice the time to bake, and uses double the amount of fuel.

I feel that you will agree with me that this matter is a serious one, and I am furnishing the above information in order to assist you toward arriving at a decision.

Yours very truly,

PURCHASING DEPARTMENT,
A. G. CLUKAS, *Chief Clerk.*

—

HUNT-SPILLER MANUFACTURING CORPORATION,
Boston, May 31, 1921.

Hon. DAVID I. WALSH,
Senate Chamber, Washington, D. C.

DEAR SIR: It has come to our knowledge that a certain bill is now in the hands of the Ways and Means Committee that proposes putting a tariff on graphite. This bill is known as H. R. 11815, and as manufacturers who are dependent on this raw material in the production of our goods we strongly protest against it becoming a law.

We are informed by the manufacturers of foundry facings, a commodity we use to a considerable extent, that the tax imposed on the Ceylon lead that goes in to make up the manufacture of these foundry facings will advance the cost of this commodity to us fully 100 per cent. We are further informed that this tax will not afford protection to any American industry, because domestic graphite can not be used successfully in the manufacture of foundry facings.

We sincerely trust that you will give this matter your earnest consideration, as this bill is one that will not only seriously handicap manufacturing business in general but will also be disastrous to many old-established plants.

Yours very truly,

PURCHASING DEPARTMENT,
By A. G. CLUKAS, *Chief Clerk.*

—

SPRINGFIELD FACING CO.,
Springfield, Mass., August 17, 1921.

Hon. DAVID I. WALSH,
Senate Chamber, Washington, D. C.

DEAR SIR: The report of the House Ways and Means Committee of a tariff of 10 per cent ad valorem on graphite was so much better than the 6 cents per pound asked for by the Alabama graphite miners that everyone has tried to feel satisfied, as the Alabama lobby has given the impression that they themselves were satisfied, but everyone is surprised now to find they are still working with the Senate committee for a 6 cents per pound tariff. Where there is one man employed in the graphite business in this country there are over 1,000, and probably 2,000, men—this is no exaggeration—who are employed in the brass and steel operations who will be affected seriously by this tariff, and under no consideration will it be of much help to the Alabama people, as their goods can not be used in making a desirable crucible.

There isn't a brass foundry in New England but what would tell you that during the war, when the Government insisted upon crucibles containing 20 per cent Alabama, so as to make the stock of Ceylon in this country last longer, that the crucibles were very poor, did not last one-half as long—in fact, seldom one-quarter as long—and on account of excessive clay that has to be used in making crucibles it took several times as long to heat the metal, adding extra cost for the fuel and the time of workmen. Brass foundries, as a rule, have been very hard hit, and it certainly seems a crime to add any extra burden for them to bear.

Please use your influence to keep graphite on the free list, where it has been for the past 50 years, thus helping everyone in the steel and brass industries.

Very truly yours,

L. S. BROWN.

—

WORCESTER, MASS., *August 18, 1921.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

MY DEAR SIR: Among the items that are to be brought to your attention on the coming tariff program is a proposed duty and tariff on plumbago, graphite, or black lead.

Our industry is suffering, along with many others, in the general depression now existing. The industry was built up with plumbago on the free list, so that in these times of stress it is especially undesirable

that we should be further burdened with a tariff; in fact, it is the worst time to burden us with the tariff, as the raw material heretofore has always been on the free list.

We are endeavoring to put our business on a pre-war basis as far as costs are concerned, and anything that will increase our costs retards the returning of our industry to a firm basis.

Those who furnish us with the crude graphite are making an honest endeavor to lower the cost of our raw material, and any additional cost in the way of duty on raw material will be disastrous.

We therefore ask that you may kindly take the above into consideration.

Very truly yours,

T. P. KELLY & Co. (INC.),
C. F. BERG, *Branch Manager.*

—

BEVERLY, MASS., *April 20, 1922.*

Hon. DAVID I. WALSH,
Washington, D. C.

MY DEAR SENATOR: I am writing you concerning the proposed duty on plumbago and feel, should the tariff on graphite of various kinds go through as proposed by the amendment submitted by Senator NICHOLSON, of Colorado, it will practically put the small brass foundries out of business.

Crucible graphite has so greatly increased it would make brass casting almost prohibitive and will confine the brass industry to large plants, large enough to install electric furnaces.

When you stop to consider that there are 40 using gas, coal, or oil to 1 using electric furnaces, you will see what it means to the small foundries.

Massachusetts is filled with small brass foundries, and it will deal them a body blow and will be hard for them to overcome.

I sincerely hope you will consider this matter very thoroughly from this point of view and trust this may have your early consideration.

Thanking you for anything you can do, believe me, I am,

Very sincerely yours,

ROBERT ROBERTSON,
Beverly, Mass.

—

FLORENCE, MASS., *June 1, 1921.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR MR. WALSH: It has come to our knowledge that a certain bill is now in the hands of the Ways and Means Committee that proposes putting a tariff on graphite.

This bill is known as House bill 11815, and as we operate a large machine shop and iron foundry, and are dependent on this raw material in the production of our goods, we strongly protest against it becoming a law.

It can not afford protection to any American industry, because domestic graphite can not be used successfully as a foundry facing.

A certain amount of this imported graphite has to be used in all foundry facing, and we believe that the proponents of this bill are simply using this means to increase the price of the domestic graphite.

We sincerely trust that you will give this matter your serious consideration, as it will greatly increase the cost of our manufactured goods, and at a time when we are all striving to cut the cost—in fact, are obliged to cut—in order to stimulate business.

Thanking you in advance for your consideration in this matter, we are,

Very truly yours,

NORWOOD ENGINEERING CO.,
H. W. HOSFORD, *Manager.*

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Kentucky?

Mr. WALSH of Massachusetts. I yield.

Mr. STANLEY. I am not acquainted with all the details of this bill as I should like to be; but I assume that the various materials that are produced by these crucible-using companies are on the free list now and they are not asking for any additional protection on account of the increased cost of those materials.

Mr. WALSH of Massachusetts. Mr. President, I now read a letter from the Worthington Pump & Machinery Corporation, of Holyoke, Mass.:

TARIFF ON IMPORTED GRAPHITE.

HOLYOKE, MASS., *May 20, 1921.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SIR: We are under the impression that the tariff on imported graphite is likely to be favorably considered before the House of Representatives and the Senate. We as users of imported graphite feel that this is not a legitimate tariff, provided it is designed to protect home industries. The graphite deposits in this country and Mexico are not of the kind nor character adapted for the use which we make of it in connection with our iron foundry, and would not and could not be used, and hence a tariff on imported graphite serves only the purpose of increasing the cost.

We bring this to your attention, and know that it will have your usual thoughtful consideration before meeting with your favor. We are

Yours very truly,

WORTHINGTON PUMP & MACHINERY CORPORATION,
DEANE WORKS, *Holyoke, Mass.*,
CHARLES L. NEWCOMB, *Manager.*

—

SPRINGFIELD, MASS., *May 25, 1921.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SIR: It has come to our knowledge that a certain bill is now in the hands of the Ways and Means Committee that proposes putting a tariff on graphite. This bill is known as H. R. 11815, and as manufacturers who are dependent on this raw material in the production of our goods we strongly protest against it becoming a law. Our reason for this is that the tax imposed will advance the cost of our production. It will not afford "protection" to any American industry, because domestic graphite can not be used successfully in the manufacture of crucibles or foundry facings.

We sincerely trust that you will give this matter your serious consideration, as this bill is one that will not only seriously handicap manufacturing business in general but will also be disastrous to many old established plants.

Yours very truly,

GILBERT & BARKER MFG. CO.,
W. T. RAYNER, *Treasurer.*

—

SPRINGFIELD, MASS., U. S. A., *April 4, 1922.*

Hon. DAVID I. WALSH,
United States Senator from Massachusetts,
Washington, D. C.

DEAR SIR: We are informed that the Senate Finance Committee has inserted a clause in a bill before it placing a duty of 10 per cent on amorphous graphite, 20 per cent on Ceylon, and 2 cents per pound on flake.

Inasmuch as this duty will create an additional hardship on the foundry concerns, we would respectfully request that you use your influence when the bill comes before your honorable body to have this clause eliminated.

We will esteem it a particular favor if you can see your way clear to comply with our request and thank you sincerely for any effort you may use in behalf of the foundry people of this State.

Yours very truly,

THE HARLEY CO.,
G. E. TENNEY,
Assistant to President and General Manager.

—

FITCHBURG, MASS., *May 1, 1922.*

Hon. DAVID I. WALSH,
Senate Office Building, Washington, D. C.

DEAR SIR: We wish to enter our protest on any duty on imported graphite. It should be put on the free list. We are a considerable user of graphite steel melting pots, and although we have conducted some expensive experiments for the United States Government, we are not yet of the conclusion that there is any graphite existing in this country which is a suitable substitute for the Ceylon graphite.

One of the chief costs of crucible tool steel is the cost of the crucible, and anything more added to this will only be in favor of the electric furnace, which is encroaching on the crucible process continuously. The result of a tariff on graphite would be that as far as crucibles go it would tend to eliminate them; would not assist the American producer of graphite, the only advantage being that it would be a revenue producer until the importation ceased, and in the writer's opinion this is undoubtedly what would happen.

We speak as a producer of electric steel as well as crucible steel, having 15 years' experience from which to draw comparisons.

Very truly yours,

SIMONDS MANUFACTURING CO.,
A. T. SIMONDS, *President.*

—

SOMERVILLE, MASS., *April 17, 1922.*

Hon. DAVID I. WALSH,
United States Senator, Washington, D. C.

MY DEAR SIR: As large users of crucibles in connection with our foundry work, we wish to enter our protest against the amendment with reference to increasing duty on graphite flake from 2 cents per pound to 5 cents per pound offered by Senator NICHOLSON, of Colorado. We are one of the many foundries in this vicinity not equipped with electric furnaces, making it necessary to use crucibles. This increase, if allowed to stand, will make the price of crucibles prohibitive and result in serious loss to this particular industry.

Trusting that you will use your best efforts to defeat the amendment mentioned, we beg to remain,

Yours truly,

SOMERVILLE MACHINE & FOUNDRY CO.,
By M. J., Jr.

—

CHELSEA, MASS., *April 18, 1922.*

The Hon. DAVID I. WALSH,
Washington, D. C.

DEAR SIR: On May 20 of last year we wrote you protesting the taking of graphite from the free list, and on May 26 you were good enough to assure us that you would give the matter your careful consideration when it came before the Senate.

We understand that after exhaustive hearings and thorough investigation the Senate Finance Committee submitted the following rates:

Graphite, amorphous, 10 per cent ad valorem.
Graphite, lump, chip, and dust, 20 per cent ad valorem.
Graphite, flake, 2 cents per pound.

We have been advised that Senator NICHOLSON of Colorado has submitted an amendment, changing the duty as follows:

Graphite, amorphous, to 1 cent per pound.
Graphite, lump, chip, and dust, to 3 cents per pound.
Graphite, flake, to 5 cents per pound.

We therefore are again taking the liberty to appeal to you and to ask you to protest against the amendment proposed by Senator NICHOLSON in so far as it will increase the tariff on graphite.

If these amended rates are enacted it would mean that the selling prices of crucibles would be so increased that it would mean that the crucible industry would be practically eliminated.

We sincerely hope that you may bring your influence to bear, and thanking you, we are,

Respectfully yours,

CONNOLLY STEEL CASTING CO.
JAMES CONNOLLY, *Treasurer.*

—

AMESBURY, MASS., *June 3, 1921.*

Hon. DAVID I. WALSH,
Senate Chamber, Washington, D. C.

DEAR SIR: We wish to call your special attention to a tariff bill about to be introduced by Congressman J. W. FORDNEY, the future of which must necessarily be of great concern to us.

The bill calls for the laying of an import duty of approximately 6 cents per pound on such grades of graphite as are used in the manufacture of crucibles. An increase of 6 cents per pound on the plumbago

(graphite) contents of crucible mixtures means that the selling price of crucibles must be considerably higher to take care of such an increase in the cost, which, with the high labor costs, etc., the poor foundryman has about all he can possibly stand and stay in business.

This bill is introduced in the interest of the domestic graphite mining industry. The graphite produced from American mines is of a flake form, and has a limited use in the manufacture of crucibles. The heavier crystalline form as it occurs in Ceylon is much more desirable for crucible purposes.

The passage of this bill will force a more extensive use of the less desirable material, and increase the cost at the same time.

We sincerely trust that you will do all in your power not to have this tariff bill enacted, as instead of helping to make the crucibles better, will have a tendency to put cheaper material into them, and, furthermore, at an added cost to us. You can readily see we would lose on both ends.

Sincerely trusting that you will give this your personal attention, we beg to remain,

Yours sincerely,

MURPHY ALUMINUM & BRONZE FOUNDRY (INC.),
WM. J. MURPHY, *Treasurer.*

—

CHELSEA, MASS., *May 20, 1921.*

The Hon. DAVID WALSH,
Washington, D. C.

DEAR SIR: We understand that graphite is to be taken from the free list, and we wish to state that we are strongly opposed to any tariff on it, and we will gladly state reasons why it is unjust.

We trust that you may bring your influence to bear against any such change, for, under the new ruling proposed, the price of graphite would be so exorbitant that it would be a serious drawback to the foundries throughout the United States.

Thanking you, we are,

Respectfully yours,

CONNOLLY STEEL CASTING CO.,
JAMES CONNOLLY, *Treasurer.*

—

CHELSEA, MASS., *May 21, 1921.*

Hon. DAVID WALSH,
Washington, D. C.

DEAR SIR: We have been advised that graphite is to be taken off the free list and made subject to a tariff of 6 cents a pound.

We are inclined to believe that some of the pressure brought to bear on the proposed legislation is being advanced by parties who are interested in certain stock manipulation.

Any influence that you may bring to bear against this proposed change would be much appreciated, as, should this ruling go through, the price of graphite would be exorbitant and a detriment to the foundry business throughout this country.

Yours very respectfully,

LOVEWELL-HENRICI CO.,
F. C. LOVEWELL, *President.*

—

CAMBRIDGE, MASS., *May 23, 1922.*

Hon. DAVID I. WALSH,
Senate Chamber, Washington, D. C.:

Your wire. We use approximately 14,000 pounds of graphite monthly. Approximate value, $700.

HUNT SPILLER MANUFACTURING CORPORATION.

—

WORCESTER, MASS., *May 24, 1922.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.:

Telegram received. We use 500 tons amorphous graphite, value $8,000; 500 tons crystalline flake, value $50,000, per year. Please do everything possible to defeat proposed duty.

T. P. KELLEY & CO. (INC.).

—

SPRINGFIELD, MASS., *May 24, 1922.*

Hon. DAVID I. WALSH,
Senate Chamber, Washington, D. C.:

We personally should use 300 tons American amorphous, 40 to 60 tons imported amorphous, 100 tons Ceylon dust and chip. The numerous small brass and iron foundries are not organized to protest, but many have asked me to work for free tariff or at most the Fordney 10 per cent.

SPRINGFIELD FACING CO.

—

SOUTH BOSTON, MASS., *May 24, 1922.*

Hon. DAVID I. WALSH,
The Senate, Washington, D. C.:

With further reference your inquiry regarding graphite, we are opposed to tariff duty on imported graphite, as any increase would materially increase our cost of production.

HUNT SPILLER MANUFACTURING CORPORATION,
W. B. LEACH, *President.*

The telegrams just read indicate the extent to which graphite is used by a few of our manufacturers. By computing what this duty will cost them you will appreciate the heavy burden we are about to fasten on these industries at a time when they are all struggling against abnormal and most unprosperous conditions.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from Massachusetts yield to the Senator from Kentucky?

Mr. WALSH of Massachusetts. I yield.

Mr. STANLEY. If my generous colleague will bear with me for just one question——

Mr. WALSH of Massachusetts. Certainly.

Mr. STANLEY. As a good Democrat, which he is, and a statesman, which he is, I want to ask him this question: If the domestic graphite will not serve this purpose, the foreign graphite will have to be imported, will it not?

Mr. WALSH of Massachusetts. Exactly.

Mr. STANLEY. And if it is imported at a duty of 10 per cent, that will necessarily be a revenue duty, because it does not come in competition with any domestic product. Now, does it not strike the Senator as fair that these industries, which I understand are very highly protected—50, 100, 200 per cent—on these finished steel and brass products, ought in common conscience and common decency either to cease asking for these exorbitant duties upon their finished products or be willing to pay a little revenue to the Government?

Mr. WALSH of Massachusetts. The industries will not pay the "little revenue"; it will come out of the public, the ultimate consumers. I think we ought to bear in mind the consumers when we talk even of tariff for revenue. I will say further to the Senator that I think the Democratic Party—the Senator has referred to the fact that I am a Democrat—is in a situation to-day that it never was in before in this country.

I think this tariff legislation means that if the Democratic Party will pursue a sound sane policy it can bring to its standard and support a great many of the manufacturing interests of this country.

The greatest service that has been rendered—unintentionally, however—to the manufacturing interests of this country has been rendered by the agricultural tariff bloc. They have taught them the ridiculousness and the absurdity of the high protective system. While these manufacturers were getting protection themselves, they were happy and contented; but when other industries, like agriculture, appeared and asked for protection, they realized how false their position was, and how absurd and ridiculous it was to be contending for high protective duties for their industries alone. The argument of the agricultural bloc is, "Because you, in the manufacturing centers of this country, have become prosperous by protection, we believe we ought to have a share of it; we ought to have a part of it, and ought to participate in it." I repeat that, in my opinion, the Democratic Party, as a result of this tariff legislation, is going to have many, many Republican protectionists accept its theory on the tariff question of a tariff for revenue only and support the Democratic Party in the next campaign.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Idaho?

Mr. WALSH of Massachusetts. I yield to the Senator.

Mr. BORAH. What is the position of the Democratic Party on the tariff?

Mr. WALSH of Massachusetts. I assume that the position of the Democratic Party is, if I may speak for the party, that it is in favor of a tariff for revenue. Many of the party platforms, however, have favored a reasonable protection.

Mr. BORAH. The Senator did not hear the able and unanswerable argument of the Senator from Alabama [Mr. HEFLIN] on graphite?

Mr. WALSH of Massachusetts. I heard the argument, but I do not agree with the Senator that it was unanswerable.

Mr. BORAH. If there is a Democrat in the United States, it is the Senator from Alabama. He is one of the distinguished leaders of the party, and recognized as such.

Mr. WALSH of Massachusetts. I think the Senator from Alabama was taking the position that now that protection is being passed around, he believes the graphite industry in his State ought to have protection. I do not agree with that policy, but I think that is the sole explanation of his advocating a protection upon the graphite-mining industry of Alabama.

Mr. BORAH. I know the views of the Senator from Massachusetts on the tariff, and so far as I know they are consistent views; but, without intending to be so, it is utterly misleading for either a Republican or a Democrat to state that there is any difference between Democrats and Republicans on the subject of tariff so far as party is concerned.

The fact is, as has been demonstrated in this bill, that when an industry springs up in any part of the country, whether it is the Democratic part of the country or the Republican part of the country, it asks for protection; and I am one of those who are in favor of granting the same protection to the industry in Alabama that is granted to the industry in Massachusetts.

Mr. WALSH of Massachusetts. Certainly.

Mr. BORAH. I think the argument of the Senator from Alabama is unanswerable, that if we are going to have protection we must protect his industry; but it leaves us in a position where there is no difference between the Democratic and Republican Parties on the tariff, just the same as there is prac-

tically no difference between the two parties on any other thing except that some are in and some are out.

Mr. STANLEY. Mr. President, if the Senator will pardon me——

Mr. WALSH of Massachusetts. I yield.

Mr. STANLEY. I hope the Senator from Idaho will not conclude that there is no principle left about which an historic party can rally because a few of our friends over here occasionally find their mouths watering when they get too near the fleshpots of Egypt. There are quite a number who have not yet bowed the knee to Baal.

Mr. BORAH. There are quite a number; but I have observed that in a crucial situation there are always enough Senators on the other side of the Chamber to make up for any losses on this side of the Chamber with reference to lowering duties.

Mr. STANLEY. Oh, at the present time I admit that with the Republican Party all wrong, and some of the Democrats occasionally wrong, the country is in a bad fix.

Mr. BORAH. I am willing that it shall be stated as the Senator states it. It is pretty difficult to tell, however, which one of the parties is all wrong at any particular hour.

Mr. STANLEY. Call the roll, and you can tell which side is wrong on the tariff at any particular hour.

Mr. BORAH. I do not know of an industry that needs protection which has not its defenders upon the other side of the Chamber. You believe in protection when it comes home to you, and it is inevitable that it should be so. It is simply a question of the degree of protection; that is all. A lot of us on this side of the Chamber do not believe in raising the wall so high that nothing can be imported. There are some, apparently, who do believe in that, but that is not true Republican doctrine. However, it must be apparent to the Senator that there are a number of articles which are being particularly supported for protection from the other side of the Chamber.

Mr. STANLEY. Peanuts, for instance.

Mr. BORAH. Peanuts, sugar, graphite, long-staple cotton, hides, and so forth.

Mr. STANLEY. Mr. President, I have often wondered how so independent a spirit and so discriminating and sagacious an intellect as that of the transcendently brilliant Senator from Idaho could be reconciled to the monstrosities of this measure on any theory hitherto advocated by free traders, consistent protectionists, who believe in the principle of equalizing the cost of production at home and abroad, or those who believe in a tariff for revenue only. My impression is that the longer the Senator tries, the worse fix he will be in.

Mr. BORAH. I have not reconciled myself to this bill.

Mr. STANLEY. I did not think the Senator had, or would, or could.

Mr. BORAH. I have voted for lowering the duty oftener than a number of Senators upon the other side.

Mr. STANLEY. With all their faults I love them still, on this side.

Mr. BORAH. And they are good Democrats. They are not to be read out of the party at all. They add respectability to the party, and there is no attempt to get rid of them at the caucus, or anything of that kind. The party recognizes them, is glad to see them, and takes their contributions and their help in the campaigns, I have no doubt.

Mr. STANLEY. There are some Democrats on this side who are not orthodox. There are some good and patriotic men of whom I am personally very fond, who are so right on other questions, constitutional questions, for instance, that I am tempted to pardon them for their heterodoxy on the tariff. But the Senator is altogether wrong—he is never consciously unjust—in this generalization that there is no interest in the South which could be aided or fostered by protection that has not its advocates. Between the Gulf of Mexico and the Canadian border, between Cape May and the Golden Gate, there are not on this continent as many different things which could receive more or less protection from duties imposed without regard to their justice or propriety than in the State I have the honor in part to represent, and I have turned a face of flint to every interested appeal from every one of those industries, great or small, for any duty which did not square with the eternal and unalterable faith that is in me, that it is industrially and politically dishonest to use the taxing power of the Government for any other purpose than to produce the revenues essential to maintain it, economically administered. Whenever I have found that a duty would not be productive of any material revenue, but would simply enable some industry to subsist by labor rather than by law, and to become a pensioner upon the Government, subsist by extortion upon consumers rather than by any material addition to the wealth of the community, that enterprise has never received my support, and, so help me God, as long as I stay in this body, it never will.

Mr. BORAH. I think the Senator is a good Democrat.

Mr. STANLEY. I am.

Mr. WALSH of Massachusetts. Mr. President, much that the Senator from Idaho [Mr. BORAH] has said I agree with, but I can not quite agree with the Senator from Idaho in his statement that the only question here is degree of protection. To my mind, there are two other questions involved. Can the industry seeking protection with reasonable tariff duties produce sufficient quantity of the protected product to take care of the American demands, and can it produce it at a reasonable price? To my mind, the difficulty with this bill, the chief underlying trouble with it, is that in bestowing protection there has been no consideration whatever paid to the ability to produce in America a sufficient supply to take care of our consumption or to do it at a reasonable price to the consumers. When we undertook to protect war babies we abandoned the old theory of protecting an infant industry, which was based on the theory that a protecting duty would enable the home industry to supply the needs of the American consumers at a reasonable price. To entitle an industry to protection there should be some evidence at hand to prove that the protected industry can produce economically sufficient quantities to take care of our consumption.

In defending this bill the other day the Senator from New Jersey stated that he did not care how insignificant was the production, if there was an industry here producing very little of the necessary consumption in America, and a competing industry in Germany, where labor was paid less than in America, he believed in giving protection to the industry. Of course, that has never been the Republican theory of protection. It has never been anybody's theory before; and the fatal defect in this bill is that in fixing the rates they have never asked the question, Can this industry ever take care of the American consumption? Can it take care of it and sell to American consumers at a reasonable price? No protective theory is sound, no protective theory will receive the support of the American people, unless it can be shown that the protected industry, with a reasonable tariff duty, can take care of our demands and sell to the consumers at a reasonable and not an exorbitant price. We can not defend a system that penalizes with excessive high prices our people in order to keep alive a few industries that never will be self-supporting without prohibitive tariff duties.

I do not think the Senator from Idaho disagrees with me very much in that theory. I agree with him that the degree of protection is a very important factor, but the extent of the ability to produce enough to take care of our demands is likewise most important. By this bill we are levying exorbitant rates upon commodity after commodity, when it is confessed and admitted that we never can take care of our consumption in America except at outrageous prices collected from our consumers. If an industry is producing 30 or 40 per cent of the demand of the American public and is meeting with serious foreign competition and is likely to be destroyed, and laborers are likely to have their wages reduced or lose their employment, I can sympathize with an argument for protection; but this bill goes away beyond that. That is why the Democratic Party can stand in opposing this bill on the old Republican protective platform.

Every sound theory which the Republican protectionists had in the past has in this bill been abandoned, for item after item has been taken up and a high tariff rate fixed because somebody wanted it—somebody who during the war, when all the products of the world were shut out of America, was able to make money out of a given product. They ask for rates and have received them in this bill to protect their industries, so as to maintain the excessive profits, the abnormal war profits, which they made at the time the American industries were not compelled to compete with any foreign industries. If the Senators in this Chamber do not realize that the American people will not tolerate a continuance of war prices in time of peace, they will find it out in the next election, when this bill will be an issue.

Mr. LENROOT. Mr. President, I would like to ask the Senator if it is his view that the American product can not serve a purpose and that this quantity will still be imported, even though the committee rates be imposed on goods from abroad?

Mr. WALSH of Massachusetts. Will the Senator state his question again?

Mr. LENROOT. Putting it another way, does the Senator think the committee rates will affect the amount of imports?

Mr. WALSH of Massachusetts. I certainly believe that is the purpose in putting the rates in this bill.

Mr. LENROOT. I want the Senator's opinion about it.

Mr. WALSH of Massachusetts. That is my opinion.

Mr. LENROOT. That it would affect them?

Mr. WALSH of Massachusetts. It is my opinion that the rates in this bill will actually shut out necessary and important products which our manufacturers and people need.

Mr. LENROOT. I am speaking of this item.

Mr. WALSH of Massachusetts. Oh, I thought the Senator was speaking of general conditions. No; I do not think it will.

Mr. LENROOT. Then how does the Senator reconcile his view, being in favor of a tariff for revenue, that this commodity should be placed upon the free list? It will produce a very large revenue, the Senator says, under the committee rates.

Mr. WALSH of Massachusetts. I do not agree with the Senator that it will produce a very large revenue. It will produce a very insignificant revenue.

Mr. LENROOT. Fifty per cent ad valorem will produce considerable revenue.

Mr. WALSH of Massachusetts. But there is very little of it imported into this country. It is only a by-product. It is only used in a very limited degree in making these graphite products, so that the only purpose of a duty is to compel the manufacturer of these products to increase the price to the consumers.

Mr. LENROOT. Then is it the Senator's view that any commodity that is not imported in large quantities should be placed on the free list on general principles?

Mr. WALSH of Massachusetts. It is my opinion that anything essential and necessary for the prosperity of our people and the happiness of our people which can not be produced in America in sufficient quantity and at a reasonable price should go on the free list. That is my view.

We have departed very far from the subject under consideration. I do not think I want to continue to read these letters. I have many more of them from reputable concerns, from writers known to myself, who state to me that the graphite imported does not compete with the domestic graphite, and that these rates will be ruinous. Under the circumstances I think it is an outrage to impose so quickly and suddenly such a heavy rate upon this product, a rate, as I pointed out a few minutes ago, which means to one dealer alone in my State an extra cost of $25,000 per annum and to another $45,000.

It seems to me this article ought to be kept upon the free list, and therefore the minority members of the Finance Committee not only oppose the amendment offered by the Senator from Colorado, but will favor the amendment offered by the Senator from Michigan to have graphite put on the free list.

Mr. LENROOT. Mr. President, I wish to say a word concerning the conversion to the doctrine of protection of the junior Senator from Alabama [Mr. HEFLIN]. No one has more frequently denounced the Republican members of the Finance Committee as being the creatures of robber tariff barons of America than the junior Senator from Alabama. He has made his speech upon salt and upon glass sand every day since those items were acted upon by the Senate, and I supposed, of course, when the distinguished Senator rose to address himself to this question that he would not only oppose the amendment offered by the Senator from Colorado, but that he would vigorously oppose the committee amendment imposing a duty upon graphite.

I supposed, of course, that he would call attention to the fact that under the Underwood law graphite is free; that he would call attention to the fact that under the Payne-Aldrich law graphite was free; and that he would allege, in accordance with his custom in regard to other articles, that the Republican members of the Finance Committee, for the benefit of a few mine owners in America, now propose to take the pennies from the school children of America by placing a tax upon the lead that is found in lead pencils. That would be exactly in accord with the arguments the Senator has made in the past.

So you can imagine my amazement when the Senator from Alabama developed his argument, and we find that he not only does not oppose the committee amendment, he not only does not oppose the amendment of the Senator from Colorado, because the rates they propose are too high, but he opposes the committee amendment because the Republican members of the committee, serving the high-protected interests, as he alleges, have not made the tariff on this article high enough, and he favors the amendment proposed by the Senator from Colorado. But, of course, this is all explained when the Senator very frankly admits that there are graphite mines in the State of Alabama.

Mr. President, seriously speaking, I am a Republican and I am a protectionist. I am for protection to the mines of Alabama. I am for protection to every industry in America. But I can not follow the argument of the Senator from Alabama [Mr. HEFLIN] or of the Senator from Montana [Mr. WALSH], who, I assume, is going to vote for the amendment of the Senator from Colorado placing a higher duty than is proposed by the committee, upon the theory, as they put it, that if we are to have the doctrine of protection, as is now settled so far as this Congress is concerned, they are going to stand for protective duties upon the products of their own States. That would be logical if they would likewise stand for protective duties for articles produced in other States, but thus far in the consideration of the tariff bill we find those Senators voting against every duty proposed by the committee and in nearly every case voting to reduce the duties to the same rates found in the Underwood law.

I submit to those Senators that they are perfectly consistent in voting either for the committee amendment or the amendment of the Senator from Colorado, if they believe that is the proper duty, if they will follow the same policy with reference to other articles in the bill. That does not mean following the committee in all cases. I have not followed the committee in all cases. I have protested against some rates. I expect to protest against others unless they are reduced. But I do submit that if Senators are going to apply one principle if the product comes from their own State, it ought to be applied as well to products which are produced in other States.

Mr. President, I only rose to say a word concerning the speech of the Senator from Alabama. I wish we could welcome him to the Republican fold as a protectionist, but I am afraid that we will find our genial friend a protectionist in spots if those spots are in the State of Alabama.

Mr. McCUMBER. Mr. President, I think Senators now will fully appreciate some of the difficulties which have beset the Committee on Finance in dealing with these questions during the last two or three months. We had the same matter before us for about three weeks of discussion before it was finally settled, as most of these matters must be settled, more or less by a compromise of views.

We find here among the ardent protectionists the Senator from Colorado [Mr. NICHOLSON] asking for a protection of about 100 per cent ad valorem. We find the ardent protectionist from the State of Michigan [Mr. TOWNSEND] demanding that the article be placed upon the free list. Here we have a divergence of views upon the Republican side.

We go then to the other side of the Chamber and we find the Senator from Kentucky [Mr. STANLEY] declaring that he would not give a cent of protection to anything in the world, and immediately we hear from the Senator from Alabama [Mr. HEFLIN], who in the twinkling of an eye is metamorphosed from an ardent free trader to a protectionist of the deepest dye. When we have these sudden conversions on the other side of the Chamber and the divergence of views on this side of the Chamber, I think Senators can realize some of the difficulties which have beset our path for the last two or three months while we were discussing this element.

Mr. President, I think it possibly might help us a little out of this babble of argument and the divergent views if I should put into the RECORD, before we vote upon the subject, a few truths at which we can just take a glance without any impassioned oratory on either side, and then vote our convictions.

We have in this paragraph three subdivisions or three different grades of graphite. We have first amorphous, which is free under the present law and free under the Payne-Aldrich law. It is produced in Mexico and in Korea. I do not think there will be any domestic competition with that kind of graphite. I agree entirely with the Senator from Michigan [Mr. TOWNSEND]. This is a tariff for revenue upon that particular commodity and not a tariff for protection, as I view it.

We have levied a duty of 10 per cent ad valorem. I think we will get some revenue out of it, and we need the revenue. I do not think it will add to the cost of lead pencils in the United States to any appreciable degree. In other words, I think the school children will get their lead pencils just about as cheaply after this becomes a law as they are getting them to-day.

Mr. TOWNSEND. Mr. President, may I ask the Senator a question?

Mr. McCUMBER. Certainly.

Mr. TOWNSEND. Did the Senator take this duty into account when fixing a duty on the products of amorphous graphite?

Mr. McCUMBER. Yes; we have given a duty on all of them. Some of them will be slightly competitive, certainly, because, while they are of a different character, the one to a certain extent will displace necessarily the other.

Mr. TOWNSEND. I do not think the Senator understood me. Perhaps I did not make myself clear. We have been talking about a compensatory duty.

Mr. McCUMBER. No; I am not talking about a compensatory duty.

Mr. TOWNSEND. Well, I am. The committee has placed a duty of 10 per cent on amorphous graphite. There are certain manufactures made out of amorphous graphite. The question I asked the Senator is whether he increased the duty on those manufactures because of the duty placed on amorphous graphite?

Mr. McCUMBER. I will not put it in exactly that form. I will say that we have given a duty upon lead pencils which, we think, is sufficient, and that is all that is necessary so far as the manufacturer of lead pencils is concerned.

Mr. STANLEY. Mr. President——

Mr. McCUMBER. I yield to the Senator from Kentucky.

Mr. STANLEY. It appears that this duty on graphite is a duty on lead pencils, because it puts an additional cost on every little school child that uses a lead pencil, and I naturally revolt against levying a duty upon the children at school, their scientific instruments, their school books, or their dear little lead pencils. I am sure the Senator from Michigan will agree that if we take the duty off of graphite it should also go off of lead pencils.

Mr. TOWNSEND. Mr. President——

Mr. McCUMBER. Just a moment, please. Let us see the added cost of the lead pencil by reason of the duty on this kind of graphite. I believe the duty would amount to about one-tenth of 1 cent per pound. One-tenth of 1 cent per pound, the Senator can conclude, would be about how much to the lead pencil—one ten-thousandth of 1 cent, would it be, or one one-millionth of 1 cent? I have not the time to make the computation of the figures just now, but I assume that it will not make one bit of difference in the sale of a lead pencil, whether it is a 10-cent pencil or a 5-cent pencil or a 3-cent pencil.

Mr. NICHOLSON. Mr. President, may I ask the chairman of the Finance Committee a question?

Mr. McCUMBER. I yield.

Mr. NICHOLSON. This graphite enters into the making of pencils. It is practically free when it is given a 10 per cent ad valorem duty, referring now to amorphous graphite, so that at 1 or 1½ cents a pound it would have about two-tenths or three-tenths of a cent duty. Have we placed school children's pencils upon the free list?

Mr. McCUMBER. No; we have given them a duty to protect the American manufacturer, and I have not heard of anybody crying about the cost of a lead pencil.

Mr. NICHOLSON. If it is fair to place the graphite practically on the free list, why is it not fair to place the pencil manufacturer upon the free list? Why make a fish of one and flesh of the other?

Mr. McCUMBER. We are not putting either upon the free list.

Mr. NICHOLSON. They are practically there.

Mr. STANLEY. Mr. President, I was not crying about the school children. It was the Senator from Wisconsin [Mr. LENROOT] who bitterly arraigned the cruel Senator from Alabama [Mr. HEFLIN] for levying this indefensible duty upon the school children.

Mr. McCUMBER. Oh, no; I wish to defend the Senator from Wisconsin. The Senator from Wisconsin simply stated that that was the kind of argument he had expected from the Senator from Alabama, but he did not get it.

Mr. STANLEY. It is the kind we did get from the Senator from Wisconsin. In any event, I would help these dear little ones. I hope the Senator from Michigan [Mr. TOWNSEND] will agree that if they give us free graphite, we will take the duty off of lead pencils—a 45 per cent duty—which is about one-third the value of the pencil, and which will help us very much. Of course, the graphite does not amount to so much, but every little helps these hard times, and I hope the Senator from Michigan will agree to this proposition.

Mr. McCUMBER. Mr. President, I was stating that the Mexican graphite, which is the graphite, and practically the only graphite, as I understand, that is used in the manufacture of pencils, outside of a little that may come from Korea, will in no wise affect the selling price of the graphite produced here and used entirely for different purposes.

We then come to crystalline lump, on which we give a 20 per cent ad valorem duty. There is only one deposit that I know of or that I have heard of in the United States of that particular kind of graphite. That is found in the State of Montana. This duty, while it may not be as high as the producers of Montana might consider necessary for a protective duty, will be a revenue duty and to some extent I think it will be protective, at least sufficient so the industry may continue.

Now, Mr. President, there will be a continued demand for the foreign article. It will come in because the crucible makers believe, at least, that they have to have a proper proportion of the Ceylon admixture where they use the American product, and possibly that is true.

The War Industries Board required them to use at least 20 per cent of the American product during the war in the manufacture of those crucibles. It was found that they could use them, and use them successfully, but they still believed that the foreign product is the better, and I have no doubt that the foreign product will still come in and that we will receive from it a reasonable amount of duty.

We then come to the crystalline flake graphite, upon which we place a duty of 2 cents a pound. That is found in Alabama, in New York, in Pennsylvania, and possibly to some extent in other States. That can be used and has been used without any indication of any of the detriments in the product produced by a use of 20 per cent, at least, of the Alabama product with the other American products. There was a protest by the American manufacturers of crucibles in the first instance, but, after they had used it for a while, they concluded that they could use it, and that for some purposes it was even superior to the imported article. The only question is, are we giving enough protection in order that the Alabama concern may be operated? I believe that while we are not giving a high protection, while the rate is probably rather low, we are, nevertheless, giving a protective duty that will enable them to resume operations, at least as soon as conditions become normal.

The Tariff Commission reports that at the highest peak of prices of labor and wages in the United States it cost about 10 cents a pound to produce the product in Alabama. The present price of the foreign article landed here is 7 cents a pound, including the freight. The foreign price is about 6 cents a pound, and adding 2 cents to the foreign price, including the 1 cent freight, would bring it up to 8 cents. I believe that with lower wages—and they certainly have diminished in Alabama since the high peak—and with the cost of other things going down, including the cost of freight, the extra 2 cents, bringing the price up to 8 cents, will give the American producer a full opportunity to compete with the foreign producer.

I will say frankly that I would be inclined to allow a little higher duty, but this is one of those cases in which we have the conflicting interest of the producer on the one side, the conflicting interest of the manufacturer who uses the article as his raw product on the other, and we also have Senators representing all of these divergent views. Out of all of the complexity we have brought before the Senate what might be considered as fair and reasonable a settlement as we could possibly make.

Mr. HEFLIN. Mr. President, the Senator from Wisconsin [Mr. LENROOT] seems very much amused by the attitude which I have assumed upon the pending question. I have not advocated a high protective tariff for anything, but I believe in a tariff for revenue. Under the provisions of the tariff law now in operation, which I helped to pass through the House of Representatives—the Underwood-Simmons revenue tariff law—there is now being collected between $250,000,000 and $300,000,000 revenue annually. The concerns in this country whose products compete with those which come in from abroad and are on the dutiable list in the present law, of course, derive some benefit and the Government obtains revenue.

The Senator from Massachusetts [Mr. WALSH], if I understood him correctly, has pointed out that in this instance the revenue derived from the duty on graphite provided by the Senate committee would be so small that it would amount to nothing, and that it would require about the amount collected to keep the books and keep track of that which was imported. If that is true, Mr. President, that is an admission on its face that the duty is not a sufficient revenue duty because the Government will not derive any benefit from it. Then how will the infant graphite industry derive any?

Senators on the other side of the Chamber for a long time have boasted that they were the friends of American industry; but here is an infant industry proposed to be stricken down by the hand of foreign concerns which have assumed control of the American market, and Senators on the other side of the Chamber, including the Senator from Wisconsin, are engaged in a movement over there to put graphite on the free list.

Mr. President, if there ever was a time when the Government needed money to help pay the war debt, to relieve our citizens as much as possible from many of their heavy tax burdens, it seems to me that this is the time and that the imposition of a

revenue duty on graphite is more justifiable than the imposition of a duty on any other commodity in the whole catalogue of articles included in the pending bill. This is an industry which sprung up out of necessity during the World War. The Government encouraged it, it used its products; and yet, as soon as the war clouds were gone the foreign producers came in and took charge of the American market, closed the American mines, and turned American labor out of employment. How on earth can any Senator on the other side of the Chamber justify his position in voting to put graphite on the free list?

Senators can not hide behind a screen by suggesting that I have gone over to the theory of protection. They can not get away from the fact, which must stand out before the American people, that it is not the little concern that gets aid at their hands. I have stated before, and I repeat now, that it is the big concern, which is financially strong and politically powerful, to whom Senators on the other side extend protection. It is not the little individual who is struggling, it is not the little man, it is not the average man, but the gigantic industries which are able to write big checks for Republican campaign funds. They come down here and demand at the hands of the Republicans behind closed doors that they tax the American consumers and pay back the campaign money contributed, multiplied over and over many times.

I assert again that here is such an instance. The graphite industry in my State we are told is owned largely by individuals in the East who went down there and spent their money in war times to produce this necessary material needed by the Government in the hour of its peril, and as soon as the war was over and we had won, why, their industry was forced to shut down. The Republican Party has been in power in Congress since March 4, 1919, and yet they have not turned a wheel toward helping that industry; but the great crucible makers of New Jersey, the pet corporate concerns of the home State of my distinguished friend the Senator from New Jersey [Mr. FRELINGHUYSEN], do not want any tax at all on graphite. They want it just as cheap as they can get it; they are the big consumers of it. Here is an industry treated with scorn because we want a proper tax laid that will bring some revenue to the Government and will incidentally aid an American concern that is struggling to live.

The Senator from Wisconsin says that we want to tax the school children, because graphite is used in making pencils. The Senator from North Dakota answered him by saying that this tax would never reach the school child. So a Republican has answered a Republican. I ask the Senator from Wisconsin what is he going to do about putting a tax on lead pencils which are included in this bill—not the graphite, the material out yonder, but little of which will be used in making lead pencils—but what is the Senator going to do about taxing the pencil itself—the finished product—that the school child must use in his work? I have not heard the Senator from Wisconsin speak about that.

Mr. LENROOT. Will the Senator from Alabama yield?

Mr. HEFLIN. I am glad to yield.

Mr. LENROOT. I should like to ask the Senator what he is going to do about the tax on pencils? Is he in favor of putting pencils on the free list?

Mr. HEFLIN. What is the Senator's question?

Mr. LENROOT. I should like to ask the Senator whether he is in favor of putting lead pencils upon the free list?

Mr. HEFLIN. The present tax——

Mr. LENROOT. The question I asked the Senator was whether he was in favor of putting lead pencils on the free list. That is a plain question.

Mr. HEFLIN. I am in favor of the imposition of revenue duties, but the Senator's side favors a high protection for everything which the big man makes and nothing that will aid the common man.

Now, Mr. President, comes the distinguished and genial Senator from Michigan [Mr. TOWNSEND] and wants to put graphite on the free list. He voted the other night to put salt on the tax list. I wish again to read something about the salt industry in the Senator's State, which was said by former Senator Vest, from Missouri, in a speech which was made in this body some 30 years ago. Mr. Vest said:

> It is notorious that two years ago this same Michigan salt association went into the State of West Virginia, bought up the salt springs in the valley of the Kanawha, and closed all except two, and by that means controlled also the production of salt in another State of this Union, and they were enabled to do it by reason of this tariff duty which shut out foreign competition and handicapped the foreign importer to such an extent that it left them in absolute control of the home market.

That is what that association in the State of the Senator from Michigan 30 years ago did with the salt industry of the United States. The great salt association in his State, not content in controlling the price there, went down into West Virginia, buying up competing concerns and holding them in reserve, and reducing the output so that they could absolutely control the price of salt in the United States. In the Underwood law we put salt on the free list. James A. Garfield, the honored martyred President, made a speech in favor of putting salt on the free list. Former Senator Hale, the distinguished father of the present Senator from the State of Maine, made a speech in favor of putting salt on the free list. Senator Vest was speaking in favor of free salt. Now, the Senator from Michigan has voted to tax salt, which everybody uses, 40 cents a sack; and now the Senator comes to-day and generously offers to put graphite on the free list, and but few people buy graphite. A few great big corporate concerns use it, and they do not want it on the revenue list. They do not want any revenue derived for the Government upon it. They do not want those who produce it to be incidentally helped. There you are, Mr. President.

I will tell you some of the things I voted against. Talk about voting for protection. I voted against your tax on millstones. I saw you vote a tax on that yesterday—millstones that grind the people's bread. The Republican Party actually laid a tax on millstones yesterday, Mr. President.

That is not all. I saw you tax medicines. Why, under the reign of the Republican Party your deflation policy robbed the South and the West; you closed industries; you turned labor out of employment; you bankrupted the country merchants and bankers; and now the people are down, struggling to get up again, feeble, indeed, and you put a tax on medicines. You made it hard for them to get sufficient food to keep their bodies strong, you weakened and impaired their physical beings, and you made them sick and put them to bed; the only thing left for them to do was to take medicine, and last night the medicine combine forced you to put a tax on medicine.

There is no escape from the taxgatherers of the Republican Party. You tax everything, from the swaddling clothes of the infant to the winding sheet of the dead. [Laughter.]

I saw you put a tax on potash. I remind you of that again. You have that in this bill, and every farmer in America is interested in that. You increased the price of potash to him, and then you talk about favoring a bill that is a benefit to the common man, the common masses!

I saw you vote to put a tax on cement. I mentioned that the other day, but I will mention it again, to show you how I voted. I voted against every one of these things. Why? Because there was no justification on this earth for putting a tax on cement. More cement is procured in the Senator's [Mr. TOWNSEND's] own State of Michigan than is produced anywhere in the world—4,000,000 barrels in one year, according to my recollection—and we imported only some five or ten thousand barrels of it in a year. I am not absolutely accurate about the figures, but that is my recollection of it. What excuse was there for putting a tax on cement? None on earth. Who profited by that tax? You shut out imports; you put money in the pockets of the Cement Trust; you took it out of the pocket of everybody who buries his dead; you tax them even in the grave. Cement is used in preparing graves for the dead. Cement is used for many purposes about the yard, building walk ways from the gate to the doorstep to enable the people to keep out of the mud. You have made it impossible for them to do that now. Under the reign of the Republican Party you have made them unable to buy shoes, and now you are making them walk barefooted through the mud from the gate to the doorstep by your tax on cement. [Laughter.]

Mr. President, the farmer uses cement to make pig troughs, chicken troughs, hog troughs, cattle troughs, horse troughs, mule troughs, little bridges over the branches and over the creeks, and in constructing the roads that lead from farm to market, as I said the other night.

You did that in the case of cement. What excuse did you have for it? Not any under the sun. That is the reason I fought you in that. There was not any justification in it; and it is a crime for you to tax salt. Think of it! Taking salt off the free list, where the Democratic party put it, and you laid the heavy hand of taxation upon it, and every man who buys a 200-pound sack pays 40 cents of cold coin into the coffers of the Salt Trust of America, the controlling interest of it being in the State of Michigan.

Oh, how generous is the Senator from the State of Michigan! He wants to put on the free list graphite, that his constituents use, some of them in making crucibles about Detroit, and now the Senator wants to put a tax on salt and cement and millstones, and medicines, and potash, and brick, and building stone, and all that; but when we come here to ask Congress to de-

rive some revenue from the products of a mine in America—a mine that is now closed, a mine that must be helped or stay closed, when the Government can derive revenue to help pay the war debt, and these people can be incidentally aided to open their mines and move—we find the proposition opposed by the Senator from Michigan, the Senator from Wisconsin, the Senator from New Jersey——

Mr. FRELINGHUYSEN. Mr. President——

Mr. HEFLIN. The Senator from New Jersey, who got a tax on sand. I see him come in again. He reminds me of that sand storm every time I see him.

The PRESIDING OFFICER (Mr. CAPPER in the chair). Does the Senator from Alabama yield to the Senator from New Jersey?

Mr. HEFLIN. I am glad to yield to the Senator.

Mr. FRELINGHUYSEN. I should like to ask the Senator whether he has made up his mind yet what duty he wants placed upon this industry of his in Alabama?

Mr. HEFLIN. I will let the Senator know. I am in favor of a little higher duty than you have in the committee bill. I think we will get a little more revenue, and incidentally aid those people that you are now permitting to starve down there.

Mr. President, I did not intend to occupy very much of the time of the Senate, but I want to make this position clear: The great necessities of life are being plucked out and taken off of the Democratic free list and put upon the tax list by the Republican Party. We have many items upon our law that tax luxuries that people do not have to pay unless they indulge in the luxuries. We put a tax on some of the luxuries that only those with money to waste would have to pay.

The average man who decided that he did not want to burden himself with the luxury so taxed, could avoid paying that tax; but you put a tax on salt, an everyday necessity, and he can not avoid that. He has to have salt in order to sustain the living, and he must have cement when he buries his dead.

My friend from South Carolina [Mr. DIAL] reminds me that it will take about 2 more bushels of corn for the farmer to buy a sack of salt under the tax bill of the Republican Party.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Georgia?

Mr. HEFLIN. I am glad to yield to my friend from Georgia.

Mr. WATSON of Georgia. I call the Senator's attention to paragraph 1402:

> Boxing gloves, ice and roller skates, and parts thereof, baseballs, footballs, tennis balls, golf balls, and all other balls, of whatever material composed, finished or unfinished, designed for use in physical exercise or in any indoor or outdoor game or sport, and all clubs, rackets, bats, or other equipment, such as is ordinarily used in conjunction therewith in exercise or play, all the foregoing, not specially provided for, 45 per cent ad valorem.

So the Senator will see that the Republican Party is taxing the physical perfection of our people and putting a heavy penalty both on indoor sports and outdoor sports and exercises.

Mr. HEFLIN. Mr. President, I thank my friend from Georgia for bringing that to my attention. I had already referred to the fact that they had made it very hard indeed for the common man, the average man or woman, to get enough to live on. They are frail and weak, thousands of them, under the reign of the Republican Party. We did have a few boys and girls who were going to school, and it was necessary for them to take these exercises for physical development to make them strong young men and women, and now you have laid a tax upon that sport, and you would stop the physical development of the youth of the country in order to put money into the pockets of these big manufacturers in the East who make this stuff, and who are not satisfied with the profits they make in competition with others but who want to use the taxing power of the people to put money in their pockets and increase their fortunes. That is what you are doing.

Why, think of that! The little boy who works and saves to buy himself a little baseball and a glove so that he can go out barefooted on the grass and throw the ball—every time he whirls that sphere it sings as it goes through the air: "Taxed by the Republican Party!" [Laughter.]

Mr. President, I said that you tax them from the cradle to the grave. There is no escape.

Now, to come back to what I was saying a moment ago: I was showing that I have voted against your measures that sought to increase the tax upon the American consumer and to give high protection to some concern that did not need it, and that you could not justify it. I voted to keep these things free that the general public need to buy and must have. My record is clear upon that. I favored putting a tax upon imports, as I stated before. I voted for a bill that has quite a number of items in it that we placed on the revenue list, so it is not anything new for me to advocate a fair tax upon some imports, and especially an import that roots out the home producer, shuts up his business, drives away his labor, and turns over the home market to a foreign concern that digs its product out of the earth with naked slave labor that costs 3 cents a day. It is a scandal against the Republican Party if the trusts of New Jersey can drive you to put graphite on the free list or to put such a small revenue tax upon it that the revenue will not aid the Government, and the graphite owners of America will not even be incidentally helped.

Mr. McCUMBER. I think it quite proper to put another item into the RECORD. I just got a report from the Actuary of the Treasury Department stating that the amount of tax which would be collectible under this particular paragraph was about $384,000. I think that at least is worth saving.

The Senator from Alabama has been giving us salt for our discussion every day since we voted to fix the duty on salt, and possibly it would be interesting to him to know what it is costing and going to cost the American people. I must say, in the first place, that the salt produced along the Atlantic coast usually does not go beyond the Allegheny Mountains, and the only protection, therefore, which the producers of that salt receive is the protection of the few salt wells in northern New York.

That will not affect the salt wells in Michigan or affect the prices in the Chicago market or probably anywhere else in the United States. But I will assume that it affects all of the people in the United States, and that all of them will be taxed the full amount of this duty, and I want the Senator for a moment to stop and calculate what it would mean.

Experts have calculated that in the normal span of life a man will consume about 60 pounds of salt. The 20 cents on 100 pounds, as fixed by the committee on this table salt, would therefore mean a tax of 12 cents on the whole amount of salt a normal human being consumes in a lifetime; and I hope that the average human being will be enabled, during a lifetime, to pay this 12 cents extra duty for the benefit of those who are working these salt mines of New York. I will be glad to contribute my 12 cents.

Now let us look at it from another standpoint. I have an idea that the average human being, taking him from the child to the old man, will shake about a pound of salt upon his food, or have it in his food, during a year. This rate amounts to $4 a ton, and if that individual should have the good luck to live 2,000 years, he would pay that tax of $4.

I think that a tax of $4 every 2,000 years will not seriously affect the daily life of the ordinary individual. But will not the Senator let me give him another statement, because I am not going to say anything more about salt, for I realize this, and I want the Senator from Alabama to realize it, that if he figures what it costs the Government for Congress to remain in session, the Senator will find, if he computes the time he has spent and is spending in discussing salt, that it has cost this country and will cost this country ten times as much as the duty under this tax together with the added cost of living. So I hope we can all drop the salt business long enough to get at other matters connected with the tariff bill.

Mr. HEFLIN. Mr. President, I do not agree at all with the figures that the Senator from North Dakota has suggested, that 12 cents will buy enough salt for a person for a lifetime. I do not know where he got those figures. They were probably furnished by the salt trust, or born in his own very vivid imagination.

Mr. WADSWORTH. Did the Senator get that impression from the Senator from North Dakota?

Mr. HEFLIN. That it would cost 12 cents?

Mr. WADSWORTH. Yes.

Mr. HEFLIN. Yes; I did. There was some confusion in the hall and——

Mr. WADSWORTH. The Senator got it entirely wrong. He was speaking of the tax, not the cost.

Mr. HEFLIN. The tax on salt?

Mr. WADSWORTH. Yes.

Mr. HEFLIN. That the tax would cost him 12 cents in a lifetime?

Mr. McCUMBER. I will state it so that the Senator will understand me thoroughly. Physicians and experts say that the ordinary individual consumes in an average lifetime 60 pounds of salt, and with a rate of duty which amounts to 20 cents on 100 pounds, the tax on the salt consumed in a lifetime would be about 12 cents.

Mr. HEFLIN. Yes; interested experts. Mr. President, these experts who have been down here testifying before the Finance

Committee remind me very much of the fellow who started out to find a position as school-teacher. He went into one community and told them his business, and they said, "What system do you teach, that the earth is round or flat?" He said, "I teach the round system." They said, "We don't believe in that," and he had to move on.

He thought he would accommodate himself to the situation as he found it, so when he got into another community and made known his business, and they said "What system do you teach, round or flat?" he said "Flat." He had quickly changed to meet what he thought was the prevailing situation, but they said, "We don't believe in the flat system. We believe in the round system."

So, having lost his job and having occupied two different positions within a very few hours, he decided he would adopt different tactics, and the next day, when he went to another county, and they said "What system do you teach—that the earth is round or flat?" he said, "That depends altogether on where I am teaching. If they want the round system, I give them that. If they prefer the flat system, why, I give them that." [Laughter.]

That is the way with these experts who come down here. They give whatever the tariff barons desire. Why, Mr. President, the Senator from North Dakota has only mentioned or guessed at the amount of salt eaten or consumed as food by each individual. He does not take into account the vast amount of salt used for other important purposes. Just think of the amount consumed every year by the cattlemen of the West. Salt is used in so many ways. The experts of the tariff barons are trained so as to say nothing that will hurt their cause. So we need a grain of salt with some of their statements. They say the tax on salt would be but 12 cents in a lifetime. If that was all, what right have you to tax me 12 cents for your salt trust in the United States that already controls the market? You admit that it is a tax, but you say it is not a large tax. The principle in this case is wrong.

Mr. WADSWORTH. Do I understand from the Senator it is not wrong to tax graphite?

Mr. HEFLIN. It is not wrong to have a revenue tax upon graphite, and that is what we are asking for.

Mr. WADSWORTH. Oh, I understand.

Mr. HEFLIN. The Senator lives up in a State where they have some of the big consumers of graphite, and therefore he wants it on the free list.

If this thing keeps up over there, if the Republicans decline to put a product upon the revenue list that will put money in the Treasury and aid American mines that have a right to exist; if they tax only those things that hurt the American consumers and benefit the tariff barons, and then turn right around and lay a tax upon the common necessities of life, imposing burdens upon the American consumer in the rank and file out yonder, you can not save the old G. O. P. carcass in November with all the salt in the universe. [Laughter.]

On the one hand, they desert their ancient doctrine, that they will go to the rescue of an infant industry, and in this case they are killing one outright, and they know it. We pointed out to them that this American graphite industry was practically dead, and the American market fed and controlled by a foreign producer. Here stands one of the leaders on the other side, the distinguished Senator from Michigan [Mr. TOWNSEND], advocating putting it upon the free list; and the Senator from New Jersey [Mr. FRELINGHUYSEN], the first part of whose name suggests he would favor a free list, is agreeable to a rate on it that is so low that it would amount to practically nothing and bring in no revenue.

Mr. FRELINGHUYSEN. Mr. President, is the Senator yet ready to answer my question as to what tariff he desires on this industrial plant in his State?

Mr. HEFLIN. I believe the Senator from North Dakota said it cost about 10 cents a pound to get it out of the mines down there, and that you get it abroad for 6 cents; that freight and other charges would run it up to about 8. Then they undersell the producer at the mine, with the actual cost of production, 2 cents a pound, and the Senator from Michigan wants to put it on the free list, and the Senator from North Dakota wants to fix a rate which would make the price of the foreign product just exactly what it costs the miner to get it out at the mouth of the mine in Alabama.

Mr. FRELINGHUYSEN. May I ask the Senator what his conclusion is after his computation?

Mr. HEFLIN. I stated to the Senator at the outset that I am opposed to the rate the committee has adopted. I think it ought to be higher. I do not say that I favor going as high as the Senator from Colorado has gone. I will probably offer an amendment myself, perhaps to come in somewhere between those two. I do not want to ask for more than is necessary, and I do not want to have the graphite producers deceived by whatever you are going to offer. I state, as I stated before, that I am not an expert upon rates, but I am talking about the everlasting principle. How can you stand here and vote to put millstones upon the tax list and vote to tax the people's medicines, and vote to put cement on the tax list, and to put salt upon the tax list, and to put potash upon the tax list, and then turn around and knock graphite in the head simply and solely because the big corporate concerns in the East have told you what to do in the matter? And here you are refusing to raise revenue on thousands of tons of graphite coming into the United States and destroying a home industry.

Mr. WALSH of Montana. Mr. President, I do not rise to advocate either an increase or a decrease in the duty on graphite, but to call attention to some considerations which it seems to me are pertinent to the inquiry that is before us, and to clear up what I conceive to be some misconceptions concerning some features of the question.

I might say in this connection, however, that if the Senator from Wisconsin [Mr. LENROOT] conceives, as I understand him to say, that he expects to find me an advocate of high protective duties with respect to the products of the State of Montana, and the supporter of some other principle with respect to the products of some other State, my votes on this measure will disillusion him.

I might add also that if the Senator from Wisconsin sees no difference between the attitude of a Senator who votes in favor of a duty upon certain products of his State when a bill is to be passed containing high protective duties—although that principle will not govern my action—if he sees no difference between the attitude of the man who votes in favor of a duty upon the products of his State, but who proposes to vote finally against the bill, and a man who votes in favor of a high protective duty upon the products of his State upon an understanding, expressed or implied, that he will also vote for high protective duties which are asked by Senators representing other States, under an agreement also to vote eventually for the bill, I do not think he senses the situation very clearly.

It was charged by the Senator from Nebraska [Mr. HITCHCOCK] a few days ago, or suggested at least, that all the indicia pointed to the conclusion that the tariff bloc had entered into an agreement under which they were to have the support of the other Senators favoring the bill on the agricultural items in the bill, and they would close their eyes and their minds to the iniquities of the other provisions of the bill in order to get what they desired.

Mr. GOODING. Mr. President, will the Senator yield?

Mr. WALSH of Montana. I will yield in just a moment. I do not undertake to say that it is true or that it is false, but the position of the man who puts himself in the attitude of supporting the bill, whatever objections there may be to it, because he gets protective duties upon products of his own State, it seems to me occupies a reprehensible position as a legislator.

I now yield to the Senator from Idaho.

Mr. GOODING. I wish to make a statement in reply to the suggestion of the Senator from Montana that there has been any contract or agreement entered into by the tariff bloc, as he is pleased to call it. That statement is without foundation and without any truth at all. In no particular whatsoever, on any schedule, at any time, have the members of the tariff bloc, as Senators are pleased to call it, entered into any agreement with any member of the Finance Committee, nor have they been asked to my knowledge to support the Finance Committee, so far as that is concerned. I wish to say here and now that the tariff bloc in the Senate, as Senators call them, had to fight for everything they got, not all the members of the Finance Committee, but some of them, and we only got what we did after a hard fight for it and after a complete showing of the need for it, so far as every industry is concerned that we represented. Every member of the tariff bloc, so called, is at liberty to vote as he pleases, so far as that is concerned.

Mr. WALSH of Montana. I have not said a thing against the tariff bloc and have made no charge against anybody. The fact is, however, that the members from the agricultural States have been repeatedly voting for duties here, levying the highest kinds of taxes upon articles of large consumption in their States, duties which some of the Representatives from those States upon the other side of the Chamber consider in the nature of extortion, and yet the members of the so-called tariff bloc come in regularly in large numbers and vote for those duties, leading to the conclusion that they did so upon the understanding that they were to have the duties they asked upon their products.

Mr. GOODING. Mr. President——

Mr. WALSH of Montana. Does the Senator care to say anything about that remark?

Mr. GOODING. Yes; I do.

Mr. WALSH of Montana. Then I yield gladly.

Mr. GOODING. I, myself, and a number of other Senators who belong to the tariff bloc, as it is called, saw a great deal of the work of the Finance Committee. I was there in attendance almost as much as a great many members of the Finance Committee, even after the public hearings were over. I want to say that I never saw men work harder and with more earnestness than they did in the framing of the bill. I saw from four to a dozen experts there every day. I saw the committee almost quarrel over little rates all day long in their efforts to arrive at what were fair and reasonable duties, figuring not from the revenue standpoint but from the protective standpoint of giving protection to labor and to American industry.

So far as I am concerned I have complete confidence in the Finance Committee. Unless I am convinced that the rates are too high, I propose to support them, so far as I am concerned, all the way through. That, however, has never been discussed. Some of the rates I shall not support, however. There are a few for which I shall not vote, perhaps.

I want to repeat that I saw the committee working there all day long, day after day, sometimes far into the night, with a blackboard before them and with the experts there, who did not always agree. The committee, of course, did not always agree. If a record were kept of the votes of the committee, I have no doubt it would show that probably more than half the time they did not agree so far as the rates are concerned—that is, they did not agree unanimously—and yet it is thrown out or intimated from the other side of the Chamber that the bill was framed behind closed doors in the interest of the predatory wealth of the country and that the lobbies were packed with representatives of predatory wealth.

Mr. WALSH of Montana. The Senator has not heard me say anything of the kind.

Mr. GOODING. No; I will not say the Senator has said it; but it has been said on his side of the Chamber.

Mr. WALSH of Montana. It seems to me the remarks of the Senator are rather irrelevant to anything I have been talking about.

Mr. GOODING. I think they were very much to the point.

Mr. WALSH of Montana. However, I am glad to have the contribution of the Senator. I have not been criticizing the Senate Finance Committee very much.

Mr. GOODING. But they have been criticized very much from the Senator's side of the Chamber.

Mr. WALSH of Montana. I do feel like criticizing, however, those Senators who, without inquiring whatever into the conclusions arrived at by the committee and without hearing the debates upon the particular items, come in here regularly and vote with the committee.

Mr. GOODING. I want to say that in my judgment some of the duties are not high enough from the protective standpoint. I do not believe they will give the market in some instances to the American producers or that they will start the mills and factories in this country, because they are not high enough. I have not agreed with Senators that the people will not stand for 400 and 500 per cent protection in order to start an industry. I do not agree with Senators in their refusal to adopt the American valuation plan, because it would mean 400 or 500 per cent protection. I think the American people will stand for any duty to keep alive and going the business concerns of this country which give employment to our laboring men, rather than to turn any of our industries over to some foreign country.

I am a protectionist, and I am for seeing these mills started and for the industries in this country having an opportunity to run full time if there is a market in America for their products.

Mr. WALSH of Montana. Mr. President, I am very glad at all times to yield to my neighbor from the State of Idaho, but his comments have no sort of relation to anything I have been discussing at all. However, now that he has introduced the subject, I take this opportunity to say that the Senator and I differ most radically. My conception of the situation is that the depressed condition of industry in this country to-day is due to the fact that our market abroad has collapsed by reason of the failure of the purchasing power of Europe. I know that to be the case with reference to the two great products of my State, copper and wheat.

Anything I can do to assist the people over in Europe in the way of quieting their disturbed political condition by way of extending them such credits as we can that will enable them again to get into the markets and absorb our products I want to do. Of course, I understand the Senator from Idaho differs with me, but at this time, considering the necessity we have for shipping our surplus products abroad, where they may be absorbed, I do not believe that it is a wise policy to set up a tariff wall so that those people can not sell to us, because if they do not sell to us they can not buy from us. That is, of course, my attitude about the matter, but the Senator's attitude is quite different. He thinks the mills of this country will open up when this tariff bill is passed. I think they will not do so. I think it will close down the industries of the country. I am sure it will retard, at least, the development of the copper interests and I feel confident that it will be injurious to the wheat markets. But that is altogether aside from the matter of graphite, to which I desire to address myself.

The Senator from Massachusetts [Mr. WALSH] read some letters from constituents in his State who are consumers of graphite to the effect that the American product can not take the place of that imported from Ceylon, that it will not fill the requirements for the production of crucibles and other like contrivances used in foundries. That is a disputed proposition upon which the committees of both Houses have heard considerable testimony. I shall not undertake at this time to enter into the controversy further than to call attention to the respective contentions with respect to this matter and the conclusions of our own Government in relation thereto.

We have heard what is said concerning the unavailability of the American product for use in the production of crucibles and in foundry work. Before the Senate Committee on Finance Mr. George A. Sharpe was heard on that subject and testified as follows:

> Mr. Kern said he searched the entire United States in a diligent effort to find a crucible maker who was making crucibles out of American flake graphite, and he could find none.

Mr. Kern was a user of graphite and was desirous of having it retained on the free list. Mr. Sharpe said:

> His search was careless because he overlooked the Electro-Refractories Corporation of Buffalo, N. Y. This concern is making crucibles out of nothing but American flake graphite, mixed with American clay and other American materials; in other words, they are making an all-American crucible. They are selling from 1,500 to 2,000 of these all-American crucibles a month to one of the largest consumers of graphite crucibles in the United States. Instead of getting 26 heats to the crucible, as Mr. Pettinos testified this morning was the limit for a Ceylon crucible, this large consumer is getting an average in carload lots of 85 heats to the crucible.
>
> Senator WATSON. That letter is already in the record?
>
> Mr. SHARPE. Yes. I am simply comparing the number of heats that crucibles made from the American material yields with the number of heats obtained from the use of the Ceylon product which so many of our crucible manufacturers advocate.
>
> Senator WATSON. Is that the only establishment in the United States using the American graphite?
>
> Mr. SHARPE. That is the only one I know of at present.
>
> Senator WATSON. If they can do that, why don't more use it?
>
> Mr. SHARPE. I think they will. This result was obtained by the Electro-Refractories Corporation of Buffalo, N. Y., and is in keeping with and supported by the reports of Doctor Stull, of the Bureau of Mines, in which he says that Alabama flake graphite tops the list for crucible use. If we get the tariff we ask—from 1 cent on crude up to 6 cents on flake—we shall be satisfied. Flake is the particular grade which goes into crucibles, and with our tariff the consumer will get a better and a cheaper crucible.

So, Mr. President, if one should govern his action in this matter upon the assumption that American graphite is unavailable for use in the manufacture of crucibles, he would be proceeding upon an entirely false assumption. Also, if he is of the opinion that there is no competition between the American graphite and the importations from Ceylon, he would likewise in all probability be in error.

But whatever may be the case with respect to the graphite produced in this country, down in Alabama and in New York it is conceded, I think, that the Montana product serves all the purposes of the Ceylon graphite and is the equal of it in every respect. I read from the report of the Tariff Commission, which quotes a report by the Bureau of Mines, as follows:

> There is, however, one deposit in Montana which has lately been producing crystalline graphite that is of the same physical character as the Ceylon material. The quantity ultimately available has not been proved, but is believed by the operators to be sufficient to supply domestic demands for many years to come. Alabama flake is also accepted by certain companies as satisfactory crucible material and has shown even superior results in crucible tests reported by Doctor Stull in the Journal of the American Ceramic Society, March, 1919.

I should like to read that again for the information of the Senator from Massachusetts.

> There is, however, one deposit in Montana which has lately been producing crystalline graphite that is of the same physical character as the Ceylon material. The quantity ultimately available has not been proved, but is believed by the operators to be sufficient to supply domestic demands for many years to come.

I have here, Mr. President, a sample of that graphite, which may be interesting to some of the Senators. This [exhibiting],

as Senators will see, is crystalline in character; it exists in a vein formation. As to the quantity available, I have the following statement from the owners of the property:

STATEMENT OF THE CRYSTAL GRAPHITE CO.

DILLON, MONT.

We have here in Beaverhead County, Mont., eight claims, of 20 acres each, being 600 feet wide and 1,500 feet long, located end to end, making a strip over 2 miles long and 600 feet wide across the mountain. On this strip we have developed sufficient to prove that crystalline graphite extends along the whole length of the claims. The greatest depth we have developed is practically 200 feet, at which depth we find the graphite equally as good but more compact than nearer the surface; so at that depth we are enabled to secure the mineral in a cleaner condition than nearer the surface. However, surface indications, down the mountain at least 1,000 feet below our lowest level, contain graphite, which shows the material extends at least to that depth. How much deeper we can only guess. It is hard to prove the tonnage of graphite on these claims, but under these conditions it must be many hundred thousand tons.

I speak of this, Mr. President, for the purpose of indicating that American graphite may be produced in abundance to supply all the domestic needs of that particular commodity, and that the quality is equal to the best that can be produced anywhere in the world.

We are told that this bill is framed upon the theory that in case any American product by encouragement may be developed so as to supply the domestic needs, and equal in quality to that which shall come from abroad, it should be protected by a duty which will equalize the differences in competition in the markets of the United States.

Mr. President, it is practically conceded that the duty fixed in this bill by the House—10 per cent—is nothing so far as protection is concerned; it is practically conceded that the duties fixed by the Senate Finance Committee amount to nothing so far as protection is concerned.

Mr. NICHOLSON. Will the Senator from Montana yield for a moment?

Mr. WALSH of Montana. I yield to the Senator from Colorado.

Mr. NICHOLSON. Did I understand the Senator from Montana to state that the duties fixed by the House were nothing?

Mr. WALSH of Montana. The House bill imposed a duty of 10 per cent. I said that amounted to practically nothing so far as protection is concerned. Paragraph 211 as the bill came from the House provides:

Graphite or plumbago, crude or refined, not specially provided for, 10 per cent ad valorem.

Mr. NICHOLSON. And the Senate Finance Committee accepted the rate fixed by the other House?

Mr. SMOOT. No. The Senate committee amendment reads:

PAR. 213a. Graphite or plumbago, crude or refined: Amorphous, 10 per cent ad valorem; crystalline lump, chip, or dust, 20 per cent ad valorem; crystalline flake, 2 cents per pound—

And so forth.

Mr. WALSH of Montana. On amorphous graphite the Senate committee rate is the same as the House rate, 10 per cent ad valorem; but on crystalline lump, chip, or dust the Senate committee rate is 20 per cent ad valorem, and on crystalline flake 2 cents per pound.

Mr. MYERS. Mr. President, I should like to ask my colleague a question, as he evidently has given the subject considerable attention. What is the principal kind of graphite produced in this country? Is it crystalline or amorphous?

Mr. WALSH of Montana. The principal production is amorphous. I can give the Senator the figures.

Mr. MYERS. There is more of amorphous than crystalline graphite produced in this country?

Mr. WALSH of Montana. Yes.

Mr. President, I call attention to this matter for the purpose of showing that the principle upon which this bill is framed, as we are told, is not applied to this particular commodity. Of course, this commodity goes into the manufacture of crucibles, and crucibles are used in all manner of foundry work, and particularly in the manufacture of steel products. The Montana producers were able to operate with a fair degree of profit during the war when prices mounted to something like $200 a ton. Their shipments were all made to Pittsburgh, the center of the steel-manufacturing industry, and presumably were consumed very largely, if not altogether, in that industry.

There is, Mr. President, a question of policy here as to whether it would be wiser to burden the manufacturers of steel and other products in the production of which graphite is necessary, and thus possibly cripple our manufacturers of steel in their contest with producers from other countries in the markets of the world, and allow the graphite deposits of this country to go undeveloped for the present, or whether it would be the wiser policy to impose this burden upon the manufacturers of steel and other manufactures in which graphite is employed, and thus contribute to the development of the graphite industry in this country. In other words, for the purpose of illustration, it is a question of which is relatively the more important—the development of the graphite industry upon the one side or the production at a low cost of steel on the other? Apparently the committee believed that it was in the public interest to relieve the steel manufacturers from the burden of this added cost rather than to contribute to the development of the graphite industry.

But there is a provision in this bill to which I addressed myself some time ago, section 315, to the effect that whenever the President of the United States shall find that the duty provided for in the bill does not equalize the differences in competition in trade as between the domestic article and the foreign article in the markets of the United States he shall, within the limit of 50 per cent, fix the duty at such an amount as will equalize the differences. So that in the case of this particular commodity it would be the duty of the President of the United States, immediately upon the bill going into effect, to raise the duty on graphite 50 per cent above the rate fixed by the bill, and thus to develop the graphite industry. In other words, the President is called upon by the bill to pursue a policy at variance with the policy which is adopted by the Finance Committee and which will receive the approbation of the Congress if the bill is eventually passed.

To show that this duty will be nothing, I read further from the statement given to me by the Montana producers of graphite:

Domestic cost of production with us during the war ran as high as 11 to 11½ cents per pound. With the reduced cost of living and reduced cost of labor, which we anticipate, we believe we can produce our material for 8 to 8½ cents per pound.

So it will be observed that even with the 2 cents duty provided by the bill, the 8½ cents limit to which they expect to reduce the cost can not be reached, not to speak at all about the cost of transportation from Dillon, Mont., to Pittsburgh, Pa. So I point out that this is not a protective rate. It can not be said to equalize the differences in competition in this particular article in the markets of the United States.

Frankly, Mr. President, it is perfectly obvious that the Senate Finance Committee concluded that it would be better not to burden the steel interests with this added cost of production of their particular commodity. That policy was manifested not alone in connection with graphite, but, as I called to the attention of the Senate the other day, the same policy was observed with reference to manganese, another important product of my State, which was put upon the free list. It enters into the production of steel. So with magnesite. That commodity is on the dutiable list, but with practically only a revenue duty imposed upon it. It also enters into the production of steel. The same statement applies to chrome, another valuable mineral, a product of the Western States, of which my State can supply unlimited quantities, and which likewise is used in the production of steel.

The fact about the matter is that this bill is framed as all similar tariff bills are framed. It is a question of which particular interest will be able to bring the greatest amount of influence and pressure to bear upon those who control the making of it. Take this particular product, consumed very largely by the Dixon Crucible Co., whose headquarters are in the State of New Jersey. My esteemed friend, the Senator from New Jersey [Mr. FRELINGHUYSEN], wants graphite on the free list, or he wants the duty on it to be practically negligible. So my esteemed friend from Massachusetts [Mr. WALSH], who represents the consumers of that State, wants it upon the free list or to have an inconsequential or insignificant rate of duty.

Mr. WALSH of Massachusetts. Mr. President——

Mr. WALSH of Montana. I yield.

Mr. WALSH of Massachusetts. I think I ought to state to the Senator that I am in favor of placing graphite on the free list not because there happen to be users of the commodity in Massachusetts. If they were in New York or Pennsylvania, I would take the same position.

Mr. WALSH of Montana. I appreciate that; the Senator's position upon this question is practically my own. His attention was called to this question by reason of the fact that graphite is consumed in his State.

Mr. WALSH of Massachusetts. Exactly.

Mr. WALSH of Montana. That was all; that is how he happened to learn about it. If it were not consumed in his State, and he learned about it in some other way, I am sure he would take exactly the same attitude with respect to it. However, the point I am making is that the announcement that this bill is framed upon the theory of equalizing the differences in the cost of production or differences in competition in trade in the markets of the United States between the foreign producer and the American producer is entirely refuted by this par-

ticular commodity, as well as by others to which I have called attention, all of which are the products of the Western States.

The PRESIDING OFFICER (Mr. LADD in the chair). The question is on the amendment offered by the Senator from Colorado to the amendment of the committee.

Mr. MYERS. I ask that the amendment be stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 37, line 10, it is proposed to amend the committee amendment after the word "amorphous" and the comma by striking out "10 per cent ad valorem" and inserting in lieu thereof "1 cent per pound."

Mr. NICHOLSON. On that I ask for the yeas and nays; and meanwhile I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gooding	McNary	Simmons
Ball	Harris	Moses	Smith
Brandegee	Harrison	Myers	Smoot
Bursum	Heflin	Newberry	Spencer
Calder	Johnson	Nicholson	Sutherland
Capper	Jones, N. Mex.	Norris	Townsend
Caraway	Jones, Wash.	Oddie	Underwood
Curtis	Kellogg	Page	Wadsworth
Dial	Kendrick	Phipps	Walsh, Mass.
Dillingham	Ladd	Pittman	Walsh, Mont.
Edge	La Follette	Poindexter	Warren
Elkins	Lenroot	Ransdell	Watson, Ga.
Ernst	Lodge	Rawson	Williams
France	McCumber	Robinson	
Gerry	McKinley	Sheppard	
Glass	McLean	Shortridge	

The PRESIDING OFFICER. Sixty-one Senators having answered to their names, a quorum is present. The question is on the amendment proposed by the Senator from Colorado [Mr. NICHOLSON] to the amendment of the committee.

Mr. MYERS. I ask that the amendment be stated again.

The Assistant Secretary restated the amendment to the amendment.

Mr. NICHOLSON. I ask for a roll call.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Transferring my pair with the Senator from Florida [Mr. TRAMMELL] to the Senator from Pennsylvania [Mr. CROW], I vote "nay."

Mr. EDGE (when his name was called). I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Pennsylvania [Mr. PEPPER], and will vote. I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as on the previous vote as to the transfer of my pair, I vote "yea."

Mr. KENDRICK (when his name was called). Having a general pair with the senior Senator from Illinois [Mr. MCCORMICK], and being unable to secure a transfer, I am compelled to withhold my vote. If at liberty to vote, I should vote "yea."

Mr. MOSES (when Mr. KEYES's name was called). I wish to announce the absence of my colleague [Mr. KEYES] from the Senate to-day on account of illness. If he were present, he would vote "nay" on this question.

Mr. WATSON of Georgia (when his name was called). I transfer my general pair with the Senator from Arizona [Mr. CAMERON] to the Senator from Nebraska [Mr. HITCHCOCK], and will vote. I vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Indiana [Mr. WATSON] to the Senator from Texas [Mr. CULBERSON], and will vote. I vote "nay."

The roll call was concluded.

Mr. CURTIS. I was requested to announce the absence of the junior Senator from Pennsylvania [Mr. PEPPER] on official business. I also desire to announce the absence of the junior Senator from Ohio [Mr. WILLIS] and the senior Senator from Ohio [Mr. POMERENE]. They are paired on this question and all others.

Mr. WARREN (after having voted in the negative). Has the junior Senator from North Carolina [Mr. OVERMAN] voted?

The PRESIDING OFFICER. He has not voted.

Mr. WARREN. I have a standing pair with that Senator. I transfer the pair to the junior Senator from Oregon [Mr. STANFIELD], and allow my vote to stand.

Mr. MCCUMBER. I have a general pair with the junior Senator from Utah [Mr. KING]. In his absence I transfer that pair to the Senator from Maryland [Mr. WELLER], and vote "nay."

The result was announced—yeas 22, nays 47, as follows:

YEAS—22.

Broussard	Gooding	McKinley	Shortridge
Bursum	Heflin	McNary	Sterling
Capper	Johnson	Nicholson	Wadsworth
Caraway	Jones, N. Mex.	Oddie	Warren
Elkins	Jones, Wash.	Phipps	
Ernst	Ladd	Poindexter	

NAYS—47.

Ashurst	Gerry	Myers	Smoot
Ball	Glass	Nelson	Spencer
Brandegee	Hale	Newberry	Stanley
Calder	Harris	Norris	Sutherland
Colt	Harrison	Page	Swanson
Curtis	Kellogg	Pittman	Townsend
Dial	La Follette	Ransdell	Underwood
Dillingham	Lenroot	Rawson	Walsh, Mass.
Edge	Lodge	Robinson	Walsh, Mont.
Fletcher	McCumber	Sheppard	Watson, Ga.
France	McLean	Simmons	Williams
Frelinghuysen	Moses	Smith	

NOT VOTING—27.

Borah	Harreld	New	Shields
Cameron	Hitchcock	Norbeck	Stanfield
Crow	Kendrick	Overman	Trammell
Culberson	Keyes	Owen	Watson, Ind.
Cummins	King	Pepper	Weller
du Pont	McCormick	Pomerene	Willis
Fernald	McKellar	Reed	

So Mr. NICHOLSON's amendment to the committee amendment was rejected.

Mr. HEFLIN. If I may, I would like to offer an amendment to make the rate one-half cent a pound.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The ASSISTANT SECRETARY. The Senator from Alabama proposes to strike out "10 per cent ad valorem" and to insert "one-half of 1 cent per pound."

Mr. ROBINSON. I would like to ask the Senator a question in regard to his amendment to the amendment. What would be the ad valorem equivalent?

Mr. HEFLIN. About 33⅓ per cent, probably. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before, I vote "nay."

Mr. EDGE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as on the previous vote, I vote "yea."

Mr. KENDRICK (when his name was called). Making the same announcement as to the unavoidable absence of my pair, I withhold my vote. If permitted to vote, I would vote "yea."

Mr. MOSES (when Mr. KEYES's name was called). I am authorized to state that if my colleague [Mr. KEYES], who is absent on account of illness, were present, he would vote "nay" on this amendment to the amendment.

Mr. MCKINLEY (when his name was called). I have a permanent pair with the junior Senator from Arkansas [Mr. CARAWAY], which I transfer to the junior Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. WARREN (when his name was called). Making the same announcement as before with regard to my pair and its transfer, I vote "nay."

Mr. WATSON of Georgia (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WILLIAMS (when his name was called). Repeating the announcement made by me a moment ago concerning my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 20, nays 47, as follows:

YEAS—20.

Ashurst	Gooding	Ladd	Pittman
Broussard	Heflin	McNary	Robinson
Bursum	Johnson	Nicholson	Sheppard
Capper	Jones, N. Mex.	Oddie	Shortridge
Elkins	Jones, Wash.	Phipps	Wadsworth

NAYS—47.

Ball	Edge	Harris	McKinley
Brandegee	Ernst	Harrison	McLean
Calder	Fletcher	Kellogg	Moses
Colt	France	La Follette	Myers
Curtis	Frelinghuysen	Lenroot	Nelson
Dial	Glass	Lodge	Newberry
Dillingham	Hale	McCumber	Norris

Page	Smith	Sutherland	Walsh, Mont.
Poindexter	Smoot	Swanson	Warren
Ransdell	Spencer	Townsend	Watson, Ga.
Rawson	Stanley	Underwood	Williams
Simmons	Sterling	Walsh, Mass.	

NOT VOTING—29.

Borah	Gerry	New	Stanfield
Cameron	Harreld	Norbeck	Trammell
Caraway	Hitchcock	Overman	Watson, Ind.
Crow	Kendrick	Owen	Weller
Culberson	Keyes	Pepper	Willis
Cummins	King	Pomerene	
du Pont	McCormick	Reed	
Fernald	McKellar	Shields	

So Mr. HEFLIN's amendment to the committee amendment was rejected.

Mr. BURSUM. Mr. President, I desire to offer an amendment in regard to the first item in the paragraph. I submit that we ought to give some measure of protection to this industry. There is no reason why a sufficient quantity of graphite to entirely satisfy and fulfill all the demands of the country should not be produced by Americans.

We should give the producers of graphite a little encouragement. If protection means anything, if the fixing of these rates of duty means anything, it means equalizing the difference between the cost of production here and the price for which the foreign article can be bought. It is immaterial as to what the percentage is. It may be 5 per cent, or it may be 300 per cent, but if that principle is right we ought to extend it all over this country, whether it be the East, the North, the West, or the South. If it is right to protect industries in one part of the country, it is right and proper to protect them in another portion of the country. The American wage earner, the laborer, in the State of Montana or the State of California or the State of Texas is just as much in need of that protection and entitled to it as the laborer in the State of Maine, or the State of Massachusetts, or the State of Alabama, or any other State.

Possibly the rates which were proposed were a little high. The rate proposed by the committee in the first portion of the paragraph is nothing more nor less than a revenue rate. It follows the Democratic policy, pure and simple. I would like to see these schedules adopted on the basis of protection to American producers and American labor.

I move to amend the first item in the paragraph by inserting one-fourth of 1 cent a pound. That will mean $5 a ton. It will mean $4 a ton on the basis of 80 per cent ores coming from Colorado. Those ores have been bringing $9 net. That will mean approximately a little better than 40 per cent protection. I believe it would greatly encourage production if we adopted this amendment to the amendment.

The VICE PRESIDENT. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On line 10, page 37, strike out "10" and insert in lieu thereof "one-fourth of 1 cent a pound," so that it will read:

Amorphous, one-fourth of 1 cent per pound.

Mr. JONES of New Mexico. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as before, I vote "yea."

Mr. KENDRICK (when his name was called). I again announce the absence of my pair, the Senator from Illinois [Mr. MCCORMICK]. Being unable to obtain a transfer, I withhold my vote.

Mr. MOSES (when Mr. KEYES's name was called). I again announce that my colleague [Mr. KEYES] is absent on account of illness. If present he would vote "nay."

Mr. MCKINLEY (when his name was called). I transfer my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from Pennsylvania [Mr. PEPPER], and vote "nay."

Mr. WATSON of Georgia (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WILLIAMS (when his name was called). Repeating the announcement previously made as to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I wish to announce that the junior Senator from Indiana [Mr. NEW] is paired with the junior Senator from Tennessee [Mr. MCKELLAR], and that the junior Senator from Ohio [Mr. WILLIS] is paired with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 23, nays 46, as follows:

YEAS—23.

Ashurst	Gooding	McNary	Rawson
Borah	Heflin	Nicholson	Sheppard
Broussard	Johnson	Oddie	Shortridge
Bursum	Jones, N. Mex.	Phipps	Sterling
Capper	Jones, Wash.	Pittman	Wadsworth
Elkins	Ladd	Poindexter	

NAYS—46.

Ball	Hale	Nelson	Stanley
Brandegee	Harris	Newberry	Sutherland
Calder	Harrison	Norris	Swanson
Colt	Kellogg	Overman	Townsend
Curtis	La Follette	Page	Underwood
Dial	Lenroot	Ransdell	Walsh, Mass.
Dillingham	Lodge	Robinson	Walsh, Mont.
Ernst	McCumber	Shields	Warren
Fletcher	McKinley	Simmons	Watson, Ga.
France	McLean	Smith	Williams
Frelinghuysen	Moses	Smoot	
Glass	Myers	Spencer	

NOT VOTING—27.

Cameron	Fernald	McCormick	Reed
Caraway	Gerry	McKellar	Stanfield
Crow	Harreld	New	Trammell
Culberson	Hitchcock	Norbeck	Watson, Ind.
Cummins	Kendrick	Owen	Weller
du Pont	Keyes	Pepper	Willis
Edge	King	Pomerene	

So Mr. BURSUM's amendment to the committee amendment was rejected.

Mr. TOWNSEND. Mr. President, I desire now to offer the amendment which I gave notice I would offer, namely, on page 27, line 10, to strike out the words "amorphous, 10 per cent ad valorem," my argument being that this is not a protective duty. The product could not be protected by any duty as the article which is brought in and used here is not produced in the United States.

Mr. WALSH of Montana. Mr. President, I thought I had demonstrated the error of that conclusion, but if the Senator from Michigan finds it necessary to insist upon his proposition, I shall perhaps be obliged to go over the argument again.

Mr. TOWNSEND. The Senator from Michigan heard the Senator from Montana and listened very attentively to his argument. Unless the Senator from Montana has something new to present in reference to the matter, it is not necessary that he should repeat his statement. My own investigation has led me to believe to the contrary of his view of the facts as they exist with reference to the use of this product in the concern where it is manufactured.

I have no doubt that is the opinion of the Senator. I have my own opinion with reference to the matter and I am a protectionist. There is no reason in the world why I should not favor a duty upon this product.

However, if it is true, as the Senator from Utah [Mr. SMOOT] just suggests to me, that if my amendment is agreed to this item will go into the so-called basket clause of the tariff bill and thus will carry a heavier rate, I do not want to do that. I am advocating a removal of the duty entirely because this is purely a revenue duty and not a protective duty.

Mr. SMOOT. The only way to do that is to wait until the committee amendments are disposed of, and then, when the bill gets into the Senate, the Senator can move to strike out the item and put it on the free list.

Mr. TOWNSEND. I am perfectly willing to follow that course.

Mr. SMOOT. That is the course we have followed with reference to other items.

Mr. TOWNSEND. Very well. Then I withdraw the amendment at this time.

The VICE PRESIDENT. The amendment offered by the Senator from Michigan is withdrawn.

Mr. WALSH of Montana. Mr. President, I rose simply to say that the vote on this item should not be taken upon the assumption on the part of anyone that it was on the theory that there was no American product which came into competition with amorphous crystalline flakes. I understood the Senator from Michigan to say it is conceded that this article is not produced in this country, and therefore we need no protection. I do not want to combat the rate at all, but I do not want anyone to vote on the matter on the particular assumption that it is conceded or that it is the fact. I want it understood that the commodity as produced in this country is equal to any foreign product and it is as much entitled to protection, if we are to legislate upon that principle, as any other item in the bill. The rate which is proposed here is purely a revenue rate, because it affords no protection whatever of any kind.

Mr. GOODING. Mr. President, graphite is not the only item in this bill which, it is said, we can not produce in this country;

that proposition runs to many items, and there are those who believe we can not produce sugar successfully in this country. If there be a class of citizens in this country who I think are less American than any other class, it is those who go abroad and develop a foreign industry of any kind, and employ the cheapest labor they can find in all the world, and then want to bring that product back into America, free of duty, and sell it to the American people. Of course, the cheaper the labor the greater the profits. It is far better for them, of course, to develop foreign industries with cheap labor, so far as dollars and cents are concerned.

I want to say, in my judgment, we have just as good graphite in this country as there is any place in the world. I heard a witness say before the Finance Committee that we could not grow Belgian hare for fur because the fur grown in this country would not felt. The trouble was because he could buy it so much cheaper abroad, where labor costs practically nothing at all. It would be a mistaken policy, of course, so far as his selfish interests are concerned, to encourage the industry in this country. That policy runs all the way through in a great many different lines, if you please; the sugar we grow in this country is not quite so sweet, in the estimation of some people, as the sugar that is grown in Cuba, for instance, with the cheap native labor, and in many cases coolie labor sent to the island under contract from China.

I am very glad to see some of the Senators across the aisle voting for protection. I hope the time will come when there will be no division in this body on the great principle of protection, so that every American industry, so far as that is concerned, will be treated fairly, whether it is located in the East, in the West, in the North, or in the South. That is not true to-day. I know it never will be true until the people of the South come back where they stood 100 years ago and again stand for protection. In my judgment they are coming back. It may not be in my lifetime, but the time is coming when this great American people, the most intelligent people in all the world, are not going to permit any political party to make a football of the business interests of the country and kick them around as is being done at this time, and for practically 100 years past. I do not believe it is going to take another 100 years to settle that question. There is too much intelligence in the American people to permit that.

Speaking for myself, Mr. President, I want to say that I have no fault to find with the attitude of the Democratic Party in their opposition to the protective tariff measure that is now before the Senate. I believe it is the duty of every Senator and of every political party when they believe that a measure is unconstitutional and morally wrong to fight that measure to the last ditch. The Senator from Alabama [Mr. UNDERWOOD], the minority leader of the Democratic Party, whom I believe to be the greatest leader the Democratic Party has had in the Senate for more than half a century, has made it very clear that the Senators on that side, with three exceptions, are opposed to protection. The Senator from Alabama says he belongs to that school which believes that protection is unconstitutional, and he goes further and says that he believes protection is morally wrong.

As far as I am concerned, I am going to discuss this tariff bill, Mr. President, from the standpoint that protection is constitutional and morally right, and that it is un-American to force American industries and American labor to compete with the pauper labor of foreign countries.

The Senator from Alabama says protection is a tax on the American people. If it is, Mr. President, it is a tax that the American people will not do without and, in my judgment, can not do without.

The Democratic Party might as well understand first as last that the laboring men of this country will not be forced to compete with the cheap labor of Europe, which only means a reduction to their standards of living and their standards of wages.

We have already heard much about the breakfast table and the poor laboring man, but I want to say, Mr. President, that the party that votes to put the products of labor, whether it is on the farm, in the mills, or in the mine, in competition with the cheap labor of foreign countries is not the friend of labor, and the laboring men of this country are beginning to find that out. To close our ports to foreign immigration and at the same time open them to the products of foreign labor is nothing less than a crime, and one that would only work hardships and privations on the American people, the same as the free trade policy has always done when free trade laws have been in force in this country.

Every government, Mr. President, must levy a tax to defray expenses. The Republican Party believes that in levying a duty on foreign imports it should be levied first for protection, second for revenue, and every loyal citizen of every country should be willing to pay his share of taxes to maintain his government.

And here in America, Mr. President, we tax our citizens, and more especially our laboring men, less than any other country on earth. No one need shed any tears about the taxes the American laboring man has to pay on foreign imports, for they are far less than that paid by the laboring men of any other country.

I wish to read the taxes that are levied by various countries per capita on imports. In the United States in 1912 the receipts from customs were $311,321,672. The population at that time was 95,097,000. The per capita tax on imports was $3.20; in 1913 it was $3.30; in 1921 it is $2.76. It is estimated by the Finance Committee that the pending bill will raise a revenue for 1922 of $350,000,000, which will represent a per capita tax levied on imports of $3.31.

The United Kingdom levied a tax on imports in 1914 of $4.23 per capita; in 1922 of $14.78 per capita.

Canada in 1914 levied a per capita tax on imports of $14.57, and in 1922 of $11.90.

France levied a per capita tax on imports in 1913 of $3.61, and in 1921 of $8.69.

Germany in 1913 levied a per capita tax on imports of $13.02, and in 1922 a per capita tax of $16.89

Italy in 1913 levied a per capita tax on imports of $1.90, and in 1922 a per capita tax of $1.46.

Argentine in 1914 levied a per capita tax on imports of $10.76, and in 1920 of $7.83.

Brazil in 1913 levied a per capita tax on imports of $2.32, and in 1920 of $1.74.

Chile in 1913 levied a per capita tax on imports of $12.62, and in 1920 of $13.53.

Mr. President, I ask that the table from which I have quoted may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The table referred to is as follows:

Per capita customs receipts from imports.

Country.	Year.	Receipts.	Population.	Per capita receipts.
United States	1912	$311,321,672	95,097,000	$3.20
Do	1913	318,891,393	96,512,000	3.30
Do	1921	292,397,349	105,710,620	2.76
McCumber bill	1922	350,000,000	105,710,620	3.31
United Kingdom	1914	172,839,003	40,830,000	4.23
Do	1922	632,052,720	42,767,530	14.78
Canada	1914	105,000,000	7,206,643	14.57
Do	1922	104,420,451	8,769,489	11.90
France	1913	143,018,211	39,601,509	3.61
Do	1921	360,880,770	41,500,000	8.69
Germany	1913	882,795,932	67,812,000	13.02
Do	1922	1,047,200,000	62,000,000	16.89
Italy	1913	67,121,347	35,236,997	1.90
Do	1921	54,198,638	37,270,493	1.46
Argentine	1914	84,447,105	7,849,385	10.76
Do	1920	70,526,398	9,000,000	7.83
Brazil	1913	57,481,940	24,300,000	2.32
Do	1920	53,915,400	31,000,000	1.74
Chile	1913	45,353,573	3,593,005	12.62
Do	1920	52,377,367	3,870,023	13.53

Fiscal year of United Kingdom, Canada, and Germany ends March 31.
All receipts converted into American money at par.
Receipts for Germany 1922 estimated.
Receipts for Italy 1921 estimated.
Data obtained for Bureau of Foreign and Domestic Commerce.

Mr. GOODING. I now desire to make a comparison of the duties which are levied in Canada on farm products and the duties which are proposed to be levied on such products under the bill as reported by the Finance Committee.

Under the tariff law of Canada the tax levied on live hogs is a cent and a half a pound, while under the bill as reported by the Finance Committee the tax is one-half cent a pound. On fresh meats in Canada the tax is 23 cents a pound, while it is from three-fourths of a cent to 5 cents a pound in the bill as reported by the Finance Committee.

On meats, canned, in Canada the tax is 7½ cents a pound; on lard and compounds it is 2 cents a pound in Canada and only 1 cent a pound under the bill as reported by the Finance Committee. On tallow there is a duty of 20 per cent ad valorem imposed in Canada, while the duty is only one-half cent a pound in the bill as reported by the Finance Committee.

On eggs in Canada there is a duty of 3 cents per dozen imposed, while the bill as reported by the Finance Committee imposes a duty of 8 cents per dozen. On cheese in Canada there is imposed a duty of 3 cents a pound, while a duty of 5 cents a

pound is imposed by the bill as reported by the Finance Committee. On butter a duty of 4 cents a pound is imposed in Canada, while 8 cents a pound is imposed by the bill as reported by the Finance Committee. On coffee the duty is 5 cents a pound in Canada, while it is on the free list in this country.

Coffee is an article that goes on the breakfast table, Mr. President, about which we have heard so much. I repeat, in Canada there is a duty of 5 cents a pound on coffee, while coffee is on the free list in this country under the pending bill.

On coffee, when not imported directly from country of growth, there is a duty per pound of 5 cents plus 10 per cent ad valorem under the Canadian law, while it is free in the bill reported by the committee.

On coffee, green, there is a duty of 3 cents a pound in Canada, while it is on the free list under the pending bill. Tea has a duty of 10 cents a pound in Canada, while it is free under the pending bill.

Rice, tapioca, and sago flour have a duty of 1 cent a pound in Canada, and only half a cent in the bill as reported by the Finance Committee.

Condensed milk has a duty of 3¾ cents per pound in Canada, while it only has a duty of 1 cent in the bill as reported by the Finance Committee.

Beans have a duty of 35 cents a bushel in Canada, while here there is a duty of $1.20 imposed in the bill as reported by the Finance Committee.

On peas there is a duty of 15 cents a bushel in Canada, and a duty of 56 cents under the pending bill. On buckwheat there is a duty in Canada of 15 cents, while there is a duty of 5 cents a bushel under the pending bill.

On buckwheat flour there is a duty of 50 cents per 100 pounds in Canada, and 50 cents per 100 pounds under the pending bill.

Corn meal has a duty of 25 cents a barrel in Canada, and 30 cents a hundred pounds under the bill as reported by the Finance Committee.

Oats has a duty of 10 cents a bushel imposed in Canada, and of 15 cents a bushel under the bill as reported by the Finance Committee.

Oatmeal has a duty of 60 cents per hundred imposed on it in Canada, while the rate is 90 cents a hundred in the bill as reported by the committee.

Rye has a duty of 10 cents a bushel imposed in Canada, while the duty is 15 cents a bushel in the bill as reported by the Finance Committee.

Rice, cleaned, has a duty of 75 cents a hundred imposed on it in Canada, while a duty of three-eighths of a cent a pound is imposed on it under the bill as reported by the committee.

Sago and tapioca have a duty of 27½ per cent in Canada, while on tapioca there is a duty of one-half cent a pound imposed under the bill as reported by the committee.

On hay and straw there is a duty of $2 per ton imposed in Canada, while on hay a duty of $4 a ton and on straw a duty of $3.50 a ton are imposed under the bill as reported by the Finance Committee.

Flaxseed has a duty of 10 cents a bushel imposed on it Canada, and a duty of 40 cents a bushel imposed under the bill as reported by the committee.

So, taking the greater necessities of life, there is no question, so far as the breakfast table and the dinner table and the supper table are concerned, that the Canadian citizen pays twice the tax that the American citizen pays.

The duty on farm machinery is from 15 to 20 per cent in Canada, while it is free under the bill as reported by the Finance Committee. The duty on typewriters is 25 per cent ad valorem in Canada, while they are free in America. The duty on sewing machines is 30 per cent in Canada, while it is from 25 to 40 per cent ad valorem in this country. Woolen yarns have a duty of 30 per cent ad valorem in Canada and from 30 to 40 per cent ad valorem in this country under the bill as reported by the Finance Committee. Woolen blankets have a duty of 35 per cent ad valorem in Canada and from 30 to 40 per cent ad valorem under the bill as reported by the Finance Committee.

Boots and shoes have a duty of 30 per cent ad valorem in Canada and an ad valorem duty of not over 10 cents under the pending bill. Harness and saddles have a duty of 30 per cent in Canada, while they have a duty of 35 per cent under the bill as reported by the committee.

Mr. President, I ask that this table which I am quoting may be published in the RECORD entire.

The VICE PRESIDENT. In the absence of objection, it is so ordered.

The table referred to is as follows:

Tariff of the Dominion of Canada.

Commodity.	Unit.	Canadian tariff.	Finance Committee.
Live hogs	Pound	1½ cents	¾ cent.
Meats, fresh	do	3 cents	¾ to 5 cents.
Meats, canned	do	7½ per cent	
Lard and compounds	do	2 cents	1 cent per pound.
Tallow	do	20 per cent	½ cent.
Eggs	Dozen	3 cents	8 cents.
Cheese	Pound	do	5 cents (over 5 cents value 25 per cent).
Butter	do	4 cents	8 cents per pound.
Coffee	do	5 cents	Free.
Coffee, when not imported directly from country of growth.	do	5 cents plus 10 per cent.	Do.
Coffee, green	do	3 cents	Do.
Tea	do	10 cents	Do.
Rice, tapioca, and sago flour.	Pound	1 cent	½ cent per pound.
Milk, condensed	do	3¾ cents	1 cent per pound.
Beans	Bushel	35 cents	$1.20.
Peas	do	15 cents	56 cents.
Buckwheat	do	do	5 cents.
Buckwheat flour	Hundredweight	50 cents	50 cents.
Corn meal	Barrel	25 cents	30 cents per hundredweight.
Oats	Bushel	10 cents	15 cents.
Oatmeal	Hundredweight	60 cents	90 cents.
Rye	Bushel	10 cents	15 cents.
Rice, cleaned	Hundredweight	75 cents	⅜ cent per pound.
Sago and tapioca		27½ per cent	Tapioca, ½ cent per pound.
Hay and straw	Ton	$2	Hay, $4; straw, $3.50.
Flaxseed	Bushel	10 cents	40 cents.
Grass seed	Pound	10 per cent	1 cent to 4 cents.
Vegetables, n. o. p.	do	30 per cent	30 per cent.
Onions	do	do	1 cent.
Apples	Barrel	90 cents	75 cents.
Dates and figs	Hundredweight	55 cents	Dates, 1 cent; figs, 2 cents.
Honey	Pound	3 cents	3 cents.
Nuts, all kinds, including peanuts.	do	2 cents	1 cent to 4 cents.
Copra	do	¾ cent	Free.
Nuts, shelled	do	4 cents	1 cent to 15 cents.
Salmon, fresh	do	1 cent	2 cents.
Salmon, prepared	do	30 per cent	25 per cent.
Sugar	do	2 cents	$1.60.
Cigars and cigarettes	do	$4.10 plus 25 per cent.	$4.50 plus 25 per cent.
Sewing machines		30 per cent	25 per cent to 40 per cent.
Typewriters		25 per cent	Free.
Machinery, farm		15 per cent to 20 per cent.	Do.
Woolen yarn, n. o. p.		30 per cent	26 cents plus 30 per cent to 39 cents plus 40 per cent.
Woolen blankets	do	35 per cent	20 cents plus 30 per cent to 40 cents plus 40 per cent.
Boots and shoes, harness and saddles.		30 per cent	Boots and shoes, 12 cents pair plus 5 per cent; harness and saddles, 35 per cent.

In addition to the general tariff the Canadian law provides for a British preferential and an intermediate tariff. The intermediate tariff applies to any country to which its benefits may be extended by orders in council.

Mr. GOODING. I have here a table showing the duties imposed by the tariff law of the United Kingdom.

On coffee there is a duty of $9.78 a hundred, while it is free under the pending bill as reported. On tea under the British tariff law a duty of 24 cents a pound is levied, while under the pending bill it is on the free list. Tea and coffee are luxuries in England; they are necessities in the United States.

On sugar there is a duty levied of $6.16 a hundred pounds in Great Britain, as against $1.60 a hundred under the bill as reported.

In England more revenue is collected from duties on coffee and tea and sugar and coconut and cocoa than we collect in America on all the farm products that go upon the breakfast table.

On condensed milk, sweetened, the duty in England is $2.80 per 100 pounds, while under the bill as reported by the Finance Committee the rate is $1.50. On cocoa the rate in England per 100 pounds is $9.78, while under the bill as reported by the committee it is free. On currants, per 100 pounds, the English duty is 48 cents; under the bill as reported by the committee it is $2.50. On figs and raisins the English duty per 100 pounds is $2.52, and under the bill reported by the Finance Committee $2. On prunes the rate of the British tariff per 100 pounds is $2.52, and under the bill reported by the Finance Committee

50 cents. When it comes to cider there is not very much difference in the respective duties, the English duty being 8 cents a gallon and the proposed duty under the pending bill 10 cents a gallon. Under the English tariff the duty on gasoline is 12 cents a gallon, while under the pending bill it is free. On motor cars and motor cycles the British duty is 33⅓ per cent, while under the pending bill as reported by the Finance Committee it is 25 per cent. On chicory the British duty per 100 pounds is $9.37, while under the pending bill reported by the Finance Committee it is $1.50.

So the figures run, Mr. President, all along the line. England placed a duty during 1921 on opera glasses of 35 per cent ad valorem; on laboratory porcelain, of 35 per cent ad valorem; on scientific instruments, of 40 per cent ad valorem. A great many articles have been put on the dutiable list in England. I ask that the entire table may be printed as a part of my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The table referred to is as follows:

Tariff of the United Kingdom.

Article.	Unit.	Full duty.	Finance Committee rate.
Coffee	100 pounds	$9.78	Free.
Tea	1 pound	.24	Free.
Coconut, sugared	100 pounds	2.80	$4.50
Sugar	do	6.16	1.60
Condensed milk, sweetened.	do	2.80	1.50
Cocoa	do	9.78	Free.
Currants	do	.48	2.50
Figs and raisins	do	2.52	2.00
Prunes	do	2.52	.50
Cider	Gallon	.08	.10
Glucose, solid	do	3.90	1.50
Glucose, liquid	do	2.80	1.50
Motor spirit (gasoline)	Gallon	.12	Free.
Motor cars and motor cycles.		33⅓ per cent.	Cars, 25 per cent; cycles, 30 per cent.
Chicory	100 pounds	$9.37	$1.50
Chloral hydrate	1 pound	.42	25 per cent.
Chloroform	do	1.04	$0.08
Watches		33⅓ per cent.	75 cents to $10.75.
Clocks		33⅓ per cent.	35 per cent plus $1 to $3.
Collodion	1 gallon	$8.23	$2.80
Soap, transparent	1 pound	.06	30 per cent.
Musical instruments		33⅓ per cent.	35 per cent.

The average paid carpenters, plasterers, painters, bricklayers, machinists, and shoemakers in England is $3.08 per day.

TARIFF OF THE UNITED KINGDOM.

(Page 2.)

[NOTE.—During 1921 the number of articles to which the tariff of the United Kingdom applies has been greatly extended by the passing of the safeguarding of industries act, 1921. By this act articles coming under the following headings are chargeable with duty to the extent of 33⅓ per cent ad valorem.]

The British rate is 33⅓ per cent. Finance Committee rates are as follows:

	Per cent.
Optical glass	35
Optical instruments	35
Scientific glassware	35
Laboratory porcelain	35
Scientific instruments	40
Gauges and measuring instruments	40
Compounds of thorium, cerium, and other rare earth metals	25
Synthetic organic chemicals	
Lamp, blown ware	
Wireless valves and similar rectifiers	
Ignition magnetos and permanent magnets	25
Arc-lamp carbons	35
Hosiery latch needles, $2 per thousand, plus	35
Metallic tungsten	45

Mr. GOODING. Mr. President, I have before me also a table showing the tariff rates under the French law. I wish to say that the duties under the tariff laws of all the countries to which I have referred or shall refer are collected on the gold basis. Under the French tariff law the duty on steers, bullocks, and heifers, per 100 pounds live weight, is $2.63; on rams, ewes, and wethers, per 100 pounds, live weight, $3.50; on mutton, fresh or preserved, per 100 pounds, $4.38; on pork, per 100 pounds, $3.50; on eggs, per 100 pounds, 88 cents; on cheese, hard, Dutch or Swiss, per 100 pounds, $3.06; on butter, per 100 pounds, $2.63; on wheat, 74 cents a bushel; on oats, 17 cents a bushel; on barley, 26 cents a bushel; on rye, 30 cents a bushel; on rice, whole and grits, per 100 pounds, $2.10; on apples and pears, per 100 pounds, $1.31; on raisins and dates, per 100 pounds, $6.57; on soya beans, per 100 pounds, 22 cents; on refined sugar, per 100 pounds, $2.72. Under the French tariff law coffee per 100 pounds is taxed $26.26. That is how much of a free breakfast table there is in France. On chocolate the French duty is also $26.26 per 100 pounds; and on tea, per 100 pounds, $35.02, and that, of course, includes breakfast tea.

Tobacco, cigars, and cigarettes, $656.56 a hundred pounds.
Linseed oil, 53 cents a hundred pounds.
Oil, soya bean, and corn for soap, 79 cents a hundred pounds.
Edible fats, $3.06 a hundred.
Cotton, washed, 66 cents a hundred.
Hemp, combed, $1.31 a hundred.
Vegetables, fresh, $1.75 a hundred.
Vegetables, dried, $1.63 a hundred.
Iron or steel billets, bars, 66 cents a hundred.
Fine steel for tools, $1.97 a hundred.
Iron or steel rods, 66 cents a hundred.
Cotton yarn, $4.03 a hundred.
Cotton yarn for carpets or rugs, $13.83 a hundred.
Silk thread, unbleached, $35.02 a hundred.
Table linen, $21.71 a hundred.
Knit gloves, $78.79 a hundred.
Hides and skins, tanned, $1.31 a hundred.

I shall not take the time to read all this list, Mr. President, but I ask that it be printed in connection with my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

French tariff, based on the act 1910, revised to December, 1921.

[Duty computed at par, American money. Franc equals 19.3 cents.]

Article.	Unit.	General rate.
Steers, bullocks, heifers	100 pounds live weight.	$2.63
Rams, ewes, wethers	do	3.50
Mutton, fresh or preserved	100 pounds	4.38
Pork	do	3.50
Eggs	do	.88
Cheese, hard (Dutch or Swiss)	do	3.06
Butter	do	2.63
Wheat	Bushel	.74
Oats	do	.17
Barley	do	.26
Rye	do	.30
Corn	do	.30
Semolina	100 pounds	3.33
Rice, whole and grits	do	2.10
Potatoes, March and June	Bushel	.32
Potatoes, any other time	do	.16
Apples and pears	100 pounds	1.31
Raisins and dates	do	6.57
Soya beans	do	.22
Sugar, refined	do	2.72
Coffee	do	26.26
Chocolate	do	26.26
Tea	do	35.02
Tobacco, cigars, and cigarettes	do	656.56
Olive oil	do	.88
Linseed oil	do	.53
Oil, soy bean, and corn for soap	do	.79
Edible fats, vegetable	do	3.06
Cotton, washed, cleaned, bleached	do	.66
Hemp, combed	do	1.31
Vegetables, fresh	do	1.75
Vegetables, dried	do	1.63
Brick, common	do	.021
Brick, hollow	do	.052
Milk, floss, combed	do	.88
Iron or steel, billets, bars	do	.66
Fine steel for tools	do	1.97
Iron or steel rods	do	.66
Cotton yarn, single, unbleached	do	4.03
Cotton for carpets, rugs, etc	do	13.83
Silk thread, unbleached	do	35.02
Table linen, damasked, unbleached	do	21.71
Fabrics of pure cotton	do	.81
Fabrics of pure wool	do	20.14
Knit goods, gloves	do	78.79
Hides and skins, tanned	do	1.31
Gloves, fur	Dozen pairs	1.54
Watches, gold cases	Each	8.68
Clocks, table and wall	100 pounds	17.51
Agricultural machines	do	1.31
Typewriters	do	26.26
Cutlery, fine table knives	do	78.79
Firearms	do	78.79
Pianos	do	28.95
Phonographs	do	7.88
Automobiles	do	9.88
Hats, wool	do	.17
Games, toys, sporting goods	do	7.88
Photographic apparatus, cameras, etc	do	65.66

NOTE.—A lower tariff than the above, called the minimum tariff, is applicable to articles imported from certain countries with which special arrangements have been made. Articles from all other countries are subject to the general rate.

The average wage paid carpenters, plasterers, painters, bricklayers, machinists, and shoemakers in France is $1.46.

Mr. GOODING. I may say that with this per capita tax in France of $8.69, the carpenters, plasterers, painters, bricklayers, machinists, and shoemakers in that country are working on the average for $1.46 a day, while in America these same trades are being paid on an average $7.17 a day. So it seems to me that our friends across the aisle should not shed any tears

about the American workingman being highly taxed when we compare his wages with those that are paid in France or England or any other country, where they pay four times the tax on the breakfast table that we do in America.

Here are the figures for Italy:

Cattle, per head, $3.84 to $15.36.
Sheep, 87 cents a head.
Swine, $1.15 to $3.84 a head.
Poultry, $1.35 per hundred pounds.
Poultry, dressed, $1.35 per hundred pounds.
Meats, fresh, $1.55 per hundred pounds.
Meats, frozen, $1.35 per hundred pounds.
Ham, $4.42 per hundred pounds.
Milk, condensed, unsweetened, $1.74 per hundred pounds.
Milk, powdered, $3.48 per hundred pounds.
Milk, condensed, sweetened, $3.26 per hundred pounds.
Milk, sugar, $3.26 per hundred pounds.
Cheese, $2.12 per hundred pounds.
Sugar, $3.07 per hundred pounds.
Coffee, $13.44 per hundred pounds.
Coffee, roasted, $17.86 per hundred pounds.
Honey, $2.69 per hundred pounds.
Chocolate, $10.56 per hundred pounds.
Tea, $34.97 per hundred pounds. Tea is free under the Finance Committee bill.
Wheat, 40 cents a bushel.
Corn, 37 cents a bushel.
Rye, 23 cents a bushel.
Barley, 18 cents a bushel.
Rice, 44 cents a hundred pounds.
Wheat flour, $1 a hundred pounds.
Cottonseed oil, $4.37 a hundred pounds.
Linseed oil, $2.10 a hundred pounds.
Lard, $1.30 a hundred pounds.
Bacon, $2.20 a hundred pounds.
Hides, tanned, $10.50 a hundred pounds.
Harness, $13 a hundred pounds.
Saddles, $1.50 each.

The average wage paid for carpenters, plasterers, painters, bricklayers, machinists, and shoemakers in Italy is 79 cents a day, yet practically everything that goes on the breakfast table in Italy is taxed.

I ask to have this table printed in the RECORD in connection with my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Tariff of Italy.

[Monetary unit 1 lira. 1 lira equals 100 centesimi or $0.192.]

Article.	Unit.	Duty.
Horses	Head	$28.80–$40.32

NOTE.—The average wage paid for carpenters, plasterers, painters, bricklayers, machinists, and shoemakers in Italy is 79 cents per day.

Mr. GOODING. Here is a tariff table for the Argentine:

Clothing, ready-made, 50 per cent ad valorem.
Harness, 50 per cent ad valorem.
Boots and shoes, 50 per cent ad valorem.
Furniture, 50 per cent ad valorem.
Stockings, 45 per cent ad valorem.
Hides and skins, 40 per cent ad valorem.
Blankets, wool, 40 per cent ad valorem.
Linseed oil, 4½ cents a pound.
Vegetable oils, 4½ cents a pound.
Coconut oil, 2 cents a pound.
Butter, 4½ cents a pound.
Milk, condensed, 3 cents a pound.
Ham, 11 cents a pound.
Eggs, 1 cent a pound.
Figs, 2 cents a pound.
Macaroni, 3 cents a pound.
Canned meats, 14 cents a pound.
Dates, 4½ cents a pound.
Meats, preserved, 9 cents a pound.
Prunes, 3½ cents a pound.
Coffee, 1.4 cents a pound.
Barley, 1 cent a pound, or 56 cents a bushel.
Lard, 4 cents a pound.
Apples, dried, 2½ cents a pound.
Honey, 1½ cents a pound.
Walnuts, 1½ cents a pound.
Raisins, 7 cents a pound.
Currants, 7 cents a pound.
Cheese, 9 cents a pound.
Tea, 4½ cents a pound.
Bacon, 9 cents a pound.

I ask to have this table printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Tariff of Argentina.

[Monetary unit gold peso. One peso equals 100 centaves=$0.952.]

Article.	Unit.	Duty.
Harness		50 per cent.
Clothing, ready-made		50 per cent.
Boots and shoes		50 per cent.
Furniture		50 per cent.
Stockings		45 per cent.
Hides and skins		40 per cent.
Blankets, wool		40 per cent.

Bacon	do	.09

Mr. GOODING. The tariff in Chile is as follows:

Cattle, $3.60 to $5.76 a head.
Sheep, 72 cents a head.
Horses, $3.60 a head.
Swine, $1.80 a head.
Meats, fresh, 3.2 cents a pound.
Bacon and ham, 9 cents a pound.
Milk, condensed, 7 cents a pound.
Butter, 10 cents a pound.
Lard, 4 cents a pound.
Cheese, 10 cents a pound.
Boots and shoes, 1 cent a pair.
Everything is by the pound in Chile.
Corn, one-half cent a pound.
Rye, 1 cent a pound.
Oats, 1½ cents a pound.
Rice, seven-tenths of a cent a pound.
Coffee, 1½ cents a pound.
Tea, 10 cents a pound.

I ask to have this table printed in the RECORD in connection with my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Tariff of Chile.

[Monetary unit, gold peso; par value, 36 cents.]

Article.	Unit.	Duty.
Cattle	Head	$3.60–$5.76
Sheep	do	.72
Horses	do	3.60
Swine	do	1.80
Meats, fresh	Pound	.032
Bacon and ham	do	.09
Milk, fresh	do	.0133
Milk, condensed	do	.07

Tariff of Chile—Continued.

Article.	Unit.	Duty.
Butter	Pound	$0.10
Lard	do	.04
Honey	do	.015
Cheese	do	.10
Boots and shoes	Pair	.01
Corn	Pound	.005
Rye	do	.01
Oats	do	.015
Rice	do	.007
Coffee	do	.015
Tea	do	.10

NOTE.—Chilean exchange was quoted at 12 cents, December, 1921.

Mr. GOODING. The tariff rates in Germany are as follows:

Corn, 28 cents a bushel.
Wheat, 36 cents a bushel.
Oats, 16 cents a bushel.
Rice, 50 cents per 100 pounds.
Rye, 50 cents per 100 pounds.
Barley, 40 cents per 100 pounds.
Beans, 20 cents per 100 pounds.
Cocoa, $7 per 100 pounds.
Chocolate, $5.40 per 100 pounds.
Sheep, $1.90 each.
Swine, 98 cents per 100 pounds.
Poultry, 40 cents per 100 pounds.
Fresh meats, $2.90 per 100 pounds.
Meats, frozen, $3.80 per 100 pounds.
Bacon, $3.90 per 100 pounds.
Poultry, dressed, $1.50 per 100 pounds.
Sausage, $4.40 per 100 pounds.
Butter, $2.20 per 100 pounds.
Honey, $4.40 per 100 pounds.
Linseed oil, $1.30 per 100 pounds.
Cottonseed oil, $1.40 per 100 pounds.
Milk, condensed, sweetened, $2.70 per 100 pounds.
Boots and shoes, $3.20 per 100 pounds.
Sugar, from $2 to $4.

I ask permission to have this table printed in connection with my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

German tariff.

Article.	Unit.	Rate of duty.
Corn	Bushel	$0.28
Wheat	do	.36
Oats	do	.16
Rice	100 pounds	.50
Rye	do	.50
Barley	do	.40
Beans	do	.20
Cocoa	do	7.00
Chocolate	do	5.40
Whites of egg and yolk	do	6.50
Sheep	Each	1.90
Swine	100 pounds	.98
Poultry	do	.40
Meat (fresh or killed)	do	2.90
Meats (frozen)	do	3.80
Bacon	do	3.90
Poultry (dressed)	do	1.50
Sausage	do	4.40
Eggs	do	.20
Butter	do	2.20
Honey	do	4.40
Linseed oil	do	1.30
Cottonseed oil	do	1.40
Milk (condensed)	do	.50
Milk (condensed sweetened)	do	2.70
Boots and shoes	do	3.20
Sugar	do	2.00–4.00

NOTE.—Monetary unit 1 mark; par value, 23.8 cents; current value, one-third cent. All duties are based on a metric system of weights, 100 kilograms being taken as the unit; 100 kilograms equal 220 pounds.

The average wage paid for carpenters, plasterers, painters, bricklayers, machinists, and shoemakers in Germany is $0.71 per day.

Mr. GOODING. So I submit, Mr. President, that there is not a country on earth that does not tax the breakfast table at a higher rate than we do here in America. We are nearer a free-trade country to-day, as far as the breakfast table is concerned, than any other country on earth, and these tariff rates in foreign countries prove that beyond a question of a doubt.

The Republican Party levies a protective tariff on those articles that we produce in this country and those that we can develop and those that give employment to American labor. It never has been the policy of the Republican Party to levy a duty on tea or coffee, because we can not produce them, nor on any other things that we do not produce, as far as that is concerned, unless they displace something that we do produce. I am not alarmed about our not being able to buy from foreign countries if we do not open up our ports. Our ports are wide open to-day to every country, as compared to their ports, with the revenue that they collect on imports from America, especially on farm products.

We bought last year $790,257,384 worth of imported products that we do not produce in America, so that there is not any danger that we will not be able to buy abroad. Let me read you a few of these articles.

Chemicals and drugs that we do not produce in this country—and I will read only the first figure—$36,000,000:

Cocoa, $23,000,000.
Coffee, $142,000,000.
Fibers, $18,000,000.
Unbleached burlap, $41,000,000.
Fruits that we do not produce, $29,000,000.
Nuts that we do not produce, $12,000,000.
Skins from animals, $25,000,000.
India rubber, $75,000,000.
Metals and minerals, $34,000,000.
Vegetable oils, $20,000,000.
Precious stones, $36,000,000.
Silks, and manufactures of silks, $259,000,000.
Tea, $14,000,000.

I ask to have this table printed as part of my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Imports of commodities not produced in United States for 1921.

Farinaceous substances	$1,771,946
Chemical—drugs, etc	36,263,618
Cocoa	23,124,741
Coffee	142,808,719
Cork wood and bark	959,947
Logwood	636,932
Fertilizers	2,335,982
Fibers	18,872,081
Unbleached burlap	41,279,072
Fruits	29,339,458
Nuts	12,674,019
Hair, human	9,132,723
Skins, animal	25,523,743
India rubber, etc	75,562,938
Ivory	473,721
Meerschaum	9,712
Metals and minerals	24,725,000
Vegetable oils	20,744,659
Platinum	916,235
Precious and semiprecious stones	36,891,752
Castor beans	906,857
Mother-of-pearl shells	974,988
Silk and manufactures of	259,601,253
Spices	4,769,138
Flint, unground	116,157
Tanning materials	227,765
Tea	14,233,791
Wax	1,671,932
Briar root and wood	135,727
Rattan and reeds	1,074,528
Total	790,257,384

Mr. GOODING. I also ask to have printed as part of my remarks a table showing the average daily wage of carpenters, plasterers, painters, bricklayers, machinists, and shoemakers in the countries of Germany, Italy, Japan, France, England, and the United States.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

Average daily wage.

	Germany.	Italy.	Japan.	France.	England.	United States.
Carpenters	$0.73	$0.90	$1.30	$1.38	$3.38	$6.62
Plasterers	.72	.76	1.53	1.56	3.38	8.47
Painters	.72	.80	1.53	1.71	3.08	6.80
Bricklayers	.75	.76	1.53	1.56	3.38	8.7
Machinists	.72	.82	1.50	1.38	2.90	6.40
Shoemakers	.64	.72	1.23	1.20	2.40	6.00
Average	.71	.79	1.43	1.46	.08	7.17

Mr. FLETCHER. Mr. President, referring to this particular item, the Senator from Montana is correct and the Senator from Michigan is wrong regarding the question as to whether it is produced in this country. In the Summary of the Tariff Information, page 188, the statement is as follows:

Amorphous graphite is so widely distributed that no serious difficulty is likely to be encountered by any of the great commercial nations in filling their vital needs. The most important deposits of crystalline graphite are controlled by Great Britain through her sovereignty over Ceylon and by France through sovereignty over Madagascar.

Then, further, it says:

The United States has heretofore not been considered independent in the matter of crucible graphite. Crucible makers, who use about 15,000 tons a year, have insisted on having Ceylon graphite. Montana produces a graphite that has been accepted by crucible manufacturers as equal to Ceylon material. The quantity ultimately available has not been proved, but may be sufficient to satisfy domestic demands for many years.

Then another statement appears; and this is not questioned, so far as I know:

There is a larger degree of independence in the matter of amorphous graphite, of which the consumption is in the neighborhood of 15,000 tons annually. Practically all of this can be furnished from domestic sources, including both natural and artificial graphite, but during the war American-owned mines in Mexico and Canada were drawn upon to some extent, and more recently Korean graphite has again been imported.

So there is no question but that all this material can be produced and is being produced in this country, and the domestic supply is ordinarily sufficient for our demands.

I think the duty proposed by the committee may yield revenue, and it may be strictly termed a revenue duty. Beyond that, we get into the field of protection, and I would not feel justified in increasing the duty provided by the committee, and I would only vote for it on the idea that it would be found to be a duty which would yield a revenue, and would not tend to encourage the formation of a combination or a trust, or impose such restrictions on importations as would cause a great increase in the prices here.

Upon the basis of its being a revenue duty, it would be justified. Otherwise, both graphite and plumbago ought to be on the free list.

POLICY OF RECLAMATION.

Mr. McNARY. Mr. President, in yesterday morning's Washington Post, under the column headed "Chats with Visitors," appeared a very interesting interview with Governor Campbell, of Arizona. I ask that it may be read by the Secretary.

Mr. JONES of Washington. Why not have it printed in the RECORD without reading?

Mr. McNARY. The article is brief, and I prefer that it be read. It is about a matter which will be interesting to the Senator from Washington.

The VICE PRESIDENT. The Secretary will read as requested.

The reading clerk read as follows:

"The people of the West are becoming very anxious for congressional action on land-reclamation projects which are now pending," declared Gov. Thomas E. Campbell, of Arizona, at the Willard. Mr. Campbell is now serving his third term as Republican governor of a State that is normally Democratic. He has been one of the leaders of the Western States Reclamation Association, which has united 13 western States in a campaign in support of pending reclamation legislation.

"There has been considerable talk about the West being the battle ground of the coming election, particularly with reference to the control of the House and the Senate," Governor Campbell said. "I believe this is a fact, and there is not much time between now and November for the people of our country to forget. We have been promised a broad national policy of reclamation. The Republican Party in its platform stands pledged. President Harding has emphatically declared himself in favor of the McNary-Smith bill. The committees of both Houses of Congress have recommended this bill by unanimous votes. To-day it is on the calendars of both House and Senate.

"Yet it appears that a narrow viewpoint of a few House leaders is endangering its passage through inactivity and procrastination. We may live a long way from Washington, but we are familiar with the political tactics of letting a meritorious measure die on the calendar. The West to-day is watching the national administration with just as keen an interest as the leaders are watching the West."

Mr. ASHURST. Mr. President, the Governor of the State of Arizona, Mr. Campbell, is not only a gentleman of excellent judgment but accurate expression. The supporters of the Smith-McNary reclamation bill are beginning to be seriously disturbed over the situation respecting that bill. This ought not to be a political question. It is an economic, a business, question, and citizens of the West, of the South, and of the East have perceived the importance of this legislation. Only four days since a group of certain Republican editors of the Press Association of the State of Washington manfully served notice on the Republican Party that unless this Congress enacted the Smith-McNary reclamation bill they would no longer consider themselves bound to support the Republican Party. I read from the CONGRESSIONAL RECORD (p. 7434 of the proceedings of Tuesday, May 23). The telegram was inserted in the RECORD by the distinguished senior Senator from Washington [Mr. JONES] and is as follows:

YAKIMA, WASH., *May 20, 1922.*

WESLEY L. JONES, *Washington, D. C.:*

Following a meeting here to-day of the Yakima-Benton-Kittitas group of the Washington State Press Association, Republican members of the group adopted the following resolution:

"Whereas the Republican Party in the last national campaign gave to the voters of the Nation its pledge to put into operation a speeded-up and enlarged program of reclamation; and

"Whereas the McNary-Smith bill, now pending in Congress, was framed as a fulfillment of that pledge and as such has received the official sanction of the administration; and

"Whereas said McNary-Smith bill has been unanimously recommended for passage by committees in both Houses of Congress; and

"Whereas enactment of said McNary-Smith bill will stimulate business and industry, relieve unemployment, contribute materially to the Nation's wealth, and inure to the special benefit of the returned soldiery without prejudice or preference to any project, section, or district of the unreclaimed areas of the Nation: Now therefore be it

"Resolved by the following Republican newspaper publishers of the State of Washington, That failure of the Republican majority in Congress to pass the said McNary-Smith bill at the present session will be regarded by us as an inexcusable breach of faith on the part of the national Republican Party, and we hereby declare that we no longer consider ourselves, either by reason of our past affiliations or the party's future promises, bound to continue our support of the national Republican Party."

Republican newspapers represented at to-day's meeting were Ellensburg Record, Sunnyside Sun, Grandview Herald, Wapato Independent, Toppenish Review, Toppenish Tribune, Kennewick Courier-Reporter, Zillah Mirror, Richland Advocate, Prosser Record-Bulletin.

I am of opinion that this dispatch which the Senator from Washington [Mr. JONES] caused to be inserted in the RECORD expresses the view of a vast majority of the American people, irrespective of party. I have spoken in season, and some say out of season, here in the Senate pointing out the necessity for the early enactment of this Smith-McNary reclamation bill, and I have said to Republicans here and elsewhere that it was their duty to pass this bill and that they can make no greater contribution to the happiness and the prosperity of the people of this country than to pass the Smith-McNary reclamation bill.

The distinguished chairman of the Committee on Irrigation and Reclamation, the senior Senator from Oregon [Mr. McNARY] has labored for this legislation with a zeal and a diligence unsurpassed during my time here.

The Senator from Oregon [Mr. McNARY] knows, and he has impressed the committee with the idea, that if the landless returned soldier is to obtain a tract of land and is to become a farmer the eligible means to that end is to be found through the passage of this Smith-McNary reclamation bill. Through the efforts of the senior Senator from Oregon and through the efforts of the Senator from Nebraska [Mr. NORRIS] the title or name of the old Committee on Irrigation and Reclamation of Arid Lands has had stricken from it the words "of arid lands," so that now I say to you from the South if the Mississippi River overflows its banks the Smith-McNary reclamation bill, when it becomes a law, will afford an opportunity for you to stay the devastating floods and reclaim the lands. In the true philosophy of government we have as much right to reclaim swamp lands as we have to irrigate arid lands, and I am in favor of doing both, *both* for the benefit of the people. A government is a harness with which to draw civilization's load.

The moment a citizen becomes a landowner he becomes a stockholder in the Republic, and no government can with safety ignore the question of affording to industrious persons an opportunity to acquire a home. Reclamation of lands is practical, yet ideal; it is one of the noblest tasks our Nation could perform.

We of to-day are the tragic generation. Vast unrest everywhere, much unemployment distresses the people, and no grander or more utilitarian work could be done than to reclaim, for the benefit of the people, our now idle, unutilized lands. Hear me while I read from the report on the Smith-McNary reclamation bill, as written by the Senator from Oregon, wherein he quoted from a great Babylonian monarch:

I have made the canal of Hammurabi a blessing for the people of Shumir and Accad. I have distributed the waters by branch canals over the desert plains. I have made water flow in the dry channels and have given an unfailing supply to the people. I have changed desert plains into well-watered lands. I have given them fertility and plenty, and made them the abode of happiness.

I am glad that the suggestions urging action on this bill have come from the other side, as this relieves the discussion of any partisan charge. I saw the dispatch yesterday which the Senator from Washington placed into the RECORD, but I felt a hesitancy about discussing it here, because those gentlemen were Republican editors; but the Senator from Washington, in placing that statement into the RECORD, again proved himself to be what we all know him to be, a fair man, who labors earnestly for things not only for the good of his party but for the good of his country.

If this Congress should fail to pass the Smith-McNary reclamation bill a roar of fury, anger, and resentment would rise from every camp, every home, every hamlet and city in the West. The Republican Party is bound, as far as faith and promises can bind men, to pass this bill. The proper committee of the House and the proper committee of the Senate have recommended it. The bill asks for no gift, no bounty, no largesse from the Federal Treasury, but it provides that an appropriate sum of money—$350,000,000—shall be transferred to the national reclamation fund and that the Secretary of the Interior may from time to time designate lands eligible for reclamation in Mississippi, Montana, Maine, Michigan, Alabama, Arizona, Utah, Arkansas, or in any other State, and that such approved projects shall be built. The money will all be repaid to the United States, hence this is not an appropriation.

Will any statesman arise and declare that he has a better solution of the reclamation question? Will anyone here ad-

vance a better idea than is in this bill? Unless he can do so, it is his duty to support the Smith-McNary reclamation bill. Unless some Senator comes forward with a better plan for reclaiming the Everglades of Florida, the overflowed lands of the South, the stump lands of the Northwest and East, and the arid lands of the West—unless he can point out a better or more eligible plan than is provided in the Smith-McNary bill he is in duty bound, in my judgment, to vote for this bill.

Just as soon as this bill is passed the Secretary of the Interior would set to work the various agencies of his department investigating and approving projects. Here and there and everywhere engineers would be examining to ascertain where projects may be built.

I measure my words when I say that no Congress ever has and that no Congress ever will consider a bill of more importance than the Smith-McNary reclamation bill. Without any offensiveness intended, I speak for others as well as myself, not only on this side but for a few gentlemen on the other side of the aisle, and say we serve notice now that, if we can prevent it, this Congress will not be permitted to adjourn until the Smith-McNary bill is a law.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. ASHURST. I yield with pleasure.

Mr. LENROOT. I should like to ask the Senator whether he thinks the country needs an increased production of agricultural products to-day?

Mr. ASHURST. Knowing that a large number of the 4,000,000 soldiers in a land which they saved need and desire a home or a farm, I have little fear of overproduction. Do we need a stimulation of agricultural products? Is that the question the Senator asks me?

Mr. LENROOT. Does not the Senator admit that at the present prices there is no profit in raising agricultural products? If that be true, does the country need an increased production of agricultural products?

Mr. ASHURST. All the more reason why, because the soldier should have a home. If we say agricultural products are now too high, let the soldier grow them if he desires.

Mr. LENROOT. No; they are too low.

Mr. ASHURST. Mr. President, the Senator is one of the most determined fighters in the Senate. It would be distressing for me to draw any inference from his remarks that he is going to oppose this bill. I do not agree with the Senator on many things. He and I have crossed swords frequently and to my discomfiture, on many questions at times, but I shall be filled with profound regret and painful surprise if I see that superb intellect fighting the Smith-McNary bill. With his ability and leadership he owes it as a duty to his country to stand up and fight for this bill. I hope we may find him enlisted with other soldiers of the common good, marching forward in a phalanx in favor of this truly wonderful legislation which a Republican Secretary of the Interior favors. Pass this bill and glory will be your portion; defeat it, or adjourn without action on this bill and the heat of public opinion will consume you root and branch.

Promises in politics must be kept; either keep them or do not make them. A vote for this bill is a vote for the firmness, strength, and prosperity of this Republic.

Mr. ASHURST subsequently said:

Mr. President, this evening I had occasion to address the Senate for a few moments upon the Smith-McNary reclamation bill, reported favorably from the Committee on Irrigation and Reclamation. I ask unanimous consent to insert in the RECORD as an appendix to my remarks a copy of the bill.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The bill referred to is as follows:

A bill (S. 3254) to encourage the development of the agricultural resources of the United States through Federal and State cooperation, giving preference in the matter of employment and the establishment of rural homes to those who have served with the military and naval forces of the United States.

Be it enacted, etc., That when used in this act—

(a) The term "Secretary" means the Secretary of the Interior.

(b) The term "district" means any district organized under the law of any State to provide for the agricultural reclamation of lands by irrigation, drainage, or dikage, with authority to issue bonds which shall be a general charge against all lands within the district and to contract with the United States under this act as provided herein.

(c) The term "farm" means an area of land within a reclamation project sufficient in size, in the opinion of the Secretary, to support a family, but not exceeding 160 acres of reclaimed land.

(d) The term "excess lands" means all lands in a single holding in excess of one established farm.

(e) The term "veteran" means any individual, a member of the military or naval forces of the United States in the War with Germany, the War with Spain, or in the suppression of the insurrection in the Philippines, and honorably discharged therefrom or placed in the Regular Army or Naval Reserve.

SEC. 2. That the Secretary is authorized to investigate the feasibility of reclaiming the lands within any district in any State under contract with the district. One-half the cost of investigation shall be advanced by the district and one-half by the United States. Upon determining that reclamation is feasible, the Secretary is authorized, under contract with the district, to construct the necessary works for the reclamation of the lands involved and operate and maintain the same so long as such operation and maintenance are necessary, in the opinion of the Secretary, to safeguard the interests of the Government. The total cost of construction and of operation and maintenance which shall include a just portion of overhead expenses shall be paid by the district to the United States.

SEC. 3. That before construction of a project is commenced the sizes of the farms therein shall be established and agreements shall be made effectively subjecting not less than 80 per cent of the excess lands within the project to disposal by authority of the Secretary to settlers at prices and terms fixed in advance in such agreements. Such prices and terms shall be determined with the view of placing a bona fide and competent settler upon each farm of the project with the least possible delay.

SEC. 4. That when, in the opinion of the Secretary, a project has been fully completed and successfully operated for one season the Secretary shall fix the construction cost thereof, which shall include the total cost of investigation, the expense of selling district bonds under section 5, interest at not exceeding 5 per cent per annum upon all sums advanced by the United States in the construction thereof, and the cost of operating and maintaining the project to the date of fixing such cost. This total cost the district shall agree to pay to the United States within a period not exceeding 40 years, with annual interest thereon at not exceeding 5 per cent per annum: *Provided*, That upon receipt by the United States from the proceeds of district bonds, as provided in section 5, of such total cost with interest, the obligation of the district to the United States for construction shall be satisfied: *Provided further*, That upon the receipt of such total cost the moneys advanced by the district for investigation of the project shall be returned to the district. So long as the Government operates and maintains a project the district shall also pay to the United States annually, upon terms to be fixed by the Secretary, the total cost of operation and maintenance.

SEC. 5. That preceding any expenditure by the United States on account of construction of a project bonds of the district equal in face value to the amount of the proposed expenditure shall be duly issued and delivered to the United States. If at any time it should appear to the Secretary that the original bond issue is insufficient to cover the cost of the proposed work, he may either curtail the work or require the district to issue additional bonds, and when the total cost of the completed project has been determined under section 4, all bonds issued in excess of such cost shall be canceled. The bonds shall be in form approved by the Secretary and shall run for a period not exceeding 40 years, bear interest at a rate to be fixed by the Secretary not exceeding 5 per cent, payable annually, and be issued in denominations of $25, $50, $100, $500, and $1,000. These bonds shall be deposited with the Federal Farm Loan Board, and when the project cost is known and the value of all of the property of the district subject to assessment for the payment of the bonds shall reach twice the par value of the bonds as found by the said board, the board shall offer the bonds at public or private sale at not less than par under terms and conditions to be provided by rules and regulations to be made by said board. The moneys received from the sale of the bonds shall be credited upon the district contract. Prior to sale of the bonds the board shall collect all moneys due thereon, and the same shall likewise be credited upon the district contract.

SEC. 6. That unentered and unpatented arid and semiarid lands of the United States susceptible of reclamation may be included in a district and may be subjected to the provisions of the act of August 11, 1916 (39 Stat. p. 506), in accordance with the terms of said act: *Provided*, That the final proviso of section 1 of the act shall not apply: *Provided further*, That while the unentered public lands within a district constitute more than 50 per cent in area of the lands therein, the Secretary shall have the right to appoint upon the district board such number of persons to represent the interests of the United States as shall constitute a majority of the board. Unentered public land withdrawn under the provisions of the act of June 17, 1902 (32 Stat. p. 388), and acts amendatory thereof or supplementary thereto, may, in the discretion of the Secretary, be included in a district. All unentered public land so included in a district shall be opened under the provisions of the homestead law and also, so far as applicable, of said act of June 17, 1902, as amended and supplemented.

SEC. 7. That the United States may acquire lands hereunder for construction, but not for agricultural purposes: *Provided*, That the Secretary is authorized to accept, by gift, deed in trust, or otherwise, land within any district and dispose of the same upon terms and conditions to be agreed upon with the grantor or later fixed by the Secretary.

SEC. 8. That in the construction of every project under this act the Secretary shall, so far as practicable, utilize the services of veterans. In every opening or sale of land by authority of the Secretary, under this act veterans shall have the exclusive right, for a period of 60 days, to make entry or otherwise acquire the land: *Provided*, That in the event such an entry shall be relinquished at any time prior to actual residence upon the land by the entryman for not less than one year, lands so relinquished shall not be subject to entry for a period of 60 days after the filing and notation of the relinquishment in the local land office, and shall, after the expiration of such 60-day period, be subject to entry by the first qualified applicant.

SEC. 9. That the act of June 17, 1902 (32 Stat. p. 388), and all amendatory or supplementary acts shall hereafter be known as the national irrigation law, and the fund provided for by said law shall hereafter be known as the national irrigation fund. This act, and all amendatory or supplementary acts, shall be known as the national reclamation law, and for the purpose of carrying out its provisions there is hereby established in the Treasury a fund to be known as the national reclamation fund. There is hereby authorized to be appropriated from any moneys in the Treasury not otherwise appropriated the sum of $350,000,000, to be transferred from time to time to the national reclamation fund, and appropriated upon estimates made by the Secretary for carrying out the provisions of this act. All moneys received by the United States under this act shall be paid into the national reclamation fund, and all moneys at any time in said fund shall be available for appropriation for the purposes of this act.

SEC. 10. That the Secretary is hereby authorized to perform any and all acts and to make such rules and regulations as in his discretion may be necessary for carrying the provisions of this act into full force and effect.

Mr. McCUMBER. Mr. President——

Mr. ASHURST. I yield to the distinguished Senator from North Dakota.

Mr. McCUMBER. I thought the Senator from Arizona had concluded.

Mr. ASHURST. I will yield the floor, if that will please the Senator.

Mr. McCUMBER. Mr. President, may I ask that the Secretary restate the amendment to which this argument has been directed?

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The Secretary will state the pending amendment.

The ASSISTANT SECRETARY. The question is on the amendment proposed by the junior Senator from Colorado [Mr. NICHOLSON], on page 37, line 11, to strike out "20 per cent ad valorem" and to insert in lieu thereof "3 cents per pound," so as to read:

Crystalline lump, chip, or dust, 3 cents per pound.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Harrison	McNary	Smith
Borah	Heflin	Moses	Smoot
Broussard	Johnson	Newberry	Spencer
Bursum	Jones, N. Mex.	Nicholson	Sterling
Calder	Jones, Wash.	Oddie	Sutherland
Capper	Kellogg	Phipps	Townsend
Curtis	Kendrick	Poindexter	Wadsworth
Dial	La Follette	Ransdell	Walsh, Mass.
Fletcher	Lenroot	Rawson	Walsh, Mont.
France	Lodge	Robinson	Warren
Gooding	McCumber	Sheppard	
Hale	McKinley	Shortridge	
Harris	McLean	Simmons	

The VICE PRESIDENT. Forty-nine Senators having answered to their names, a quorum is present. The question is on the amendment of the Senator from Colorado [Mr. NICHOLSON] to the committee amendment.

Mr. WALSH of Massachusetts. Mr. President, the amendment proposed by the Senator from Colorado to the committee amendment refers to lump graphite. The committee amendment fixes a rate of 20 per cent ad valorem. If the amendment proposed by the Senator from Colorado is adopted it will be equivalent to an ad valorem rate of 50 per cent.

Mr. HARRISON. On this question I call for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. MOSES (when Mr. KEYES's name was called). I am authorized by my absent colleague [Mr. KEYES] to state that if present he would vote "nay" on this amendment to the amendment.

Mr. LODGE (when his name was called). I have a general pair with the Senator from Alabama [Mr. UNDERWOOD]. I understand, however, that on this question he would vote as I am about to vote, and therefore I am at liberty to vote. I vote "nay."

Mr. McKINLEY (when his name was called). Transferring my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from Pennsylvania [Mr. PEPPER] I vote "nay."

The roll call was concluded.

Mr. JONES of Washington (after having voted in the affirmative). Has the senior Senator from Virginia [Mr. SWANSON] voted?

The VICE PRESIDENT. He has not.

Mr. JONES of Washington. I have a pair with that Senator for the time that he is necessarily absent during the day. I find, however, that I can transfer that pair to the Senator from Oregon [Mr. STANFIELD]. I do so, and will allow my vote to stand.

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 17, nays 36, as follows:

YEAS—17.

Bursum	Johnson	Oddie	Sterling
Capper	Jones, N. Mex.	Phipps	Wadsworth
Ernst	Jones, Wash.	Poindexter	
Gooding	McNary	Rawson	
Harreld	Nicholson	Shortridge	

NAYS—36.

Ball	Hale	Lodge	Smith
Borah	Harris	McCumber	Smoot
Brandegee	Harrison	McKinley	Spencer
Calder	Heflin	McLean	Stanley
Curtis	Hitchcock	Moses	Sutherland
Dial	Kellogg	Newberry	Townsend
Fletcher	Kendrick	Robinson	Walsh, Mass.
France	La Follette	Sheppard	Walsh, Mont.
Frelinghuysen	Lenroot	Simmons	Warren

NOT VOTING—43.

Ashurst	Elkins	New	Shields
Broussard	Fernald	Norbeck	Stanfield
Cameron	Gerry	Norris	Swanson
Caraway	Glass	Overman	Trammell
Colt	Keyes	Owen	Underwood
Crow	King	Page	Watson, Ga.
Culberson	Ladd	Pepper	Watson, Ind.
Cummins	McCormick	Pittman	Weller
Dillingham	McKellar	Pomerene	Williams
du Pont	Myers	Ransdell	Willis
Edge	Nelson	Reed	

So Mr. NICHOLSON's amendment to the amendment of the Committee on Finance was rejected.

Mr. HEFLIN. I move to amend the committee amendment on page 37, line 11, after the word "dust," by striking out "20 per cent ad valorem" and inserting "1½ cents per pound"; so as to provide a duty of 1½ cents per pound on crystalline lump, chip, or dust graphite. I ask for the yeas and nays on the amendment to the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. MOSES (when the name of Mr. KEYES was called). Were he present, my colleague, the junior Senator from New Hampshire [Mr. KEYES] would vote "nay" on this amendment to the amendment.

Mr. LODGE (when his name was called). I have a general pair with the Senator from Alabama [Mr. UNDERWOOD], but I am informed that if present he would vote as I am about to vote, and I will therefore vote. I vote "nay."

Mr. McKINLEY (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. HARRISON. Has the junior Senator from West Virginia [Mr. ELKINS] voted?

The VICE PRESIDENT. He has not.

Mr. HARRISON. I transfer my pair with him to the junior Senator from Rhode Island [Mr. GERRY] and vote "nay."

The result was announced—yeas 17, nays 35, as follows:

YEAS—17.

Broussard	Johnson	Oddie	Shortridge
Bursum	Jones, N. Mex.	Phipps	Sterling
Capper	Jones, Wash.	Poindexter	
Gooding	McNary	Robinson	
Heflin	Nicholson	Sheppard	

NAYS—35.

Ball	Hale	McCumber	Spencer
Borah	Harreld	McKinley	Stanley
Brandegee	Harris	McLean	Sutherland
Calder	Harrison	Moses	Townsend
Curtis	Kellogg	Newberry	Wadsworth
Dial	Kendrick	Rawson	Walsh, Mass.
Ernst	La Follette	Simmons	Walsh, Mont.
France	Lenroot	Smith	Warren
Frelinghuysen	Lodge	Smoot	

NOT VOTING—44.

Ashurst	Fernald	Nelson	Reed
Cameron	Fletcher	New	Shields
Caraway	Gerry	Norbeck	Stanfield
Colt	Glass	Norris	Swanson
Crow	Hitchcock	Overman	Trammell
Culberson	Keyes	Owen	Underwood
Cummins	King	Page	Watson, Ga.
Dillingham	Ladd	Pepper	Watson, Ind.
du Pont	McCormick	Pittman	Weller
Edge	McKellar	Pomerene	Williams
Elkins	Myers	Ransdell	Willis

So Mr. HEFLIN'S amendment to the committee amendment was rejected.

The VICE PRESIDENT. The next amendment proposed by the Senator from Colorado [Mr. NICHOLSON] to the amendment of the committee will be stated.

The READING CLERK. On page 37, paragraph 213a, line 11, before the word "cents," it is proposed to strike out the numeral "2" and to insert the numeral "5," so as to read:

Crystalline flake, 5 cents per pound.

Mr. WALSH of Massachusetts. Mr. President, as crystalline graphite is selling now from 3 to 4 cents a pound, if this amendment to the amendment be adopted it will impose an equivalent ad valorem rate of between 133 and 167 per cent, the highest rate that I have yet heard mentioned in connection with the pending tariff bill.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Colorado to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question recurs on the committee amendment.

The amendment was agreed to.

Mr. NICHOLSON. I reserve the right to offer in the Senate, when we again reach the schedule, the amendments I have to-day offered to the committee amendment.

Mr. McCUMBER. Mr. President, I now ask to return to paragraph 211, on page 35, lines 24 and 25.

The VICE PRESIDENT. The amendment proposed by the Committee on Finance at that point will be stated.

The READING CLERK. On page 35, after line 23, it is proposed by the Committee on Finance to strike out paragraph 211, as follows:

Graphite or plumbago, crude or refined, not specially provided for, 10 per cent ad valorem.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. McCUMBER. I now ask to return to paragraph 207, page 34, where the Committee on Finance propose an amendment relative to fluorspar.

The VICE PRESIDENT. The amendment proposed by the Committee on Finance in the paragraph referred to will be stated.

The READING CLERK. On page 34, paragraph 207, line 10, after the word "fluorspar" it is proposed by the Committee on Finance to strike out "5 per ton of 2,000 pounds: *Provided*, That after the expiration of one year beginning on the day following the passage of this act, the duty on fluorspar shall be $4 per ton of 2,000 pounds," and to insert "$5.60 per ton," so as to read:

Fluorspar, $5.60 per ton.

Mr. JONES of New Mexico. Mr. President, to me this is an unusual proposal. The present duty on this commodity is $1.50 per ton, which was equivalent in 1914 to 39 per cent. The Payne-Aldrich law imposed a duty of only $3 per ton, which at the time that law was enacted was equivalent to a duty of 95 per cent. Now the Committee on Finance propose to impose a duty on this commodity of $5.60 per ton, which, based on the 1914 prices, will amount to 147 per cent; on the 1910 prices to 176 per cent; and on present prices, those for 1922, will amount to 70 per cent.

Mr. SMOOT. I think to-day the price for the commodity is about $20 a ton.

Mr. JONES of New Mexico. The import price is not $20 per ton. The import price for 1921 was $12.50 a ton and the last foreign price which I have, for 1922, is $8 per ton.

Mr. SMOOT. Is the Senator speaking of the price in Mexico?

Mr. JONES of New Mexico. Yes; I am speaking of the foreign price.

Mr. SMOOT. I notice the price per ton in Mexico is $12 and the price per ton in Kentucky and Illinois is $20 and $22 a ton. According to those figures the percentage would be less than stated by the Senator from New Mexico.

Mr. JONES of New Mexico. Under those prices the percentage would, of course, be less.

Mr. SMOOT. That is all I wanted to correct.

Mr. JONES of New Mexico. At any rate, we are proposing to increase the present duty of $1.50 a ton to $5.60 a ton.

Mr. SMOOT. That is right.

Mr. JONES of New Mexico. It seems to me that that is hardly justified. If the committee has any information which will justify that rate, of course I do not intend to make any insistent opposition to it, but the information which I have will not justify the rate.

Fortunately we have quite an accurate and comprehensive survey regarding this commodity. It is very graphically pictured in the report of the Geological Survey of the Interior Department, which gives an outline showing the production of the commodity and the prices over a series of years from 1883 down to and including 1920. On the question of production I find by looking at this document that from 1883 to about 1898 the production ranged from 5,000 to 10,000 tons per annum.

After that time the production increased until about 1901. Then it began again to increase quite rapidly, and reached a production of around forty to fifty thousand tons, and remained at that production until about 1908. In 1910 we were producing about 55,000 tons per annum, and at that point the imports began rapidly to decrease. The imports in 1910 were about the same as the domestic production, 50,000 tons per annum, and the imports from that time on decreased until they amounted to less than 10,000 tons, about six or seven thousand tons per annum. The domestic production increased rapidly, and in 1912 amounted to about 115,000 tons, and in 1917 and 1918 ran up to nearly 270,000 tons, the imports in the meantime being negligible.

We also have a chart showing the prices, and that chart shows almost a uniform price from 1883 to 1916, and that uniform price was right around $6 per ton. It varied somewhat; sometimes it would go up to $7 a ton, sometimes down to $5 a ton; but I think, taking it right along, as an average it amounted to $6 per ton from 1883 to 1916. From that point the price rose rapidly, almost acutely, from $6 per ton in 1916 to over $25 per ton in 1919; and, as the Senator from Utah has just stated, the present price is over $20 per ton.

I should like to know upon what principle of legislation you are proposing this enormous increase of duty on this commodity. The American product is of a higher quality than that which is being imported, and, so far as I can learn, there is no considerable quantity in any foreign country which is at all likely to find a market in the United States. In addition to that, we have been exporting a considerable quantity of this material. I think we are exporting now, or were last year, at the rate of about 2,500 or 3,000 tons per annum, and the imports are absolutely negligible.

Here is the way the imports have run:

In 1919, when the price of the imported ore was $15.50 a ton, we imported something over 6,000 tons.

In 1920 the imports were higher than they had been during the war period, but not very much. They were 21,000 tons.

In 1921 the importations decreased to 5,560 tons, and for the first three months of 1922 they amounted only to 1,693 tons.

That does not show that this country is going to be flooded with this commodity.

The price now is four or five times what it was during a series of years from 1883 to 1916. For nearly a quarter of a century the price remained almost stationary at $6 per ton, and now a duty of $5.60 per ton is proposed.

In Canada they produce no more than the amount they consume, on the whole. It is true that on the western coast some of this commodity is imported from Canada, because it is not used in the western part of Canada. It is used in the eastern part, and in the eastern part of Canada they have to import the commodity from the United States.

We have heard a great deal here about some imports from Canada and about duty upon the Canadian commodities which are being brought into this country. I want to suggest to Senators that this is no time for the United States to build a tariff wall merely for the purpose of retaliation. That has cropped out in the consideration of this bill a number of times. Even on limestone a high tariff is asked simply because on the western coast there is one concern which may export some limestone to the United States, and the reason given for the request for the duty was simply as a matter of retaliation, because Canada has a tariff upon the importation of limestone there; and so with other commodities.

Canada reaches from one ocean to the other. Her conditions are varied, very much the same as they are in the United States; but this is no time to build up a tariff wall for the sake of retaliation against what Canada has done. On the other hand, it seems to me that we should try to bring about a better feeling, a more reciprocal condition, between this country and Canada.

The evidence on which the committee acted in making this recommendation, or, at any rate, the evidence which was before the committee, was erroneous. The witness who made the

statement was not aware of the facts. I will just call attention to what he has to say.

The principal witness asking this duty was Mr. Northen, of Hopkinsville, Ky., representing the fluorspar producers of Kentucky and Illinois. I may say that the great production of this commodity is in the State of Illinois, reaching over into the State of Kentucky. There is some of it produced in my State, New Mexico, and some in various other States, but 85 or 90 per cent of it is produced in the State of Illinois. That witness, whose testimony was taken, doubtless, as the basis for this rate of duty, on page 1424 of the hearings before the Committee on Finance, made this statement:

> This tariff should not be less than the difference between the cost of producing the spar at the mines in this country and the cost of the spar landed from foreign countries without duty paid, which cost, as evidenced by the data secured from the United States Government records, is approximately $10.50 per ton during the first six months of 1921.
>
> The cost of this foreign spar, $10.50, includes cost of production, transportation, and profit to the foreign producer, as compared with the average cost of $20.25 in this country, without profit to the producer.

The facts do not sustain that statement; but, to the contrary, we find a statement from the Geological Survey regarding this importation, and here is what it says:

> The imports of fluorspar in 1920 were equivalent to about 15.9 per cent of the domestic shipments of gravel fluorspar, as compared with about 5.7 per cent in 1919.
>
> According to the values reported, including the duty of $1.34 a short ton ($1.50 a long ton) and the ocean freight, estimated to be about $4.50 a ton, the average cost of imported English fluorspar at the docks in the United States was $14.27 a ton in 1920, compared with $23.24 for domestic merchantable gravel at the mine or mill.

Then the survey proceeds to discuss the availability of the American supply. It is true that it is mined principally down in Illinois and over in Kentucky, and the rail rate is pretty high from that section over into Pennsylvania, where it is principally used. I may say that it is used principally in the open-hearth production of steel, and it is becoming more in demand all the time.

Mr. President, I do not care to take up any more time regarding this item. I wanted to call the attention of those who propose this very great increase in rates to the item, and I ask Senators to observe the very extraordinary price which exists at the present time. For twenty-odd years the price ranged around $6 per ton. It is now just about four times that price; and, that being so, why increase this duty from $1.50 per ton to $5.00 per ton?

Mr. President, I move to strike out the numerals "$5.00" and to insert in lieu thereof "$1.50."

The PRESIDING OFFICER (Mr. STERLING in the chair). The question is on the amendment offered by the Senator from New Mexico to the amendment of the committee.

Mr. McCUMBER. Mr. President, I simply desire to put upon the record some of the facts and figures bearing upon this item which will be at least explanatory of the situation and the reasons which guided the judgment of the committee.

I agree with the Senator that the Underwood rate of duty was $1.50 per ton. The Payne rate of duty was $3 per ton. The House rate of duty presented to us was $5 per ton of 2,000 pounds, and the Senate committee gave practically the House rate per pound and applied it to the 2,240-pound ton, as all the fluorspar comes in upon the long-ton basis. So the Finance Committee rates are practically the same as those of the House committee.

An item which I think might be of interest in voting upon that is this: We had a rate of $3 per ton under the Payne-Aldrich law, and I am considering this both from the standpoint of protection and revenue. With a $3 per ton rate in 1910 we collected $127,464 in duty; in 1911 we collected $98,298; in 1912 we collected $70,115; in 1913 we collected $50,247.68. Then the duty was changed to $1.50 per ton, or just one-half the former rate, and the amount of duty collected immediately dropped, in 1914, to $13,668.48.

That was an enormous loss of revenue, and when we take into consideration the fact that the average price of labor in producing fluorspar in England, from which the great importations came, and the increase in the cost of production here, $3 per ton at that time would not have been more than the equivalent of $5 per ton at the present time, and with the difference in labor wages, the difference in the cost of transportation, and everything of that character, there would not be any more protection now at $5 per ton than there would have been at $3 per ton under the Payne-Aldrich law. I think, taking the differences which existed at that time between domestic and foreign production, and the differences which exist at the present time between cost of production in Great Britain and the United States, the relation of duty to these differences will be approximately the same. That is quite a little duty to be collected, and with the increase I believe we will receive a considerable increase in revenue.

I want to call attention to one more statement. I will not read all that is contained in the tariff-information service but only a single paragraph here, in which it is stated:

> Over 90 per cent of the domestic production of fluorspar is mined near Rosiclare, Ill. The field extends across the Ohio River into the adjoining counties of Kentucky. Fluorspar is also produced in New Hampshire, Arizona, and Colorado.

But I will consider only the 90 per cent which is produced near Rosiclare, Ill., and the information which we now have is that practically all those mines are now closed down, and closed down because they can not compete with the foreign importation prices.

I desire to read from a statement made by Mr. Benedict Crowell, president of one of the companies at Rosiclare. This was written June 30, 1921, but I find that the importing price to-day is about the same as he gave at that time, about $12.45 per ton. This is addressed to the then chairman of the Committee on Finance, Senator Penrose, and reads:

> This company has for many years been the largest producer of fluorspar in the United States.
>
> When, in January, 1921, the producers of fluorspar presented a memorial to the Ways and Means Committee of the House of Representatives asking for a tariff of $5 to $6.50 per net ton of 2,000 pounds on fluorspar all of the important mines in the the United States were in operation.
>
> To-day all mines are closed down.
>
> The price of gravel fluorspar in the United States to-day is about $20 per net ton f. o. b. the mines. The cost of fluorspar for the year 1920, based on sworn figures of the 17 largest producers of Kentucky and Illinois, was as follows:

Total tons produced	141,393
Total cost	$2,864,442.88
Average cost per ton	$20.25

I especially call attention to the next paragraph:

> Our principal foreign competition comes from England. The writer has just returned from England after having made a careful examination of the fluorspar industry in that country. The average cost of putting gravel fluorspar on the cars at the mines (in England) is now about $2.80 per ton United States currency, as compared with our cost of $20.25 per ton. English fluorspar is now being delivered in our eastern seaports, duty paid, at a cost of about $12 per ton.

In 1920 we imported 21,975 tons, valued at $265,630, or $12.41 per ton. That is 41 cents higher than was given by this witness as the price in 1921.

I doubt if this will ever go back in England to the pre-war prices, because, as the Senator from New Mexico well understands, the labor cost in England is, I think, nearly trebled what it was in 1914 and prior to the war. At least it is more than doubled. It has increased in percentages even higher than the labor costs in the United States, if I am correctly informed. I therefore assume that in all probability the cost of the foreign product landed in the United States will remain at about these figures for some time at least—$12 per ton. This witness proceeds:

> It is therefore perfectly apparent that the mines in America will stay closed down unless this differential is corrected by a duty. In my opinion the duty necessary to accomplish this is approximately the difference between these two figures.

As a matter of fact, it would have to be a little different if the Illinois and Kentucky mines were to compete in the eastern market, because the cost of bringing the article over from Great Britain is considerably less than the cost of transportation from Illinois to the eastern coast. The witness further said:

> In addition to the above, I would invite your attention to the fact that English spar mines are located less than 100 miles from ocean transportation, while American mines have a long and expensive rail haul. Furthermore, English producers have the advantage of shipping their fluorspar as ballast, taking the lowest possible ocean freight rate.
>
> The two elements to be taken into consideration are the lower cost of production of the English fluorspar and the lower cost of transportation, which, added, make a differential to-day against the American fluorspar of between $8 and $9 per net ton. There is no truth in the rumor that the English sources of supply are approaching exhaustion.

The Senator will recall the fact that the English supply comes from the dumps of old lead mines, and while the dump may be exhausted it is quite certain that the gravel from which the lead was extracted has not been exhausted in that section of the country. We have no evidence, at least, of any probability of any immediate exhaustion.

I call attention to the fact that, while this witness testifies that it will be necessary to make a differential of eight to nine dollars per ton, the committee has made all allowance for the probable reduction, both in the cost of production at the mines and in the cost of transportation, and has given $5 per ton instead of eight or nine dollars per ton.

I think for the most part this will be a duty from which we will secure considerable revenue, but I think it will operate both as a good revenue producer and also operate to protect our mines, so that the mines in the United States will be able

to operate, at least for some time to come, notwithstanding the fact that we have only given about from 50 to 60 per cent of what the mine owners thought was necessary for protection.

Mr. JONES of New Mexico. Mr. President, I do not care to prolong this discussion, but it seems to me, from what the Senator from North Dakota has said, that he demonstrated that this is no time in which to propose a revision of the tariff upon these commodities.

The situation in respect to this item is in great measure the same as that of hundreds and thousands of other items in the bill. The Senator from North Dakota has himself developed a state of facts which show that we have no information on which we can levy a duty at this time under any theory of tariff legislation, either for revenue or for protection.

Mr. McCUMBER. Mr. President, does not the Senator really agree with me that, taking the importation price of about $12.41 per ton, which is the last figure we have, and which is quite low; and taking into consideration what the price was before the war; taking into consideration the increase in labor wages in Great Britain, that we may safely assume that about $12 a ton, which is not very different from what it was a short time ago, will continue to be the price for some time, and if we have only given a duty of $5, when the real difference in the cost of production here and abroad, according to the most up-to-date figures, is about $20, we have given sufficient leeway for a reduction in the price in the United States? If the Senator will allow me, I agree with him that it is a difficult time to fix tariff rates.

Mr. JONES of New Mexico. I am glad the Senator concedes that. I think the facts surrounding this item emphasize that point, a point which I have tried to present here time and again during the discussion of the bill.

The Senator from North Dakota says that the mines are closed down because of importations. I do not believe the Senator intends to insist upon that as a statement of the facts. It seems to me that if the mines are closed down it is simply because there is no demand for the product. The open-hearth furnaces of the country are closed down. The consumption demand does not exist in the country. We are not being flooded by any great quantity of importations. As I stated to the Senator, the importations have been less than they were even before the war. Just let me give the Senator some figures.

In 1910 we imported 42,000 tons, leaving off the odd figures; in 1911, 32,000 tons; 1912, 26,000 tons; and in 1913, 22,000 tons. Those are the years prior to the war, and the lowest was 22,000 tons in 1913. In no year since that time has that amount been equaled. From 1910 to 1913, inclusive, the importations decreased from 42,000 tons to 22,000, and in no year since that time have they amounted to as much as 22,000 tons.

On the contrary, the most that was imported in any one year since that time was in 1920, when the importations were 21,975 tons, and in the very next year, 1921, when the imported price was higher, the foreign price in 1921 being $12.50, we imported only 5,560 tons.

In the first three months of 1922, the present year, we imported only 1,693 tons. That shows the least quantity in importation that we have had almost, only 5,000 tons in the whole year of 1921, while prior to the war we were importing at the rate of about 22,000 tons, although that decreased. There is nothing shown but a decrease of importations when the present duty is only $1.50. Ever since the $3 rate was put on in 1910 there has been an increase. When the $1.50 rate was put on the importations continued to decrease. So it is evident that there is something wrong with the industry rather than the enormous importations. The industry is not threatened with any effect, in my judgment, by importations from abroad.

I do not know where the statement of the witness came from which the Senator from North Dakota has read. It does not appear in the hearings before the Senate Finance Committee. I suppose it is something very recent. It is the statement of an interested party as to the cost of the English fluorspar, and if it only costs $2.50 to put it upon the boat in Great Britain and it comes over in ballast, I would like to know why it does not get here and enter this market for less than $20 a ton. If those are the facts, why is not the domestic production stopped entirely? The Senator certainly can not seriously believe that that reflects the actual condition.

I do not believe any sane person would think of enacting a tariff bill based upon any such information as that. Here the Senator tells us in one breath that it costs comparatively nothing to put it upon the boat, that it comes over here in ballast, and yet the price of it in the United States is over $20 per ton. It seems to me Senators should reflect upon the effect of such testimony as that.

Mr. McCUMBER. I hope before he draws that kind of mathematical conclusion the Senator will draw it from the evidence and not from his statement. I read the letter to show that the f. o. b. price at the mines is the figure. He gave the price in England and what it cost at the mine.

Mr. JONES of New Mexico. About $2.50, as I understand the Senator.

Mr. McCUMBER. That is, at the mine. But remember that the mines are 100 miles inland, and the product has to come by rail from the mines to the boat. There are the freight charges, though I do not know just what they are, as well as the cost of unloading from the railroad and loading onto the boat, and there is also the cost of transportation to this side.

Mr. JONES of New Mexico. The witness suggests that it comes over in ballast.

Mr. McCUMBER. Of course, he said it comes over as ballast, but he did not say it came for nothing.

Mr. JONES of New Mexico. But he means to infer that the transportation charge is comparatively nominal. That is what he means.

Mr. McCUMBER. Let me call attention to another thing, if the Senator will allow me. The Senator gave about 22,000 tons as the amount that came over in 1910.

Mr. JONES of New Mexico. In 1910 there were 42,000 tons imported.

Mr. McCUMBER. There were nearly 22,000 tons imported in 1921.

Mr. JONES of New Mexico. I gave the amount, 21,975 tons.

Mr. McCUMBER. That is a very good importation for one year.

Mr. JONES of New Mexico. But I called attention to the fact that the very next year the importations fell off to 5,560 tons.

Mr. McCUMBER. On account of the depression, which the Senator will admit, to a great extent.

Mr. JONES of New Mexico. The foreign price of it had increased from $10.75 to $12.50 per ton. So the trouble is not with any competition in the production of fluorspar, but it is depression of business in this country. I would like to know if we put upon stilts the price of this product, which the steel furnaces must have, will we encourage the resumption of business? I submit that the situation here can only tell us that this is no time to try to fix prices upon fluorspar through a tariff bill.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Hale	McKinley	Shortridge
Brandegee	Harris	McLean	Simmons
Calder	Johnson	McNary	Smith
Capper	Jones, N. Mex.	Newberry	Smoot
Curtis	Jones, Wash.	Nicholson	Spencer
Dial	Kellogg	Oddie	Sterling
Elkins	Kendrick	Page	Sutherland
Ernst	La Follette	Pepper	Townsend
France	Lenroot	Phipps	Wadsworth
Frelinghuysen	Lodge	Rawson	Warren
Gooding	McCumber	Sheppard	

The PRESIDING OFFICER. Forty-three Senators have answered to their names. There is not a quorum present. The Secretary will call the names of absentees.

The Assistant Secretary called the names of the absent Senators, and Mr. BURSUM and Mr. STANLEY answered to their names when called.

The PRESIDING OFFICER. Forty-five Senators have answered to their names. There is not a quorum present.

Mr. McCUMBER. I move that the Sergeant at Arms be directed to procure the attendance of absent Senators.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms will carry out the order of the Senate and secure the attendance of absent Senators.

Mr. BROUSSARD and Mr. SHIELDS entered the Chamber and answered to their names.

After a little delay Mr. ROBINSON and Mr. PITTMAN entered the Chamber and answered to their names.

The PRESIDING OFFICER. Forty-nine Senators having answered to their names, there is a quorum present. The question is on the amendment of the Senator from New Mexico [Mr. JONES] to the amendment of the committee, which will be stated.

The ASSISTANT SECRETARY. Strike out "$5.60" and insert in lieu thereof "$1.50," so as to read:

Fluorspar, $1.50 per ton.

Mr. SIMMONS. Let me understand exactly what this amendment is. I was not here when it was discussed. I will ask the Senator from Utah to explain it.

Mr. SMOOT. The rate on fluorspar is $5.60 a ton, as provided in the committee amendment. The Senator from New Mexico offered an amendment to strike out $5.60 per ton and insert $1.50 per ton.

Mr. SIMMONS. I ask for the yeas and nays on agreeing to the amendment to the amendment of the committee.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. McKINLEY (when his name was called). I transfer my pair with the Senator from Arkansas [Mr. CARAWAY] to the Senator from Minnesota [Mr. NELSON] and vote "nay."

Mr. SIMMONS (when his name was called). I transfer my general pair with the junior Senator from Minnesota [Mr. KELLOGG] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. WARREN (when his name was called). I have a general pair with the Senator from North Carolina [Mr. OVERMAN], which I transfer to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

The roll call was concluded.

Mr. BALL (after having voted in the negative). Has the senior Senator from Florida [Mr. FLETCHER] voted?

The PRESIDING OFFICER (Mr. McNARY in the chair). That Senator has not voted.

Mr. BALL. I transfer my general pair with that Senator to the junior Senator from Delaware [Mr. DU PONT], and let my vote stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Maine [Mr. FERNALD] with the Senator from New Mexico [Mr. JONES];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON];

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS]; and

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH].

Mr. COLT. Making the same announcement as on the former vote, I vote "nay."

The result was announced—yeas 15, nays 38, not voting 43, as follows:

YEAS—15.

Ashurst	La Follette	Sheppard	Stanley
Dial	Myers	Shields	Underwood
Harris	Pittman	Simmons	Walsh, Mass.
Harrison	Robinson	Smith	

NAYS—38.

Ball	Gooding	McKinley	Shortridge
Brandegee	Hale	McLean	Smoot
Broussard	Johnson	McNary	Spencer
Bursum	Jones, Wash.	Newberry	Sterling
Calder	Kellogg	Nicholson	Sutherland
Colt	Kendrick	Oddie	Townsend
Curtis	Ladd	Page	Wadsworth
Elkins	Lenroot	Pepper	Warren
Ernst	Lodge	Phipps	
France	McCumber	Rawson	

NOT VOTING—43.

Borah	Fletcher	McKellar	Reed
Cameron	Frelinghuysen	Moses	Stanfield
Capper	Gerry	Nelson	Swanson
Caraway	Glass	New	Trammell
Crow	Harreld	Norbeck	Walsh, Mont.
Culberson	Heflin	Norris	Watson, Ga.
Cummins	Hitchcock	Overman	Watson, Ind.
Dillingham	Jones, N. Mex.	Owen	Weller
du Pont	Keyes	Poindexter	Williams
Edge	King	Pomerene	Willis
Fernald	McCormick	Ransdell	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. SMOOT. I ask that we now take up paragraph 214, page 37.

The PRESIDING OFFICER. The Secretary will state the amendment.

The ASSISTANT SECRETARY. In paragraph 214, on page 37, line 21, after the word "and" where it occurs the second time, strike out "materials, crude or advanced in condition," and insert "materials (crude or advanced in condition)," so as to read:

Earthy or mineral substances wholly or partly manufactured and articles, wares, and materials (crude or advanced in condition), composed wholly or in chief value of earthy or mineral substances, etc.

The amendment was agreed to.

The next amendment was, on page 38, line 1, before the words "per cent," to strike out "21" and insert "35," so as to read, "if not decorated in any manner, 35 per cent ad valorem."

Mr. SIMMONS. Mr. President, the House rate upon this product is 21 per cent ad valorem. Under the act of 1913 it was 20 per cent ad valorem. Under the Payne-Aldrich law it was 35 per cent ad valorem. So that the proposition of the Finance Committee of the Senate is simply a proposition to restore the Payne-Aldrich rate.

Under the much lower rate of the present law a situation has arisen with reference to this product which, I think, shows conclusively that there is no justification for practically doubling the rate. The imports have been exceedingly small. The imports in 1914 of plain articles and ware were valued at $90,326, and of the decorated articles and ware only $22,000. The later statistics which are given by the Tariff Commission show, with respect to a part of the plain article, that the imports are less to-day than they were in 1914. In 1919 they were $90,000, while in the nine months of 1921 other articles and ware, composed of earthy or mineral substances, whether susceptible of decoration or not, not decorated, were only $26,000. Of other articles and ware composed of earthy or mineral substances, whether susceptible of decoration or not, decorated, for the nine months of 1921 there were imported only $7,022 worth.

I believe I might just as well discuss the other rate at this time. The other rate is increased from 28 per cent to 45 per cent. That is really the material rate. The first is not of very great importance; but the second is of much greater importance, because it applies to articles that are in common use. That rate is raised from 28 to 45 per cent ad valorem. As it seems to be impossible to separate the items, I will read with reference to both from the Summary of Tariff Information:

Sewer pipe is salt-glazed clay pipe used for conveying water or sewage and as conduit pipe for subsurface electric cables. Draintile are unglazed clay pipes used for draining the surplus water from marshy or flooded farm lands. Fireproofing tile or block are solid or hollow blocks of burned clay used in place of brick or concrete for walls and floors. Combustible material, such as straw, sawdust, or coal, is often added to the clay mix, so that the burned product is light in weight and very porous.

That is a general description of articles which are covered by one or the other of the rates fixed in this paragraph.

Now let me call attention to the situation with reference to the domestic production.

The domestic industry manufactures practically the entire domestic supply of these products. All machinery and equipment are produced or manufactured in the United States, and the domestic processes are at least as efficient as those used in any foreign country. Sewer pipe is produced in heavy presses, which shape the article from a clay slug; draintile and fireproofing block are made by forcing the clay through a die at the discharge end of the mixing or pug mill. In this manner finished green tile are produced in one operation.

The industry is widely distributed throughout the United States. There was $70,900,000 invested therein in 1914, divided among 769 establishments manufacturing sewer pipe and draintile, and 115 establishments manufacturing fireproofing tile or block. Ohio, New Jersey, Pennsylvania, Illinois, Missouri, Indiana, and Iowa are the most important producing States.

The manufacture of sewer pipe and draintile originated in England and continental Europe, but fireproofing tile is an American development growing out of the local steel-construction practice. The manufactures of sewer pipe and draintile are local industries in all foreign countries, the domestic industries producing enough to satisfy the home market.

The cost of these articles per unit of weight is small, and the careful packing necessary when long-distance shipments are to be made restricts the market of the domestic plants and practically prohibits international shipments.

This means that we are producing in this country all these products that the domestic market requires; that those products are produced in foreign countries, but are produced in localities to supply the immediate demand of the locality, and that on account of the packing that is necessary, the weight and bulk of the article, long-distance shipments are impracticable, and that as a result this situation practically prohibits the international shipments.

So we have a situation where we are protected against foreign competition by the very conditions and circumstances which environ the production of the articles here and abroad.

The production of specified clay products in the United States in specified years has been as follows:

Draintile, in 1914, $8,000,000—I shall not read all the figures, but merely give the round numbers—in 1918, $8,000,000; in

1919, $10,000,000; in 1920, the last year for which figures are given, $13,000,000.

Hollow building tile or block, in 1914, $8,000,000; in 1918, $13,000,000; in 1919, $16,000,000; and in 1920, $25,000,000.

Sewer pipe, in 1914, $14,000,000; in 1918, $15,000,000; in 1919, $16,000,000; and 1920, $22,000,000.

This makes a total of $60,000,000 of products, roughly estimated. That is the domestic production in 1920.

Now, what were the imports? The Tariff Commission says no statistics are available, but the amount is negligible. Why negligible, Mr. President? The part of this Tariff Commission report which I read a little while ago explains why. It is because of the fact that they are produced in foreign countries only for the purpose of supplying the local demand, and because of the nature of the article the requirements in connection with its packing and shipping are such as to make international shipments out of the question.

The importations, therefore, are negligible. At times small amounts of Canadian pipe and tile are imported from plants close to the international boundary, but those shipments from Canada are so insignificant and so local in their character that this great governmental agency investigating the matter for the purpose of ascertaining whether it was necessary and proper to put a duty on for the protection of American products does not attempt even to given the quantity that we received from Canada.

I think it may be safely said, Mr. President, from the data furnished us by the Tariff Commission when it was making investigation for the purpose of ascertaining whether this product, together with other products contained in the bill, was entitled to protection, that there are no importations of the product of any consequence, at least not sufficient to be mentioned. Therefore it would seem to me from that statement that there is no necessity for imposing a duty upon the product for the purpose of protecting American industry.

Now, let us see about the exports:

Small shipments of sewer pipe and building tile are exported to Canada, but the amount usually is negligible.

So that because of the nature of the product our importations from our neighbor across the border are so negligible that the Tariff Commission does not think it necessary to mention them or estimate them, and our exports across the border to Canada are so negligible that they do not estimate them or think it necessary to estimate them.

I do not wish to annoy Senators representing the committee, but under these circumstances I would like to have the Senator in charge of this particular item explain to the Senate, in view of these conditions, upon what principle they justify imposing this rate of duty upon the article. I have understood that these duties were imposed for the purpose of protecting an American-produced product against a foreign-produced product which was invading our markets and being sold at a price less than the American product could be produced for. But here we have a case where the American production in 1920 amounted to nearly $60,000,000 and the imports were absolutely negligible and the exports were absolutely negligible. If the committee has any reason for the imposition of this duty, I would like to hear it.

I can not myself conceive of any reason upon the statement made by the Tariff Commission. We set up the Tariff Commission, it will be remembered, for the purpose of having these investigations made, in order that they might furnish us the data upon which we might determine the question of whether we ought to give a duty for revenue purposes or protection purposes or not.

Mr. SMOOT. Mr. President, paragraph 214 is the basket clause. It takes all manufactured articles of earthy or mineral substances that are not provided for otherwise in the bill. It is true that sewer pipe falls in this paragraph. I will say frankly that if sewer pipe were the only thing that fell within the paragraph there would be no necessity of these rates. I wish to call the Senator's attention to the fact, however, that articles manufactured from feldspar fall within this paragraph. Porcelain is made from feldspar, and some of it is very expensive, indeed. It falls under this paragraph. All items that are not specially provided for in this schedule fall under this paragraph. The Senator from North Carolina referred to the Tariff Commission. I want to call the Senator's attention to what the Tariff Commission have said in relation to this product, of which I have just spoken:

The domestic production of feldspar is not sufficient to supply the domestic market. The combined feldspar production of Canada and the United States is equal, approximately, to one-half the world production. Practically the entire Canadian production is consumed in the United States.

In the Reynolds report is given the result of the investigation which was made as to gas radiants, which fall under this paragraph. The following is the result: The foreign value of each gas radiant was 2.6 cents; the landing charge was one-tenth of a cent; the selling price in the United States of the foreign article was 4.2 cents. Granting a profit of 33⅓ per cent only—not what was probably charged upon the article itself, but just allowing the 33⅓ per cent—it would require a duty of 253 per cent to equalize the foreign product and the product in the United States.

I recognize that under conditions of that kind we can not keep these commodities out, and I am frank to say that there are very few of them that are ever used. Therefore it would be unfair for me to stand here and say that there ought to be a duty of 253 per cent, as is recommended by the Reynolds report. Conditions do not justify any such position, nor has the committee taken any such position. The position they do take is that on the undecorated wares—that is, the great majority of the articles falling within this paragraph—there shall be a duty of 35 per cent and a duty of 45 per cent on the decorated, giving 10 per cent differential between the plain and the decorated.

The Senator from North Carolina refers to the fact that in the House bill the rate on the undecorated was 21 per cent, and that it has been increased to 35 per cent, and on the decorated the House bill was 28 per cent, and that has been increased to 45 per cent.

Of course, the Senator from North Carolina knows that the House rate was based upon the American valuation, and the rates which we recommended in the pending bill as reported to the Senate by the Committee on Finance are based upon the foreign valuation. Take this item alone to which I have referred and see what a difference it would make.

Mr. SIMMONS. May I ask the Senator from Utah a question?

Mr. SMOOT. Yes.

Mr. SIMMONS. Where do the articles of which the Senator speaks come from?

Mr. SMOOT. Most of them come from Germany, and a few of them come from England, but, so far as the feldspar products are concerned, most of them come from Canada. Canada and the United States produce at least one-half of the feldspar products which are made in the world, and the United States takes practically all of the feldspar products which are made in Canada.

Mr. President, I do not know whether there is any necessity of reading any further in relation to this subject. I could read from the report of the Tariff Commission as to the necessity of the rates which are here mentioned and call attention to the fact that feldspar is an important constituent of scouring soap, and where feldspar is used and for what purposes; but I do not believe it would be of any interest at all to the Senate for me to do so.

As to this basket clause, Mr. President, no Senator can get up upon the floor of the Senate and say that everything which falls within the clause should bear the exact duty for which the basket clause provides.

Mr. SIMMONS. Can the Senator from Utah give us any idea what falls within the basket clause? The Senator has spoken of feldspar, which is made in Canada. I did not know until now that it costs 45 per cent more to make feldspar in Canada than it does in this country. I have been under the impression that there was not very much difference between the labor costs and the material costs in this country and in Canada.

Mr. SMOOT. It all comes into this country.

Mr. SIMMONS. The Senator from Utah says that we take all the feldspar that Canada produces; that it requires the Canadian production, together with what we produce, I suppose, to supply us; but can the Senator tell me what products other than feldspar fall under this basket clause?

Mr. SMOOT. All products made out of earth which are not otherwise specially provided for.

Mr. SIMMONS. The Senator can not specify them. If the Senator will pardon me, as I understand, the Finance Committee undertook to frame a scientific tariff so as to bring the price of the foreign article when sold in this market and the price of the domestic article up to a fair degree so as to produce an equality of competition. I am wondering how they settled upon what rate was necessary to bring about that equality of competition if they did not know what articles were included in this basket clause. How could they reach the conclusion as to what rate was necessary unless they knew what articles were covered by the basket clause? I should like to have the Senator, if he can, tell us what articles are in this basket clause,

and then, after he has told us that, I should like to have him tell us, if he can, what was the domestic selling price of that article and what was the selling price of the foreign article in this market, so that we may test the rate of duty which is provided for the bill and see whether it is a just and reasonable rate or not. That is the reason I should like to have that information.

Mr. SMOOT. Mr. President, the present law bears the name of the distinguished Senator from North Carolina, and he ought to know what articles fall in the basket clause, if he thinks anyone else ought to know. He was the father of the basket clause in this schedule of the existing law, and I ask him why he allowed various commodities to fall within the basket clause in the bill framed by him?

Mr. SIMMONS. I was not endeavoring to frame a tariff bill upon the same principle that the Senator has helped frame the pending bill.

Mr. SMOOT. The Senator knows enough about tariff legislation to know that a basket clause not only in this schedule but in every other schedule is a catch-all clause. It covers many items, some of them of importance and some of them of so little importance that statistics of them are not kept in the Treasury Department. Mr. President, a basket clause is provided so that if between the passage of one tariff bill and the passage of the succeeding tariff bill an article shall come into use that was not known in commerce before—and instances of that kind always happen—it may be covered by a basket clause. The very name "basket clause" means that it is a catch-all clause, but no living man can say what is going to fall within that basket clause. If an industry develops——

Mr. SIMMONS. Mr. President, may I ask the Senator a question, if it will not offend him?

Mr. SMOOT. Of course the Senator could not offend me; it would be impossible for him to do so.

Mr. SIMMONS. I wish to say, Mr. President, that when I was preparing the present law—and that was about 10 or 12 years ago—I was preparing a law for revenue purposes, and it was not necessary for me to measure things with the golden scales with which the Finance Committee tells us they measure the rates provided in the pending bill. We put the duties on for revenue purposes solely, and did not measure them scientifically. But let that go. The question I want to ask the Senator——

Mr. SMOOT. Mr. President, I want to say to the Senator that from this basket clause as well as all other basket clauses we expect to get revenue, just as the Senator expected to get revenue under the basket clauses provided in the bill framed by him, but no living man can say what commodities will fall within a particular basket clause. I can tell the Senator some of the items.

Mr. SIMMONS. Let me ask the Senator another question, as I should like to obtain the information. The duties which the committee is now proposing to impose include, do they not, sewer pipe and draintiles about which I have read?

Mr. SMOOT. Every word the Senator stated in his remarks as to the production and consumption in the United States and also the importations under this schedule was correct; there is no doubt about that. I even opened my remarks by saying that I knew that sewer pipe fell within this paragraph; but so do many other articles manufactured or partially manufactured from any kind of earth that may be known to-day or that may be discovered and come into use between now and the time another tariff bill shall be framed.

The Senator wants to know some of the articles that fall in this basket. I am only going to give him a few of the A's; I am not going to go through the list from A to Z, but really it is so important that I think the Senator ought to know some of the articles.

The first is actinolite; then adamantine; then artificial teeth——

Mr. SIMMONS. Mr. President, may I inquire what the first article is?

The PRESIDING OFFICER (Mr. ASHURST in the chair). Does the Senator from Utah yield to the Senator from North Carolina?

Mr. SMOOT. No; I do not wish to yield at this time; I want the Senator from North Carolina to get the information for which he is asking.

Mr. SIMMONS. I merely want the Senator to tell what the first article he read is.

Mr. SMOOT. Of course, when I give the Senator the information, then he wants another explanation. I know the Senator has got to take up one hour of time until the Senator from New Mexico returns, and he wants me to help him out, and I am going to do so for just a few moments, and then I am going to quit. I think I named artificial teeth. I think the American people, Mr. President, are going to suffer greatly because of the fact that a duty of 35 per cent ad valorem is imposed on artificial teeth. I can see ruin overspreading the country from one end to the other because it is proposed to place a duty of 35 per cent on artificial teeth.

Then there is ayrstone; but, Mr. President, I am not going to take any more of the time of the Senate. I want to say that under this paragraph we have given the same rates on the basket clause that were given in the Payne-Aldrich bill, as the Senator says. There is no question at all about that. We do not deny it. We say frankly that that is what has been done, and no living man can say what will fall under this paragraph during the life of this bill.

Mr. McCUMBER. Mr. President, I ask unanimous consent that when the Senate closes its session on this calendar day it recess until to-morrow at 11 o'clock a. m.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. SIMMONS obtained the floor.

Mr. POINDEXTER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will please state it.

Mr. POINDEXTER. What is the question now?

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in line 1, page 38.

Mr. POINDEXTER. I should like to inquire how many times the Senator from North Carolina has spoken on this subject?

Mr. SIMMONS. I have spoken once. I will answer the Senator. Does the Senator desire to cut me off in my youth?

Mr. POINDEXTER. No; not at all. I really am just inquiring for information. I am sure the Senator does not want to delay action upon the matter.

Mr. SIMMONS. No.

Mr. POINDEXTER. I intended rather to direct the inquiry to the Senator from Utah.

Mr. SIMMONS. The very last thing I would do would be to delay action on this particular item.

Mr. President, the Senator from Utah has furnished me with a list of six different things that he says are in the basket clause. I do not know that I ever heard of any one of them except artificial teeth. I should like to inquire of the Senator if there is anything in the hearings that shows the difference between the foreign selling price of these five articles and the American selling price in the American market? If there is no evidence of that sort, I should like to ascertain from the Senator from what source he derived the information necessary to enable him to make this scientific tariff upon the principle upon which we have been told that it was made?

Mr. SMOOT. I will tell the Senator where he can get it, but really I do not think we care to answer any more questions. If the Senator will get Vandegrift's "United States Tariff" and look in that volume, he will find the items falling under each of the paragraphs.

Mr. SIMMONS. Does it give the selling price in this market of the foreign and domestic articles?

Mr. SMOOT. Oh, no.

Mr. SIMMONS. That is what I wanted to get at.

Mr. SMOOT. The existing law, as I remember, is paragraph 81, and the Senator can find not only these but a great many other articles there.

Mr. SIMMONS. Mr. President, to be serious about this matter, in the Tariff Commission Summary that we are furnished here I suppose they intended to include the various and sundry items that come in under the basket clause. They have five different tables of things that come in under the basket clause; and I find that the total amount of imports of those five particular things for the nine months of 1921 was somewhere around $65,000 only. The imports of these n. s. p. f. items about which the Senator makes so much contention were absolutely negligible.

But, Mr. President, suppose we were to assume, suppose I should concede, that there was some justification for these duties upon the specific articles of which the Senator has given me a list here as coming under the basket clause. Suppose I were to concede, I say, that the difference in the selling price here in this market of the foreign and the domestic products was such as to justify a duty of 45 per cent as to them. The Senator admits that sewer pipe and drainage tiles are also included in this item and subject to this duty.

Mr. SMOOT. Thirty-five per cent.

Mr. SIMMONS. Thirty-five per cent duty. I have shown, and the Tariff Commission's report shows, that the domestic pro-

duction of those items is about $60,000,000, and that there are no imports, or no imports to speak about.

Mr. SMOOT. There will not be, as far as the interior of the country is concerned.

Mr. SIMMONS. If the Senator felt that it was necessary for him to include these specific items that he says come in under the basket clause, I want to ask him why he included sewer pipe and drainage tile, the domestic production of which amounts to $60,000,000, and there are no imports? Why does the Senator want to put a duty of 35 per cent upon those items? The Senator has not undertaken to justify his duty of 35 per cent upon sewer pipe and drainage tile. He has only undertaken to justify it upon these specific items that I suppose nobody except some scientist ever heard of before, outside of artificial teeth. I will admit, for the purpose of argument, that he had some justification for imposing a duty upon those basket-clause items, but the other two items are tenfold more significant than all of those put together, namely, the item of sewer pipe and the item of drainage tile. They are used by all the people of this country—farmer, merchant, householder, everybody—and I have shown to the Senator that with a domestic production of $60,000,000 last year there were no imports and no exports, and yet under this clause the Senator wants to impose a duty of 35 per cent upon those articles. I say it is an outrage upon the people of this country who use these articles to impose any such rate as that upon them.

But, Mr. President, I do not wish to take up the time of the Senate. I am anxious to have a vote upon this question, and I ask now that we have a vote. Before the vote is taken on the committee amendment, I move to strike out, in line 1 of the Senate committee amendment, "35" and to insert "20."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 38, line 1, in the amendment of the committee, in lieu of the sum proposed to be included by the committee, "35," it is proposed to insert "20."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from North Carolina to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question now is on the committee amendment.

The amendment was agreed to.

The VICE PRESIDENT. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On page 38, line 2, it is proposed to strike out "28" and insert "45," so as to read:

If decorated, 45 per cent ad valorem.

Mr. SIMMONS. I move to strike out "45" and insert "20."

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from North Carolina to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question now is on agreeing to the committee amendment.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 38, line 4, the committee proposes to strike out "15" and insert "20," so as to read:

Gas retorts, 20 per cent ad valorem.

Mr. ROBINSON. Mr. President, I do not think it will require more than a few moments to dispose of this paragraph.

The rate proposed by the House on gas retorts is the same as that provided in the act of 1909, and I do not know that that rate is excessive; but to the latter clause, "and magnesia clay supporters, consisting of rings, rods, and other forms for gas mantles, 35 per cent ad valorem," the committee proposes an amendment striking out "35" and inserting in lieu thereof "50."

Nothing in the information furnished the Senate justifies these increases. While the figures on production of these articles are not available, the information furnished by the Tariff Commission is to the effect that practically all of the retorts used in the United States are of domestic manufacture. The imports are stated to be small. In 1914, 455 retorts were brought in, valued at $17,627. In the year following approximately one-third of the number imported in 1914 came in, namely, 152 retorts. As to the tariff proposed on materials for gas mantles, the ad valorem rate of 50 per cent appears to be neither necessary nor justified.

I therefore move to amend the committee amendment by striking out "20" and inserting in lieu thereof "10."

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question now is on the committee amendment.

The amendment was agreed to.

The next amendment of the committee was, on page 38, line 5, after the words "lava for burners" and the comma, to insert "10 cents per gross and 15 per cent ad valorem" and a semicolon.

Mr. ROBINSON. I move to strike out "15," in line 5, and insert "5" in lieu thereof.

The amendment to the amendment was rejected.

The amendment of the committee was agreed to.

The next amendment of the committee was, on page 38, line 7, to strike out "35" and insert "50," so as to read:

And magnesia clay supporters, consisting of rings, rods, and other forms for gas mantles, 50 per cent ad valorem.

Mr. ROBINSON. I have already made some comment on this amendment. Under the information furnished the Senate there appears to be no justification whatever for it. These articles are of common use, and the rate of 50 per cent ad valorem is excessive. I therefore move to strike out "50" and insert "25."

The amendment to the amendment was rejected.

The amendment of the committee was agreed to.

The next amendment of the committee was, on page 39, line 11, to strike out "28" and insert in lieu thereof "50," so as to read:

That none of the above articles shall pay a less rate of duty than 50 per cent ad valorem.

Mr. ROBINSON. I understand that the Senator from New Mexico [Mr. JONES] is interested in this amendment.

Mr. JONES of New Mexico. That paragraph, together with some succeeding paragraphs, went over last night.

Mr. SMOOT. Does the Senator want to return to paragraph 212, providing duties on earthenware and crockery?

Mr. JONES of New Mexico. I was going to suggest that we return to paragraph 212.

Mr. SMOOT. I ask that we go back to paragraph 212.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. JONES of New Mexico. Mr. President, in paragraphs 212 and 213, relating to earthenware and chinaware, there is quite an increase in the duty. I understand that the Senator from New Jersey [Mr. FRELINGHUYSEN] is prepared to give data which he believes will justify this increase in the rate of duty on the articles mentioned in those paragraphs. They relate to earthenware and chinaware, something in use in every home in the land. The increase is very material, and the commodities are produced very largely in the State of New Jersey. I am sure the Senator from New Jersey would like to have something to say in justification of what the committee proposes.

Mr. McCUMBER. Mr. President, before we proceed to that I want to ask the Senator from Arkansas if we can agree, without any debate on it, to reconsider the vote by which the committee amendment in line 7, page 238, was agreed to.

Mr. ROBINSON. That is agreeable to me.

Mr. McCUMBER. I ask that the amendment in paragraph 215, page 38, line 7, where the committee proposed to strike out "35" and insert in lieu thereof "50" as the duty on magnesia clay supporters, be disagreed to.

The VICE PRESIDENT. Is there objection to reconsidering the vote by which that amendment was agreed to? The Chair hears none, and it is reconsidered.

Mr. McCUMBER. I ask for a vote on the matter now, and request that the Senate disagree to the committee amendment.

Mr. ROBINSON. I shall support the motion which the Senator from North Dakota now makes. As I stated a few moments ago, I do not believe the higher rate provided by the committee amendment is justified by any facts which appear in the record.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was rejected.

Mr. McCUMBER. Now, I ask that we return to page 36, paragraph 212.

The VICE PRESIDENT. Without objection, the consideration of that paragraph will be resumed.

The amendments of the Committee on Finance to paragraph 212 were, on page 36, line 8, before the word "plain" where it occurs the first time, to strike out "if"; in line 12, before the words "per cent," to strike out the figures "25" and to insert "45"; in the same line, before the word "painted," to strike out "if"; in line 13, after the word "printed," to strike out "or ornamented" and to insert "ornamented," and at the beginning of line 16, before the words "per cent," to strike out "28" and insert "50," so as to make the paragraph read:

PAR. 212. Earthenware and crockery ware composed of a nonvitrified absorbent body, including white granite and semiporcelain earthenware, and cream-colored ware, and stoneware, including clock cases with or

without movements, pill tiles, plaques, ornaments, toys, charms, vases, statues, statuettes, mugs, cups, steins, lamps, and all other articles composed wholly or in chief value of such ware; plain white, plain yellow, plain brown, plain red, or plain black, not painted, colored, tinted, stained, enameled, gilded, printed, ornamented, or decorated in any manner, and manufactures in chief value of such ware not specially provided for, 45 per cent ad valorem; painted, colored, tinted, stained, enameled, gilded, printed, ornamented, or decorated in any manner, and manufactures in chief value of such ware, not specially provided for, 50 per cent ad valorem.

Mr. FRELINGHUYSEN. Mr. President, it is true that the pottery industry is a large industry in my State, but it is not confined to my State alone. It extends into Ohio, West Virginia, New York, and other States, and has grown to very large proportions.

Paragraphs 212 and 213 are both related more or less to the entire pottery industry, and at the present time, owing to the low labor costs and low exchanges in Germany and Czechoslovakia, as well as to the low wages in Japan, the customhouse invoices show that it is necessary to have the duties laid in these paragraphs. The information on this subject is all contained in an analysis made by customhouse appraisers, which I will submit later.

As I understand it, the Senator from New Mexico has very little or no pottery industry in his State. But I understand he has been making a study of these two schedules, and I am anxious to get his views. The committee have very carefully examined comparable prices in the competitive countries, and feel that these rates should be imposed, and that they are fairly adequate.

We submit these paragraphs to the Senate, and I should like to hear the Senator's views as to why he thinks the rates are too high or too low. The industry in New Jersey thinks that they are too low, but I should like to hear from the Senator, in view of the study he has made, and therefore I give way to him.

Mr. JONES of New Mexico. Mr. President, the remarks of the Senator from New Jersey are in keeping with what is evidently the settled purpose of the majority of this body, especially the majority of the Finance Committee. From the time we started into an investigation of this bill there evidently has been a deliberate purpose to prevent an investigation of these items.

I believe at this time I shall call attention to what appears to be the spirit prevailing in this Chamber. This morning's Washington Post, in its principal editorial, criticized the Senate for its course upon this bill. It criticized both sides of the Chamber. The editorial reads, in part:

> The situation in the Senate at this moment constitutes an indictment of the good sense of the Republican Party. At this moment, when Congress is under the fire of criticism and the record of the Republican Party is under scrutiny, when millions of voters are making up their minds on the evidence presented, the Republicans of the Senate are making a record of absenteeism and neglect of public business that will surely return to plague them.
>
> The tariff bill is before the Senate. It should either be passed or defeated. The debate upon the measure is half-hearted on the part of the Republicans and of a filibustering character on the part of Democrats.

Mr. President, I think it is quite true that the debate on this bill, so far as the Republicans are concerned, is half-hearted. Apparently no one on the other side of the Chamber is willing to get up voluntarily and defend the bill or any of the items in it. So far as the filibustering is concerned, I deny it. We have been trying to bring out the facts regarding this bill, and that they should be brought out is demonstrated by what has occurred here time and again.

In paragraph 210 of this bill, a paragraph which relates to the cheapest kind of pottery, the cheapest kind of tableware, the Finance Committee has brought in a recommendation of rates about twice as high as the rates under existing law. There was not only no justification for it, but the committee itself finally receded from what it did and went back practically to the rates under existing law.

I want to call attention to that particular item because it is in connection with the subject which we are to discuss tonight. It is a paragraph of this bill which relates to a tax upon common earthenware, the commonest kind of tableware. They increased the present rate by 100 per cent, and yet no one came on this floor to justify what they had done.

Not only was there no justification for it, but the evidence before the committee itself, from the witnesses in the industry, from one side of this country to the other, in their deliberate testimony upon an investigation of the Tariff Commission, showed that they did not want any increase in these duties.

That testimony was before the committee. It came from a source on which the committee relies, or pretends to rely generally in the framing of this bill. Regarding that part of the industry, I read from page 20 of the Tariff Commission's report on this pottery industry. This gives a summary of what was said by the witnesses, who were manufacturers of the items included in paragraph 210.

The manufacturers of jars, jugs, stone churns, and flower pots of Louisville said there was no competition from imported ware.

Peters, Zanesville, manufacturers of flower pots, jardinieres, vases, fern pots, window boxes, and hanging baskets, said, "We do not know of imported ware in direct competition."

Lowry, Roseville, Ohio, manufacturers of baking and pudding pans, cooking kettles, coffee pots, meat roasters, and pie pans, said they did not know of any competition.

From Evansville, Ind., stoneware food containers and household specialties, nothing imported competitive.

From a manufacturer of stoneware jars, jugs, fruit jars, water filters, chambers, filling pots, and Indian vases the witnesses said there was no competition. Then, from Fort Worth, Tex., stoneware generally, they said: "We do not know of any imported goods sold in competition with our line."

So on through that line under paragraph 210, and, notwithstanding the evidence before the committee, the committee brought in here an increase of 100 per cent in the duty. That shows the credence which we should give to a mere suggestion of the committee. But the Senator from New Jersey wants to content himself with saying that the committee has considered this thing, that the committee has recommended these rates. I submit that no Senator has any right, under the evidence which has appeared heretofore in the consideration of the bill, to put any reliance upon what the committee recommends, but that we should have some reason, we should have some facts here, to justify the proceedings.

They talk about the Democrats filibustering against the bill, but I deny it. We are simply trying to bring out the facts, and I submit that the Senator from New Jersey has no right simply to say that the committee has recommended these rates, and therefore they should be adopted.

Not only is what I have said true regarding paragraph 210, where the committee receded from its action in compliance with all the testimony where it had acted in raising the rates by 100 per cent without any facts to justify them, but that has occurred in many instances in the bill. We can not support these rates by the facts, and I submit that the Senator from New Jersey is begging the question when he undertakes to come before us and say that simply because the committee recommended these things they should be adopted.

Mr. FRELINGHUYSEN. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from New Jersey?

Mr. JONES of New Mexico. I yield.

Mr. FRELINGHUYSEN. I will say to the distinguished Senator from New Mexico that section 210 has been passed. The debate is on section 212, and I had hoped we could in a friendly way debate that paragraph, with paragraph 213, and get through. I should like to have the Senator point out wherein he believes the rates in paragraph 212 are not appropriate. He has been studying them, and I think possibly he should point that out, he being a member of the committee.

Mr. JONES of New Mexico. Yes; I am a member of the committee, but the distinguished Senator from New Jersey knows that these rates were not put here by the committee as a whole. He knows that they were framed in secret session by the Republican members of the committee and that the Democratic members of the committee had nothing to do with them. We do not know the reasoning which actuated the majority of the Finance Committee in framing the rates.

I submit that this is a pitiable spectacle. Here is an attempt to increase the taxes upon necessary articles that go into every home in the land, and the committee undertakes to impose this duty without even a suggestion of a reason for it. I submit, Mr. President, that they who will use the great taxing power of the Government, who will put a burden upon the people of the land that will affect every household in the land, ought at least to give some kind of an excuse, if not a reason.

Mr. President, I believe that the evidence in the case will not justify what has been done. In the first place, if the Senator from New Jersey will only consider the testimony which was submitted to the Ways and Means Committee of the House and to the Finance Committee of the Senate he will find that the rates proposed by the committee are higher than those engaged in the industry asked. I suppose that somebody made a request of the Finance Committee to put these duties where they are, but it so happens in this case that the leader in the industry did not request duties as high as the Finance Committee proposes.

There are two paragraphs here, paragraph 212 and paragraph 213. Paragraph 212 relates to nonvitreous, nonabsorbent earthenware product.

Paragraph 213 relates more especially to chinaware and porcelain. On the proposition of paragraph 212, I desire to read a little of the testimony bearing upon the question to show on what flimsy grounds the majority members of the Finance Committee would recommend this increase of taxation. Under paragraph 212 the rates will be increased about 50 per cent and under paragraph 213 not quite so much, but a very material increase. Under paragraph 213 the present rate on the undecorated ware is 50 per cent and on the decorated ware 55 per cent. Under the Payne-Aldrich law the rate on the undecorated ware was 55 per cent and on the decorated ware it was 60 per cent. The Finance Committee recommends 70 per cent, and this is the kind of testimony:

George C. Dyer, representing the Sanitary Potters' Association, of Trenton, N. J., in speaking of sanitary ware, shows us that the production of that ware in the United States was $27,000,000 per year, and that during five years there had only been imported $40,282 worth. There we have an annual production of $27,000,000 and a total importation for five years of $40,000, and the only excuse given by him as to why there should be an increase in duty was that some time prior to the war some firm in San Francisco made an offer to a firm in Japan for some of this sanitary ware. None of it is being imported now, and for five years there has been imported only $40,000 worth, while the annual production is $27,000,000.

Mr. STANLEY. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from Kentucky.

Mr. STANLEY. Does not the Senator from New Mexico see the unspeakable outrage of permitting consumers in San Francisco to buy from Japan or somewhere else, when they can get the same thing at an exorbitant price from a trust as near to San Francisco as some town in New Jersey? Think of it. The market of San Francisco right at the door taken away from them. It is almost unbelievable.

Mr. JONES of New Mexico. I must confess that a great many people here are very much opposed to letting anything escape. That seems to be the purpose of the bill. Whenever there is a possibility of anything coming into this country from abroad, the Senator from New Jersey and the Senator from Idaho [Mr. GOODING], to whom we listened this afternoon, would at once raise the tariff barriers still higher. Their one object is to prevent absolutely anything from entering the borders of the United States of America.

The next witness in regard to this earthenware was Mr. Theodore Jones, representing the wholesalers of earthenware and china, of Boston, Mass. He submitted a brief and showed what the imports were of the entire schedule. I may say at this point that the chief imports under both these paragraphs are decorated tableware. But instead of increasing they have been decreasing, even the decorated ware. The proportion to the domestic production is comparatively large, but decorated ware is a new industry in the United States, comparatively, and that is a matter of taste more than anything else, to which I shall refer in more detail later.

Mr. FRELINGHUYSEN. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from New Jersey.

Mr. FRELINGHUYSEN. Did I understand the Senator to say that the imports of decorated and ornamented ware have decreased?

Mr. JONES of New Mexico. I do.

Mr. FRELINGHUYSEN. That is not my information.

Mr. JONES of New Mexico. I will explain that to the Senator before I get through. I will give him the figures on it. What the Senator has in mind is that in dollars the present importations are pretty large. They are nearly as large, if not quite as large, as before the war. But the evidence before the committee showed that foreign prices at the present time are 250 per cent of the pre-war prices, and while the amount of importations in dollars may appear large, the actual quantity importation is not more than one-half of what it was before the war.

Mr. FRELINGHUYSEN. Does the distinguished Senator from New Mexico realize the reason for that?

Mr. JONES of New Mexico. I was not undertaking to give any reason for it. I was stating the facts.

Mr. FRELINGHUYSEN. Is it not due to the fact that in some of those countries they have an export price over the domestic selling price, and that the selling price in the American market is much higher than the selling price in the foreign country?

Mr. JONES of New Mexico. The Senator has in mind Germany.

Mr. STANLEY. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from Kentucky.

Mr. STANLEY. It strikes me, if that be the case, that is a better reason why it is not necessary to impose an exorbitant duty. Senators must be intellectually sincere. I will not say honest, but they must not blow hot and cold. One Senator gets up and says we have got to put this duty on to prevent dumping, the crime of selling for less abroad than at home. Another Senator gets up and says we have got to put the duty on because they are not dumping, that they are charging more for goods which are sold abroad than those which are sold at home. One or the other of the reasons is bound to be a bad reason; both of them may be bad, but both of them can not possibly be good.

Mr. JONES of New Mexico. Mr. President, I have heard from the other side of the Chamber time and again reference to the situation in Germany, and it looks to me as if this bill were framed solely against Germany.

I hear "Germany" every day and in connection with almost every item in the bill, and if there is anything imported from Germany at all in connection with a schedule or coming under a schedule we are at once frightened by the ghost of Germany.

Mr. FRELINGHUYSEN. Mr. President——

Mr. JONES of New Mexico. I want to say to the Senator that now, three and one-half years after the war, Germany is not sending to this country anything like the quantity of these wares she was sending prior to the war. There is no excuse for becoming frightened at Germany.

Mr. FRELINGHUYSEN. Mr. President, I should like to ask the distinguished Senator whether he has made an investigation as to prices in Japan, Czechoslovakia, and France?

Mr. JONES of New Mexico. Mr. President, I have those prices; I have made an investigation of them; and I will say to the Senator that the evidence which the Senator himself had shows that the comparable chinaware from Japan is selling in this market to-day 25 per cent above the selling price of the domestic product, and that as to other wares from Germany, Czechoslovakia, and other countries there can not be found a single article of decorated chinaware which has come to this country from England, France, Germany, Czechoslovakia, or Japan but is selling in this market to-day practically above the selling price of the domestic article. Senators on the other side were told that by the Tariff Commission, on which they should rely, even if they do not.

Mr. President, the Senator from New Jersey is frightened at Germany. I want to call attention to the fact that under the heading of earthen, stone, china ware, parian, porcelain, and bisque, not decorated or ornamented, imports are given in a very recent compilation of our foreign trade by the Department of Commerce. It includes the year 1913 and the calendar years from 1918 to 1921, inclusive. I find in looking at that compilation that as to Germany in 1913 the kind of ware which I have described was imported to the extent of $508,001, and that in 1921 the importations only amounted to $306,000—only about one-half. As I said a while ago, the price is 250 per cent of the pre-war price. The same thing is true of the decorated ware from Germany. Prior to the war, in 1913, Germany exported to the United States $3,235,517 worth, but in 1921 she exported only $1,902,329 worth; and yet Senators on the other side of the Chamber talk about this country being flooded with importations from Germany.

If Germany has all this cheap labor and cheap power and cheap material, and the prices are higher in this country, why does not Germany send the wares over here and get paid for them in our gold at the prevailing high prices? Senators may talk about the difference in exchange or other conditions, but the proof of the pudding is in the eating. If Germany can do these things, why, three and one-half years after the war, is she do doing them?

So with everything else which is discussed in connection with Germany. Last year the imports from Germany into the United States amounted only to about $90,000,000. Our exports to Germany amounted to nearly $400,000,000. If Germany can do these things, why is she not doing them? That, however, is the ghost which rises here every time any of the paragraphs is mentioned. We are told how cheap labor is in Germany; we are told about the low gold value of the German mark. Senators on the other side talk about all these things, about what Germany theoretically may do; but Germany is not doing them and it is now three and a half years since the close of the war. When is Germany going to do them? Is that what Senators on the other side want the people of this country to understand—

that under these facts they are now engaged in passing into law the highest tariff bill ever known to this country and that they are doing it because over in Germany there is a depreciated mark and cheap labor? Whatever the facts may be as to that, they are not interfering with the United States market, and every bit of German decorated ware which is coming into the United States is selling to-day in the American market for a higher price than is the comparable domestic article.

Mr. President, I desire to read just a little from the testimony of Mr. W. E. Wells, of Newell, W. Va., representing the United States Potters' Association. He was asked by Mr. GREEN:

Has the price of china advanced in the last year?
Mr. WELLS. About 15 per cent in a year, I should say.
Mr. TREADWAY. How much in three years?
Mr. WELLS. One hundred and eleven per cent is what our records show in our factories.
Mr. TREADWAY. I think my records would confirm that—what I have had to pay.
Mr. GREEN. The reason I asked you that question was that one of the importers who testified here said that the reason that the imports from China and Japan in the 10 months ending October 20 had more than doubled was largely owing to the increase of price.
Mr. WELLS. Both the foreign and American prices have increased considerably in the last year.
Mr. GREEN. The imports were about two and one-half.
Mr. WELLS. That is right, within one year. I think that is from 1914 until now.
Mr. GREEN. You misunderstood me. I am speaking of the increase in value in Japan for the 10 months ending in October. There would be about a million and a half imported in 1919, the 10 months ending October, 1919, and $1,300,000 worth imported in the 10 months ending October, 1920.
Mr. WELLS. I have not, of course, undertaken to cover the entire ground, but there is just this I want to say, that we are having no demand now for our goods. We have had more cancellations in the last three months than we have taken new business. But the American potters were so far behind that we are still busily employing all our people on orders that have remained with us 6, 8, 10, and 12 months.
Mr. OLDFIELD. Are you reducing wages?
Mr. WELLS. We have not.

* * * * * * *

The CHAIRMAN. What rates do you recommend?
Mr. WELLS. I make a recommendation that the Payne rate be restored, and until Germany and Austria get back into that market it will be sufficient to protect us, at least against England and France. They have always been honorable competitors. We have divided up this market without quarreling.

There, Mr. President, was the representative of the potters' association, who said that the Payne-Aldrich rate would be sufficient; but the highest rate under the Payne-Aldrich law was 60 per cent, while the committee comes here with a recommendation of 70 per cent—10 per cent higher than the rate for which the president of the potters' association asked.

Mr. President, I think we may very well examine this question for the purpose of ascertaining whether or not there is any justification for any increase over the present rate. Mark you, there are three paragraphs in this bill which relate to the pottery industry; in fact, four, including a blanket clause, to which I shall refer later on. The industry must be considered as a whole because it is not figured out by any of these interests as to what the different articles of ware cost. That fact is not known. When they burn a kiln of the wares it may contain different kinds of articles. They will, perhaps, burn a kiln to one stage and ultimately secure different kinds of finished wares. They may put some of it into another kiln and burn that to another stage and secure another finish or another glaze, and then have it decorated, and then burn it again into a different kind of ware. So it is not possible to tell what is the cost of the different kinds of ware. We do not know.

The information is not furnished; but there is one thing we can do: We can examine the industry as a whole and see whether or not the industry is suffering, and from that we can tell whether or not existing duties are sufficient, whether or not the trade is being swamped with importations from other countries. These facts we can ascertain. They are in this record. They come from official sources, and I submit that they have all been ignored by the majority of the Finance Committee—either ignored or else treated with contempt.

Mr. President, in the first place, just as an indication of the prosperity of the industry, I have here a list of the income-tax returns for this industry for the pre-war period, 1911, 1912, and 1913. It shows the invested capital, net income, gross sales, and cost of goods reported in corporation returns for pre-war period 1911, 1912, and 1913, and 1918, 1919, and 1920. Here is what we gather from it:

That in the years 1911, 1912, and 1913 all these concerns had an average net income on their invested capital of 11.12 per cent; in 1918 of 25.59 per cent; in 1919 of 24.3 per cent; and in 1920 of 32.76 per cent.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER (Mr. SUTHERLAND in the chair). Does the Senator from New Mexico yield to the Senator from New Jersey?

Mr. JONES of New Mexico. I yield to the Senator.

Mr. FRELINGHUYSEN. From what authority is the Senator reading?

Mr. JONES of New Mexico. I am reading from a certified statement from the Treasury Department of the United States.

Mr. FRELINGHUYSEN. What is the nature of it?

Mr. JONES of New Mexico. It is just what I said in the beginning.

Mr. FRELINGHUYSEN. Does the Treasury Department issue statements on incomes of companies?

Mr. JONES of New Mexico. This sheet complies with the law on the subject, and the Senator from New Jersey has seen a great many of just such sheets. The names of the companies are not given here, but they are numbered.

Mr. FRELINGHUYSEN. Then the Senator is reading from the income-tax returns of certain companies engaged in the pottery industry. Is that true?

Mr. JONES of New Mexico. That is true.

Mr. FRELINGHUYSEN. May I ask the Senator how he can distinguish the companies that are engaged in manufacturing the product which is protected under these two paragraphs, 212 and 213? Is this return confined to those two items? Does the Senator claim that the return on the industries that are protected under these two items is 32 per cent, or does it not include all of the pottery industry?

I know the Senator wants to be fair——

Mr. JONES of New Mexico. I do want to be fair.

Mr. FRELINGHUYSEN. And I want, also, to have the figures accurate and identified properly. I should like to ask the Senator if he is sure that those returns cover the industries that are protected under these two items, or do they cover all of the pottery industry, the other industries, too?

Mr. JONES of New Mexico. Mr. President, if the Senator thinks such information as this is important, may I ask him, when he decided to increase the duty on these wares, whether he ascertained the financial condition of the companies that were producing these wares?

Mr. FRELINGHUYSEN. I have general information, and I have some specific information, too; but I am asking the Senator a question, and I am asking it in all fairness. The Senator has quoted certain figures coming from the Treasury Department—the income-tax returns, which I had supposed were privileged—but nevertheless he is offering for the record these returns, and he is claiming that for the year 1920, I think he stated, the average profits were 32 per cent. That is not my information on the industries covered in paragraphs 212 and 213, and I am asking him if he is sure that those returns cover the industries that are protected under these two paragraphs?

Mr. JONES of New Mexico. I will read just what it says:

Statistical division, income-tax unit. Manufacturers of chinaware and earthenware.

That is the heading.

Mr. FRELINGHUYSEN. Then it does. The Senator claims that it does cover them?

Mr. JONES of New Mexico. That is what it says on its face.

Mr. FRELINGHUYSEN. Is it for 1920?

Mr. JONES of New Mexico. 1920.

Mr. FRELINGHUYSEN. Has the Senator the 1921 figures?

Mr. JONES of New Mexico. No; they are not out yet, as the Senator must know.

Mr. FRELINGHUYSEN. As I understand the 1921 figures, the reports have been made by the companies and the profits are very much less this year, and I understand that in 1920 they do not show an average profit of 32 per cent.

Mr. JONES of New Mexico. Mr. President, if they are less for 1921, it is not because of any importation, because the goods have not been coming in here. It must be attributed to some other cause.

Mr. FRELINGHUYSEN. Mr. President, I am informed that in 1921, in the case of one of the oldest and one of the largest companies engaged in the manufacture of chinaware, the average profit was only 9.6 per cent; and I understand that in 1921 the profits on the china and earthen ware did not run much over 10 per cent.

Mr. JONES of New Mexico. Mr. President, all I know about their earnings is derived from this income-tax report, which gives the earnings for 1911, 1912, and 1913, the three pre-war years, as well as for 1918, 1919, and 1920; and I will give the Senator some figures which are at least corroborative of that regarding some other years. We are trying to find out, in the first place, whether or not this industry is poverty stricken, and, in the next place, what caused it if it is. So far as I have been able to get any information, it is not poverty stricken, in the first place, and we will find out before we get through that their business has not been interfered with by any importations of earthenware or chinaware.

Mr. President, I have here another statement regarding the pottery industry which comes from the Census Bureau. The Bureau of the Census makes an examination of these manufacturing industries once each five years. We have the data regarding the pottery industry for the year 1914 and the year 1919, and from that we get a good deal of information. It is true that the year 1919 was just after the war; it was a prosperous year; but we have the figures for the year 1914 also. It will be recalled that during the war the pottery industry was somewhat restricted in its output; that it was necessary for the Government to conserve fuel, and so its business was somewhat handicapped during the war, and that handicap extended even beyond the war, and the industry was not unduly built up by reason of the war.

Here is what we find from an examination of those two census reports, the one for 1914, the other for 1919:

The capital stock of the concerns engaged in that industry in 1914 was $44,704,081.

In 1919 the capital stock had increased to $66,757,970, and my information is that that increase in capital from $44,000,000 to $66,000,000 was made up from surplus earnings in the business during the five years.

In 1914 the value of the product turned out by these potteries was $36,942,666.

In 1919 it was $77,000,000, in round numbers.

We have here the cost of manufacture.

Mr. FRELINGHUYSEN. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator.

Mr. FRELINGHUYSEN. Does not that include articles that are in other schedules?

Mr. JONES of New Mexico. Yes; Mr. President, this includes the entire pottery industry.

Mr. FRELINGHUYSEN. The Senator speaks of $77,000,000 as being the entire income.

Mr. JONES of New Mexico. No; that is the value of the product turned out.

Mr. FRELINGHUYSEN. But $36,000,000, as I am informed, is represented in these two paragraphs.

Mr. JONES of New Mexico. I do not so understand.

Mr. FRELINGHUYSEN. May I ask the Senator another question, in order that it may go in the record? I presume he submits these figures for the record.

Mr. JONES of New Mexico. I did not know whether I would burden the record with them or not.

Mr. FRELINGHUYSEN. I should like to ask the Senator whether, in the net income on capital invested of 32.76 per cent, the taxes are deducted, and whether he claims that that is net profit or net income?

Mr. JONES of New Mexico. Mr. President, I assume that the taxes are not deducted, because those figures are evidently the items on which the tax is calculated.

Mr. FRELINGHUYSEN. Then the Senator's claim is that the net income from the business is 32 per cent, and that is not net earnings, and he does not know what the net earnings are, what the percentage of earnings is on the capital?

Mr. JONES of New Mexico. Mr. President, if the Senator is simply figuring on some basis for deducting income taxes, I will give it to him in the paragraph which I am going to read.

Mr. FRELINGHUYSEN. I am asking the Senator what he considers the net return for dividend purposes, the net earnings on the capital invested in the pottery business under the figures he has presented to the Senate.

Mr. JONES of New Mexico. It would be the amount I gave, less the income tax, whatever it was.

Mr. FRELINGHUYSEN. Of course, there is interest on bonds and mortgages and other fixed charges which probably are not deducted.

Mr. JONES of New Mexico. That is the return upon the invested capital as defined in the revenue law of the country, and any manufacturer will understand what that means.

Mr. FRELINGHUYSEN. Then, if the corporation tax was 20 per cent in that year the net income would be 16 per cent instead of 32 per cent.

Mr. JONES of New Mexico. Yes; but the corporation tax is never anything like that, as the Senator very well knows.

Mr. FRELINGHUYSEN. The corporation tax and other expenses I should have said. I presume the interest on bonds is not deducted from that.

Mr. JONES of New Mexico. Certainly it is. That is the net income. The Senator knows these concerns are authorized to deduct the interest on their bonded indebtedness.

Mr. FRELINGHUYSEN. Then, the corporation tax being 10 per cent——

Mr. JONES of New Mexico. But the corporation tax is not 10 per cent.

Mr. FRELINGHUYSEN. What is it?

Mr. SMOOT. It is 10 per cent.

Mr. JONES of New Mexico. No; it is not.

Mr. FRELINGHUYSEN. Was not the corporation tax 10 per cent?

Mr. JONES of New Mexico. The Senator speaks of the income tax now. I beg the pardon of the Senator from Utah. We were thinking of different things. It is true that the income tax is 10 per cent of the net earnings, but it is not 10 per cent in a way to reduce that 32 per cent to 22 per cent. It is 10 per cent of the total amount of the net earnings.

Now, let us look into this question a little further. If the Senator has any definite information that these figures for 1914 relate only to the manufacture of articles coming within paragraphs 212 and 213, I should like to have him give the authority for the statement. That is not my information. My information is that these figures relate to the whole industry, as shown by the report of the Department of Commerce on the subject. If I am wrong about it, of course I want to be corrected.

Mr. FRELINGHUYSEN. Does the Senator claim that the industry is covered under these two items, paragraphs 212 and 213?

Mr. JONES of New Mexico. What I claim is that the whole pottery industry is covered here for both years, 1914 and 1919. The Senator from New Jersey stated a while ago that the figures I have for 1914 relate only to the two paragraphs of the bill. My information is otherwise.

Mr. FRELINGHUYSEN. What does the Senator claim the total income for 1914 to have been?

Mr. JONES of New Mexico. The net profit of the industry that year was $5,224,237.

Mr. FRELINGHUYSEN. I mean the total production.

Mr. JONES of New Mexico. The total production amounted to $36,942,606.

Mr. FRELINGHUYSEN. The Senator, of course, is including in those figures practically $20,000,000 of production that is not contained in these paragraphs?

Mr. JONES of New Mexico. I said in the beginning that you could not segregate the costs under one paragraph from the costs under another; that you have to take into consideration the entire pottery industry.

Mr. FRELINGHUYSEN. I claim that you can segregate the figures as to production, and I have them segregated. If the Senator wants the figures, I will give them to him.

Mr. JONES of New Mexico. I am now using some official data furnished us by the Bureau of the Census, for whatever it is worth. There are other figures, of course, as to the amount of the production of the different kinds of commodities, but they are not brought together in this form. I am using these figures for what they are worth, for the purpose of showing that the pottery industry of this country is not in dire distress; that it is not something which ought to be put upon the charity of the country; that it is not something for which there should be a special tax levied upon every human being in this country. It is a profiteering industry, and the last year for which we have any information it profiteered beyond all other years. At the height of its profiteering, the Finance Committee comes in and wants to increase the taxation on the country for the benefit of this industry and increase the rate beyond what the high officials of the companies themselves say they want.

Mr. FRELINGHUYSEN. The Senator has not shown that this industry is a profiteering industry. I know the conditions of the pottery industry in my State, and I know that their profits are not large. The Senator has presented figures showing a net income of 32 per cent in one of the most prosperous years the industry has ever known.

Mr. JONES of New Mexico. Mr. President, I decline to yield further. I kindly invited the Senator from New Jersey to present his case first. I supposed he knew what he was doing. I supposed he had evidence which would justify these rates. He declined to present it, and now he is undertaking to say that he knows the facts about the matter. Does he want us to understand that the majority of the Finance Committee makes these recommendations simply because of what the Senator from New Jersey knows? What he knows is not evidence in this case.

Mr. FRELINGHUYSEN. If the Senator will not yield, of course I can not reply to him.

Mr. JONES of New Mexico. I prefer not to yield at this time, but I hope that before we get through the Senator from New Jersey will present some evidence at least to furnish a reasonable excuse for what the majority of the Finance Committee proposes. I have been unable to find it in the record in this case. I will not decline to yield for a question or any short

explanation. I shall be very glad to have any questions from the Senator from New Jersey, or any other Senator.

Here is what we have concerning the business of this industry in 1914. I will read the round figures. Capital, $44,000,000; value of product, $36,000,000; cost of material and freight, $9,000,000; rent of power and cost of fuel, $2,750,000; rent of factory, $42,564; Federal tax and State tax, $271,562; total cost, excluding salaries and wages, $12,345,000; profits before deducting salaries and wages, $24,596,000.

Then we have given the distribution of the salaries and wages. The salaries of the officers amounted to $1,662,061. The salaries of superintendents and managers are included in that sum, amounting to 6.6 per cent of the total income of the concern. They paid to clerks, stenographers, salesmen, and so forth, $1,084,000; to wage earners, $16,666,000. Net profits, $5,224,000.

That was in 1914. In 1919 the capital had been increased to more than $66,000,000, and, as I am advised, without the investment of a dollar, representing an accumulation of surplus. The value of the product was $77,000,000. The cost of the material and freight was $15,000,000. The rent of power and cost of fuel amounted to $5,000,000. The rent of the factory was $162,000. The Federal tax was $2,220,000, and the State tax $457,000. The total cost, excluding salaries and wages, was $23,000,000. The profits, before deducting the salaries and wages, were $51,000,000.

Now as to the distribution. The salaries of officers, not including superintendents, managers, and so forth, were $2,095,432. Back in 1914 the salaries of officers, superintendents, and managers, all combined, amounted to $1,600,000, but in 1919 the salaries of officers alone amounted to over $2,000,000, and of the superintendents $1,833,665, making a total in 1919 paid as salaries of officers, superintendents, and managers of $3,929,097, nearly $4,000,000. In 1914 those officers and superintendents received only $1,622,000, an increase of more than $2,000,000 per annum for the officers, superintendents, and managers.

Now I give another significant item. They increase the wages and this is what happened. In 1914 there were 26,705 wage earners. They received $16,666,330, which was 67.8 per cent of the value of the product. This is the one industry which has, I believe, the highest labor cost of any of the industries, and that is why it has in the past appealed for a high protection upon this industry; but now, when the industry prospers, what happens? Do they give the benefit of that increase in prosperity to these laboring men? In 1914, when the pottery industry was only reasonably prospering, the wage earners received 67.8 per cent, but in 1919, when these officers and superintendents were receiving these extraordinary salaries, the wage earners received only 58.3 per cent of the value of the product.

Another thing, Mr. President. The net profits of these concerns in 1919, before taxes paid, were $17,682,030, which amounted to just about 24 per cent on their invested capital. That 24 per cent was profit, after paying for material, after paying rent and fuel, wages and salaries. Seventeen million dollars and more of profit, 24 per cent! That was in 1919. That was just after the war. But from the official reports as to the income tax return in 1920 their net earnings subject to taxation for income purposes had increased more than 32 per cent, and no one will believe that they padded their returns for taxation purposes.

Mr. President, that is some additional evidence as to the prosperity of these concerns. As I said in the beginning of my remarks, we can not tell what is the cost of a set of dishes, we can not tell what is the cost of a certain design of sanitary ware. It is in the pottery industry, and we can only tell whether it needs protection or not by considering two things: First, whether the concern is prosperous or not, and, second, whether the American market is being flooded with imports or not. I have given this evidence as to the prosperity of the concern. I expect now to take up the question of the importations, the character of the business, where the competition comes in, and to look at the economic surroundings of the industry.

Mr. President, it is now after 10 o'clock, and I understand that it is not designed to continue the session much longer. If agreeable to all parties, I shall be glad to yield the floor for the evening and resume at this point to-morrow morning.

HOUSE BILL REFERRED.

The bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations, was read twice by its title and referred to the Committee on Banking and Currency.

ADDRESS BY THE VICE PRESIDENT.

Mr. RAWSON. Mr. President, I ask unanimous consent that an address delivered by the Vice President before the General Board of Education of the Presbyterian Church at Des Moines, Iowa, May 21, 1922, may be printed in the RECORD in the regular type.

There being no objection, the address was ordered to be printed in the RECORD in 8-point type, as follows:

At Des Moines, Iowa, at 8 o'clock p. m., Sunday, May 21, 1922, before the General Board of Education of the Presbyterian Church, Vice President Calvin Coolidge spoke as follows:

This is a convocation representative of the hope of the world. Each morning brings us news of discontent, of sullen disagreements between those charged with different obligations in industry, of organized crime and violence in our own land, and of disordered and threatening conditions abroad. This council meets with the determination not to treat the apparent symptoms of the hour, but to remove fundamental causes. It seeks redress for all wrong not by force of arms which might triumph for a day, but by a force of ideals which will be supreme for all time. It appeals from the things which are temporal to the things which are eternal. Casting aside all else it reasserts its reliance in the ancient faith of mankind.

This is a truly American purpose completely in harmony with revealed destiny. This is a new land. It is the expression of a new life. We do not deny our obligation to the teaching of the Old World. It was from that source that we derived our civilization. It was there that the modern world made those beginnings which have come into the strength of full maturity in American institutions. We do not fail to profit by it. But we have lived by something more. We have aspired to something higher.

We do not know where civilization began. As far back as the genius of man has been able to pierce the veil of the past, he beholds an enlightened people. Not one just rising out of savagery, but a people already risen. Nor yet a people who have originated their own civilization, but always one which acknowledges that it was derived from others. But wherever civilization appears we find it has one common characteristic. It gathers around the altar, the tabernacle, the pulpit, in obedience to religious rites. It is not waiting for the results of evolution, but seeking the guide of inspiration.

We can recall the names and the times of the nations which have arisen and for a period held dominion over the affairs of the world. Civilization has flourished under different designations and dates, but always around the same central thought. We can read of it and study it in the well-preserved records of ancient Babylon. We can see a people acknowledging again its force in the art, the poetry, and the philosophy of Greece. We can see it putting forth a new strength in the mighty organizing power of Rome. Babylon, Greece, and Rome fell, but civilization did not fall. It remained confined, but treasured, moving within narrow limits, but with none the less power, in the cloister, the monastery, and among the clergy, ready to inspire missionaries, to convert nations, and to reassert itself in the religious awakening and the revival of learning of the late Middle Ages.

It was then that America was revealed to a waiting world. Men had tried out the old forms of acknowledged human relationship. They had been brought into order under despotism. They had gained the idea of a king subject to the authority of law. They had seen the power of a parliamentary form of government to restrain absolute monarchy and preserve a certain amount of liberty. Men had dreamed and hoped for a completer freedom under the guaranties of a constitution and for self-government through legislative bodies which should be truly representative. But these final accomplishments were left to be the achievement of Americans, their contribution to the welfare of mankind, their glory in the records of history.

Through all this there has run the never-ceasing force of civilization. We do not know where it began, for we do not know where eternity began. Seeking for it in vain in any earthly source, men have always acknowledged that it has come from above. The soul of man always responds to it. There need be no fear that it will perish. The foundation for our faith is so abiding that all human hands raised against it will be without avail.

Civilization will endure. It will go forward. That is not the chief concern of mankind. It is an established fact. It is the great reality. The question which concerns the thought of the world is whether we shall endure; whether we shall carry forward civilization. Education is for the purpose of teaching men to know their true condition, to understand what freedom is and with what price it must be bought, and to comprehend the meaning of civilization.

The peculiar meaning of America is faith. Faith in the first place in an eternal purpose. Faith in the second place in mankind. There are those who doubt the stability of republican institutions. There are those who question the ability of a people long to maintain a democracy. There are those who are not

convinced that the world is making any real progress. They point to the rise and fall of nations, to the slender margin which exists between order and anarchy, and to the imperfections of government and society which everywhere abound. They point to the intelligence and enlightenment of the past. We know that Democritus had a conception of the modern atomic theory, that Empedocles crudely stated the doctrine of evolution, that the art, the literature, the high ideals, the native ability, the actual accomplishments of the ancients have not been, and so far as we can judge will not be exceeded in kind in any human experience. But it is not very disturbing to think that an eternal purpose had made some progress before yesterday. The promise of it is that what man has done, mankind can do. The progress of the race does not lie merely in the intelligence, philosophy, or the art of a few, but in their possession by the many, in their general acceptance. America lays no claim to the discovery of the theory of freedom, or self-government. Its glory lies in the ability of its people to put those theories into practice, not merely the power to state them, but the capacity to live up to them.

There can be no discussion of the basic theory of American institutions which does not lead to a statement of religious beliefs. Government is the attempt on the part of mankind to adjust themselves to their true relationship. The whole of history is strewn with efforts to build on the theory of class and caste, of superior and inferior, of master and slave.

The teachings of religion and the philosophy of thinking men both resisted this theory of human relationship. Men could not acknowledge the common bond of brotherhood, the common source of their being, and long resist the inevitable conclusion of a common equality of rights. But while such a conclusion might be acknowledged in theory, the custom and tradition of the Old World, the habits and long-established institutions of its people, made an almost impossible barrier to its realization. There were wide economic differences so manifest to the senses that it was almost impossible to discern the spiritual equalities. It was in the New World that these economic differences had a great tendency to disappear. Under the power which existed to have land merely for the taking, the old differences in possessions began to disappear and there was a sufficient reenforcement for the theory of equality and freedom to make their practical application possible. Under the stimulation of early eighteenth-century speculation about the theory of government and under the inspiration of the teachings of religion, men laid down and adopted those basic principles which are set out in our Declaration of Independence and established in our constitutions and laws. The inalienable right of man to life and liberty, and to be protected in the enjoyment of the rewards of his own industry, which are represented by his property, have been much thought on and much discussed since that day.

They all have their source in religion. The rights of man, as man, the dignity of the individual, find their justification in that source alone. Whenever its teachings were fully admitted the rest followed as a matter of course. It was religion that came first, then the establishment of free government. With these there came the opportunity for general education, for a broader service by the institutions of higher learning, which ushered in the age of science, resulting in the great material prosperity which went on increasing up to the outbreak of the Great War.

These were the institutions which Americans built up and supported out of their faith in an eternal purpose and out of their faith in mankind. No one would claim that they have yet been brought into perfection. No one would claim that the laws applicable to a wise and just administration of the more and more intricate relationships under which we live have yet all been discovered. No one would claim that there is, or yet can be, such an administration of laws, such an observance of constitutions, as to protect the individual absolutely in all his acknowledged rights. Men are finite. They are subject to the limitations of space and time. Invention and science are bringing them new powers, but everyone realizes that perfection lies far away in the distance.

But the fact that there is evil abroad, that there are those who are bent on wickedness and that their efforts oftentimes prevail, that there are limitations, is no reason for losing faith in the right. The fact that obligations may be disregarded, that pledges may be broken, is no reason for losing faith in honor and integrity. There are those who argue that if government has sometimes been a means of oppression, therefore government should be abolished; that if property has sometimes made its possessors selfish and cruel, therefore property should be abolished. They argue, perhaps unconsciously, that if power has been misused by some, power therefore should be abolished. The plain fact is that power can not be abolished, nor can government and property, which are a species of power. Wherever mankind exists these exist. Our only remedy is to regulate their used and strengthen the disposition to employ them all, not for oppression but for service.

This is but stating the condition into which mankind is born. This is but recognizing those restraints which are created by his very existence. We do not live in an imaginary life. We live in a real life. The individual may occasionally and temporarily secure an advantage for which he has made no return, but this is always impossible for society. Whatever it has it must create itself. It is an entire delusion to look for a state of freedom, a system of government, an economic organization, under which society can be relieved from the necessity of effort. To be the beneficiaries of civilization is not easy but hard. Those who promise an existence of ease are not raising mankind up; they are pulling them down. The greater freedom that men acquire the better government they maintain, the higher economic condition they reach the more difficult, the more laborious, must be their lot. It is not a life of ease that will ever attract men, but the possession of power which comes from achievement and the possession of character which is the result of sustained effort in well-being.

There are oftentimes very great misapprehensions over the apparent conflict between a desire for freedom and the authority of the Government. Perhaps the confusion arises in part from the perfectly correct assertion that we live under a free government. Our Government derives its power from the consent of the people. Its authority is their authority. They have established it. Its laws are made in accordance with the expression of their will. But it is none the less a government, and its authority is none the less abiding. In obeying it men do not surrender their liberty to it, but in establishing it they provide the only source and guaranty that there are for their liberty.

When the power of the Government ceases, or even when it be put in jeopardy, liberty ceases with it. Those who want their liberty to remain should support the Government as its only source and guaranty. It is only those who are willing to be pillaged, to see their property destroyed and their life endangered, who should withdraw their support from organized government. Liberty is purchased with liberty. There is no choice for those who desire liberty except to go on making such contributions, performing such services, and rendering such obedience to the Government as will be sufficient for its support.

There is a misapprehension which is very analogous in regard to our economic relationship. When our institutions were adopted the people were much nearer a plane of social and economic equality than they are at the present day. The population was for the most part rural and agricultural. They were employed in those occupations which could be conducted entirely by one individual. This gave the utmost freedom of action in relation to the privilege of the individual to pursue or change his occupation at will with little or no effect upon others. Gradually this condition has changed. The factory system has been adopted, with its attendant division of labor. Hours have been shortened, wages greatly increased, so that the returns from the effort expended have grown to be very much larger. But freedom of action has been very much diminished to secure this result, and the duty toward others has been very much emphasized. It has been stated that there must be something wrong when those who make cloth want for clothing and those who make shoes are not well shod. The answer to that specific complaint is that almost no individual makes shoes or cloth at the present time. They only perform one of the great number of processes in the making of shoes and cloth.

There is no individual in our modern industrial life who produces all the different articles which he uses. But by means of the division of labor, by means of organization, the aggregate of production has increased manyfold. There is much more property, much more wealth, much more comfort, and much more leisure, but a certain kind of independence is gone.

The new duties which this condition imposes have not yet been fully realized. Large bodies of men are trained to perform special tasks. Each body profits through the performance of the others. There is a tacit and implied understanding, a moral obligation, that each shall perform their part, because each receives the benefits which accrue from others doing their part. So long as the others perform their part of the common services which are required, there is a growing feeling that it is an economic wrong for one body to fail to perform its services. This is especially true in the so-called key industries, which furnish transportation, food, heat, light, water, and other prime necessities. Society has not yet discovered any adequate remedy for such a situation. Perhaps the most

suitable relief will result from an aroused public opinion, which will insist that when a condition of this kind arises our whole economic system shall not be thrown into disorder, but that some tribunal may be established with authority to ascertain the facts, fix the blame, and determine what is necessary to provide justice. However that may be, it is now perfectly apparent that to attain modern industrial power there has been an exchange of much of the freedom of the individual.

This modern industrial organization is analogous to the feudalism of the Middle Ages. Then the individual, in order that he might have security and the assurance of an adequate force to protect him from aggression or destruction, swore fealty to his lord. He became his man. He gave up his liberty for safety. The modern individual takes a pledge of fealty to his occupation, his brotherhood, his trade-union. He, too, surrenders a portion of his freedom of action in return for a certain protection and security. It was the influence of religion, acting through the avenue of public opinion, which broke the artificial condition of feudalism. It is to the same source, to the same power of human conscience, that we must look to purge away what is artificial and unreal in our modern industrial life, that there may be recognized the existence of a real equality and that a just honor may come to all through the performance of real service.

It does not seem probable that there lies within the power of legislation, the power of government action, any real remedy for these conditions. Public authority may investigate, it may advise, but the economic relationship is to such a great degree voluntary, and must be voluntary, that it can not be conducted under any coercive authority. Almost the whole effect of legislation up to the present time has been not to provide restraints but to enlarge the freedom of action. It has sought to prevent society from assuming any rigid form. It has discouraged all conditions which tend to create favored classes and special privileges. But the law alone can not establish standards; that must be done by the people themselves. If all honor is to be given to wealth and place, there is bound to be an unending clash of interests. But if service be made the standard; if men are judged not by what they have but by what they are; if they will cease putting all the emphasis on what they are going to get and more of it on what they ought to do; if they will refrain from giving their entire attention to the material side of life and live more in accord with their intellectual, social, and moral nature; if they will apply the teachings of religion, the discord and discontent will give place to harmony. No one has ever proposed any other practical remedy.

Another element, without which modern civilization could neither exist nor increase, is those accumulations resulting from the industry of the people, which we call capital. It very closely represents the dominion which man holds over nature. Without capital he falls back to the material and economic condition of the savage. With it he furnishes himself with transportation by land and sea, builds industrial plants with which to furnish the necessaries and conveniences of life, constructs buildings and public works, provides a store of merchandise, extends credit for the financing of agricultural and commercial operations, and builds up the surplus out of which to supply the needs of an enlarging population and to improve the condition of all the people by increasing their power of production. The want and distress of the people of the Old World at the present time result from the great destruction of capital which they have recently suffered. Their condition has an effect even here, but our own supply of capital, our own exemption from being required to make a like sacrifice, is the source of our comparatively great prosperity.

No one would claim that there have not been many abuses of the power which the possession of capital brings, but here again a suggestion of abolishing it is only a suggestion to destroy the power which supports the advance of civilization. The law can not always regulate it. It can do little toward supplying it. It is another of those requirements which must be met by the people themselves. Government supervision can help, but it can help only in conjunction with a righteous public sentiment and that determination which has its source in the religious convictions to use capital to promote the welfare of mankind.

But civilization has come to comprehend more than those domestic relationships which are represented in the political and economic life of a people. There is a relationship among nations toward which the world has recently been turning much thought and much attention.

This is a new avenue for the American mind to travel. Our natural seclusion, our predominance over all surrounding nations, our ancient traditional policy of refraining from all interference in the political affairs of others have all contributed to our disregard of any but our own local interests. The results of the last five years have projected us out into the world where, whether we will or no, we find that we have international duties to perform, both for the promotion of our own welfare, the protection of our own rights, and to discharge our obligations to humanity.

We have not sought to meet these requirements by diminishing our national spirit, but rather by increasing it. We have not been willing to compromise our independence, but have rather sought to strengthen it. At the same time we have recognized that as there comes an increased power for the promotion of our domestic welfare through the cooperation and organization of the individual, so there is created a more stable condition among nations and there comes a release from the necessity of defensive operations through mutual agreement and more cordial understandings. We have recently adopted the policy of seeking to prevent wars, not as in the past by a reliance upon great competitive armaments but by removing the causes of war through mutual adjustments and concessions based on the requirements of justice. For the first time in all history the great powers have agreed on a limitation of naval armaments. Not on their abolition, for the world must not be left defenseless against the power of evil, but on their immediate decrease and their future restriction. This was not accomplished by force or coercion, but under the leadership of America by an appeal to the awakened conscience of the world.

Through all these efforts of mankind to comply with the requirements of civilization there runs the Christian spirit of sacrifice. Men are discontented, they are engaged in industrial strife, they defy the Government at home and abroad because they refuse to make sacrifices which are sufficient to meet present world disorders.

Our Government is supported by sacrifice, by obedience to the authorized expression of the public will. Through that sacrifice men gain a greater power and a larger liberty. When an individual becomes a citizen, he takes on a new dignity, a higher nobility. Men reach their highest degree of economic prosperity through the same process. It is only through the devotion of their resources, their strength, and their intelligence to the organized effort of production for the benefit of others that they increase their own rewards. When the individual becomes a workman, he comes into the possession of a greater estate.

What is true of individuals has its counterpart in nations. No country ever remained great through war and pillage. Despotism always destroys itself. Imperialism always defeats itself. It is only when the nations respect the rights of each other by obedience to a common law, it is only when they toil and spin for each other and extend toward each other the hand of friendship and of charity, that they acquire a true sovereignty.

This is the American faith. It represents a higher and nobler conception of mankind than that which has been developed under any other institutions. Believing that the people have the power to respond to all the great obligations necessary to support our more and more intricate civilization, it has dared to call on them to respond. It has intrusted to them the keeping of their own welfare, convinced that, if self-government can not be maintained, then no government can be maintained. It has given them jurisdiction over their own property and over the property of each other in the knowledge that, if they can not protect property, then it can have no protection. The people have never wavered in their response to this high calling.

Those who came bearing this faith knew that the way to freedom lay through a knowledge of the truth. They put their reliance in religion and education. They established their church and then established their college. Always their purpose was to provide inspired and learned men to lead in the religious and political life of the community. They put their trust in piety. To them intelligence and disbelief would have been a contradiction in terms.

These were the men and the methods which laid the foundations of American institutions. If those institutions are to stand, they must rest on these foundations. There are, and can be, no others. When ways are clear, when skies are fair, no nation can travel far with no motive save an appeal to material gain. But when that fails, as it often does, there must be a reliance on higher ideals. The source of such ideals lies in religion and education. They do not fail. They are eternal.

There must be an increasing support for our higher institutions of learning. They are not the apex of our system of education; they are its base. All the people look up to their influence and their inspiration. They must be under the guidance of men of piety and men of an open mind. They must continue their indispensable service to the cause of freedom by bringing all the people unto a knowledge of the truth.

There must be an increasing reliance upon religion. It is the source of all faith. It is the evidence of the eternal purpose and of the true power, the true nobility of mankind. It gives a divine sanction to the authority of righteous government, to faithful service through economic relationship, and to the peaceful covenants of international understanding. It represents the only hope of the world, the only motive by which mankind can bear the burdens of civilization.

EXECUTIVE SESSION.

Mr. McCUMBER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened; and (at 10 o'clock and 10 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Thursday, May 25, 1922, at 11 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 24 (legislative day of April 20), 1922.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Arthur H. Geissler to be envoy extraordinary and minister plenipotentiary to Guatemala.

DIRECTOR OF WAR FINANCE CORPORATION.

Dwight Davis to be Director of the War Finance Corporation for a term of four years.

APPRAISER OF MERCHANDISE.

George M. Jameson to be appraiser of merchandise, customs collection district No. 12, Pittsburgh, Pa.

UNITED STATES ATTORNEYS.

Thomas Williamson to be United States attorney, southern district of Illinois.

A. V. McLane to be United States attorney, middle district of Tennessee.

PROMOTIONS IN THE NAVY.

John D. Beuret to be chief constructor and Chief of the Bureau of Construction and Repair.

TO BE COMMANDERS.

Claude B. Mayo.
Henry K. Hewitt.
Felix X. Gygax.

TO BE LIEUTENANT COMMANDERS.

Ernest J. Blankenship.
Alfred Y. Lanphier.
Oliver M. Read, jr.

TO BE LIEUTENANTS.

John A. Terhune.
Leonard Doughty, jr.
Willis M. Percifield.
Carl K. Martin.

TO BE LIEUTENANTS (JUNIOR GRADE).

Willis M. Percifield.
John B. Cooke.
Julian B. Noble.
Charles E. Coney.
Alonzo B. Alexander.

TO BE MEDICAL INSPECTOR.

Charles E. Ryder.

TO BE PASSED ASSISTANT SURGEONS.

Frederic L. Conklin.
James Humbert.

TO BE PAYMASTERS.

Harry T. Sandlin.
Stanley M. Mathes.
John D. P. Hodapp.
Arthur H. Eddins.
Charles C. Copp.

TO BE PASSED ASSISTANT PAYMASTERS.

Charles G. Holland.
John O. Wood.
William A. Best.

TO BE NAVAL CONSTRUCTORS.

Walter W. Webster.
Beirne S. Bullard.
Ernest L. Patch.

TO BE CHIEF MACHINISTS.

George J. Blessing.
Bennett M. Proctor.
Chauncey R. Doll.
Carl S. Chapman.
Andrew C. Skinner.
John C. Richards.
William W. Wilkins.
Benjamin F. Maddox.
Frank W. Yurasko.
John J. Enders.

MARINE CORPS.

Richard M. Cutts to be colonel.
Harry G. Bartlett to be major.
Frank P. Snow to be first lieutenant.

POSTMASTERS.

CALIFORNIA.

Stella L. Vincent, Carmel.
Rexford E. Morton, Dyerville.

COLORADO.

Anna Bogue, Basalt.

GEORGIA.

Marion W. Hudson, Dallas.
Julius Peacock, Vidalia.

IOWA.

Oswell Z. Wellman, Arlington.
Homer G. Games, Calamus.
Raymond W. Ellis, Norwalk.

KANSAS.

Benson L. Mickel, Soldier.
Victor E. Green, De Ridder.
Charles DeBlieux, Natchitoches.

MARYLAND.

Hattie B. H. Moore, Marydel.
Ernest G. Willard, Poolesville.

MICHIGAN.

Selma O'Neill, Rockford.
Walter H. Nesbitt, Schoolcraft.
George K. Hoyt, Suttons Bay.

MINNESOTA.

Ernest W. Nobbs, Bellingham.
George P. Dickinson, Excelsior.

MISSOURI.

Nelle Tomlinson, Morley.
Philip G. Wild, Spickard.

NEBRASKA.

James E. Schoonover, Aurora.
Carroll C. Colbert, Wauneta.

NEW JERSEY.

Selina L. Caruth, East Paterson.
William J. Caswell, Washington.

NEW YORK.

M. Elizabeth Corey, Cutchogue.
Frank D. Gardner, De Ruyter.
John C. Jubin, Lake Placid Club.
John F. Joslin, Voorheesville.

OHIO.

Edgar L. Taylor, Crooksville.
Clara J. Mitchell, Mount Pleasant.
Leonidas A. Smith, Ridgeway.

RHODE ISLAND.

Jonathan Bateman, Manville.

SOUTH DAKOTA.

Robert C. Gibson, Geddes.
Theresa R. Zimmerman, Montrose.

TENNESSEE.

Clarence L. Shoffner, Shelbyville.

VIRGINIA.

Milton S. Roberts, Faber.
Jessie R. Haven, Greenwood.

WYOMING.

Ellen L. George, Superior.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *May 24, 1922.*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O eternal God, in mute necessity our hearts go out after Thee. We make grateful mention of Thy goodness, we recall Thy boundless mercies, and we would meditate upon Thy providences. Thy love still passes all understanding and Thy riches are still unsearchable. Deepen in us the currents of reflection and give us wise insight into all problems of legislation. Elevate our whole natures and bring them to the highest point of efficiency. Work in us a splendid discontent and give us the reach of larger growth and broader attainment. Let the sun

of righteousness and peace fall upon the hills and the valleys of our country. May God's good angels brood above our hearthstones and fold all hearts in the calm and true embrace of love. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

BRIDGES ACROSS ROCK RIVER AND FOX RIVER, ILL.

Mr. FULLER. Mr. Speaker, I ask unanimous consent to address the House for one minute.

The SPEAKER. The gentleman from Illinois asks unanimous consent to address the House for one minute. Is there objection?

There was no objection.

Mr. FULLER. Mr. Speaker, in my district there are two bridges that have become dangerous, and new bridges must be built. The authorities there are now held up awaiting the consent of Congress to build those bridges. The bills have been reported by the Committee on Interstate and Foreign Commerce and approved by the War Department. The authorities are now waiting for this consent before they can build these bridges, so that it is an emergency case. I ask unanimous consent——

Mr. GARNER. Mr. Speaker, I do not know what the purpose of the gentleman is, but this side of the House can not hear a word of what he says. If his purpose is to inform the House, he is not doing so.

Mr. FULLER. Mr. Speaker, an emergency exists for the building of two bridges across so-called navigable streams in my district. They are not navigable. The authorities are now waiting before they let the contracts until they can obtain the consent of Congress. The bills have been approved by the War Department and favorably reported by the Committee on Interstate and Foreign Commerce. I ask unanimous consent for the present consideration of H. R. 11408 and H. R. 11409.

Mr. RAYBURN. I reserve the right to object, Mr. Speaker.

The SPEAKER. The gentleman from Illinois asks unanimous consent for the present consideration of two bills, H. R. 11408 and 11409. The Clerk will report the first one.

The Clerk read as follows:

A bill (H. R. 11408) granting the consent of Congress to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, in said town of Rockton.

The SPEAKER. Is there objection?

Mr. RAYBURN. Reserving the right to object, Mr. Speaker, what very urgent necessity is there at this time about the immediate passage of these bills?

Mr. FULLER. The present bridge has become dangerous and has been condemned. The authorities did not know that it was necessary to obtain the consent of Congress until they presented the plans to the State department of public works for approval. The matter is now held up, and they are unable to let the contract until they get the consent of Congress. It is an emergency case, and of pressing importance.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, in said town of Rockton, county of Winnebago, and State of Illinois, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With a committee amendment as follows:

Page 1, line 6, after the word "River," insert "at a point suitable to the interests of navigation."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. FULLER. Mr. Speaker, I ask unanimous consent for the present consideration of the other bill.

The SPEAKER. The gentleman from Illinois asks unanimous consent for the present consideration of the bill H. R. 11409, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 11409) granting the consent of Congress to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River on Main Street, in the said city of Ottawa, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable water," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With committee amendments, as follows:

Page 1, line 5, after the word "Illinois," insert "their successors and assigns."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 1, line 7, strike out the word "on" and insert "at a point suitable to the interests of navigation at or near."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 2, line 1, strike out the word "water" and insert in lieu thereof the word "waters."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FULLER, a motion to reconsider the last two votes was laid on the table.

BUSINESS FROM THE COMMITTEE ON AGRICULTURE.

Mr. SNELL. Mr. Speaker, I present a privileged report from the Committee on Rules.

The SPEAKER. The gentleman from New York presents a privileged report from the Committee on Rules, which the Clerk will report.

The Clerk read as follows:

House Resolution 352 (Rept. No. 1028).

Resolved, That upon the adoption of this resolution the Committee on Agriculture shall have three legislative days prior to June 10, 1922, for the consideration of bills reported by that committee now on the House or Union calendars, this rule not to interfere with privileged business.

Mr. WALSH. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Massachusetts makes the point of order that there is no quorum present.

Mr. SNELL. Mr. Speaker, I move a call of the House.

The SPEAKER. The gentleman from New York moves a call of the House.

A call of the House was ordered.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Ackerman	Cullen	Garrett, Tenn.	Kleczka
Atkeson	Curry	Goodykoontz	Kline, N. Y.
Barkley	Dale	Gould	Knight
Beck	Davis, Minn.	Graham, Ill.	Kraus
Benham	Dempsey	Graham, Pa.	Kunz
Bland, Va.	Dickinson	Green, Iowa	Langley
Boies	Drane	Greene, Mass.	Larson, Minn.
Brand	Drewry	Griffin	Layton
Britten	Driver	Himes	Linthicum
Brooks, Pa.	Dunbar	Hudspeth	McArthur
Burke	Dupré	Hukriede	McClintic
Cantrill	Edmonds	Ireland	McCormick
Chandler, N. Y.	Ellis	Jefferis, Nebr.	McFadden
Chandler, Okla.	Evans	Jeffers, Ala.	McPherson
Clark, Fla.	Fenn	Johnson, S. Dak.	Maloney
Classon	Fess	Johnson, Wash.	Mann
Cockran	Fields	Jones, Pa.	Michaelson
Cole, Iowa	Fish	Kelley, Mich.	Mills
Collins	Fitzgerald	Kendall	Moore, Ill.
Connolly, Pa.	Focht	Kennedy	Morin
Cooper, Ohio	Fordney	Ketcham	Mott
Copley	Free	Kindred	Mudd
Coughlin	French	King	Nelson, Me.
Crago	Frothingham	Kinkaid	Nelson, A. P.
Cramton	Gallivan	Kitchin	Nelson, J. M.

O'Connor	Robsion	Speaks	Tinkham
Olpp	Rodenberg	Stafford	Treadway
Osborne	Rogers	Stiness	Upshaw
Paige	Rouse	Stoll	Vaile
Patterson, N. J.	Sanders, Ind.	Strong, Pa.	Vare
Petersen	Sanders, N. Y.	Sullivan	Ward, N. C.
Rainey, Ala.	Sears	Sweet	Wason
Rainey, Ill.	Shaw	Tague	Wood, Ind.
Reavis	Slemp	Taylor, Ark.	Yates
Reber	Smith, Mich.	Taylor, Colo.	Zihlman
Rhodes	Smithwick	Taylor, Tenn.	
Riordan	Snyder	Tilson	

The SPEAKER. On this roll call 285 Members have answered to their names. A quorum is present.

Mr. SNELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors.

Mr. SNELL. Mr. Speaker, I ask unanimous consent that the rule may be reported again.

The SPEAKER. Without objection, the rule will be again reported.

The Clerk read the rule again.

Mr. SNELL. Mr. Speaker, it was the intention to arrange for three legislative days in which it should be in order for the chairman of the Committee on Agriculture to call up for consideration any one of the bills that that committee now has on the House or Union Calendar. It is not intended that this resolution will in any way interfere with privileged business or regular calendar days, nor is it intended that these legislative days must necessarily be successive ones.

Mr. GARNER. Will the gentleman yield?

Mr. SNELL. I yield to the gentleman from Texas.

Mr. GARNER. Has the gentleman a list of the bills in the order in which the Committee on Agriculture contemplates calling them up?

Mr. SNELL. I could not give the gentleman that information. I understand it is the intention of the chairman of the Committee on Agriculture to call up first the filled milk bill. Further than that I have not been informed.

Mr. GARNER. I wonder if the gentleman from Iowa [Mr. HAUGEN], chairman of the Committee on Agriculture, will accommodate the House with a list of the bills that he proposes to call up, in the order in which he proposes to call them?

Mr. HAUGEN. That is for the House to determine, but if the bills are called up in the order reported by the committee, and as they appear on the calendar, the first bill will be the so-called filled milk bill; the next, the bill to establish grades for spring wheat; the next, the Ward sugar resolution; the next, a Senate bill defining crop failures; the next, the DeRonde sugar claim; the next, an amendment to the cotton futures act, providing a grade for American-Egyptian cotton; the next, the Denison Mississippi River flood relief bill; the next, the bill prohibiting the importation of honey bees; and the next, the migratory bird and public shooting ground bill.

Mr. GARNER. Is that the order in which the gentleman proposes to call them up?

Mr. HAUGEN. That is the order in which they were reported and appear on the calendar.

Mr. GARNER. I want to know what the gentleman proposes to do about calling them up?

Mr. HAUGEN. The committee has instructed the chairman to do certain things.

Mr. GARNER. Will the gentleman mind telling us what those are?

Mr. HAUGEN. Unless otherwise ordered, the first would be the milk bill, next the grades of spring wheat, and next the Ward sugar resolution.

Mr. GARNER. Is that just as they are on the calendar?

Mr. HAUGEN. Just as they were reported.

Mr. GARNER. Was that order issued by the committee when the whole membership of the committee was present, or was that an arrangement made by the gentleman and his side of the House alone?

Mr. HAUGEN. The order of the committee was either to ask for a special rule, or that the chairman should avail himself of the privileges under the rules to expedite the business.

Mr. GARNER. But the last statement that the gentleman made was that the committee ordered him to do certain things. Was that in the whole committee when the entire membership was present, or was it a partisan matter?

Mr. HAUGEN. It was in the committee, a quorum present.

Mr. ASWELL. Will the gentleman yield?

Mr. HAUGEN. I yield to the gentleman.

Mr. ASWELL. The action of the committee did not specify any except three things.

Mr. HAUGEN. The action taken by the committee was, first, to report the filled milk bill, with authority to call it up in the House, and later requested a special rule on it. The next bill reported was the bill proposing grades for spring wheat, which carried with it authority to call it up at any time under the rules; and the next bill reported was the Ward sugar resolution, on which the committee later requested a rule. I am stating the bills exactly in the order reported and the authority carried with the motion to report the bills.

Mr. McLAUGHLIN of Michigan. Will the gentleman yield?

Mr. HAUGEN. Yes.

Mr. McLAUGHLIN of Michigan. Several of the members of the Committee on Agriculture appeared before the Committee on Rules and asked for special rules for the consideration of the Voigt filled milk bill and for the consideration of two of the sugar claims, so called. They made no request for any special time for the consideration of any other measures. The Committee on Rules found some difficulty in providing special rules for the particular kind of legislation brought to their attention by the Committee on Agriculture, and decided that instead of granting rules for the consideration of those three propositions, three days should be given by the House to the consideration of matters brought up by the Committee on Agriculture, with the express understanding—I say understanding—it was clearly intended by those who asked for the special time that the time should be given to the consideration of the Voigt bill and the two sugar claims. Now, the bringing in of these other matters, some of them important but none of them pressing, will result in delaying some of these matters, the early consideration of which was insisted on by the Committee on Agriculture.

Mr. KINCHELOE. Will the gentleman yield?

Mr. McLAUGHLIN of Michigan. Yes.

Mr. KINCHELOE. Does not the gentleman think that the bills of a public nature ought to have precedence over private claims?

Mr. McLAUGHLIN of Michigan. Oh, it depends on what those bills of a public nature are and the question of the disposition of the House later to consider them. The three bills I speak of must be considered now, and an attempt is being made to delay their consideration, with the idea that they will not later be considered at all. I object to the order in which these bills are to be presented to the House by the chairman of the committee. It is contrary to the spirit of the Committee on Agriculture and the idea they had in mind when they asked for this special order.

Mr. ASWELL. Will the gentleman yield?

Mr. McLAUGHLIN of Michigan. I yield to the gentleman from Louisiana.

Mr. ASWELL. Is it not a fact that the Committee on Agriculture made no request for the consideration of any other measures except these three—the Voigt bill and the two sugar claims?

Mr. McLAUGHLIN of Michigan. That is correct.

Mr. ASWELL. And the Committee on Agriculture has not requested a rule on any other subject?

Mr. McLAUGHLIN of Michigan. That is correct. The three measures I spoke of are the only ones for which special rules were requested, and these three days should be devoted to those measures. The time ought not to be taken up by the consideration of other matters.

Mr. WALSH. May I ask the gentleman a question?

Mr. McLAUGHLIN of Michigan. I yield to the gentleman from Massachusetts.

Mr. WALSH. Does the gentleman from Michigan say that the bill for grades of spring wheat was not included in its program?

Mr. McLAUGHLIN of Michigan. It was not included, although it had been favorably reported by the committee. Of course, it is expected that when a bill has been reported it will be presented by the chairman, but it was not one of those to be considered at this special time.

Mr. SNELL. Mr. Speaker, I yield 15 minutes to the gentleman from North Carolina [Mr. POU].

Mr. POU. Mr. Speaker, I yield 10 minutes to the gentleman from Texas [Mr. JONES].

Mr. JONES of Texas. Mr. Speaker, this is a very peculiar rule, as some of you here have noticed. It is a rule to give the Agricultural Committee a "field day" lasting for three days. I do not know how often a rule of this character has been brought in, but in the limited time I have been in Congress I have known of but few.

Mr. CAMPBELL of Kansas. Will the gentleman yield?

Mr. JONES of Texas. Not now.

Mr. SNELL. Will the gentleman yield?

Mr. JONES of Texas. I decline to yield. I do not know how often they bring them in; of course it is perfectly legitimate to bring them in, but it is an unsual method of bringing matters before the House. I will tell you why, in my judgment, it was brought in. There are two or three sugar claims against the United States Government that belong on the Private Calendar. The Rules Committee did not want to give a rule specifying these bills for consideration. So they gave us three days during which these sugar claims which are in the nature of private claims may be brought up without it appearing in the RECORD that they ordered these special matters to be brought up. That is why we have three days instead of having a special rule designating the bills. Of course, no member of the Agricultural Committee can well afford to vote against giving his own committee the privilege of proceeding in the House for three days or five days or any other number of days, because there are certain bills which are to be passed which are in the interest of agriculture; but there are some Members who would pass any kind of a rule which would make in order these sugar claims.

These bills, the Ward resolution, and others are for the relief of private individuals. It is true they were referred to the Union Calendar. They were thus referred because some similar bills a year or so ago were reported and went to the Union Calendar. As they were worded at that time they were public in their nature. Then, of course, when they were reintroduced, as they did not pass last year, the wording was changed and they were again referred to the Union Calendar. But no one who will study those bills will say that they are not private bills.

One of them is for the American Trading Co. as a beneficiary and for B. H. Howell & Co. The rule says that the committee shall have the right to bring up and bring in the bills now on the Union or House Calendar. If they were referred to the Private Calendar, where they belong, you could not keep them from being in here under this rule. Now, Hinds' Precedents, volume 7, page 879, says:

> A private bill is a bill for the relief of one or several specified persons, corporations, institutions, etc., and is distinguished from a public bill which relates to public matters and deals with individuals only by classes. A bill which applies to a class and not to individuals as such is a public bill. A bill for the advantage of private individuals even in connection with the public object has been treated as a private bill.

Many rules have been presented, but so far as I know these rules have not given right of way to private bills, and I do assert that there has never so far as I have been able to find a special rule been given for a private bill. Has there?

Mr. CAMPBELL of Kansas. I have no recollection of it, but we have given three days or a week to the Military Committee, the Committee on Banking and Currency, and other committees to bring up such bills as were reported from their committees.

Mr. JONES of Texas. That may be true, but has the Rules Committee ever given a rule for the consideration of a private claim against the United States?

Mr. CAMPBELL of Kansas. I have no recollection of any.

Mr. JONES of Texas. Did not the Rules Committee have in mind these sugar claims when they passed this general rule?

Mr. CAMPBELL of Kansas. The committee knew that the sugar bills were on the Union Calendar.

Mr. JONES of Texas. Did not the committee first have a special rule for the Voigt bill and then take it back?

Mr. CAMPBELL of Kansas. I have no recollection of it.

Mr. JONES of Texas. Did not they run against a snag when they came to the sugar claims and then take back the rule on the Voigt bill?

Mr. CAMPBELL of Kansas. No. They gave the committee three legislative days to consider all measures on the Union Calendar.

Mr. JONES of Texas. That is where the rub comes. The information I received was that the Voigt bill was first up and they had an application for a special rule on that.

They first considered reporting out the Voigt bill. After that they came to these sugar claims; and the question was raised—and nobody can gainsay the fact—that, being for the relief of private individuals, they are in the nature of private claims. Some members of the Rules Committee told me—and they were men who were well informed and good parliamentarians—that never in the history of Congress, so far as they knew, had a special rule been reported for the consideration of private claims.

Mr. CAMPBELL of Kansas. Are there any bills covered by this rule that are on the Private Calendar?

Mr. JONES of Texas. That is where the trouble arises. The rule is very artfully worded.

Mr. CAMPBELL of Kansas. No; it is not artfully worded.

Mr. JONES of Texas. The rule provides for the consideration of bills now on the Union Calendar. I just explained how an error was made in referring these bills; but even now, if we had them referred to the Private Calendar—if I made a motion after the committee gets charge of affairs in the House to transfer the bills to the Private Calendar, where they properly belong—under the wording of the rule, when it is once adopted, these sugar claims, which involve several millions of dollars, could be considered, even though they ought to be on the Private Calendar.

Mr. MOORE of Virginia. Mr. Speaker, will the gentleman yield?

Mr. JONES of Texas. Yes.

Mr. MOORE of Virginia. Can the gentleman explain to us why we should be dealing with private bills under a special rule, when there are rules that have been ordered by the Committee on Rules that pertain to very important public matters which remain up to this time in the breast, or rather in the breast pocket, of the chairman of the Committee on Rules?

Mr. CAMPBELL of Kansas. Does the gentleman ask me that question?

Mr. MOORE of Virginia. No; I am asking the gentleman from Texas [Mr. JONES].

Mr. JONES of Texas. I do not know why that is so. It seems passing strange to me that when no one can cite an instance of where a rule was presented for the consideration of private claims, that committee should come in and camouflage the matter by reporting a rule giving the Committee on Agriculture three field days and then have the chairman of the Committee on Agriculture get up and say that they expected to bring up the sugar claims. Of course they do; but the Committee on Rules apparently did not have the nerve to report out a rule for the consideration of a public bill and then follow it with a special rule for the consideration of a private bill. However, with some knowledge of what the Committee on Agriculture intended to do and what they expected to have done, the Committee on Rules now reports out a rule which not only makes it possible to bring up these private claims, but they so word the rule that when the Committee on Agriculture gets charge of matters in the House, if some one tries to have these bills referred to the Private Calendar, they can still be considered, because the rule is so worded to include bills "now on the Union and House Calendars." They would still then be covered by the rule.

I assert that the three-day provision was an afterthought. I appeared before the committee, as did a number of others, in opposition to these sugar claims. Nobody before the Rules Committee said anything about a three-day rule. The House Committee on Agriculture never requested a three-day rule. They simply requested a special rule for the Voigt bill and a special rule for the sugar claims, and when it came up to the final test, getting down to the cold steel of the proposition, the Committee on Rules said, "Nay, nay, we are not going to report a special rule for a private claim, because somebody will raise the question that there are public bills that ought to be considered under a special rule, and that we ought not to report a special rule for the consideration of private claims."

Mr. POU. Mr. Speaker, I yield five minutes to the gentleman from Kentucky [Mr. KINCHELOE].

Mr. KINCHELOE. Mr. Speaker, I want to say to the membership of this House now that, in my judgment, if it had not been for the activity of some very enthusiastic gentlemen for these sugar bills, there would not have been a rule reported to this House even for the Voigt bill. Here are two private claims, on behalf of private individuals and corporations, where we are asked to appropriate over $3,500,000 out of the Treasury of the United States to reimburse these people for some transactions they entered into while profiteering in sugar all over the country was rampant. The Agricultural Committee, by a majority report, reported these sugar bills to the House, and by some unknown method they went on the Union Calendar and not on the Private Calendar, where they belong. They could not show much speed there. I say to you that this Voigt bill is a public bill and it is all right to consider it, but its consideration is a secondary matter, so far as bringing out this rule is concerned.

Mr. BANKHEAD. Mr. Speaker, will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. BANKHEAD. How much is involved in these two sugar claims?

Mr. KINCHELOE. About $3,500,000 in these, and about $750,000 in one that is now pending before the Committee on Agriculture. How many more there are I do not know. They got these bills on the Union Calendar, and then rushed to the Rules Committee, and if I am not mistakenly informed the Committee on Rules did agree to report the rule for the consideration of the Voigt bill, because it is a public bill, and then every

member of that committee knew that these two sugar claims ought to be on the Private Calendar, and every man in this House knows it. How they got on the Union Calendar, I do not know.

The Rules Committee did not want to break a precedent. These bills are on the Union Calendar, and if they had been on the House Calendar that committee knew they had no right to report a rule for their consideration. But now they bring out a shotgun rule, wide open as a bootjack, and they give three field days, as the gentleman from Texas says, to the Committee on Agriculture. What is on the calendar of a public nature? The gentleman from Illinois [Mr. DENISON] came there with a bill asking for an appropriation of a million dollars to buy seed for the flood-stricken farmers of the Mississippi Valley, and it was reported out unanimously. It is on the calendar. You do not hear of any rule for that bill. The game-refuge bill is a bill of a public character and it is on the Union Calendar, where it belongs. The Committee on Rules is not anxious about that. Then there is the bee bill. Officials of the Agricultural Department testified before the committee that unless we stopped the importation of bees from Europe the bee industry of this country is likely to be destroyed by a peculiar disease. That bill is on the calendar. There is no effort to bring that up. It will not be brought up in these three days, because the sugar claims of private individuals have the board. Within the walls of this Capitol and House Office Building is the most gigantic lobby I have ever seen since I have been in Congress for these sugar bills, and the flood-stricken farmers of the Mississippi Valley must step back, because the Congress is going to take up these private bills.

Mr. BLAND of Indiana. Mr. Speaker, will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. BLAND of Indiana. I did not get the significance of the statement of the gentleman from Texas [Mr. JONES] to the effect that if these bills were referred to the Private Calendar nevertheless this rule would permit their consideration.

Mr. KINCHELOE. If these bills had not been placed on the Union Calendar—I want the gentleman from Kansas to hear me—the Committee on Rules would not have given the rule, because——

Mr. BLAND of Indiana. That is, if it was referred in the House.

Mr. JONES of Texas. I said that even if we sent the sugar bills to the Private Calendar, where they belong, after the rule is adopted, and the Agricultural Committee has charge of this matter, they would still have the right of way, because the rule says that bills now on the Union Calendar and House Calendar may be considered; so after the adoption of the rule, even though they were transferred, they would still have the right of way under the rule.

Mr. KINCHELOE. As the gentleman from Texas says, the members of the Agricultural Committee are in an attitude where we can not afford to vote against this rule.

Mr. RUCKER. Why not?

Mr. KINCHELOE. Because there are some bills of a public nature on the calendar that ought to be considered; that is the idea.

The SPEAKER. The time of the gentleman has expired.

Mr. WALSH. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WALSH. Does the adoption of this rule include the raising of the question of consideration against any bill that the Agricultural Committee brings up?

The SPEAKER. The Chair thinks not.

Mr. KINCHELOE. I did not yield for a parliamentary inquiry.

Mr. WALSH. But the gentleman's time had expired.

Mr. KINCHELOE. Has my time expired?

The SPEAKER. It has.

Mr. LONDON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LONDON. Can the rule be amended from the floor?

The SPEAKER. It can, unless the previous question is ordered.

Mr. LONDON. Would the inclusion of the word "public" before the word "bill" in the resolution meet the objection raised by Members?

Mr. SNELL. I yield five minutes to the gentleman from Kansas——

Mr. RAYBURN. I desire to submit a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RAYBURN. At what time would it be proper to make a motion to refer back to the committee a bill that has been reported to the House by a committee?

The SPEAKER. The Chair does not understand the gentleman's inquiry.

Mr. RAYBURN. This bill here, of course, went to the Committee on Agriculture improperly, because the only thing in the bill is that which denies the instrumentalities of interstate commerce to this product. At what time would it be proper to make a motion to refer that to the Committee on Interstate and Foreign Commerce?

The SPEAKER. To rerefer it?

Mr. RAYBURN. Or refer it.

The SPEAKER. At the proper time for a motion to recommit, after the third reading of the bill, or in the morning immediately after the reading of the Journal. Those are the only times when the motion is in order.

Mr. RAYBURN. That is the ruling of the Chair, that that is the only time it can be done?

The SPEAKER. The status is this: When a bill has been referred to a committee, in the morning after the reading of the Journal any gentleman authorized by the committee can move to rerefer, but after the committee has reported the bill that settles the question of jurisdiction, and it can then be made only after the third reading of the bill.

Mr. RAYBURN. Would it not be proper when the bill is called up for consideration to make that motion?

The SPEAKER. The Chair thinks not.

Mr. SNELL. I maintain it is on the proper calendar at the present time. I yield five minutes to the gentleman from Kansas [Mr. TINCHER].

Mr. TINCHER. Mr. Speaker and gentlemen, I do not feel right in adopting this rule without making a suggestion. I want first the House to understand the sugar claim bills are not on any calendar and are not reported by the Agricultural Committee by a unanimous report. There is a substantial minority, of which I am proud to be a member, opposed to those bills, but it is true that by a majority vote the Committee on Agriculture instructed the chairman to ask for a special rule for the consideration of those bills. Mr. VOIGT had had a vote of the committee instructing him to ask for a special rule for the consideration of the so-called filled milk bill. I appeared before the Committee on Rules and protested against granting any special rule for the consideration of the sugar claims and we had a hearing. Now, as far as the Voigt bill was concerned, I remember the exact situation that morning. There was a sentiment in the committee to grant a rule, which was presented by Mr. HAUGEN, chairman of the committee, and there was no written rule introduced, and the matter stopped in that way. The proponents of the special rule for the consideration of the sugar claims took all of the time of the Committee on Rules that morning and I raised the question; I wanted to be heard on the merits of whether a special rule should be granted, and made the point of order that the Committee on Rules should not consider the granting of any special rule for the consideration of those bills, because those bills were improperly assigned and they should be on the Private Calendar. I do not think anyone seriously will contend for a moment that they should not be on the Private Calendar. The Rules Committee——

Mr. CLARKE of New York. Will the gentleman yield?

Mr. TINCHER. I can not. The Rules Committee said that they would give us a chance to protest to the granting of a special rule to that effect, and one gentleman on the Democratic side of the House suggested that as it was a matter of taking jurisdiction and an application for a special rule that the committee should go into executive session. They did, and the next information I had was that the Rules Committee had by unanimous vote granted the Committee on Agriculture so many days, and I assumed that if the Committee on Agriculture had so many days for the consideration of measures in this House that the chairman of that committee should be permitted under the ordinary procedure here to call up bills which are of public interest and should be considered.

And if he does that, it will take more than three days for the consideration of the public bills. I want to say now that if the sugar claims come up, with this proposition to take money from the Public Treasury to pay the sugar dealers of the country, or to save them from loss, I shall be found with those who are opposed to the claims, and fight them to the limit. [Applause.]

Mr. SNELL. Mr. Speaker, I yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, I am unable to understand the attitude of some of the gentlemen on the minority side touching this matter. The Committee on Rules, I understand, unanimously reported a rule giving the Agricultural Committee three days. During the discussion of the merits of such a rule certain bills were referred to as bills that were likely to be brought

up. Now, some of the gentlemen on the minority side have been trying for several days to create the impression that there was something wrong, something improper, in bringing to the attention of the House bills regularly reported from the Agricultural Committee. Notwithstanding what certain other gentlemen may think about it, I do not think there is any sort of question but that the Speaker was justified in making the reference he did of these bills, and I am quite sure that the members of the Agricultural Committee themselves would have complained if these bills had gone to the Claims Committee. They are not claims. If they have merit it grows out of the fact that certain people acted as agents of the Government. I do not pretend to say whether they did or no. That is a matter for the House to determine when the evidence is presented. But it is an extraordinary thing that whenever anyone proposes to consider legislation having anything to do with acts of or the obligations arising out of the acts of the former Democratic administration gentlemen on the Democratic side protest. There is no sort of question but that the Department of Justice under the Wilson administration, the Department of State under the Wilson administration, did acknowledge or refer to certain people as agents of the Government in the purchase of sugar. Your administration so acknowledged them. It is for the House to determine whether they were such and whether there is an obligation arising out of that fact. But your State Department officials under their signatures so announced and acknowledged them. If what is proposed is fair and proper—and I do not now express any opinion in regard to them—it is because there is an obligation laid upon the Congress by the acts of the former administration.

One would judge from what you gentlemen say in regard to these matters that we are expected to turn our backs on anything and everything that has come to us from the former administration and to assume that it can not have any virtue because it did come from your administration. [Applause.] I am willing to admit that there is ground for argument along that line, but so far as we are concerned we are willing to give the former administration and its officials—they are the people whose case is presented here—opportunity to be heard. That is what these cases are. And I think it would be very proper to bring them up for consideration before the House.

The SPEAKER. The time of the gentleman from Wyoming has expired.

Mr. LONGWORTH. Will the gentleman yield for a question?

Mr. SNELL. I yield one more minute to the gentleman from Wyoming.

Mr. LONGWORTH. I simply wanted to ask to what committee these bills were referred in the Senate? They were treated as public measures, I am sure.

Mr. MONDELL. There is no manner of question but that they were treated as public measures. They involve the question of whether or no there is an obligation on the Government under one of its war laws.

Mr. SNELL. Will the gentleman yield?

The SPEAKER. The time of the gentleman has expired.

Mr. SNELL. Mr. Speaker, I yield one minute to the gentleman from North Carolina [Mr. POU].

Mr. POU. I yield one minute to the gentleman from New York [Mr. LONDON].

Mr. LONDON. Mr. Speaker, to use the language of politics, there is too much "sugar" about this rule. The objection can be easily met by amending the rule by inserting the word "public" before the word "bills," so that the Agricultural Committee would be enabled to take up only public bills. It is natural that a Democrat should be suspicious of any war claim that is approved by the Republicans, because during the war all the Democrats could possibly do would be to make themselves guilty of petty larceny, while the grand larceny was committed by the Republicans.

Mr. Speaker, I want to know when an opportunity will be offered to present this amendment to the House?

The SPEAKER. The Chair will recognize the gentleman to make the motion under the rules when it is in order.

Mr. SNELL. Mr. Speaker, I yield three minutes to the gentleman from Kansas [Mr. CAMPBELL].

Mr. CAMPBELL of Kansas. Mr. Speaker, there is a tempest in a teapot here this morning over a question of adopting a rule similar to rules that have been adopted in this House ever since I have been a member of the Committee on Rules. During the period of the war we brought in rules here giving the Agricultural Committee, the Committee on Military Affairs, the Committee on Naval Affairs, the Committee on Banking and Currency, or any other committee that had accumulated a great deal of business on the calendars, days on which to transact their business. Therefore that part of the rule is not at all unusual.

The gentleman from Texas [Mr. JONES], a member of the Committee on Agriculture, raises the question that this rule makes in order the consideration of bills that should be on the Private Calendar. Well, the gentleman from Texas, being a member of the Committee on Agriculture, should have raised that question in the Committee on Agriculture rather than now. [Applause.] The gentleman from Kentucky [Mr. KINCHELOE] should have raised the question in the Committee on Agriculture.

Mr. JONES of Texas. Will the gentleman yield?

Mr. CAMPBELL of Kansas. No; I can not. The Committee on Agriculture had jurisdiction of these bills in the Senate, had jurisdiction of them here, and reported them, and they are on the Union Calendar.

Mr. KINCHELOE. Will the gentleman tell me which calendar they should be on?

Mr. CAMPBELL of Kansas. This rule makes in order bills reported by the Committee on Agriculture now on the House or Union Calendar. Even the gentleman from Kentucky should know that the Committee on Agriculture does not report bills to the Private Calendar. These bills are on the House and Union Calendars, and the Committee on Agriculture, as soon as the rule is adopted, will have the right to call up any bill which is on the House or Union Calendar, and that is all this rule provides for.

Mr. SNELL. Mr. Speaker, I move the previous question on the resolution.

Mr. LONDON. Mr. Speaker, can the amendment be offered now?

The SPEAKER. It can not. The question is on ordering the previous question.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. JONES of Texas. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. JONES of Texas. Would it be in order to move to recommit the rule to the Committee on Rules with instructions to report the same back with an amendment?

The SPEAKER. Except that the rules do not allow it.

Mr. SNELL. Except that it is not permissible under the rules of the House.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

FILLED MILK.

Mr. HAUGEN. Mr. Speaker, I call up the bill H. R. 8086.

The SPEAKER. The gentleman from Iowa calls up the bill H. R. 8086. The Clerk will report it.

The Clerk read as follows:

A bill (H. R. 8086) to prohibit the shipment of filled milk in interstate or foreign commerce.

Be it enacted, etc., That whenever used in this act—

(a) The term "person" includes an individual, partnership, corporation, or association;

(b) The term "interstate or foreign commerce" means commerce (1) between any State, Territory, or possession, or the District of Columbia, and any place outside thereof; (2) between points within the same State, Territory, or possession, or within the District of Columbia, but through any place outside thereof; or (3) within any Territory or possession, or within the District of Columbia; and

(c) The term "filled milk" means any milk, cream, or skimmed milk, whether or not condensed, evaporated, concentrated, powdered, dried, or desiccated, to which has been added, or which has been blended or compounded with, any fat or oil other than milk fat, so that the resulting product is in imitation or semblance of milk, cream, or skimmed milk, whether or not condensed, evaporated, concentrated, powdered, dried, or desiccated.

SEC. 2. It shall be unlawful for any person to manufacture within any Territory or possession, or within the District of Columbia, or to ship or deliver for shipment in interstate or foreign commerce, any filled milk.

SEC. 3. Any person violating any provision of this act shall upon conviction thereof be subject to a fine of not more than $1,000 or imprisonment for not more than one year, or both; except that no penalty shall be enforced for any such violation occurring within 30 days after this act becomes law. When construing and enforcing the provisions of this act, the act, omission, or failure of any person acting for or employed by any individual, partnership, corporation, or association, within the scope of his employment or office, shall in every case be deemed the act, omission, or failure of such individual, partnership, corporation, or association, as well as of such person.

Mr. JACOWAY. Mr. Speaker, how much time does the gentleman from Iowa propose for discussion?

Mr. HAUGEN. Mr. Speaker, I ask unanimous consent that the bill be considered in Committee of the Whole House on the state of the Union; and pending that, I ask that the general debate be limited to—what time would the gentleman from Arkansas suggest?

Mr. JACOWAY. I would suggst one hour and a half for each side.

Mr. HAUGEN. I ask unanimous consent that the debate be limited to three hours, one half to be controlled by the gentleman from Arkansas [Mr. JACOWAY] and the other half by the gentleman from Wisconsin [Mr. VOIGT].

The SPEAKER. The gentleman from Iowa asks unanimous consent that this bill be considered in Committee of the Whole House on the state of the Union and that the general debate be limited to three hours, one half to be controlled by the gentleman from Arkansas [Mr. JACOWAY] and the other half by the gentleman from Wisconsin [Mr. VOIGT]. Is there objection?

There was no objection.

The SPEAKER. The gentleman from New York will please take the chair.

Thereupon the House resolved itself into Committee of the Whole House on the state of the Union for consideration of the bill H. R. 8086, with Mr. HICKS in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 8086, which the Clerk will report.

The bill was again read.

The CHAIRMAN. Under the order of the House, the time on this debate is limited to three hours, one half of the time under the control of the gentleman from Wisconsin [Mr. VOIGT] and the other half under the control of the gentleman from Arkansas [Mr. JACOWAY]. The Chair recognizes the gentleman from Wisconsin.

Mr. VOIGT. Mr. Chairman, I yield myself 15 minutes.

The CHAIRMAN. The gentleman from Wisconsin is recognized for 15 minutes.

Mr. VOIGT. Mr. Chairman and gentlemen, the object of this bill which I have introduced is to exclude from interstate and foreign commerce, and to prevent the manufacture of, in the District of Columbia and in the Territories and possessions, an article which is known as filled or oiled milk.

Filled milk is a compound or imitation of milk which has come onto the market in the United States during the last five or six years. The article consists of a combination or compound of condensed skimmed milk and coconut oil. The manufacture of this article is carried on in the same factories where the ordinary evaporated or condensed milk is made; that is, some of the same people in the country that are making evaporated milk are manufacturing this product as a side line, and the manufacture of the substitute has assumed such alarming proportions in the last few years that something should be done to curb it.

The sale of this article is a fraud upon the public, and it is a fraud upon the men who are engaged in the milk and dairy business and in the manufacture of legitimate condensed and evaporated milk. These people who are making this product take the whole milk as it comes from the farmer and separate it, take out the cream, which is the valuable constituent, then condense the skimmed milk to about one-half of the volume, and add coconut oil equal to the quantity of butter fat removed. The resulting mixture, when the coconut oil and condensed skimmed milk are emulsified and combined in the factory, is an exact imitation of evaporated milk. It looks and tastes exactly like evaporated milk, and the consumer can be easily defrauded into buying it for the genuine article.

Mr. JOHNSON of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. VOIGT. Yes.

Mr. JOHNSON of Mississippi. Is that milk injurious or unwholesome or deleterious to health?

Mr. VOIGT. I will say that the filled milk is not a poisonous product, but it is a fraudulent product, in that the consumer is not getting what he thinks he is buying. The evidence adduced before our committee was overwhelming that the filled milk was sold on the shelves of the retailers side by side with the genuine article, and in most cases it was being sold for the same price. I object to filled milk not so much for what is in it as for what is not in it.

Milk is by far the one most important food article which we have. There is no substitute for milk, and the general health of our people would be immensely benefited if we consumed three or four times as much milk and cheese as we actually do. We can not gain anything by permitting people to put a fraudulent substitute for milk on the market.

Mr. WALSH. Mr. Chairman, will the gentleman yield for a question?

Mr. VOIGT. Yes.

Mr. WALSH. Did the committee hold any hearings on this bill, H. R. 8086?

Mr. VOIGT. I will say to the gentleman that originally I introduced the bill H. R. 6215, which was an amendment to the pure food and drugs act. That bill I submitted to the Secretary of Agriculture and he objected to it because he did not approve of specifying any particular food product in the pure food and drugs act. But representatives of the department appeared before the committee and expressed themselves in favor of legislation to curb the production and sale of filled milk. Then, after the hearings were completed, I redrafted the bill in its present form. The subject matter of both bills is the same. I think that will answer the gentleman's question.

Mr. WALSH. This bill is the result of the hearings, but no hearings have been held on this particular bill?

Mr. VOIGT. This bill was drafted after the hearings were closed. It was not necessary to hold further hearings, because the difference in the bills is largely a matter of form. No one requested additional hearings.

Mr. JOHNSON of Mississippi. If this filled milk is not injurious, deleterious, or unwholesome to health, in view of the first child-labor law decision, what constitutional authority have you for prohibiting its shipment in interstate commerce?

Mr. VOIGT. I do not concede that this filled milk is not injurious. I shall speak of the constitutional question later on.

Mr. JOHNSON of Mississippi. That is why I asked the question a while ago.

Mr. VOIGT. If a small quantity of filled milk is consumed by an adult person it will not injure him any more than if he consumes a mixture of half milk and half water. But the gentleman will concede that he would not approve of permitting anybody to sell such a mixture. Filled milk is positively injurious to children and will affect the health of an adult if he uses it in place of milk.

Mr. JOHNSON of Mississippi. That suggests this question: Can we not remedy that by requiring the manufacturers to place on the container a statement of the constituent elements of the filled milk?

Mr. VOIGT. A statement of the constituent elements is now placed upon the container, but the difficulty is that the manufacturers of this article put this filled milk into a container of the same size and style as the other, and it is put on the shelves in retail stores side by side with the genuine product, and the testimony offered before the committee was overwhelming that when people went in and asked for evaporated milk, or for a can of milk, in many cases they were handed this fraudulent substitute, which costs the retailer about 3 cents per can less.

Mr. JOHNSON of Mississippi, Mr. NEWTON of Minnesota, and Mr. DOWELL rose.

Mr. VOIGT. I shall yield for a brief question, but I must proceed with my statement.

Mr. JOHNSON of Mississippi. Is that the reason for not shipping in interstate commerce?

Mr. VOIGT. That is one of the reasons.

Mr. JOHNSON of Mississippi. Will the gentleman tell us the others?

Mr. VOIGT. I am trying to tell the committee as rapidly as I can speak what the bill is about and what the objections are to this substitute.

Mr. DOWELL. Just one question. What about the nutrition in filled milk as compared with pure milk?

Mr. VOIGT. I intend to speak about that. I will say to the gentleman that Doctor McCollum, of Johns Hopkins University, who is probably the greatest expert on nutrition in the world, has conducted something like 4,000 feeding experiments on animals, and he finds that if rats, for instance, are fed on such articles as you would have on your table, good wholesome food, but are left without milk and are fed on this filled milk, they will die of disease in a very short time. The vitamines which have been found so necessary for the growth of infants and children and for the grown body as well are absent from this filled milk.

Mr. DOWELL. It is not fair to put it in competition with pure milk, as to the nutritious qualities of it?

Mr. VOIGT. Absolutely not. The vital, growth-producing, health-giving elements of milk known as the vitamines are almost wholly lacking in this substitute. Coconut oil contains no vitamines, nor does any other vegetable oil.

Mr. LAZARO. Will the gentleman yield?

Mr. VOIGT. I yield briefly to the gentleman from Louisiana.

Mr. LAZARO. Just for a short statement. While the filled milk does not contain any poison, if an ignorant person goes to the store and buys a can of filled milk and feeds it to his children and does not know that his children are getting milk that contains no elements of nutrition his children are being poisoned in an indirect way.

Mr. VOIGT. That is the point exactly. Anyone feeding this article to children with the idea that they are getting evaporated milk is seriously imperiling their health. A child fed on this substitute will develop rickets, and eye disease, and is liable to tuberculosis, because that child is not getting the nutrition contained in normal whole milk.

Mr. NEWTON of Minnesota. Will the gentleman yield?

Mr. VOIGT. I will yield briefly to the gentleman.

Mr. NEWTON of Minnesota. I have been very much interested in the pamphlet sent out based upon the experiments made by Professor McCollum, of Johns Hopkins. It shows that rats fed with this filled milk develop eye trouble. I am wondering if before the committee there was any contention made by anyone disputing the conclusions and findings of Professor McCollum?

Mr. VOIGT. No, sir.

Mr. NEWTON of Minnesota. So that the record stands undisputed.

Mr. VOIGT. The report which the gentleman has in his hand as to these experiments is absolutely undisputed. If you will read this pamphlet you will learn just how Professor McCollum made these experiments. There was some question raised in the committee, and the gentleman from Louisiana [Mr. ASWELL] asked Doctor McCollum if he would experiment on rats with filled milk. Doctor McCollum made that experiment and here is the result of it. [Showing picture.] It shows that if rats are fed on good food, such as bread and beefsteak and articles that you would eat at your table, but instead of milk are fed this filled milk, they will rapidly decline and die of disease in a very short time. Here in this pamphlet are the pictures of two rats of equal age that were taken at the same time. One of them was fed on evaporated milk and the other fed on filled milk, but otherwise their diet remained the same. This rat on the right was fed the substitute and in something over 100 days grew to only one-half the size of the other one besides contracting a fatal eye disease which killed it. Take a look at this picture and you will see the bright eye of the rat fed on legitimate evaporated milk and then look at the other one.

Mr. BUTLER. Will the gentleman yield?

Mr. VOIGT. I will.

Mr. BUTLER. I am sure that if I were a rat I would not want to be fed on this substitute. Has the gentleman the result of any experiments on a human being?

Mr. VOIGT. I have learned of some cases where children were fed by the parents on filled milk and that physicians found them in very poor condition.

Mr. BUTLER. It failed to nourish the children?

Mr. VOIGT. Yes, and developed disease in them; but when the children were fed on a good milk diet they recuperated rapidly.

Mr. McCLINTIC. Will the gentleman yield?

Mr. VOIGT. Yes.

Mr. McCLINTIC. Was there any testimony from farm organizations as to the effect that this legislation will have if it is enacted into law?

Mr. VOIGT. I will say that every farm organization that has a representative in the city of Washington is for this bill.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. VOIGT. I will.

Mr. WILLIAMSON. Is it not a fact that this filled milk is sold largely to the poor and ignorant; for instance, on the East Side of New York, where they are not educated in the grades of milk?

Mr. VOIGT. Yes. Some of the organizations that are interested in this legislation sent out observers in the city of Philadelphia and in my State of Wisconsin, and they found that in the good residential sections of cities, where people were able to read the labels, it was not sold, but they found it in the stores patronized by the less well to do and foreigners. In some instances it has been found in the homes of intelligent people, who never read the label.

Mr. RAKER. Will the gentleman yield?

Mr. VOIGT. I will.

Mr. RAKER. In the bill in line 8, page 2, you use the words "powdered, dried, and desiccated." What is the difference between those three terms?

Mr. VOIGT. There is no difference; these words are used interchangeably by the trade. The idea is to cover all forms of milk.

Mr. RAKER. The bill provides that if there is any fat whatever added to the powdered, dried, or desiccated milk, or other form of milk, even though there is no substance taken from the milk before it is dried, the bill applies. Suppose you took 10 gallons of milk and dried it as they do in California, if you put any fat at all into it the bill applies to that.

Mr. VOIGT. Yes. The bill prohibits the shipment of any form of milk which has been in any way adulterated with oil or fat, except butter fat that comes from the cow. That is necessary for this reason: It was discovered that in the city of New York men took milk and added coconut oil because it gave it a creamy consistency and sold the article for cream. There was a concern organized in Philadelphia to manufacture this so-called cream.

Mr. RAKER. Take the cream without any dilution, evaporate it so that it is dried powder; now, if you put in any sort of material, if you put in any fat except butter fat, under this bill it would be prohibited from interstate commerce.

Mr. VOIGT. Yes.

Mr. RAKER. Did the committee find out that any addition to the natural cream dried was unhealthy?

Mr. VOIGT. We did not find that that method was being pursued. I do not know of any manufacturer in the United States who is doing that. The people who are using coconut oil are using it as a substitute for butter fat in milk. They are not using it except for the purpose of making milk appear as cream, or skimmed milk as evaporated milk.

Mr. RAKER. This is intended to cut off the fraud?

Mr. VOIGT. It is.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. VOIGT. Certainly.

Mr. SMITH of Michigan. What other ingredients do they use to adulterate milk besides coconut oil?

Mr. VOIGT. I understand occasionally a small amount of peanut oil is used, but that is rather negligible.

There is a great incentive on the part of the retailer to sell this in preference to the genuine. The evidence before the committee showed that the ingredients in a pound can of this substitute cost the manufacturer a fraction less than 2 cents, whereas the milk for a pound of legitimate evaporated milk costs about 3 cents more.

Mr. BUTLER. Will the gentleman yield?

Mr. VOIGT. Yes.

Mr. BUTLER. Is there no law existing by which that fraud can be avoided?

Mr. VOIGT. No.

Mr. BUTLER. And it requires a bill of this kind?

Mr. VOIGT. Absolutely. I will say that I think the spirit of the pure food law covers this article, but the manufacturers escape by using a trade name instead of calling it milk. The act provides that an article of food shall be considered adulterated—

if any substance has been mixed and packed with it so as to reduce or lower or injuriously affect its quality or strength—

Or—

if any substance has been substituted wholly or in part for the article—

Or—

if any valuable constituent of the article has been wholly or in part abstracted—

And shall be considered misbranded—

if it be an imitation of or offered for sale under the distinctive name of another article.

But the manufacturers escape under a proviso to section 8 that an article shall not be considered adulterated or misbranded—

in the case of * * * compounds * * * under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article.

The manufacturers use the same size cans as for evaporated milk, and put on such names as "Hebe," "Carolene," "Enzo," "Silver Key," "Nutro," and "Nyko."

Mr. LAZARO. Will the gentleman yield?

Mr. VOIGT. Yes.

Mr. LAZARO. How much peanut oil is used in the preparation with the coconut oil?

Mr. VOIGT. A very small quantity; I do not know how much. The manufacturers of the substitute extract the cream and take the same quantity of coconut oil to replace it. For instance, they will take out of the milk 7 or 8 per cent butter fat and then substitute 7 or 8 per cent by weight of coconut oil. The butter fat extracted from the milk is worth 40 or 50 cents a pound, while coconut oil can be purchased for from 8 to 10 cents a pound.

Mr. NORTON. Mr. Chairman, will the gentleman yield?

Mr. VOIGT. Yes.

Mr NORTON Are not all of these cans labeled with exactly what they contain?

Mr. VOIGT. Yes; but they are labeled in a fraudulent way, because they do not tell the consumer that the valuable part of the milk has been extracted.

Mr. NORTON. But they do tell exactly what is contained in it.

Mr. VOIGT. From a technical standpoint they do, but there is not one individual in ten thousand, after he sees the label, who knows what is in the can.

Mr. SMITH of Michigan. These things are in fine print.

Mr. VOIGT. I have here a full-page advertisement of "Nutro" in the Chicago Tribune. This advertisement says:

Nutro is a delicious and nutritious new milk product. It is prepared in the rich dairying districts of Wisconsin and Indiana, and made of pure, fresh cow's milk with the animal fats extracted and essential food values replaced by a refined, rich, sweet, purely vegetable coconut fat.

Nutro is pure, delicious, wholesome. It is prepared in model condenseries from pure cow's milk evaporated to double strength, with the animal fats extracted and then enriched with sweet, edible, highly refined coconut fat.

I submit that the reader gets the impression that Nutro is a better article than evaporated milk. Butter fat is referred to as "animal fat," and it is claimed that pure cow's milk is evaporated to double strength.

The manufacture of this compound has been growing at an alarming rate, as will appear from the following figures furnished by the Bureau of Markets:

	1920	1919	1918	1917
Evaporated, part or full skimmed, modified with foreign fat (case goods)	84,044,000	62,262,225	50,619,163	30,488,262
Evaporated, part or full skimmed, modified with foreign fat (bulk goods)	2,517,000	2,748,120	3,861,097	4,543,640

In 1920 nearly 8,000,000 pounds of coconut oil were used in the manufacture of the compound, taking the place of that many pounds of butter fat sorely needed for the nutrition of our people and injuring the market of the American farmer. It is unfair to our farmers to put them into competition with this inferior product produced by oriental labor and handled by very unclean methods. The manufacturers of filled milk stated before the committee that the business was in its infancy, and it is high time that it is wiped out altogether.

The argument is made that filled milk is a poor man's food because it is sold for less money than the genuine article. There is nothing to this argument, because the evidence shows that in very many stores the two articles are sold for the same price. But assuming that the poor man can buy a can of this stuff for 8 cents when he would have to pay 10 or 11 cents for evaporated milk, he is defrauded nevertheless, because he is not getting 8 cents' worth and is probably injuring the health of his family.

The superiority of the white race is due to at least some extent to the fact that it is a milk-consuming race. Natives of tropical countries who use the products of the coconut are stunted in body and mind. I believe that one reason why they are inferior is that they do not use the milk of cows or other animals. We owe a great deal to the dairy cow, a great deal more than the general public gives her credit for. We can not afford to injure the dairy industry; if we do it, we injure the Nation. The dairy industry not only supplies us with an absolutely necessary article of food but it maintains the fertility of our soil, and anything that we do to encourage the dairy industry is a direct benefit to the Nation. Doctor McCollum testified as follows before our committee:

There is no question but what milk is the only food for which there is no effective substitute. It is not a question of whether there is some food value in skimmed milk, as to whether we can not get along in some peculiar situation, that one might not get along if a suitable amount of eggs were included in the diet every day. It is not a question whether technically you can bring before a legislative committee of this sort a situation which might work in a satisfactory manner without this food. But this is the point, that we are educated to use milk. We are a people who for hundreds of generations have depended upon dairy products as a prominent article of our diet. We know how to use it, and we like it. We have an agricultural industry which can not remain a permanent one—there can be no permanent system of agriculture without an animal industry to go with it. * * * We have no deposits of phosphorus and no adequate deposits of calcium that will meet the agricultural needs of this country for fertilizer. * * * There is no similar property—vitamines—in any vegetable oil, including coconut oil and cottonseed oil, comparable with what you find in butter fat. * * * I guarantee that any infant that is fed for a few weeks on one of these milk substitutes will develop rickets. * * * My suggestion is that we do everything that is in our power to maintain at its full tide an industry so important as the dairy industry, and to bring the American cow into competition with a coconut grove is an injustice.

This bill has been indorsed by hundreds of dairying and farming organizations, by organizations of consumers, and others who are interested in the welfare of the people. It is also indorsed by practically every dairying and farming publication in the United States. Some of the leading organizations indorsing it are as follows:

National League of Women Voters.
National Congress of Mothers and Parent-Teachers' Associations.
National Grange.
American Farm Bureau Federation.
National Board of Farm Organizations.
Farmers' Educational and Cooperative Union of America.
Farmers' National Congress.
National Agricultural Organization Society.
National Conference on Marketing and Farm Credits.
National Dairy Union.
Pennsylvania Rural Progress Association.
Farmers' Society of Equity.
Federation of Jewish Farmers of America.
American Association for Agricultural Legislation.
Intermountain Farmers' Association.
Farmers' Equity Union.
American Society of Equity.
National Milk Producers' Federation.
Dairymen's League (Inc.) and Dairymen's League Cooperative Association (Inc.). (Largest in the world.)
New England Milk Producers' Association, Woodbury, Conn.
Interstate Milk Producers' Association.
Maryland and Virginia Milk Producers' Association.
The Milk Producers' Association of the Chicago District.
Dairymen's Cooperative Sales Co.
National Agricultural Conference.
National Dairy Council.
American Jersey Cattle Club.
Milwaukee Milk Producers' Association.
Wisconsin State Union, American Society of Equity.
Northeastern Dodge County Cow Feeding Association, of Wisconsin.
Cheese Producers' Federation, of Plymouth, Wis.
Wisconsin Dairymen's Protective Association.

The Legislature of Wisconsin at its 1921 session passed a joint resolution memorializing Congress to pass the Voigt bill.

Some question has been raised as to the constitutionality of this bill. I have given this matter very careful consideration and have also had the benefit of the advice of competent lawyers. Judge J. W. Bryan, of Baltimore, an authority on constitutional law, in an exhaustive opinion, declares the bill constitutional. I can not take the time to discuss the legal question, but refer anyone interested to the following decisions:

Lottery Cases (188 U. S. 321).
Hoke *v.* United States (227 U. S. 308).
McDermott *v.* Wisconsin (228 U. S. 115).
Eckman Alterative Cases (239 U. S. 510).
Hebe Case (248 U. S. 297).

Quite a number of States have already passed laws outlawing or imposing severe restrictions on the sale of filled milk. Such States are Utah, Maryland, Florida, California, Colorado, Connecticut, Oregon. New York and New Jersey have very recently passed laws prohibiting its manufacture and sale. Wisconsin passed such a law at the last session of the legislature. This law is now being tested in the Supreme Court, and I have no hesitation in saying that its constitutionality will be upheld. There are prospects of further State legislation. It is the judgment of all dairying and farm organizations represented in Washington that with the State legislation and the enactment of this bill into law we shall have a remedy which will effectually outlaw filled milk.

[NOTE.—The bill passed the House on May 25, 1922, by a vote of 250 to 40.]

Mr. JACOWAY. Mr. Chairman, I yield 20 minutes to the gentleman from Louisiana [Mr. ASWELL].

Mr. ASWELL. Mr. Chairman, it is discouraging to me to see so good a man as the gentleman from Wisconsin [Mr. VOIGT] permit himself to be used in behalf of such flagrant, sectional, vicious class legislation as that which is proposed by this bill. If I were in favor of this sort of legislation I could not support the bill because unquestionably it is unconstitutional. Its proposals are monstrous. The gentleman from Wisconsin in his closing remarks made the amazing statement that this milk compound is so labeled that not one person in 10,000 could read it and understand what it means. I hold in my hand a can of the so-called filled milk. This is the Hebe compound. This is made of peanut oil and skim milk. Six months ago when the hearings were being held on this question it appeared that generally coconut oil was used. I then made a request of the manufacturers of these milk compounds to experiment in their chemistry departments to ascertain whether our domestic oils could be used. They have experimented with peanut oil, cottonseed and sunflower seed. They made a perfect success of the peanut and the cottonseed oils, and are still experimenting with the sunflower oil. I used this particular can which I hold in my hand for baking purposes in my home during the past week to test it. It is a perfect milk compound of peanut oil and skim milk. The gentleman is mistaken about the label. There could not be any fraud. This is the label, and you can read it across the room.

Mr. VOIGT. Mr. Chairman, will the gentleman yield?

Mr. ASWELL. In a moment. The label states that it is a compound of evaporated skimmed milk and vegetable fat; that it contains 7.8 per cent of vegetable fats, 25 per cent total solid. Then the label in letters that you can read from your seats says that it is for cooking and baking, and then we find the statement in large letters, "Do not use in place of milk for infants." Every can has that label under the present pure food law, and where any deception or fraud could be practiced is beyond my comprehension. I yield to the gentleman from Wisconsin.

Mr. VOIGT. Is that a can of the Hebe milk?

Mr. ASWELL. Yes.

Mr. VOIGT. Was it not testified before the Agricultural Committee that the manufacturers of this very product had changed their label about six or seven times?

Mr. ASWELL. They may have changed it in the development of their product, but this is the established label now adopted by that company.

Mr. BURTNESS. Was that portion of the label which warns against the use of the contents as a substitute for milk for infants on former labels?

Mr. ASWELL. It was.

Mr. BURTNESS. It is the gentleman's contention that it has been put on the label of the product of this company from the beginning?

Mr. ASWELL. I have not followed the history of it from the beginning, but since it has been developed into a real business, prosperous enough to put the fear of the Lord into the Butter Trust, it has had that label.

Mr. VOIGT. I hold in my hand a can of this compound, and it does not contain any such statement on its label.

Mr. ASWELL. That might be before they had established and developed the business, but we are dealing with the present. In an open fight for the right why do you not come away from ancient history?

Mr. RANKIN. Mr. Chairman, if the gentleman will yield, I see now that the gentleman from Wisconsin has found that the label is on the can.

Mr. RAKER. Where did the gentleman get the information that this is peanut oil?

Mr. ASWELL. With the permission of the House, I would like to file a letter in respect to that. I had the experiment made.

PEANUT OIL USED.

CHICAGO, *April 22, 1922.*

MY DEAR MR. ASWELL: Immediately following the hearing before the House Committee on Agriculture at Washington last summer on the Voigt bill, and in line with your suggestion, our laboratory began to experiment with peanut oil in the manufacture of an evaporated skimmed-milk compound.

In the manufacture of such a compound it is imperative that the vegetable fat used be absolutely neutral as to flavor and odor. After exhaustive inquiries we found that a peaunt fat which would fit our requirements was not obtainable—not even in small amounts necessary for making laboratory experiments. We then proceeded to equip our laboratory with the apparatus necessary to refine peanut fat to a point where the objectionable flavors of the peanut had been practically eliminated. As soon as this had been accomplished, and we were able to produce a higher refined fat than was obtainable from the refiners of peanut oil, we commenced to manufacture a compound in the laboratory with the peanut fat, and we found our path beset with many difficulties which could only be solved by continuous experimentation, all of which consumed much time.

After we had produced a satisfactory product in the laboratory, it was then necessary to manufacture a batch of the new product on factory scale and hold this batch in our warehouse for several weeks to ascertain if the finished product on aging would develop any flavors which would make it unfit for commercial use.

As I advised you in my night letter of yesterday, we are satisfied that we have produced a satisfactory product, and that this belief will be fully confirmed on the termination of our experiments, which should be concluded in the next month or two.

The referee appointed by the Supreme Court of the State of Wisconsin to take testimony in the case brought by this company to test the constitutionality of the law which prohibited the manufacture and sale of Hebe, passed last summer by the legislature of that State, found from the evidence that Hebe is a wholesome and nutritious article of food for adults and children in the same sense that bread, meat, and potatoes are wholesome. He also found there was nothing deleterious to health in the product.

You will be interested in knowing, I am sure, that Professor McCollum, who appeared before this committee on the hearings on the Voigt bill, was the star witness for the State in this case.

No exceptions were taken by the State to the findings of the referee as reported by him to the supreme court. This case was argued before the supreme court on April 15, but no decision has been handed down as yet. We look for a decision on or about May 7.

As Hebe is an admittedly wholesome nutritious article of food, honestly labeled, and economical in its use, there would seem to be no just basis for denying to it the channels of interstate commerce.

The argument which has been freely advanced by the proponents of the bill that the legislation is fully justified for the reason that the dairy farmer should not be compelled to compete with the "coconut cow" of the South Sea Islands, has been rendered ineffective by reason of our discovery that a commercially successful product can be produced by substituting peanut fat for coconut fat.

It needs no argument to substantiate the statement that this new use discovered for peanut fat will give the peanut industry in this country a great impetus and contribute materially to the prosperity of that section of the country which grows peanuts. It is difficult to believe that Congress would pass a bill, the effect of which would be to benefit the producers of a raw material produced in one section of the country to the detriment of producers of a raw material in another section.

If the product was not a wholesome, nutritious article of food, and was not being advertised, labeled, and sold for what it really is, we would have no right to protest against the proposed legislation, but it does seem that the power of Congress should not be directed against us for the sole reason that the class of people engaged in the manufacture of a competing production have an ambition to destroy competition.

* * * * * * *

With the assurance of my continued high personal regard, I am

Yours truly,

PAUL R. MCKEE.

Mr. RAKER. The gentleman says that the bill is unconstitutional. Upon what grounds?

Mr. ASWELL. Because the bill starts out with the blunt statement that milk compounds shall be prohibited from being manufactured and shipped through interstate commerce, and gives no reason whatever for it. No claim is made that filled milk is unwholesome or injurious to health, nor that it is sold fraudulently. Its provisions are ridiculous.

Mr. VOIGT. Mr. Chairman, will the gentleman yield?

Mr. ASWELL. Yes.

Mr. VOIGT. Did the gentleman or any other member of the committee raise that point while the hearings were being held? Did the gentleman then claim that the bill was unconstitutional?

Mr. ASWELL. I did, and I put it in my minority report. I am sorry you have not studied it.

Mr. VOIGT. Was the question raised in the committee?

Mr. ASWELL. Absolutely. I raised it myself.

Mr. VOIGT. I do not recall it.

Mr. ASWELL. Mr. Chairman, this proposed bill on the subject of filled milk, which has been discussed by the gentleman from Wisconsin, is to my mind a very serious one, because it involves the fundamental principles of government. I think most of the gentlemen on the Republican side in the last campaign made the solemn pledge to the American people that there would be less government in business. The purpose of this bill is not only to put the Government in business, but to put the Government into the business of putting out of business legitimate business. I want to make an assertion and prove it by the hearings, that the proponents of this bill, namely, the dairy interests of certain sections of the country, have one definite purpose, and that is to remove competition from their own business. In the hearings a Mr. Larson, of the Department of Agriculture, advocating the bill and speaking for the Butter Trust, made an amazing admission. After a long and tedious hearing the following occurred:

Mr. ASWELL. Then, according to your statement, if these gentlemen would promise not to increase their business you would not object to their manufacturing what they are manufacturing?

Doctor LARSON. From the standpoint of that principle?

Mr. ASWELL. If they would promise not to increase it any, you would be satisfied?

Doctor LARSON. If they did not increase it, from the standpoint of the dairy industry it would not be a serious thing. As I said before, they are making 85,000,000 pounds of this product to-day, and we are producing 1,500,000,000 pounds or more of evaporated milk. But the point is, it is growing so very rapidly.

This whole question is an effort to have the Congress step in and protect the private dairy business by shutting out their competitors in other legitimate business. It is monstrous that the Congress should be asked to destroy business in which millions of dollars have been invested, merely for the purpose of more profit to the dairy business competing with them. The purpose of the bill is to shut out competition with the dairy industry, which has here the most powerful organized lobby in the world.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. ASWELL. Yes.

Mr. RAKER. The gentleman read certain matter from the label on the can. The gentleman from Wisconsin [Mr. VOIGT] said that he had a can of this milk in his hand which did not have that on the label.

Mr. ASWELL. Oh, he admitted later that he found it there.

Mr. RAKER. Was it on the gentleman's can, I will ask him?

Mr. VOIGT. Will the gentleman yield to me for a moment?

Mr. ASWELL. Oh, the gentleman found it on his can. I want to answer the gentleman from Wisconsin now for a moment in respect to his rat business.

Gentlemen, there are three great specialists in this country who have equal responsibility for the amazing discovery of vitamines. Nobody has ever seen a vitamine or tasted one or heard it. It is something that is supposed to be in certain foods that makes life. These gentlemen are Doctors McCollum, of Baltimore, and Sherman, of New York, and Mendel, of Yale.

Doctor McCollum came before our committee and made the assertion that if we fed rats a certain food and some other rats some other foods some will grow fat and some will grow ill. This picture Mr. VOIGT has shown you is in harmony with that description, but I shall in a minute read from Doctor McCollum, specifically making an assertion on the other side of the question. Doctor McCollum made the assertion before our committee that unless every man in the country should drink a quart of sweet milk a day he would be underfed and be a runt.

I remember very distinctly that my friend the gentleman from Kentucky [Mr. KINCHELOE] resented that absurd statement, and the gentleman from Nebraska [Mr. MCLAUGHLIN] called attention to the fact that with MCLAUGHLIN's large family of children if they drank as much milk as McCollum demanded, because the output would be inadequate and the price advanced, it would cost my friend MCLAUGHLIN of Nebraska $7.92 a day for his milk bill. Doctor McCollum is reputed to be a great doctor, and I want to present to you his double position before I am finished with this. He says that the rat that is fed filled milk alone grows thin and dies. Why, if you feed a baby on pure butter and nothing else it will die, or if you feed a baby on ham and nothing else it would die, but he says you must give the rat the whole milk to save him and make him sleek and fat. Have you ever seen one of the rats around a farmhouse fat and sleek and skillful and daring? Where did he get his pep? From whole milk? Where did he get any milk at all?

Mr. VOIGT. Will the gentleman yield?

Mr. ASWELL. Yes, sir.

Mr. VOIGT. I want to say to the gentleman the rat which is at liberty and not in captivity feeds on other animals and gets the blood and the vitamines in that way.

Mr. ASWELL. What other animal does a mouse feed on?

Mr. VOIGT. I can not tell you, but that is the testimony of Doctor McCollum.

Mr. ASWELL. Now, Mr. Chairman, let me quote Doctor McCollum. Here is a letter from Doctor Mendel, of Yale University, the highest authority on the subject, with reference to this strange entity that is called vitamine. He writes this letter to Representative JOHN CLARKE, of New York:

The situation is somewhat as follows: The investigations of recent years have demonstrated that in addition to the usual nutriments, proteins, fats, sugar, and salts, milk contains properties now described as vitamines. One of these is abundantly associated with the milk fats, as was first demonstrated by McCollum and by Osborne and myself several years ago. It is frequently called fat-soluble vitamine A. It is not universally present in foods and it is essential to the welfare of growing individuals. It is found in eggs, in green vegetables, in various animal fats—rarely in those of vegetable origin as they are prepared for the market. Every physiologist admits that growing children should have some quota of vitamine A; how much is needed is not definitely known. For infants the preferable supply admittedly is whole milk. However, McCollum is authority for the statement that approximately half of the vitamine A is present in the nonfat part of the milk—that is, in skim milk; and another competent scientific investigator, Professor Sherman, of Columbia, has announced that skimmed milk furnishes important amounts of vitamine A. I inclose a copy of their published statements which I happen to have at hand.

Preparations of so-called "filled" milk are emulsions of vegetable fats in skimmed milk. Coconut oil is commonly used, I believe, in preparing them. These facts are admittedly digestible and nutritious; so is skimmed milk, which, owing to fostered prejudices, has been a greatly undervalued article of diet. The milk compounds should be properly labeled—as should every package of food—to tell the truth. They should not be recommended for use in infant feeding; on the other hand, no harm can come from the chance use of a quantity of skimmed milk even by infants. I mention this because the opponents have spread the impression among gullible persons that the use of a can of milk compound is a positive menace to the infant which consumes it. Skimmed milk is not a rank poison. It is merely not a complete food for an infant; neither is barley water nor "prepared foods."

I am informed that some of the milk compound packages and advertisements not only give the composition of the contents but specifically indicate in words that the product is not recommended for infant feeding. What, then, shall we say of the value of the milk compounds, properly marketed in conformity to the pure-food laws, for adult nutrition? I do not see how they can be designated otherwise than as wholesome food. Indeed, it would be a nutritional advantage if skimmed milk were used more widely in culinary practice. It greatly enhances the value of cereals, notably the "staff of life," bread. "Filled" milks enrich them also, adding wholesome fats. No one knows at present to what extent vitamine A may be required by adults, but in any event the latter, using the mixed diet of adult life, are not dependent on cream for this food factor. It is quite as reasonable to object to the sale of polished rice or patent flour; indeed, skimmed milk and its "compounds" surpass either of these foods in nutritious properties.

The opponents of "filled" milks (representing a special industry) have tried to exclude them on the plea of "menace to public health." No public health question is involved. The claim is a specious one. The House bill represents a fight between industrial "interests," and I am confident that the medical profession would not admit that any wholesome food is a menace. Life and health are not endangered; on the contrary, I have long believed that our national nutrition would be benefited if, instead of discarding the milk separated from cream in the butter industry—instead of converting a unique food into roof paint, etc.—we encouraged the greater use of the nonfat part of the milk in the kitchen in the preparation of food. The milk compounds represent a device for conserving food exceptional with respect to protein, vitamines, and particularly salts of lime which so few natural foods contain and which many persons really need. The by-products of butter production should be conserved. Has not agriculture been blinded to the importance of the nonfat parts of milk for nutrition? Are you ready to sanction economic waste of food by a new form of prohibition on the invalid plea of harmfulness to children who do not make use of the product?

He goes on to say in conclusion of a long statement that this entity or this quality called vitamine is always in skimmed milk. This is an established fact by all the great physicians and surgeons who investigated this question. Now, again listen to this:

Several years ago McCollum stated in a brief note that fat soluble A is about thirty times more soluble in fat than in water, in which case skimmed milk will contain about half as much of this vitamine as whole milk. On the other hand, Mellanby, studying experimental rickets in puppies, and Hess and Unger in their studies of the clinical rôle of the fat soluble vitamine, appear to have assumed that their experimental diets could contain considerable amounts of skimmed milk, either in fluid or solid form, and still be nearly devoid of the fat soluble vitamine. According to our experience, skimmed milk contains a very significant amount of fat soluble vitamine, probably about half as much as whole milk, as McCollum's brief statement would imply.

Our experimental evidence of the presence of significant amounts of fat soluble vitamine or "vitamine A" in skimmed milk is twofold. (1) Young rats placed at weaning upon a diet in which dried skimmed milk was the sole source of vitamines have grown steadily (though at less than the maximum rate) for three months or more, trebling their body weights and remaining free from eye disease and in good general condition. Such results in rats of this age can be obtained only on diets furnishing significant amounts of "vitamine A." (2) Rats which had been brought to the typical condition of declining body weight and characteristic eye disease due to deficiency of fat soluble vitamine in their food have been cured by the feeding of skimmed milk powder. (A third type of experiment may be mentioned which, while it would not be conclusive alone, affords interesting confirmation. Rats which have failed to grow upon a diet of white bread grew with extraordinary rapidity for some time (though not to full adult size) when the bread was supplemented by dried skimmed milk only. The latter of course supplemented the bread in several ways, but unless the skimmed milk had furnished important amounts of fat soluble vitamine such rapid and extensive growth would hardly have been possible.)

That was a statement unqualified by the highest authority in this land on this subject. And so, gentlemen, this effort is made here before this Chamber to push through a bill for the benefit of the special dairy business, and to try to push it through by the tail of a rat is absurb and ridiculous and should not be recognized by intelligent people. [Laughter and applause.]

Mr. OLIVER. Will the gentleman yield?

Mr. ASWELL. I will yield.

Mr. OLIVER. Did the gentleman ascertain whether a single State of the Union has passed a law prohibiting the sale of this product?

Mr. ASWELL. Some few of the States have.

Mr. OLIVER. Was any consideration given to limiting the bill to the importation of this product into those States where its sale was forbidden?

Mr. ASWELL. None whatever, but I will say to the gentleman from Alabama that the passage of this bill, if constitutional, would in no way affect the States because factories in any State of the Union could do an intrastate business.

Mr. OLIVER. Was any testimony submitted that this product was poisonous or injurious if used for the purposes you stated the label on the can had advised it to be used for?

Mr. ASWELL. I will say to the gentleman from Alabama gladly, that during all the hearings, lasting many days, that question was raised time after time and the evidence was overwhelming that this product is not unwholesome, not deleterious, and not injurious to health, absolutely without question. On the contrary, it was argued before that committee time after time that one of the great needs of this country is to encourage the larger use of milk and milk products. The important fact here is that the farmers of the country have not been correctly informed as to the meaning of this bill. The records show that during the last year this milk compound created a market for skimmed milk in this country of 200,000,000 pounds, ranging from 35 to 65 cents per hundred pounds, and that these 200,000,000 pounds of food heretofore have been abandoned or thrown away. Therefore these milk compounds have brought into use in this country for baking and cooking purposes 200,000,000 pounds of skimmed milk not heretofore used at all and for which there was no market at all.

Mr. BANKHEAD. That would approximate about $100,000,000 a year?

Mr. ASWELL. At least. And why should the milk-producing farmer be fooled into supporting this monstrous bill against his own business?

Mr. GERNERD. Can you give me the nutritive value of coconut oil, which is substituted for the butter fat extracted from the milk?

Mr. ASWELL. Go down to the Tropics and you will find people live largely on it.

Mr. GERNERD. I have not heard anything in the hearing that told me anything about the value of coconut oil as a substitute for fat.

Mr. ASWELL. Can you tell the value of lard and tallow from the cow, and all that sort of thing?

Mr. GERNERD. I think that is beside the query I have made, because that is not entering into the manufacture of condensed milk.

Mr. ASWELL. Gentlemen, the proposition is this: If you propose to prohibit the sale and manufacture of milk compounds, you must in honor bound proceed at once to prohibit the manufacture and sale of lard compounds and patented and mixed flours, because they have the same relation to public health. These milk compounds sell on an average of 3 cents a can cheaper than the other. And I am convinced, gentlemen of this committee, that any man at this time and in this crisis in our country's history who would shut away from the poor people of the country any kind of wholesome food must shudder with responsibility for the results that are to follow. Any man who will advance the price of food products now is treading upon dangerous ground, and that is what is proposed to be done here.

Mr. KETCHAM. Do I understand the gentleman to carry the impression to the committee that this product is sold at a cheaper price?

Mr. ASWELL. It is. The record shows the average is 3 cents a can less.

Mr. KETCHAM. I would be very glad to submit observations to the contrary.

Mr. ASWELL. Your observations will not avail anything when you have the testimony of the people who sell it.

Mr. KETCHAM. I have evidence on the other side.

Mr. ASWELL. All right; produce it. [Applause.]

[Editorial from the Detroit News, August 26, 1921.]

THOSE SKIMMED MILK BILLS.

Pending before Congress are several bills designed to prevent or discourage the production of compounds of skimmed milk and vegetable fats. These had their origin and are finding active support in the organized dairying interests, but they should be given consideration by consumers generally.

The arguments are not new. About the same line of charges have been made against oleomargarine. Brought to absolute sincerity, the dairy people would probably have to admit that their greatest solicitude is for their profits. But they lay much larger stress upon the supposed menace to public health.

This contention is not very well sustained. Dr. Lafayette B. Mendel, of Yale University, is quoted as saying: "The opponents of filled milks have tried to exclude them on the plea of menace to the public health. The claim is a specious one. The House bill represents the fight between industrial interests, and I am confident that the medical profession would not admit that any wholesome food is a menace. I have long contended that our national nutrition would be benefited if, instead of discarding the milk separated from the cream in the butter industry, we encourage the greater use of the nonfat part of the milk in the kitchen in the preparation of food."

Of course it will be admitted that most people prefer unskimmed and unfilled milk to skimmed milk reinforced with coconut oil. Most people like butter better than oleomargarine. But many people can not have everything they prefer. And Congress has no business to hinder the production of food acknowledged to be wholesome because the competition of its manufacture endangers the high prices of other foods acknowledged to be of superior quality.

[From the New Orleans States, May 4, 1922.]

VITAMINES FOUND IN ORDINARY FOOD—DOCTOR HOLT SAYS DON'T—PEOPLE HAVE BECOME UNDULY EXCITED.

(By John Goldtrom.)

WASHINGTON, May 4.—The vitamine theory is a passing fad, and all the energizing qualities the average person requires are contained in ordinary food, Dr. L. Emmet Holt, of New York, told the Congress of American Physicians and Surgeons.

Doctor Holt said that while the study of vitamines had been of value to the medical profession in determining their places in dietetics he deplored the commercialization of special foods which has followed the publicity given the subject.

"The recent stressing of the importance of vitamines in food is a fad which will pass and the medical profession should not be carried away by it," said Doctor Holt. "Before vitamines it was autointoxication, and now we have been blaming our troubles on the lack of vitamines in certain foods. Practically all the common foods contain all the vitamines the average person needs."

—

COTTONSEED OIL.

ARCTIC ICE CREAM CO.,
Detroit, Mich., April 22, 1922.

Hon. JAMES B. ASWELL,
Washington, D. C.

DEAR MR. ASWELL:

* * * * * * *

We were able to get a small quantity of hydrogenated cottonseed oil which seemed to work out very satisfactorily, but the manufacturer of this oil was only able to give us an experimental quantity. He stated * * * that it would be six or eight months before he would have the necessary equipment installed to furnish us with sufficient quantities of this product. From the limited tests which we made of the hydrogenated cottonseed oil it seemed to be entirely satisfactory and we think we will be able to use this product.

Just at the present time we are experimenting with the addition of various quantities of egg yolk to our compound milk. The object in adding the egg yolk is to supply the fat soluble vitamines which the dairy interests claim are lacking in compound milk. The egg yolk is very rich in fat soluble vitamines, considerably more so than butter fat, and it was our thought that by adding a small percentage of egg yolk to our compound milk we could provide the necessary fat soluble vitamines and offset all the claims of our opponents as to the milk not being as suitable as whole evaporated milk for the purposes of infant feeding.

It is not our intention to sell this new product for purposes of infant feeding. We will continue selling compound milk for cooking and baking purposes as we have been doing, but we will be able to meet the objections of the dairy interests by proving that our milk is fortified with the fat soluble vitamines which they claim are necessary. So if all this product is used for infant feeding it will be just as satisfactory from a nutritional standpoint as the regular whole evaporated milk. As a matter of fact, though very little evaporated milk of any kind is used for infant feeding, the sweetened condensed milk is used almost entirely for this purpose.

We have been in the business for some time, and the first use of compound milk for infant feeding we ever heard of came to light in Pittsburgh just recently. Our sales manager happened to be there on a trip and one of our broker salesmen asked him why we put the warning on the label, "Do not use in place of whole milk for infant feeding." Our sales manager replied that it is claimed by some people that compound milk is not suitable for that purpose and that in the absence of more definite information we advised against its use. The salesman then replied that in calling on the retail trade a grocer had asked him about this use of compound milk and told him he knew of a certain woman in the neighborhood who had raised her youngster on our compound milk and that he certainly was a healthy-looking youngster. Out of curiosity we investigated the case. The child's mother told us she had raised the infant on "Carolene" and that he was perfectly healthy and normal in every respect. Our sales manager, Mr. Carroll, brought back a photograph of him, and he certainly is the picture of health. Nevertheless, we do not sell our milk for purposes of infant feeding. No form of canned milk should be used for that purpose, and very little evaporated whole milk or compound milk is so used.

On the other hand, a considerable quantity of sweetened condensed milk is used, and the Borden Co., who are active in supporting this bill, have built up a considerable business from the use of their "Eagle" brand sweetened condensed milk for this purpose. We can get any number of nutritional experts who will tell us that Borden's "Eagle" brand sweetened condensed milk is a very poor infant food and that the large excess of sugar contained in it is very apt to result in digestional disorders in infants. We feel they are doing infinitely more harm to the youth of the Nation in advertising and pushing the sale of their sweetened condensed milk for infant-feeding purposes than can ever result from the use of compound milk.

We are going to have a feeding test conducted using our new compound milk, containing egg yolks and regular whole evaporated milk, and compare results. Our chemists tell us they are certain the new compound milk will prove to be just as good, if not better, as a growth-promoting food than regular evaporated milk. We are going to have these tests run by two different independent laboratories, but it will be some time before the results will be available.

* * * * * * *

Yours truly,

CAROLENE PRODUCTS CO.,
By GLEN P. COWAN.

—

CHICAGO, *April 28, 1922.*

Hon. J. B. ASWELL,
House of Representatives, Washington, D. C.

DEAR MR. ASWELL: I just received a copy of one of the latest books on the subject of vitamines. It is entitled "The Vitamines," and is by H. C. Sherman, professor of food chemistry, Columbia University, and S. L. Smith, specialist in biological and food chemistry, United States Department of Agriculture. Both of these men are considered authorities in the field of biological chemistry.

On page 182 of this book they comment on the fat soluble vitamine content of skimmed milk as follows:

"It is important to note that milk contains much more of the fat soluble vitamine than is contained in its fat globules. According to a brief statement made by McCollum, the vitamine A in a given volume of milk is about equally divided between the fat globules and the aqueous portion. This would mean that skimmed milk will contain about one-half as much vitamine A as whole milk, and dry skimmed milk will be about one-third as rich in vitamine A as is butter fat. Sherman, MacLeod, and Kramer (1920 proceedings Soc. Exptl. Biol. Med., vol. 17, p. 41), while not measuring quantitatively the relative amounts in whole and skimmed milk, have confirmed the fact that skimmed milk is an important source of vitamine A, though, of course, by no means comparable with whole milk in this respect."

This is of particular interest to me, in that the statement previously made by McCollum is corroborated by Sherman, MacLeod, and Kramer. Compound milk, of course, has all of the water soluble B and C vitamines which regular whole evaporated milk contains, and according to the above approximately one-half of the fat soluble A vitamines. It would seem, then, by the addition of a quantity of egg yolk, which is known to be very rich in fat soluble vitamine A, we can make our compound milk just as valuable from the vitamine standpoint as is regular whole evaporated milk.

* * * * * * *

We are arranging now to get the feeding experiments started, and as soon as the results are available I will send them to you.

Yours truly,

CAROLENE PRODUCTS CO.,
By GLEN P. COWAN.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ASWELL. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Louisiana asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. VOIGT. Mr. Chairman, I ask leave to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. VOIGT. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa [Mr. HAUGEN].

Mr. HAUGEN. Mr. Chairman, the object of the legislation proposed in the so-called filled milk bill, now before the House, is to suppress fraud and deception by prohibiting the manufacture and shipment of filled milk in interstate or foreign commerce, a counterfeit generally conceded to be a gross menace to public health, especially to that of infants and invalids. The manufacture and use of filled milk, the bogus milk, has resulted in undernourishment and faulty diet, and has undoubtedly caused much disease and loss of life.

According to the testimony printed in the hearings, the business of making filled milk is profitable and flourishing. According to figures furnished the Bureau of Markets, the manufacture of the substitute has increased from 30,488,267 pounds in case goods in 1917 to 84,044,000 in 1920, about 275 per cent. Bulk goods decreased from 4,540,640 pounds to 2,517,000 during this period, a net increase in the production in three years of 51,532,098 pounds. According to the statement of Mr. McKee, representing the Hebe Co., that company has about 22 plants in the States of Washington, Oregon, Idaho, California, Colorado, Wisconsin, Illinois, Michigan, Pennsylvania, and New York, scattered from the Pacific to the Atlantic coast.

The process of manufacturing this product is simple. The cream or butter fat is withdrawn from the whole milk and coconut fat is substituted in its place. This is done at a low expense. The profit to the manufacturer is largely in removing and selling the butter fat, the superior product, which is now selling at about 42 cents a pound, and importing the coconut fat, the present price of which is from 9 to 12 cents a pound, and substituting it for the butter fat removed. This, at present prices, nets a profit of 30 cents a pound on every pound substituted, or as stated by Mr. McKee in hearings on filled milk before the Committee on Agriculture:

> Mr. MCKEE. Out of the amount which it would take to make a case of milk—105 pounds. Then the coconut fat which we substitute for the butter fat costs us 12 cents. That is the present market. Then the cost of that 3.744 pounds of butter fat would be forty-four and a fraction cents—about 45 cents. So the gain to us by the extraction of the butter fat and the substitution of the coconut oil is a little over 86 cents a case. To-day the price of evaporated milk in carload lots in Chicago, where we sell it, is $5. The price of Hebe in Chicago in carload lots is $3.60. In other words, we get $1.40 more a case for evaporated milk than we get for the compound, making a difference in the selling price of the two products of $1.40 (p. 87).

The gentleman from Alabama seems to contend that the value of one product is equal to that of the other.

Mr. ASWELL. Will the gentleman yield? I did not make that proposition.

Mr. HAUGEN. The nutritive value of unadulterated milk and butter fat is well known, both in its use by human beings and animals. As to the wholesomeness of milk, as compared to that of the substitute, I refer to the statement of Dr. E. V. McCullom, of the School of Hygiene and Public Health, Johns Hopkins University, who, during the last 15 years, has confined his efforts solely to the study of nutrition problems and is generally recognized as the greatest authority on the subject. I quote from Doctor McCullom's statement before the committee:

> Now, gentlemen, during the last 15 years I have confined my efforts solely to the study of nutrition problems. Everyone who is competent to speak on this subject is in accord with every statement which I have ever made. (P. 20.)
>
> Mr. TEN EYCK. Does this product sour the same as other milk?
>
> Doctor MCCULLOM. Any milk that has been sterilized does not sour as ordinary milk sours. The souring of milk is due to the growth of the lactic acid producing organism, and that, of course, is destroyed in the process of sterilization.
>
> Mr. TEN EYCK. Then it is like condensed milk in that respect?
>
> Doctor MCCULLOM. Yes. (P. 11.)
>
> * * * * * * *
>
> Doctor MCCOLLUM. There are three substances now commonly known as vitamines which the diet must contain in order to promote satisfactory health in any animal or in any human being. This being the case, it behooves us to consider what foods contain these substances, the chemical influence of which we do not know, but the physiological effects of the lack of which in the diet we fully understand, both from human experience and from animal experimentation. It behooves us to inquire where we can secure each of these three substances in satisfactory amounts.
>
> All that, gentleman, has come down to this, that there are only three kinds of diet which ever have succeeded in the satisfactory nutrition of men or animals. One of those does not concern us very much here, but for the sake of completeness I will mention it. That is the strictly carnivorous diet, the diet where one animal eats another or where man eats an animal. Some of the American Indians were carnivorous people. The Eskimos are carnivorous people. There are a few examples elsewhere, but they form only small groups of the human family.
>
> The second type of diet which succeeds is * * * of green leafy vegetables, of which we eat very small amounts. We do not like these things; we never have learned to like them: and we are not likely to come to the unpalatable, unattractive diet which has been forced by poverty on millions of orientals.
>
> I might say that this one outstanding feature of the diet of the oriental people, the consumption of enormous amounts of leafy vegetables, such as spinach, lettuce, cauliflower, Brussels sprouts, sweet potato leaf, vines, etc., is the factor which makes those people as successful as they are. But how successful are they? Look at the Chinaman who does your laundry and see what he is. Almost without exception he is an undersized individual. He is poorly developed physically. Look at the Japanese—a small and physically inferior people. The Japanese children born in California in the last 15 years are larger in both sexes and in all ages, notably larger, than are the children of Japanese born in Japan. Why? Just because the diet of America is a better diet than the diet of Japan.
>
> The third type of diet which succeeds is the diet which in Europe, in America, and on the plains of Asia has been used from time immemorial. That is the diet consisting of cereals, tubers, legume seeds, and meats, along with liberal amounts of dairy products. The cook has in truth been the foster mother of the human race.
>
> * * * * * * *
>
> Now, gentlemen, look at what exists to-day. There are no finer people anywhere in the world than the Arabs, the Bedouins of Arabia, the tribes of the Sahara, who are all milk drinkers. The finest people in Europe are the people of Rumania, Bulgaria, and the Balkan States generally, of Scandinavia, of Switzerland, Scotland, and parts of England, those places where milk and dairy products form one of the prominent, the most prominent constituent of the diet (pp. 20 and 21).
>
> Mr. THOMPSON. You spoke awhile ago, Doctor, of the great races on the Asiatic plains that used sour milk; you used the word "sour."
>
> Doctor MCCOLLUM. Yes, sir.
>
> Mr. THOMPSON. I would like a little more light on that subject, along with the buttermilk question.
>
> Doctor MCCOLLUM. * * * If milk is boiled and some of the constituent elements or acids destroyed, then it rots and becomes unfit for use. But if they allow it to sour, it does not rot and they have the wholesome advantage of its use. There is no objection to the sour milk itself; it is wholesome.
>
> Mr. THOMPSON. How about buttermilk?
>
> Doctor MCCOLLUM. Buttermilk is wholesome, except that buttermilk is milk from which the fat has been extracted and a certain amount of sugar in it has been transformed into an acid.
>
> Mr. TEN EYCK. Does not buttermilk create a certain acid or germ in the stomach or intestine which destroys other and harmful germs, and is not that the reason why the Belgians are the longest-lived people, due to the eating of the curd, which creates this helpful germ?
>
> Doctor MCCOLLUM. Yes; there are some acids in buttermilk which are good in other ways, anyway.
>
> Mr. TEN EYCK. Let me ask you, if milk were not used at all and vegetable oils substituted, what effect would it have?
>
> Doctor MCCOLLUM. It would make the interior a skeleton, so to speak, and affect the life history and longevity of the individual and hasten the time at which senile characteristics would appear. (P. 36.)
>
> * * * * * * *
>
> Doctor MCCOLLUM. During the last two years we have been studying one of the greatest national health problems; that is, the problem of rickets in children. Rickets is faulty bone growth. I can not tell you how frequent it is. Recovery is the rule, but recovery with physical inferiority is also the rule. Recovery with more or less physical deformity is also the rule. * * * Doctor Hess, one of the famous physicians in New York, says that nearly 100 per cent of the children of New York have rickets. In Baltimore some of the famous specialists say that from 50 to 60 per cent of our children have rickets in infancy. (P. 30.)
>
> * * * * * * *
>
> Doctor MCCOLLUM. We have in this country, mostly throughout the South, a disease called pellagra. Pellagra was discovered in this country about 1908 or 1909. It had been alarmingly on the increase up to about two or three years ago, up to 1917, when we found, according to the Public Health Service representatives, that there were about 170,000 people with that disease. * * *
>
> The great research in pellagra has been done by Dr. Joseph Goldberger, of the Public Health Service. He has shown very clearly that it is a disease of the undernourished, of the poorly nourished. It is a disease which the well fed never have, and those who have it in a mild way, in the early stages, recover on a satisfactory diet, and there is no other effective treatment for it than satisfactory diet.
>
> * * * Doctor Goldberger has shown conclusively—and his papers are in the public health reports—that pellagra disappears from orphanages, from insane asylums, and from hospitals when pellagra patients are fed on the right kind of diet. In 1916 he produced pellagra experimentally in man, in the case of 5 or 6 out of 11 volunteers from the State prison of Mississippi (p. 24).
>
> * * * * * * *
>
> Mr. KINCHELOE. The point I am asking for information on is this: If it is not deleterious to the health of the individual——
>
> Doctor MCCOLLUM (interposing). It is deleterious.
>
> Mr. KINCHELOE (continuing). When it is used in baking, cooking, and in coffee, if it is not deleterious when so used, why should the people who want to use it be deprived of it?
>
> Doctor MCCOLLUM. I should say that these defects in these substitutes will not take the place of the milk, if we are to have an optimum diet; if we are to have an optimum diet, you have got to adhere to the milk. If you take something out of it——
>
> Mr. KINCHELOE. * * * I am going to agree with you that it is not good for infants.
>
> Doctor MCCOLLUM. It is not good for adults either.
>
> Mr. KINCHELOE. You said awhile ago that it was not deleterious for use in baking, cooking, and in coffee.
>
> Doctor MCCOLLUM. It is deleterious, in so far as it crowds out other things that are in the whole milk, and which these substitutes are intended to take the place of (pp. 34, 35).
>
> * * * * * * *
>
> Doctor MCCOLLUM. The thing for us to do, gentlemen, is this: We are as a Nation now using approximately half a pint of milk per day per person. * * * We should take at least a quart of milk per day, or its equivalent, and we should reduce our meat consumption to ap-

proximately 5 per cent of the total energy value of the diet; whereas we are now taking from 10 to 13 per cent, according to statistics I have gathered in numerous boys' schools and other institutions.

Mr. KINCHELOE. What would be your substitute for that meat?

Doctor MCCOLLUM. The substitute would be the quantity of milk which I have described—a quart of milk per day for every individual in the land, half as much meat as we are taking, and then the cultivation of the practice of using green salad dishes just as far as our appetites and our interest in our own physical well-being will permit us to. (P. 26.)

* * * * * * *

Doctor MCCOLLUM. To make it as clear to you as I can, let me say that this is not a matter of a single experiment; it is a correlation which we can make through an experience covering 15 years and covering about 4,000 carefully conducted feeding experiments of all degrees of length from a few weeks to the full span of life of the animals. (P. 23.)

* * * * * * *

Doctor MCCOLLUM. My parting statement, gentlemen, will be this, that there is no question but what milk is the only food for which there is no effective substitute. It is not a question of whether there is some food value in skimmed milk, as to whether we can not get along in some peculiar situation, that one might not get along if a suitable amount of eggs were included in the diet every day. It is not a question whether technically you can bring before a legislative committee of this sort a situation which might work in a satisfactory manner without this food. But this is the point, that we are educated to use milk. We are a people who for hundreds of generations have depended upon dairy products as a prominent article of our diet. We know how to use it, and we like it. We have an agricultural industry which can not remain a permanent one—there can be no permanent system of agriculture without an animal industry to go with it. Which animal industry are you going to maintain?

This is not a public health aspect in its nearer relations, but in its fundamental relations it is. How are you going to maintain a permanent system of agriculture? Phosphorus and potassium are the limiting factors in the soil of America. We have no deposits of phosphorus and no adequate deposits of calcium that will meet the agricultural needs of this country for fertilizer. If we are going to take off the farms continually the cereals and other crops, if we are going to remove the valuable food from the farm, then we sell the fertility of our farms. You will be doing then what has been done in New England, in New York, in Pennsylvania, and is now being done in the Northwestern States; you will crop your soils out until they will produce no more until certain elements are put back, because they were robbed from the soil. (Pp. 32 and 33.)

Doctor Erf, of the Ohio State University, secretary of the Ohio Dairymen's Association, and their feeding adviser, stated before the committee:

We had a number of experimental cages of white mice. As near as I can recall, those that were fed on Hebe weighed about 45 grammes and those that were fed on milk weighed 182, I think. (P. 165.)

The testimony of Doctor McCollum and Doctor Erf and the facts ascertained in the many actual experiments should satisfy all that the use of counterfeit is deleterious to the health of not only infants but adults as well.

Eleven States have enacted laws restricting the sale of filled milk—Oregon, California, Utah, Colorado, Wisconsin, Ohio, New York, New Jersey, Maryland, Florida, and Connecticut.

Mr. JOHNSON of Mississippi. I have heard what the gentleman said about this fraud that is being practiced, if there is fraud practiced, but I would like to have the gentleman tell us where he gets the constitutional authority for prohibiting the shipment of this food in interstate commerce when it has been shown by the author of the bill, the gentleman from Wisconsin [Mr. VOIGT], that it is not injurious or deleterious to human health, but merely unwholesome. Where do you get your constitutional authority for prohibiting the shipment?

Mr. HAUGEN. Let us settle the first question as to its being a fraud and injurious to human health.

Mr. JOHNSON of Mississippi. In view of the child labor law the first decision in the child labor law——

Mr. HAUGEN. When we have settled the first question we will have no trouble in settling the second—the constitutionality of the bill.

Mr. VOIGT. Will the gentleman yield to me?

Mr. JOHNSON of Mississippi. The gentleman can not deny that nux vomica will kill a mouse, but will not contend that it would necessarily kill a human being?

Mr. HAUGEN. If you will turn to the testimony before the committee, which I have quoted from Doctor McCollum, an unquestioned authority on this matter, you will find that he states that it is deleterious to the health of not only infants but adults as well. The investigation made and the facts ascertained by Doctor McCollum and Mr. Erf go to show that it is injurious to health, and if injurious to health and a fraud, Congress undoubtedly has the power to regulate its manufacture and sale in interstate commerce.

One contention is that the pure food and drugs act requires the labeling of cans, and if that law is properly enforced no further legislation is required. Labeling is important, but it is not sufficient in itself to protect the public health. The labeling of the cans in which the substitute is sold does not protect the vast number of people who are unknowingly served with it in hotels, restaurants, and boarding houses; besides, there are thousands of people in this country who can not read a label. The substitute is bought largely by the ignorant. Many do not even look at the label, much less read it, when purchasing it. Evidently much of it is labeled to conform with the pure food and drugs act, as, for instance, the Hebe, a popular brand, is labeled:

Net contents 1 lb. Avoirdupois. Hebe Reg. U. S. Pat. Off. A Compound of Evaporated Skimmed Milk and Vegetable Fat. Contains 7.8 per cent vegetable fat: 25.5 per cent total solids. The Hebe Company. Offices: Chicago–Seattle, U. S. A.

And also contains the statement—

For Cooking, Baking, Coffee. Do Not Use In Place of Milk for Infants.

To this there is no charge made as to misbranding food in interstate commerce. If not properly labeled, or if misbranded, the Department of Agriculture could, under the pure food and drugs act, suppress the practice.

In discussing the matter of properly marking the cans in which the filled milk is sold and printing a warning on the containers against the use of the substitute for certain purposes, Doctor McCollum had the following to say before the committee:

Mr. KINCHELOE. Why could they not be protected by the prescription on here saying, "Do not do that"?

Doctor MCCOLLUM. That would protect those who are capable of reading and who take the trouble to interpret the labels, but I am speaking in behalf of those tens of thousands of uneducated mothers, of foreign mothers, who are not capable of reading that label. We are protecting the public against poisonous drugs, in so far as it is possible, by laws and ethical considerations regulating the actions of pharmacists. That is the best we can do (p. 34).

Undoubtedly much of this substitute is sold as real compound milk and not as filled milk, and at the same price as the real article. The following testimony before the committee would so indicate.

Mr. ENGELS. I might also add, supplementing his remark, I was dictating a little to my stenographer yesterday afternoon. He had just gotten back from a visit to New Hampshire, and the people he visited up there were paying 17 cents a can for Carolene and thought it was a full evaporated milk, and they were amazed when they found out that it was not (p. 169).

Mr. CLAGUE. In connection with what the gentleman has stated, I wish to have it appear in the record that I inquired at a large number of stores in Washington just to find out the price of Hebe within this last two weeks, and condensed milk, and almost without exception the price was the same. I did not go to 156, but I went to quite a large number of the leading grocers in this city.

* * * * * * *

Doctor LARSON. Week before last these 156 stores sold the real product for 9 cents for the large can and the filled milk for 10 cents (p. 126).

Another matter worthy of consideration is the importance of agriculture, its future progress and prosperity, which is the very foundation of our Nation's growth and greatness. All wealth springs from Mother Earth. Our bread basket was essential in winning the war. All agree that upon the tiller of the soil depends the stability of our Nation and the happiness of our people. When we turn to the census reports we find that more than half of the American people live in rural districts. We find that more than 6,000,000 farmers and 6,000,000 farm laborers, tilling more than 6,000,000 farms, produced last year 5,600,000,000 bushels of cereals, which is about one-third of the production of cereals in the world, and about 917,000,000 bushels of wheat, which is about one-third of the wheat produced in all the world. We have 43,000,000 head of cattle, 23,300,000 milch cows, giving more than 8,500,000,000 gallons of milk. We have 71,000,000 swine, 49,000,000 sheep, and 19,500,000,000 pounds of meat, pork and mutton. Our factories and mills have for some time been running on part time, with only 35 per cent production. This has not caused much disturbance. True, there is an occasional local disturbance here and there. The failure of a crop, or only a 35 per cent production of crop, would cause not only a national calamity, but great alarm throughout the world. The fertility and productivity of the soil, the yield, and the crops are dependent upon the dairy cow. Without the dairy, the rejuvenating of the soil, we would have a shrinkage in yield and depletion of the soil, and as a result the farms would be deserted. If so, the dairy and this legislation is not only to the interest of our 6,000,000 farmers and 6,000,000 wage earners on the farm, but to all of our people. It is unnecessary to say that just laws to prohibit the manufacture and sale of the counterfeit, and an honest enforcement of such laws, are necessary.

In my opinion fraud, made possible by counterfeiting, should not be tolerated. It should be prohibited in every form. In my opinion the counterfeiting of milk is just as unjust, if not more so, as the counterfeiting of gold dollars. Counterfeiting a $10 gold piece robs the victim of $10. The counterfeiting of 100 pounds of butter fat, worth $35, by substituting for it 100 pounds of coconut fat, worth $12, and selling the compound at milk prices, not only robs the victim of $23, but if served to infants or invalids it may rob him of his child or other member of his family.

The counterfeit of milk is on a par with the counterfeiting oleo for butter. We have had much experience with oleo laws. Thirty-two States, with five-sixths of our total population, enacted laws prohibiting the sale of yellow oleomargarine. According to Secretary Gage's report, 5,492 dealers were then engaged in selling the counterfeit oleo in violation of the State laws. They sold in 1889 in those 32 States 62,825,582 pounds of yellow oleomargarine made in semblance of butter, while 1,501 dealers sold 16,860,141 pounds in the remaining States. Iowa had a drastic law prohibiting the coloring of substitutes in imitation of butter or cheese, and requiring that every package be plainly marked "Substitute for butter," and that each sale be accompanied by a verbal notice and printed statement that the article was an imitation and giving the address of the maker, and also requiring that the use of the imitation in hotels and bakeries must be made known by signs. Nevertheless, as shown by Secretary Gage's report, three dealers sold 79,927 pounds of yellow oleomargarine in the year 1889 in the State of Iowa, every pound of it sold in violation of the law and every pound thus sold displaced a pound of butter and robbed the dairy producer of his legitimate market. B. P. Norton, then dairy commissioner of Iowa, stated in a letter:

I have no doubt that we are injured $2,500,000 every year for the benefit of the oleomargarine producer and the consumers are not at all benefited.

Mr. JOHNSON of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. HAUGEN. We all believe in just laws and an honest administration of such laws. We can not be contented with anything else. Legislation not to deprive an individual, corporation, or interest of a single dollar honestly acquired, but legislation to promote progress, prosperity, and happiness to all our people, to see to it that nobody is imposed upon, that all are given adequate protection against counterfeiting, resulting in fraud and deception; yes, against any invasion on the part of unscrupulous interests in order that we may have the fullest development of every worthy and legitimate enterprise, certainly legislation to protect the health and lives of our people. [Applause.]

I ask unanimous consent to incorporate in my remarks excerpts from the hearings.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. HAUGEN. I ask unanimous consent, Mr. Chairman, to revise and extend my remarks.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. JACOWAY. Mr. Chairman, I yield five minutes to the gentleman from Louisiana [Mr. LAZARO].

The CHAIRMAN. The gentleman from Louisiana is recognized for five minutes.

Mr. KINCHELOE. Mr. Chairman, I think we ought to have more people here to hear the discussion. I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Kentucky makes the point of order that there is no quorum present. The Chair will count. [After counting.] Ninety-six Members are present—not a quorum.

Mr. KNUTSON. Mr. Chairman, I ask for tellers.

The CHAIRMAN. No quorum is present. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Andrew, Mass.	Copley	French	Kinkaid
Anthony	Coughlin	Frothingham	Kitchin
Atkeson	Crago	Gallivan	Kline, N. Y.
Barkley	Cramton	Garrett, Tenn.	Knight
Beck	Crowther	Glynn	Kraus
Blakeney	Cullen	Goodykoontz	Kreider
Bland, Ind.	Dale	Gould	Kunz
Bland, Va.	Davis, Minn.	Graham, Ill.	Langley
Boies	Dempsey	Graham, Pa.	Larson, Minn.
Brand	Dickinson	Griest	Layton
Britten	Drane	Griffin	Linthicum
Brooks, Pa.	Drewry	Hammer	McArthur
Brown, Tenn.	Driver	Hawley	McFadden
Burke	Dunbar	Himes	McKenzie
Cantrill	Dunn	Hogan	McLaughlin, Pa.
Carew	Ellis	Hudspeth	McPherson
Chandler, N. Y.	Evans	Ireland	Maloney
Chandler, Okla.	Fairchild	James	Mann
Christopherson	Favrot	Jefferis, Nebr.	Mansfield
Clark, Fla	Fenn	Johnson, S. Dak.	Michaelson
Classon	Fess	Johnson, Wash.	Mills
Cockran	Fields	Kahn, Calif.	Mondell
Cole, Iowa.	Fish	Kelley, Mich.	Montoya
Collins	Focht	Kelly, Pa.	Moore, Ill.
Connell	Fordney	Kendall	Morin
Connolly, Pa.	Foster	Kennedy	Mudd
Cooper, Ohio.	Free	Kindred	Nelson, A. P.
Nelson, J. M.	Reber	Stafford	Tyson
Newton, Minn.	Riordan	Stiness	Upshaw
Nolan	Rogers	Stoll	Vaile
O'Brien	Rosenbloom	Strong, Pa.	Vare
Ogden	Rouse	Sullivan	Walters
Oldfield	Rucker	Sweet	Wason

Patterson, N. J.	Sears	Taylor, Tenn.	Wise
Pringey	Sinnott	Tillman	Wood, Ind.
Rainey, Ala.	Smith, Idaho	Tilson	
Rainey, Ill.	Smithwick	Tinkham	
Reavis	Snyder	Treadway	

Thereupon the committee rose; and the Speaker having resumed the chair, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill (H. R. 8086) to prohibit the shipment of filled milk in interstate or foreign commerce and finding itself without a quorum, he had caused the roll to be called, whereupon 270 Members responded to their names, a quorum, and he submitted a list of absentees for entry in the Journal.

The SPEAKER. The committee will resume its session.

The CHAIRMAN. The time now stands as follows: The gentleman from Arkansas [Mr. JACOWAY] has 70 minutes remaining. The gentleman from Wisconsin [Mr. VOIGT] has 61 minutes remaining. The Chair recognizes the gentleman from Arkansas.

Mr. JACOWAY. Mr. Chairman, I yield five minutes to the gentleman from Louisiana [Mr. LAZARO].

The CHAIRMAN. The gentleman from Louisiana is recognized for five minutes.

Mr. LAZARO. Mr. Chairman, yesterday we passed the bill giving agriculture representation on the Federal Reserve Board, and soon we will pass the bill extending the time of the War Finance Corporation. Both of these bills are nonpartisan and meritorious and should become law. I wish to discuss both bills briefly, first the bill giving agriculture representation on the Federal Reserve Board.

When we take into consideration the fact that the Federal Reserve Board is not created for the purpose of making loans only, but to decide on a general policy to be pursued, it seems to me highly desirable that the various basic activities of this country should be represented on the board. It is important that there should be on this board some man who is agriculturally minded, who appreciates the effect upon agriculture and upon prices of certain large policies in administrating our great credit machinery. I think it is highly desirable that inasmuch as the law already provides for representation, industrially and commercially, we should add agriculture, which certainly is the basic and fundamental industry of this country. Surely all must agree that in considering, financially, industrially, and commercially, the industries of the country, agriculture also should be included.

The bill extending the time of the War Finance Corporation merely extends the operation of credit facilities we are already familiar with. I was one of those who helped to revive the War Finance Corporation, and I do not know of any other measure that did more to help agriculture and business throughout the United States than this measure. The people are just beginning to learn its benefits and are asking that it be continued. It is realized now more than ever that it is absolutely necessary to have better credit facilities in order to have ample production and intelligent marketing. We are not asking for special benefits for special sections or classes, but fair and equal treatment for all the people engaged in all the industries of the country. When all the industries are represented in the operations of our laws there will be less contempt for the law and more prosperity and happiness among our people.

Agriculture has been brought to a point where its future is imperiled, where it is bound to go backward unless real relief is to come soon. The need of a constructive national program looking to the rebuilding of agriculture is absolutely necessary. That fact is appreciated by business men and laborers everywhere. It is plain to all now that there must be production and prosperity on the farms if we are to have employment and good wages in the cities. What contributes to the prosperity of agriculture unquestionably benefits all industries. It is not class legislation to demand that agriculture has as good credit facilities as any other business. It is legislation in the interest of all classes. It seems to me that it is high time for us to understand that if we are to revive agriculture, business, employment, and prosperity in this country we must adopt a national constructive agricultural program.

First. This program must include representation of agriculture in the Government bureaus that have to decide upon

policies governing loans. There must be longer terms and a lower rate of interest.

Second. The perfecting of our laws facilitating cooperative marketing.

Third. Laws punishing severely illegitimate speculation in the exchanges of the country. The larger part of the living cost to-day is added to the price of food and clothes after they leave the farmers' door. This the consumers in the big centers should understand, and when they do I am sure they will cooperate and support us in demanding that our system of distribution be protected from these gamblers.

Fourth. The extension of better warehousing facilities, where our products can be stored without danger of being damaged by the elements, graded intelligently, and negotiable certificates can be issued permitting the owners to use them in their daily business transactions.

Fifth. Perfecting of the farm loan system, with the view of encouraging home ownership. This is not only good business but it is vital to the preservation of our country and its institutions against the spread of radicalism.

Sixth. The recognition of the tariff as a nonpolitical and economic problem, with the view of giving equal protection to our agricultural products that is given to our manufactured products, not with the idea of enriching a few at the expense of the many, but reasonable protection to maintain our American standard of wages and living.

Seventh. Better and cheaper transportation facilities, which will come to us only when we adopt a comprehensive system of transportation, coordinating the use of good roads, railroads, and waterways.

Eighth. Business and economy in local, State, and National government, with the view of reducing the burden of taxation. We are going through a period of reconstruction and unrest, and I believe our people are more interested in the immediate and proper solution of these big problems than they are in politics. I believe, too, that they expect us to work here as Americans rather than partisans in passing the laws that are necessary to give the country relief. [Applause.]

I ask unanimous consent, Mr. Chairman, to revise and extend my remarks.

The CHAIRMAN. The gentleman from Louisiana asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. VOIGT. Mr. Chairman, I yield five minutes to the gentleman from Iowa [Mr. TOWNER].

The CHAIRMAN. The gentleman from Iowa is recognized for five minutes.

Mr. TOWNER. Mr. Chairman, I shall support this bill without any hesitation. Its purpose is to prevent the shipment in interstate commerce of an article which is at once fraudulent and injurious. There is not any question in my mind as to the constitutionality of this act. The evidence before the committee and the report of the committee show clearly that while it is labeled correctly, it is sold as a fraudulent product; that it is represented to be milk; that it is sold as milk when, as a matter of fact, it is not milk.

Perhaps the most valuable element in milk is the butter fat, which in filled milk has been entirely removed. The most valuable constituent of butter fat is that mysterious and hitherto almost unknown substance that we now call "vitamine," and without which it is virtually impossible to sustain human life. The substitute which is used for butter fat is entirely without vitamine, and therefore that which is of most value in the milk, which is admitted to be the most valuable of all human food, has been abstracted and taken away from this product.

The evidence before the committee shows quite clearly that this product is sold in the neighborhoods where in many cases the people are either so ignorant or so unacquainted with the English language that they can not know and do not understand the labels that are placed upon it, and in that way it is in fact a fraud that is perpetrated upon them.

The evidence also shows that it is represented in many cases by the dealers in milk to be really evaporated or condensed milk, which it is not.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. TOWNER. Yes.

Mr. WALSH. This measure, of course, will not prevent these ignorant people from purchasing it if they live in the States which manufacture it?

Mr. TOWNER. The gentleman is correct.

Mr. WALSH. Would the gentleman contend that we would have jurisdiction to prohibit the shipment of skimmed milk in interstate commerce because it did not contain the butter fat?

Mr. TOWNER. I do not know whether we would or not. That is not the proposition, and we have not the evidence as to that that we have in this case. The evidence in this case clearly establishes the fact that there is a fraud being perpetrated in the sale of this milk in interstate commerce; and if it is a fraud, then it is constitutional to prohibit its transportation in interstate commerce. If it is a misbranded article, it is perfectly within the jurisdiction of Congress to prevent its being sold in any form. The pure food law has been sustained upon almost every possible ground that could be imagined. And the Supreme Court has always held that if the article sold was deleterious, that if it was in any way a fraudulent article, it could be prohibited from interstate commerce; and in this case the testimony goes so far as to show that so eminent an authority as one of the physicians of Johns Hopkins University says that an infant fed on this milk would certainly have rickets within a short time. That is the condition under which this bill is presented.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. TOWNER. Has the gentleman any further time that he can grant me?

Mr. VOIGT. I yield the gentleman two minutes more.

Mr. TOWNER. Now, why should not this legislation be passed? If it is constitutional under the authorities, why should we not protect the lives of the children of the United States? If we can be of any assistance within our lawfully constituted powers in so vitally important a matter, ought we not to do it? If a fraud is being perpetrated which is injurious to the health of the babies and the children of the United States, ought we not to do our part to try to prevent it?

Mr. WALSH. I dislike to interrupt the gentleman when he has such a short time, but why does not this come under the pure food law as it is now on the books? If this be a fraud and deleterious, why does it not come under the pure food law?

Mr. TOWNER. Simply because under the provisions of the pure food law, unless it is misbranded, even when it is an adulteration of an article, if it is not misbranded it may be sold. Of course, the difference lies purely in the fact that this is not, in fact, misbranded. It is given some kind of an artificial name, and the wrong and the injury comes because it is, in fact, in the form of milk, and is sold in cans of exactly the same size, and those who purchase it are made to believe that it is, in fact, condensed milk, so that in reality it is a fraud perpetrated upon the people who above all others in the world ought not to be injured. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. VOIGT. Mr. Chairman, I yield to the gentleman from Minnesota [Mr. KNUTSON].

Mr. KNUTSON. Mr. Chairman, the so-called Voigt filled-milk bill is one of the most meritorious measures to come before this House in a long time. The bill seeks to put a stop to a flagrant fraud that has been perpetrated upon the babies of the Nation for a number of years, and its passage has been urged by women's clubs and civic bodies as well as farmers' organizations from every section of our land.

Just what does this bill propose? Simply this: To prevent the introduction of filled milk in interstate commerce, and I am amazed that there should be those in this body who would prevent its enactment on constitutional grounds. Mr. Chairman, I am not a lawyer, therefore I will not attempt to discuss this measure from a legal angle. I do hold, however, that Congress has the right to enact this legislation, for it is clearly in the interest of public welfare. Years ago Congress legislated on oleomargarine and it was upheld by the courts. This legislation is on all fours with the oleomargarine legislation, and if it is carried into the courts it will surely be upheld.

There is absolutely nothing that can be said for filled milk. It is an indefensible fraud that has been perpetrated on unsophisticated foreigners for the past six or seven years. The manufacturers extract from the whole milk all the butter fat and vitamines, which is replaced with an equal amount of refined coconut oil. The butter fat is worth about 45 cents per pound, while the substitute is only worth 7 or 8 cents. The adulterated product looks like the genuine article, but it is absolutely without value as a food, and the poor babies to whom it is fed become undernourished and emaciated. It stunts the poor little things in body and soul, and yet there are those who plead for the manufacturers of these damnable articles of fraud and would have us believe they are honest, upright business men.

Dr. E. V. McCollum, of Johns Hopkins University, recently conducted a series of very interesting experiments on the effect of feeding filled milk to rats. These experiments were made at the request of the Committee on Agriculture of the House. I herewith append the result of these investigations:

FACTS ABOUT "FILLED MILK."

[Issued by the National Milk Producers' Federation, Washington, D. C., May, 1922.]

M'COLLUM'S EXPERIMENTS ANSWER CONGRESSMAN'S DOUBTS.

* * * * * * *

We are giving here, for the first time, the official result of the experiments, so that you may know what value filled milk compounds have in promoting growth.

The experiment conducted by Doctor McCollum was among the 4,500 or more which he has conducted in nutrition work.

In these investigations the filled milk compound and the whole evaporated milk used were purchased in cans at retail, in the open market, and represented the product used in family consumption. Both classes of the product were made by the same manufacturing concern.

Several groups of rats were used in making the experiments. They were alike in breeding, age, health, and general condition. The rats were about 40 days old at the beginning of the experiments.

Doctor McCollum divided his rats into different groups according to the ration fed. The filled-milk group, the evaporated whole-milk group, and the coconut-oil group. The filled-milk group and the evaporated-milk groups were subdivided into two classes, according to the amount of filled milk and evaporated milk used in the ration. * * *

The rat No. 1 was of the evaporated milk group, which was fed the following ration: Rolled oats, 60 per cent; salt, 1 per cent; lime, 1½ per cent; dextrin, 15 per cent; together with 22.5 per cent of evaporated whole milk.

He grew steadily. His hair is slick with the natural gloss. His eyes are bright, skin healthy and tough. This group carried on under this diet for 163 days and at the close of the investigation was used for demonstrations in other experimental fields.

The rats of the filled-milk group were divided into two classes. Seven rats of one of these subgroups were fed a ration of rolled oats, 60 per cent; salt, 1 per cent; lime 1½ per cent; dextrin, 15 per cent; and filled milk, 22.5 per cent. These rats early developed symptoms of xerophthalmia, the fatal eye disease. They were not over half the size of the rats of the evaporated whole-milk group. * * * The bodies are emaciated. The hair coarse, thin, and dry. Bodily these rats were deformed and the ribs knobby. Their eyes had a fishy, glazed appearance with deep fissures in the lids. In 48 days four of the rats of this group died. At the end of 55 days the remaining three of the group had also died. * * *

The second class of the filled-milk group of rats were fed a ration of rolled oats, 60 per cent; salt, 1 per cent; lime, 1½ per cent; dextrin, 15 per cent; and 90 cubic centimeters of filled milk. Four rats were in this group. These rats all developed xerophthalmia, the fatal eye disease. They were also badly emaciated and exhibited the same general characteristics as the rats of the other filled-milk group. At the end of 119 days all had died.

The coconut-oil group of rats were fed the same basic ration as the rats of the other groups. Fifteen per cent of coconut oil, however, replaced the filled milk or whole evaporated milk used in the ration of the other groups. Six rats were in this group and 39 days after the beginning of the feeding all were dead. All developed severe cases of xerophthalmia. * * *

Numerous cases of xerophthalmia in children have been cited, particularly where there has been a lack of whole milk, butter, or other vitamine-carrying foods in the diet.

Aside from the lack of vitamine content filled-milk compounds are fraudulently sold to an extensive degree as milk.

In very many cases unscrupulous dealers recommend filled milk as equal to or better than whole evaporated milk.

These compounds have also been recommended by some retail dealers as satisfactory food for babies. They are generally sold at the same and even higher prices than whole evaporated milk.

—

TEN REASONS WHY CONGRESS SHOULD PASS THE VOIGT BILL.

[By Charles W. Holman, executive secretary, National Milk Producers Federation.]

ELEVEN STATES THAT BAR FILLED MILK WITHIN THEIR BORDERS.

Ohio, New York, Wisconsin, New Jersey, California, Utah, Colorado, Maryland, Oregon, Florida, Connecticut.

There are at least 10 major reasons why Congress should pass the Voigt bill, H. R. 8086, prohibiting the movement in interstate and foreign commerce of so-called filled milk.

Here they are:

PUBLIC WELFARE.

1. Labeling methods enable fraudulent practices to thrive.

2. Many merchants in poorer communities recommend imitation milk for the use of children and babies.

3. Many merchants advertise imitation milk in the newspapers in plain language for genuine milk.

4. While the product is inferior as a food, in most cases we have found merchants selling imitation milk at the same prices and even higher than they obtained for genuine evaporated milk, notwithstanding the cheaper price per case at which they obtained the imitation product.

5. The present pure food and drugs act is not broad enough to cover the case. The Voigt bill supplements it. Its enforcement will be intrusted to the Department of Justice.

6. The Voigt bill is a children's bill; it bans the movement in interstate and foreign commerce of a compound that is vitamineless as to its fat content, but which is designed to take the place of a product rich in all the vitamines.

7. Trading concerns have attempted to sell imitation milk to American organizations engaged in feeding children and mothers in Europe. Both the American Friends Service Committee and the American Relief Administration have been approached and both organizations turned down the proposals.

8. Dr. E. V. McCollum, of Johns Hopkins University, in his public statements points out that America is already suffering from defective nutrition, due in part to the commercialization of certain foods and the degerminating of cereals to enable them to keep longer. He also points out the growing use of vegetable fats—all of which are vitamineless—in the diet. He reasons from this that the substitution of imitation milk in the diet of either the child or the adult will have quite an effect in furthering the process of physical degeneration now going on.

ECONOMIC.

9. Despite regulatory, restrictive, and prohibitory laws in 11 States—Colorado, Oregon, California, Utah, Wisconsin, Ohio, New York, New Jersey, Maryland, Florida, and Connecticut—the filled-milk traffic has been steadily gaining.

Production of filled milk, in both case and bulk goods, was:

	Pounds.
1919	64,995,221
1920	86,561,000
1921	64,893,731

In this same comparative period the production of sweetened condensed and unsweetened evaporated milk, both case and bulk goods, was:

	Pounds.
1919	2,030,957,648
1920	1,578,015,000
1921	1,461,140,312

This shows a constant production for "oiled" milk for 1921 as compared with 1919, and a steady reduction in volume of genuine canned milk amounting to over half a billion pounds, comparing 1921 with 1919.

10. Canning whole milk is one of the best ways of helping to find a market for the national whole-milk surplus. It enables the farmer or the manufacturer to seek wider markets and to effect gradual marketing. This medium is now seriously threatened by the advent of these compounds of skimmed milk and coconut oil. The manufacturer is enabled to purchase the coconut oil at 8 to 12 cents per pound—a price ranging from one-fifth to one-fourth the price of butter fat. Such a wide difference in production costs can not be met by milk producers. They are constantly faced with increasing expenses due to the increasing desire of both the producing and the consuming public for more sanitary milk products.

Finally, "oiled" milk does not offer farmers any additional market for their skimmed milk not already afforded by evaporated milk, but it does take away a market for their butter fats.

Mr. Chairman, filled milk has the same deadly effect on babies, and it is in behalf of the little ones that I plead. Let us pass this legislation without delay and thereby do much to safeguard the health and lives of those who will be our citizens of to-morrow.

Mr. TINCHER. Mr. Chairman, I make the point of order there is no quorum present.

The CHAIRMAN. The gentleman from Kansas makes the point of order that there is no quorum present. The Chair will count. [After counting.] Eighty-six Members are present; not a quorum.

Mr. VOIGT. Mr. Chairman, I move that the committee do now rise, and I request that that motion be voted down.

The question was taken, and the Chair announced the noes appeared to have it.

Mr. VOIGT. Mr. Chairman, I ask for tellers.

Tellers were ordered.

The committee again divided, and the tellers [Mr. VOIGT and Mr. JACOWAY] announced that there were—ayes 3, noes 89.

The CHAIRMAN. The committee declines to rise; a quorum is not present, and the Clerk will call the roll.

The roll was called, and the following Members failed to answer to their names:

Anthony	Dunn	Knight	Rodenberg
Atkeson	Ellis	Kraus	Rogers
Bankhead	Evans	Kunz	Rosenbloom
Barkley	Fenn	Langley	Rouse
Beck	Fess	Larsen, Ga.	Ryan
Bell	Fields	Larson, Minn.	Sanders, Ind.
Blakeney	Focht	Layton	Sanders, N. Y.
Bland, Ind.	Fordney	Linthicum	Sears
Bland, Va.	Frear	Little	Smithwick
Boies	Free	McArthur	Snell
Brand	French	McFadden	Snyder
Britten	Frothingham	McLaughlin, Pa.	Sproul
Brooks, Pa.	Gallivan	McPherson	Stafford
Campbell, Pa.	Garrett, Tenn.	Madden	Stedman
Cantrill	Garrett, Tex.	Maloney	Stiness
Chandler, N. Y.	Goodykoontz	Mann	Stoll
Chandler, Okla.	Gould	Mansfield	Strong, Pa.
Christopherson	Graham, Ill.	Michaelson	Sullivan
Clark, Fla.	Graham, Pa.	Mills	Sumners, Tex.
Classon	Griest	Montague	Sweet
Cockran	Griffin	Moore, Ill.	Tague
Cole, Iowa	Himes	Morin	Taylor, Ark.
Cole, Ohio	Hudspeth	Mudd	Taylor, Colo.
Collins	Hukriede	Nelson, A. P.	Taylor, Tenn.
Connell	Humphreys	Nelson, J. M.	Tilson
Connolly, Pa.	Ireland	Nolan	Tinkham
Cooper, Ohio	James	O'Brien	Treadway
Copley	Jefferis, Nebr.	Oldfield	Tyson
Coughlin	Johnson, S. Dak.	Olpp	Upshaw
Crago	Johnson, Wash.	Paige	Vaile
Cramton	Jones, Pa.	Park, Ga.	Vare
Crowther	Kahn	Parker, N. Y.	Ward, N. Y.

Dickinson	Kinkaid	Reavis	Woodyard
Drane	Kitchin	Reber	Wright
Driver	Kleczka	Riddick	Zihlman
Dunbar	Kline, N. Y.	Riordan	

Thereupon the committee rose; and the Speaker having resumed the chair, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill H. R. 8086, finding itself without a quorum, he had directed the roll to be called, and that 268 Members, a quorum, had answered to their

names, and that he presented the list of absentees to be entered in the Journal and RECORD.

The committee resumed its session.

Mr. WALSH. Mr. Chairman, the pending vote is that the committee do now rise, is it not?

The CHAIRMAN. That vote was defeated.

Mr. WALSH. But there was no quorum developed.

The CHAIRMAN. A quorum has now been developed. There is a quorum present.

Mr. WALSH. The vote was pending at the time, but the absence of a quorum was developed. We took the vote by tellers, and it appeared on that vote that there was no quorum present. Is not that now the pending question before the committee?

The CHAIRMAN. The question is on the motion that the committee do now rise.

The question was taken, and the motion was rejected.

Mr. VOIGT. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. CLARKE]. [Applause.]

Mr. CLARKE of New York. Mr. Chairman, Josh Billings once remarked that he had seen many things on milk, but the best thing was cream. [Laughter.]

Members of Congress, when they go to the House restaurant and order mush and milk or bread and milk for their luncheon, as many of us do, have their milk served in bottles, and invariably you will see the Congressman inspecting the bottle to see how rich the milk is in the cream that rises to the top.

If you take this cream off or separate it from the milk and extract an additional amount with the separator, you get so-called skim milk or thin milk. If you take this skim milk or thin milk and partially evaporate it, then substitute for the cream taken away coconut and vegetable oils, you have "filled milk."

This bill (H. R. 8086) seeks to prohibit the shipment of so-called "filled milk" in interstate and foreign commerce.

The facts in the case are: There has grown up in this country a business of very considerable proportions, estimated to consume about 200,000,000 pounds of skimmed milk per annum. The product of this business is called "filled milk" and bears various trade names, such as "Hebe," "Enzo," "Nutro," "Nyko," and so forth. Filled milk is an evaporated skimmed milk, and may be properly defined as "any milk, cream, or skimmed milk, whether or not condensed, evaporated, concentrated, powdered, dried, or desiccated, to which has been added or which has been blended or compounded with any fat, or oil other than fat, so that the resulting product is in imitation or semblance of milk." Through the skillful wording of the labels and the more skillful manipulating of distributors, this filled-milk product is palmed off on the unsuspecting public as a whole-milk product. In simpler and less technical terms "filled milk" is evaporated milk from which the cream has been removed and, for the cream taken away, there has been substituted from 6 to 8 per cent of coconut or other vegetable oil. In the process of manufacturing this "filled" milk there has been taken out of that original, healthy, whole-milk product not only the cream but a large proportion of the essential, indispensable, nourishing element, the fat soluble or vitamines that experts in dietetics or nutrition include as an invaluable element of milk. Professor Mendel, of Yale, and Professor McCollum, of Johns Hopkins, the two leading authorities, agree that these vitamines are essential for a well-rounded ration for humankind, especially in the feeding of infants and small children.

"Filled" milk, when put to a laboratory test, shows that mice and rats that have been fed on it waste away, become scrawny, mangy, undernourished, and susceptible to disease, while others fed on the whole milk—under exactly similar conditions—are strong, vigorous, healthy, and almost immune from disease. It naturally follows that humankind, especially children and infants, fed on this milk do not obtain these healthy vitamines and are undernourished and often become subject to and susceptible of disease, especially rickets. This "filled" milk product finds its largest market in the industrial centers where foreign born live, and its victims are children.

On the economic side I point to the lesson of experience. Dairy centers in the Middle West, with great effort and at a heavy expense, had developed a large foreign market for whole-milk cheese. This market was promising, not alone in the large demand for this wholesome, healthy product, but in the prospect for enlarging the markets through the years, when along come Avarice and Cunning in the guise of "filled" cheese manufacturers, filled with an inordinate greed for profits, taking advantage of the situation developed by these pioneer dairy interests and they began underselling with their "filled-milk" cheese, so that with this semblance of the real thing incalculable injury was done the dairy farmers, and this foreign market so laboriously built up was destroyed. The present bill proposes that history shall not repeat itself with this fundamental "filled" milk product, and further proposes to prevent the sacrifice of infants on the altar of greed.

Arguments were presented at the hearings that these "filled" milk products were properly branded and came within the scope of the so-called "Food and drugs act of June 30, 1906." To show the flimsiness of their arguments one has but to turn to the records of the hearings, where it was admitted by the manufacturers themselves that—although they still keep up the rest of the imitation—they have changed the wording of the labels, not once or twice but many times, to meet the demands of public opinion and to try and keep within the law.

These "filled-milk" manufacturers claim it is not within the power of Congress to prevent the interstate transportation of their product. I now invite your careful attention to the "Pure food law," and especially to section 7 of that act that defines the adulteration of food, as follows:

> That for the purpose of this act an article shall be deemed adulterated * * * In the case of food:
>
> First. If any substance has been mixed or packed with it so as to reduce or lower or injuriously affect its quality, strength, or purity.
>
> Second. If any substance has been substituted wholly or in part for the article.
>
> Third. If any valuable constituent of the article has been wholly or in part abstracted, or if the product be below that standard or quality, strength, or purity represented to the purchaser or consumer.

I wish to call your attention to these words in the first paragraph of that act:

> An article is deemed adulterated (in the case of food) when any substance has been mixed or packed with it so as to reduce or lower or injuriously affect its quality, strength, or purity.

Can anyone successfully contend that the natural, whole milk, from which has been taken its cream, or 50 per cent of the fat, soluble vitamine, is not such an article as to come squarely within the wording and intent of the first paragraph of section 7?

But let us proceed a step further, and in the second paragraph of that same section 7 is this wording:

> If any substance has been substituted, wholly or in part for the article.

And surely in the "filled milk" there has been substituted for the cream vegetable oils.

In the third paragraph of section 7 we find the absolute conviction of these misbranders and "filled-milk" manufacturers, where the language is again clear and beyond peradventure, for it says that an article of food is adulterated "if any valuable constituent of the article has been wholly or in part abstracted," and it is a certainty that from the whole milk the valuable constituent cream has been abstracted. So that this "filled milk" comes not within one paragraph of section 7 but within each of the three paragraphs. The whole conception, intent, and wording of this section is founded upon the theory that the law was not only to guard the public health but to prevent fraud upon the public.

Let us take one of these labels on their cans and see what it says. "This product contains 7.8 per cent vegetable fat, 25.5 per cent total solids." What does this language mean to you, Mr. Congressman? If you find difficulty in comprehending it, how about the poor and illiterate mother? But Mr. Hayward, a friendly witness for the manufacturers of this "filled milk," explains this to mean that 7.8 per cent of the 25 per cent is milk solids and fats and that 7.8 per cent of the 25 per cent, or 25½ per cent, is vegetable fat and the balance 50 per cent water. This is the product these "filled milk" producers want to send out in disguise—an impoverished milk compound—to unfairly compete with the wholesome, healthy, life-sustaining vitamines, the pure, wholesome, natural product of the cow.

Now, let us briefly examine the question of the constitutionality of the so-called Voigt bill now before us.

First. I contend that Congress may prohibit the transportation in interstate and foreign commerce of any article the use of which may be regarded as injurious to the public welfare, and maintain that this "filled milk" is such an article.

In the leading case of Gibbons *v.* Ogden (9 Wheat. U. S.) Chief Justice Marshall sets forth the intent of that power—i. e., to prohibit the transportation in interstate and foreign commerce—as follows:

> It is the power to regulate; that is, to prescribe the rule by which commerce is to be governed. This power, like all others vested in Congress, is complete in itself, may be exercised to its utmost extent, and acknowledges no limitations other than are prescribed in the Constitution. These are expressed in plain terms and do not affect the questions which arise in this case * * * or which have been discussed at the bar. If, as has always been understood, the sovereignty of Congress, though limited to specified objects, is plenary as to those objects, the power over commerce with foreign nations and among the several States is vested in Congress absolutely as it would be in a single

government having in its constitution the same restrictions on the exercise of the power as are found in the Constitution of the United States. * * *

And in the celebrated Lottery cases (188 U. S. 321) it has established the principle that the power of Congress to regulate interstate commerce also includes the power to prohibit the interstate carriage of any article deemed by Congress to be injurious in its nature or in its use to the public health, morals, or welfare, despite the fact that the article is not inherently dangerous. I could continue to cite cases in point, but there are others to follow me whose ability is greater, and I shall not trespass upon your time and patience, leaving the cases cited as conclusive on that proposition.

In laying down the second fundamental proposition, that is—

that Congress, having the power to prohibit the interstate transportation of adulterated and harmful foods, Congress must necessarily have the power to determine what articles are to be considered adulterated or harmful as a means of making the prohibition effective.

This power is an incidental power, but it was clearly recognized by the Supreme Court in the leading case of McDermott v. Wisconsin (228 U. S. 115, 129) as follows:

* * * The article of food or drugs, the shipment or delivery for shipment in interstate commerce of which is prohibited and punished, is such as is adulterated or misbranded within the meaning of the act. What it is to adulterate or misbrand foods or drugs within the meaning of the act requires a consideration of its other provisions, wherein such adulterations or misbranding is defined.

The third proposition I submit to you for consideration is this:

Congress has the power to prohibit interstate shipments of "filled milk" and the power to establish the standard of purity and strength of foods, it being clearly established that Congress has the power to set up standards so as to secure a minimum of the nutritive elements in whatever the product may be and prevent fraud on the general public.

On the face of the proposition these manufacturers of "filled milk" come before you with their product packed in cans similar to those of the long-established whole-milk manufacturers, bearing labels intended to resemble and copies almost of the very labels of the whole-milk containers, the very language of which is intended to deceive the poor, the ignorant, and the careless reader; so I claim, with the above statement of the facts and the decisions of our highest court, they do not come into court with clean hands, and it is up to this Congress, having set up the standards under the pure food and drugs act, to see to it that those standards are lived up to by all and make impossible the interstate shipments of this product.

Having viewed the technical situation and met the legal objections that may be raised, I now wish to present the picture of the dairy farmer in its general aspects. The exploited age of agriculture is nearly over; cheap farms and homesteads are no longer to be had for the asking. Our original rich soil has become impoverished, and the great majority of the farmers would not have farms to-day if they had not received them from their ancestors. If they had to depend upon their earnings, with agricultural conditions as they are to-day, they would be unable to accumulate the price to buy a farm. It can be said, to the everlasting credit of this Congress, that there is no legislative body in the nations of the world that has recognized more clearly that nearly all of the great problems in economics, in their direct or indirect relationship, rest upon agriculture. It can be further truthfully said, that no Congress stands out more conspicuously in its record of giving an attentive ear, a sympathetic attention to, and enacting constructive legislation that establishes on a more equitable basis the agricultural problems left in the aftermath of the war.

The intensive study of these problems given by the Joint Commission of Agricultural Inquiry of the Senate and the House, the great agricultural conference, and the almost continuous hearings, in my own Agricultural Committee, have been reflected in constructive legislation that has indeed been helpful, not alone in its direct relation to this particular subject but in a wider way to agriculture in general.

This bill (Voigt bill) has for its direct object the prevention of fraud upon the public, the elimination of dishonest competition, the prevention of tricky practices that fall down when put to the test of morals, whether it be the manufacturer or the distributor who takes from his shelf, packed in cans made to imitate the real product, this "filled-milk" product, with the recommendation "just as good," that he sells for the same uses as the genuine, whole-milk product, and it costs the distributor at least 3 cents per can less. The whole object of this bill is shutting the door to these practices that do not meet the standard of common honesty in man's dealings with his fellow man, and to prevent the helpless infant, the poor, ignorant, or illiterate mother from being victimized by avarice and cunning. [Applause.]

Let us look on the humanitarian side for a moment. Unbiased investigators have gone into the poor and thickly settled sections of our industrial centers and have visited, through their visiting nurses, the homes of laborers, and they have found everywhere this product injurious and dangerous for human consumption, the larger part of the nutritive value extracted, and many mothers feeding their helpless children something which they suppose contains nutritive value and vitamines.

The dairy farmers, of whom I am one, come to you to-day, not pleading for a special privilege, not wanting to dig into the Treasury of the United States, not afraid to meet open, fair competitive business, but claiming that as part and parcel of the great fundamental industry of the Nation—yes, as the real backbone of that Nation—they are entitled to be protected from trickery and artifice and fraud in the marketing of their products, whether it be at home or abroad. [Applause.]

No limit marks our hours of labor; the sunrise of morning and the sunset of evening finds us "on the job," and when the day's work is done we plan for the morrow.

There is no class of citizens to-day that enters into the hazards and gambles in the production of the necessities of life that we farmers do; we gamble with Nature in her whims and moods, whether it be the rainfall or the drought; whether it be in the snowstorm that blankets the earth and protects the seed, or in the crust that forms upon the snow and prevents the "cattle on a thousand hills" from getting down to the grass roots, so that starvation and ruination often result; whether it be in the sunshine that causes the seed to sprout and grow or sometimes scorches the earth and destroys the growing crop, or causes the bud and blossom to come forth that bring joy and inspiration to those that "in love of nature hold commune with her visible forms"; whether it be the birds that fly that are sometimes friend and sometimes enemy, or the beetles that crawl; whether it be in those small animals that burrow in the earth and destroy or those that in that same sphere destroy the enemy, it is a continuous struggle, not alone against the seen but as well against the unseen. [Applause.]

To-day our great Agricultural Department and its splendid, sympathetic, well-informed Secretary Wallace are urging the farmers of the North, East, South, and West to rotate their crops, and as the incident of that urging is the encouragement to an enlargement of dairy farming. We must go, therefore, into the markets of the world with our surplus products, and we ask you to assure our dairy farmers by this act that clean, wholesome, healthy, nutritive whole milk shall have no fraudulent competitors to destroy our markets once established. [Applause.]

I am from one of the greatest dairy districts in the world, the scene of many of Cooper's "Leather Stocking Tales," of Uncas and Chingachook, the playground of my youth, my choice, after roaming the country over, for my last rendezvous and final resting place. The Catskills, the land of narrow valleys and precipitous hills, a land largely peopled by the Scotch and Scotch-Irish, who overcame not alone the Indian but Nature herself. On those wondrous hills and in our enchanting vales are those who toiled with my grandparents, my parents, and myself. Boyhood friends abound, and for them as for myself, I plead. And as I plead for them, I plead for the dairy farmers of the great State of New York and the dairy farmers of the North, East, South, and West, for the cause is a common cause, and we look to Congress, certain that it will not fail us, nor that multitude of unborn who shall enter into the better heritage it becomes our paramount duty to pass on. [Loud applause.]

Mr. TUCKER. Mr. Chairman, I never had a clearer idea of my duty than I have of my duty on this bill. To my mind there is no doubt of the unconstitutionality of the proposed bill.

This bill seeks to exclude from interstate commerce "Hebe," "Carolene," and other compounds of skimmed milk and cocoanut oil and other vegetable oils because neither babies nor rats thrive thereon, as stated by Dr. E. V. McCollum, of Johns Hopkins University. (See hearings before the Committee on Agriculture, House of Representatives, Sixty-seventh Congress, first session, on H. R. 6215, by Mr. VOIGT, p. 19.)

But the hearings also show beyond all question that "Hebe" is a wholesome article, not injurious to health, palatable, and largely used for cooking purposes in pastry, custards, gravies, and so forth, though not as nutritious as but cheaper than skimmed milk. There is no doubt or question on either side that this compound is properly labeled, stating that it is composed of cocoanut oil and skimmed milk, and the cans also contain a label "Do not use in place of milk for infants." (Hear-

ings, p. 34; also p. 128, Cowan's evidence.) Mr. VOIGT himself, the patron of this bill, on page 15 of the hearings, uses this language:

I will say to you gentlemen that there is nothing poisonous or deleterious in this milk compound.

Prof. La Fayette B. Mendel, of Yale University, an expert of high repute on these subjects, in a letter addressed to Hon. JOHN D. CLARKE, a member of the Agricultural Committee of the House of Representatives, shows most clearly that this product is wholesome and valuable, and while not a food on which to raise babies, is harmless if taken by babies. He says:

I mention this because the opponents have spread the impressions among gullible persons that the use of a can of milk compound is a positive menace to the infant which consumes it. Skimmed milk is not a rank poison. It is merely not a complete food for an infant; neither is barley water nor "prepared foods." (See hearings, p. 53.)

See also Dr. J. P. Crozer Griffith's letter (p. 58 of the hearings); also statement of Harry Hayward, of Philadelphia, Pa. (hearings, p. 57); and others maintaining the same view.

That the label is adequate and sufficient is shown by the statement of Mr. Paul R. McKee (hearings, p. 70), where he states that the Bureau of Chemistry of the Department of Agriculture, with the food-control officials of a number of States, were advised as to the adoption of these labels, and they were indorsed by these gentlemen, and then they were told:

Gentlemen, if there is anything else we should put upon the label or leave off of the label in order that the product shall be sold for what it is, we will be very glad to have your suggestions and to follow them.

Thus showing no attempt to deceive the public, but *uberrima fides* in dealing with the public.

These are sufficient to show that the compound is pure, wholesome, and cheap; that good faith has been shown by the makers of it; and the Department of Agriculture has given its sanction to the labels on the cans by which the public may know exactly what is contained in the article.

Now, gentlemen, I challenge the production of a case from the beginning of our Government down to this day in which the Supreme Court has held that an article which is pure, harmless, not deleterious, but an ordinary article in the business of the world, has ever been excluded from the interstate commerce of the country. I challenge the production of such a case. Why, one of the chief objects that induced the formation of our Government was to facilitate commerce. You will remember the Annapolis convention, the forerunner of the Federal convention, met for that purpose, and yet we are asked to vote for this bill whose aim is to destroy commerce, when our Government was formed to facilitate it.

When we look at all powers vested in Congress as trust powers to be used for the States as beneficiaries and as members of one family of Commonwealths, so to be used as to promote union and not disunion, to establish harmony and peace and not discord and hostility between the States, it must be inevitably predicted that the courts will never hold any law of Congress which prohibits, restricts, or ties interstate commerce to be either necessary or proper as a regulation of commerce, but they must hold it to be a perversion of its trust power to the subversion of the fundamental principles of the Constitution. (Tucker on the Constitution, vol. 2, p. 529.)

The broad doctrine laid down in the above paragraph, it may be said, has not been carried out by the subsequent decisions of the Supreme Court, for in Chapman *v.* Ames (188 U. S. 321) the court excluded lottery tickets from the channels of commerce; and in the Hipolite Egg Co. *v.* United States (220 U. S. 45) the court upheld the pure food and drug law, which excluded impure food and drugs from interstate commerce; and in Hoke *v.* United States (227 U. S. 308) the "white slave traffic act" was upheld, whereby a woman was forbidden carriage in interstate commerce for purposes of prostitution, and this case was followed by Caminetti *v.* United States (242 U. S. 470), in which the same doctrine was upheld.

Diseased meat, smallpox patients, infected articles of any character, have been excluded from commerce, and this principle has been affirmed in the cases of Railroad Company *v.* Husen (95 U. S. 465); Kimmish *v.* Ball (129 U. S. 217); Crutcher *v.* Kentucky (141 U. S. 60); and notably in a case that went up from Virginia, Brimmer *v.* Rebman (138 U. S. 78). How are these cases reconciled with the doctrine declared by Tucker, in the above quotation, when he says—

* * * the courts will never hold any law of Congress *which prohibits, restricts, or ties* interstate commerce to be either necessary or proper as a regulation of commerce.

There is no conflict between that statement and these cases, and in a subsequent paragraph, in discussing the conflict between commercial regulations by Congress and the inspection laws and quarantine laws of the States, which may conflict with such regulations, he declares:

A vessel proposes to enter the harbor of a State under congressional commercial regulations, and the State, to protect its people from disease, quarantines it. These two powers seem to conflict, but they do not, except as both operate upon the movement of the vessel, though from different sources of power. The vessel is subject to two powers, which are entirely different but not in conflict. The State does not check a rightful object of commerce. It merely erects a bar against disease. Congress regulates the rightful object of commerce, under color of which it can not authorize wrongful commerce. It can not introduce disease, but may a rightful subject of commerce. The two powers are made to consist by restraining the State under color of quarantine from regulating rightful commerce and restraining Congress under color of commerce from regulating the unlawful importation of disease. (Tucker, vol. 2, p. 538; Compagnie Francaise de Navigation *v.* State Board of Health, 186 U. S. 380.)

This view has been strikingly sanctioned by Chief Justice Marshall in the great case of Gibbons *v.* Ogden (9 Wheat. 1), where he says:

It is no objection to the existence of distinct, substantive powers that in their application they bear upon the same subject. The same bale of goods * * * that may be the subject of commercial regulation may also be the vehicle of disease. And the health laws that require them to be stopped and ventilated are no more intended as regulations on commerce than the laws which permit their importation are intended to inoculate the community with disease. Their different purposes mark the distinction between the powers brought into action, and while frankly exercised they can produce no serious collision.

Rightful commerce the court recognizes as free and untrammeled, but there can be no rightful commerce in an impure or diseased article, or an article which is *per se* immoral, like lottery tickets; nor can there be rightful commerce in the transportation of persons for impure or immoral purposes. These are excluded, since it could never have been contemplated that this great Federal power should be the means of producing crime, disease, and immorality.

Two cases have been decided recently which control this case, and show as clearly as the noonday sun that this bill, if it becomes a law, will never receive the sanction of the courts. These are the child-labor cases. The first, Hammer *v.* Dagenhart (247 U. S. 251), was decided at the October term, 1917, and the other, Bailey *v.* The Drexel Furniture Co., decided May 15, 1922. The first case arose under a law which provided that no article made in a factory in which a child under 14 years of age had been employed during the past year could be carried in interstate commerce. This law having been declared unconstitutional by the court, another bill was brought into Congress and became a law, putting a tax of 10 per cent on the gross receipts of any mill or factory that employed a child under 14 years of age in the manufacture of goods. This was declared unconstitutional on the 15th day of May, 1922. Both decisions are far-reaching and important, and practically settle the unconstitutionality of this bill. For the first time in many years the court, with singular clearness and force, has put its seal of condemnation upon the doctrine of *indirection;* a doctrine which has received the sanction of Congress in many cases, as seen in the legislation of the past few years.

Under these decisions a power given by the Constitution to the Federal Government for a specific national purpose can no longer be used by *indirection* for the purpose of controlling questions which belong to the States. The mask has been taken off and the real object of the law exposed, an object which the Federal power could not constitutionally control.

Hear the language of Chief Justice Taft in Bailey against the Drexel Furniture Co.:

In the light of these features of the act, a court must be blind not to see that the so-called tax is imposed to stop the employment of children within the age limits prescribed. Its prohibitory and regulatory effect and purpose are palpable. All others can see and understand this. How can we properly shut our minds to it?

In these cases two powers were under consideration, the Federal power to regulate commerce between the States and the State's reserved power to control their children and their labor. The first, the commerce power, is under Federal control; the second, child labor, is under the absolute control of each State. Under our system neither power can destroy that of the other. If the one, the commerce power, can be used to accomplish what it is denied the right and power to do directly, the limitations on power are useless and absurd. If the labor of the child is, under our Constitution, controlled by the States, as decided by the Supreme Court, then if Congress by indirection could control that subject the State would be powerless to preserve its right.

Congress has no power to prohibit manufacture in a State, nor to prescribe the conditions under which manufactures may be created, but when the thing manufactured starts on its journey in commerce the Congress has a right to control it as an article of commerce. (Kidd. *v.* Pierson, 128 U. S. 1; Hoke *v.* United States, 227 U. S. 332; De Witt *v.* United States, 9 Wallace, 47; United States *v.* E. C. Knight Co., 156 U. S. 1.) Congress had no power to prohibit the manufacture of whisky in the States by law, and therefore the eighteenth amendment to the Constitution was adopted.

In the bill before us we find Congress denying the transportation of "Hebe" and other compounds from one State to another; but that is really not the object of the bill, for the denial of transportation is nothing but a denial of the manufacture of "Hebe," for "Hebe" is manufactured only to be sold; and if it can not be sold, as it can not be unless allowed transportation in commerce, then this bill is in reality a bill attempting to destroy the manufacture of an article in a State by Congress, which can not be done. Justice Day, in closing his opinion in the first case, does so in these impressive words:

In our view the necessary effect of this act is, by means of a prohibition against the movement in interstate commerce of ordinary commercial commodities, to regulate the hours of labor of children in factories and mines within the States, a purely State authority. Thus the act in a twofold sense is repugnant to the Constitution. It not only transcends the authority delegated to Congress over commerce but also exerts a power as to a purely local matter to which the Federal authority does not extend. The far-reaching result of upholding the act can not be more plainly indicated than by pointing out that if Congress can thus regulate matters intrusted to local authority by prohibition of the movement of commodities in interstate commerce all freedom of commerce will be at an end and the power of the States over local matters may be eliminated, and thus our system of government be practically destroyed. (Hammer *v.* Dagenhart, 247, p. 270.)

Chief Justice Taft, in his opinion in Bailey against the Drexel Furniture Co., after indorsing the opinion of the court in Hammer against Dagenhart, supra, uses this convincing language:

The analogy of the Dagenhart case is clear. The congressional power over interstate commerce is, within its proper scope, just as complete and unlimited as the congressional power to tax, and the legislative motive in its exercise is just as free from judicial suspicion and inquiry. Yet when Congress threatened to stop interstate commerce in ordinary and necessary commodities, unobjectionable as subjects of transportation, and to deny the same to the people of a State in order to coerce them into compliance with Congress's regulation of State concerns, the court said this was not in fact regulation of interstate commerce, but rather that of State concerns, and was invalid.

His language in another part of that great opinion, it is to be hoped, will not fall unheeded upon unpatriotic legislators:

The good sought in unconstitutional legislation is an insidious feature, because it leads citizens and legislators of good purpose to promote it without thought of the serious breach it will make in the ark of our covenant or the harm which will come from breaking down recognized standards. In the maintenance of local self-government, on the one hand, and the national power, on the other, our country has been able to endure and prosper for near a century and a half.

The voice of the great Chief Justice from yonder judgment seat is still resounding in these halls, calling us back once more to reinstate in this Government the clear, simple, essential principles of our Constitution; and yet we are asked to pass this bill in the teeth of what the court has just declared to be the law. If we are to live under a constitutional government, if under that government we have established a court whose duty it is to declare what we can do and what we can not do, how can we support a bill which the court has declared in a similar case is unconstitutional?

I am constantly in receipt of letters from patriotic men and women throughout the land, as I doubt not you are, asking my opinion as to the best mode of educating the people against socialism, anarchy, and all the "isms" that are threatening the country to-day. I know of no better start in that direction than that we who are charged with the legislation of this country should bow to the limitations of the Constitution as declared by the Supreme Court and not openly defy them. The employer or the laborer who breaks his contract, involving some necessary article for the public; the anarchist who would destroy our Government will find ample justification for their position in the action of this Republican House which continues to defy the Constitution of our Government which they are sworn to support.

Chief Justice Taft's opinion will be epoch making amid the confusion incident to the war, with legal restraints relaxed, with the Federal Government functioning in every direction under continuing war powers, with the people accustomed during the war to look to Washington for all things as the speediest avenue of relief. It was natural for them to forget on the return of peace that their State governments were the natural channels through which their local needs were to be supplied. Not only that, but socialism, communism, and anarchy itself have, during these troublous times, lifted their voices demanding a change of government or an abolition of all government until the watchers on the towers of the constitutional citadels of America have become greatly alarmed. In this crisis, Chief Justice Taft's opinion rings out like an alarm bell in the night, calling back the wanderers to the constitutional fold, affirming the power of this Government to discharge all national and local powers safely under the Constitution, and giving hope and confidence again in the integrity of our Government.

In my judgment, it constitutes the greatest judgment of that great court since Ex parte Milligan and the Slaughterhouse cases were handed down by Judge David Davis and Judge Miller. Along the highway of political progress the Supreme Court has erected many monuments to the cause of constitutional government and civil liberty, and among them, I dare venture to assert, no grander or more imposing one has been or will be erected than that by the hands of Chief Justice Taft in his recent opinion.

"I do not rejoice in this decision because it will allow child labor to be exploited and the lives of our future men and women to be sapped of their vitality by overwork in child labor, but I rejoice in it because its regulation, development, and enforcement will be restored to the States where it can be best and rightfully controlled. This decision will stimulate the States to greater effort in these directions and create a generous rivalry among them to make their respective systems the most perfect in the interest of the children of the country."

In the two child-labor cases referred to the court held that the laws involved showed a purpose to break up child labor, which was a State function and entirely under the power of the State. The first was a fraud on the commerce power of Congress and the second was a fraud on its taxing power, for each was used for an ulterior purpose. In this case the purpose is equally clear, to drive out of the market, and thereby destroy, "Hebe" and the other compounds of skimmed milk and vegetable oils. The question whether "Hebe" should be allowed to be manufactured is solely for State determination, and Congress has no such power. (United States *v.* DeWitt, 9 Wall. 47; and cases cited, supra.)

It will be admitted that Congress has no power to pass a law prohibiting the manufacture of these articles, but Congress seeks by this bill, by indirection, to do this, for it seeks to destroy the sale of the article; and if the sale be destroyed, the manufacture of the article is destroyed. On this point the evidence is conclusive. The report of the majority, submitted by Mr. VOIGT, on this bill, page 6, unequivocally admits that to be the object of the bill:

While the proposed bill will not prohibit the manufacture and sale of the compound within the limits of a State, the committee is of opinion that a law prohibiting the interstate shipment will suppress it, because a sufficient market can not be found without such shipment, and also because a sufficient milk supply can not be found in many States which would warrant engaging in the enterprise.

And, further, in his evidence at the hearings, page 13, in reply to a question of Mr. TEN EYCK, Mr. VOIGT said:

I want to stop the manufacture and the sale of this article, so far as it can be done by this form of bill.

He is asking Congress to stop the manufacture of this article, which alone the States can do, and which a number of States have already done.

Mr. Gray Silver, the Washington representative of the American Farm Bureau Federation, Washington, D. C., in his testimony at the hearings gave expression to the same view in the following colloquy:

Mr. VOIGT. Will you pardon me just a moment there? This bill will not put the skimmed-milk people out of business.
Mr. KINCHELOE. Not necessarily.
Mr. VOIGT. It puts the substitute out of business.
Mr. SILVER. That is the purpose of the bill.

There is other evidence to the same effect in the hearings.

The Chief Justice, in his opinion, has stripped the mask from the child labor bill and has proclaimed the doctrine that the false face, or mask, which hides the real individual, can not, and will not, prevent the court from dealing with the real individual behind the mask; and he has illustrated once again the futility of attempted deception so powerfully expressed in the story of Jacob and Esau, "the voice is Jacob's voice, but the hands are the hands of Esau." If Congress can not by indirection control child labor by invoking the power of interstate commerce when the court sees or knows from all the circumstances that it is the prohibition of child labor that is sought, how can Congress destroy the "Hebe" business by the denial of it in interstate commerce, when the court can see, with equal clearness, that the power of Congress is invoked for the destruction of a legitimate State business and not to facilitate commerce? Such a bill is a fraud upon the court.

This question is no new one to me or to this House. I remember distinctly in the Fifty-second or Fifty-third Congress that a bill was introduced to put a tax of 2 or 3 cents a pound on cottonseed lard. That was all. It looked like a clear revenue measure; and yet, what was back of it? Hog lard. The two articles were competing in the market, both valuable food articles, but the hog lard the most valuable, because it contained more nutriment it was said. Cottonseed lard, clean, pure, and good, could be manufactured cheaper than the hog lard, and therefore it was taking the market from the hog lard. Here was a clear, open field, but the hog-lard people, feeling the market slipping from them, determined that if they could get Congress

to use the great taxing power of the Federal Government to help them out in their hour of stress, and impose a tax upon their competitor, they might survive the struggle. What a spectacle!

The attempt to use the greatest power of the Government, the taxing power, by one competitor against another to drive him out of business—and this in free America; and this in a country that boasts of equality of opportunity to all men; and this is the same dose that this great Republican House is handing out to the followers of that great apostle of human liberty, Thomas Jefferson, who believed in the slogan "Equal rights to all and special privileges to none." It was a great fight, and I am happy to have been among those who aided in defeating such a proposition. I can imagine no more prolific cause of discontent and hostility to the Government than the adoption of such a principle as is carried in this bill. When the powers of the Government can be used to settle the question of competition in commercial life, the act becomes tyranny.

Pure skimmed milk—bad enough at best, for we all like a little cream on it—is more nutritious, I doubt not, than a compound of skimmed milk and coconut oil. But because pure skimmed milk is better than the other article, and costs more, is no reason why the other article should receive its death blow at the hands of the Government, which has promised all industries a fair show. I am bold enough to believe that there is not a man in Virginia, if he properly understands the object and purposes of this bill, who would not admit it is untenable. Because skimmed milk mixed with coconut oil is inferior to pure skimmed milk as a food product gives no right to destroy the one and exalt the other. This bill proclaims a new doctrine—that if Congress finds that one article of a certain class is best, that all others of the same class should be exterminated.

Take a few examples and see where such a doctrine leads you: Shorthorn cattle for many years were regarded by many as the best breed altogether to be had, but of late the Herefords and the Holsteins are looked upon with great favor. Now, suppose the Shorthorn people, to prevent the competition of their breed with the Herefords and Holsteins, could get Congress to lay a tax of $5 per head on Herefords and Holsteins, or prevent Herefords and Holsteins from being carried in interstate commerce, could any honest man uphold such a law simply because the Shorthorn might be regarded with more favor than the others? Have not Herefords, Holsteins, and other breeds a place in the world for usefulness? Go ask the wives of the farmers of this country whether they would indorse a proposition to have a tax of 25 cents per head upon all Plymouth Rock, Rhode Islands Reds, and Buff Orpington chickens because some people think the little White Leghorn is superior to all others because of its laying qualities. The White Leghorn may be the best altogether, but is there no place for the Plymouth Rock, the Rhode Island Reds, and the Buff Orpington? Are they to be taxed out of existence in favor of the White Leghorns or denied shipment in interstate commerce? Such laws are breeders of anarchy, for the anarchist might well say he would rather have no government than one which uses its power to set up one and destroy another.

I appeal especially to those who claim to be Democrats. We are preparing now to criticize the pending tariff bill in the Senate, which will soon be with us. We charge that our Republican brethren will, as they have done before, having gotten control of the Government, allow the great interests of the country to write their demands in that bill; that that bill, when it passes, will make some people richer and others poorer; and we have always denied the validity of such position; we have always denied that it was the function of government to make any man rich; that its proper function is not to put money in the pocket of any man, but to keep any man from taking money out of the pocket of his neighbor. If this bill is passed and shall become a law, it is an open invitation to any man in business who has competition to come to Congress and get Congress to lay a tax on what his competitor is selling on the specious plea that what he sells is not as good as his article and that what he is selling is better than that of his competitor, or if not put a tax on his competitor, deny to his product the privileges of interstate commerce and thus drive him out of business. From all such bills and all such tyranny, good Lord deliver us. Such things might do for Germany but not for America, "the land of the free and the home of the brave." This "skimmed-milk" diet is the feast to which this Republican House invites us and bids us feed upon. It is good for neither man nor beast and we will have none of it.

Mr. HERSEY. Mr. Chairman, this is a bill to prohibit the shipment of filled milk in interstate or foreign commerce. The term "filled milk" [reading from the bill] means—

any milk, cream, skimmed milk, whether or not condensed, evaporated, concentrated, powdered, dried, or desiccated, to which has been added, or which has been blended or compounded with, any fat or oil other than milk fat, so that the resulting product is in imitation or semblance of milk, cream, or skimmed milk, whether or not condensed, evaporated, concentrated, powdered, dried, or desiccated.

My colleague from Texas [Mr. JONES] admitted that this product is a fraud. I asked him the question whether the foundation of one of these cans produced here in evidence was not skimmed milk, and he said yes. I asked him whether or not they could not be canned and circulated and sold as skimmed milk without any fraud. He said yes.

I asked him then the question, Why add to them something that could not be of any benefit, except that it makes a fraud? And he admitted then that the adding of these oils, these mixtures that add nothing to the food product or to its healthful qualities, was simply to make this look like evaporated milk—condensed milk—to make it look like cream inside when it was open; to deceive the eye on the outside and on the inside.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. HERSEY. I have but five minutes.

But if you admit it to be a fraud on the public, what becomes of the argument, the constitutional argument of the gentleman from Texas, that you have no right under the Constitution to prohibit a fraud in interstate commerce? The foundation of a prohibition in interstate commerce is a fraud that you are committing on the people. You do not argue further than that.

Mr. JONES of Texas. Mr. Chairman, will the gentleman yield?

Mr. HERSEY. Yes.

Mr. JONES of Texas. I stated that whatever fraud, if any, was perpetrated by this was perpetrated by the retailer in disposing of it after it had left interstate commerce and had got into intrastate.

Mr. HERSEY. I understood you to say it was a fraud to add to it.

Mr. JONES of Texas. It is a combination product, and it is so stated on the label.

Mr. HERSEY. Did the gentleman not admit that in making these cans look like evaporated milk—the putting inside of it of different oils to make it smooth and look like cream—did you do not admit it as a fraud?

Mr. JONES of Texas. I did not admit it as a fraud. It is a combination product, and it is so stated.

Mr. HERSEY. It must be constitutional to prohibit anything that tries to deceive the people—that a certain product is not what it is.

My friend from Texas [Mr. JONES] also cited certain cases, to wit, the child-labor cases, which have nothing to do with this question that is pending before us. The court held that the child labor law was unconstitutional because it attempted to prohibit in interstate commerce a product that was all right, not a fraud. The product of a child's labor upon its face is just the same as the product of adult labor. Clothing or anything else sent through interstate commerce could not be told by the looks of it whether a child worked on it or not. Therefore the product of interstate commerce being all right and not deceiving anybody, of course, you could not make it a crime to send it in interstate commerce. And the further decision, the late decision, he cites, the attempt to prevent it getting through interstate commerce by taxation does no make it a crime. Crime is the foundation of it, and fraud is the foundation of the prohibition of interstate commerce to this article, and therefore it comes under the constitutional powers of the Government to regulate commerce. [Applause.]

A more detailed statement of the facts in this matter disclosed that the business of manufacturing and selling "filled milk" has become not only a money making and profiteering business, but is one of the greatest frauds now being perpetrated upon the public in the matter of food products.

The evidence before the Agricultural Committee shows that these large "filled-milk" factories buy from the farmers dairy milk. By a modern process they extract from the milk all the cream, butter fats, and practically all food products in the milk, leaving it the poorest skim milk that it is possible to produce. They mix this skim milk with coconut oil and other vegetable oils to give it the appearance of pure milk and cream, in its color, and in its smoothness and fatness. This is placed in cans of the same size and outward appearance as the ordinary condensed milk cans. They go further with the imitation and place upon these cans labels and inscriptions like this:

"Contents of this can is prepared in the rich dairying sections of ———" (whatever State the product is canned in)—and the further label that "The contents of this can is made

from fresh, pure, cow's milk, with butter fats extracted and refined coconut fats added."

The outward appearance of the can would deceive everybody except those who have made a special study of canned condensed milk. It is sold for about 3 cents cheaper per can than the usual condensed milk, and the ignorant and poorer classes of people, being deceived by its appearance, are led to believe that "it is just as good," and by being cheaper than real condensed milk they purchase it and use it in the family the same as they would use pure condensed milk.

Doctor McCollum, of Johns Hopkins University, Baltimore, Md., testified before the Committee on Agriculture as to this "filled milk" as follows:

Doctor MCCOLLUM. The thing for us to do, gentlemen, is this: We are as a Nation now using approximately half a pint of milk per day per person. We are using very little of the green leafy vegetables, and we are using too much meat. The proper thing for us to do is to replace other things in our diet—we should take at least a quart of milk per day, or its equivalent, and we should reduce out meat consumption to approximately 5 per cent of the total energy value of the diet.

* * * * * * *

I do not know how many children are fed on those substitutes for milk; perhaps none, but there is danger that there will be. How many ignorant people in the crowded quarters of the cities, how many foreigners who know too little English to read a label and to understand the finer points of the thing—how many of them are likely to feed an infant on this canned milk? I guarantee that any infant that is fed for a few weeks on one of these milk substitutes will develop rickets as severe as you see it right here. [Exhibiting photograph.]

Doctor Hart, a well-known medical authority, in his testimony before the Wisconsin Legislature, where a law was passed prohibiting the manufacture of this "filled milk," testified as follows:

This bill should pass if for no better reason than that an uninformed public is just as likely to buy the substitute as it is to buy the genuine article, namely, the evaporated whole milk. The nutrition of the American people should always be liberal. For direct consumption we should never allow as valuable a product as whole milk to be in any way tampered with. The condition into which the people in middle Europe sank during the war in respect to their nutrition ought to make us emphatically insistent upon the use of a liberal dietary for ourselves and our children. The substitution of the inferior coconut oil for the superior butter fat in a product like milk is a thing that the public should not tolerate for one moment.

Charles W. Holman, secretary of the National Milk Producers' Federation, testified before the same committee as to this "filled milk," as follows:

Mr. Balderstan, representing one of our member organizations, has very adequately expressed the view of the federation as a whole. I wish in support of that to read a part of a resolution adopted and subscribed to by our federation in Chicago on May 3 and 4 of this year:

"In recent years a compound made of condensed skim milk and coconut oil has been placed upon the market. The manufacturers of this product, commonly known as filled milk, claim that it provides a market for skim milk. This claim is not well taken, for instead of providing a market for skim milk it destroys a market for butter fat. In 1920, 7,000,000 pounds of coconut oil were used in the manufacture of filled milk, and as a result a market for 7,000,000 pounds of butter fat was destroyed and 8,000,000 pounds more butter was placed upon the market. In other words, the coconut cow of the South Sea Islands replaced 40,000 cows owned by American dairymen; and the price paid for skim milk to make this compound was not equal to what the live stock of the farm would return for it.

"Moreover, this compound is sold as milk, and when sold as such is a counterfeit. A fraud is perpetrated upon the consumer. It does not contain the nourishing properties of milk, which is the fundamental food of this Nation, and no producer has a right to so imitate it that the consumer is likely to be deceived. The dairy industry must be protected from this counterfeit and the consumer from deception: Therefore be it

"*Resolved*, That legislation be enacted to prevent the manufacture and sale of compound of milk, skim milk, and vegetable oils for human consumption."

Likewise, at Buffalo, on July 8, we passed a resolution as follows:

RESOLUTION ADOPTED BY THE CONFERENCE OF DAIRY INTERESTS, HELD AT BUFFALO, N. Y., JULY 8, 1921.

Whereas there is an alarming increase in the manufacture, sale, and consumption of bogus milk products, consisting of compounds of skimmed milk and coconut oil or other vegetable fats; and

Whereas such products, regardless of the labels on the containers, are being sold in large quantities as condensed milk and other milk products, thereby at once becoming a fraud on the consuming public as well as a menace to the public health and to the dairy interests: Therefore be it

Resolved, That we favor the abolition of such traffic by Congress by direct prohibitory or restraining laws.

Gray Silver, representative of the American Farm Bureau Federation, testified before the same committee as follows:

The dairymen of this country believe that very few of the people who consume the 86,000,000 pounds of filled or imitation evaporated milk realized that they were using skimmed milk and coconut oil instead of the condensed whole milk containing the fat vitamines so essential to the growth and development of humans and especially babies.

Aside from the various refinements or slight modifications of the process, filled condensed milk is manufactured by skimming the cream from the whole milk and then substituting coconut oil for it. In taking away the butter fat the life-sustaining fat soluble vitamines are removed and in its place is substituted oil which does not contain the vital growth-producing substances. Blindness and death ultimately follow the use of food lacking in vitamines. There are other sources of vitamines, according to the scientists, but mothers are not in the habit of feeding large quantities of kidneys, liver fats, carrots, and yolk of egg in order to obtain the fat soluble vitamines which is well and handily supplied in milk.

The production of evaporated milk from which part or all of the fat has been skimmed and vegetable oils substituted has nearly trebled in the last four years in this country. It is a business which thrives upon the dairy business, has its very foundation in the dairy industry, and yet one which, if continued, will work untold damage to it, for the modified or imitation evaporated milk is being sold as the true product. In 1917 the output of imitation or filled evaporated milk was about 40,000,000 pounds. This increased steadily until in 1920 about 86,500,000 pounds were produced. In the manufacturing of this amount of condensed filled milk there was removed about 7,605,000 pounds of butter fat and virtually the same number of pounds of vegetable oils was substituted, since about 9 pounds of oil is used to each 100 pounds of evaporated product. This virtually destroys the market for about 7,500,000 pounds of butter fats. But its effect is much further reaching than that. It is a matter of vital concern to every dairyman in America.

When the manufacturer labels condensed filled milk in such a way as to show it is condensed skimmed milk and coconut oil instead of the whole milk containing butter fat, they neglect to advise the public of one big factor, namely, that the very life of the milk was taken from it when the butter fat was extracted. Labels on cans of condensed filled-milk products advise consumers to use it in the making of custards, cake, and general cooking and for use in coffee and cocoa. They do not state, however, that the milk is lifeless and does not carry the necessary ingredients for health of humans, particularly babies.

So important has become the issue that already four States have not waited upon the Federal Government to pass a law protecting the people, but have passed State laws prohibiting the manufacture of filled milk. These laws are found in Wisconsin, Maryland, Ohio, South Carolina, and Florida, and bills have been introduced in New Jersey and Pennsylvania.

* * * * * * *

Coconut milk versus cow's milk. The only reason for the manufacturing of this product, filled condensed milk, is that it can be sold at a cheaper price. It is generally understood that when two products are believed by the public to be the same—and that applies generally to filled condensed milks and the regular condensed product—that the cheaper one will force the higher-priced product off the market. It is a significant fact that at the time when evaporated and condensed milk declined 50 per cent in 1920 from the high record of 1919 imitation condensed milk with the coconut oil and skimmed milk increased 24 per cent. The consumer did not materially benefit by this substitute, as the price asked was only slightly lower then than for the genuine health and growth producing condensed milk.

The dairy industry, of course, does not wish to see itself destroyed by a by-product.

Until all the States in the Union have passed laws prohibiting this fraud upon the public the plain duty of Congress is to immediately enact this bill prohibiting the shipment of "filled milk" in interstate commerce. [Applause.]

Mr. JACOWAY. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. TEN EYCK].

The CHAIRMAN. The gentleman from New York is recognized for 10 minutes.

Mr. TEN EYCK. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. The gentleman from New York asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. KNUTSON. Mr. Chairman, I make the same request.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. TEN EYCK. Mr. Chairman, I wish to request unanimous consent to revise and extend my remarks in the RECORD after I have concluded. I desire to introduce into the records my recommendations and correspondence with the chairman of the Joint Commission of Agricultural Inquiry when the work of the commission started, because I want the farmers to know that I am acquainted and familiar with the needs of agriculture and its conditions at the present time, as well as its position to other interrelated industries. I wish them to know that I have done my bit in Congress to correct the evils that exist with agriculture. I do not want them to feel that I am not in sympathy with their problems and interests, when I object to recommendation No. 5 in this report, which recommends that the Government enter into immediate negotiations with the Dominion of Canada for the conclusion of a treaty for the improvement of the St. Lawrence River.

I assumed this position with an intimate knowledge of the requirements of agriculture, both present and future, and feel that if this recommendation is carried through to an ultimate conclusion, it will be detrimental to the farmers' interests in this country, and I am opposing it with a sincere desire to do that which I believe to be for the best interest of the farmers of the country.

I wish to ask the gentlemen of this House who are members of the Joint Commission of Agricultural Inquiry, who voted to place this recommendation in the report, to explain to the House why they inserted this recommendation in the report, what information they have at hand, what knowledge they have

been able to obtain which caused them to vote in favor of the recommendation, or what the incentive was which caused them to support a recommendation for a project which will take 10 or 15 years to construct, when immediate transportation relief is of paramount importance.

Were there any hearings held on this subject?

If so, what was the favorable information gathered?

Does the committee know that there are many farmers opposed to this project?

When was there a precedent established heretofore to develop foreign territory in time of peace?

What is the real reason why it is recommended?

Recommendation No. 5 was placed in the report by a majority of one by the Joint Commission of Agricultural Inquiry. It was embodied in the commission's report without holding hearings, without filing data, without a request of the commission to the chairman to secure information as regards this important subject, and without any information in the text to justify the recommendation, except a reference to the report of the International Joint Commission.

If this recommendation is carried through favorably it will cost the Government of the United States many hundreds of millions of dollars to construct a waterway within the territory of the Dominion of Canada outside of the territory of the United States.

If this recommendation is acted upon favorably it will mean that the Senate will ratify a treaty which will morally, if not legally, obligate the United States Government to an expenditure of millions of dollars, and to transfer an all-American waterway transportation system from the United States to Canada, and place it in competition with the Mississippi River, the Ohio River, and the barge canal, which are the present American outlets to the Great Lakes, without the House of Representatives having investigated or considered it.

If this recommendation is acted upon favorably the treaty will be agreed upon and entered into, binding the House of Representatives to an enormous appropriation, if not legally, morally to build a waterway within the territory of a foreign and competitive nation.

This recommendation was made by the Joint Commission of Agricultural Inquiry, which was appointed to consider agricultural problems and interrelated industries under Senate Concurrent Resolution No. 4, Sixty-seventh Congress.

This recommendation was adopted by the Joint Commission of Agricultural Inquiry with every member of the committee, except three, expressing themselves in the conference in opposition to embodying the recommendation in the report, stating that the recommendation is unnecessary and out of place in the report.

The following additional recommendation was offered by Mr. TEN EYCK when recommendation No. 5 was retained in the report. This was lost by a vote of 9 to 1.

The St. Lawrence River is a natural boundary line; the interests of the Government of the Dominion of Canada and of the Government of the United States are mutual in its utilization. It is suggested that the Government of the United States take such steps as are consistent and in accordance with international procedure with the Dominion of Canada and Great Britain to purchase all that territory in the Dominion of Canada lying east and south of the line comprising the center of the channel of the St. Lawrence River from its mouth to its source, including the full riparian rights and rights to develop and utilize half of the water power from the St. Lawrence River, at the same time that it negotiates a treaty in accordance with the commission's recommendation No. 5, and it is suggested that the Secretary of State use his best endeavors to have the purchase price agreed upon credited on the British debt to the United States.

The Ten Eyck recommendation was offered with the purpose to invite the President of the United States, when negotiating a treaty with Canada, to negotiate with Canada and Great Britain as their interest may appear at the same time the purchase of any land that lies adjacent to and borders on the St. Lawrence River within the Dominion of Canada, which is obligatory for the United States Government to own so that she will receive all the benefits to which she is entitled, either legally, morally, or financially, as well as from a business point of view, before we obligate ourselves to pay any part of the cost of the project.

This amendment was recommended so that if a treaty is successfully negotiated with the Canadian Government the United States Government will own and control half of the land adjacent to the canal constructed in the St. Lawrence River, as well as half of the land which will be improved from the development of the water power in the St. Lawrence River.

Every country should have absolute jurisdiction over its transportation systems, and all transportation systems in any country should terminate in terminals located within the boundary and jurisdiction of that country.

The land adjacent to a water-power development has as much value as the water development itself, because it is the reservoir, the storage battery, and the transformer of the electrical energy developed.

It is where the people congregate to utilize the power development. It is where villages, cities, and large manufacturing industrial units are built up. It is where great manufacturing plants are erected to utilize and transform the electrical energy developed by the water power and transformed into commercial articles of commerce. It is where the total annual output is accumulated each year and stored in the form of large business and commercial centers, private homes, manufacturing plants, and industries of all kinds. It is where the annual total power output is stored and accumulated for all time in the future, like a storage battery, to be utilized at will.

Therefore, it is essential that we own half of the land, so that we may be a 50 per cent beneficiary for all time in the future, before we pay 50 per cent of the cost of its development.

If the Canadian Government intends to cooperate with the United States for the development of this costly enterprise, she will see the strength of this argument and show her sincerity of purpose by placing us in a position that we will not only be a 50 per cent cooperator in the construction of the enterprise but she will help us to become a 50 per cent beneficiary for all time in its utilization.

The reconstruction of the agricultural and commercial industries of the United States is of immediate necessity and paramount importance; cheap transportation is the greatest factor in accomplishing the full economic development of the agricultural industry and the proper development of the farm life of the country.

The farmers, having suffered mostly from the after-war deflation, are mostly in need of immediate relief by a scientific development of all of our internal problems, and especially the development of our internal and domestic waterways, which will best meet their necessity the quickest and help most to solve not only the transportation and marketing problems but many of the other disadvantages under which he is laboring to-day.

The complete resuscitation of the agricultural life of the country will call for the expenditure of a large sum of money out of the Treasury of the United States, as its prosperity is necessary to bring about the immediate and necessary relief to the financial, industrial, and commercial life of the entire country.

It is imperative that we make all internal improvements within the territory of the United States before any expenditures are considered without the territory of the United States, and that all money expended out of the Treasury of the United States for reconstruction purposes be expended where it can be of the greatest service to the greatest number in the shortest time, and that all of our rivers and harbors and small navigable streams be improved before any large project is considered, so as to give to the people throughout the entire country direct and immediate relief.

The United States should improve its own harbors first, so as to relieve present transportation conditions by improving the harbors of Portsmouth, Boston, New London, New Haven, Bridgeport, New York, Philadelphia, Trenton, Wilmington (Del.), Baltimore, Wilmington (N. C.), Charleston, Savannah, Jacksonville, Mobile, New Orleans, Galveston, Panama, Santiago, Los Angeles, San Francisco, Portland, Seattle, and all the other harbors within the Great Lakes, and immediately improve the inland waterways connecting the various harbors with the interior, to give to agriculture waterway transportation from the interior to the sea, such as the Connecticut River, the Hudson River, the Delaware River, the Susquehanna River, the Potomac River, the Ohio River, the Mississippi River, the Missouri River, the Warrior River, the Tombigbee River, the Arkansas River, the Red River, the Tennessee River, and such other rivers and tributaries that need improvement, so as to give to the farmer proper and adequate inland waterway transportation rates; and immediately improve all the canals within the territory of the United States with the same object in view, and immediately take steps to continue and complete that great and imporant intercoastal canal project connecting Boston with Galveston through Florida.

The cost of the development of the water power in the St. Lawrence River under present conditions, when the country is in need of the money for the stabilization of its own commercial interests, will not only deprive them of the money but if utilized to its full capacity it will further upset the economic conditions of business, if the claims of the proponents are true that it will create the electrification of all the railroads within a thou-

sand miles or more of the development, and which will cause the scrapping of all the steam engines, the steam plants, the cutting down of the production of the coal mines of the country; changing the source of power of the entire interrelated industries.

The total expenditure to change from steam to electric equipment and the scrapping of all steam-power plants will cost the people of the United States more than what it will cost to harness the St. Lawrence River. These changes must be brought about gradually, with the idea of doing the least harm possible to the public.

We will admit the tragedy of freight congestion that wartime conditions created in the Western States, which instilled in the minds of the people in that locality an imaginary and visionary idea that the canalization of the St. Lawrence River is the "quack-medicine cure-all" which will relieve all of their ailments.

I can appreciate the reason why many people in the West were in favor of the canalization of the St. Lawrence River, that condition of mind was brought about by the freight congestion which existed during the war, and the railway rates which were caused by the war.

During the war there was a shortage of more than 50,000 freight cars. To-day, however, there is a surplus of over 300,000. During the war the New York State Barge Canal was not in service, it was not entirely completed, the Federal Government had taken over its control, along with the control of the railroads of the country. Since the war, in the spring of 1921, the barge canal was turned back to the jurisdiction of the State of New York, and has been thrown open to the use of the public, and private capital has placed upon it large barges of from 2,000 to 3,000 tons capacity, and in the year of 1921, the first year of its operation, it carried over 1,000,000 tons of freight between Buffalo and New York City, one cargo consisting of 80,000 bushels of oats was carried from Buffalo to New York City without being transferred or unloaded en route. When it reached the harbor of New York the entire cargo was transferred to a trans-Atlantic steamer and shipped to Europe.

Hugh L. Cooper & Co., a firm of engineers of national and international repute, made a study and survey on the ground of this important project for some large financial American interests, and made a report to them, which has since been made public, in which they state that the canalization of the St. Lawrence River and the development of all its water power, including the interest on the investment during its construction, damage to the adjacent property owners, and such other liabilities that may arise, will cost approximately $1,250,000,000, exclusive of the deepening of the channels and harbors, the rebuilding of the docks, and the installation of the proper machinery within the Great Lakes to accommodate ocean liners, all of which will necessitate an additional expenditure of approximately $100,000,000.

While the international joint commissioners report an approximate cost of much less than the above, they state, however, that their figures were made without any soundings or borings and without developing all the water power in the St. Lawrence River, and they recommend that another commission of engineers be appointed to go into this matter more thoroughly and in detail before the Governments of the United States and Canada commit themselves to their recommendation.

If Mr. Cooper is right in his estimate, which I have all reason to believe is correct, the annual cost of operation, maintenance, including the interest on the money invested at 5 per cent, will amount to approximately $75,000,000.

The total tonnage of all commodities carried in the United States via rail, waterway, and highway is more than a billion tons. The total tonnage of the five principal grains—wheat, corn, rye, barley, and oats—raised in 1920 in the United States amounted to 144,826,376 short tons. The total tonnage of all commodities, both raw and manufactured, carried on the Great Lakes in 1920 was 197,502,000 tons. The total tonnage of all commodities exported from the United States which was carried on the Great Lakes amounted to 9,065,497 short tons. The total tonnage of grain and vegetable products of the United States carried in 1920 on the Great Lakes amounted to 5,499,026 short tons. The total tonnage of grain and grain products of the United States which was shipped off of the Great Lakes for foreign export amounted to 2,999,654 short tons in 1920. The total tonnage of all commodities exported from all ports in the United States in 1920 amounted to 63,803,433 tons, of which only 9,264,458 short tons consisted of the five principal grains. It is apparent that only an infinitesimal amount of grain in comparison to the entire business of the country is exported from shipments on the Great Lakes.

The expenditure of more than half a billion dollars by the United States is not warranted for the purpose of carrying only 2,999,654 short tons of grain for export.

Assuming that Mr. Hugh L. Cooper's estimate is correct—that it will cost $1,250,000,000 to canalize the St. Lawrence River and develop the entire water power in the river, plus $100,000,000 to deepen the channels, improve the harbors and docks and loading facilities in the Great Lakes, making a total of $1,350,000,000 for the entire improvement—it would be much better for the United States to apply the interest on the money invested on the freight rates of all the food products of the United States than to assume the gamble of this project being successful and meeting all the requirements after its completion.

Five per cent on the total investment would amount to $67,500,000. The United States' proportionate share will be one-half of the above, amounting to $33,750,000. If applied to 323,851,345 bushels, the total number of bushels of the five principal grains exported from the United States, it would permit a subsidy of more than 10 cents per bushel on the entire amount of grain shipped from all the ports throughout the entire United States, and a subsidy of more than $11 per ton on all the grain exported from the United States shipped on the Great Lakes, or a subsidy of twice the present water freight rate from Duluth to Liverpool on wheat.

Mr. SMITH of Michigan. Will the gentleman yield for a question?

Mr. TEN EYCK. Yes.

Mr. SMITH of Michigan. Does not the gentleman think there will be more than 3,000,000 tons shipped on the Great Lakes if they have a ship canal giving them an all-waterway outlet to the ocean?

Mr. TEN EYCK. I will answer the gentleman. Grain is shipped to-day more than 200 miles by rail from Kansas City to Chicago to ship via the Great Lakes to take advantage of the barge canal. I recommend that we improve the Mississippi River, the Ohio River, and the Missouri River [applause] to give the people in Kansas City waterway transportation all the way from Kansas City to Liverpool without having to use the railroads for 200 miles. [Applause.]

Mr. TINCHER. Will the gentleman yield?

Mr. TEN EYCK. I will.

Mr. TINCHER. As I understand, the gentleman is opposed to the St. Lawrence River project because it is too expensive and not economical?

Mr. TEN EYCK. I am not opposed to the St. Lawrence River project because it is too expensive. I am opposed to it because it is not a practical scheme, because we are calling upon the taxpayers of the United States and upon the consumers of the United States to pay for a waterway for a small section of the country to transport a small percentage of the total grain produced in the United States, which is proven by the statistics of the Department of Commerce, the War Department, and the Department of Agriculture.

Mr. TINCHER. Is the gentleman sure that his opinion on this subject is not in any way influenced by the barge canal?

Mr. TEN EYCK. I can say this to the gentleman, that I am not opposed to it because of the barge canal. I voted for a larger Navy and I voted for bigger waterways, and I want to know whether the gentleman from Kansas voted for those things? [Applause.]

Mr. TINCHER. My argument was not that you should vote for all the appropriations. That would be more than I do.

Mr. TEN EYCK. New York State usually votes for appropriations for the other parts of the country. We are proud of that, and we are proud when they come along with us to help us. [Applause.]

Mr. TINCHER. This happens to be a project, though, that would conflict a little with your New York Barge Canal, but which might benefit the whole remainder of the United States.

Mr. TEN EYCK. I wish the gentleman would not make a speech in my time.

From a business standpoint it would be better for us as a Nation to use the interest on the money which we will have to invest to relieve the freight rates on all of the farmer's food products, because if we do this we will at the same time lower the cost to the consumers of the United States as well as the consumers of Europe.

Our own citizens are certainly entitled to as much relief as it is possible to give them, because the consumer and producer alike are equally responsible for the taxes levied for any Federal improvement. There is no valid reason why the United States should construct this gigantic project, lying within the territory of the Dominion of Canada from the Great Lakes to the Gulf of St. Lawrence. Canada owns more than 90 per cent of the land on both sides of the St. Lawrence

River. Therefore they will be the principal beneficiary of not only the canalization but the water-power development as well for all time in the future.

One of the arguments of the proponents of this scheme is that a harbor on the St. Lawrence River is several hundred miles nearer Liverpool than the harbor of New York. Therefore, it is essential that the United States own the land bordering on the southeast bank of the St. Lawrence River throughout its entire length so that before the scheme has been made a reality we will own the necessary land to establish harbors within our own territory equally near to Liverpool.

We might just as well arrange to have the Boston & Albany, the Boston & Maine, the New York Central, the Pennsylvania, and the New York, New Haven & Hartford Railroads transfer their terminals to Canadian ports in the Dominion of Canada, so that they will be nearer to Liverpool, as to father a movement to transfer our water transportation system to the Dominion of Canada, so that its export harbors will be closer to England.

Accepting Buffalo as the eastern export terminal in the United States on the Great Lakes for the purpose of comparison. Buffalo is located approximately 400 miles from Montreal and approximately 500 miles from the city of New York. Buffalo is 488 miles nearer Liverpool via the St. Lawrence route than via the barge canal through New York City; for a shipper to take advantage of this shorter route, it is imperative that an ocean liner will have to travel after it leaves the Straits of Belle Isle, similarly located to the harbor of New York on the Atlantic Ocean, 1,395 miles, including the tortuous, narrow, and dangerous channel with many obstructions and varying currents in the St. Lawrence River to get to Buffalo, nearly half of the total distance of 3,597 miles between Buffalo and Liverpool.

Seventy-five per cent of the population and the consuming public of the country is located nearer to New York Harbor than the harbor of the city of Montreal. In addition to this the harbor of Montreal is only a six-months port. It is as essential to have proper feeders and distributors of cargoes leading into a harbor as the harbor itself, and the network of waterways, highways, and railways that enter into the harbor of New York is unexcelled throughout the world, which assures return cargoes to all trans-Atlantic liners which dock within this harbor; not for six months, but throughout the entire year.

I wish to submit to you 68 reasons in opposition to the canalization of the St. Lawrence River and the development of the water power in conjunction with Canada which I introduced in a minority report in opposition to the recommendation that the Government of the United States negotiate a treaty to canalize the St. Lawrence River, which in itself should be obnoxious to the House of Representatives, as it will take away from them the right to study this important project before they have been required—if not legally, morally—to appropriate hundreds of millions of dollars to carry out a treaty ratified by the Senate of the United States without having had an opportunity to study its feasibility, practicability, or usefulness:

1. The ocean liner can not compete with the Great Lakes boats of equal tonnage, due to the fact that the ocean liner will cost more to build than the Great Lakes boats of equal tonnage.

2. A 10,000-ton vessel on the Atlantic Ocean requires 50 men to man it, while a 10,000-ton boat on the Great Lakes is manned by 30 men.

3. The insurance on the ocean-going vessel, on account of the original cost and extra hazard of the ocean-going boat traveling the St. Lawrence River and Great Lakes, will be materially higher.

4. The rate on coal from Buffalo to Duluth, a distance of 1,000 miles, is 50 cents per ton on a lake carrier. The rate on coal from Norfolk to Boston, a distance of 500 miles, is $1.10 to $1.25 per ton on an ocean liner.

5. An ocean-going steamer which is designed to navigate the seas in all weather can not operate on the Great Lakes with the same safety as a Great Lakes boat, due to its construction, design, and depth of draft; nor can it carry a full cargo on inland waterways for the same and other reasons. Likewise, a Great Lakes boat of equal tonnage can not travel the Atlantic Ocean with safety in all weather on account of its construction, design, and draft. We admit that both of these designs of vessels can navigate in either place under the most favorable conditions if the channels are deep enough to accommodate the draft of the vessel, but not with safety in stormy or foggy weather, due to the difference of the condition under which they sail and their design.

6. The Board of Rivers and Harbors state that the total tonnage of the Great Lakes during the year 1920 was 197,502,000 short tons. The amount of the tonnage exported from the Great Lakes was 9,065,497 short tons—approximately 4½ per cent.

The deduction from which makes it apparent that most of the tonnage on the Great Lakes is used domestically for manufacturing purposes and for domestic consumption.

From statistics gathered by the Department of Commerce the total production of grain in the United States, in bushels, for the year 1920 is as follows: Corn, 3,232,367,000; wheat, 787,128,000; barley, 222,024,000; rye, 69,318,000; oats, 1,526,055,000; grand total, 5,816,892,000 bushels; equal in weight to 144,826,376 short tons. There were exported from all ports in the United States 323,851,345 bushels, as per table below, equal in weight to 9,264,458 short tons. The total short tons of all grains exported from all the ports of the United States, including the breadstuffs, wheat flour, corn meal, rye flour, barley flour, oatmeal, and 392,612,555 pounds of rice, total 24,099,113 short tons, exported during 1920.

Wheat, rye, barley, corn, and oats exported from all parts of the United States, by customs districts.

Other	467,045	113,703	324,467	2,429,951	452,136
Total	218,287,334	57,070,490	17,854,227	17,761,420	12,877,874

Grand total, 323,851,345 bushels.

7. The Board of Engineers for Rivers and Harbors states that the total of all vegetable food products of the United States carried on the Great Lakes in 1920 amounted to 5,499,026 short tons, and Canada's total tonnage for the same products amounted to 2,284,582 short tons.

The Board of Army Engineers for Rivers and Harbors states that the total tonnage of all grains of the United States carried on the Great Lakes in 1920 totaled 4,794,122 short tons, of which 2,999,654 short tons were exported, which is the total amount of grain that would pass through the St. Lawrence Canal, provided all the export grain on the Great Lakes was transferred from American routing to a routing via St. Lawrence through Montreal in Canada. The barge canal, wholly within the territory of the United States, can accommodate seven times this tonnage annually.

Therefore the amount of service that the St. Lawrence River will render to the country on shipment of farm products, even though it meets all the expectations of its advocates, is infinitesimal when compared with our gross tonnage or even to the total export tonnage of farm products.

According to calculations of the Department of Agriculture 43 per cent of the value of the total exports in 1920 consisted of farm products. If this percentage is applied to the total tonnage as given in the preceding paragraph, the tonnage of all farm products would be approximately 27,435,000 short tons.

8. The Board of Rivers and Harbors state that the total tonnage of all commodities exported from all ports in the United States in 1920 was approximately 63,803,433 short tons. Total tonnage of all farm products exported approximates 27,435,000 short tons.

9. If the people in the great Middle West located at shipping points similar to the shippers in the Kansas City region wish water transportation to the sea, I suggest that we improve the Missouri River, the Mississippi River, the Ohio River, and furnish the necessary boats to give them an all-Amercan waterway route to the sea, the same as Kansas City enjoys to-day via the Mississippi River, and not require them, as is their desire at the present time, to make more than a 200-mile railway haul from Kansas City to the Great Lakes so that they may utilize an artificial waterway route through a foreign territory that will, I predict, eventually cost the United States more than one-half a billion dollars to build, which when completed will entail a big annual expenditure to operate and maintain.

10. The people in the Great Lakes territory cry for a cheaper water route for 5 per cent of their business and forget the 95 per cent consumed by the people of their own country. They are like the merchant that manufactures a general utility article

in a city of 1,000,000 inhabitants and sends all his salesmen to the rural and sparsely populated districts hundreds of miles distant to sell a small percentage of his output and neglects his local million-peopled market.

11. The St. Lawrence Ship Canal will not serve or cheapen the freight rates on food products to the consuming public of the United States. If the Federal Government decides to expend this vast amount of money in waterways we should expend it in such a way that it will give at least our own people equal benefits with the people of all foreign countries.

12. It is an absolute necessity that a country control its transportation system to insure commercial success.

13. All the transportation systems of any country should terminate at terminals and harbors wholly within its territory, both in peace times and in war times.

14. More than 75 per cent of the people of the world are closer to the ports of Boston, New York, Philadelphia, Baltimore, and all other ports within the territory of the United States, than to the port of Montreal.

15. More than 75 per cent of the population of the world has a shorter waterway transportation route connection with the Great Lakes through the port of New York via the barge canal than through the port of Montreal via the St. Lawrence River.

16. The argument that the port of New York, due to its congestion, is a sufficient reason for the construction of a deep waterway canal in the St. Lawrence River to make Montreal the principal export city of North America is obsolete. This has been answered in a practical way by the States of New York and New Jersey in their approved plan in making the port a national harbor and increasing its facilities and capacity tenfold by their cooperation in the expenditure of many millions of dollars.

The population within the port harbor district is more than the entire population of Canada. The railroads and other transportation facilities entering this harbor outclass those in importance entering any other terminal in the world. These feeders, outside of the natural advantages of the harbor, are absolutely necessary for an economical and successful export center. They assure to ocean-going liners a full cargo each way. New York port being open throughout the entire year, assures shippers a continuous waterway service throughout the entire year.

17. On account of the shortness of the navigable season in Canada, the shippers can only use the canal approximately six months in the year, which will make it necessary that the ocean liners will have to look elsewhere for business for the other six months of the year.

18. The St. Lawrence having only a normal six months' season, it will increase the cost of navigating ocean liners between the Gulf of St. Lawrence and the Great Lakes to such an extent that it will make the use of trans-Atlantic vessels prohibitive.

19. The building of the St. Lawrence Ship Canal will give Great Britain access to the Great Lakes with her warships, as well as with vessels of commerce, through her territory, while all of our vessels will first have to pass through English or Canadian territory.

20. In case of war between Great Britain and any other country which is on friendly terms with the United States, the United States will be prohibited from sending any of her food products to them through this canal.

21. The cost of shipping grain to New York City from Duluth via the Great Lakes, barge canal, and Hudson River is 7½ cents, including the elevator charges and five days' storage at Buffalo, made up as follows: 1½ cents per bushel from Duluth to Buffalo; 6 cents from Buffalo to New York, including elevator charges and five days' storage at Buffalo and 1 cent transfer charge at New York City, including five additional days' storage in New York City.

See telegrams quoting rates:

NEW YORK, N. Y., *January 25, 1922.*

Hon. PETER G. TEN EYCK,
House of Representatives, Washington, D. C.:

Canal rate wheat, Buffalo, New York, slightly fluctuating season 1921. Minimum, including elevator charges, at Buffalo, 6 cents per bushel; maximum, 8 cents per bushel; additional elevation charge here boat to steamship, 1 cent per bushel.

E. S. WALSH.

—

BUFFALO, N. Y., *January 25, 1922.*

Congressman PETER G. TEN EYCK,
House of Representatives, Washington, D. C.:

Answering telegram, cost of transferring grain from lake boats to cars or canal boats, 1 cent per bushel, including five days' storage in elevator.

ADAM E. CORNELIUS.

INTERNATIONAL ELEVATING CO.,
New York, December 20, 1921.

The following charges will be in effect January 1, 1922:

Charges to be paid by the grain: Receiving, weighing, and discharging, seven-eighths cent per bushel; transportation of elevator, one-eighth cent per bushel; boat trimming, $1.50 per 1,000 bushels; mixing, one-fourth cent per bushel; blowing and screening or dusting, one-fourth cent per bushel; on all hot and salvage grain additional trimming charge, $3.50 per 1,000 bushels; on any parcel less than a towing lot of 4,000 bushels or any parcel or cargo on which the owners order bagging in excess of amount of bagging required by underwriters' rules, transportation of elevator shall be one-half cent per bushel.

Charges for delivery to be paid by the steamer: Trimming, $3 per 1,000 bushels; trimming decks 30 feet or over, $4.50 per 1,000 bushels; waiting time for grain trimmers (longshoremen), $1 per hour per man.

21a. From reliable authority grain can be carried from Atlantic ports in lots of ten to twenty thousand tons as a part cargo of ocean liners cheaper than a tramp or a liner will carry a full cargo. The cost of shipping grain from New York to Liverpool is approximately 9.6 cents per bushel. See following letters:

NEW YORK, *February 15, 1922.*

Hon. PETER G. TEN EYCK,
House of Representatives, Washington, D. C.

SIR: We have your favor of the 9th instant, relative to quotation on a full cargo or parcel lot of grain from New York to Liverpool, England.

Please be advised that the present quotation on parcel lots—that is, on about 10,000 bushels of either corn, wheat, or rye—is 3 shillings 9 pence per quarter, which is 480 pounds, while the full cargo rate is 4 shillings per quarter.

We are in a position to book for February or March shipment at the above rates on parcel lots, and charter a full cargo of corn, wheat, or rye for March shipment at 4 shillings. We are not in a position to quote you on oats.

For your information, the rate depends at times on the supply and demand, and does not very much depend on the season of the year. For instance, in January wheat, corn, and rye was quoted at 3 shillings per quarter for shipment in February.

We trust this information will be of service to you, and remain,

Yours very truly,

C. B. RICHARD & CO.,
F. J. NADO, *Forwarding Department.*

—

INTERNATIONAL MERCANTILE MARINE CO.,
New York, February 10, 1922.

Mr. PETER G. TEN EYCK,
House of Representatives, Washington, D. C.

DEAR SIR: We have your letter of the 8th instant.

There are no tariff rates to United Kingdom ports for bulk grain. This is an open market and supply and demand govern. The regular liners nearly all require a quantity of grain for stability.

At the present time the amount of space available in these steamers exceeds the supply of grain. The result is that the current rate is less than that at which tramp steamers can be profitably operated with full cargoes of grain. The present rate at which wheat, corn, and rye are being booked from New York to Liverpool is 3 shillings 6 pence per quarter, which at the current rate of exchange is equal to about 15⅞ cents per 100 pounds.

We believe there are one or two tramp steamers offering for full cargoes on which the owners intimated they would trade at 4 shillings 6 pence per quarter, which is equal to approximately 20¼ cents per 100 pounds.

For the freight department.

F. A. RYAN, *Manager.*

—

SUBMARINE BOAT CORPORATION,
Newark, N. J., February 15, 1922.

Hon. PETER G. TEN EYCK,
Washington, D. C.

MY DEAR CONGRESSMAN: In response to your letter under date of February 11, I desire to inform you that we intend to operate on the barge canal, during the 1922 season, 30 barges, aggregating 12,240 dead-weight carrying capacity, with three new tugs especially adapted for service on the canal. This constitutes an addition of 60 per cent to the tonnage capacity of the fleet we had in operation last season, and, of course, the addition of the modern tugs mentioned.

With respect to the other information, I regret that I do not have it available, but I shall try to get it for you as soon as possible.

Cordially yours,

HENRY MOSKOWIK.

—

LUNHAM & MOORE,
New York, February 10, 1922.

Hon. PETER G. TEN EYCK,
Washington, D. C.

DEAR SIR: In reply to your favor of yesterday's date, beg to state the present rate on heavy grain from New York to Liverpool is 3 shillings 6 pence per 480 pounds (a quarter of 8 bushels), at which we closed 32,000 bushels for one of our customers on a White Star steamer to March 4 and March 11.

Full cargo rates are at present higher than berth rates to the United Kingdom, the present price asked from Atlantic ports being 4 shillings 6 pence per quarter, although believe could obtain boats on bids at 4 shillings 3 pence. Cargo rates to United Kingdom have been ruling higher than berth for the past few months, owners seemingly preferring business to the Continent (evidently because expenses discharging much cheaper). Cargo rates to Continent to-day for March, 16 cents per 100 pounds, while berth rates are 17 to 18 cents per 100 pounds, owing scarcity of berth room for near-by shipment.

So you will see how the situation differs. United Kingdom berth far below cargoes and Continent berth higher than cargoes.

Seasons have no bearing on rates, except perhaps on eve of new crop movement rates firm up owing to demand.

Rates are controlled entirely on basis of supply and demand, world's markets having distinct bearing. When they can buy cheaper in other parts of the world we suffer accordingly.

The ocean freight market is a large subject, difficult to convey in a letter. If you are ever down this way and want to talk about it, will be glad to give you several earfulls.

Very respectfully yours,

WALTER MOORE.

P. S.—Just noticed your letter referred to oats. There has been no oats business doing. The usual difference on cargoes is, if heavy grain rate is 4 shillings per 480 pounds, oats would be 3 shillings per 320 pounds—that is, 1 shilling less, but per 320 pounds instead of 480 pounds.

The berth parcel rate has been 3 shillings per 320 pounds, while heavy rate was 3 shillings 3 pence to 3 shillings 6 pence per 480 pounds, the 3-shilling oats rate being an arbitrary minimum and a higher basis than it should be by comparison.

—

CUNARD STEAMSHIP CO. (LTD.),
New York, February 16, 1922.

PETER G. TEN EYCK, Esq.,
House of Representatives, Washington, D. C.

DEAR SIR: We are in receipt of your communication of February 9 in regard to request concerning particulars on shipments of wheat, corn, or oats from New York to Liverpool.

For your information full cargoes of grain have recently been closed from North Atlantic to Canadian ports to United Kingdom ports on the basis of 4 shillings per quarter, and the liners are accepting 3 shillings 6 pence to 4 shillings at the present time. The average rate works out about 3 shillings 9 pence per quarter.

The liners are able to accept a little lower rate than the full-cargo steamers on account of the fact that they only take parcel lots—say, on an average of 10 loads per steamer, which is the equivalent of 3,140 tons weight. Loads of this nature serve as ballast for the liners and are a great advantage to them in the dispatch of their steamers.

In the case of full-cargo steamers they can hardly operate on less than 4 shillings per quarter, as they have no other cargo on which to obtain revenue, whereas in the case of liners they take general cargo, which is much better paying freight.

Grain can be loaded at the rate of about 200 tons per hour per hatch and can be discharged as quickly.

At this time last year the rates on grain were practically double what they are to-day, and shipments are going forward from the Gulf at rates a little higher than those prevailing on the North Atlantic—say 6 pence to 1 shilling per quarter additional.

The equivalent of 3 shillings 6 pence per quarter is 77 cents per 480 pounds, which is the equivalent of about 16 cents per 100 pounds, and no doubt you will agree that this is a very low rate of freight considering the operating expenses of steamers to-day.

One load of wheat equals 8,000 bushels, 60 pounds per bushel; 480 pounds per quarter equals 214 tons weight of 2,240 pounds.

One load of corn equals 8,571 bushels, 56 pounds per bushel; 480 pounds per quarter equals 214 tons weight of 2,240 pounds.

One load of oats equals 10,000 bushels, 32 pounds per bushel; 320 pounds per quarter equals 143 tons weight of 2,240 pounds.

We hope the foregoing covers the point you have in mind, but, if not, it will be more than our pleasure to give you such additional information as you may request.

Yours faithfully,

CUNARD STEAMSHIP CO. (LTD.);
JOHN GAMMIE, *General Freight Manager.*

22. The same rates are charged on wheat from Montreal to Liverpool as from New York to Liverpool. The rate of insurance, however, amounts to about 1½ cents per bushel more from Montreal to Liverpool than from New York to Liverpool, which makes an additional cost of 1½ cents from Montreal. During certain seasons of the year insurance companies refuse to accept any insurance risks on shipments via the St. Lawrence route from Montreal.

23. Paragraphs 20, 21, and 22 show conclusively that it will be impossible to save even 5 cents per bushel on export grain through the St. Lawrence Canal, while we are promised by the shippers on the barge canal that they will lower their present rates at least 3 cents per bushel as soon as they can get enough of the proper type of boats on the canal.

24. The interest alone on $500,000,000 at 5 per cent equals an amount large enough to give a 5-cent subsidy on 500,000,000 bushels of grain, which is more than the total export from all our Atlantic ports in the United States.

25. If it is a cheaper rate that is needed, let the United States give the shippers a freight allowance equal to the interest on the investment in the St. Lawrence Canal, and thereby run no risk of failure with so large an experiment, which will cost us so much in taxes.

26. Using Buffalo as the all-American outlet from the Great Lakes to the Atlantic Ocean, the following distances to Liverpool are interesting and self-explanatory:

	Nautical miles.	Statute miles.
Buffalo to Montreal	339	390
Buffalo to New York	440	507
Montreal to Liverpool, via Belle Isle	2,785	3,207
Montreal to Liverpool, via south of Newfoundland	2,926	3,369
New York to Liverpool	3,107	3,578
Montreal to Belle Isle	873	1,005

From the above it is apparent that Montreal is from 200 to 300 miles nearer Liverpool than New York City; but for an ocean liner to take advantage of this shorter route she will have to traverse 873 nautical miles, or 1,005 statute miles, from Belle Isle to Montreal, through a narrow and dangerous channel throughout the entire length of the St. Lawrence River, while the distance between New York Harbor and Liverpool is an open waterway throughout its entire length. (See 68 regarding statistical hazardous navigation.)

27. In the building of the Panama Canal we did not require financial assistance from other nations, nor did we build it without first obtaining the territory through which it runs; but, on the other hand, it being an international route, to-day certain nations, especially Great Britain, are trying to dictate to us as regards its operation, protection, and tolls. This being true, how much more would Great Britain endeavor to dictate to us if it laid within her territory, as this project will, and being of international concern, we will have again invested American money in an enterprise the policy of which will be controlled to a certain extent by foreign nations.

28. The policy of the public-service commissions and the Interstate Commerce Commission is to oppose the building of a parallel transportation route until the existing route has proven itself inadequate to take care of the traffic for which it was constructed.

29. The New York Barge Canal was not completed until after the war had started. The Federal Government later took it over under its control when it took over the railroads. That and the war stifled all private capital from building boats and warehouses and investing generally in transportation facilities or engaging in waterway transportation business. Not until the spring of 1921 did the Federal Government release its jurisdiction as well as its boats, and turn back the canal to the State of New York, after which a number of private individuals and corporations placed boats upon the canal which carried in 1921, its first year of operation, more than a million tons of freight, which is more than one-third of the tonnage of all the grain exported from the Great Lakes.

30. In 1921 a cargo of 80,000 bushels of oats was carried from Duluth through the Great Lakes and through the barge canal to New York City via the Hudson River without breaking bulk at the city of Buffalo, and loaded it on ocean-going steamers in the harbor of New York, showing conclusively that the barge canal is large enough to handle lake-going steamers, if that class of business is profitable.

31. Mr. Hugh L. Cooper, of the firm of Hugh L. Cooper & Co., engineers of national reputation, after a thorough physical study on the ground and compilation of costs of the construction of a canal and development of the water power in the St. Lawrence River, stated in a speech in Chicago, April, 1922, that the total cost of constructing the canal and developing all the water power in the St. Lawrence, including interest on money invested during the construction, the adjustment of claims, all other liabilities, and other incidental expenditures pertaining to the work, would amount to $1,250,000,000, exclusive of any work of deepening the channels or improving the harbors and docks in the Great Lakes to accommodate vessels of a deeper draft.

32. In 1912 we had a budget of one billion; to-day, due to the war, we have a budget of four billions; therefore, we should only spend that which will give us greatest immediate relief.

33. This money which we are considering to expend abroad could be used to better advantage to equip our own waterways with boats, warehouses, grain elevators, terminal facilities, etc., so as to reduce the freight rate to a minimum to the public.

34. When we need so much money for internal improvements, farm credits, transportation, warehouses, good roads, improved highways, extension of our own inland waterways, improvements in our harbors and docks, and an adequate appropriation by Congress to take proper care of our ex-service men, it is ridiculous for the people of the United States to spend $500,000,000 to help an adjoining country to build a paralleling and competitive route in territory without the United States to compete with an existing all-American route within the territory of the United States.

35. Our policy should be American money for American waterways within the territory of the United States.

36. If Great Britain controls, through Canada, the export harbor, and Liverpool the import harbor, as well as the boats in which our grain and farm products are shipped, she will also control the price; and she being a consuming nation, her control of the price will be downward, and the farmers will lose more in the selling price of their commodities than they can possibly gain if all the promises be true of the reductions in the transportation rates.

37. What the farmers need to-day is immediate relief by being supplied with the necessary water, rail, and highway transportation facilities at reasonable rates.

38. This foreign canal which some are in favor of building in the Dominion of Canada can not be constructed, properly

equipped with terminals, boats, and other equipment within 10 years' time, and what the farmer needs to-day is immediate relief.

39. Before we consider the 50–50 improvement of the St. Lawrence River, we should at least own all that land between the present boundary of the United States and the center of the St. Lawrence River, reaching from its source to its mouth and south of the Gulf of St. Lawrence, which is now part of the Dominion of Canada.

40. Whenever a water power is developed the land contiguous and adjacent thereto improves in importance and value because the land bordering upon a waterway development is the storage battery, the reservoir, and transformer for the developed horsepower. It is where the people congregate, create villages and cities, build manufacturing plants and industries to utilize the electric power, transforming the electric energy into articles of commerce and the necessities of life which the people of the world purchase. It is where the developed electric power will be accumulated and stored for hundreds of years in the future in the form of large populated manufacturing districts. Therefore, it is important and essential that we at least own the land bordering on one side of the St. Lawrence River and the right to develop and utilize one-half of the horsepower available at any and all places throughout its entire length if we are required to pay for half the cost of its development.

41. I introduced the following resolution (H. Res. 287) February 14, 1922, which speaks for itself. If the President of the United States accomplishes its purposes, he will have at least made the United States corecipient as to the water power developed:

Whereas the St. Lawrence River is a natural boundary line, and the interests of the Governments of the Dominion of Canada and of the United States are mutual in its utilization: Therefore be it

Resolved, That the President is requested to take such steps as are consistent and in accordance with international procedure with the Dominion of Canada and Great Britain to purchase all that territory in the Dominion of Canada lying east and south of the line comprising the center of the channel of the St. Lawrence River from its mouth to its source and the center of the Gulf of St. Lawrence, including the full riparian rights and rights to develop and utilize half of the water power from the St. Lawrence River; and

Resolved further, That the President is requested to use his best endeavors to have payments due the United States on the British debt credited on the purchase price of the territory so acquired.

42. The reason that the people who live within the Great Lakes watershed and the Northwest are demanding a waterway outlet to the sea via the St. Lawrence River through the Dominion of Canada is due to the fact that the railroads were congested during the war and that the present railroad rates were caused by the war. The congestion has ceased to be a factor. In addition this the New York State Barge Canal, with a carrying capacity of between twenty and twenty-five million tons annually, has since been put into operation and thrown wide open to the commerce of the world free of tolls, as the taxpayers of the State of New York pay for its upkeep, maintenance, and operation. This canal connecting the Great Lakes and the Atlantic Ocean parallels the proposed St. Lawrence canalization project in Canada and will give all the necessary water transportation service that is necessary to relieve the Great Lakes of its export tonnage at the present time or for a great many years in the future.

The barge canal will do more to relieve traffic than the proposed St. Lawrence ship canal because its open season is longer when compared with an approximate six months' season in the St. Lawrence River. Therefore it will have a more beneficial and continuous effect in its control of the railway rates from the West to the East.

43. The adjustment of the present railroad rates has been taken up by the Interstate Commerce Commission and will be, I believe, honestly and fairly dealt with from time to time and readjusted to meet the economic peace-time conditions. The readjustment of the railroad rates from the Great Lakes to the Atlantic Ocean will not be facilitated by the proposed canalization of the St. Lawrence River which can not be completed within 10 years.

44. If we are to derive any immediate benefit from the competitive waterway route to assist, it will have to come from the utilization of the present waterway lines competition such as the barge canal affords, which is now in operation.

45. The scheme of developing the St. Lawrence River with American money should never be allowed to become a reality until the United States at least is in a position to be a 50 per cent beneficiary, nor should we pay 50 per cent of the cost of the canalization of the St. Lawrence River until we are put in a position that the canalized St. Lawrence River throughout its entire length from the Great Lakes to the Atlantic Ocean is one-half within the territory of the United States.

46. I know from an engineering standpoint that this canal can be built, and the necessary dams can be constructed to develop the water power, and that the United States is rich enough to build them, but from our national standpoint they should not be built any more than the New York Central Railroad, the Pennsylvania Railroad, the New York, New Haven & Hartford Railroad, the Boston & Maine Railroad, the Rutland Railroad, and the Boston & Albany Railroad change their routes from terminals and harbors within the territory of the United States to terminals and harbors in the Dominion of Canada, so as to obtain terminal facilities nearer to Liverpool, than for the United States to change the route of its present waterway system by canalizing the St. Lawrence River, thereby creating terminal harbors in Canadian territory, so that the harbors may be closer to Liverpool. As far as our national transportation policy is concerned, there is no difference between a railway, highway, or a waterway route.

47. All our past expenditures and future efforts in relation to the improving of the Mississippi and Ohio Rivers and other internal waterway improvements will be useless if the canalization of the St. Lawrence River is made to compete to serve the same territory if it will accomplish what the proponents believe be true.

48. If this unheard-of expenditure is appropriated by Congress for the St. Lawrence waterway, it will naturally curtail the waterway development within the territory of the United States, as the total cost will require a larger expenditure annually for the next 10 years than what we are appropriating annually now for all our interior waterway improvements.

49. We should not expend so large a sum of money to give to a competing nation the same transportation facility which we enjoy ourselves, and in this instance, looking into the future, the total number of bushels of grain exported by the United States will gradually lessen as our domestic population increases, while the total number of bushels exported from Canada will increase, as they develop additional acreage, and as time passes the return on the investment will be much greater from a transportation standpoint to Canada than to the United States. Our policy should be to develop a waterway system which will serve best our own producers and consumers for all time in the future.

50. The great Atlantic seaboard cities—Boston, New York, Philadelphia, Baltimore, Norfolk, Newport News, Charleston, Savannah, Jacksonville, Mobile, New Orleans, Galveston, and all other Atlantic seaboard cities—have been developed and have grown prosperous largely on account of the close relation which has been built up, developed, and fostered for generations between the merchants, manufacturers, and traders, and the producers from the fields and mines of the interior in the development of the natural tributaries to these Atlantic ports, and vast sums have been invested by the citizens of our country on these avenues of commerce, the railroads and steamship lines carrying the produce of our mines, fields, and factories between the interior of our country and the Atlantic seaports.

51. Changing our commerce balance at this time by the Government of the United States by the construction of an avenue of commerce running almost entirely through foreign territory would have a disastrous effect, if the proponents of this project are correct, upon the great cities developed under the care of the Government and by means of the thrift, enterprise, and investment of the citizens of our own country; these would be destroyed in large measure by an appropriation from the public moneys of the United States obtained by taxing these seaboard cities for a waterway through foreign territory in competition with our domestic enterprises inaugurated and developed solely by the citizens of the United States and domestic capital.

52. Railroad congestion can not be entirely relieved by a waterway which, due to climatic conditions, only operates normally six months in the year on account of ice and fog.

53. The grain from the Middle West near and adjacent to Kansas City should be shipped via the Missouri River and Mississippi River all the way to the ocean by water, rather than via railway for 200 miles so as to pass through the St. Lawrence or any eastern port.

54. When New York State investigated the building of the barge canal at a large expenditure it employed several commissions at different times, each composed of competent engineers, who in their reports condemned the St. Lawrence route and finally recommended the barge canal as it now exists, because from their experience and expert knowledge they believed it to be the cheapest and most economical waterway system that could be developed connecting the Great Lakes and the Atlantic Ocean, and the most practical and feasible scheme regarding width, depth, safety, and practicability of navigation.

55. The title of all the water-power rights south of the international line belong to the State of New York. The Federal

Government can not develop it except for commerce under the Constitution. The St. Lawrence project is more than a 75 per cent power project.

56. The deepening of the channels, the rebuilding of the harbors, and the installation of the proper machinery for handling freight in loading and unloading ocean-going vessels on the Great Lakes will cost over a hundred million dollars in addition to the expenditure in the St. Lawrence proper.

57. It is not conducive to the continuance of harmonious and pleasant relations for two nations to enter into joint ownership and operation of so important a project. Either one or the other should build it, own it, and operate it, and have full control of it in time of peace as well as in time of war.

58. During the war time Canada cut off the supply of electric power to some of our manufacturing plants under the plea that she needed it for war-time purposes. The same thing will hold true in relation to this project if similar and like conditions should arise.

59. The truth about water navigation from the Middle West to Liverpool is that at most three types of craft are needed—lake vessels, built lightly and inexpensively, for cargo-carrying purposes exclusively; barges to traverse the interval between the Lakes and the sea, and the heavily constructed ocean craft, with large crews, staunchly built, which can brave the ocean storms and make as many round trips as possible in a given time.

60. The commission which represented New York at the ship-canal hearings before the International Joint Commission reports that the average cost of transportation of wheat per bushel from upper lake ports to Liverpool, via Buffalo and the Erie Canal, was only 10.73 cents in the five years from 1910 to 1915. How can that normal rate be lowered to the western farmer by introducing a through ocean route to the Great Lakes, handicapped by far greater initial cost and greater cost of operation?

61. The lake steamer hauls freight both ways. The ocean carrier would return from Liverpool without a cargo if it returned to a nondistributing center in the United States, for the return cargo is the great problem for our existing ocean liners to-day.

62. I beg to submit statistics reported by the commission in opposition to the St. Lawrence Ship Canal and power project in a table setting forth the rate of freight by lake to Buffalo and by canal to New York year by year from 1910 to 1915 and from New York to Liverpool for the same length of time, together with a list of other costs, which includes various expenses for handling the freight which was absorbed in this freight rate.

Taking a more recent period, that of 1910 to 1915, which period is considered as more truly representative of present-day conditions, the rate of freight by lake to Buffalo and by canal to New York was as hereafter shown.

Year.	Lake.	Canal.	Through.
	Cents.	*Cents.*	*Cents.*
1910	1.06	4.08	5.14
1911	1.03	4.36	5.39
1912	1.36	4.32	5.68
1913	1.40	4.57	5.97
1914	1.28	4.27	5.55
1915	1.33	4.47	5.80
Average	1.243	4.345	5.588

During the 1910–1915 period the average ocean rate from New York to Liverpool was 5.15 cents per bushel. This information is derived from the official records of the New York Produce Exchange and is authoritative.

In citing figures of this character, particular emphasis should be laid on the fact that the bases named represent the transportation charges assumed by the commodity and not the cost of transportation as reflected in the charges of lake vessel, canal barge, and ocean vessel operations. Such latter figures are of course appreciably less than the rate of transportation under which the grain moved and a clear distinction must be made between "cost of transportation" as applied to the ship operator and "cost of transportation" as assumed by the consignee or consignor.

Moreover, the rates named include the transportation service via lake, canal, and ocean, and the incidental terminal service involved in transfer from lake vessels to canal barge and again to the ocean carrier.

The rates named are gross rates, and there is absorbed therein the cost of the following operations:

1. Elevator charge at upper lake port.
2. Lake cargo insurance.
3. Lake transportation to Buffalo.
4. Elevator charge at Buffalo.
5. Five days' free elevator storage at Buffalo.
6. Canal cargo insurance.
7. Canal transportation to New York.
8. Elevator charge at New York.
9. Three days' free storage on canal barge at New York.
10. Five days' free elevator storage at New York.
11. Ocean cargo insurance.
12. Transportation via ocean.

The average ocean rate, New York to Liverpool, as cited, is exclusive of the rate for the year 1915, during which year, because of war conditions, ocean rates reached abnormal levels.

Annual average freight rates on wheat per bushel, from Chicago to New York, by lake and canal, and by lake and rail, and from New York to Liverpool via ocean, for the years 1900 to 1914, inclusive.

Year.	By lake and canal.	By lake and rail.	New York to Liverpool.
	Cents.	*Cents.*	*Pence.*[1]
1900	4.92	5.05	3⅜
1901	5.64	5.57	1½
1902	5.75	5.78	1 7/16
1903	5.94	6.17	1 7/16
1904	5.21	5.02	1⅛
1905	6.01	6.29	1⅛
1906	6.44	6.40	1 7/16
1907	7.18	6.97	1⅛
1908	6.50	6.50	1 7/16
1909	5.85	6.88	1⅛
1910	5.60	6.54	1½
1911	5.87	5.23	2
1912	6.07	6.42	3 1/16
1913	6.20	6.81	2 1/16
1914	5.81	6.54	3

[1] A pence is equivalent to 2.03 cents on basis of $4.8665, the normal value of the English pound sterling in American money.

63. I quote below paragraphs from letters received from seven different shippers from various trans-Atlantic navigation companies setting forth their opinion as regards the uselessness of this project and their likelihood of utilizing it should it be finally constructed:

In reply to your letter of March 11, we beg to advise that there is no possibility of our using the Great Lakes and St. Lawrence River Canal should such be built. As a matter of fact, we are not in favor of the canal, as we feel that it will divert business from the established routes which we are interested in maintaining and on basis of which permanent terminals have been provided by us. We are positively opposed to the diversion of our cargoes from the United States North Atlantic ports.

I entirely and heartily approve of your attitude in this matter. I believe there is grave doubt as to whether the St. Lawrence Canal development would accomplish sufficient in the way of results to justify the cost of building the canal and developing the water power for which there is no near-by market.

There is, of course, a very large territory between the Atlantic seaboard and Chicago south of the Great Lakes and the St. Lawrence which would not be naturally tributary to the proposed route, so in any event we believe it would be impossible and undesirable to abandon our terminals at the Atlantic ports. Furthermore, many of our larger vessels draw in excess of 25 feet, so the use of the proposed canal would be confined to the smaller type of ship.

Replying to your favor of the 11th instant, we would state that our trade would not be affected by the proposed canal connecting the Great Lakes with the St. Lawrence River, and we therefore are not in a position to express an opinion in the matter.

The steamers handled by us are operating to Mediterranean and Adriatic ports and the greater part of this traffic would no doubt continue to move via the Atlantic ports.

If 25 feet is to be the limit of depth in the proposed St. Lawrence Canal it will, of course, only accommodate steamers of very moderate size, and the use of such a canal for steamers operating on the North Atlantic Ocean would therefore be limited. The White Star steamers are very deep draft, averaging in the neighborhood of 34 feet when loaded, so from a practical point of view it would obviously be impossible for them to navigate the proposed canal.

Referring to yours of the 11th with respect to the agitation of a 25-foot canal connecting the Great Lakes with the St. Lawrence River, as operators of overseas equipment we can not see wherein the proposed project would benefit shipowners or any appreciable number of shippers, so far as this country is concerned.

Independent of this phase of the project, it is not, in our judgment, a practical scheme, because ships suitable for ocean navigation could not safely be navigated in a 25-foot channel through the St. Lawrence River and the Great Lakes.

There can not be any safe, profitable business built up on such a project, from our study of this matter, and we are opposed to it.

64. Statement of Frank C. Munson, president of the Munson Steamship Line:

The proposition to canalize the St. Lawrence for ocean-going vessels is utterly impracticable from the shipping standpoint. Shipments of grain from Chicago to European ports by the proposed canal would require twice the time needed under the present system because of the low rate of speed with which ocean-going ships could navigate the 1,130 miles of this restricted waterway.

The cost of transportation on such ships through this canal would be at least double that under the present practice of sending grain by water to deep-sea ports for transfer to large ocean-going vessels. Only vessels of from three to four thousand tons could utilize a canal with a depth of 25 feet, as proposed, and even these would be unable to use many of the harbors and connecting waterways of the Great Lakes, which at the present time are only 20 to 21 feet in depth.

Thus to the cost of the canal, in order to make it practicable for these comparatively small vessels, must be added the cost of deepening Great Lake ports and channels.

In my opinion, any steamship company attempting to operate across the ocean and through the St. Lawrence Canal in competition with lines getting grain from rail or barge at New York or Montreal would be a losing venture from the start. If these facts were understood by our Representatives in Washington, there would be no question of their refusal to appropriate $252,000,000 of our good money or any part of such a sum for this purpose.

65. American labor's attitude:

Do you approve spending your American money in a foreign country to pay foreign workmen when so many American workers are unemployed?

Your answer is obvious, but your careful attention is called to what follows. Read it and act. Make your protest heard.

It is as a railroad man and a marine engineer, with the interest of my fellow workers at heart, that I am writing this, exposing one of the most brazen injustices ever attempted against the workers of the United States—a scheme to throw hundreds of millions of American dollars into a development in a foreign country, benefiting the working class of another country.

HAROLD K. LOVELESS,
Buffalo, N. Y.

66. The Federal Government should formulate and promote a national plan of internal waterways and adopt the principle of spending United States money for United States waterways under United States control.

67. The facts are that New York is not the "neck of the bottle," as claimed by the proponents of the St. Lawrence project. The St. Lawrence is already canalized and rates are already so low from Chicago to Montreal that no improvement is likely to be made in the St. Lawrence which can possibly affect the saving on grain rates as claimed by the propagandists in behalf of the St. Lawrence. The facts are that when a sufficient number of boats are placed on the barge canal the all-water rate via the Great Lakes-Barge Canal will be materially lower, and Montreal wants the United States to spend a half billion dollars so that without expense she will be able to retain a competitive waterway system with the waterways of the United States when they are made 100 per cent efficient.

68. In "a memorial concerning the fur trade of the Province of New York," presented to his excellency William Burnett, captain general and governor, by Cadwallader Colden, surveyor general of the Province, dated on the 10th day of November, 1724, Mr. Colden said that "notwithstanding all these advantages, which he had enumerated," the French labor under difficulties that no art or industry can remove. The mouth of the River of St. Lawrence, and more especially the Bay of St. Lawrence, lies so far north, and is thereby so often subject to tempestuous weather and thick fogs, that navigation thereof is very dangerous and never attempted but during the summer months.

"The wideness of this bay, together with many strong currents that run in it, the many shelves and sunken rocks that are everywhere spread over both the bay and river, and want of places for anchoring in the bay, all increase the danger of this navigation; so that a voyage to Canada is justly esteemed much more dangerous than to any other part of America. The many shipwrecks that happen in this navigation are but too evident proofs of the truth of this."

Notwithstanding all the precautions taken since that time, many ships have been wrecked in the Gulf and River of St. Lawrence. It is known as the "graveyard of the Atlantic."

In 1837 the *Albeuria* foundered in the Gulf of St. Lawrence and 525 lives were lost; in 1840 the steamer *Dundee* was wrecked and 292 lives were lost; in 1817 the steamer *Montreal* was lost 15 miles above Quebec with 253 lives; in 1898 the French liner *La Burgoigne* was in collision off Sable Island and 584 lives were lost; in 1914 the Canadian-Pacific liner *Empress of Ireland* was in collision with the collier *Storstad* in the St. Lawrence River near Father Point and sank in 20 minutes, and upward of 1,000 lives were lost. The commission which investigated that unparallel disaster found that the navigation of the St. Lawrence is attended with the constant probability of fogs. Captain Kendall said, "It was very foggy," and although the officers of the two vessels saw each other's vessel approaching, the fog settled down so suddenly that they were lost to each other's view and the collision occurred. It will be remembered that the loss of the White Star steamer *Titanic* in 1912 after colliding with an iceberg resulted in the loss of 1,500 lives. That disaster occurred, however, off the banks in the region of icebergs, which is the usual route of vessels passing between Liverpool and the Gulf of St. Lawrence.

Other disasters have occurred in the navigation of the River and Gulf of St. Lawrence, all of which tend to confirm the truth of the statements of navigators, in effect that the navigation of those waters, on account of the constant menace of fogs, snow, and ice, is most hazardous. This is borne out by the marine insurance rates, which increase from midsummer until November, when insurance can not be had at any rate, and thereupon insurance ceases altogether.

UNITED STATES SENATE,
June 17, 1921.

Hon. PETER G. TEN EYCK,
House of Representatives, United States,
Washington, D. C.

MY DEAR MR. TEN EYCK: I am taking the liberty of calling the first meeting of the Joint Commission on Agricultural Inquiry recently created, and the meeting will be held at my office, Monday, June 20, 1921, at 10.30 o'clock.

The first business in order will be the organization of the commission, and I hope that every member will find it possible to attend.

Very sincerely,

I. L. LENROOT.

HOUSE OF REPRESENTATIVES,
Washington, June 21, 1921.

Hon. PETER G. TEN EYCK,
House of Representatives, Washington, D. C.

MY DEAR MR. TEN EYCK: In accordance with the action of the Joint Commission on Agricultural Inquiry I have appointed the following subcommittee on plan and scope: ANDERSON, CAPPER, HARRISON, MILLS, SUMNERS.

I desire to have the members of the subcommittee meet at Senator LENROOT'S office, room 133, Senate Office Building, at 10 o'clock Thursday morning, June 23. Members of the subcommittee will please take notice.

Sincerely yours,

SYDNEY ANDERSON.

JUNE 23, 1921.

Hon. SYDNEY ANDERSON,
Chairman Commission of Agricultural Inquiry,
Washington, D. C.

DEAR MR. CHAIRMAN: Realizing that the report of your subcommittee on plan and scope will undoubtedly be received by the whole committee to-morrow, and feeling that the proper organization of our committee means so much for the future success of our work, and as the report of the subcommittee will be discussed in detail, I take great pleasure in inclosing you a proposed plan of organization of the Commission of Agricultural Inquiry for your information and consideration.

I have written this out, suggesting in a general way how we should proceed with our work in detail, and desire to file this with you, as I wish to record with the committee my views as regards the organization.

Very sincerely yours,

PETER G. TEN EYCK.

The subcommittee on plan and scope, composed of ANDERSON, CAPPER, HARRISON, MILLS, and SUMNERS, make the following report:

That the commission undertake, first, to assemble and organize available data:

1. On causes of the present condition of agriculture.
2. On the difference in price of agricultural products paid to the producers and the ultimate cost to the consumer.
3. On the comparative condition of industries other than agriculture.
4. On the relation of prices of products other than agricultural products to such products.

This with a view of securing a statistical picture of the existing situation with a view of development of a further specific line of inquiry.

That two subcommittees of three members each, the chairman of the commission to be an additional member of the subcommittees ex officio, be appointed by the chairman as follows:

First. A subcommittee to investigate and report upon the cotton situation, with particular reference to the ascertainment of existing surpluses in the United States, possible markets abroad, and ways and means for the disposition of existing surpluses in foreign markets.

Second. A subcommittee to investigate the live-stock situation, with particular reference to emergency credits.

These subcommittees to deal with immediate emergency conditions, not to interfere with pending legislation and measures of relief already under way.

That investigations relative to marketing be confined to grain, live stock, cotton, dairy products, vegetables, and fruits, with special reference to one or more commodities in each group.

That the commission employ a secretary with qualifications as an expert in the economics of distribution and an agricultural economist, the selection of the men to be subject to consideration by a subcommittee composed of ANDERSON, CAPPER, and MILLS.

PROPOSED ORGANIZATION OF COMMISSION OF AGRICULTURAL INQUIRY.

[By Mr. P. G. TEN EYCK, June 23, 1921.]

Each individual member should submit a complete list of all the different phases of the various subjects of the agricultural industry and all phases of other industries which relate to agriculture or have a bearing upon the cost of its produce, cost of distribution, and price received by the farmer.

After the above information has been properly tabulated the committee as a whole can segregate the subjects to which we should give our attention and consideration to carry out the purport of the joint resolution under which we are now functioning.

After this list of subjects has been approved of and settled upon by the whole committee, the committee should decide upon the various sources of information to be considered in our investigation of the subjects previously decided upon.

After having decided upon the various sources of information the committee should come to an understanding as to the best way of obtaining the information from the various sources.

Each subject should be heard separately, as far as practicable, so as not to be led astray on a tangent and confuse our hearings with other or foreign subjects and thereby scramble our ideas, jumble our information, and consequently cause further confusion when referring later to the various lines of investigation for comparative and joint use.

All hearings on any subject, or subdivision thereof, should be heard by the whole committee and not by a subcommittee.

When using departmental or committee files and reports of hearings on any subjects as outlined the data should be gone over by a hired expert and all pertinent information therein segregated and compiled with proper and suitable references for use of the committee and placed in the record of the committee hearing on each individual subject.

I believe the first thing the committee should decide upon is whether we shall take up this important subject from the standpoint of immediate relief or from the viewpoint of permanent remedy. I further believe that we should first give due consideration to the immediate relief of the farmers' present condition, and I feel this can be taken care of under the subject of finance, subdivided into domestic credit, foreign credit, and discount loans, and positive immediate relief given to the farmer within a very short time by intelligent action by the entire committee, which will give immediate and satisfactory relief to the farmer.

At the same time, the committee should consider the entire agricultural industry from a permanent remedial standpoint, which, in turn,

will lead into innumerable subjects on agricultural and interrelated industries, which should be considered in an orderly way in accordance with suggestion as outlined above.

I would further recommend that a complete record be kept of all the discussions and hearings of the committee as well as the decisions reached by it.

PETER G. TEN EYCK.

SUMMARY OF AGRICULTURAL AND INTERRELATED PURSUITS BEARING UPON THE AGRICULTURAL INDUSTRY.

(For consideration by Joint Commission of Agricultural Inquiry.)

[By Mr. PETER G. TEN EYCK, June 25, 1921.]

FINANCE.

Mortgages, discount loans—National or State banks, domestic credits, foreign credits, Federal land bank, Federal reserve bank, community financing on warehouse receipts, cooperative banking (interest rates).

TRANSPORTATION.

Railroad (rates, service), highways (building, location), merchant marine, waterways (improvement), joint terminal facilities, cooperation of all four; warehouses, and grain elevators.

MARKETS.

Domestic: Local, intrastate, and interstate.
Export.
Cooperative (cut cost of spread).

COSTS OF FARM PRODUCTS.

Production by farm labor: Planting and sowing, harvesting, and storing.
Purchases: Seeds, implements and machinery, and food supplies.
Marketing; financing; fuel for heat, light, and power—coal, oil, and electricity; total investment; interest on capital; taxes, insurance, and repairs; management and supervision.

ORGANIZATION.

Cooperative bargaining, cooperative buying, cooperative selling, cooperative manufacturing and canning plants, cooperative storage plants or warehouses, cooperative packing houses, cooperative cheese and butter factories.

LABOR.

Supply bureaus: Federal and State; hours, productive and nonproductive; wages; immigration. (Greatest cost entering production.)

IMPROVE PRODUCTION.

Seeds, cattle, poultry, diversified crops, soil treatment, crop treatment, and machinery.

STORAGE.

Farm storage, cooperative community storage, and central corporate storage companies.

STATISTICAL REPORTS.

Federal and State; amount of crops, domestic; amount of crops, foreign; amount of crops stored, foreign and domestic; domestic markets; and foreign markets.

IMPROVE LIVING CONDITIONS.

Education, rural schools, agricultural colleges, modern heating, sanitary plumbing, modern lighting, woman's work, community attractions, churches, social intercourse with neighbors, mail service, telephone service, and improved highways.

FARM PRODUCT PRICES.

Compare cost of production with price sold by farmer and price paid by consumer.

INTERRELATED INDUSTRY PRODUCTS.

Compare cost of production with cost to farmers.

COOPERATIVE MANUFACTURING.

Flour and feed, dairy products, cheese and butter, packing houses, and storage warehouses.

EDUCATION.

Rural schools; agricultural colleges; extension of mail service, Federal and State; bulletins, Agricultural Department; and farm organization.

LEGISLATION.

National; State; local; beneficial; restrictive; reciprocity (international) tariff; taxation; financial—credits; marketing; conservation; manipulation; and improved highways.

DISTRIBUTION.

Commission merchants, transportation, storage, packing, markets, retail stores, and cooperative organizations.

SUMMARY OF COMMITTEES, ORGANIZATIONS, COMMISSIONS, AND BOARDS FROM WHICH INFORMATION MAY BE OBTAINED IN RELATION TO AGRICULTURE AND ITS CONDITIONS.

(For consideration by Joint Commission of Agricultural Inquiry.)

[By Mr. PETER G. TEN EYCK, June 25, 1922.]

DEPARTMENTAL.

Department of State, Department of Treasury, Department of Interior, Department of Agriculture, Department of Commerce, and Department of Labor.

SENATE COMMITTEES.

Agriculture and Forestry, Banking and Currency, Commerce, Finance, Foreign Relations, Immigration, Interstate Commerce, and Irrigation and Reclamation.

HOUSE COMMITTEES.

Agriculture. Banking and Currency. Foreign Affairs. Immigration and Naturalization. Interstate and Foreign Commerce. Irrigation of Arid Lands. Labor. Merchant Marine and Fisheries. Roads.

MISCELLANEOUS.

Secretary of Agriculture of each State. Interstate Commerce Commission. Federal Trade Commission. United States Shipping Board. American Federation of Labor. United States Labor Railroad Board. War Finance Board. Bureau of Farms and Markets. Census Bureau. All farm organizations. Federal Reserve. Federal Farm Loan Board. Chamber of Commerce of the United States. Woman's organizations and housewives.

HOUSE OF REPRESENTATIVES,
Washington, June 24, 1921.

Hon. PETER G. TEN EYCK,
House of Representatives.

MY DEAR MR. TEN EYCK: There will be a meeting of the Joint Commission on Agricultural Inquiry in Senator LENROOT'S office, 133 Senate Office Building, to-morrow, Saturday, June 25, at 10.30 a. m.

I desire also to advise that I have appointed members of the commission to subcommittees, as follows:

Subcommittee to investigate the cotton situation: Messrs. Sumners, Robinson, and Harrison.

Subcommittee to investigate the live-stock situation: Messrs. Capper, Funk, and Ten Eyck.

Sincerely yours,

SYDNEY ANDERSON, *Chairman.*

JUNE 25, 1921.

Hon. SYDNEY ANDERSON,
Chairman Commission of Agricultural Inquiry,
Washington, D. C.

DEAR MR. CHAIRMAN: Your letter of June 24 at hand and noted, and beg to advise that I am very glad to accept the designation on the subcommittee on live stock, with the understanding that this committee is to report and recommend to the committee of the whole as regards the procedure of hearings and the investigation covering the immediate relief of the live-stock situation.

With the kindest personal regards, I beg to remain,

Sincerely yours,

PETER G. TEN EYCK.

JUNE 25, 1921.

Hon. SYDNEY ANDERSON,
Chairman Commission of Agricultural Inquiry,
Washington, D. C.

MY DEAR MR. CHAIRMAN: I take great pleasure in handing you herewith the data which I presented to the committee to-day, and am very pleased, indeed, to inclose you nine copies of the summary of agricultural and interrelated pursuits bearing upon the agricultural industry for distribution to the members of your committee; also nine copies of list giving various sources from which information of interest can be obtained for use by your committee. I am also inclosing you nine copies of my recommendation of proposed organization of the Commission of Agricultural Inquiry, copy of which I sent you yesterday with my letter of June 23, for similar distribution to the members of your committee. I have retained a copy of each of the above for my own files.

You realize that the above information is only submitted for the consideration of the committee as a basis from which to start, and is, of course, subject to such revision and modification as you or your committee deem advisable.

Trusting the above is the information you desire, I beg to remain, with the kindest personal regards,

Very sincerely yours,

PETER G. TEN EYCK.

HOUSE OF REPRESENTATIVES,
Washington, June 28, 1921.

Hon. PETER G. TEN EYCK,
Care of House of Representatives.

DEAR MR. TEN EYCK: This will acknowledge the receipt of your letter of the 25th instant, inclosing copies of memoranda submitted by you to the commission at its recent meeting. I am sending the memoranda to the various members of the commission to-day, with the request that they consider it carefully and come to the next meeting, which will probably be called for Thursday or Friday of this week, prepared to suggest additions or modifications of the program proposed by you.

Sincerely yours,

SYDNEY ANDERSON, *Chairman.*

AUGUST 1, 1921.

Hon. SYDNEY ANDERSON,
Chairman Joint Commission of Agricultural Inquiry,
Washington, D. C.

MY DEAR MR. CHAIRMAN: Along with the compilation of data and statistics which our committee is preparing I would be pleased if you would have made a chart showing the comparison of the increase of railroad returns for the fiscal year and the year 1913; the increase of return upon other industries of the country for the last fiscal year and the year 1913, and the increase or decrease in the return of all farming products for the same periods of time.

In addition to the above, I would like to have the increase in the cost of operation and maintenance of each one of the above over the same periods of time, setting forth the increase in materials used and labor hired, separately, if possible.

We should also ascertain the number of changes and turnovers or the number of people through whose hands the various commodities or products of the farmer pass through from the time they are produced by him until they reach the consumer.

This, I believe, will be rather hard to obtain in all instances, but we can obtain an average number of turnovers for each of the following products: Cotton, wheat, corn, beef, hogs, etc.

The above information, together with a chart showing the cost of production to the farmer, the farmer's selling price, the packer's price, the commission men or warehousemen's selling price, and the retailer's selling price, will give the committee the necessary information to intelligently act.

I will take this up further personally with you when I next see you.

With the kindest personal regards,

Very sincerely yours,

PETER G. TEN EYCK.

OCTOBER 12, 1921.

Hon. SYDNEY ANDERSON,
Chairman Joint Commission of Agricultural Inquiry,
Capitol, Washington, D. C.

MY DEAR MR. CHAIRMAN: Referring to your request that I make suggestions as regards additional topics for the committee to report on, other than what we covered in the report which you are now having printed, beg to advise that in relation to the same I feel that when we consider the committee report we should take up my suggestion to the commission in my letter of June 25, 1921, which I submitted to the committee with my suggestions as regards organization, plan, and scope, in which I detailed the various things which the committee should consider in its hearings, which I feel detailed the subjects quite thoroughly.

The prominent things, however, as per our previous conversation, I beg to set forth as follows: Farm credits and farm banking; transportation rates, transportation service; transportation—water and rail; transportation—joint terminal facilities.

Marketing: Domestic and export; cutting spread between producer and consumer; cost of production to the farmer; farm accounting; cooperative bargaining; labor supply stations; farm stores and cooperative storage on farm and at joint terminals; statistical reports—domestic and foreign.

The appointment of a farm attaché in the American Consul General's offices in foreign countries for the purpose of securing agricultural statistics; farm living conditions; comparison of cost of production and cost of sale of farm products and cost of production and purchase price to the farmers of all commodities used by him; farm educational system on agricultural subjects; improvement in distribution of farm products, by elimination of the handling, and cutting the cost.

All of the above I set forth more in detail in my summary of agricultural and interrelated pursuits bearing upon the agricultural industry for consideration of the committee on June 25, 1921.

Hoping this is the information you desire, I beg to remain, with kind regards.

Very sincerely yours,

PETER G. TEN EYCK.

—

OCTOBER 31, 1921.

Hon. SYDNEY ANDERSON,
Chairman Joint Commission of Agricultural Inquiry,
Capitol, Washington, D. C.

MY DEAR MR. ANDERSON: Referring to the printed report which you have submitted to the Joint Commission of Agricultural Inquiry for their correction and approval, beg to advise that I feel, as expressed to you at the meeting held last Friday evening, that the joint commission should not only issue a report setting forth in a general way from information received the cause of the troubles in the various agricultural pursuits at this time, but should make some definite recommendations as to what should be done, both by the farmer and the consumer, regardless of legislation, and by the legislators to relieve farm conditions and strengthen the agricultural industry of the country.

I believe that we realize that there are several fundamental causes for present-day conditions, such as the following:

(a) Farm credits.
(b) Cost of transportation and service.
(c) Local, domestic, and foreign marketing.
(d) Cost of spread and distribution between producer and consumer.
(e) Cost of production and labor.

So that you may understand more thoroughly what I mean, I will submit for consideration and recommendation in our report several of the things which I believe we should recommend for correction:

1. That suitable banking opportunity should be inaugurated to give to the farming industry of the country the same banking facilities on their turnover that all other industries receive to-day. There is a great need for the extension of time on discount loans to the farmer from nine months to one year. This can be accomplished by authorizing the Federal reserve bank to extend their discount time on farm products to the length of time of their turnover. The extension of credit by local institutions and the establishing of additional facilities where necessary.

2. That suitable accommodations for marketing be established, with a view of lowering the cost of spread so as to reduce the cost of distribution between producer and consumer.

3. Recommend to the farmers that they organize for the purpose of cooperative bargaining.

4. That the railroads reduce their rates on farm products systematically and scientifically, giving due regard to the localities of production and the localities of consumption.

5. That suitable and adequate joint terminal facilities be installed connecting the railway, waterway, and highways, and that sufficient and efficient terminals and proper warehouses be located at export ports with accommodations for farm products to be shipped abroad.

6. That the necessary merchant marine for the transportation of farm products be constructed and operated so that a continuous and even trans-Atlantic and Pacific waterway route to meet the demands of our foreign commerce be established.

7. That public markets be built in each of our cities for the mutual use of the farmer and consumer.

8. That an attaché or Government agent be placed in each consular agency abroad, whose sole duty will be to obtain information as regards the farm industry of that particular locality or country, so that he may obtain authentic information as regards the amounts of crops raised, the amount of produce stored, the amount consumed, the amount imported by the Government and from whom imported, and the amount imported from each country, and such other information as regards the method of growing, kinds of seeds used, and kind of food consumed in his particular locality.

9. That farmers inaugurate a system of cost keeping, so that he may ascertain what crops are most profitable in his locality, with the purpose of growing that which is best adapted to their particular sections.

10. That the farmers cooperate in establishing and building cooperative community storage warehouses to carry their produce from seasons of production over the entire season of consumption, and upon which warehouse receipts could be issued, which would be accepted as collateral at banks, etc., thus standardizing their products of diversified farming.

There are many others of more or less importance which the joint commission will undoubtedly desire to add to this list, which I submit merely for the consideration of the entire joint commission for recommended improvements in the farming industry of the country.

Respectfully yours,

PETER G. TEN EYCK.

—

NOVEMBER 28, 1921.

Hon. SYDNEY ANDERSON,
Chairman Joint Commission of Agricultural Inquiry,
Washington, D. C.

MY DEAR MR. CHAIRMAN: In reply to your request of to-day as regards my suggestion in relation to recommendations as regards our report and the proposed legislation for the extension of credits to the agricultural interests, beg to advise that I feel it is essential that the reserve bank should be authorized to rediscount farm paper for the full time of the turnover of the farmer's products which are given as collateral on his loan at a local financial institution, other than what is known as the three-year turnover of the cattle-raising industry.

I believe that this committee should seriously consider the advisability of restricting all member banks of the Federal reserve bank as regards the maximum interest rate charged their customers on money received from the Federal reserve bank, permitting them to charge only a certain percentage of the legal rate which obtains in their respective States by law in which the loan is made, in addition to the rate which is charged them by the Federal reserve bank.

Very truly yours,

PETER G. TEN EYCK.

—

DECEMBER 9, 1921.

Hon. SYDNEY ANDERSON,
Chairman Joint Commission of Agricultural Inquiry,
Washington, D. C.

MY DEAR MR. CHAIRMAN: Referring to the difference of opinion of the various members of the commission as regards our report on finance, and the opinion of the members that we should make direct recommendations, in accordance with my suggestion, that the various members of the commission submit to you such recommendations they care to suggest for embodiment in the final report, in addition to issuing a statement setting forth a summary of our hearings as regards agricultural credits, I beg to recommend the following:

1. That farmers and live-stock producers be accorded the same banking facilities that all other business men receive.

2. That so-called short-time loans be furnished to them from six months to three years to meet their requirements, extending the loan to meet the time of the turnover on various products of the farmer.

3. That the banking system of the country be so organized that all the banks who loan to the farmers will obtain discount facilities to the fullest extent possible, commensurate with the security which they present.

4. That a medium of discount be established for all the banks which loan to the farmers so that farm paper will have discount rights in the Federal reserve bank.

5. That all the banks that rediscount farm or other paper be restricted as to the additional amount of interest they charge to their farmer customers over that which they pay to the rediscount bank.

6. That banking facilities be provided for the farmer so that his products can be utilized for basic credit to the fullest extent possible, and the banks be authorized to accept loans with proper warehouse certificates as collateral, and suitable and adequate arrangements for the discounting of agricultural paper for the full length of the time of the turnover of the product on which the loans are negotiated.

Very sincerely yours,

PETER G. TEN EYCK.

—

JOINT COMMISSION OF AGRICULTURAL INQUIRY,
Washington, D. C., December 13, 1921.

Hon. PETER G. TEN EYCK,
House of Representatives, Washington, D. C.

MY DEAR MR. TEN EYCK: This will acknowledge yours of the 28th ultimo, containing recommendations with respect to the credit report. I shall be glad to lay the suggestion before the commission at its next meeting.

Sincerely yours,

SYDNEY ANDERSON, *Chairman.*

The CHAIRMAN. The time of the gentleman from New York has expired. The gentleman from Wisconsin [Mr. VOIGT] has 36 minutes and the gentleman from Arkansas [Mr. JACOWAY] 25 minutes remaining.

Mr. VOIGT. I yield 10 minutes to the gentleman from Pennsylvania [Mr. GERNERD].

Mr. GERNERD. Mr. Chairman and gentlemen of the committee, the Nation prospers and advances in proportion as its population conserves its physical strength. The vitality of the race is dependent upon the health of the parent and the care with which the infants are nourished. One of the greatest factors underlying this vital question is the character of our food supply. It has only been in recent years that real serious thought has been given to this subject. The great insurance companies of America have made so many startling observations of the marked decline in the health of men after they pass the age of 50 that the medical profession all over the world began to direct its attention to the causes that produce this alarming fact.

Investigations and careful experiments have demonstrated the unerring truth that we are grossly negligent in the character of the food that we eat. We crave after the things that please the eye and gratify our taste, but which lack the essential quality that preserves our health and insures longevity of life. Apoplexy, heart failure, and Bright's disease have proven far more deadly to the men of 50 than did all the fearful and tragic attacks of the enemy in the late war. Have we forgotten the great crusade that was begun less than 20 years ago and carried on with such relentless zeal ever since to arrest infant mortality? Almost immediately it was discovered that the great cause of this scourge was impure milk which was being fed to babies throughout the land. Every effort was made to correct this startling discovery; there was not a city in the country that did not pass rigid ordinances regulating their milk supply and employ every effective means for its enforcement. State legislatures passed laws for the purpose of enforcing sanitation and inspection of the great herds of dairy cattle in order that the germs of infected cattle might not be transmitted in the food; in addition, a vigorous campaign of education was inaugurated, with the result that thousands of our infant population were saved during the last decade and the general health of the Nation conserved.

It has been demonstrated beyond question that one of the basic foods of our people should be the pure and wholesome

milk of the dairy cow; it possesses a quality of food value essential to real health. We are reliably informed that the American people consume daily but one-half pint of milk per capita, whereas our natural consumption should be a quart a day. Rickets in infants, pellagra, and low blood pressure are the chief characteristics of those suffering from lack of proper nourishment. Men are walking the streets by the thousands apparently in the best of health, who upon physical examination are found to be undernourished, caused by the lack of proper food. As a nation we are just beginning to appreciate the importance of health conservation. This is evidenced by the universal establishment in every community of a well-regulated public health service. Realizing, then, the importance of having a strong, vigorous, and healthy population, and that largely our national happiness and prosperity is dependent upon it, we are considering a bill to-day that presents to us a situation, fraught with real peril, unless we in our wisdom shall promptly act to prevent its further progress.

This bill seeks to prevent the manufacture and sale of filled milk. You will ask, What is filled milk? It is an imitation of condensed or evaporated milk, made by mixing condensed skimmed milk with coconut oil. Condensed or evaporated milk is condensed whole milk, with all of the cream and butter fat as produced from the cow, whereas filled milk is manufactured by skimming the cream and removing the butter fat from the natural milk and substituting in place of it coconut oil. Whenever the cream or butter fat is extracted from the whole milk and coconut oil is substituted the product loses its nutritive value. No one has contended that coconut oil possesses any real food value. Whatever food value this filled milk possesses is in the skimmed milk with which the coconut oil is mixed. We all appreciate the insignificant value of skimmed milk in our daily experiences; everybody conversant with the subject acknowledges that this filled milk substitute possesses none of the high food values that are contained in condensed or evaporated milk; it is a fraudulent substitute. What, then, has prompted its manufacture? During the year 1920, 86,561,000 pounds of this filled-milk product was made and sold, and in its manufacture nearly 8,000,000 pounds of coconut oil were used. It has been shown that it costs 86 cents per case (of 12 cans) less to manufacture this milk compound than pure condensed milk, and that it is sold upon the market in carload lots for $1.40 per case less than is realized for condensed milk. Why, then, should this new product have such a marvelous demand when it has but little of the great food value that is found so abundantly in the legitimate product?

It is easy to understand the reason if we but realized that it costs considerable less to manufacture than that of condensed milk, so that its producers are able to engage in unfair competition with the legitimate producers of condensed milk. Coconut oil sells for 12 cents per pound, while the market price of butter fat is 36 cents per pound. These manufacturers have expended huge sums of money in spectacular advertising, skillfully leading a large public to believe that it is as good a product as condensed milk, and that it is a substitute, selling for less money. So adroitly have they introduced their brands that millions buy the substitute, believing it to be real condensed milk. The retail stores have been selling it for the same price per can as they have been getting for the legitimate article.

Mr. WATSON. Will the gentleman yield?

Mr. GERNERD. Not now, thank you.

It has been shown that 156 stores in the city of Washington have been selling it as a milk product and classing it with condensed milk. Unfortunately very few merchants that sell this compound are aware that it does not possess the same food value as condensed milk, and in their ignorance they stimulate its sale for the reason that they can buy this substitute for $1.40 per case less than they can purchase the legitimate article. These producers of this milk compound nowhere pretend that it possesses any superior quality over that possessed by condensed or evaporated milk, but, on the contrary, every method is employed to deceive the public in believing it to be a similar product and as good as condensed milk.

So successful have they been in the sale of this product and the growing demand for it that they are alarmingly and seriously encroaching upon the legitimate manufacturer who puts forth the real product, that he is in danger of being put out of business or else forced to manufacture a similar article in order to meet this vicious and growing competition. It is a most palpable fraud upon the public and a great injustice to the manufacturer of condensed milk.

Thousands of mothers are compelled to use condensed milk in the feeding of their infants, and through many years of persistent efforts and experimentations whole milk has been placed upon the market free of all impurities and still retaining the great nutritive value that fresh milk possesses. To-day thousands live in tenement houses and apartments where the question of a fresh milk supply is a most difficult and serious problem. There are many localities throughout the country where it is impossible to serve fresh milk. This is especially true in many of our mining localities who are far removed from pasture lands. Under these circumstances it was but natural that condensed and evaporated milk should find an established place in so many of our homes. The people have learned its use with perfect safety and appreciate its wholesomeness. It has become an indispensable part of the family table. Everyone has absolute confidence in its food value. So universal has become its use that last year we consumed approximately 1,500,000,000 pounds of condensed milk.

How can we, then, in view of these facts, permit an imitation milk product which to all appearances possesses all of the characteristics of real condensed milk as to color, taste, and consistency and which requires an expert to make a chemical analysis in order to discover the deception?

Are we going to exercise a rigid supervision over our fresh milk supply by having daily inspectors inspect the milk and determine whether it has been watered or tampered with and whether it contains at least a butter fat of 3 per cent, and then, on the other hand, permit the manufacture of a milk compound that is free of the essential ingredients that we demand in our fresh milk supply? Such a situation is plainly unjust and inconsistent.

These producers of milk compounds would have you believe that they are a great aid to the dairy industry of the country, because they allege that they consume about 200,000,000 pounds of skimmed milk per annum in the manufacture of their product. To my mind nothing could be more absurd than such a contention, for any inferior and deleterious product that is sent forth in the market in competition with the legitimate product is not a stimulus to that industry, but is a serious menace and maliciously destructive. Shall we permit these men to continue to profit at the expense of the Nation's health and the many years of toil and persistent efforts of the dairy farmer? Are we going to hinder the growth and further development of this life-preserving industry? Are we going to stand by the farmer who by great vigilance watches his herd, gathers his milk, and sends it to the market to feed us, or are we going to embarrass him by permitting a fraudulent substitute competing with his real product? Shall we permit the innocent babe to drink this foul and deceptive imitation? It is a most nefarious enterprise, and I trust our action here to-day will put an end to these conscienceless promoters who would build castles of wealth over the dying babe that struggles for life while innocently drinking this concoction of coconut oil while its anxious and loving mother wonders why its little cheeks are falling in and its lifeless limbs appear so withered. Let us stand by the babe of the Nation and the dairy cow. [Applause.] May her marvelous stream of life-giving milk ever flow on in all its purity; may she always continue to impart the God-given gifts as she gathers them in the green pastures amid the sweet-scented flowers and the babbling brook, and in that mysterious way of nature transmit to humanity life, happiness, and a spark of the Divine. [Applause.]

Mr. JONES of Texas. Mr. Chairman, I make the point that no quorum is present.

The CHAIRMAN. The gentleman from Texas makes the point of no quorum. The Chair will count. [After counting.] One hundred and twenty-two Members present, a quorum.

Mr. VOIGT. Mr. Chairman, I yield 10 minutes to the gentleman from Minnesota [Mr. CLAGUE.]

Mr. CLAGUE. Mr. Chairman and gentlemen of the committee, the reason I am in favor of the present bill is that it is going to wipe out a product that is and has been placed upon the market and sold to the people as a food substance known as filled milk, which is a deception, a fraud, and a counterfeit. It is not the natural product. It is made by taking all the butter fat out of the real milk and then putting in the lifeless skimmed milk, a counterfeit substance, in place of the butter fat, and this resembled product, or filled milk as it is called, is an exact imitation of real milk. In many places it has been sold as cream and sold in bulk. I happen to be a member of the Agricultural Committee and had the privilege of hearing all the evidence that was given before the same. During the time that the hearings were held I made a little investigation around the city of Washington for the purpose of finding out whether or not this substitute was sold in the city of Washington. Several of the witnesses who appeared before the committee in opposition to the bill stated that this substitute was just as good as the average condensed milk. Here is a can

of Carnation brand of evaporated milk. I also have before me a can of Hebe, or a substitute known as filled milk. You will observe that the substitute looks the same as the genuine evaporated milk, and if any of you gentlemen can tell the difference in taste or any difference in the appearance, I would like to have you do it.

Mr. RAKER. The Hebe looks a little more like cream.

Mr. CLAGUE. Perhaps it does in this instance, but they ordinarily look the same. As I stated, I made an investigation about a year ago, going to 25 or more stores in the city of Washington, most of them on the outskirts. In all of the stores I asked for evaporated milk, and in at least two-thirds of them they stated that they did not have the Carnation or the Borden brand of evaporated milk but they had a substitute which was just as good. The substitutes were Nutro, Hebe, and other brands of filled milk. In most of the stores the substitute was being sold from 1 to 2 cents lower than the pure-milk brands. I was invariably informed that these substitutes were just as good as evaporated milk, and were just as good for all general purposes. I made an investigation at one of the leading stores on Pennsylvania Avenue and asked for evaporated milk, and the storekeeper stated: "I don't have Borden's or Carnation. I usually carry them, but I have here the Hebe, a substitute, which is just as good for all purposes." It was about that time that the labels on the cans were changed. About a year ago these substitutes did not have on the cans the words, "Do not use in place of milk for infants," but it was printed on the cans that the substitute was good for all general food purposes, and it was sold to the patrons for the use of children and for all food purposes. In many instances I purchased cans of the substitute filled milk, and upon examination I found it impossible to tell the difference between the substitute and the genuine article. The substitute is made the same color, so that the ordinary person can not tell the difference in appearance. The same amount of solids are used in it that the law requires for evaporated milk. It tastes and looks like pure milk. The housewife can see no difference, because it takes an expert to tell the difference between the fraudulent substitute and real milk.

There is the trouble. This substitute is a pure deception, a fraud, and a counterfeit. In these substitutes the whole butter fat is taken out. There is no life-giving substance in it, and therefore if it is not good for infants it is not good for adults.

The gentleman from Virginia said something about its not being good for infants. What is the natural food for infants? All will admit that it is milk. When a mother goes to the store and buys this substitute and it is sold to her as it has been in the past for something just as good as pure milk, that is a deception and a fraud and should be prohibited from being sold.

I made another investigation within the last 10 days in this city, going to most of the stores that I visited about a year ago. I found that I could not buy a single can of Hebe or other substitutes in any of these stores. I went to the same store on Pennsylvania Avenue that I did a year ago and asked for Hebe or a substitute milk, and the storekeeper stated: "My friend, I am not selling it any more." I said, "But you said last fall that it was just as good as the real milk." He stated, "I have learned that it is not and the Government has put it out of business. It was represented to me, when I bought it, to be just as good as the real milk and I sold it honestly, believing it to be so. But I have since found out that it is not."

I went out on Fourteenth Street to some other stores on the outskirts where they have been selling it, and was informed by the various merchants that they did not keep it in stock and were not selling it, that they had found out that it was a fraud and they did not want to impose it upon their customers, and as a result of my visit to 31 stores within the last 10 days I could not purchase one can of this substitute, filled milk, which shows that either the merchants of this city want to do an honest business or that the people have learned that this substitute is worthless and will not purchase the same.

Mr. RAKER. Will the gentleman yield?

Mr. CLAGUE. Yes.

Mr. RAKER. How did the Government put this man in the Pennsylvania Avenue store out of business?

Mr. CLAGUE. Well, the Government did not put him out of business, but the substitute was found to be a deceptive product and the Government put certain regulations in the way of requirements on the labels. People became better acquainted with its being a deception, and no doubt the merchants did not care to handle it and thereby deceive their customers.

Mr. RAKER. The gentleman has poured out in a glass some of this substitute called Hebe and also poured out in the glass a can of the Carnation evaporated milk. The Hebe looks like delicious cream, and nutritious. I would like to ask the gentleman if there is any nutrition in this substitute?

Mr. CLAGUE. Professor McCullom, who appeared before our committee, says that it has no nutritive value; that a rat fed on it for 60 days would die. You can test these two—one is pure Carnation evaporated milk; the other, Hebe, is a filled milk, a substitute for milk. You will see that the Hebe has a very creamy color and a creamy taste, but is wholly void of butter fat or vitamines. It tastes as good as the finest of milk, but is a fraud in so far as having any nutrition substance. Gentlemen of the committee, there is only one thing about it, and that is that this filled milk is a pure fraud, and the fraud is largely perpetrated upon the ignorant and poor people. The ignorant people in the cities to whom it is sold know nothing of the merits of the same. They are buying it, believing that it is fully as good as the real milk, and supposing that it is good for children and for cooking purposes and that it is legitimate evaporated milk, when, as a matter of fact, they are getting something that contains no life substance whatever. This substitute is being largely manufactured and has tended and is now tending to injure the sale of genuine milk. All legitimate creamery men are opposed to its sale. Our farmers are opposed to the substitute for the reason that it is a counterfeit and a fraud, and I am firmly of the opinion that the great mass of people would not buy it if they understood that it had no nutritive value. I am opposed to the manufacture and sale of these substitutes for the reason that they are valueless as a food product, deleterious, and injurious to the public health.

Mr. JACOWAY. Mr. Chairman, I yield five minutes to the gentleman from Mississippi [Mr. SISSON].

Mr. SISSON. Mr. Chairman, I think there is only one question in this whole proposition for us to consider, and that is whether or not this is a deleterious food. If it is not a deleterious food, even though it does not have all of the food value that good, fresh milk has, then it is nothing less than a crime to stop its manufacture. I say that it is a crime; and I want it understood that I mean that in its length, breadth, and thickness. I do not think there is a more infamous creature on the face of the earth than one who would make either food, clothing, or building materials scarce. All wealth is made up of those three things—food, clothing, building material. Some of the modern political economists add fuel; but, as is said by Smith, fuel produces heat, which is a substitute for clothing and is used to manufacture clothing and to prepare food and building material, and it ought not to be put in as a separate class of wealth. Every human being ought to know that anything which tends to make food, clothing, or building material scarce is an enemy to the human family. The problem in the next few generations is going to be whether or not you will be able to feed the world, whether they will be able to get a proper amount of good food supplies.

Only a few years back it was contended that the tomato, which was then known as the love apple, was poison, and there were men who thought it an outrage to try to perpetrate that horrible food upon the people. If they had had men in Congress at that time that we have here now, there would have been somebody rising up and saying we should pass a law to protect the people against that horrible poison. There is not a reputable physician who has investigated this matter who will tell you that "filled milk" is a deleterious food for man. Not a one. They say it is not good for babies. No. But are you going to stop the sale of breakfast bacon because breakfast bacon is not good for babies? Turnip greens is a good food, but it is not a good food for babies.

A MEMBER. What is that?

Mr. SISSON. Turnip greens. Why, Mr. Chairman, a gentleman who expresses ignorance on turnip greens is not fit to be in Congress. [Laughter.] Those people who come here to-day making a great outcry about this article of food upon the theory that it is deleterious to babies are putting up as much of a camouflage as they say the manufacturers are committing on the people in selling the article itself. They know they do not oppose it because of any such thing as that, but they favor this bill because this food is coming in competition with dairy products. Why not have the nerve to tell the truth about it? Why run around and get experts to come here and say that it is deleterious? You know very well that it is not deleterious. There is not one of you who does not know that it is not deleterious, and yet you want Uncle Sam to come along and protect you against competition. You never give the people who want cheap food a thought. A great many manufacturers of clothing in this country manufacture and sell clothing which they say is all wool and a yard wide and warranted not to run down at the heel, when there is not a single thread of wool in it.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. JACOWAY. Mr. Chairman, I yield five minutes more to the gentleman.

Mr. SISSON. Take socks. They are sold all over this country, and stockings, too, as being all silk, and the label on the box says that they are all silk, when there is not a single fiber in them that was not, perhaps, raised down in my cotton patch in Mississippi. It is nothing but mercerized cotton. I see a pair here now, nice-looking socks, with not a line of silk in them—all Mississippi or southern cotton—and yet these same people are in here yelling like a lot of Comanche Indians about this foodstuff not being labeled right. I do not object to your labeling it just as it should be and I am willing to require every article sold to bear a true label.

Mr. CHINDBLOM. What is the label on the can?

Mr. SISSON. Oh, there is too much of it there to read now. It will take up too much time, but I will hand it to the gentleman and let him read it at his leisure. When a contest arises like the contest a few years ago between two baking powders, it is something that is likely to ruin splendid reputations. Two men of national reputation got into a contest over baking powder. The contest was fierce. It came near ruining one administration since I have been in Congress. The Secretary of Agriculture said that one baking powder was good and the other bad, and a certain noted physician took the other side—one saying it was good and the other saying it was bad. In other words, the matter was a conflict between two selfish interests. If one won, he had a monopoly and a fortune; if he lost, he lost all and was ruined. This is the same fight here.

The constituent elements that enter into this compound, under the pure food law, ought to be put on the label on the can. I do not believe it should be necessary to put on there a legend to the effect that it is not good for babies. On the contrary, I think it would be an outrage to put on a legend that it is good for babies. If they want to, let them say that it is not to be used in coffee or for babies.

Under the English law the principle of caveat emptor, which applies in America, does not apply. Caveat emptor is the horse swappers' law in America. It means that when you buy a horse from a fellow you better beware. You buy or swap for him at the end of the bridle. Caveat emptor applies in all of our business, and more frauds have been perpetrated on people in America than in any other country in the world. Ours is the only country on earth where they will not take our samples for the entire contents of whatever package we are selling.

Why, because caveat emptor does apply. My view of the matter is that every State in the Union ought to pass a law providing that whenever one buys a piece of clothing as all wool it ought to be all wool, and if you can prove it is cotton, he ought to be sent to the penitentiary for obtaining money under false pretenses. Our business ought to be straight and square. Here you are endeavoring to destroy a food which no reputable physician will say is bad. Something has been said about rats. Why, bless your soul, you can take rats and give them an exclusive diet of fresh condensed milk every morning and they die as quickly as if you gave them this food in this can. In other words, no man can live on one kind of food. You are not giving the rat half a chance on one food. Corn bread is mighty good, but you can not live on it alone. Man can not live by bread alone. You have to have a little meat—a Chicago beefsteak mixed with it.

The only test here ought to be whether this food is deleterious. If it is not deleterious, I do not care about its food value, whether it is as valuable as milk or not. If it is food and is good food, I say to you Congress is committing a crime, nothing less than a crime to endeavor to destroy its proper use, because the man who makes two blades of grass grow where only one grew before is a blessing to humanity.

The CHAIRMAN. The time of the gentleman has expired.

Mr. VOIGT. Mr. Chairman, I yield three minutes to the lady from Oklahoma [Miss ROBERTSON]. [Applause.]

Miss ROBERTSON. Mr. Chairman, a few moments ago I crossed over to the other side of the House to inquire of gentlemen from North Carolina whether very much of this stuff [holding up the can of filled milk] was used in their State. You remember perhaps that statistics of the late World War showed that of men called to the colors the North Carolina contingent were nearer physically perfect, taller, and more free from disease than those from any other State.

Down in Oklahoma quite a number of our citizens were originally from North Carolina and they maintain this splendid standard. I have never known a North Carolinian who did not insist on good milk and plenty of it.

Just now as I was talking with those two tall North Carolina men over there, who had never made the acquaintance of "filled milk," we exchanged reminiscences of corn bread and buttermilk till we all felt half starved together. Do you know what sort of corn bread and buttermilk we meant? Corn bread made from hard white corn ground in an old-fashioned mill and buttermilk where the whole Jersey or Guernsey milk is put in a stone churn, with a dasher, and allowed to reach just the right point, and then when the butter is taken out after churning little golden flecks of it are left in the buttermilk. Out of pity I stop here without more reminiscences so tantalizing to those of us born and bred in Dixie.

Now, to consider this question by the Bible standard of milk for babies and meat for strong men. The Good Book says "babes have need of milk and not of strong meat," for "strong meat belongeth to them that are of full age." The babies—are you going to feed them this stuff? Shall poor mothers, unable to read the labels, misguided by the looks of the container, and deceived by the retailer, starve the babies? I have used quantities of these milk substitutes in cooking. They make very good custards, the richness of eggs supplying to a sufficient extent the butter fat that is removed. In the same way they make very good gravies and very good sauces, where fats and thickenings are used in preparing food for grown people. But they are not fit for babies.

Shall we starve babies in America for commercialism? Piteous appeals come to us all the while for the starving children of other lands, to send preserved milk to children in the Near East, to children in Russia. I am positive no filled milk is sent from America to them. Did you ever think of comparing pictures of these starving children with pictures that might be shown of the helpless little children among the poor people of our great cities, who must depend upon the corner grocery and the tin can for food, whose mothers can not read the label on the can? Think of the babies whose mothers can not give them that wonderful sustenance—breast milk—and must give them instead some other food.

I think, too, of the Indian mothers of our country whose lives are so changed since to many of them a "farce" of civilization came, by which, instead of the old free, outdoor life, with its nature-provided food, they now have the same insidious dangers in the unbalanced foods of so-called civilization to meet, and their dark-eyed babies must be starved, too, the doomed race sooner passing away. Perhaps the greatest number of babies of any one class to be affected are the negro babies of the South.

There are so many would-be reformers in these days who are trying to push the legalizing of birth-control teaching. The sale of this milk should appeal to them, for surely it will dispose of many thousands of "unwanted babies"—not unwanted by their mothers, but unwanted in America, if we may believe the advocates of birth control.

I realize that in this bill there are very dangerous complications so far as possible infractions of the Constitution may be involved. I am not one who would do away with all substitutes. As I have said, filled milk will do for food for adults, but not for babes. For instance, from the vegetable oils of our great Southland, from cotton seed and from peanuts, there come some of the best foods in the fat elements necessary for balanced diet that are available. For many years we paid fancy prices for our peanut and cottonseed oils which journeyed oversea, as many good Americans go, to return with a foreign title, and receive an immediate recognition, where before their value had not been considered.

Even further north, in the corn belt, we have unexcelled vegetable oils that we find may be used more wholesomely than the same grains produced metamorphosed into animal fat by way of the hog.

So I do not wish to be understood as objecting to the sale of substitute products except where we shall starve our babies. I am speaking not as a wise interpreter of the Constitution or of commercial law, but as one who would call attention to the need, if it can not be done by national legislation, of State regulation that will care for the babies.

Mr. VOIGT. How much time have I remaining?

The CHAIRMAN. The gentleman has 14 minutes remaining.

Mr. VOIGT. I yield to the gentleman from Ohio [Mr. CABLE].

Mr. CABLE. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The extension of remarks referred to are here printed in full as follows:

Mr. CABLE. Mr. Speaker, the result of the new 3 per cent restrictive immigration law is startling. In the last fiscal year without this law in force the net increase of immigration was more than one-half million. For the first nine months of the present fiscal year, operating under this 3 per cent law, the net increase is but 80,000. Strange to say, this increase consists entirely of women and girls. The male immigrant aliens admitted do not equal those who have departed; the female immigrant aliens admitted exceed in number those who departed by the 80,000.

The laws of the United States should be amended to permit these women to become citizens of the United States. In addition, there are more than two and one-fourth million female aliens 21 years and upward in the United States who are not naturalized. Under our law any woman who marries a citizen of the United States and who might herself be lawfully naturalized automatically becomes a citizen. This citizenship by marriage may be acquired without the woman being able to speak our language, without a study of our Constitution, and without even appearing in court and renouncing allegiance and fidelity to her foreign ruler, and without taking the oath of allegiance to the United States. Naturalization papers may be legally filed by an unmarried woman who is otherwise qualified, or by the widow of a foreign-born person not naturalized, but not by a woman during the existence of her marital relation.

I have introduced a bill granting to married alien women the independent right to be naturalized. A naturalization proceeding is an education in our language, laws, and form of government. The mother is best qualified to teach her children the true meaning of America and what it stands for. Married women, in my opinion, should have the independent right to be naturalized.

The last amendment to our Constitution provided that the right to citizens of the United States should not be denied or abridged by the United States or by any State on account of sex; but under the present law alien married women are denied the independent right to naturalization and the equal suffrage that goes with it unless they are naturalized through the naturalization of their husband.

Our law also provides that an American woman who marries a foreigner shall take the nationality of her husband, and that at the termination of the marital relation she may resume her American citizenship, if abroad, by registering as an American citizen within one year with a consul of the United States or by returning to reside in the United States; or, if residing in the United States at the termination of the marital relation, by continuing to reside therein.

The bill I introduced also provides that a woman citizen of the United States, who hereafter, being then a resident of the United States, marries an alien who may be lawfully naturalized shall remain a citizen of the United States so long as she continues to reside therein, unless she makes formal renunciation of her citizenship before a court having jurisdiction over naturalization of aliens. If at the termination of the marital status she is a citizen of the United States, she shall retain her citizenship regardless of her residence. If during the continuance of the marital status she resides continually for two years in a foreign State of which her husband is a citizen or subject, or for five years continues outside the United States, she shall thereafter be subject to the presumption that she has ceased to be an American citizen.

The fact that a woman is married should be no reason to deny her the right of citizenship in the United States through naturalization proceedings if she is an eligible alien. Marriage of a citizen of the United States to a foreigner should not of itself terminate her citizenship. The laws of our country should grant independent citizenship to women.

Mr. VOIGT. May I ask whether the opposition has used up all of its time?

The CHAIRMAN. The gentleman from Arkansas has 15 minutes remaining.

Mr. VOIGT. I would like the gentleman from Arkansas to use some of his time.

Mr. JACOWAY. I think the argument on this side is concluded.

Mr. HARDY of Texas. I would like to take two or three minutes.

Mr. JACOWAY. I will yield the gentleman five minutes.

Mr. HARDY of Texas. Mr. Chairman and gentlemen of the committee, I do not know that much can be added to the argument, but it seems to me the lady from Oklahoma a moment ago supplied an argument against this bill instead of for it. She is for the babies. So am I. But I believe that all legislation that enhances the cost of better milk puts an obstruction in the way of the poor parent who wants to get pure milk for his baby. Now, if by this legislation you destroy any competitor of this article that might enter into competition with the milk producer, the dairyman, and thereby reduce the price of real milk, you will help put out of the reach of the poor parent the opportunity to buy cheaper milk. Here is this product that comes in competition and has the tendency to cheapen the price of real milk. Every time you drive a competitor out of the market you enhance the price of genuine milk. And this commodity has printed on the label of it that it is not good for children or for babies. Consequently nobody is being fooled. So that the only effect of this bill is by destroying competition you enhance the price of the baby's milk, and that, I take it, is the purpose of the bill.

I am as much opposed to any fraud as anybody on this floor can be.

If this was presented to the people as milk, if it did not carry on its face the warning that it is not good for babies, then I would be in favor of some bill requiring it to be so stamped. But I tell you that when the Congress lends itself to the putting out of the way of certain industries in any competition, we are stooping to a small business and to a purpose that in the end will return to plague us, for we do not know how soon it will be when your section or mine—and I am not interested in this matter—may have some product that is harmless but good for some things and not for others, and it may come in competition with something else that wants to drive it out of the market. And it is evident to me, from what I have heard, that the dairymen, wanting to raise the price of their commodity, want to get rid of a competitor that helps to reduce the price. Here is a competitor stamped on its face that it is not good for babies, can not be abused, can not be a fraud, sold on its merits for what it is worth, and the lady from Oklahoma says it is good for pies and custards; so why not let the public have it for that purpose? Why not let the man who uses it have it?

I have eaten coconut butter. I do not know whether or not it was good for sustenance, but I ate it when I could not get good butter, and really I preferred it to some butter. I do not think anybody should have the right to come in and say that if I wanted to eat it I should not have the right to eat it. If it is harmful and poisonous, forbid it. But nobody has said this substance we are driving out is harmful, and the label carries what it is on its face. It seems to me that we are aiding one producer against another producer when by the laws of equity and our own ideals of fair play in this free country we ought not to do it. It looks to me as if we were going outside of the proper function of government, whether it is constitutional or not, and therefore I do not think this bill ought to pass. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. VOIGT. Mr. Chairman, I yield to the gentleman from New York [Mr. REED].

Mr. REED of New York. Mr. Chairman, there are two points which I have considered of controlling importance in urging the enactment of the Voigt bill. One is the self-evident fact that every manufacturer of the compound of skimmed milk and vegetable oil as coming under the definition of filled milk written in this bill, seeks to market his product just as nearly in the form and semblance of milk as is possible. I am not satisfied to give a clean bill of health or a clean bill of business morals or ethics to any business which seeks to make a financial profit out of a traffic of this self-evident counterfeit character. I have several good-sized cities in my district and I know that this product is being sold generally in the stores in those cities, and it is my belief that it is being sold generally for what it is not and that the purchasers generally think they are getting milk or something as good as milk, and the evidence which has been presented to the House Committee on Agriculture and the House Ways and Means Committee convinces me that this product is not as good as milk and ought not to be permitted to be sold. The man, woman, or child who goes to a store to purchase milk should be protected against any attempt to foist on them a substitute that does not contain the nourishing elements of genuine milk.

The second fact is that the public does not understand that there is a surplus of farm products in this country and that the production of farm products can not be controlled by closing the factory door and sending the workmen home until there is a shortage to bring up the prices. The farms must be operated, and I take it that it is one function of the Congress of the United States to aid in every possible way to improve the marketing conditions and add to the market for the products of the farms. The chief agricultural product of my district, excepting a small section, is milk. Milk for fluid milk consump-

tion, milk for the manufacture of butter, and milk in a much smaller way for the manufacture of cheese. I know that these farms must keep on producing. The importance of the continued prosperity of these dairy farmers is so great, not only to themselves and their families but to the business interests of my district and the country, that I know that I am justified in thinking of the larger importance of improving the market for milk in supporting this measure.

Mr. JACOWAY. Mr. Chairman, I yield one minute to the gentleman from Virginia [Mr. TUCKER].

Mr. TUCKER. Mr. Chairman, I rise merely to put in the RECORD a suggested amendment.

The CHAIRMAN. The gentleman asks to have the Clerk read in his time an amendment for information. The Clerk will read.

The Clerk read as follows:

Amendment by Mr. TUCKER: Page 2, line 11, strike out the words "or to ship or deliver for shipment in interstate or foreign commerce."

Mr. VOIGT. Mr. Chairman, I yield three minutes to the gentleman from Wisconsin [Mr. BROWNE].

Mr. KINCHELOE. Mr. Chairman, I make the point of order there is no quorum present.

The CHAIRMAN. The gentleman from Kentucky makes the point of order there is no quorum present. The Chair will count. [After counting.] One hundred and nine Members are present—a quorum.

The gentleman from Wisconsin [Mr. BROWNE] is recognized.

Mr. BROWNE of Wisconsin. Mr. Chairman, one-fifth of the Nation's food supply comes from dairy products, and it is, of course, important that these dairy products are pure and not adulterated. What do the filled-milk people do? In the first place, they extract the butter fat, the cream, the valuable vitamine product, out of the milk and leave the milk absolutely without nutrition to speak of. And this substitute for milk can not be detected by any person except a chemist upon examination.

Now we know that throughout the United States to-day, in every State that has not outlawed it, they are selling filled milk, and the majority of people who are buying it think it is pure milk with the valuable life-giving, growth-producing vitamine product contained in it. Even the Government of the United States was deceived and defrauded in the State of Ohio during the war, when it bought two carloads of condensed milk for boys at Camp Willis and they thought it was pure, unadulterated milk, when it turned out to be filled milk. So our boys were being fed a product to build them up and make fighting men of them that did not contain enough nutrition even to support the life of a rat, as was shown by Professor McCullom's demonstration.

The filled-milk industry is growing very fast. In 1917 we produced only about 35,000,000 cases of filled milk, and in 1921 we produced 86,000,000 cases of this filled milk, and if we continue at that rate it is going to drive legitimate manufacturers of full condensed milk out of the market, as several of the large manufacturers have said, among them the Borden people. It is also going to substitute the coconut cow for the Jersey or the Guernsey or the Holstein cow. You can manufacture this filled milk, as the evidence shows, for 2 cents a pound can. Think of it for a minute! And you can place it on the market and make it an object to the retail dealers to sell it a good deal cheaper than they can sell the other milk, and, of course, they will make a larger profit. Therefore many retailers are substituting filled milk for whole milk. In the State of Wisconsin, where they made an investigation in preparing their case for the Supreme Court, they found in 15 cities 65 cases of fraudulent sales of this milk.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. BROWNE of Wisconsin. Yes.

Mr. WALSH. Where do the manufacturers get this skimmed milk?

Mr. BROWNE of Wisconsin. From the farmer.

Mr. WALSH. The very man that is in favor of this legislation.

Mr. BROWNE of Wisconsin. They buy the full milk of the farmer and extract the cream and sell the cream and keep the by-product, the skimmed milk, and add the coconut oil in place of the cream. A law prohibiting the sale or manufacture of filled milk was sustained by the supreme court in the State of Ohio. The case went to the Supreme Court of the United States, and the highest court in the land sustained the State law. [Applause.]

Mr. Chairman, I am in favor of this bill to prohibit the manufacture of filled milk in the District of Columbia or its shipment in interestate or foreign commerce.

I favor this bill because it will protect the public from a counterfeit that when used in place of milk will undermine health, especially the health of children.

The public is unfamiliar with the term "filled milk." It is an imitation of condensed or evaporated milk. It is made by robbing milk as it is taken from the cow of its butter fat or nutritive value. In other words, the cream is skimmed off and coconut oil or peanut oil, or buttermilk and soda is substituted. The milk is then made into condensed or evaporated milk and sold in competition with condensed or evaporated milk made from the whole milk with its butter fat and its valuable and life-giving vitamine ingredients. This compound, which is known as filled milk, is a perfect physical imitation of pure evaporated milk, and it is impossible for anyone except a chemist to tell the difference between pure evaporated milk and the filled milk containing 6 or 8 per cent coconut fat in place of cream or butter fat, which has been extracted from the milk and sold.

Second. I favor this bill because it places the dairy farmer in unfair competition with the manufacturers of a product which no one except a chemist can tell from the original, and which can be manufactured at one-fifth of what it takes to produce the genuine article.

MANY STATES HAVE OUTLAWED FILLED MILK.

Already 11 States, representing a total population of 31,330,197, have passed stringent laws prohibiting the sale and manufacture of filled milk within their territory. These laws passed by the States have been bitterly contested, both in the legislatures and the supreme court of the States. So far as this legislation involving the constitutionality of the laws prohibiting the manufacture and sale of filled milk has been tested in the courts, the law has been sustained.

In a recent case in Wisconsin, which is now under advisement by the supreme court of that State, the referee's report dealt chiefly with the product Hebe, manufactured for the Hebe Co. by the Carnation Milk Products Co. This brand of filled milk is one of the six or seven leading brands of skimmed-milk compounds. The referee who reported on the Wisconsin case found from the evidence that this brand of filled milk was not a desirable or proper food for infants nor was a complete substitute for milk.

Ohio passed a filled-milk law which was upheld by the Supreme Court of the United States in the case of Hebe Co. et al. against Shaw, Secretary of Agriculture of Ohio, et al., reported in volume 248, United States Reports, page 297, sustaining the Ohio law, which forbids the sale, and so forth, of filled milk.

Doctor McCollum, of Johns Hopkins University, a very high authority on the subject of nutrition, testified before the Agricultural Committee that the vitamines that are absolutely necessary to promote growth in the human body are found most abundantly in butter fat, and that milk is the chief article of food relied upon for vitamine; that there is no effective substitute for milk; that filled milk is almost entirely lacking in vitamine. Doctor McCollum was corroborated by Dr. E. B. Hart, of the University of Wisconsin, another authority on the subject. Professor Hart says in his testimony that at least 90 per cent of the fat soluble vitamine of the whole milk is removed in the modern commercial skimming process.

Filled milk is sold under the various trade names, such as Hebe, Carolene, Enzo, Silver Key, Nutro, Nyko. These imitations are put up in the same size cans as regular condensed milk and are advertised by retail dealers as evaporated milk. In five cities there were 340 separate advertisements by 53 retail groceries of these brands of filled milk.

In the case now pending in Wisconsin it was shown that there were 65 instances of fraudulent sales made in 16 different cities in Wisconsin.

NO REMEDY EXCEPT BY PROHIBITING SALE.

It has been thoroughly demonstrated that imitation milks, with their history of misrepresentation and their unquestioned inferiority in nutritive value, can not be made safe for the public by proper labeling but must be prohibited altogether. Filled milk has been shown to be of an inherently fraudulent nature.

It has been put out as a substitute for the product for which it is a perfect physical imitation. It has been shown to be sold at retail and advertised by retailers in a fraudulent manner. It is not only an imitation and a substitute of a most important food that has been supplied by nature for the use of mankind, but it is pronounced by chemists and authorities on nutrition as an inferior imitation and lacking in nutritive value, which brings its manufacture and sale into vital relationship with public health.

EXTENT AND SALE OF FILLED MILK.

The Bureau of Markets shows that the sale of filled milk in 1917 increased from 35,031,902 cases to 86,561,000 cases. In 1920, 8,000,000 pounds of coconut fat were used in the manufacture of filled milk, taking the place of as many pounds of butter fat or cream. Some of the largest manufacturers of evaporated milk in the country state that unless Congress and the several States do something to stop the competition that they will have to go into the business of manufacturing filled milk or go out of business.

WILL EVENTUALLY RUIN THE DAIRY INDUSTRY.

Besides the amount of filled milk that is sold in this country, we are exporting large quantities. In 1919 we exported 850,865,414 pounds of full or unadulterated condensed milk, while in 1920 we only exported 414,250,021 pounds, or less than one-half of the amount. In the last few years the amount put out of filled milk has grown over 5,000 per cent, and the manufacturers of filled milk admit that the business is only in its infancy. The obtaining of milk from the coconut cow is a cheap process compared with producing milk from the Jersey, Guernsey, or Holstein.

The cost of a quantity of skimmed milk and coconut fat sufficient to fill 48 cans of filled milk is a little over 80 cents, or less than 2 cents per pound can. The retail price of 1-pound cans, which cost the producer 2 cents, sells for from 10 cents to 12 cents per pound. Thus the manufacturers of filled milk can sell their product below the cost of production of the unadulterated milk and make an exorbitant profit.

IMPORTANCE OF DAIRYING TO THE PEOPLE.

Dairying is engaged in by over one-half of the farming population of the United States. The milk produced in 1919 in the United States had a cash value to the producer of more than $2,000,000,000.

The dairy industry is connected more closely with the lives and health of every community and the national welfare than any other. The milk supply of every community is of vital importance to the health, happiness, and welfare of that community. Dairy products furnish the people with one-fifth of their food, and its bearing upon human health, particularly of children, has not been adequately appreciated, as indicated by the experience of the late war.

Herbert Hoover, who as head of the Relief Committee of Europe had great opportunity to observe the beneficial effects of milk as food, says:

In its broad aspect, the proper feeding of children revolves around the public recognition of the interdependence of the human animal upon its cattle. The white race can not survive without dairy products.

FOOD VALUE OF MILK.

The State Board of Education and the Superintendent of Public Instruction of California made one of the most thorough investigations of the nutritive value of milk. This test was made in the schools of Los Angeles and the report was summarized as follows:

MILK.

Increases body weight.
Increases rate of growth.
Increases physical skill.
Increases mental alertness.
Increases rate of school progress.
Increases resistance to disease.
Increases social adaptability.

Outstanding among the facts in this survey are the following:

Four and thirty-eight one-hundredths per cent of the children receiving no milk were found to be over the average graduation age, while only 1.38 per cent of the milk-using children who received 1 pint daily were over this age.

Eight and eight hundred and two one-thousandths per cent of the children receiving 1 pint or more of milk a day were ahead of their normal grade.

Seven and eight hundred and seventy-nine one-thousandths per cent of the children receiving one glass of milk a day were ahead of their normal grade.

Milk-using children can be forced in their school work with less ill effect upon their height and weight than nonmilk-using children.

There are two milk-drinking children ahead of their normal grade for each nonmilk-drinking child. (Report of the California School Milk Survey.)

LEGISLATION CONSTITUTIONAL.

This bill if it becomes a law would be clearly constitutional. Its constitutionality could be sustained, first, on the theory of prevention of fraud and deception; second, on the theory of the preservation of public health; third, the law can be sustained on the theory of the protection of the great dairy industry from irreparable injury. This would be for the benefit of the public or public welfare.

The Supreme Court can sustain this law much easier than in the case of the trading-stamp laws. The Supreme Court upheld the Florida law prohibiting the shipment out of the State of immature citrus fruit on the theory that it was within the police power of the State to prevent the shipment from the State of fruit, which would bring discredit upon the fruit-growing industry of a State.

It certainly is equally within the power of a State or the United States to prevent the milk it produces from being robbed of its butter fat and vitamine properties and manufactured into an inferior imitation of real milk and sent out to prejudice and unfavorably advertise the great dairy industry.

In the case of Hebe Co. et al. *v.* Shaw, Secretary of Agriculture of Ohio, et al. (Report, vol. 248, U. S. Repts. p. 297), the Ohio law was sustained, which forbids under criminal penalty the manufacture, sale, and so forth, of condensed milk unless made from unadulterated milk from which the cream has not been removed and in which the milk solids are equivalent to 12 per cent crude milk and 25 per cent fat.

The court held in this case:

We are satisfied that the statute as construed by us is not invalidated by the fourteenth amendment. The purpose to recommend a certain minimum or nutritive element and prevent fraud may be carried out in this way even though condensed, skimmed milk and Hebe should be admitted to be wholesome.

[Applause.]

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. BROWNE of Wisconsin. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. JACOWAY. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 10 minutes.

Mr. JACOWAY. I yield five minutes to the gentleman from Arkansas [Mr. WINGO].

The CHAIRMAN. The gentleman from Arkansas is recognized for five minutes.

Mr. WINGO. Mr. Chairman, this effort to destroy the market of the American farmer for one of his products naturally evokes a protest from any man who is a real friend of the farmer.

I was surprised at the remarks of the lady from Oklahoma [Miss ROBERTSON]. She made two arguments that were contradictory. She is an expert on custards. She knows something about custards, and she asserted that she had used this product you propose to outlaw in the making of custards, and stated that it made good custards.

Miss ROBERTSON. Yes; but when I made that statement I did not say that I would recommend that those custards be fed to babies.

Mr. WINGO. Yes; I have raised babies, but not on custard. I am very fond of custards. If I want to use this product to make custards, why should the lady object? Why should she vote to prohibit the shipment of this product to me, so that I could put it in custards? I have raised babies, and I know something about babies. If a man who will go home and assume that his wife does not know anything about raising babies when she has told him to go and buy some milk for the baby and he brings home condensed milk for the baby, just see what happens. [Laughter.]

Let your wife tell you to bring home some milk for the baby and you take home Carnation or any other brand of condensed milk, if she has any intelligence as regards the quality of food and knows about the proper raising of babies she will give you such advice that you will not make the same mistake another time. [Laughter.]

Gentlemen, you are piling law on law. The rule is clear that Congress has the right to protect people in certain ways through interstate commerce regulation. If there is anything that is misbranded or concerning which there is a fraudulent misrepresentation you have the right, and you have the power to exercise that right, to bar it from interstate commerce. If this can here is fraudulently branded, or a merchant on Fourteenth Street makes the representation that a Member quoted, he can be indicted under the laws of the District of Columbia and under the laws of every State in the Union. You have law now to punish the very fraud they complain of in every State in the Union, including the District of Columbia.

Now, I know that the theory of the modern socialist and Bolshevist is that the proper function of government is to stand at the elbow of men and women, stating what is good for them to wear and what is good for them to eat, and making the choice of their food. That is the modern theory. But, gentlemen, you do not raise strong men like those from North Carolina, to whom the lady from Oklahoma [Miss ROBERTSON] referred, by having the Government stand by and, through its agents, dictate to them what they shall eat. On that basis you would have a right to say whether a mother should dress a baby in red

flannel or in cotton. As for me, I do not propose to let anybody else tell me what kind of clothing I shall put on my child or what kind of food I shall furnish to him.

Gentlemen, I repeat, that if you misbrand this can, you have already a law upon it. If the groceryman says it is milk and represents it as having the same quality as milk, he could be indicted in my own State and in every State in the Union. You know the modern theory about States and communities——

Mr. LOWREY. Mr. Chairman, will the gentleman yield?

Mr. WINGO. I will ask the gentleman not to interrupt me now.

That modern theory is that the States and the local communities and even the parents themselves can not be trusted; that you must have a Federal law and Federal officers to guide and to protect them. If you can pass this kind of a statute there are 100 other propositions that people object to, and they can come in and ask Congress to bar those articles from interstate commerce. There is another substitute that the lady from Oklahoma [Miss ROBERTSON] is friendly to. I do not remember the name of it now. I prefer it to whipped cream. I think it is better. A good many ladies prefer it. Yet it is not whipped cream. She would bar that from interstate commerce. Why, if you follow this to its logical conclusion you set up the judgment of the lawmakers as to what food is good for men and what food is bad. It is not a question of poisonous substances. It is not a question of things that are admittedly dangerous to public health in a general way. It is admitted that this is a good substitute for some things. [Applause.]

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. VOIGT. I yield three minutes to the gentleman from New York [Mr. FISH].

Mr. FISH. Mr. Chairman, representing one of the largest milk-producing districts in the United States, a district that supplies a large part of the milk consumed in New York City, I want to urge the immediate enactment of this legislation to prohibit interstate commerce in filled milk. The dairymen in our section of the country are eking out a very precarious living. The gentleman from Texas seems worried about the price of milk. If you permit imitations to be passed off for condensed milk, you are wiping out one of the main by-products of the milk producers, and of course if you do that the price of milk is bound to go up or the dairy industry will be wiped out. In our section dairymen average possibly $500 or $600 a year net profit, with the whole family working from 12 to 14 hours a day. They have big investments in stock and buildings, and besides working long hours incur a big risk from disease and the chance of losing their entire herds. During the war the milk industry in competition with the shipbuilding and other war industries which paid high wages was almost wiped out. The herds were reduced because of the impossibility to secure farm hands or to pay the prevailing rate of wages, yet the price of milk remained approximately the same.

The question is simply this: Is the production of milk an essential industry or is it not? Should we protect essential industries? That is what the dairymen are asking for here. This filled milk is not a fraud. It is simply a perfect imitation of condensed milk. In fact, it is exactly the same as condensed milk, except that it is without nutrition and has no value as far as feeding babies is concerned. This essential industry comes here asking protection, not from frauds, but from such imitations and substitutes. Why, this Hebe compound might just as well be chalk and water as far as benefiting the children of this country. We all know that there are thousands and tens of thousands of mothers who can not tell the difference, who can not even read, and who buy this filled milk because they think it is the same as condensed milk. It is exactly the same in appearance, and vast numbers of the women of this country use it for condensed milk. We ask this protection of an essential industry, for the protection of hundreds of thousands of children of this country and the consuming public. [Applause.]

(Bill passed House May 25, 1922.)

The CHAIRMAN. The gentleman from Wisconsin [Mr. VOIGT] has seven minutes remaining and the gentleman from Arkansas [Mr. JACOWAY] four minutes remaining.

Mr. ECHOLS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from West Virginia asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The extension of remarks referred to are here printed in full as follows:

Mr. ECHOLS. Mr. Speaker, I am opposed to the pending bill for three reasons:

First. It will increase the price of wholesome milk to the consumer and add to the taxation of the country.

Second. It is a violation of the Constitution.

Third. It is the most vicious sort of class legislation.

I shall not undertake to discuss the first, for the simple reason it is self-evident if we destroy competition in any commodity and increase the number of Government employees, the cost of the commodity and taxation will go up.

As to the second, I shall only say if Congress has the power to prohibit the transportation in interstate commerce of a food product, although that food product is inferior in quality to some other product of a similar nature, it likewise has power to prohibit the transportation of an inferior grade of coal or lumber for the same reason. However, there is nothing to show that "filled milk" is injurious to the health of the individual. It may be that it is inferior in quality to pure fresh milk, but that is not a reason for prohibiting its manufacture and sale in the District and our possessions or to prohibit its transportation in interstate commerce.

The advocates of this bill are far from harmonious in their statements relating to this product. One advocate [Mr. KNUTSON] in his argument says:

> The bill seeks to put a stop to a flagrant fraud.

Another [Mr. FISH] says:

> This "filled milk" is not a fraud.

There is, of course, no fraud. Every can of this product has plainly stamped thereon the contents of the can. To defraud is to deceive. No one can be deceived when he is plainly told what he is buying. But they say it is not good for babies. That may be so; neither are cucumbers, raw turnips, and a hundred other food articles; but that is not a reason for prohibiting their transportation from one State to another. All such legislation as this bill proposes is asked for on the ground of public welfare. It has no merit, so the baby is made the excuse to bring it support.

The whole purpose of this bill is to put the manufacturers of "filled milk" out of business because their product comes in competition with the dairymen of the country. "Filled" or condensed milk is the only semblance of milk that can be obtained by hundreds of poor people in the industrial sections of the country. If they are deprived of the right to purchase "filled milk," then they are deprived of the right to purchase any sort or semblance of milk whatever. If this bill becomes a law, the price of milk will go higher than it now is, and the poorer classes of people who can buy it now will not be able to reach it at all then. It is the most vicious piece of legislation that has been considered by the House of Representatives in the three years that I have been a Member.

If "filled milk" is injurious to the health of the people who use it, then there is a law in every State in the Union to punish those who sell it. The people in the Tropics use as one of their principal articles of food the products of the coconut. We here use coconut butter, and many people are very fond of it. No one, so far as I am advised, has ever been told that it is injurious to the health of the user.

The State legislatures and the Federal Government are passing annually some 15,000 statutes, and the courts of the country are rendering annually more than 15,000 opinions in an effort to interpret and apply these statutes. It is next to impossible for the individual possessed of even more than ordinary intelligence to understand and comply with the already too numerous laws. This piece of legislation will but add to the difficulties, and in the end result in nothing but additional litigation and cost burdens. There are now several hundred—some one has said more than 700—boards, bureaus, committees, commissions, departments, and so forth, here at the seat of the Government. Each one adds to the burden of taxation. Many of them are wholly useless, and some of them are even dangerously harmful. Some appointed to perform a specific duty which could have been performed in a short time have been in existence more than a hundred years and still are asking for appropriations and doing nothing.

This bill will add another to the list. Most of these boards, bureaus, commissions, and so forth, are the result of class agitation and class legislation. It has become very common for a few individuals, when not satisfied with things as they are, to insist upon the appointment of an investigating board, to be followed by a special measure peculiarly applicable to their particular grievances creating some new governmental agency to administer that law. Instead of forecasting the ultimate result of such legislation and making laws applicable to all the people, we have grown into the habit of passing laws applicable to classes; and the result is so confusing and works such manifest injustice we try to escape from one confusion by enacting

another statute that will have no good result but will add to the hopeless confusion we are now experiencing. The people of the country are weary of so much legislation that they do not understand and could not comply with if they did understand it. All of these difficulties give the paternalist and the demagogue a chance to propose some new "ism" or "scheme" promising relief. Words without number have been spoken in the last few years on nationalization of the industries of the country under the guise of public welfare, most of which were without thought and dangerous. Only recently the head of a great organization advocated the nationalization of the coal mines, but without any explanation of what such nationalization would mean. Nothing to show that coal would be produced and sold to the consumer cheaper than it is under the present system; nothing to show that the laborer who mines the coal would receive a greater compensation for his services than he now receives. We had a temporary nationalization of the railroads, from which we have not recovered and will not for the next quarter of a century.

Every time Congress passes an act providing for class legislation or class preferment, the darkness of the clouds that hover over this Republic become a little more dense. If the history of the world has settled any one fact, it has settled the fact that any government that tries to run everything will soon find itself upon the rocks. Any government that permits itself to be led into the realms of passion and hatred where it does not require its citizens to recognize the rights of others; where it legislates wholly in the interest of one class to the detriment of another, as this bill does, will soon find itself in the position of being unable to protect the life of its citizens. Any class of men that does not recognize the rights of others to carry on a legitimate business, although it may come in competition with their business, is a dangerous class to trust the control of the Government to.

There is nothing new in the fallacies and the "isms" proposed by the paternalist or the demagogue of to-day. All of them were tried centuries ago. They prate about democracy, talk about social justice and self-determination, and yet no one has ever been able to tell us what social justice is or where self-determination is practicable. Russia, with her starving millions, is the latest example of "self-determination" and class preferment. The present régime has brought more suffering to the people of that great land of opportunity and wealth than all the Czars who have reigned throughout the ages. The terror, crime, and hatred in Russia to-day surpass that of any other country in all history. Russia is a government without law, and a government without law is despotism; yet we were told by the Bolshevist and the Socialist that when the present régime in Russia started it was the fulfillment of the dream of the ages. Our country is drifting into a realm of paternalism where the Government proposes to stand guardian for the individual. No effort upon the part of the individual to protect his own rights and maintain himself is required. The pending bill is another step in the direction of socialism. It undertakes to say that the Government will take charge of individual judgment, tell the people what they must eat, whether the food they eat is wholesome or not, or whether it is to their liking. I am just as unwilling to force the individual to use "filled milk" as I am to deprive him of the privilege of using it. It is going a long way for the Government by a mere fiat of legislation to say to the public that a certain article of food shall not be used by them, although there is nothing injurious to the health of those who purchase and use it. This bill is class legislation run mad. If this sort of legislation is to be continued, then no concern can safely engage in manufacture of any new product whatever. If it should do so and that product should come in competition with the product of some other class more numerous than the one to which it belongs, it could expect the Congress to come along any minute and by mere legislative declaration, as was stated by the gentleman from Iowa [Mr. TOWNER] in proposing his amendment, which declares "filled milk" is deleterious, prohibit the sale of its product in the District of Columbia and our possessions and prohibit the transportation thereof in interstate commerce.

Mr. VOIGT. I yield two minutes to the gentleman from Michigan [Mr. KETCHAM].

Mr. KETCHAM. Mr. Chairman and members of the committee, during the three hours of general debate all angles of this question of the sale of a fraudulent substitute for milk have been presented very ably and earnestly, and we are greatly indebted to Members who have been to such great pains to arrange and present the many logical reasons for the passage of this bill.

Before entering on debate under the five-minute rule it may be helpful, however, to correct a few false impressions that have been left by some of the proponents of the measure.

The distinguished member of the committee from Louisiana [Mr. ASWELL] in the course of his argument led you to believe that the manufacture of this bogus milk product would make a great market for separated or skim milk. Do the manufacturers of this product buy separated or skim milk from the producers and then by the addition of the vegetable oil make up this fraudulent article? Nay verily! The overwhelming percentage of their purchases from the farmers is whole milk. The butter fat is extracted and vegetable fat substituted, thus making a profit both ways. One company in 1919 purchased 97.2 per cent whole milk and 2.08 per cent skim milk from which to make its bogus product. In 1920 this same company purchased 94.3 per cent whole milk and 5.7 per cent skim milk for the same purpose.

It must not be forgotten that the foundation of this fraudulent article is milk, and that every pound of it that is placed on the market displaces just that much wholesome product. Suppose that all whole milk were made over into this bogus article. Would the sum total of milk be increased? To urge such an argument is but to show to what extremes the opponents of this helpful legislation are forced to go in their attempts to defeat it. No, Mr. Chairman, the opponents of this bill can not justify themselves in urging that by turning whole milk into filled milk they are increasing the food supply. The dairy cow regulates that matter, and while the eloquence of the gentleman in opposition to this law may be very persuasive here, it does not inspire the dairy cow of the country to give one additional quart of milk.

The real purpose in this bogus milk game is to make money, not to prevent food waste. How is it done? The butter fat that sells for 35 cents per pound is extracted and vegetable fat costing 12 cents per pound is substituted. This bogus product is then put up in identical shaped cans and is sold upon the reputation of real milk.

The distinguished gentleman from Louisiana [Mr. ASWELL] further pleads for this bogus milk on the score of its cheapness and consequent advantage to the poor. Important if true. Let us see: First, let us look for a moment at the testimony of Mr. McKee, a representative of the Hebe Co., on page 8 of series H, part 1 of the hearings. He says that the price per can is 2¾ cents less for filled milk than for condensed milk. The cost to the retailer is evidently much lower per case. How about the customer? I present for the information of the committee in this connection a group of photographs of both condensed and filled milk actual sales with the price mark clearly indicated in each case. Three cans of each appear in the first picture. The three cans of filled milk total 19 cents, the three of evaporated 20 cents. One-third of a cent per can less for a bogus product whose representative testifies that its cost is 2¾ cents less. Here's another—nine cans condensed milk, 95 cents, and nine cans filled milk, 90 cents. One half a cent less per can for bogus product which cost the retailer 2¾ cents less per can. These cans were actual purchases in retail stores outside of chain stores.

Having disposed of the arguments of the opponents of this bill on the subject of food waste and cheapness, it may be well to turn for a moment to the food-value argument. It has been repeatedly stated here this afternoon that filled milk is injurious or deleterious to human health. Everyone concedes, of course, that it is not positively bad, but no one disputes the fact that it is negatively good. It is a sham, a pretense, and literally a wolf in sheep's clothing among food products. Were it actually poisonous even the most ignorant would not be misled. But masquerading under a good name it deceives even the elect and thus becomes doubly dangerous. President Harding has recently uttered some stirring words about "conscience in business." The sentiments he expressed in that splendid appeal are especially in point in the discussion of this bill. When in the name of "business" we attempt to foist upon the innocent, the poor, and the unwary a spurious article of food, it is certainly high time to call for "conscience in business," and for this reason, if no other, every vote should be cast for this bill.

I can not speak in scientific phraseology on the value of this bogus milk, but I can bring to the committee a farm illustration that will be convincing to anyone who knows farm life. If one of a pair of twin calves is allowed to take his nourishment from its mother according to nature's method and the other is taken away and fed upon separated or skim milk, even with substitutes added, is there any comparison at the end of any period of experimentation? The calf fed by nature's method will be bright-eyed, sleek-coated, symmetrical in form, and a beautiful thing for every lover of animals to look upon. The calf fed on separated or skim milk will be undersized, "poddy," and in every way inferior to its twin. The butcher, I apprehend, would have no trouble in choosing the better one for the block, even

though coconut oil, or even peanut oil, had been added to the ration of the hand-fed calf. Shall we get lost or confused in the bogs of scientific argument on the subject of nourishment in this filled-milk product when any 10-year-old farm boy sees and knows the truth in it?

The deception and fraud in the sale of this bogus product can not be too strongly emphasized, in my opinion. In order to set this out clearly, I quote, through the courtesy of Mr. A. A. Miller, editor of the Milk Producers' Review, of Philadelphia, some statements of dealers in Pennsylvania and New Jersey:

1. Sell Pet but no Hebe milk. Pet same as Hebe. (Pet, condensed; Hebe, filled.)
2. Silver Key all right; same as Borden's. (Silver Key, filled; Borden's, condensed.)
3. Hebe good as Borden's.
4. Hebe just as good as others; all alike; good for children.
5. Hebe, good milk; good for babies; yes, good for everything.
6. Recommended Hebe for babies.

Many others of similar import could be given, but these are fairly indicative of the trade practices, particularly in poorer sections of our large centers of population. We certainly should be willing and ready to prevent this deception and fraud as far as our power goes, both on account of health and moral considerations.

Something has been said, Mr. Chairman, concerning the selfish interest of dairymen in this measure. Because of the fact that whole milk is purchased by the manufacturers of filled milk, I feel that this argument is unfair. The fear of the dairyman is that the sale of this bogus milk product will discredit his whole business and thus do him immeasurable harm. He is clearly entitled to have the generally accepted high character of the whole milk product which he markets preserved. His interest in the matter is one with public interest.

Mr. Chairman, as I see this proposition it summarizes about as follows: Responding to the urge of war-time necessity, we went far afield in search of "substitutes." The use of "substitutes" tolerated under the stress of war has become strongly intrenched in our commercial life. The profit in them lures many to exert every energy to continue their use. Is it not time to right-about face? Are such practices even "good business"? Shall not the admonition of the President urging "conscience in business" be heeded?

Filled milk adds nothing to our food supply, is not perceptibly cheaper, and clearly seeks to steal the good name of whole milk, thereby endangering the whole dairy industry. Sound public policy is against it, and it is, therefore, my hope that the committee will approve this bill which prohibits it as an article of interstate commerce.

By unanimous consent leave to extend remarks was granted to Miss ROBERTSON, Mr. JONES of Texas, and Mr. CLAGUE.

Mr. JACOWAY. Mr. Chairman, I yield the balance of my time to the gentleman from Mississippi [Mr. LOWREY].

Mr. LOWREY. Mr. Chairman, we are through raising babies at my house. We have raised eight, and we did not use condensed milk. I am still for the protection of the babies. It seems to me that when the gentleman who preceded me undertook to defend his position he sufficiently sustained our position. The gentleman says that he went to 25 merchants in this town who a year ago were selling this product as condensed milk and that they are not selling it now, because it is properly labeled. If it is properly labeled and that has produced the effect, why not simply enact a law requiring a proper label and not attack the industry? That is all the argument I have to present. But as the gentleman has given me the balance of the time I feel constrained to make a little protest against the conduct of my friend and colleague from Mississippi [Mr. SISSON]. I do not think it exactly polite and worthy of a Mississippi Congressman to stand and look down at people's ankles and then comment on their hosiery, as the gentleman did when he had the floor. [Laughter.]

Mr. VOIGT. Mr. Chairman, I yield two minutes to the gentleman from South Dakota [Mr. WILLIAMSON].

Mr. WILLIAMSON. Mr. Chairman and gentlemen, I have been very much surprised this afternoon in noting that there has not been a single Member on the minority side who has risen in defense of this bill. Neither have gentlemen on that side of the House shown us that this bogus milk has a single element of real food value in it. The truth of the matter is and the evidence all shows that this product which is being sold as filled milk has the vitamines taken out of it, and that is the only essential element in milk that would be of any value so far as sustaining human life is concerned. There is not a man here, raised on a farm, who remembers the time when the cream separator came into vogue who does not also recall that when he attempted to feed the calves on the milk after the separator had taken the cream out of it that the calves got thinner and thinner and that some died. Calves can not be raised on that kind of a diet. And yet this same milk is taken, mixed with coconut oil, and fed to children. [Applause.]

To permit a compound consisting of separator skimmed milk and coconut oil to be sold as a substitute for the genuine article is to permit the people's money to be taken under false pretenses. But it is argued that it is not sold as a milk sustitute. How anyone can read the labels upon the cans and the newspaper advertisements describing the virtues of the mixture and arrive at that conclusion is hard to understand. Such labels and every line of the glowing advertisements are calculated to deceive the buyers into the belief that they are really getting a superior product.

The contention that the manufacturers of "Nutro" and "Hebe" and other like concoctions are entitled to consideration, and that we have no right to destroy their investments by destroying their markets, is not impressive in view of the methods employed by them in foisting their all but worthless products upon the unsuspecting public.

Upon the one hand it is being argued by the opponents of the measure that to prohibit the shipment of filled milk in interstate commerce is to deprive the poor of a valuable food product and on the other that it will deprive the farmer of a market for his skimmed milk. Both contentions seem to me untenable. It has been demonstrated by the most convincing proofs and by actual experiments that filled milk is wholly unfit as a diet for infants or children and that it is the mother of rickets and brings on loss of vitality and impairment of vision. If injurious to children, it can have little value for adults. That it is depriving the farmer of a market for his milk is equally ill founded. Skimmed milk is a mere by-product. The more of it that can be used as a substitute for the genuine article, the less demand there will be for the whole milk. Statistics gathered by the Bureau of Markets show pretty conclusively that the compound is gradually reducing the demand for malted and evaporated milk, both of which are manufactured from the whole milk. This has resulted in a corresponding reduction of demand for the products of our dairy herds. Figures presented by the bureau, as given in the committee's report, show that the production of filled milk increased from 35,031,902 pounds in 1917 to 86,561,000 in 1920, while the production of sweetened condensed and unsweetened evaporated milk decreased from 2,030,957,618 pounds in 1919 to 1,461,140,312 in 1921. I regret that I do not have the figures at hand for the corresponding years throughout, as this would be a much more satisfactory comparison. It seems to me that the reasons for the enactment of this bill into law are most convincing and that we should have no hesitancy in supporting it.

Mr. VOIGT. Mr. Chairman, I yield the balance of my time to the gentleman from Kansas [Mr. TINCHER].

Mr. TINCHER. Mr. Chairman and gentlemen of the committee, at the time the hearings were had on the bill this product was being sold in the city and used as food for infants. The attention of the manufacturer having been called to the fact that it was not fit for infants' food, the label was changed. The evidence discloses that there was no nutrition in the substance, and the only reason that they should not be compelled to label it "Not fit for adults" is that it was not shown that it was particularly injurious to adults. But there is no food about it, and no reason why it should be carried in commerce or manufactured. I do not know why anyone should vote to permit the sale of an article used as food that has no nutritious element in it. [Applause.]

The CHAIRMAN. The time of the gentleman has expired, all time has expired, and the Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That whenever used in this act—

(a) The term "person" includes an individual, partnership, corporation, or association;

(b) The term "interstate or foreign commerce" means commerce (1) between any State, Territory, or possession, or the District of Columbia, and any place outside thereof; (2) between points within the same State, Territory, or possession, or within the District of Columbia, but through any place outside thereof; or (3) within any Territory or possession, or within the District of Columbia; and

(c) The term "filled milk" means any milk, cream, or skimmed milk, whether or not condensed, evaporated, concentrated, powdered, dried, or desiccated, to which has been added, or which has been blended or compounded with, any fat or oil other than milk fat, so that the resulting product is in imitation or semblance of milk, cream, or skimmed milk, whether or not condensed, evaporated, concentrated, powdered, dried, or desiccated.

Mr. TOWNER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 2, line 8, after the word "desiccated," strike out the period, insert a comma, and insert "and as such is an adulterated and deleterious article of food, and when marketed as such constitutes a fraud upon the public."

Mr. TOWNER. Mr. Chairman, I am justified in saying that the author of the bill and at least a part of the Agricultural Committee have agreed to this amendment.

Mr. Chairman, this amendment is offered merely on a legislative declaration of the object and purpose of the legislation. There are three grounds upon which articles of this character may be prohibited from interstate commerce. If the article is adulterated, if the article is deleterious as a food product, or if it is being marketed and the process of marketing constitutes a fraud upon the public, then interstate commerce may take cognizance of the conditions and the article may be prohibited from being shipped in interstate commerce.

Mr. JONES of Texas. Mr. Chairman, will the gentleman yield?

Mr. TOWNER. Yes.

Mr. JONES of Texas. The gentleman's amendment is in line with the suggestion that I made a while ago, and would go far to remove the objections to the bill.

Mr. TOWNER. This is a legislative declaration of the fact that is claimed by the proponents of the bill. It is also a declaration of the purposes of the legislation. Of course I know that it is not binding upon the courts, but in many cases, as gentlemen who are familiar with the legal aspects of the matter know, the declaration of the legislative body in regard to the purpose of the legislation goes very far with the courts in determining whether or not it is constitutional.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. TOWNER. Yes.

Mr. WALSH. Will not this add to the allegations that must be set forth in the indictment and proved?

Mr. TOWNER. I do not know. I do not know, really, as to whether an indictment could be sustained against one who has violated the terms of the act without such allegation, but certainly it will suggest to the district attorney who is drawing the indictment that he should add this declaration. In any event none of these propositions is harmful, and they may be very important, and as such it seems to me that we are justified in asking for the approval of the amendment by the committee.

Mr. HARDY of Texas. Mr. Chairman, will the gentleman yield?

Mr. TOWNER. Yes.

Mr. HARDY of Texas. Does the gentleman think that the recital of this alleged fact that this material is deleterious would establish it as final? In other words, does the legislative declaration make that a fact?

Mr. TOWNER. If the gentleman had been listening attentively, he would have remembered that I just said it would not be binding upon the courts. It is, however, persuasive. It indicates the purpose and object of the legislation, and if in any case it is found as a matter of fact that the particular article under investigation at that time is adulterated or is deleterious to health, or has been so marketed as to constitute a fraud upon the public, then it would be subject to regulation in interstate commerce.

Mr. MONTAGUE. Mr. Chairman, will the gentleman yield?

Mr. TOWNER. Yes.

Mr. MONTAGUE. As I caught the gentleman's amendment, of which I heartily approve, he undertakes to give the real reasons for the bill.

Mr. TOWNER. Yes; I think that might be properly stated of it.

Mr. MONTAGUE. In other words, that is the object and purpose of the bill.

Mr. TOWNER. Yes. It is to prevent an adulterated food from being sold; it is to prevent a deleterious food from being sold; it is to prevent a fraud upon the public.

Mr. RAKER. Mr. Chairman, I move to strike out the last word. I am in favor of this amendment. With this amendment adopted, I am in favor of this bill. It cures the imperfections of the bill beyond all question. As the bill stood there was serious question upon its face whether or not it could be declared constitutional by the courts. This adds what ought to be added to this character of legislation. I call attention to the fact that the bill prohibits the addition of any fat other than milk fat, or provides that the addition of any fat other than milk fat would prohibit the article from being entered in interstate commerce. In the powdered, dried, or desiccated milk there may be a small percentage of fat added, other than milk fat, when, as a matter of fact, all of the substance of the milk that comes from the cow in evaporated milk is retained. A little fat may be added to preserve it in the can. Without this amendment that evaporated milk would be prohibited in interstate commerce under the bill, but with the amendment proposed by the gentleman from Iowa it must be proven, as it ought to be, that it is an adulteration, that it is deleterious for food purposes, or that it is a fraud upon the public.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. RAKER. Yes.

Mr. WALSH. Does that amendment not make the definition comport with the pure food law?

Mr. RAKER. I think it does, as far as it goes, and it ought to.

Mr. WALSH. Then, if you make it comply with the pure food requirements, what is the necessity for the rest of the bill?

Mr. RAKER. Why, they have not been enforcing such laws in this instance. It may be deleterious and would be thereby prohibited from sale in a State. It may be an adulteration and it might not be prohibited by the pure food law, because you retain in the milk all of the sustenance, and if you put in oil or any fat for the preservation on account of shipment, or on account of drying, and so forth, you would be prohibited from exporting it or transporting it from one State to the other under the original bill. This amendment cures that evil, as it should be cured.

Mr. WALSH. Does the gentleman contend that the pure food law permits the sale of adulterated or deleterious substances in food?

Mr. RAKER. I do not and did not. I made no such statement, nor one that any such inference could be drawn therefrom. An adulteration that is not injurious, not against the law, is what is now before the House.

Mr. WALSH. Whether it may not be deleterious or injurious to public health?

Mr. RAKER. Oh, not at all. This would be adulteration if you put anything in it; the adulteration must be deleterious and injurious to health; must be against the pure food law.

Mr. MOORE of Virginia. Will the gentleman yield?

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAKER. I ask that I may proceed for one minute.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE of Virginia. I suggest this as an answer to the question of the gentleman from Massachusetts, that under the pure food law the matter of what are or are not deleterious in the various foods is dealt with by regulation by the Department of Agriculture.

Mr. RAKER. And specified.

Mr. MOORE of Virginia. Now, we consider it necessary—those of us who favor this measure—to deal specifically with this subject, and I agree fully with the gentleman from California and with the gentleman from Iowa [Mr. TOWNER] that the statement of fact now to be incorporated in the bill will be most persuasive upon any court that comes to consider the constitutionality of this measure.

Mr. RAKER. The amendment should be adopted. It will give this bill a real chance for its life later.

The CHAIRMAN. The time of the gentleman has expired.

Mr. VOIGT. Mr. Chairman, the committee has no objection to this amendment, and I move that all debate upon this section and all amendments thereto be now closed.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 2. It shall be unlawful for any person to manufacture within any Territory or possession, or within the District of Columbia, or to ship or deliver for shipment in interstate or foreign commerce, any filled milk.

Mr. WINGO. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. Did the gentleman offer a pro forma amendment or an actual amendment?

Mr. WINGO. An actual amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 9, strike out all of section 2.

Mr. WINGO. Mr. Chairman, now this section would make it unlawful to ship filled milk for any purpose, whether it is intended to feed hogs, man, or what not, across State lines—or feed poodle dogs, as some gentlemen here suggest, but I am not much interested in poodle dogs. In other words, the taking of it across the State line into the city of Texarkana for a dairyman on the edge of Texarkana to feed the hogs or any other purpose is made unlawful. But I feel fully satisfied if you want to prevent a fraud upon the public, you have already made a stump speech in the amendment already adopted, showing Congress is in favor of the present law against fraud, because you have got

plenty of laws necessary to punish every fraud that has been complained of here this afternoon, as every lawyer knows. Now, having gone on record and made a stump speech in favor of the enforcement of the present law, you ought to be satisfied without preventing the bringing of filled milk simply across the State line into Texarkana, or from Arkansas into Memphis, or from Memphis into Arkansas, or from Kansas City, Kans., to Kansas City, Mo.

In other words, you say that you are going to prevent its shipment for any purpose and make it unlawful for any purpose. Of course, that is absurd. I am glad you saw fit to tone down your preceding section by making the simple declaration of what you are in favor of; but I hope you will not go so far as to bar the shipment of a food product that may be properly used by men and, not as some one is so afraid of, by babies. Why, the lady from Oklahoma would be barred from shipping in interstate commerce any of this stuff to be used by her in making custard.

Mr. RAKER. Do you think it is just exactly the proper thing to give me any custard pie without any substance to it except the form and looks?

Mr. WINGO. I would not give you any custard pie at all; but if I should give you sawdust and told you it was food, and you did not have any more sense than to eat it, I ought not to be prosecuted; but if you were an infant and I sold you sawdust to eat, I ought to be prosecuted. Under the statute of California you could prosecute me if I sold you sawdust for breakfast food. Anyway, let the lady from Oklahoma still use the filled milk for custard, even if you do not want to use it for any other purpose. [Laughter.]

Mr. VOIGT. Mr. Chairman, I want to say a few words in opposition to this amendment. If the gentleman has the privilege of shipping milk in interstate commerce for the purpose of feeding hogs or anything else, all that would be necessary under this bill would be to color the filled milk. Then you would not violate this law. If the section as it stands now is stricken out, the bill will be killed, and I hope it will be voted down.

I move that all debate on this amendment and amendments thereto be now closed.

The CHAIRMAN. The question is on the motion of the gentleman from Wisconsin [Mr. VOIGT].

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. WINGO. Mr. Chairman, I ask for a division.

The committee divided, and there were—ayes 82, noes 20.

So the motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas [Mr. WINGO].

Mr. JONES of Texas. Mr. Chairman, the pending amendment is an amendment to strike out the paragraph. Would not the amendment offered a while ago take precedence of it in voting?

The CHAIRMAN. That has already been voted on—the amendment offered by the gentleman from Iowa [Mr. TOWNER].

The question now is on the amendment offered by the gentleman from Arkansas.

Mr. JONES of Texas. Before the vote is taken on that amendment, can the other amendment be considered?

The CHAIRMAN. What other amendment?

Mr. JONES of Texas. I have an amendment pending.

Mr. CAMPBELL of Kansas. The amendment could be presented and not be debated.

Mr. JONES of Texas. According to the ruling heretofore made by the Chair, a motion to perfect a paragraph comes before a motion to strike out the paragraph, but after the motion to strike out the paragraph I am afraid the amendment would not be admitted.

The CHAIRMAN. When the gentleman from Texas had the amendment read for information he did not intimate that he offered the amendment for consideration.

Mr. JONES of Texas. I desire to offer it now.

The CHAIRMAN. The gentleman has the right to do so. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES of Texas: Page 2, line 11, after the word "shipment," strike out the word "in," and in line 12 strike out the words "interstate or foreign commerce" and insert, after the word "milk," the following: "to any person in any other State, Territory, or District of the United States or foreign country in which it is at that time unlawful to sell, offer for sale, or tender for sale, or delivery, such milk," so that section 2, as amended, shall read: "It shall be unlawful for any person to manufacture within any Territory or possession, or within the District of Columbia, or to ship, or deliver for shipment, any filled milk to any person in any other State, Territory, or District of the United States or foreign country in which it is at that time unlawful to sell, offer for sale, or tender for sale, or delivery, such milk."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. JONES].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now comes on the amendment offered by the gentleman from Arkansas [Mr. WINGO].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. TUCKER. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. TUCKER. To ask about the amendment I offered a moment ago.

The CHAIRMAN. The amendment was read for information. Does the gentleman desire to offer it?

Mr. TUCKER. I do.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. TUCKER: Page 2, line 11, strike out the words "or to ship or deliver for shipment in interstate or foreign commerce."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia.

The amendment was rejected.

The Clerk read as follows:

SEC. 3. Any person violating any provision of this act shall upon conviction thereof be subject to a fine of not more than $1,000 or imprisonment for not more than one year, or both; except that no penalty shall be enforced for any such violation occurring within 30 days after this act becomes law. When construing and enforcing the provisions of this act, the act, omission, or failure of any person acting for or employed by any individual, partnership, corporation, or association, within the scope of his employment or office, shall in every case be deemed the act, omission, or failure of such individual, partnership, corporation, or association, as well as of such person.

Mr. WARD of North Carolina. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from North Carolina moves to strike out the last word.

Mr. WARD of North Carolina. Mr. Chairman, the district attorney that draws a bill of indictment under this law, and does not incorporate in that bill of indictment the Towner amendment, will have his bill of indictment quashed if there is a lawyer there and a judge on the bench; and when he puts it into his bill of indictment it has got to be proved, and unless he proves it the defendant will be acquitted, as he ought to be. [Applause.]

Mr. LONDON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LONDON: Add a new section, which shall read:

"SEC. 4. This act shall take effect one year after the date of its passage."

Mr. LONDON. Mr. Chairman, I favor this bill. Adulteration of food is one of the worst manifestations of modern commercialism. The ease with which the producers of these spurious articles deceive the unwary makes this legislation necessary. As the most conservative Member of the House, I want to advise you against confiscation. [Laughter.]

I do not believe in spasms of morality. I prefer continuous moral conduct. You have permitted the manufacture of these numerous articles, samples of which have been shown here. You have permitted them in interstate commerce. Investments have been made. Men are employed in these industries. Some regard, some consideration, should be given to them and an opportunity offered to adjust themselves to the new situation which will be created by the legal declaration that these articles shall henceforth be held to be immoral, injurious, unwholesome, deleterious, and what not.

I ask that my amendment be approved. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York.

The question was taken, and the amendment was rejected.

Mr. VOIGT. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 8086) to prohibit the shipment of filled milk in interstate or foreign commerce, had directed him to report the same back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

Mr. VOIGT. Mr. Speaker, I move the previous question on the bill and amendment to final passage.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time.

Mr. WALSH. Mr. Speaker, I ask for the reading of the engrossed bill.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. Will the gentleman from Wyoming withhold his motion for a moment?

Mr. MONDELL. Yes.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3220. An act to amend sections 2, 5, 11, 12, 15, 19, 29, and 30 of the United States warehouse act, approved August 11, 1916.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 3220. An act amending sections 2, 5, 11, 12, 15, 19, 29, and 30 of the United States warehouse act, approved August 11, 1916; to the Committee on Agriculture.

ENROLLED BILL SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 11065. An act making appropriations for the Departments of State and Justice and for the judiciary for the fiscal year ending June 30, 1923, and for other purposes.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that May 23 they had presented to the President of the United States, for his approval, the following bills:

H. R. 9951. An act to amend section 22 of an act approved February 14, 1920, entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes," for the fiscal year ending June 30, 1921;

H. R. 11152. An act to authorize the Bear Mountain Hudson River Bridge Co. to construct and maintain a bridge across the Hudson River near the village of Peekskill, State of New York;

H. R. 10329. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1923, and for other purposes;

H. R. 11645. An act making an appropriation to enable the Department of Justice to investigate and prosecute war frauds; and

H. R. 2193. An act to amend the act entitled "An act to prohibit the importation and use of opium for other than medicinal purposes," approved February 9, 1909, as amended.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. LINTHICUM, indefinitely, on account of illness.

EXTENSION OF REMARKS.

Mr. REED of West Virginia. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the bill S. 2919.

The SPEAKER. The gentleman from West Virginia asks unanimous consent to extend his remarks on the rent bill. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I renew my motion to adjourn.

The SPEAKER. The gentleman from Wyoming moves that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 50 minutes p. m.) the House adjourned until to-morrow, Thursday, May 25, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

616. Under clause 2 of Rule XXIV, a letter from the Director of the United States Veterans' Bureau, transmitting a draft of a bill providing for the making of allotments of appropriations by the United States Veterans' Bureau to the United States Public Health Service was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. LANGLEY: Committee on Public Buildings and Grounds. H. R. 7658. A bill to amend the act approved August 25, 1919, entitled "An act for the relief of contractors and subcontractors for the post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes"; without amendment (Rept. No. 1029). Referred to the Committee of the Whole House on the state of the Union.

Mr. LANGLEY: Committee on Public Buildings and Grounds. H. R. 11588. A bill to amend an act entitled "An act to authorize the Secretary of the Treasury to provide hospital and sanatorium facilities for discharged sick and disabled soldiers, sailors, and marines"; with amendments (Rept. No. 1030). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. TAYLOR of New Jersey: A bill (H. R. 11772) to increase the limit of cost of the United States post office at Bayonne, N. J.; to the Committee on Public Buildings and Grounds.

By Mr. CABLE: A bill (H. R. 11773) relative to naturalization and citizenship of married women; to the Committee on Immigration and Naturalization.

By Mr. NEWTON of Minnesota: A bill (H. R. 11774) to amend the interstate commerce act and the transportation act, 1920; to the Committee on Interstate and Foreign Commerce.

By Mr. MILLER: A bill (H. R. 11775) to enlarge and extend the present United States courthouse, customhouse, and post-office building at Seattle, Wash.; to the Committee on Public Buildings and Grounds.

By Mr. SINCLAIR: A bill (H. R. 11776) to promote agriculture by stabilizing the prices of certain agricultural products; to the Committee on Agriculture.

By Mr. PERLMAN: Joint resolution (H. J. Res. 332) proposing an amendment to the Constitution of the United States regarding the employment of children under 18 years of age; to the Committee on the Judiciary.

By Mr. KIESS: Concurrent resolution (H. Con. Res. 59) to provide for the printing of 3,000 additional copies of the report of the Alien Property Custodian; to the Committee on Printing.

By Mr. YOUNG: Resolution (H. Res. 353) for the immediate consideration of Senate bill 2775; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CANNON: A bill (H. R. 11777) granting an increase of pension to Eliza J. Hall; to the Committee on Invalid Pensions.

By Mr. GENSMAN: A bill (H. R. 11778) to investigate the claims of and to enroll certain persons, if entitled, with the Choctaw Tribe of Indians; to the Committee on Indian Affairs.

Also, a bill (H. R. 11779) granting a pension to Alexander Seals; to the Committee on Invalid Pensions.

By Mr. GOLDSBOROUGH: A bill (H. R. 11780) for the relief of Roland Webster; to the Committee on Claims.

By Mr. LANGLEY: A bill (H. R. 11781) granting an increase of pension to Frank P. Collins; to the Committee on Invalid Pensions.

By Mr. McPHERSON: A bill (H. R. 11782) granting a pension to Lucy Michener; to the Committee on Invalid Pensions.

By Mr. QUIN: A bill (H. R. 11783) granting an increase of pension to Girard G. Butler; to the Committee on Pensions.

By Mr. THOMAS: A bill (H. R. 11784) granting a pension to Eugene Key; to the Committee on Invalid Pensions.

By Mr. WALSH: A bill (H. R. 11785) granting a pension to Sarah Barnes Baker; to the Committee on Pensions.

Also, a bill (H. R. 11786) granting a pension to George W. Briggs; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11787) granting a pension to Frederick B. Eldridge; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5753. By Mr. BURTON: Resolution from the American Legion at Cleveland commending the stand taken by Secretary Hughes in declining to enter into a conference with the soviets of Russia; to the Committee on Foreign Affairs.

5754. By Mr. CHRISTOPHERSON: Resolutions passed by the Black Hills Mining Men's Association, May 18, 1922, protesting against the enactment of the Denison bill; to the Committee on Interstate and Foreign Commerce.

5755. By Mr. CURRY: Petition of 14 residents of Napa County, Calif., protesting against the enactment of the pending Sunday bills; to the Committee on the District of Columbia.

5756. Also, petition of 33 residents of Vallejo, Calif., protesting against the enactment of the Sunday law; to the Committee on the District of Columbia.

5757. By Mr. KISSEL: Petition of Oriental Vegetable Oils Co., San Francisco and New York City, relative to the tariff bill (H. R. 7456); to the Committee on Ways and Means.

5758. Also, petition of Metal Trades Council, Brooklyn, N. Y., relative to House bill 11214; to the Committee on Naval Affairs.

5759. By Mr. MAPES: Petition of Presbytery of Grand Rapids, signed by Harry E. Porter, presiding officer, and Willard K. Spencer, secretary, favoring the passage of House Joint Resolution No. 131, House bill 9753, and Senate Joint Resolution No. 31; to the Committee on the Judiciary.

5760. By Mr. RAKER: Petition of Mr. C. O. Wellock, of San Anselmo, Calif., indorsing and urging the early passage of the Bursum and Morgan pension bills; to the Committee on Invalid Pensions.

5761. Also, resolution No. 27690 of the common council of the city of San Diego, Calif., indorsing and urging the passage of House bill 11449, to provide for the protection and development of the lower Colorado River Basin; to the Committee on Irrigation of Arid Lands.

5762. Also, petition of the Oakland Chamber of Commerce, of Oakland, Calif.; the Stockton Chamber of Commerce, of Stockton, Calif.; the Growers National Bank and the L. Powers Fruit Co., of Fresno, Calif., all protesting against any change in the transportation act of 1920 as proposed by the Sweet and Capper bills (H. R. 6861 and S. 1150); to the Committee on Interstate and Foreign Commerce.

5763. Also, petition of Grand Commandery of Knights Templar of the State of California, the Grand Council of Royal and Select Masters of the State of California, and the Grand Chapter of Royal Arch Masons of the State of California, advocating and indorsing the Towner-Sterling bill, which has for its purpose the improvement of educational facilities in the United States; to the Committee on Education.

5764. Also, petition of Chamber of Commerce of the State of New York, favoring the merchant marine bill; to the Committee on Merchant Marine and Fisheries.

5765. Also, petition of the Rice Millers' Association, of New Orleans, relative to tariff rates on rice; Frank O. Sundquist and Trobeck & Johnson, of Los Angeles, Calif., protesting against paragraph 1116 of the tariff bill; to the Committee on Ways and Means.

5766. Also, petition of Texas Chamber of Commerce, Dallas, Tex., relative to tax-free securities, and Charles Tartaglia & Bros., of Los Angeles, protesting against paragraph 1116 of the tariff bill (H. R. 7456); to the Committee on Ways and Means.

5767. Also, petition of the National Dairy Union, Washington, D. C., indorsing House bill 8086; to the Committee on Agriculture.

5768. Also, petition of the Pacific Rod & Gun Club, of San Francisco, Calif., indorsing and urging the passage of House bill 5823, known as the public shooting and game refuge bill; to the Committee on Agriculture.

5769. Also, petition of Camp St. Louis, No. 731, United Confederate Veterans, St. Louis, Mo., relative to amendment of the statutes concerning the soldiers' homes maintained by the Federal Government; to the Committee on Military Affairs.

5770. By Mr. SMITH of Idaho: Petition of citizens of Fairfield, Idaho, favoring the enactment of the Voigt bill (H. R. 8086), to prohibit shipment of filled milk in interstate or foreign commerce; to the Committee on Agriculture.

5771. By Mr. SNYDER: Petition of Ralph Crego, Charles E. Garlock, William Gibson, Herkimer, N. Y., and L. A. White, Utica, N. Y., favoring the passage of the Chandler pension bill (H. R. 9198), increasing the pensions of volunteers serving in the war with Spain or China or Philippine expeditions; to the Committee on Pensions.

5772. By Mr. WOODS of Virginia: Petition of Frances L. Brophy and others of the sixth Virginia district, asking for a fair duty on imported kid gloves; to the Committee on Ways and Means.

5773. Also, resolutions adopted by the Sons and Daughters of Liberty, Roanoke, Va., representing more than 300 members, urging the passage of the Towner education bill; to the Committee on Education.
